## REPORT.

#### TREASURY DEPARTMENT, Washington, D. C., December 1, 1884.

SIR: I have the honor to submit the following report:

The ordinary revenues of the Government from al	l sources for the	
fiscal year ended June 30, 1884, were:	· v ·	
From customs	\$195, 067, 489 76	
From internal revenue	121, 586, 072 51	
From sales of public lands	9, 810, 705 01	
From tax on national banks	3, 108, 730 13	
From profits on coinage, bullion deposits, and assays	4, 250, 609 .30	
From customs fees, fines, penalties, &c	1,074,665 46	
From fees—consular, letters-patent, and lands	3, 248, 937 57	
From repayment of interest by Pacific Railway Com-		
panies	1,371,363 21	
From sinking-fund for Pacific Railway Companies	2,045,775 05	•
From deposits by individuals for surveying public		
lands	664,111 78,	,
From proceeds of sales of Government property	546, 634 74	
From Indian trust-funds	,	,
From donations towards liquidating the public debt	63, 314 97	
From immigrant fund	224, 286 50	
From Soldiers' Home, permanent fund	367,092 04	
From sale of condemned naval vessels	200, 000 00	
From revenues of the District of Columbia	1,970,726 13	
From miscellaneous sources	2, 843, 240 13	
Total ordinary receipts	348, 519, 869 92	
The ordinary expenditures for the same period were:		
For civil expenses	\$22, 312, 907 71	ę,
For foreign intercourse	1, 260, 766 37	
For Indians	6, 475, 999 29	
For pensions	55, 429, 228 06	
For the military establishment, including river and		
harbor improvements and arsenals	39, 429, 603 36	
For the naval establishment, including vessels, ma-	,	
chinery, and improvements at navy-yards	17, 292, 601 44	

<ul><li>For miscellaneous expenditures, including public buildings, light-houses, and collecting the revenue</li><li>For expenditures on account of the District of Co-</li></ul>		00
lumbia	3,407,049	<b>62</b>
For interest on the public debt	54, 578, 378	48
For the sinking-fund	46, 790, 229	50
Total ordinary expenditures	290, 916, 473	83
Leaving a surplus of	57, 603, 396	09
Which was applied to the redemption—	<u></u>	`
Of Oregon war debt	\$650	00
Of loan of 1858	5,000	00
Of loan of February, 1861	55,000	00
Of loan of July and August, 1861	202,650	00
Of loan of March, 1863	28,700	00
Of five-twenties of 1862	4,150	00
Of five-twenties of 1864	1,000	00
Of five-twenties of 1865	1,200	00
Of ten-forties of 1864.	72, 300	00
Of consols of 1865	65,400	00
Of consols of 1867	178, 850	00
Of consols of 1868	21, 700	00
Of funded loan of 1881	171, 450	00
Of loan of July 12, 1882.	52, 260, 650	00
Of certificates of deposit	990,000	00
Of refunding certificates	65, 900	00
Of old demand, compound-interest, and other notes.	12,255	00
And to the increase of cash in the Treasury	3, 466, 541	09
Total	57, 603, 396	09

The requirements of the sinking-fund for the past fiscal year, including a balance of \$623,316.71 from the preceding year, have been fully met. It is estimated that the requirement for the present fiscal year will be \$47,620,201.16, of which there has been applied during the first four months of the year the sum of \$27,067,050.

Compared with the previous fiscal year, the receipts for 1884 have in the following items decreased \$54,044,793.16: In customs revenue, \$19,639,007.17; in internal revenue, \$23,134,296.47; in tax on national banks, \$6,002,278.72; in deposits by individuals for surveying public lands, \$557,499.98; in donations towards liquidating the public debt, \$901,111.90; in proceeds of sale of post-office property in New York

IV

city, \$648,694.82; in profits on coinage, bullion deposits, and assays, \$209,595.87; in Indian trust-funds, \$83,567.28; in consular fees, \$177,057.97; in custom-house fees, \$129,066.66; in customs fines, penalties, and forfeitures, \$56,093.84; in customs emolument fees, \$176,410,38; in repayment of interest by Pacific Railway Companies, \$185,503.69; in tax on seal-skins and rent of seal islands, \$65,420.25; in proceeds of Japanese indemnity fund, \$1,839,533.99, and in miscellaneous items, There was an increase of \$4,277,081.13, as follows: In \$239,654.17. sales of public lands, \$1,854,840.59; in proceeds of sales of Government property, \$261,579.72; in sinking-fund for Pacific Railway Companies, \$723,671.94; in sales of Indian lands, \$280,046.40; in reimbursement by national-bank redemption agency, \$82,946.83; in registers' and receivers' fees, \$84,783.60; in fees on letters-patent, \$18,850.30; in Soldiers' Home permanent fund, \$301,468.50; in reimbursement for surveying Indian lands, \$310,406.95; in sale of condemned naval vessels, \$200,000; in sale of military barracks, \$60,643.76; in payment for railway material, \$64,000; in rent of Hot Springs reservation, \$17,501.13; in proceeds of sales of small-arms, \$12,988.17, and in marine-hospital tax, \$3,353.24; making a net decrease in the receipts from all sources of \$49,767,712.03.

The expenditures show a decrease as compared with the previous year of \$25,533,468.97, as follows: In the War Department, \$9,481,779.57; in pensions, \$10,583,345.58; in Indians, \$886.591.05; and in interest on the public debt, \$4,581,752.77. There was an increase of \$4,251,575.76, as follows: In the Navy Department, \$2,009,164.27; and in civil and miscellaneous, \$2,242,411.49; making a net decrease in the expenditures of \$21,281,893.21.

#### FISCAL YEAR 1885.

For the present fiscal year the revenue, actual and estimated, is as follows:

		`*

#### FISCAL YEAR 1886.

The revenues of the fiscal year ending June 30, 1886, are thus estimated upon the basis of existing laws:

From customs	\$185,000,000	00
From internal revenue	115, 000, 000	00
From sales of public lands	6, 500, 000	00
From tax on national banks	3,000,000	00
From repayment of interest and sinking-fund, Pacific		
Railway Companies	3,000,000	00
From customs fees, fines, penalties, &c	1,000,000	00
From fees—consular, letters-patent, and lands	3,000,000	00
From proceeds of sales of Government property	400,000	00
From profits on coinage, assays, &c	4, 100, 000	00
From deposits for surveying public lands	500,000	00.
From revenues of the District of Columbia	1,800,000	00°-
From miscellaneous sources	6, 700, 000	00
	· · · · · · · · · · · · · · · · · · ·	· · · ·

Total estimated ordinary receipts...... 330,000,000 00

The estimates of expenditures for the same period, received from the several Executive Departments, are as follows:

Legislative	\$3, 321, 486 55
Executive	19, 335, 823 50
Judicial	408, 300 00

Miscellaneous 5, 989, 055 00		
· · · · · · · · · · · · · · · · · · ·	118, 434, 016	- 86
Total estimated expenditures	323, 911, 394	25
Or an estimated surplus of	6, 088, 605	75

It will be observed that the estimates submitted by the several Executive Departments for the fiscal year 1886 exceed the estimates received from those Departments for the fiscal year 1885 by more than \$40,000,000.

It is well understood that appropriations made upon estimates of the several Departments usually fall far short of the amount of such estimates; and, without intending to criticise the action of other Departments, I think it may be fairly assumed that the appropriations for the fiscal year 1886 will not exceed the actual expenditures for 1885, as shown above. This would leave a surplus for 1886, the same as for 1885, of more than thirty-nine millions.

The estimate of receipts from customs for 1886 is, in the foregoing table, placed at \$185,000,000, or the same as for the preceding year, according to long usage in estimating in the Secretary's Annual Report.

That estimate is about ten millions less than the actual receipts from customs in the fiscal year 1884.

It should be considered that the value of imports of dutiable merchandise for the fiscal years 1884 and 1885 has been much reduced by the unusual depression of business, which we may fairly hope will not long continue. This reduction in 1884, as compared with 1883, was, as appears in the tables under the head of "Customs," nearly \$38,000,000, the average duty on which would amount to more than \$16,000,000. It seems safe to assume, therefore, that the surplus revenues for 1886 will be more than \$50,000,000.

#### REDEMPTION OF UNITED STATES BONDS.

On November 1, 1883, the outstanding bonds of the 3 per cent. loan of the act of July 12, 1882, amounted to \$305,529,000. Calls were issued prior to November 1, 1883, for \$30,000,000 of the above amount, all of which matured in the month of December, 1883. During the year ended October 31, 1884, calls have been issued for \$80,000,000 of such bonds, \$70,000,000 of which matured previous to October 31, and \$10,000,000 on the first day of November, 1884.

The following table shows in detail the redemptions and cancellations of United States bonds during the twelve months ended October 31, 1884:

Seven-thirty notes of July 17, 1861	\$100
Seven-thirty notes, 1864–1865	1,800
Loan of June 14, 1858	5,000
Loan of February 8, 1861	3,000
Oregon war debt	1,300
Five-twenties of February 25, 1862	3, 800
Five-twenties of 1865, (May and November)	22,200
Five-twenties of June 30, 1864	1, 050 🕈
Ten-forties of 1864	77,250
Consols of 1865	22,150
Consols of 1867	130,650
Consols of 1868	15,650
Loan of July and August, 1861, (6 per cent.)	35,100
Loan of March 3, 1863, (6 per cent.)	5,550
Funded loan of 1881, (5 per cent.)	142,200
Loan of July and August, 1861, (continued at 3½ per cent.)	133, 100
Loan of March 3, 1863, (continued at $3\frac{1}{2}$ per cent.)	» <b>55, 700</b>
Funded loan of 1881, (continued at 3½ per cent.)*	5, 347, 700
Loan of July 12, 1882, (3 per cent.)	91, 771, 000
Total	97, 774, 300

\* Part of which had matured previous to November 1, 1883.

The reduction in the annual interest charge by reason of the changes during the year ended October 31, 1884, is as follows:

 On bonds redeemed or interest ceased......
 \$3, 204, 260

 Deduct for interest on 4 per cent. bonds issued......
 392

The following table shows the changes in the interest-bearing debt during the year:

Title of loan.	Rate of inter- est.	Outstanding November 1, 1883.	Issued during the year.	Redeem e d during the year.	Outstanding October 31, 1884.
Funded loan of 1381	5 per cent., continued at 3½ per cent. 3 per cent 4½ per cent 4 per cent 3 per cent 3 per cent	737, 620, 700		\$4, 970, 500 { *9, 238, 750 91, 771, 000 ‡61, 050	} \$204;519,250 250,000,000 737,691,550 264,800 14,000,000
Total	·····	1,312, 446, 050	70, 850	106, 041, 300	1, 206, 475, 600

\* Ceased to bear interest during the year, but not yet presented for payment. † Of this issue \$9,800 was on account of accrued interest on \$61,050 refunding certificates con-

† Of this issue \$9,800 was on account of accrued interest on \$61,050 refunding certificates converted, 1 Redeemed by conversion into 4 per cent, bonds.

CONVERSION OF REFUNDING CERTIFICATES.

Since November 1, 1883, refunding certificates issued in 1879, under the act of February 26, 1879, have been presented for conversion into 4 per cent. bonds as follows:

Principal Accrued interest due	\$61, 050 12, 210
Total	73, 260
For which settlement was made as follows:	
Four per cent. bonds issued	\$70, 850
Interest paid in cash	
Total	

The certificates still outstanding amount to \$264,800.

As I am to occupy for a very brief period only the office recently made vacant by the lamented death of one distinguished gentleman, and the acceptance by another scarcely less distinguished of a place more congenial to his taste, it might be becoming in me to confine my report to the foregoing exhibits and a presentation of the reports of

IX

the heads of the various bureaus, which abound in valuable information in regard to the condition of the Department, and to other matters of interest to Congress and the public.

There are, however, some subjects of so great importance that I do not feel at liberty to withhold an expression of my views upon them, short as has been the time for their consideration. These subjects are:

1st. Our Foreign Trade and Taxation.

2d. Our Merchant Marine.

3d. The Public Debt and the Condition of the Treasury.

4th. Our National Banking System.

#### FOREIGN TRADE AND TAXATION.

In the early days of the West, when population was more than keeping pace with the acreage brought under cultivation, there was a ready demand for what the farmers raised, and the home market was the only market they needed. This satisfactory condition of agricultural industry in that section of the country was of short duration. Good prices stimulated production, and in a few years the supply became greater than the demand, in consequence of which the value of agricultural products began to decline, and the decline went on until what the farmers could obtain for their crops was insufficient to cover the necessary outlays in producing them. So great was this decline, in many instances, that where the farms were at a long distance from navigable waters, wheat remained uncut in the fields and corn was used for The owners of such farms were therefore compelled to leave a fuel. part of their fields uncultivated, so that lands of great fertility became well-nigh valueless. To remedy this very untoward condition of their agricultural industry, many States in 1834 and 1835 commenced large works of internal improvement, but before their completion the financial crisis of 1837 occurred, which caused a collapse of all great enterprises throughout the entire country, and left most of the States that had engaged in them overloaded with debt and without advantage from their large expenditures. The Wabash and Erie Canal, work on which had been commenced two years before, and was designed to unite the navigable waters of the Wabash with Lake Erie, was the only one of the Western enterprises of that day which was completed, and its completion was owing to a land grant made for its construction by the United States Government. Although the country benefited by the opening of this canal was of considerable extent, it was small in comparison with the vast region, far distant from navigable waters, which was rapidly being occupied by enterprising and thrifty farmers. What this vast region needed was a market and facilities for reaching

x

it, with both of which it was soon supplied. It is now penetrated in all directions by railroads, and the cost of transportation has been so cheapened that farming lands far west of the Mississippi have become nearly as valuable as lands in the seaboard States. • To the rise in the value of lands resulting from the construction of railroads the wonderful increase of the national wealth is very largely attributable.

The condition of the manufacturing interest of the United States is similar in some respects to the condition of the agricultural interest of the West in the early days to which I have referred. What the Western farmers then needed was a market for their crops. What manufacturers now need is a market for their surplus manufactures.

The real foundation of our great manufacturing industry was laid in New England under the first tariff of a protective character, which diverted a part of its capital from shipping into cotton-factories. Those first constructed having been fairly remunerative, more were constructed, and other branches of manufacture were undertaken, until New England was converted from maritime and commercial pursuits into manufacturing. It will be recollected that New England was opposed to the first protective tariff—that one of Mr. Webster's great speeches was a free-trade speech.

It was not many years after the first cotton-mills were erected in New England that the great iron interests of the country began to be developed, and Pennsylvania soon became the great iron-manufacturing State of the Union. Nor was it long before various kinds of manufactures came into existence in most of the Northern and Western States. The demands of the Government during the late civil war for nearly all kinds of manufactured goods and the high tariff greatly stimulated production. After the war, stimulus was found in railroad building and in extravagant expenditures induced by superabundant currency, and the time has now come when the manufacturing industry of the United States is in dire distress from plethora of manufact-Some manufacturing companies have been forced into ured goods. bankruptcy; others have closed their mills to escape it; few mills are running on full time, and as a consequence a very large number of operatives are either deprived of employment or are working for wages hardly sufficient to enable them to live comfortably or even decently. Nor are manufacturers and their employes the only sufferers by the present depression of our manufacturing industry. So large and widespread has this industry become, so interwoven is it with other industries, so essential is it to the welfare of the whole country, that it cannot be seriously depressed without injuriously affecting business throughout the Union.

XI

The all-important question, therefore, that presses itself upon the public attention is, how shall the country be relieved from the plethora of manufactured goods, and how shall plethora hereafter be prevented? It is obvious that our power to produce is much in excess of the present or any probable future demand for home consumption. The existing iron, cotton, and woollen mills, if employed at their full capacity, could meet in six months—perhaps in a shorter time—the home demand for a year. It is certain, therefore, that unless markets now practically closed against us are opened; unless we can share in the trade which is monopolized by European nations, the depression now so severely felt will continue, and may become more disastrous.

The question how shall our foreign trade be increased is the question which now comes to the front and demands prompt and careful Manufacturers are primarily interested, but the whole consideration. country has a stake in its solution. In its investigation the tariff will necessarily be involved, inasmuch as the relations between it and our foreign trade are so close that they cannot be considered separately, but it need not be involved except so far as it stands in the way of international trade. If the duties upon raw materials are an obstruction, those duties should be removed. If the duties upon other articles are an obstruction, they should be modified. Whatever may be required to increase our foreign trade, whether it be a repeal or modification of existing duties, should be demanded by the manufacturers themselves. How, then, shall the information required for a full understanding of what stands in the way of an increased exportation of our manufactured goods be obtained? It may not be proper for me to offer advice on this point, but I cannot forbear to say that I can see no better means than by the appointment of a Commission, composed of men not wedded to the doctrines of free trade or protection-fairminded men, who would prosecute the inquiry thoroughly, compre-, hensibly, and impartially. If such a Commission should be created, it should be done without unnecessary delay.

