

REPORT ON THE FINANCES.

DECEMBER, 1805.

In obedience to the directions of the act supplementary to the act entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report and estimates:

REVENUE AND RECEIPTS.

The net revenue, arising from duties on merchandise and tonnage, which accrued during the year 1801, amounted to \$12,020,279

The nett revenue, arising from the same source, which accrued during the year 1802 amounted to 10,154,564

That which accrued during the year 1803, amounted to 11,306,430

And that which accrued during the year 1804, amounted, after deducting that portion which arose from the additional duties, constituting the Mediterranean fund, as will appear by the statement (A,) to 12,672,323

It is ascertained that the nett revenue which has accrued during the first three quarters of the year 1805 does not fall short of that of the corresponding quarters of the year 1804; and that branch of the revenue may, exclusively of the Mediterranean fund, be safely estimated, for the present, at twelve millions of dollars, which is nearly the average of the two years 1803 and 1804.

The defalcation which took place in the year 1802, and the increase in the next following years, sufficiently show that no inconsiderable portion of that branch of the revenue is due to the neutrality of the United States, during the continuance of war in Europe. Yet, if the revenue of 1802, the only year of European peace since 1792, be considered as the best basis on which to form an estimate, this, with an addition of ten per cent. on account of the increase of population for three years, and of near 300,000 dollars, the computed revenue of New Orleans, will give a result of near eleven millions and a half. The statement (B) exhibits in detail the several species of merchandise and other sources from which that revenue was collected during the year 1804.

The revenue arising from the sales of public lands has been greater during the year ending on the 30th September, 1805, than that of any preceding year. It appears by the statement (C) that during that period, besides 145,000 acres sold to persons claiming a right of pre-emption, 474,000 acres have been disposed of at the ordinary sales; making, altogether, with the preceding sales, from the time when the land offices were opened in 1800 and 1801, an aggregate of near two millions of acres. The actual payments by purchasers, which, during the year ending on the 30th September, 1804, had amounted to 432,000 dollars, and had not in any one previous year exceeded 250,000 dollars, have, during the year ending on the 30th September 1805, amounted to 575,000 dollars; of which sum 535,000 dollars was paid in specie, and the residue in stock of the public debt. The specie receipts from that source may, for the ensuing year, be safely estimated at five hundred thousand dollars.

The receipts arising from the permanent revenue of the United States may, therefore, without even including the duties on postage and other small

incidental branches, be computed, for the year 1806, at twelve million and five hundred thousand dollars - \$12,500,000

The payments into the Treasury, during the same year, on account of the temporary duties constituting the "Mediterranean fund," which will have accrued to the 31st day of March next, are estimated at nine hundred thousand dollars; and about one hundred thousand may be expected from the arrears of internal duties and of the direct tax, and from other incidental branches; making, for temporary and incidental receipts, one million of dollars - 1,000,000

The balance of specie in the Treasury, which, on the 30th day of September last, amounted to 4,575,654 dollars, will, as the receipts and current expenditures of the present quarter may be considered as nearly equal, be diminished at the end of this year only by the payments on account of the American claims assumed by the convention with France; and as the whole amount of those claims which remained unpaid on the 30th day of September last, will, in this estimate, be stated amongst the expenditures of 1806, the whole of [the above-mentioned balance may be added to the receipts of that year, viz: - 4,575,000

Making, in the whole, an aggregate of more than - \$18,075,000

EXPENDITURES.

The expenses of the year 1806, which must be defrayed out of those resources, are, like the revenue, either of a permanent nature or temporary.