1

It is true that previous Commissions have not accomplished all that was expected of them. The cause of this partial failure it is not necessary to inquire into, but this failure should not prevent the appointment of such a Commission as has been suggested, unless something better can be devised. It is very clear that what is needed cannot be, accomplished through the agency of the Committee on Ways and Means. So vast in its comprehensive reach is the question to be investigated, and so complicated is it by the changing policy of other nations, that this committee would lack the time required for its

XII

thorough investigation. Besides, the Committee on Ways and Means is usually appointed to sustain measures to which the party in control in the House is pledged, rather than to give to subjects referred to it that impartial consideration which is needed for correct conclusions. Nor is the fact to be overlooked that even constituted as this committee has been, and able as have been its members, there has rarely, if ever, been a committee which so reflected the sentiments or commanded the respect of the House as to be able to carry through without important changes the bills which it had prepared.

It is, therefore, obvious that some other agency than the Committee on Ways and Means must be resorted to in order that the House may have the information absolutely needed for correct conclusions in regard to the nature of the obstructions in the way of an extension of our foreign trade, and the best means of removing them. The labors of a Commission, if properly performed, would be very great. Ample time, therefore, should be allowed for their performance.

The business of the whole world has been revolutionized by steampower and the substitution of machinery for hand-work. If not the inventor of the steam-engine, Great Britain took the lead in utilizing it in manufacturing, and she thus became the great workshop of For many years she had a monopoly of manufacturing. the world. The raw materials from nearly all nations were taken in her own ships to her ports and returned in manufactured goods. It has been the profit of this combination of manufactures and commerce which has made her the richest and most powerful of nations. Now, however, all western nations are endeavoring to use their raw materials at home and to encourage and sustain their manufactures by protective duties, the effect of which has been general overproduction.

It is this great revolution caused by steam-power and machinery and their general use that will make the labors of the Commission so arduous. All the leading nations of the world are now engaged in manufacturing, and all but Great Britain are fencing themselves in by protective duties. Among them the United States has been conspicuous. Has not the time come when a new departure is demanded? Cobden, one of the ablest and most farseeing of British statesmen, predicted that the United States would in time not only become a great manufacturing country, but would become a competitor with Great Britain in the South American markets. In the course of some remarks upon the condition of British trade he said:

XIII

<sup>&</sup>quot;Members of the House of Commons and others are constantly crying out that there is very great danger threatening this country from Russia, and they neglect to observe that the great danger to the supremacy of the country is not in Russia, but in the competition of the United States of America."

The Cobden Club is the channel through which the free-trade sentiments of Great Britain find expression, and yet, at a recent meeting of the club, the following language by one of the prominent members of Parliament was cheered and applauded:

"Many persons seem to think that the effect of the reduction of the protective duties in America would be to enable us to flood the United States with our productions. For a short time probably it would give a stimulus to our trade, but in the long run the effect of it would be to cheapen American productions, and to increase the competition of America with us in other parts of the world. We should have to meet that competition. We should find the Americans very serious competitors, and we should have in this country to throw aside many of the bonds which now fetter our industry."

The present condition of our foreign trade is not as fully understood by the public as it ought to be, or there would be greater uneasiness in regard to what may be the result. Look, for instance, at our trade relations with Brazil. We sold to Brazil last year various articles to We bought of her various kinds of her own the amount of \$8,645,261. productions to the amount of \$50,265,889, leaving \$41,620,628 as the balance against us. Now, how is this large balance liquidated? Not by gold, but by the sale of our farm products, for which there is a large demand in Europe. It is our cotton, our wheat, our petroleum, our beef and pork, which can be produced more cheaply in the United States than anywhere else, which create the sterling exchange that enables us to carry on this one-sided trade with Brazil. Now, if by the failure of our crops, or very favorable seasons on the other side of the Atlantic, or, what is more probable, by retaliation, our exports of these articles should materially decline, what then would be the condition of our Brazilian trade? Instead of depending upon the exports to Europe for the means to cover the balance in favor of Brazil, ought not an effort be made to equalize that trade by our manufactured goods? Ought we not to endeavor to verify the prediction of Cobden by becoming a competitor with Great Britain in the Brazilian markets? Ought not this to be attempted in the interest of our own manufacturers?

Reference is made to our trade with Brazil because it is much larger than that with other South American States, but our trade with all of them is of the same one-sided and unsatisfactory character. Ought it so to continue? The South American States are our neighbors. With the exception of Brazil, their institutions are moulded upon ours. They would be glad to establish close trade relations with us, which could not fail to be of mutual advantage; and yet so little intercourse have we with them that supplies for our ships-of-war in South American ports must be paid for in sterling exchange. Drafts on Japan could

be as easily negotiated in their ports as drafts on the Treasurer of the United States.

When the real condition of our foreign trade and the character of the competition in which we must sooner or later engage are fully understood, it will be found that our inability to make that trade as , free as our best interests require, lies in the necessity which exists for heavy import duties, which, although they may be levied for revenue only, must be in a large degree protective.

It is upon such taxes, therefore, that our Government must mainly rely for its large current expenditures and the reduction of the national debt. Large revenues will be derived from the taxes upon whiskey and tobacco, if the tax on the latter article should be retained, but our chief revenue must be derived from import duties. To show how these duties may be imposed and distributed as to neither imperil our manufactures nor obstruct our foreign trade, while the Treasury is kept in an easy condition, will be the task of the Commission. That the task will be a very difficult one is certain; that it may be successfully performed ought to be certain also.

In competition with Great Britain in the South American markets, Great Britain will have the advantage by being already in possession of the trade, but this advantage will doubtless be counterbalanced by the abundance and comparative cheapness of our agricultural produc-That we are to be a competitor with Great Britain in foreign tions. markets, especially in the markets of the South American States, is as certain as anything in the future can be. The steps which may be needful to make this competition successful it will be for Congress to. determine after the Commission has performed its duty. To me it seems certain that it cannot properly be done before. A nation with fifty-six millions of people, doubling every twenty-five years, a people distinguished for enterprise and inventive power, in possession of a country of vast extent and rich beyond comparison in developed and undeveloped resources, ought not much longer to be prevented from having a full share in the honor and the gain of international trade.

In the commencement of its work the Commission should, I think, regard the following points as being settled:

*First.* That the public revenues are not to be in excess of what may be required for the support of the Government, and the gradual reduction of the public debt.

Second. That our manufactures, which under the fostering care of the Government have attained such gigantic proportions and whose prosperity is essential to the welfare of all other interests, are not to

be put in jeopardy by radical and sweeping changes in the tariff; and that all reductions of import duties should be made with a view to their ultimate advantage by opening to them markets from which they are now in a large degree excluded.

Something has been done, and more might be done, to increase our foreign trade by reciprocal treaties, but the advantage to be derived from such treaties would be restricted and partial; and there are very serious objections to treaties which affect the public revenues, on the ground that they are an encroachment upon the rights of the House of Representatives, in which, under the Constitution, all revenue bills must originate.

As to the persons who should constitute the Commission there will be various opinions. It might be composed of persons who have no connection with the Government, or of Senators and Members of the House, but I strongly incline to the opinion that it should be composed of Members of the House only, because, in the investigation of the subject of our foreign trade, questions affecting the public revenues will necessarily be involved; and that members should be selected from those who have been re-elected to the 49th Congress, in order that its work may be explained and defended by those who have performed it. It would be advisable, also, that the Secretary of the Treasury should *exofficio* be a member of the Commission, in order that the views of the Treasury Department and those of the Commission may be in accord.

In the preceding remarks the tariff has been only indirectly referred to. From this it must not be inferred that I am not in favor of a reform of the tariff, but rather that the subjects of the tariff and foreign trade are so intimately connected that they must, in my opinion, be considered together. Have we not reached the stage when a policy should be adopted which will embrace and harmonize the great interests of the country?

If such a Commission as has been suggested had been appointed, and its work could be performed at an early date, I should not be disposed to say anything bearing directly upon the tariff; but as relief from the present burden of taxation is urgently and justly demanded, I deem it my duty to suggest that something in this direction should be done without delay. Owing to the shortness of the time allowed to me for the consideration of the subject, I am not prepared to name the articles upon which duties should be removed or reduced. I should regret this if Congress were not already in possession of the facts which should govern its action. This much, however, it may be proper for me to recommend:

*First.* That the existing duties upon raw materials which are to be used in manufacture should be removed. This can be done in the interest of our foreign trade.

Second. That the duties upon the articles used or consumed by those who are the least able to bear the burden of taxation should be reduced. This also can be effected without prejudice to our export trade.

In regard to our internal-revenue taxes, I have to say that, as these taxes, with the exception of the tax upon whiskey, ought not to be and will not be needed for revenue if appropriations are kept within reasonable bounds and rigid economy is established in all branches of the public service, I see no good reason for their continuance. The tax upon bank-note circulation I shall refer to in my remarks upon national banks. Taxes upon agricultural productions, although indirectly levied, are inconsistent with our general policy, and tobacco is the only one of these productions which has been taxed. An article which is so generally used, and which adds so much to the comfort of the large numbers of our population who earn their living by manual labor, cannot properly be considered a luxury, and as the collection of the tax is expensive and troublesome to the Government, and is especially obnoxious and irritative to small manufacturers, the tax upon tobacco should, in my judgment, be removed.

The tax upon whiskey could not be repealed without a disregard of public sentiment, nor without creating a necessity for higher duties upon imported goods, but while this is true the tax upon the alcohol used in manufacturing might be removed with decided benefit to home industry and foreign trade.

Under the provisions of section 3433, Revised Statutes, as amended, spirits used in the manufacture for export of certain enumerated articles are freed from the tax of 90 cents per gallon. This law has greatly increased the exportation of the articles therein named.

These articles, however, constitute but a very small portion of those in the manufacture of which alcohol is used, or in which it would be used were it not for the tax thereon.

In Great Britain spirits have been used in manufactures free of tax since the year 1856, the spirits having been previously mixed with wood naphtha or "methylated."

It is understood that spirits thus methylated are unfit to be used as a beverage, while they remain uninjured for the general purposes of manufacturing. It is suggested, therefore, that provision be made for the use of domestic methylated spirits, free of tax, as a measure tending to encourage manufactures, both for home use and for exportation.

XIX

#### Products of agriculture and products of manufacture.

Of the total value of our exports of merchandise to Brazil, amounting during the last fiscal year to \$\$,645,261, the value of manufactured articles was \$4,143,008; of agricultural products, \$4,434,702; and of all other articles, \$67,551.

Almost the entire imports of merchandise from Brazil into the United States consisted of products of agriculture, including among such products, india-rubber and gutta-percha, crude; hair; fruits, and nuts.

Of the total imports, coffee constituted 59.7 per cent., and sugar, sirups, and melada, 21.9 per cent.

The commerce of the United States with all the South American States during the last sixteen years has been as follows :

Countries.	Exp	orts.	Imp	orts.	Total imports and exports.

Total	19, 625, 763	31, 226, 934	40,011,103	75, 753, 960	59, 636, 866	106, 980, 89

The total value of the imports and exports of merchandise during the year ended June 30, 1884, amounted to \$1,408,211,302, as against \$1,547,020,316 during the preceding fiscal year, showing a decrease of \$138,809,014.

The value of the exports of domestic merchandise amounted to \$724,964,852, as against \$804,223,632 during the preceding fiscal year, showing a decrease of \$79,258,780; and the value of the imports of merchandise amounted to \$667,697,693, as against \$723,180,914 during the preceding fiscal year, showing a decrease of \$55,483,221.

The total value of the exports of merchandise of both domestic and foreign production exceeded the total value of the imports of merchandise \$72,815,916, as against an excess of \$100,658,488 in the value of such exports during the preceding fiscal year.

The exports of specie from the United States during the last fiscal year amounted to \$67,133,383, as against \$31,820,333 during the preceding fiscal year; and the imports of specie amounted to \$37,426,262, as against \$28,489,391 during the preceding fiscal year. The excess

of exports of specie over the imports thereof amounted to \$29,707,121, as against an excess of \$3,330,942 in such exports during the preceding fiscal year.

#### EXPORTS.

The value of exports from the United States to fore	ign countries,
during the year ended June 30, 1884, was as follows:	
Domestic merchandise	724,964,852
Foreign merchandise	15, 548, 757
- Total merchandise	
Specie	67, 133, 383
- Total exports of merchandise and specie	807, 646, 992

During the last fiscal year the value of our exports of cotton and manufactures of cotton was \$208,900,415; of breadstuffs, \$162,544,715; of provisions, \$114,416,547; and of mineral oils, \$47,103,248. These commodities and classes of commodities constituted nearly 74 per cent. , of our entire exports of merchandise.

The value of our exports of products of agriculture, of manufacture, of mining, of the forest, of the fisheries, and of gold and silver coin and bullion during the years ended June 30, 1883 and 1884, were as follows:

	Year ende	d June 30—
	1883.	1884.
Products of agriculture	619, 269, 449 111, 890, 001 51, 444, 857 9, 976, 143 6, 276, 375 5, 366, 807 21, 623, 181	$\begin{array}{c} \$536, 315, 318\\ 111, 330, 242\\ 56, 822, 529\\ 9, 465, 330\\ 5, 614, 111\\ 5, 417, 322\\ 50, 225, 635\end{array}$
Total	825, 846, 813	775, 190, 487

Our exports of products of agriculture consisted chiefly of cotton, animals, breadstuffs, and provisions. Our exports of iron, of wood, of cotton, and of leather were the chief articles of manufacture exported.

Our exports of products of mining consisted chiefly of mineral oils, coal, and copper ore.

Our exports of products of the forest consisted chiefly of wood and timber and naval stores.

Our exports of the products of the fisheries consisted mainly of fish, fish-oils. and whalebone.

#### IMPORTS.

The imports into the United States during the last fiscal year were as follows:

Merchandise	\$667, 697, 693
Gold and silver	37,426,262
- Total	705, 123, 955

The principal articles imported, with their value, were as follows: Sugar and molasses, \$103,884,274; wool, and manufactures of wool, \$53,542,292; silk, and manufactures of silk, \$49,949,128; coffee, \$49,686,705; iron and steel, and manufactures thereof, \$41,464,599; chemicals, \$38,464,965; flax, hemp, jute, and like vegetable substances, and manufactures thereof, \$33,463,398; cotton, and manufactures of cotton, \$30,454,476; and hides and skins, other than fur-skins, \$22,350,906.

The total value of manufactured and of unmanufactured articles of merchandise imported into the United States during the last fiscal year was as follows:

Unmanufactured	235,775,932
Manufactured	431,921,761
Total	667, 697, 693

The value of imports during the three months ended September 30, 1883, was \$166,735,075, and for the three months ended September 30, 1884, \$157,083,995, showing a falling off of \$9,651,080.

The value of the exports of merchandise from the United States during the three months ended September 30, 1883, was \$168,782,085, as against \$161,649,105, during the three months ended September 30, 1884, showing a falling off of \$7,132,980.

#### OUR SHIPPING INTEREST.

In direct connection with the condition of our foreign trade is the condition of our merchant service. The causes of the decline of our shipping are so well understood that any remarks on this point are quite unnecessary. The humiliating fact stares us in the face that while the United States not many years ago led all nations in ship-building, and was second only to Great Britain in ocean tonnage, it has almost ceased to be recognized as a maritime power; that nearly all of our agricultural productions and manufactured goods which find a market in Europe or South America and the articles received in exchange

XXI

for them are carried in foreign ships; that the many thousands of Americans who annually visit Europe on business or for pleasure go and come in European steamers; that large foreign steamship lines are in fact supported by the people of the United States. All this is not only humiliating to our national pride, but it stands in the way of the improvement of our foreign trade. In his report to Congress under date of the 3d of December, 1866, the Secretary used the following language:

"It is a well-established general fact that the people who build ships navigate them, and that a nation which ceases to build ships ceases, of consequence, to be a commercial and maritime nation. Unless, therefore, the causes which prevent the building of ships in the United States shall cease, the foreign carrying-trade even of its own productions must be yielded to other nations. To this humiliation and loss the people of the United States ought not to be subjected. If other branches of industry are to prosper, if agriculture is to be profitable, and manufactures are to be extended, the commerce of the country must be restored, sustained, and increased. The United States will not be a first-class power among the nations, nor will her other industrial interests continue long to prosper as they ought, if her commerce shall be permitted to languish."

If this language was true then, it is certainly true now. Eighteen years have passed since it was uttered. There has been in the mean time an enormous increase of our population and national wealth, but no improvement whatever in our foreign shipping interest. Not only does this important interest remain well-nigh lifeless, but the difficulties in the way of restoring its vitality have been greatly increased by the immense capital since then invested by foreign steamship companies, which control and practically monopolize the carrying-trade between this and other countries, and these difficulties will become every year more and more formidable until remedial measures are adopted by When the nature of the obstructions in the way of a revival Congress. of our shipping is fully investigated, the cost of building ships in the United States will not, I think, be found to be a serious one. I am convinced that if the duties upon the foreign materials used in the construction and outfit of iron ships were removed, they could be built and fitted for sea as cheaply in the United States as in Scotland, Manual labor, it is true, is much cheaper in Scotland, but it is less efficient. Besides, most of the work in iron-ship building is done by machinery, in the invention and use of which Americans excel. Scores of things are done in Glasgow ship-yards by hand which in the United States would be done by machinery.