The permanent expenses are estimated at 11,450,000 dollars, and consist of the following items, viz:

1. The annual appropriation of eight millions of dollars for the payment of the principal and interest of the public debt, of which more than 4,000,000 dollars will be applicable to the discharge of the principal, and the residue to the payment of interest - \$8,000,000

2. For the civil department and all domestic expenses of a civil nature, including invalid pensions, the light-house and mint establishments, the expenses of surveying public lands, the third instalment of the loan due to Maryland, and a sum of 150,000 dollars, to meet such miscellaneous claims or grants as may be allowed by Congress - 1,150,000

3. For expenses incident to the intercourse with foreign nations, including the permanent appropriation for Algiers - 200,000

4. For the military and Indian departments, including the permanent appropriations for certain Indian tribes - 1,030,000

5. For the naval establishment, (exclusively of deficiencies for the service of the years 1804 and 1805, which are estimated at 600,000 dollars) - 1,070,000

11,450,000

The extraordinary demands for the year 1806, amount to four millions of dollars, viz:

The navy deficiencies for 1804 and 1805, as above mentioned - \$600,000

And the balance of the American claims assumed by the French convention, which remained unpaid on the 30th September last, amounting to	\$3,400,000	<u>\$4,000,000</u>
Making, altogether	-	<u>\$15,450,000</u>

It appears from the preceding statement, that the permanent revenues of the United States will, during the ensuing year, exceed the permanent expenditures by a sum of more than one million of dollars; and that the moneys already on hand, together with the temporary resources of the year, will, after leaving the sum which it is always necessary to keep in the Treasury, be sufficient to discharge the navy deficiencies and the whole amount of the claims assumed by the convention with France, the large receipts of last year rendering it unnecessary to recur for that object to the loan authorized by the act of the 10th of November, 1803.

MEDITERRANEAN FUND.

It appears by the statement (B) that the additional duty of two and a half per cent. on goods paying duties *ad valorem*, which constitutes the "Mediterranean fund," amounted, during the last six months of 1804, to 563,038 dollars; and it is ascertained that the amount of the duty accrued during the year ending on the 30th day of June, 1805, was 990,000 dollars. This apparent product will, it is true, be diminished by subsequent exportations; but it is believed, from a view of the value of the goods imported in 1803 and 1804, which are charged with that duty, that the fund may be estimated as producing nearly \$900,000 a year. If that estimate be correct, the fund will ultimately produce, during the one year and nine months, commencing on the 1st day of July, 1804, and ending on the 31st day of March, 1806

The expenses heretofore charged on that fund, have been, viz :		
Paid in 1804, to the Navy Department, under the act constituting the fund	\$525,000	
Paid in 1805, to the said department, by virtue of the second section of the act of 25th January, 1805,	590,000	
Making, altogether	-	<u>1,115,000</u>
And leaving an unappropriated surplus estimated at	-	<u>\$460,000</u>

but which will be more than absorbed by the navy deficiencies above mentioned.

The moneys actually received, or to be received, into the Treasury, on account of that fund, prior to the 1st day of January, 1806, are estimated at about \$600,000. The residue will be received between that day and the 31st day of March, 1807, and credit has been taken for a sum of \$900,000 on that account, in the preceding estimate of the receipts of the year 1806.

PUBLIC DEBT.

The payments on account of the principal of the public debt have, during the year ending on the 30th September, 1805, exceeded four million three hundred and seventy-seven thousand dollars, as appears by estimate (D)

-	\$4,377,898 63
---	----------------

The two last instalments due to Great Britain, and

amounting to one million seven hundred and seventy-six thousand dollars, have also been discharged during the same period	-	-	-	\$1,776,000 00
Making, in the whole, a reimbursement of more than six million one hundred and fifty thousand dollars	-	-	-	<u>\$6,153,898 63</u>

As the exportation of the specie necessary to discharge the last mentioned instalment would have been sensibly felt, it was found eligible to pay it in London, in conformity with the authority given by the act of the 3d March, 1805, and the operation was effected at par by the Bank of the United States.