Fifty years ago the United States excelled all nations in ship-building. Not only were we able to supply the home demand, but large numbers of ships were built for foreigners in the ship-yards, which lined the coast from Delaware Bay to Eastport. Our superiority in shipbuilding then was owing to the facts that our forests abounded in

timber of the best qualities, and that our carpenters were skilful in the use of it. Since then iron has been substituted for wood in the construction of steamships. But are not our iron and coal fields as productive and accessible as those of any other country? Are our machinists less skilled in the use of machinery than were our shipcarpenters in the use of the axe and the saw? As far as materials for building ships and skill in the use of those materials are regarded, Great Britain has no advantage over us; on the contrary, is not the advantage on our side? Apprehended difficulties are magnified until they are encountered. When steel rails were in demand beyond the home supply at \$75 per ton, and many were imported, subject to a duty of \$28 per ton, who would have dared to express the opinion that in four years they could be made in this country at less than \$30 per ton, with a profit to the makers?

The obstacles in the way of a restoration of our foreign shipping will not, I conceive, be found in the cost of ships which are to be built in the United States, but in the absence of demand for them. If our navigation laws were so modified that American registers could be granted to foreign-built ships for foreign trade, there would be little, if any, improvement in our shipping interest. Such modification some years ago might have done something to prevent decline; it would now be in-The great and profitable carrying-trade between sufficient to restore. the United States and Europe has been permitted to pass into the hands of the ship-owners of other nations. So complete is their control of it, so large is the capital invested in it, and so sharp and persistent would be the contest if we should attempt, without Government aid, to share in it, that our capitalists would not compete for it. There is, in my opinion, no prospect whatever that the United States will ever share to a considerable extent in the foreign carrying-trade without Government aid. It is for Congress to determine whether this aid shall be granted, or whether our foreign shipping interest shall remain in its present death-like condition. The let-alone policy has been tried for many years, during which our ships have been swept from the ocean, and we pay every year many millions of dollars to foreign ship-owners for freights and fares. Ought this condition of things to be continued ?

Entertaining these views, I do not hesitate to express the opinion— *First.* That without Government aid to United States steamship lines the foreign carrying-trade will remain in the hands of foreigners.

Second. That as we ought to have an interest in the business which we create, and as the restoration of our shipping interest is important, if not essential, to the extension of our foreign trade, subsidies in the

form of liberal payments for the transportation of mails or in some other form should be offered as an inducement to investments of capital in steamships.

The amount of necessary aid would be insignificant in comparison with what has been granted to manufacturers by protective duties, and nothing would be paid until the services were rendered. If the subject were investigated, it would be found that all the European steamship lines that led the way in the great traffic by steam-power have received government aid. It is admitted that all protective duties and subsidies are inconsistent with the teachings of political economy, but, true as these teachings may be in the abstract, they are disregarded by all nations when they stand in the way of national welfare. No rules are equally applicable to all nations, nor to the same nation in the different stages of its growth. Political economy is not one of the It is rather adaptive than exact, and all nations so exact sciences. regard it.

Protective duties were undoubtedly needed to induce investment in cotton, iron, and woollen mills, and what not, in the various lines of our manufacturing industry. Whether or not protection has been extended too long or too far, and to what extent it now stands in the way of other great interests, are questions that can only be settled by full investigation. Government aid is now needed to induce investment in shipping. To what extent and for what period this aid should be granted must be settled in the same way.

It is to be regretted that the United States is not in a condition to participate in the trade which is soon to be opened with the interior of Africa.

The attention of Congress is asked to the following table and statements, which exhibit the present condition of our shipping interest, and which refer to the relief already obtained by recent legislation, and to the further relief which is required aside from the question of subsidies:

#### Tonnage of vessels of American ownership.

The tonnage of vessels owned in the United States at the close of the fiscal year 1884, according to the records of the Bureau of Navigation, was 4,271,228.76 tons. Of this amount, 1,304,220.67 tons were in 2,127 vessels registered for the foreign trade, and 2,967,008.09 in 22,055 vessels enrolled and licensed for the coasting trade and fisheries. There was an increase of 2,126 tons in vessels in the foreign trade, and 33,616 tons in domestic trade. The following table shows the number and tonnage of vessels built and documented during the last fiscal year:

					• • • • • • • • • • • • • • • • • • • •	Tonnage.	
•	Kinds.				Number.	Gross.	Net.
Sailing-vessels Steam-vessels Canal-boats					. 33	120, 620. 88 91, 327. 47 3, 456. 43	$114,667.82\\68,095.93\\3,264.18$
Barges Total	•••••••		·····	•••••••	41 1,190	10, 709. 22 225, 514. 00	9, 834. 53 195, 862. 46

#### Distribution of carrying-trade.

Of the merchandise imported at seaboard, lake, and river ports during the fiscal year 1884, an amount equal in value to \$152,201,729was imported in American vessels, and in value to \$526,379,213 in foreign vessels. The merchandise exported in American vessels had a value of \$112,520,723, and the merchandise exported in foreign vessels was valued at \$667,739,372. Of the combined imports and exports of merchandise, about  $17\frac{1}{2}$  per cent. was conveyed in American vessels, and about  $82\frac{1}{2}$  per cent. in foreign vessels.

Under the act of June 5, 1884, and the provisions of the shipping bill of June 26, 1884, a Bureau of Navigation has been established in this Department. The employés thereof, with the exception of the Commissioner, have been detailed from other offices. There have been assigned to the bureau the duties relating to navigation hitherto performed in the office of the Register of the Treasury, the Bureau of Statistics, and of the Secretary; the administration of the provisions of the act of June 26, cited above, relating to the preparation of an annual list of merchant vessels of the United States; the discharge of seamen abroad; the payment to them of extra wages; the survey of ships; the collection of tonnage tax; and the entry of vessels into ports subject to quarantine; also, cases arising under the provisions of Titles XXXIV, XLVIII, and LVIII, Revised Statutes, and other laws concerning navigation and statements of tonnage; the documenting of vessels, the naming of them, and granting them official numbers and signal letters; their entry clearance, and movements; the issue ard preservation of marine documents; and also the administration of the provisions of Title LIII, Revised Statutes, and of the shipping act, relating to the shipment of seamen and the government of the shipping offices at the various ports of the United States. The bureau is now in successful operation, and the consolidation therein

XXV

of the duties formerly incongruously distributed among several divisions of the Treasury Department prevents some confusion and duplication of work, which could not be avoided under the old system, and tends to economy and efficiency.

While the provisions of the new shipping act changing the tonnagetax on vessels, so that a portion only of the former' tax need be paid on any one entry, will materially reduce the entire amount of tax collected, they will give needed relief to sailing-vessels, which formerly were required to pay as much per ton on a single entry within a year as was paid by steam-vessels on the many entries they sometimes made within that time.

The provisions of section 27 of the shipping act of 1884 forbidding the payment of advance wages to seamen have led to much opposition from keepers of sailors' boarding-houses, and so called runners, whose business has been injuriously affected, and the law has been enforced with some difficulty. It is understood, however, that ships have generally been able to obtain crews, and that the repeal of the law is not required by the necessities of commerce. A similar law exists in Great Britain. That, in both countries, it is sometimes evaded is unquestionable. I am not prepared to say that a modification of the statute so as to allow a half month's advance might not, in some cases, be beneficial to the seaman.

Complaint has been made that the compensation allowed to masters of vessels by section 12 of the act of June 26, 1884, for bringing home destitute American seamen, is inadequate. The section allows not exceeding \$10 for a voyage of thirty days, and \$20 for a longer voyage; but if the men are so disabled or sick as to be unable to perform duty, additional compensation may be allowed by the First Comptroller of the Treasury.

By the reduction of tonnage-dues, relief from the necessity of carrying mails, the abolition of the system of extra wages to seamen, except in certain cases, the removal of consular fees for services to vessels and to seamen, the repeal of the laws imposing marine-hospital tax, the right to withdraw supplies for, and material for the building and repairing of, vessels free of duties, the limitation of the liability of ship-owners, the right to ship seamen for stated periods, or for foreign ports, and the right to deliver cargo, in certain instances, at places not ports—all of which privileges and benefits have been conferred by recent legislation—the burdens of ship-builders, and of persons interested in shipping, have been somewhat lightened, and our navigation has been placed, as regards the expense of carrying it on,

more on a footing with that of foreign countries. Other antiquated restrictions on our maritime commerce, such as the division of the Atlantic coast into two great coasting districts, and the limitations as to the quantity of duty-paid cargo which may be carried in coasting vessels, might well be abolished. Matters of pilotage should be regulated by Congress, in such a manner that the system shall be uniform. At present each seaboard State has its separate rules, which, in some cases, are burdensome to commerce.

In this connection, the importance of a fleet of vessels engaged in commerce in time of peace as a training-school for sailors, and as a preparation for war by their easy conversion into armed cruisers or transport vessels, should not be overlooked. So much importance was formerly attached to this idea that Congress for a long series of years appropriated a bounty to vessels engaged in the fisheries, for the express purpose of encouraging ship-building and the training of seamen, and in the late civil war immense advantage to the Government was derived from the ready enlistment in the Navy of seamen trained in the merchant service.

Great Britain, with her two hundred thousand merchant seamen and her immense fleet engaged in the transportation of merchandise and passengers in all parts of the world, may serve our country in this view, both as a warning and as an example.

#### THE PUBLIC DEBT AND THE CONDITION OF THE TREASURY.

It is in the highest degree gratifying to the Secretary to notice the great reduction of the public debt since it reached its highest point in August, 1865, and its continued reduction since his last report, in 1868. The following table exhibits the reduction both of principal and interest:

On August 31, 1865, the indebtedness of the United States, not including bonds issued to Pacific Railroad Companies, was as follows:

Debt bearing coin interest	\$1, 108, 310, 191 80
Debt bearing currency interest	1, 273, 220, 103 16
Matured debt not presented for payment	1, 503, 020 09
Debt bearing no interest	461, 616, 311 51

Cash in the Treasur	у	2, 844, 649, 626 56 88, 218, 055 13
Amount of de	- ebt less cash in the Treasury	2, 756, 431, 571 43

The annual interest charge was \$150,977,697.87, and the average rate paid was  $6\frac{34}{100}$  per cent.

On November 1, 1868, the indebtedness of the United States, not including bonds issued to the Pacific Railroad Companies, was as follows:

Debt bearing coin interest Debt bearing currency interest Matured debt not presented for payment Debt bearing no interest	72, 325, 000 00 9, 753, 723 64
Cash in the Treasury	2, 598, 808, 572 06 113, 873, 019 24
Amount of debt less cash in the Treasury	2, 484, 935, 552 82
<sup>°</sup> The annual interest charge was \$126,408,343, an paid was 5 <sup>8</sup> / <sub>10</sub> per cent. On November 1, 1884, the public debt was as fol	-
Debt bearing interest Debt on which interest has ceased since maturity Debt bearing no interest	12, 547, 485 26
Cash in the Treasury	$1,842,491,521 \ 62 \\ 434,008,572 \ 93$
Net debt	1,408,482,948 69

The annual interest charge is now \$47,323,831.50, and the average rate paid  $3\frac{92}{100}$ , per cent.

Reduction of debt in sixteen years	\$1,076,452,604 13
Reduction of annual interest charge	79,084,51150
Reduction of debt in nineteen years	1, 347, 948, 622 74
Reduction of annual interest charge	103, 653, 866 37

In the management of its debt the United States has been an example to the world. Nothing has so much surprised European statesmen as the fact that immediately after the termination of one of the most expensive and, in some respects, exhaustive wars that have ever been carried on, the United States should have commenced the payment of its debt and continued its reduction through all reverses until nearly one-half

of it has been paid; that reduction in the rate of interest has kept pace with the reduction of the principal; that within a period of nineteen years the debt, which it was feared would be a heavy and never-ending burden upon the people, has been so managed as to be no longer bur-It is true that all this has been effected by heavy taxes, densome. but it is also true that these taxes have neither checked enterprise nor retarded growth. While, however, the public debt is in this satisfactory condition, there are some financial dangers ahead which can only be avoided by changes in our financial legislation. The most imminent of these dangers, and the only one to which I now ask the attention of Congress, arises from the continued coinage of silver and the increasing representation of it by silver certificates. I believe that the world is not in a condition, and never will be, for the demonetization of one-third of its metallic money; that both gold and silver are absolutely necessary for a circulating medium; and that neither can be disused without materially increasing the burden of debt, nor even temporarily degraded by artificial means without injurious effects upon home and international trade. But I also believe that gold and silver can only be made to maintain their comparative value by the joint action of commercial nations. Not only is there now no joint action taken by these nations to place and keep silver on an equality with gold, according to existing standards, but it has been by the treatment it has received from European nations greatly lessened in commercial value.

For many years the silver dollar was more valuable than the gold dollar in the United States, and although there were fluctuations in their comparative value, the advantages arising from their joint use much more than counterbalanced the inconvenience and loss occasioned by these fluctuations. Various causes in combination have produced the present depression of silver, but the main causes have been the inconsiderate action of Germany in demonetizing it and throwing upon the market the large amount, which, up to that time, had constituted her metallic currency, and the restrictions upon its coinage by other European nations.

In 1872 the silver dollar, as it had been for a long period, was more valuable than the gold dollar. In 1874 the decline commenced, and it has been continued until the silver dollar is worth only about 85 cents in gold, and further depreciation is prevented by its having been made receivable by the United States for all public dues and the coinage **at**, the rate of \$28,000,000 a year. We now hold \$147,573,221.89 in silver. The amount is so large as to become burdensome, and additional vaults

must be soon constructed if the coinage is to be continued. But this is a matter of small importance compared with the danger to which the national credit and the business of the country are exposed by the large amount of silver in the Treasury, which must be increased by further coinage, and especially by the issue of silver certificates. These certificates amount to \$131,556,531, and they may be increased to \$184,730,829 by the silver against which certificates have not been issued. Like silver, they are only prevented from great depreciation by being receivable for all public dues, in which respect they have an advantage over the United States notes, which are not by law receivable for customs duties; but although they are thus prevented from depreciation, the fact exists that a large part of our paper currency based on coin is worth only about 85 cents on the dollar. But this is not all; the certificates, being receivable for duties, prevent gold from coming into the Treasury.

The Treasurer, in his report, after referring to the fact that the Treasury is a member of the New York Clearing-House, and to the act of Congress of July, 1882, which prohibits banking associations from being members of any clearing-house in which silver certificates are not receivable for clearing-house balances, and the resolution of the associated banks nominally complying with that act, remarks:

"Notwithstanding this formal declaration of compliance with law, neither standard silver dollars nor silver certificates have been or are now offered in settlement of balances at the clearing-house, and the Treasury has refrained from taking any steps to enforce the receipt of either of these descriptions of funds, which have therefore not been used in payment of obligations presented through the clearing-house.

"As a consequence of the inability of the Treasury, under the existing practice, to use either the silver dollars or the silver certificates in its settlements with the New York Clearing-House, where by far the greater part of its disbursements is made, the available gold ran down from \$155,429,600, on January 1, 1884, to \$116,479,979, on August 12, 1884, while the silver dollars and bullion on hand not represented by silver certificates outstanding increased during the same period from \$27,266,037 to \$48,603,958.

"As a temporary expedient to stop this drain of gold from the Treasury, the assistant treasurer at New York was directed to use in payments to the clearing-house United States notes to the extent of one-half of the payments. But the amount of these notes in the Treasury, which at the time of the commencement of this mode of payment had accumulated beyond its needs, has now become so much reduced that they are no longer available for such payments to any considerable extent.

"If a return to the former practice of making payments entirely in gold or gold certificates shall result in a continuous loss of gold to the Treasury, not made up to a sufficient extent by receipts of gold from other sources, the question must soon arise for the decision of the Department as to whether it will continue to make in gold or its representative the payments now made through the clearing-house, or use in its payments the silver dollars or their representative certificates in some proportion to the relation which silver dollars in the Treasury, not held for certificates outstanding, bear to the available assets, and to an extent similar to that in which they are used at other offices of the Treasury.

"In ascertaining what this proportion is, it is to be considered that of the \$134,670,790 in gold coin and bullion now owned by the Government, \$95,500,000 was obtained by the sale of bonds under the resumption act.

"If it be held that this amount is available for no other purpose than the redemption of United States notes, the gold which may be used for ordinary payments is \$39,170,790, compared with \$46,831,660 in silver dollars, including bullion available for the same purposes.

"Or, if it be held that the provision in section 12 of the act of July 12, 1882, suspending the issue of gold certificates whenever the amount of the gold coin and bullion in the Treasury reserved for the redemption of United States notes falls below \$100,000,000, is by implication a requirement that this sum shall be held for the redemption of notes, then the balance of gold which may be used for ordinary payments is 34,670,790."

It is evident, from these extracts, and it will be rendered still more evident by an examination of the entire report, that silver certificates are taking the place of gold, and that a panic or an adverse current of exchange might compel the use in ordinary payments by the Treasury of the gold held for the redemption of the United States notes, or the use of silver or silver certificates in the payment of its gold obliga-As \$95,500,000 of the gold in the Treasury was obtained by the tions. sale of bonds for resumption purposes, it was doubtless the intention of the eminent gentleman under whose administration of the Treasury specie payments were resumed that at least this sum should be held in reserve for the redemption of United States notes, and not used for any other purpose. It is understood that he went further than this, and very properly entertained the opinion that an amount of gold equal to 40 per cent. of the outstanding United States notes should be held for their protection.

A government which engages in banking by furnishing a paper circulating medium must be governed by the rules which prevail with prudent bankers, and be constantly prepared to meet such calls as may be made upon it.

Many persons regard legal-tender notes as being money, and hold that no means should be provided for their redemption. That this is a delusion will be proven whenever there is a large demand for gold for export. They are not money, but merely promises to pay it, and the Government must be prepared to redeem all that may be presented or forfeit its character for solvency.

XXXI

The following is an analysis of the statement of the liabilities and assets of the Treasury of the United States, October 31, 1884:

		<u> </u>	
	Total assets.	Liabilities.	Available assets.
Gold coin and bullion Gold certificates	\$222, 536, 360 43 32, 477, 750 00

Total assets and liabilities	523, 896, 110 10	374, 853, 808 47	

From this statement it is seen that there is no surplus gold in the Treasury, and that the reserve has been trenched upon; that there is no plethora of any kind except of silver dollars, for which there is no demand.

After giving the subject careful consideration, I have been forced to the conclusion that unless both the coinage of silver dollars and the issue of silver certificates are suspended, there is danger that silver, and not gold, may become our metallic standard. This danger may not be imminent, but it is of so serious a character that there ought not to be delay in providing against it. Not only would the national credit be seriously impaired if the Government should be under the necessity of using silver dollars or certificates in payment of gold obligations, but business of all kinds would be greatly disturbed; not only so, but gold

would at once cease to be a circulating medium, and severe contraction would be the result.

The United States is one of the most powerful of nations-its, credit is high, its resources limitless; but it cannot prevent a depreciation of silver unless its efforts are aided by leading nations of Europe. If the coinage of silver is continued in despite of the action of Germany in demonetizing it and the limitation of its coinage by what are known as the Latin nations, there can be but one result: silver will practically become the standard of value. Our mines produce large amounts of silver, and it is important, therefore, that there should be a good demand for it at remunerative prices for the outlays in obtaining it. The suspension of its coinage might depress the market price of silver for a time, but the ultimate effect would doubtless be to enhance it. The metal which oriental nations and some western nations use exclusively for coin-and all nations to some extent-which costs, in the labor and capital required to extract it from the mines, more than its standard value as coin, cannot be permanently degraded by The production of gold is diminishing, that of silver artificial means. has practically reached its maximum, and there are strong indications that from this time the yield of both gold and silver mines will speedily decline. At the same time the demand for both for coinage and in manufactures will increase. The very necessities of the commercial world will prevent a general and continued disuse of either as money. The European nations which hold large amounts of silver must sooner or later come to its rescue, and the suspension of coinage in the United States would do much to bring about, on their part, action in its favor. But whatever might be the effect of the suspension of the coinage upon the commercial value of silver, it is very clear that the coinage cannot be continued without detriment to general business and danger to the national credit.

The coinage of silver dollars under the act of February 28, 1878, has now reached the very large amount of \$184,730,829, being an increase of \$28,009,880 for the year ending November 1, 1884. The amount of these dollars in actual circulation is \$41,326,736. The increase in the circulation for the year has only been \$1,260,346, against an increase of \$4,136,321 for the previous year. These figures of themselves are an insuperable argument against the continued coinage of silver dollars.

The Treasury would be relieved, in a measure, from the burden of the silver now held in the Treasury by a withdrawal from circulation of the one and two dollar notes. This would not be a gain to the

5022 F----3

Treasury, but it would be a gain to the country by increasing the amount of silver in circulation.

The amount of one-dollar notes in circulation is \$26,763,097.80; the amount of two-dollar notes in circulation is \$26,778,738.20. Congress would, I think, act wisely in putting an end to their circulation. Nor do I hesitate to express the opinion that the country would be benefited if all five-dollar notes should be gradually retired and the coinage of half and quarter eagles should be increased. If this should be done, the circulating medium of the United States below ten dollars would be silver and gold, and we should be following the example of France, in which there is an immense circulation of silver coin, which in all domestic transactions maintains a parity with gold.

The substitution of gold and silver for small notes would be productive of some inconvenience, but this would be temporary only. If the five-dollar notes should be withdrawn, the Treasury would be relieved from the burden of silver in its vaults, and it would not be long before the coinage of silver might be resumed.

#### COINS AND COINAGE.

The nominal value of the coinage at the mints of the United States during the fiscal year 1884 was \$27,932,824 of gold, \$28,773,387.80 of silver, and \$1,174,709.73 of minor coins, a total of \$57,880,921.53. Of the gold coinage, \$23,765,900 were in double-eagles, \$2,033,040 in eagles, and \$2,116,020 in half-eagles. Of silver, \$28,099,930 were in standard dollars, \$665,160.30 in dimes, \$4,465 in half-dollars, and \$3,832.50 in quarter-dollars.

The larger part, nearly six-sevenths, of the gold coinage was executed at the San Francisco mint, while the Philadelphia mint was chiefly occupied in coining silver and minor coins. Both gold and silver were coined at Carson, but only standard dollars at New Orleans.

Application having been made by the Hawaiian Government for the coinage of silver coins of the nominal value of \$1,000,000, authority was given to coin that amount at the San Francisco mint of the denominations and standards prescribed by the laws of that government, which conform in weight and fineness to those of similar United States silver coins, and the coinage was executed in accordance therewith.

Besides the conversion of bullion into coin, bars were manufactured and issued from the mints and assay offices of the value of \$23,875,585.57 gold and \$7,639,724.42 silver, a total of \$31,515,309.99. Gold bars of the value of \$25,419,530.15 were paid out in exchange for gold coin at the New York assay office, and \$381,269.71 at the Philadelphia mint, a
## REPORT OF THE SECRETARY OF THE TREASURY. XXXV

total of \$25,800,799.86, of which \$22,966,975.44 were delivered for shipment to Europe and the remainder for industrial uses.

For the coinage of standard dollars, \$24,378,383.91 worth of silver bullion was bought during the year, an average of \$2,031,532 per month. The mean New York price for silver bullion was \$1.1156 per ounce fine, and the average cost of the silver purchased was \$1.112.

The silver used in coining silver dollars, including the value of the silver wasted and sold in sweeps, cost \$24,203,572.67, being a monthly average of \$2,016,964.39.

The report of the Director of the Mint shows in detail and in tabular statements the operations of the mints and assay offices and the disposition of the bullion received, and contains valuable information in regard to the production, consumption, and circulation of gold and silver in the United States and in the world.

The mines of this country during the calendar year 1883 yielded of the precious metals, gold, \$30,000,000; silver, \$46,200,000—a total of \$76,200,000, and will probably produce nearly the same amount in the present year, as the receipts at the mints and exports indicate an increase in silver and slight decline in gold.

The coin of the United States is estimated to have been on the 30th of June, 1883, gold coin, over \$537,000,000; silver coin, \$228,000,000, and it has been increased during the fiscal year by coinage at the mints, and the import of United States coin, deducting the export and amount used in the arts, by \$13,000,000 in gold and \$22,000,000 in silver. On the 1st of October, 1884, it amounted to \$557,000,000 of gold, and \$257,000,000 of silver—a total of \$814,000,000. This does not include the bullion belonging to the Government at that date held at the mints and assay offices, aggregating nearly \$53,000,000 in gold and \$5,000,000 in silver—making the total in the country of coin and bullion available for coinage \$872,000,000.

The following are probably reliable estimates of the production of gold and silver for the last ten years:

## XXXVI REPORT OF THE SECRETARY OF THE TREASURY

## Recoinage and improvement of subsidiary coin.

The Secretary invites attention to the pressing necessity for the recoinage of the subsidiary silver coins of the United States. The decreased intrinsic value of these coins, owing to the marked decline in the price of silver, renders it advisable to increase their weight so that they will correspond to fractional subdivisions of the silver dollar.

The fractional silver coins of the United States were first authorized by the act of April 2, 1792, and were of full weight, being fractional portions of the dollar of 416 grains. As the silver dollar and its fractional parts were somewhat overvalued in that act, the weight of the dollar was changed by the act of January 18, 1837, to 412.5 grains, and the fineness from 892.4 to 900, the weight of the fractional silver coins being changed proportionally.

As the bullion value of these coins was still greater than their face value, it was found necessary, in order to keep them in the country for domestic use, to make them subsidiary to the silver dollar of that day. The act of February 21, 1853, therefore, reduced the weight of a dollar in fractional coin from 412.5 grains to 384 grains.

In the reorganization of the coinage laws, by the act of February 12, 1873, the weight of the fractional silver coins was again changed so as to correspond with the metric system, that law providing that a half-dollar should weigh 12.5 grams, which made the weight of one dollar in subsidiary silver 385.8 grains. This is the law at the present time.

As stated above, prior to 1873 the bullion value of the silver in the fractional silver coins exceeded the nominal value of the coins, but, owing to the decline in the price of that metal, the value of the silver in two half-dollars of the present coinage, or of one dollar in any fractional silver coined under existing law, is now only about 78 cents. This would seem to be out of any just proportion to the face value of the coins.

It is estimated that there are in the country at this time some seventyfive millions of dollars of fractional silver coins of the various weights and finenesses authorized by the acts stated above. Nearly \$30,000,000 of them are held in the Treasury, and are practically unavailable as an asset. A large portion of them is in a badly abraded condition, having been in circulation for a long period of years. To increase their bullion value so as to bring them up to the same weight proportionately as the silver dollar would require about four million '4,000,000) ounces of silver.

## REPORT OF THE SECRETARY OF THE TREASURY. XXXVII

The reasons which existed at the time for making fractional silver coins subsidiary to the dollar have ceased to exist, and, as the price of silver is now lower than at any time since the summer of 1879, the present would seem a most favorable opportunity for accomplishing the needed improvement in these coins. The work could be effected by the mints during the next five years, in connection with the regular coinage authorized by law, without an increase of force or interference with such regular coinage.

The tendency of all nations is to improve and beautify the designs on their coins, and especially to make them uniform in weight as far as practicable. There is not only a marked diversity in weight among our coins of the same nominal value, but they are characterized by a great variety and exceeding inelegance of design and a lack of artistic merit. Should Congress authorize their recoinage, a much-needed opportunity would be furnished for rendering them more creditable as well as more useful to the country.

## The trade-dollar.

The Secretary suggests that the existence of the anomalous tradedollars should be no longer tolerated. Originally coined for purposes of foreign trade, and given a limited legal-tender quality in this country, they have not only been deprived of that quality by law, but have also ceased to perform the function for which they were created.

Some millions of them, variously estimated at from six to ten, are held in various parts of the country, awaiting the action of Congress. Although intrinsically more valuable than the standard dollar, their bullion value is now only about 86 cents. If it be considered unfair or impracticable to accomplish their surrender at their bullion value merely, a small advance on that value might be offered for them. The offer should not remain open longer than one year. The bullion realized from them will be available for the ordinary coinage of the Government, but, if the present silver law is to remain in force, such bullion should be counted as a part of that now required to be purchased each month.

## PUBLIC MONEYS.

The monetary transactions of the Government have been conducted through the offices of the Treasurer of the United States, nine assistant treasurers, and one hundred and thirty-five national-bank depositaries.

## XXXVIII REPORT OF THE SECRETARY OF THE TREASURY.

The gross receipts of the Government, amounting during the fiscal year, as shown by warrants, to \$555,397,755.92, (\$206,877,886 of which were on account of loans,) were deposited as follows :

 In Independent Treasury offices
 \$427,658,671
 00

 In national-bank depositaries
 127,739,084
 92

Attention is again invited to the crowded condition of the vaults in the sub-treasury offices, occasioned by the great accumulation of standard silver dollars and redeemed fractional silver coins. The new vault just completed in the office of the Treasurer of the United States at Washington is the only one now available for further storage, the new vault at New Orleans being needed for the storage of silver accumulated at that point and that coined at the mint in that city. The vaults of the offices at Boston and Cincinnati have been somewhat relieved by transfers of silver to Washington, but there has been no transfer yet from the San Francisco office to the East, owing to the great cost of transportation and the inadequacy of the appropriation from which such cost is properly payable. The assistant treasurer at San Francisco has reported that his vaults are nearly full, and that there is no further space in his office available for the erection of another vault. He recommends the purchase of adjoining property for the purpose of providing additional vault-room.

There are also many millions of standard silver dollars in the mint at San Francisco which encumber the vault-space required to accommodate the current coinage, and which should be transferred if the coinage of such pieces is to be continued there, even in limited amount, as at present. The cost of transportation could be paid from the profit on their coinage, but they can be transferred to Washington only at a great expense, which the Department feels reluctant to incur, in view of the fact that such action would not distribute the coins or get them into circulation, but would simply change the place of their storage, and render it necessary hereafter for Congress to appropriate funds for their transportation from the Treasury, whenever the coins are distributed throughout the country.

## REPORT OF THE SECRETARY OF THE TREASURY.

## Standard silver dollars.

Statement showing the amount of standard silver dollars in the several Treasury offices October 31, 1884.

In office of—	Standard silver dollars.

NOTE.—The amounts outstanding on the dates named, as shown by the public-debt statement, are greater: there being included the amounts of the gold certificates of the old issue outstanding, which were as follows: On November 1, 1883, \$3,206,240; on November 1, 1884, \$2,584,380. The amounts held by the Treasury were: November 1, 1883, \$31,252,760; November 1, 1884, \$2,477,750.

#### Transportation charges on United States notes.

Attention is directed by the Treasurer to the need of an appropriation for the expense of transportation of worn and mutilated United States notes to the Treasury for redemption, and the return of new notes therefor.

In view of the fact that for many years Congress, by appropriating for this expense, recognized the duty of the Government to bear the entire cost of this currency, as the national banks are required to bear the expense of replacing their issues, and of the apparent discrimination in respect to facilities for redemption, against the holders of notes who cannot present them to an assistant treasurer without expense to themselves, it is urged that a sufficient amount be appropriated to pay the charges for the transportation of such notes for the remainder of this and for the ensuing fiscal year.

#### BUREAU OF ENGRAVING AND PRINTING.

Owing to the inadequacy of the appropriation for the preparation of United States notes, certificates, and bonds, for the fiscal year ended June 30, 1884, Congress was asked on January 5, 1884, for a deficiency appropriation. This not having been granted, the preparation of one-

## REPORT OF THE SECRETARY OF THE TREASURY. XLF

dollar and two-dollar notes was suspended from January 21, 1884, until July 1, 1884, at which time the appropriation for the current fiscal year became available. In consequence of this, the Treasury was for a time unable to supply these notes. The appropriation for the current year, being but \$4,000 greater than that of last year, is believed to be insufficient to maintain a full circulation of small notes.

The Secretary has already expressed the opinion that the function of the one-dollar and two-dollar notes would be better performed by the silver dollar, and suggested that a withdrawal of such notes would furnish legitimate employment for a large portion of the vast store of standard dollars now idle in the Treasury vaults.

If it be determined, however, to keep legal-tender notes of the smaller denominations in circulation, I recommend the appropriation of the full amount asked for by the Chief of the Bureau of Engraving and Printing.

### NATIONAL BANKS.

The number of national banks in operation November 1, 1884, was 2,672. The number of national banks organized during the year ending November 1, 1884, was 191, with an aggregate capital of \$16,042,230. Circulating notes have been issued to these new associations amounting to \$3,854,530. These new banks are located by geographical division as follows: Eastern States, ten banks, with capital of \$810,000; Middle States, twenty-five banks, with capital of \$1,812,250; Southern States, thirty banks, with capital of \$2,991,100; Western States, one hundred and two banks, with capital of \$8,905,880; Pacific States, five banks, with capital of \$380,000; Territories, nineteen banks, with capital of \$1,143,000.

Since the establishment of the national-banking system, on February 25, 1863, there have been organized 3,261 national banks. Of these, 489 have gone into voluntary liquidation by vote of shareholders owning two-thirds of their respective capital, and 100 have been placed in the hands of receivers for the purpose of closing up their affairs.

The aggregate capital of the national banks of the United States on October 1, 1884, was \$524,266,345; the surplus was \$147,045,833.28; the circulation was \$289,775,123; the individual deposits were \$975,259,295.14; the loans and discounts were \$1,240,070,797.02; the amount of specie was \$128,609,474.73; the United States bonds to secure circulation were \$327,435,000; and the United States bonds to secure deposits and for other purposes were \$30,419,600.