It appears, by the same statement, (D,) that the payments on account of the public debt, from the 1st April, 1801, to the 30th September, 1805, have amounted to almost eighteen million dollars

-	-	-	\$17,954,790 49
During the same period there have been paid to Great Britain, in satisfaction and discharge of the money which the United States might have been liable to pay, in pursuance of the provisions of the 6th article of the treaty of 1794	-	-	2,664,000 00

The balance in the Treasury amounted, on the 1st day of April, 1801, to	-	\$1,794,052 59
And on the 30th day of September, 1805, to	-	<u>4,575,654 37</u>

Making an increase of	-	-	2,781,601 78
From which deducting the proceeds of the sales of the bank shares	-	-	<u>1,287,600 00</u>

Leaves for the increase arising from the ordinary revenue

1,494,001 78

Making, in the whole, a difference of more than twenty-two millions of dollars in favor of the United States, during that period of four years and a half

\$22,112,792 27

In order to give a more general and concise view of the receipts and expenditures of the United States, during the four years commencing on the 1st day of April, 1801, and ending on the 31st day of March, 1805, than can be derived from the annual printed accounts, a statement (marked H) and several explanatory statements (marked H 1 to H 8) have been added to those which usually accompany this report.

From those it appears that a sum of fifty million six hundred and sixty-seven thousand four hundred and sixty-seven dollars and four cents, has been paid into the Treasury during that period, viz:

From duties on tonnage, and on the importation of foreign merchandise	-	-	\$45,174,837 22
From all other sources (including \$1,596,171 43, arising from the sales of bank shares and of public vessels)	-	-	<u>5,492,629 82</u>
			<u>\$50,667,467 04</u>

And that the expenditures, during the same period, have amounted to forty-nine million six hundred and sixty-five thousand five hundred and twenty-seven dollars and fifty-six cents, which have been disbursed for the following purposes:

1. Less than one-third of the whole has been sufficient to defray all the current expenses of the United States, viz:

For the civil list, and all domestic expenses of a civil nature	-	-	\$3,786,114 79
---	---	---	----------------

For the military establishment and Indian department	- - - -	\$4,405,192 26
For the naval establishment	- - - -	4,842,635 15
For the expenses attending the intercourse with foreign nations	- - - -	1,071,437 84

Amounting, altogether, to - - - - \$14,105,380 04

2. Near one-third was necessary to pay the interest on the public debt, viz: - - - - 16,278,700 95

On which subject it may not be improper to observe, that a part of that sum, amounting to \$3,160,000, was paid on account of the interest on the deferred stock, a charge which commenced only in the year 1801, and was therefore in addition to the annual sum wanted before that year, for the payment of the interest on the public debt.

3. More than one-third, and which may be considered as the surplus revenue of the United States during that period, has been applied towards the reimbursement and extinguishment of the debt, viz:

On account of the principal of the public debt proper	- - - -	\$16,317,663 92
In payment of debts contracted before the 1st day of April, 1801, and arising under the British treaty and under the French convention of 30th September, 1800	- - - -	2,963,782 65
		<hr/>
		19,281,446 57
		<hr/>
		49,665,527 56

It is sufficiently evident, that, whilst one-third of the national revenue is necessarily absorbed by the payment of interest, a persevering application of the resources afforded by seasons of peace and prosperity, to the discharge of the principal, in the manner directed by the Legislature, is the only effectual mode by which the United States can ultimately obtain the full command of their revenue, and the free disposal of all their resources. Every year produces a diminution of interest, and a positive increase of revenue. Four years more will be sufficient to discharge (in addition to the annual reimbursements on the six per cent. and deferred stocks) the remainder of the Dutch debt, and the whole of the eight per cent., navy six per cent., five and a half per cent., and four and a half per cent. stocks. As the portion of the public debt which shall then remain unpaid will consist of the six per cent. deferred, and Louisiana stocks, (neither of which can be reimbursed, except at the periods and in the proportions fixed by contract,) and of the three per cent. stock, (which its low rate of interest will render it ineligible to discharge at its nominal value,) the rapidity of the reduction of the debt, beyond the annual reimbursements permitted by the contracts, will, after the year 1809, depend on the price at which purchases may be effected. And, should circumstances render it eligible, a considerable portion of the revenue now appropriated for that purpose may then, in conformity with existing provisions, be applied to other objects.

All which is respectfully submitted.

ALBERT GALLATIN,
Secretary of the Treasury.