Eleven national banks, with an aggregate capital of \$1,285,000, have

## XLII REPORT OF THE SECRETARY OF THE TREASURY.

failed and been placed in the hands of receivers during the year ended November 1, 1884. The corporate existence of eighty-nine national banks expired during the year, of which eighty-three have been extended under the act of July 12, 1882. The shareholders of five national banks have permitted their corporate existence to expire by limitation during the year, three of which were succeeded by other associations in the same places and with nearly the same shareholders, and one national bank was placed in voluntary liquidation by vote or shareholders owning two-thirds of its stock. The corporate existence of 721 national banks, with an aggregate capital of \$189,071,475, will expire during 1885.

It will be noted that the circulation decreased \$25,156,452 during the year. The bonds deposited to secure circulation, which decreased \$9,613,350 in 1883, were still further reduced \$25,442,300 during 1884 a reduction of \$35,055,650 in two years.

The 3 per cent. bonds of the United States have now been reduced to less than two hundred millions, and they will be further reduced through the operations of the sinking-fund by nearly fifty millions each year.

The market prices of the 4 per cent. and the  $4\frac{1}{2}$  per cent. bonds of the United States have declined somewhat during the past year; but that these bonds are still too high to enable banks to base circulation upon them at a profit is plain, from the fact that the circulation has been voluntarily decreased more than \$25,000,000 during the year.

Among the measures of relief recommended in the last report were an increase of the issue of notes to the face value of the bonds deposited, a bill to authorize which passed the Senate during the last session of Congress; the acceptance of the 3.65 per cent. bonds of 1924 of the District of Columbia, the payment of which is guaranteed by the United States; and a repeal of the tax on circulation. I earnestly commend these propositions to the wisdom of Congress, believing that, if adopted, they will enable banks which now contemplate a surrender of their circulation in consequence of the calling of their 3 per cent. bonds to maintain it on the long-time bonds with a small profit, or at least without loss.

Inasmuch as about \$135,000,000 of the circulation of banks is based upon our 3 per cent. bonds, which are now redeemable and being rapidly redeemed, remedial action cannot be postponed beyond the present session if a rapid reduction of our bank-note circulation is to be avoided. The subject is a very important one, and should receive immediate attention.

## REPORT OF THE SECRETARY OF THE TREASURY. XLIII

These, however, would be measures of temporary relief only. Something more must be done if the system is to be established on a permanent basis.

More than twenty years have passed since the national banking system was adopted, and many people are not aware of the circumstances under which it came into existence. Prior to 1863 the paper circulation of the country was furnished by banks organized under State laws. The notes issued by these banks had a very limited credit, and none of them were perfectly secured. When it became apparent that large amounts of paper currency would be required by the Government in making payments and in the collection of the internal revenues, the question which presented itself to the Secretary, Mr. Chase, was: Can the notes of State banks be safely used by the Department for these purposes? Fortunately for the Government, and for the business of the country, the Secretary decided the question in the negative. It was his opinion, which coincided with the opinion of Congress, that a bank note circulation perfectly secured and current throughout the Union had become an absolute necessity; hence the creation of our national-banking system. It is one of the most interesting facts in our financial history that the notes of the State banks were retired and their place taken by those of the national banks-an entire revolution effected in our banking system-without a ripple of disturbance to the business of the country.

That the national-banking system has been of great service to the Government in the collection of revenues; that it has furnished a banknote circulation of uniform value, and safe beyond question, is admitted even by its opponents. Open to all who desire to engage in banking, free from anything which savors of monopoly, it is eminently adapted to our republican institutions. Banks of issue have been found necessary in all commercial nations, and it can be safely asserted that none, so far as circulating notes are regarded, are superior or equal to ours. All this being true, its preservation is a matter of national importance; its discontinuance would be a national calamity.

#### CUSTOMS.

The revenue from customs for the fiscal year ended	
June 30, 1884, was	\$195,067,489 76
That for the preceding fiscal year was	214,706,496 93
Showing a reduction of	19, 639, 007 17

#### XLIV REPORT OF THE SECRETARY OF THE TREASURY.

The total value of the imports of merchandise entered for consumption in the United States during the year ended June 30, 1884, was \$667,575,389, as against \$700,829,673 during the preceding fiscal year; the value of dutiable merchandise so entered amounted to \$456,295,124, as against \$493,916,384 during the preceding year; the value of merchandise free of duty amounted to \$211,280,265, as against \$206,913,289 during the preceding year; the average ad valorem rate of duty on dutiable merchandise was 41.702 per cent., as against 42.646 per cent. during the preceding fiscal year; and the average ad valorem rate of duty on free and dutiable merchandise was 28.503 per cent., as against 30.055 per cent. during the preceding fiscal year. These facts may be more concisely presented in tabular form, as follows:

Year ended June 30 Description. 1883. 1884 \$206, 913, 289 Merchandise free of duty..... \$211, 280, 265 Dutiable merchandise..... 493, 916, 384 456, 295, 124 700, 829, 673 667, 575, 389 Total value of merchandise... Per cent. Per cent. Average ad valorem rates of duty on-Dutiable merchandise..... Free and dutiable merchandise ...... 42.646 41.702 30.055 28.503

Value of imported merchandise entered for consumption, and duties collected thereon.

The following are the amounts of duty collected on the articles named during the years ended June 30, 1883 and 1884, respectively:

Articles.	1883.	1884.
1. Sugar, molasses, and confectionery	32, 320, 893 19, 654, 946 16, 590, 504 12, 234, 371	\$48, 923, 465 32, 001, 226 18, 962, 210 14, 799, 117 11, 479, 942 9, 418, 484 6, 945, 652 5, 730, 646

The report of the Chief of the Bureau of Statistics gives a review of the effect of the tariff act of March 3, 1883, for the year ended June 30, 1884, to which special attention is invited.

#### QUARANTINE OF NEAT-CATTLE.

The act making an appropriation for the current year to establish and maintain quarantine stations, and provide proper shelter for and care of neat-cattle imported, provides that the same be expended by

## REPORT OF THE SECRETARY OF THE TREASURY.

the Commissioner of Agriculture, under the general supervision of the Secretary of the Treasury.

Heretofore the establishment and maintenance of such quarantine stations was exclusively in charge of this Department, but under the foregoing provision the Department of Agriculture has entire control of the whole matter, including the expenditure of the appropriation, subject only to the supervision of this Department as to approving the details of expenditure and making general regulations governing the importation. It is presumed that the Commissioner of Agriculture. will make a report on the subject directly to Congress.

## SPECIAL AGENTS.

It appears from the report, herewith transmitted,\* of the Supervising Special Agent, who has charge of measures for the prevention and detection of frauds upon the customs revenue, that the most serious obstacle in the way of an honest collection of the customs duties is the widespread practice of undervaluing invoices of merchandise consigned to agents of European manufacturers. The consignment system seems to have largely grown up since the enactment of the act of June 22, This law, which requires the Government in certain customs 1874. cases to prove the intent to defraud the revenue as a separate and distinct proposition, is found by the law officers to be a constant barrier to the successful prosecution of frauds of this nature. In a recent decision of the United States court of the southern district of New York, it is held that the act in question repealed the law providing for forfeiture of the value of the goods where the merchandise fraudulently imported had gone into consumption.

Under this law and the ruling of the court, the Government has now no remedy where frauds upon the revenue have been successfully accomplished and the goods have passed beyond reach of the customs officers.

An ad valorem tariff without adequate means for its enforcement and penalties for its violation must inevitably result in loss to the revenue and to honest importers.

\*See Appendix, page 61.

XLV

#### INTERNAL REVENUE.

The receipts from the various objects of taxation under the internalrevenue laws, as reported by the Commissioner of Internal Revenue for the fiscal years ended June 30, 1883 and 1884, were as follows:

	Fiscal year ended June 30-		
Objects of taxation.	1883.	1884.	
Distilled spirits Tobacco Fermented liquors Bank circulation Penalties Taxes under repealed laws	\$73, 368, 775 20 42, 104, 249 79 16, 900, 615 81 782 35 305, 803 57 10, 873, 118 14	376,905,385 26 26,062,399 98 18,084,954 11 441 54 289,144 12 247,714 52	
Total	144, 553, 344 86	121, 590, 039-83	

These figures differ somewhat from the amounts actually covered into the Treasury as shown by the covering warrants.

From the above table it appears that the increase of revenue from spirits during the last fiscal year was \$2,536,610.06, and from fermented liquors, \$1,184,338.30; the decrease in the receipts from tobacco was \$16,041,849.81, and from all sources, \$10,625,403.62. This large decrease is due to the act of March 3, 1883, which reduced the tax on manufactured tobacco, snuff, cigars, &c., and repealed the tax on the capital and deposits of banks and bankers not national, and the stamptax on bank checks, friction matches, patent medicines, &c.

The cost of collecting internal revenue during the last fiscal year was \$5,100,451.84. The estimated cost for the same work for the current year is \$4,984,590.

## PRODUCTION OF SPIRITS.

The quantity of spirits produced and deposited in distillery warehouses during the fiscal year ended June 30, 1884, is greater than the production of 1883 by 1,422,431 gallons, but is less than that of 1882 by 30,417,422 gallons, and of 1881 by 42,292,411 gallons.

The increase in production of the fiscal year 1884, as compared with that of the fiscal year 1883, is distributed among the different kinds known to the trade as follows :

Increase in production of-

REPORT OF THE SECRETARY OF THE TREASURY.

XLVII

#### IMMIGRATION.

The experience of another year in the administration of the "act to regulate immigration," approved August 3, 1882, seems to justify a renewal of the recommendation of my predecessor in his annual report of last year, looking to a modification of the existing law.

The double capacity in which the State boards of immigration act, namely, as Federal and as State officers, as required by this act, tends to render the execution of the law uncertain and inefficient. The duty of securing the return of alien convicts to the countries whence they came is, by the fourth section of this act, imposed on State officers, without any remuneration. The proceedings of the return of such convicts must be taken by such officers, under the provisions of "An act supplementary to the acts in relation to immigration," approved March 3, 1875—proceedings so circuitous and complex as to render a return of convicts nearly impossible.

There is no provision in the act for the purchase or care of property, such as vehicles or edifices needed for the due execution of the law. The receiving of immigrants on their arrival in this country, when sick or temporarily physically disabled, necessitates a resort to the use of vehicles for transportation, and frequently the shelter of a hospital or other edifice of like character.

Applications from the boards of immigration at Baltimore and Galveston for authority to erect on the docks of those cities buildings simply for receiving immigrants on landing, on the ground of an imperative demand for them, are now before the Department; but the authority to appropriate the proceeds of the immigration fund for that purpose is, under the law, doubtful.

No contracts with State commissioners to administer the local affairs of immigration have been made within the past year. The commis-

## XLVIII REPORT OF THE SECRETARY OF THE TREASURY.

sioners who had previously been contracted with, viz., those at Portland, Me., Boston, New York, Philadelphia, Baltimore, Key West, and Galveston, are still in the exercise of their functions at their respective ports. At most of the other ports the receipts of tax have been found insufficient to warrant the designation of commissioners, and as a consequence, there being no agencies for the employment at such ports of the fund there collected as capitation tax, such collections have been, and still continue to be, covered into the Treasury without being in any way made available in the conduct of the affairs of immigration at the respective ports where collected. To obviate this, it is recommended that, in such cases, discretionary power be conferred on the Secretary of the Treasury to designate collectors of customs or their deputies to act as commissioners of immigration at their respective ports, with special compensation therefor, if deemed advisable.

Certain questions háve arisen, in the course of the administration of the law, as to the extent of the jurisdiction of boards of immigration over immigrants that have been landed. At some of the ports where immigration boards are in operation, particularly at New York, some difficulty has been experienced in determining where the examination of passengers should be made. The law, by implication, requires that such examinations shall be made on shipboard before the passengers have been landed. At ports where large numbers of immigrants arrive at one time, it has been found inconvenient, if not impracticable, to carry such requirement into practice, and, therefore, such examination has been conducted at some designated place of landing under the control of the board of immigration. For instance, the examinations at New York are made at Castle Garden.

A point was raised in a case recently before the United States court at New York bearing on the question of the authority, under the law, to return on shipboard for deportation parties who, having been landed, are found to be of a class whose landing is prohibited. While the court intimated, upon a point outside of the issue, that a place for the landing and subsequent examination of passengers might be designated under the law, it is recommended that further legislation be had, giving specific authority to make such designations.

The immigrant act of August 3, 1882, imposes no penalty for the landing of persons of the prohibited classes. The "Passenger act" of August 2, 1882, (section 9,) imposes a fine not exceeding one thousand dollars on the master of a vessel from a foreign port for allowing passengers to land without the consent of the customs officer in charge. While this latter might be invoked as prescribing a penalty for a vio-

## REPORT OF THE SECRETARY OF THE TREASURY. XLIX

lation of the former act, it is recommended that a special penalty of a reasonable amount be prescribed for the violation of the immigrant act in respect to the landing of passengers, and that such penalty be made a lien upon the transporting vessel. It is also recommended that the moneys so collected as penalties be made a part of the immigrant fund to be employed as provided by the immigrant act, as well as for the deportation of passengers illegally landed. If the recommendation hereinbefore made be adopted, viz., that passengers may be landed at designated places for examination, the penalty suggested should be made to apply in cases where, having been so landed and examined, they are found to be of the proscribed classes.

The section of the "Passenger act" above referred to (section 9) forbids the master to allow any one to go on board his vessel after her arrival, but before the customs officer takes charge, "except a pilot, officer of the customs or health officer, agents of the vessel, and consuls." The commissioners of immigration are not allowed to board the vessel until after an officer has taken charge. It will thus be seen that the agents of the vessel may, with the consent of the master, board the vessel in advance of the commissioners, and so be afforded an opportunity to interview the immigrants without hinderance to prepare them for the subsequent examination, so that the prohibition of the law in respect to the landing of certain classes may be avoided. It is, therefore, recommended that the law be so amended as to allow the commissioners of immigration or their representatives equal privileges with the agents of vessels in respect to boarding.

The receipts and disbursements on account of the immigrant fund, for the fiscal year ended June 30, 1884, as shown by covering and disbursing warrants, respectively, were as follows: Receipts, \$224,286.50; disbursements, \$235,443.86. The apparent excess of expenditures over receipts for the fiscal year is accounted for by the fact that such excess was paid from an unexpended balance of receipts of the preceding fiscal year, amounting to \$104,130.53.

5022 F-1V

The following statement shows the immigration at the several ports of the United States :

Number of immigrants arrived in the United States, by customs districts, during the years ended June 30, 1883 and 1884.

#### REVENUE MARINE.

The Revenue Marine maintains its position of usefulness and efficiency. The vessels now number thirty-eight, manned by about 950 officers and men, and are so stationed as effectually to cover the whole coast of the country.

L

The work of the service for the fiscal year last past is represented, statistically, as follows:

Aggregate number of miles cruised by vessels	317, 843
Number of merchant vessels boarded and examined	26,282
Number of merchant vessels found violating law in some	
particular and seized or reported to proper authorities	2,270 ·

Fines or penalties incurred by vessels so seized or re-

Sixty-three persons were picked out of the water and saved from drowning.

The cost of conducting the service for the past year was \$851,311.86.

The special work of the service has been unusually important. Four of the vessels were employed last spring in the waters of the Gulf of Mexico in preventing violations of the neutrality laws. Added to the regular work, the whole fleet has been employed during the season in maintaining a sanitary patrol upon our coast against the introduction of cholera and yellow fever, while four of the vessels have, in co-operation with the Marine-Hospital Service, kept up rigid national quarantine at the entrances to Delaware and Chesapeake bays and in the Gulf.

In compliance with the law requiring the Secretary of the Treasury to use revenue-vessels for the protection of the Government's interests in Alaska, the revenue-steamer "Corwin," under command of Captain Healy, has cruised industriously in the waters of Alaska and upon our coast within the Arctic ocean, with signal public benefit, seizing one schooner engaged in the unlawful killing of seals, assisting the crew of a shipwrecked whaler, succoring destitute miners, and making useful surveys and explorations.

The rebuilding of the revenue-steamer "Perry," at Buffalo, N. Y., has been completed during the year, and that vessel placed on duty at Erie, Pa., her former station. She proves an able and effective vessel, and constitutes a valuable addition to the fleet.

Three steamers of the service have been thoroughly overhauled and repaired in the hulls, and furnished with new boilers.

The steamer "Crawford," which has been laid up for several months as unseaworthy, has an engine of superior make. It is recommended that this vessel be rebuilt with iron hull, (utilizing the present engine,) for service in southern waters. For this purpose the sum of \$70,000 is included in the estimates.

LI

## LII REPORT OF THE SECRETARY OF THE TREASURY.

Of the two small steamers engaged in harbor duty at the port of New York, neither is adapted for the work now required of them, and one is reported in need of extensive repairs. The sum of \$50,000 is required for the construction of such a vessel as the public interests demand for this duty, and recommendation is made accordingly.

Attention is invited to the recommendations of five former reports that a vessel be provided for duty in Alaskan waters. The growing importance of this vast territory renders the subject of increased interest, while the results of the annual cruising of the revenue-cutters in the Alaskan region show the practical utility of the work performed. It is believed that this service cannot be abandoned without serious public loss.

#### LIFE-SAVING SERVICE.

The operations of this service have continued during the year with unabated success.

The number of the stations at the close of the year was 201. There were 337 disasters to documented vessels within the scope of their action. On board these vessels there were 4,253 persons; of these, 4,237 were saved, and 16 lost. The number of shipwrecked persons succored at the stations was 532, who received in the aggregate 1,319 days' relief. The value of property involved is estimated at \$10,530,025; of this, \$9,090,134 was saved, and \$1,439,891 lost. The number of vessels totally lost was 64.

The assistance in saving vessels and cargoes has been greater than ever before, 390 vessels having been worked off when stranded, repaired when damaged, piloted out of dangerous places, and similarly assisted by the station crews. There were also 240 instances of vessels being warned off by night-signals when running dangerously near shore, and thus probably saved from partial or total loss.

Besides the foregoing, there were 102 disasters to small craft, such as sail-boats, row-boats, &c., involving the lives of 179 persons. Of these, 175 were saved, and 4 lost. The property represented in these cases amounted to \$77,915, of which \$71,220 was saved, and \$6,695 lost. The aggregate is as follows:

Total number of disasters	439
Total value of property involved	\$10,607,940
Total value of property saved	\$9, 161, 354
Total value of property lost	\$1,446,586
Total number of persons on board	4,432
Total number of persons saved	4,412

REPORT OF THE SECRETARY OF THE TREASURY. LIII

Total number of persons lost	20
Total number of shipwrecked persons succored at stations.	532
Total number of days' succor afforded	1,319
Total number of vessels lost	64

Besides the persons saved from vessels as above shown, there were 21 rescued who had fallen from wharves, piers, &c., and would probably have been lost but for the assistance rendered.

The investigations held in each case of loss of life show that the lifesaving crews did their entire duty, and that the persons who perished were in every instance beyond human aid.

The cost of the maintenance of the service during the year has been \$766,834.64.

Five new stations have been established and put in operation since the date of the last report: One at Brenton's Point, Rhode Island; one at Lewes, Del.; one at North Beach, Maryland; one at Wallop's Beach and one at Parramore's Beach, Virginia. A station has also been rebuilt at Barnegat City, and another at Chadwick's, both on the coast of New Jersey. A station at the mouth of Portage Lake and Lake Superior Ship-Canal, Michigan, is also in process of construction, and five houses of refuge on the Florida coast are under contract for building. Proposals have also been invited for the construction of a station near Charleston, S. C., another at Jupiter Inlet, Fla., and a third at Santa Rosa Island, Fla. Titles have been secured to twelve sites on different parts of the coast, and preparations are being made for the establishment of stations thereon.

#### MARINE-HOSPITAL SERVICE.

During the last fiscal year 44,751 patients received relief-13,078 were treated in hospitals, and 31,673 at the dispensaries. The usual number of surgical appliances and orders for transportation were furnished. The receipts from all sources were \$421,348.59, and the expenditures, \$465,387.45. This includes \$37,460.08 expended for extraordinary alterations and repairs upon hospital buildings. Of the hospital patients treated, 8,954 recovered, 2,718 were improved, 665 remained unaffected by treatment, and 489 died. There were 2,707 persons physically examined by officers of this service at relief stations, some of them preliminary to shipment in the merchant marine and enlistment in the Revenue-Marine, Light-House, and Life-Saving Services. The larger number (1,850) were applicants for pilots' licenses, examined for color-blindness, of whom 41 were rejected for this defect. The examinations for pilots should be extended to acuteness of vision and hearing, which are as important defects as color-blindness. The gen-

## LIV REPORT OF THE SECRETARY OF THE TREASURY.

eral condition of the hospital buildings has been improved during the year, and of the new hospitals in course of construction the one at Memphis has already been occupied, and those at New Orleans, Cairo, and Cincinnati, will probably be occupied before the close of 1884; but additional appropriations are needed for the completion of the hospitals at New Orleans and Cairo.

The recommendations heretofore made for the establishment of a National Snug Harbor, or Sailors' Home, are also renewed.

The recommendation of the Surgeon-General for the purchase of the Seamen's Retreat property at Staten Island, New York, as recommended by my predecessor, which recommendation was subsequently adopted by the Committee on Commerce of the present Congress, (Report No. 1039,) is respectfully renewed, and early action on the part of Congress is suggested. Without action the service at New York will probably be without a hospital when the lease of the building terminates, in May next. A return to the old contract system, formerly in vogue at that port, would, in my judgment, be highly injurious to the service.

Of the two appropriations "for preventing the spread of epidemic diseases," of \$100,000 each, under the acts approved August 7, 1882, March 3, 1883, and July 7, 1884, the available balance on hand is \$65,000. The appropriation has been expended in the maintenance of quarantine in the manner set forth in former reports.

The immunity which this country has enjoyed from a visitation of epidemics during the past year may be properly attributable as well to the vigilant and efficient work performed by the various branches of service in this Department, acting conjointly with the Department of State, as to those natural causes which may have retarded the movement of epidemic diseases.

The Department, in pursuance of the proclamation of the President, dated July 19, 1884, directing extreme vigilance in measures for the prevention of the introduction of contagious diseases, among other precautions, has issued various orders providing for the restriction and temporary prohibition of the importation of old rags and of the admission of baggage of immigrants and returning travellers from infected countries.

In view of the recent outbreak of cholera in France, this subject has assumed great importance, both as affecting the health of the country and the interests of those engaged in the importation of rags and the manufacture of paper. Doubt has been expressed whether, under existing laws, sufficient authority is vested in any Department to prevent the importation of infected merchandise. It is recommended that such legislation be provided as may be deemed proper to protect our country from the introduction of contagious diseases through its foreign commerce.

The item in the Book of Estimates providing for an inspection of foreign quarantines and maritime hospitals is approved, in the belief that an examination of the methods employed by the enlightened nations of the world would be of benefit to this Department in devising and carrying out quarantine measures in this country.

It appears that the tonnage-tax which is now appropriated for the support of the Marine-Hospital Service is insufficient, and an appropriation is asked to supply the deficiency.

#### STEAMBOAT-INSPECTION SERVICE.

For salaries \$	34,277 00
For contingent expenses	3,319 05
Total	37,596 05

#### LIGHT-HOUSE ESTABLISHMENT.

The Light-House Board reports that it has established, under due Congressional authorization, 19 new light-stations, and discontinued 2, thus increasing the whole number on the United States coasts from the 755 reported last year to 772 at the end of the last fiscal year. The number of movable river lights was increased from 972 to 1,049, making an increase of 77 during the fiscal year. Another steam fogsignal was established, making the present number 67, including those operated by hot air. Two new whistling buoys were placed in position, making the whole number 34. Six bell buoys were added to the 23 in place at the end of last year, making the present number 29, and 2 lighted buoys, which were placed on the shoals off Cape Charles and

## REPORT OF THE SECRETARY OF THE TREASURY. LVIF

Cape Hatteras, make their first appearance on the light-house list. There were 54 more ordinary buoys, including the 14 placed in Alaskan waters, added to the list, increasing the number from 3,422 at the end of last year to 3,476 at the end of this year.

The Board has finally succeeded in constructing and putting into effective operation a lamp for first-order lights, in which mineral instead of lard oil can be burned, and it now has in use, practically, but. the one illuminant throughout the service.

The Board has also, after surmounting many difficulties, succeeded in establishing an electric light at Hell Gate, N. Y., which, on the night of October 20, 1884, was lighted for the first time. It is the only one used in the light-house operations of any country for illuminating, as by artificial daylight, a narrow channel.

The commerce of our country is to be congratulated on the high stand taken by our Light-House Establishment among those of other countries, as shown by the medals and diplomas awarded the Board at the various international exhibitions where it has shown its apparatus and its methods.

Attention is called to the statement made by the Light-House Board, in its annual report, as to the inconvenience to which it is now subject, and as to its need of a special building for its museum, its laboratory, its archives, and its office. The rooms in the Treasury building now occupied by the Board are much needed for other purposes, while the Board can go elsewhere without serious detriment to its business or that of the Department. The Board is now so cramped for room that its archives are not readily accessible, and are not as safely kept as they should be. Its clerks are seated so closely that they have not sufficient room, and as it was not designed to put so many people in any one room, they suffer in health and the work they are engaged upon is in consequence delayed.

The models of the structures it has built, which are needed in studies for new structures, are inaccessible, both to the Board and to the scientific public, for lack of room in which to arrange and display them. All the experiments of the Board have to be made at the laboratory at Staten Island, because of the lack of room for a laboratory here, thus occasioning much expense and delay, and sometimes rendering desirable experiments practically impossible.

The Secretary is, therefore, of the opinion that proper appropriation for a building for the Light-House Board should be made at an early day.

The annual report of the Board contains full details of the work done during the last fiscal year.

## LVIII REPORT OF THE SECRETARY OF THE TREASURY.

#### COAST AND GEODETIC SURVEY.

Developments and discoveries having an important bearing upon the interests of commerce and navigation have been made during the operations of this service. Prompt information has been given of these discoveries by the publication of "notices to mariners." Tide tables for the ports on the Atlantic and Pacific coasts have been published for 1885; progress has been made in the publication of the Atlantic Coast Pilot, and a new edition of the Pacific Coast Pilot is nearly ready for the press. A table of depths has been published for the harbors of the coasts of the United States.

Twenty-four new charts have been published, and the drawings of forty more have been in progress. Distribution has been made of 33,638 charts, of which number 12,248 were for the use of the Government.

The field-work of the Survey has made progress commensurate with the appropriations. In his report herewith submitted, the Superintendent renews his recommendation for an increase in the amount available for field parties. This recommendation met with the approval of the Department last year, being based on grounds of a reasonable economy, and the increase asked for being demanded by a fair consideration of the growth and development of the country. It is again commended to the favorable attention of Congress. The efficient conduct of this work will, in the judgment of the Department, be promoted by more liberal appropriations.

#### PUBLIC BUILDINGS.

During the last year work has been in progress on forty-two new buildings, under the direction of the Supervising Architect, of which number sixteen have been commenced, five completed, and two others practically completed.

The expenditures during the year on all new buildings, including sites, have amounted to \$2,772,413.58; for repairs and preservation of public buildings, \$164,102.32; for heating, hoisting, and ventilating apparatus, and repairs to same, \$135,000; for vaults, safes, and locks, \$80,362; and for storage of silver dollars, \$85,402.32.

The Supervising Architect, in his annual report, refers to three conditions which, under provisions of existing law, operate to the disadvantage of the Government, viz:

1. The limit of cost of public buildings appear in many cases to have been fixed without sufficient regard to the needs of the public service in cities where the buildings are to be constructed. 2. The appropriations made from time to time within the limits of cost are often inadequate for the proper prosecution of the work after its commencement.

3. Under existing law, no contract can be made binding the Government to an expenditure in excess of an existing appropriation.

The remedies suggested by the Supervising Architect commend themselves to my judgment.

## HALL OF RECORDS.

Attention is called to the paragraph in the annual report of last year relating to the necessity for the construction of a building for the safe and convenient storage of the files and records of the several Departments. This matter is of such grave importance that I recommend the construction of a building for this purpose at the earliest practicable date.

#### THE PACIFIC RAILROADS.

I earnestly direct attention to the provisions of the act of May 7, 1878, creating a sinking-fund for the Union Pacific and Central Pacific Railroad Companies, in the hope that Congress may devise a method for a more judicious investment of that fund. The law now requires the fund to be invested in bonds of the United States; and in making such investments the five per centum bonds are to be preferred, unless, for good reasons appearing to him, and which he shall report to Congress, the Secretary of the Treasury shall at any time deem it advisable to invest in other bonds of the United States. The five per centum bonds have all been redeemed or have ceased to bear interest, and while it would be manifestly unjust to select for investment the three per centum bonds only to be called in for redemption at short intervals thereafter, the only alternative is investment in the higher-rate bonds which now sell in the market at prices ranging from 13 to 28 per centum premium.

I deem the plan recommended by Secretary Sherman, in a communication to Congress, in December, 1879, and again in June, 1880, that investment be made in the first-mortgage bonds of the companies, worthy of the consideration of Congress.

The amounts standing to the credit of the fund available for investment on November 1, 1884, are as follows :

For the Union Pacific Railway Company	\$2,600,023 85
For the Central Pacific Railroad Company	1, 812, 435 91
	4, 412, 459 76

LIX

## REPORT OF THE SECRETARY OF THE TREASURY.

The attention of Congress is also invited to the act of March 3, 1879, (20 Stat., p. 420,) relating to transportation services performed for the Government by the Pacific Railroad Companies, the terms of which should be so modified as to embrace *all services* which have been, or may be hereafter, performed for the Government, and also include in its provisions the Central Branch Union Pacific Railroad Company.

## DISTRICT OF COLUMBIA.

The net expenditures on account of the District of Columbia for the fiscal year 1884, were \$3,407,049.62. The revenues deposited in the Treasury on this account for the same period were \$1,970,726.13.

Since December 1, 1883, there has been retired through the operation of the sinking-fund, \$264,700 of the bonded indebtedness of the District, reducing the amount annually required for interest \$15,432.55.

Since the duties of the commissioners of the sinking-fund of the District of Columbia were devolved on the Treasurer of the United States by the act of Congress of June 11, 1878, there has been retired \$1,640,050 of the funded debt, causing a reduction in the annual interest charge of \$96,286.22.

The amount realized from the sale of the bonds in which the ten per centum retained from contractors in the District of Columbia was invested as required by the act of June 11, 1878, (20 Stat., 106,) has exceeded the sum necessary to pay the amounts originally withheld, owing to the advance in the securities in which the investments were made. The surplus has been covered into the Treasury as miscellaneous receipts on account of proceeds of sales of guarantee-fund, District of Columbia, to be hereafter disposed of as Congress may direct. Onehalf of the amount originally retained was paid by the United States, and one-half by the District of Columbia.

#### ALASKA.

The Alaska Commercial Company took during the present season 100,000 seal-skins on the islands of Saint Paul and Saint George, the maximum number allowed by law, of which 94,960 have been shipped to San Francisco and the tax thereon paid, the rest still remaining on the islands awaiting shipment. The company has paid its annual rental and otherwise performed the conditions of its lease.

#### A STATUTE OF LIMITATIONS ON CLAIMS.

The necessity of legislation for the adjudication of claims coming within the jurisdiction of this Department has frequently been urged, and is again brought to the attention of Congress in the belief that

LX

some limitation of time will be adopted within which such claims shall be presented for settlement.

The enactment of a measure similar to the one introduced in the House at the last session of Congress, (H. R., 7235, section 2,) will, it is believed, relieve the accounting officers of much importunity on the part of claimants, and dispose of difficulties which have hitherto stood in the way of a final disposition of many of these claims.

The several reports of the heads of offices and bureaus are herewith transmitted.

## HUGH McCULLOCH,

Secretary.

#### To the Honorable

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

\* In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redemption, and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but, being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years. STATEMENT of the PUBLIC DEBT, including ACCRUED INTEREST thereon, less cash in the Treasury on the 1st day of July of each year, from 1869 to 1884, compiled from the published monthly debt-statements of those dates.

\* It will be noticed that there is a difference in the amounts represented by these two statements as to the principal of the debt July 1, 1860, and July 1, 1870. This difference is explained thus: In the principal of the debt as shown by the monthly debt statements of these dates the bonds purchased for the sinking fund and paid for from money in the Treasury were included as a part of the outstanding debt, and were also treated in the cash as a cash item or asset, for the reason that at that time there was no authority or law for deducting them from the outstanding debt. Congress, by the sixth section of the act of July 14, 1870, directed that these bonds should be canceled and destroyed, and acted from the amount of each class of the outstanding debt to which they respectively belonged, and such deductions were accordingly made on the books of the Department and in the table of the debt in the annual report.

NOTE 1 .- The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific railway bonds.

Note 3.—The figures for July 1, 1879, were made up assuming pending funding operations to have been completed. Note 3.—The temporary loan, per act of July 11, 1862, is included in the 4 per cents from 1862 to 1868, inclusive, with the exception of the amount outstanding for August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent. to 6 per cent., and was redeemable on ten days' notice after thirty days; but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent, interest on an average for the year.

Nore 4 .- In the recent monthly statements of the public debt the interest accrued has been added to the principal, making the net debt larger in that amount than the amount herein stated for each year.

**TABLE M.**—STATEMENT showing the AMOUNT of NOTES, SILVER CERTIFICATES, and FRACTIONAL SILVER COIN OUTSTAND-ING at the CLOSE of EACH FISCAL YEAR from 1860 to 1884, inclusive.

Norz.—The amount of State and national bank circulation is compiled from the reports of the Comptroller of the Currency at the nearest dates obtainable to the end of each fiscal year; the other amounts are taken from the official printed reports of the Secretary of the Treasury. The one and two year notes of 1863, and the compound in-terest notes, though having a legal-tender quality for their face values, were, in fact, interest-bearing securities, payable at certain times, as stated on the notes. They entered into circulation for but a few days, if at all, and since maturity these presented have been converted into other interest-bearing bonds or paid for in cash, interest included. The amount of fractional silver in circulation in 1860, 1861, and 1862 cannot be stated. The amounts stated for 1876 and subsequent years are the amounts coined and issued since January, 1876. To these amounts should be added the amount of silver previously coined which has come into circulation. \* Exclusive of \$8,375,934, amount estimated as lost or destoyed, act June 21, 1879.

LEGAL-TENDER NOTES.							
The act of February 25, 1862 (12 Statutes, 345), anthorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer, at the Treasury of the United States, and of such denominations, not less than five dollars, as the Secretary of the Treasury might deen expedient, \$50,000,000 to be applied to the redemption of demand- notes authorized by the act of July 17, 1861; these notes to be a legal tender in payment of all debts, public and private, within the United States, except duties on imports and interest on the public debt, and to be exchangeable for six per cent. United States bonds. The act of July 11, 1862 (12 Statutes, 532), authorized an additional issue of \$150,000,000 of such denominations as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than \$35,000,000 of a lower denomina- tion than five dollars; these notes to be a legal tender as before an- thorized. The act of March 3, 1863 (12 Statutes, 710), authorized an additional issue of \$150,000,000 of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The same act limited the time in which Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes author- ized by this act were to be in lien of \$100,000,000 anthorized by the resolution of January 17, 1863 (12 Statutes, 822). # APPENDIX.

### REPORT OF THE SUPERVISING SPECIAL AGENT.

### TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., November 14, 1884.

SIR: I have the honor to submit the following report of the work of the Special Agency Service of the Treasury Department for the fiscal year ended June 30, 1884:

Money paid into the Treasury :	
Ou account of seizures	\$32,649 47
Fines and penalties	
Suits	32,628 67
Duties	
Miscellaneous	33, 314 82
Total	706,082 38
Number of suits brought, 51:	•
Amount involved in suits	\$212,335 41
Number of seizures	
Appraised value of seizures	<b>\$79.893 63</b>
Duties on seizares	\$14.081 56
Reduction in expenses recommended	
Number of reports received	

Of these reports 112 relate to smuggling, 441 to undervaluation, 81 to misconduct of customs officers, 263 to seizures, 84 to inspection of customs districts, 44 to arrests made, 44 to suits, and 3,727 to miscellaneous subjects.

Examinations of nearly all the important customs collection districts show that the customs business generally is conducted according to the law and regulations. In only one of the districts was the discovery made that all Government funds were not properly accounted for. At Corpus Christi there was found a shortage in the collector's accounts of about \$1,700, and upon the failure of that officer to satisfactorily explain the discrepancies the President promptly suspended him from office and designated a successor'to discharge the duties of collector until the end of the next session of the Senate.

It has for years been practicable to make regular annual examinations at all the ports except New York, where, in consequence of the large volume of business transacted it has not heretofore been deemed advisable to attempt such a thorough inspection of the custom house as is made at the smaller ports. Such inspections could, however, be made by skilled officers with benefit to the service, and I have reason to believe that the head of the several customs departments at New York would welcome them as a means of improving the methods of business and the correction of irregularities which, owing to the complicated business and hurried manner in which it is conducted, are not likely to be discovered. These regular annual examinations are, as a rule, a source of satisfaction to the collectors of the several ports, inasmuch as they give them renewed assurance that the public interests intrusted to their charge are being properly cared for, and that their employés are neither derelict in their duties nor guilty of peculation in office.

### EVASIONS OF THE REVENUE.

In my official report dated November 20, 1883, I had occasion to state that "undervaluations of merchandise subject to ad valorem duties had alarmingly increased, and that the wisdom and ingenuity of the manufacturing and exporting classes of the old world and of their skillful agents in this country were employed in devising ways and means to take every conceivable advantage of our tariff laws." This statement was indignantly denied by importers and others at the port of New York, and proofs to sustain the allegation were loudly demanded. By direction of the late Secretary Folger a statement was prepared in the form of a report dated December 1, 1883, giving a portion of the information on the subject contained in the reports of the special agents and United States consuls.

This statement, which exposed the names of firms and the devices resorted to by them to evade the revenue, was extensively published in the press of this country and Europe, and I am informed that the publication caused great alarm and consternation among manufacturers on the continent, who, for many years have maintained their American trade in defiance of a protective tariff, and at the expense of the United States Treasury.

The immediate effect of these publications has been to augment values in consigned invoices, and to largely increase the revenues from these But no permanent suppression of the practice of undervaluasources. tion can be expected until the act of June 22, 1874, under the protection of which this system of fraud has grown up, shall be repealed. It is no exaggeration to state that the invoices of merchandise consigned to agents in the United States for sale, as distinguished from those of goods actually purchased by American importers, do not represent more than two thirds of the actual foreign market value of the goods therein An illegal reduction of the tariff on these goods is thus described. effected by the fraudulent acts of European manufacturers and their agents. In fact the European manufacturer, by the fictitious values he places upon his goods for customs purposes, fixes the amount of tax to be paid thereon subject only to such additions as the greater or lesser skill and vigilance of the appraising officers may impose. However competent and faithful the appraisers may be in fixing values according to their expert knowledge, their action is always subject to review and reversal by a reappraising board which usually decides according to evidence submitted, and as certain kinds of goods are exclusively imported under the consignment system, the agents of the manufacturers stand by each other upon reappraisements, and, by means of testimony thus obtained, in many instances, the goods escape advances and penalties originally imposed by the action of the appraisers.

An ad valorem tariff without adequate means for its enforcement and penalties for its violation must inevitably result in demoralization to trade and loss to the revenue. Even if there was no motive to save duties the competition between foreign manufacturers for the American trade would lead to fraudulent invoicing.

In a recent case tried at New York, where extensive frauds by undervaluation had been perpetrated by a commission house, the court held that the act of June 22, 1874, repealed the law which provided for the forfeiture of the value of goods, and the case was thereupon dismissed, although the Government was ready to prove the frauds alleged. The tendency of other rulings and decisions is to preclude the Government from suing for duties where fraud has been perpetrated unless such dutics have been ascertained by proper liquidation, based upon appraiser's returns.

Under these rulings, if frauds are successfully accomplished by smuggling or undervaluation, and the facts are afterwards discovered, the Government has no remedy, and cannot recover even the amount of duties due. These rulings are all based upon the provisions of the act of June 22, 1874, which, had it been enacted for the express purpose of enabling foreign manufacturers to circumvent the tariff laws, could not have better accomplished that object.

So long as that law remains in force the efforts of customs officers must necessarily be confined to the proper appraisement of foreign merchandise as it passes through the custom house.

Experience shows that in some cases, notwithstanding the care and vigilance of the best of the appraising officers, and in others by reason of ignorance or weakness of examiners, many undervalued invoices pass without detection. As an important step towards correcting undervaluations, and for the purpose of assisting appraising officers in determining the actual foreign market value of dutiable merchandise shipped to the United States, the Department has authorized the employment of silk experts at Lyons, France, and at Zurich and Horgen, Switzerland, and an embroidery expert at Saint Gall.

These experts report a steady increase in the values of invoices submitted to them for examination, and there can be little doubt that their employment has had the effect of checking, in a large degree, false invoicing of the kinds of goods above mentioned. But, as stated in previous reports, the only sure remedy for undervaluations is the substitution of specific for ad valorem duties.

### FRAUDS IN THE IMPORTATION OF GLASS.

Systematic frauds upon revenue under the cover of contracts for furnishing glass for public buildings have been discovered and suppressed. The actual losses on this account are estimated at about \$80,000. A suit is now pending in the United States District Court at New York for the condemnation of an importation of glass which was sought to be passed free of duty upon representations that it was to replace glass furnished for the new post-office building at Philadelphia.

Other suits have been entered to recover the duties due the Government upon previous fraudulent importations of a like character, and criminal prosecutions have been instituted against the guilty parties. The method by which these frauds were accomplished was as follows:

Included in the free list are articles imported for the use of the United States. When any of the Departments or any Bureau of this Department imports an article for Government use, a request is made to the Secretary of the Treasury to authorize the collector of the port where the article is landed to pass the same free of duty. For many years past, and until the discovery of the frauds referred to, it was customary

5022 F-5

for collectors to deliver the packages containing such merchandise with out examination.

It has been the practice of officers having charge of the purchase of materials and supplies for public buildings to invite bidders to state the price of articles of foreign manufacture, including duty, and free of duty, and contracts have been usually made at the lowest price, duty free, it being understood that duties were to be remitted on the imported articles. This was especially true of plate-glass used in many of the public buildings erected during the last few years.

A New York glass importer, knowing the fact that Government importations were passed by the custom house without examination, became a very successful bidder for supplying glass for public buildings. When called upon to fill his contracts he would supply the glass required from his stock on hand, and afterwards ask for a free order for an importation to replace it. The amount to be paid for glass furnished by this contractor for the Philadelphia post-office building was \$4,181, free duty. The duty upon the plate glass actually furnished would have been about \$2,500. To replace the glass so furnished he imported glass at the foreign value of \$22,074.10, the duty on which was \$26,280.

This is a fair illustration of the way in which the contractor was enabled to underbid all competitors of glass for Government buildings, the contracts for which were valuable to him chiefly because of the opportunities they gave for bringing in large quantities of polished plateglass free of duty.

It is respectfully submitted that it is not a proper construction of the tariff which gives to contractors the benefit of the clause authorizing the free importation of articles for the use of the United States. Such a construction not only gives an undue advantage to the foreign over the home manufacturer, but it also enlarges the amount to be used for the construction of public buildings beyond the sum fixed by law. In other words, it takes from the Treasury indirectly the duties upon the imported article when the same have not been appropriated for that purpose by act of Congress.

I respectfully recommend, therefore, the discontinuance of the system of advertising for and receiving bids for articles and supplies to be imported free of duty, or the purchase of articles in open market with the understanding that the duty is to be remitted.

In conclusion, I respectfully call attention to accompanying table marked A, which shows the business transacted in the several customs collection districts; also to table marked B, in which is shown the number of packages, with the invoice value and estimated duties thereon, forwarded without appraisement, from and to the ports specified in the act of June 10, 1880, and acts amending the same.

Very respectfully,

L. G. MARTIN, Supervising Special Agent.

Hon. HUGH MCCULLOCH, Secretary of the Treasury. APPENDIX.

NOTE.—The accounts of receipts and expenditures published by the Register will vary in some cases from the figures above given, for the reason that his statement is made up from warrants issued during the fiscal year, regardless of balances in the hands of officers at the beginning and end of the year. If the accounts of each collector were closed and balances settled at the end of the fiscal year, the two statements would agree.

## REPORT OF COMMISSIONER OF INTERNAL REVENUE.

## REPORT

### 0F

### THE COMMISSIONER OF INTERNAL REVENUE.

### TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE, Washington, October 20, 18

Washington, October 30, 1884.

SIR: I have the honor to submit the annual report of the Commissioner of Internal Revenue for the fiscal year ended June 30, 1884.

In order that you may have a clear view of the condition of the public business intrusted to my charge, I also include certain additional information relative to the work of the Bureau during the months of July, August, and September of the present year.

You will also find in the appendix to the bound volume of this report carefully prepared tabular statements as follows:

Table A, showing the receipts from each specific source of revenue, and the amounts refunded in each collection district, State, and Territory of the United States, for the fiscal year ended June 30, 1884.

Table B, showing the number and value of internal-revenue stamps ordered from the office of the Commissioner; the receipts from the sale of stamps and the commissions allowed thereon; also the number and value of stamps for special taxes, tobacco, cigars, cigarettes, snuff, distilled spirits, and fermented liquors, issued monthly to collectors during the fiscal year ended June 30, 1884.

Table C, showing the percentages of receipts from the several general sources of revenue in each State and Territory of the United States to the aggregate receipts from the same sources, by fiscal years, from July 1, 1863, to June 30, 1884.

Table D, showing the aggregate receipts from all sources in each collection district, State, and Territory of the United States, by fiscal years, from September 1, 1862, to June 30, 1884.

Table E, showing the receipts in the United States from each specific source of revenue, by fiscal years, from September 1, 1862, to June 30, 1884.

Table F, showing the ratio of receipts in the United States from specific sources of revenue to the aggregate receipts from all sources, by fiscal years, from July 1, 1863, to June 30, 1884.

Table G, showing the returns of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, and cigarettes, under the several acts of legislation and by fiscal years, from September 1, 1862, to June 30, 1884. Table H, showing the receipts from special taxes in each State, and Territory for the special tax year ended April 30, 1884.

Table I. Abstract of reports of district attorneys concerning suits and prosecutions under the internal-revenue laws during the fiscal year ended June 30, 1884.

Table K. Abstract of seizures of property for violation of internalrevenue laws during the fiscal year ended June 30, 1884.

### PRESENT NUMBER OF COLLECTION DISTRICTS.

After fully carrying out the scheme of consolidation of collection districts contemplated by the executive order of the President, dated June 25, 1883, as subsequently modified, the number of internal revenue districts is now eighty-five.

### ESTIMATE OF COLLECTIONS FOR PRESENT FISCAL YEAR.

It is estimated that the sum of \$115,000,000 will be collected during the present fiscal year from the various sources of internal revenue.

As anticipated in my last report the collections for the fiscal year 1884, reached over one hundred and twenty millions (viz, \$121,590,039.83).

Payment of the tax on the large production of spirits in 1881 was a material factor in this result. The falling off anticipated during the present year will follow from the diminished quantity of bourbon and rye whiskies produced in 1882, on which the tax will mature during the current fiscal year. Another cause contributing to the reduction of receipts will be the largely increased exportation abroad of spirits in bond, on which, for various reasons, the owners cannot pay the tax.

Something like 10,000,000 gallons have already been forced abroad during the current calendar year because of stagnation in trade and the refusal of Congress to extend the bonded period.

### COMPARATIVE RECEIPTS FOR THE LAST TWO FISCAL YEARS.

The total receipts from all sources of internal revenue taxation for the fiscal year ended June 30, 1884, were \$121,590,039.83 as compared with \$144,553,344.86 for the year 1883, \$146,523,273.72 for the year 1882, and \$135,229,912.30 for the year 1881.

The following statements will exhibit detailed information of the amount of internal revenue collected during the past year, and also for the first three months of the present fiscal year, of the sources from whence the revenue is derived, of the States and districts in which the collections during the past year were made, the cost of collections, &c.

### COMMISSIONER OF INTERNAL REVENUE.

### COMPARATIVE STATEMENT showing the RECEIPTS from the SEVERAL OB-JECTS of INTERNAL TAXATION in the UNITED STATES during the fiscal years ended June 30, 1883 and 1884.

### WITHDRAWALS FOR CONSUMPTION DURING LAST TWO FISCAL YEARS.

The quantities of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, and cigarettes on which tax was paid during the same periods are as follows:

	Products taxed. Number of gallons of spirits distilled from fruit. Number of gallons of spirits distilled from grain, molasses, and other materials. 5022 F----6
#### COST OF COLLECTION.

The cost of collection for the past fiscal year, distributed among the different items of appropriation, was approximately as follows:

For salaries and expenses of collectors, including pay of deputy col-	
lectors, clerks, &c	\$1,854,982 10
For salaries and expenses of revenue agents, surveyors of distilleries,	
gangers, storekeepers, and miscellaneous expenses	*2, 438, 000 00
For stamps, paper, and dies	454,311 69
For expenses of detecting and punishing violations of internal-revenue	
laws	56,736 57
For salaries of officers, clerks, and employés in the office of Commis-	
sioner of Internal Revenue	296, 421 / 48
Total	5 100 451 84

As compared with a total cost of collection for the year 1883 of \$5,105,957.09.

The total expenses (including the expenses of this office) will be found, on final adjustment, to be a little less than  $4\frac{1}{5}$  per cent. of the amount collected. The diminution of gross receipts could not proportionately affect the cost of collection, as nearly the same force had to be retained.

Owing to the increased number of distilleries in operation during the past year and the largely increased amount of spirits withdrawn from warehouse upon payment of tax and for export, all of which required to be gauged, the appropriation for payment of salaries of storekeepers and for fees of gaugers was insufficient, and early in May this office estimated that \$150,000 more would be needed for this purpose to meet actual expenses accruing during the fiscal year.

This estimate was based upon the records of this office as to the number of these officers on duty and a careful comparison with expenses of previous months, and an appropriation of the above-named sum was asked for.

In the act of July 7, 1884, making appropriation for deficiencies, \$80,000 only was appropriated for the above purpose, which was so much less than what was actually needed that most of these officers could be paid only up to the middle of June.

Accounts from over 1,100 of these officers for the last half of the month of June, 1884, are now on file unpaid, amounting to \$54,600, and it is known that there are some others yet to be filed, so that at least \$58,000 will need to be appropriated for this deficiency, and as so many persons are affected who are in need of this money justly earned, I would ask that the matter be presented to Congress for appropriation at the earliest practicable moment.

#### GENERAL CONDITION OF THE SERVICE.

It gives me pleasure to report that the general condition of the service is good, and I am very grateful to the officers of internal revenue throughout the country for their zeal and efficiency.

### MISCELLANEOUS EXPENSES.

The act of Congress approved August 7, 1882, making provision for sundry givil expenses for the year ending June 30, 1883, required the

\* This item includes \$58,000 for accounts of storekeepers and gaugers for last half of June, 1884, that were not paid owing to the appropriation being exhausted, and for which a deficiency appropriation will be needed.

Commissioner of Internal Revenue to make a detailed statement of all miscellaneous expenditures in the Bureau of Internal Revenue, for which appropriation was made in that act. In accordance with the aforesaid requirement, I submit the following detailed statement of miscellaneous expenses incurred:

Express charges on public money	\$4,236	36
Telegraphing on public business	1,022	
Locks for distilleries	4,707	45
Hydrometers for use in gauging spirits	7, 372	51
Gauging rods and saccharometers	398	25
Coin scales for collectors	. 75	95
Internal Revenue Record for internal revenue officers	2,454	37
Stationery for internal revenue officers	16,261	18
Compensation of United States attorneys in internal revenue cases, allowed	•	
under sections 827 and 838 Revised Statutes	3,445	00
Federal Reporter	- 10	00
Traveling expenses of clerks, &c., under special orders of the Department.	135	25
Expenses of seizures and sales by collectors	730	57 '

officers second district of New York	5,000	00
Expenses of National Academy of Sciences investigating nature and prop-		
erties of glucose	1,433	78
•		
Total	47,282	89

### **REVENUE AGENTS' DIVISION.**

The following statement shows the salaries and expenses of revenue agents, expenditures from the appropriation for the discovery of violations of internal revenue laws, illicit stills seized, persons arrested for illicit distilling, casualties to officers and employés in the internal revenue service, and statement of ordnance and ordnance stores issued to collectors; also a brief statement of work performed by revenue agents.

Thirty five revenue agents have been employed during the last fiscal year—one as chief of division in this office, four employed in examining collectors' accounts, and ten employed in assisting agents in charge of divisions.

By the act of Congress making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1885, approved July 7, 1884, the number of agents was reduced from thirty-five to twenty.

One thousand and forty-five violations of internal-revenue law have been reported by agents during the year, four hundred and thirteen persons have been arrested on their information, property to the value of \$52,531.72 has been reported by them for seizure, and for a-sessments for unpaid taxes and penalties the sum of \$103,662.25 has been reported by them.

There has been expended from the appropriation for salaries and expenses of revenue agents during the year as follows:

Aggregate salary of agents	\$83,290 50 43.393 20
Stationery furnished agents Transportation over Pacific Railroad	277 17
Total	•

### EXPENDITURES FOR THE DISCOVERY AND PUNISHMENT OF FRAUD.

Total	275	102	902	

### REPORT ON THE FINANCES.

Statement of the number of stills seized and casualties to officers and employés engaged in the suppression of illicit distillation for the last six years:

	1878.	1879.	1880.	1881.	1852.	1883.
Stills seized Officers and employés killed Officers and employés wounded	1, 024 8 17	1, 319 7 19	969 3 7	756 1 9	464 4 1	397 1

Strong representations were made in vain to Congress at its last session against the policy of reducing the force of revenue agents below the number of thirty-five fixed in the Revised Statutes. Only twenty can now be lawfully employed. With one necessarily on duty in Washington, and at least three others engaged in the work of examining the offices and accounts of collectors, only sixteen are left to watch over the general conduct of the system throughout the country and detect or prevent frauds upon the revenue.

This leaves too many avenues for fraud exposed, and I fear will result in much injury. It is difficult for any one man efficiently to do the work belonging to a revenue agent in a territory embracing sometimes three or more States and never less than two.

### OFFERS IN COMPROMISE.

The following statement shows the number of offers received and accepted in compromise cases for the fiscal year ended June 30, 1884, with amount of tax, assessed penalty, and specific penalty accepted, as provided under section 3229, Revised Statutes:

	Compromise offers—		tax.	assess- essable	f spe- alty.

### ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal Revenue Service for the fiscal year ending June 30, 1886, as follows:

For salaries and expenses of collectors	\$1,850,000
For salaries and expenses of twenty revenue agents, for surveyors, for fees and expenses of gaugers, for salaries of storekeepers, and for miscella- neous expenses.	2, 300, 000
For dies, paper, and stamps	475,000
For detecting and bringing to trial and punishment persons guilty of vio- lating the internal-revenue laws, including payment for information	
and detection	65,-000
sioner of Internal Revenue	294, 590
Total	4, 984, 590

### SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors for the fiscal year ending June 30, 1885, are based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections should vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

For collection of-	Salary.	For collection of-	Salary.
\$25,000 or less. 25,001 to \$37,500 37,501 to 50,000 50,001 to 75,000 100,001 to 125,000 125,001 to 175,000 125,001 to 175,000 175,001 to 225,000 225,001 to 275,000 325,001 to 375,000 325,001 to 375,000	2, 125 2, 250 2, 375 2, 500 2, 625 2, 750 2, 875 3, 000 3, 125	\$375.001 to \$425.000. 425.001 to 475,000. 475.001 to 550,000. 550.001 to 625,000. 625,001 to 700,000. 700,001 to 775,000. 775,001 to 850,000. 850,001 to 925,000. 923,001 to 1,000,000. 1,000,001 and upward.	3, 500 3, 625 3, 750 3, 875 4, 000 4, 125 4, 250 4, 375

### EXAMINATION OF COLLECTORS' OFFICES.

The examination of the accounts of collectors has been continued during the past year with gratifying results.

### OFFICIAL FORCE.

The force connected with this bureau during the fiscal year which ended June 30, 1884, in the various districts throughout the United States, as reorganized under the Executive order of June 25, 1884, as modified, was 84 collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.
29. 2	\$4,500 4,250 4,125 4,125 4,000 3,875 3,750 3,625 3,500 3,375	4	3, 12 3, 000

There were also employed during the year 1,001 deputy collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	. Sala
	\$2,000 6		
		·······	
		· · · · · · · · · · · · · · · · · · ·	
		· · · · · · · · · · · · · · · · · · ·

· · · · · · · · · · · · · · · · · · ·			
	1, 100 7		
••••••			
•••••••••••••••••		••••••••••••••••••••••••••••••••••••••	

Also 192 clerks, messengers, and janitors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.
1 4 3 7 2 4 1 1 9 9	1, 500 1 1, 400 1 1, 350 1 1, 300 1 1, 250 1 1, 200 1	5	

### REPORT ON THE FINANCES.

The force now connected with this Bureau in the various districts throughout the United States is 85 collectors, who receive per annum salaries as follows:

Number.	Salary.	Number.	Salary.
32 2	\$4, 500 4, 250 4, 000 3, 875 3, 750 3, 625 3, 500 3, 375	4 7 5 11 2 4 1	\$3, 250 3, 125 3, 000 2, 875 2, 750 2, 620 2, 500 2, 125

There are also now employed 956 deputy collectors, who receive per annum salaries as follows:

:	Number.	Salary.	Number.	Salary.
$\begin{array}{c} 11 \\ 34 \\ 1 \\ 34 \\ 1 \\ 10 \\ 31 \\ 2 \\ 31 \\ 2 \\ 47 \\ 8 \\ 2 \\ 3 \\ 2 \\ 36 \\ 4 \\ 49 \\ 41 \\ 3 \\ 1 \\ 1 \\ 1 \\ \end{array}$		$\begin{array}{c} 1,900\\ 1,800\\ 1,800\\ 1,750\\ 1,760\\ 1,600\\ 1,600\\ 1,550\\ 1,550\\ 1,550\\ 1,500\\ 1,450\\ 1,350\\ 1,300\\ 1,300\\ 1,300\\ 1,200\\ 1,050\\ 1,025\\ 1,$	4         22         1         15         13         14         2         6         2         3         11         4         3	900 85 800 66 60 60 50 45 42 42 40 40 30 30 30 30 20 20 21 51 12 112
		950		

Also 180 clerks, messengers, and janitors, who receive per annum salaries as follows:

Number.	Salary.	Number.	Salary.
1	\$1,800	30         33         14         5         1         8         2         2         2	\$1,000
2	1,600		900
9	1,500		800
1	1,400		750
4	1,350		720
31	1,350		700
9	1,250		650
9	1,200		650
9	1,150		500
9	1,100		300

There are also employed 800 gaugers, who receive fees not to exceed \$5 per diem; 1,104 storekeepers and gaugers and 659 storekeepers, whose pay does not exceed \$4 per diem (all the foregoing officers are paid only when actually employed); 36 tobacco inspectors, who receive fees to be paid by the manufacturers, and 7 distillery surveyors.

The appropriation bill for the fiscal year ending June 30, 1885, contained the provision that storekeepers or storekeepers and gaugers assigned to distilleries whose registered capacity is 20 bushels or less shall receive \$2 per day for their services. In view of this provision it

90

was deemed best to grade the pay of all officers of the classes named according to the capacity of the distilleries to which they may be assigned, and the following scale has been adopted for those assigned to distilleries of a daily capacity of more than 20 bushels:

Compensation for storekeepers and gaugers and storekeepers assigned to distilleries having a surveyed daily capacity exceeding 20 bushels and not exceeding 40 bushels, \$3 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 40 bushels and not exceeding 60 bushels, \$3.50 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 60 bushels, \$4 per day. I have done this because of the apparent incongruity of paying storekeepers \$4 per day if assigned to 21 bushel distilleries having a daily capacity of 20 bushels or less. And I may report that it will probably be very difficult in some localities to get suitable persons to accept assignments to distilleries where the pay is only two dollars.

### CONDITION OF THE OFFICE.

My thanks are due to the officers, clerks, and employés of the Bureau in Washington for faithful and efficient work during the year. The business of the office is well up to date and progressing satisfactorily.

### REPORT OF WORK PERFORMED.

The work performed by the different divisions of the office during the fiscal year ended June 30, 1884, is shown by the following statement:

#### SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1886, the sum of \$294,590 as salaries for the following officers, clerks, and employés in this Bureau:

One commissioner. at	\$6.000
One deputy commissioner, at	3,500
Two heads of division, at	
Five heads of division, at	
One superintendent of stamp vault, at	2,000
One stenographer, at	1,800
	,

Twenty-four clerks, at	\$1.800
Twenty-five clerks, at	1.600
Thirty-four clerks, at	1.400
Twenty-four clerks, at	1.200
Fourteen clerks, at	
Seventy-uine clerks, at	
Two messengers, at	
Fourteen assistant messengers, at	
Thirteen laborers, at	

An aggregate of 240 persons.

I also recommend the appropriation of the sum of \$2,500 as salaries for one stamp agent, at \$1,600, and one counter, at \$900, the same to be reimbursed by the stamp manufacturers as provided by the act of August 5, 1882.

### NUMBER AND VALUE OF STAMPS ISSUED.

STATEMENT of the NUMBER, KIND, and VALUE of INTERNAL-REVENUE STAMPS ISSUED to COLLECTORS, during the fiscal year ended June 30, 1884.

Denomination.	Number.	Value.
Stamps for distilled spirits, tax-paid         Stamps for distilled spirits, other than tax-paid.         Stamps for tobacco and snuff         Stamps for cigars and cigarettes         Stamps for fermented liquors and brewers' permits.         Stamps for special taxes         Stamps for documents and proprietary articles	62, 381, 520 848, 020	\$82, 869, 345 00 20, 560 00 16, 907, 648 10 10, 874, 754 65 19, 191, 740 00 9, 015, 662 00 209 25
Total	482, 993, 349	138, 879, 919 00

### CANCELLATION OF STAMPS.

The work of canceling and redeeming stamps imprinted upon checks and returning the same to claimants was suspended in November, 1883, because the appropriation of the Bureau of Engraving and Printing would not justify that bureau in any longer continuing the work, as fully explained in my last annual report. This left quite a number of stamps on hand accompanying claims which were received prior to July 31, 1883, uncanceled, and many were received thereafter with the request for cancellation. The attention of Congress was called to the subject, and the necessary appropriation was made by an act approved February 14, 1884, and on the 25th of February the cancellation of stamps was resumed. There were employed in February 65, in March 73, in April 88, in May 20, in June 12, in July 16, in August 9, and for thirteen days in September 7 persons. The increase or diminution of the force during this time was caused by the increase or diminution of the work, and all claims for cancellation, with the exception of about half a dozen, were completed on the 13th of September, 1884.

The amount expended from the appropriation above referred to during this time was as follows:

Bureau of Engraving and Printing reimbursed	\$8,137	62
Employés during—		
February	608	00
March	3.467	88
April		
May		
June	600	
- July		
August .		
To September 13	144	00
-		
'Total	19,052	35

leaving a balance of the appropriation unexpended at this date of \$947.65.

Two thousand nine hundred and forty-four packages of stamps, amounting to \$207,589.18 in value, were canceled and returned, and stamps amounting to \$149,460.10 were redeemed and destroyed, making the total value of stamps redeemed \$357,049.28. There remain on hand at this date about 1,200 packages, and it is quite probable that the greater portion of this number will be rejected unless the necessary proof is promptly furnished. All of these claimants have been notified, some of them repeatedly, of what was necessary for them to do to perfect their claims.

Packages of check-stamps are being received daily for redemption and are being counted and disposed of as current work by the regular official force. Where the claims are perfect the stamps are destroyed and the claim allowed; otherwise, the stamps are held and the claimants informed what evidence is necessary before their claims can be further considered. In many cases parties are unable to give the date of purchase from the Government of adhesive stamps, or the date of imprinting upon checks by the Graphic Company, and as the act of March 1, 1879, requires that stamps should be presented within three years from the date of purchase or imprinting as above stated, it is impracticable to dispose of these claims save by rejection. With exception of such cases as are herein referred to, the work in connection with this branch of the service is disposed of as current work by the regular force of the office.

#### MANUFACTURE OF PAPER.

During the present fiscal year, after due advertisement for proposals, a contract has been entered into with the Fairchild Paper Company, of Boston, Mass., for the manufacture of about 450,000 pounds of paper for (printing) internal-revenue stamps. The rate to be paid under the contract is  $8\frac{3}{4}$  cents per pound. The work of manufacturing the paper was commenced on the 21st of July, 1884, and is still in progress. Should the business of the country demand a larger number of stamps during the present fiscal year than during the last, as now seems quite likely to be the case, the quantity of paper to be manufactured will be increased.

### PRODUCTION OF STAMPS.

During the last fiscal year all internal-revenue stamps have been produced by the Bureau of Engraving and Printing, except stamps imprinted upon foil wrappers for tobacco, which have been printed by John J. Crooke, of New York.

The sundry civil bill for the year ending June 30, 1885, as it originally passed the House, is as follows:

For paper and stamps, four hundred and ten thousand dollars; the engraving and printing of said stamps to be done in the Bureau of Engraving and Printing of the Treasury Department, under the direction of the Secretary of the Treasury: *Provided*, That the cost of doing it there shall not hereafter exceed what it shall be found, after an advertisement for proposals, it would cost to have it done elsewhere.

The proviso was stricken out in the Senate. The act as finally passed reads as follows:

For paper and stamps for the Bureau of Internal Revenue, four hundred and ten thousand dollars; the engraving and printing of said stamps to be done in the Bureau of Engraving and Printing of the Treasury Department, under the direction of the Secretary of the Treasury.

It was the evident purpose of the House of Representatives at the time of its first action upon the bill to allow internal revenue stamps to be engraved and imprinted elsewhere than in the Bureau of Engraving and Printing, if the work could be done elsewhere at less expense to the Government; but the action of the Senate and the act itself as finally passed seem to indicate a purpose to allow no competition with that bureau. This subject is mentioned only for the purpose of calling attention to the following provision in the act making appropriation for the legislative, executive, and judicial expenses for the fiscal year ending June 30, 1885:

For one stamp agent, at sixteen hundred dollars, and one counter, at nine hundred dollars; in all twenty-five hundred dollars, the same to be reimbursed by the stamp manufacturers.

This is the appropriation hitherto made each year for payment of the stamp agent and counter stationed at the place in New York where stamps are imprinted on tin foil wrappers. It was clearly designed to meet that expense and no other, for there is no other similar expense to be met.

When the bill of Mr. Crooke for the month of July reached the office of the First Comptroller, he decided that no payment could be made him for work of this character, for the reason that the act above referred to required that all printing under the appropriation should be done at the Bureau of Engraving and Printing. In view of the great practical importance of the question to persons using foil-wrappers, a letter was addressed to the honorable Secretary of the Treasury on the 23d of August last, setting forth the above facts, with others, and requesting him to submit to the Attorney-General for his opinion whether the restriction of the statute was not upon the expenditure of the appropriation rather than upon the place of manufacture of the stamps, and whether this office could legally cause them to be prepared elsewhere than in the Bureau of Engraving and Printing, provided such preparation was without expense to the Government. The matter was submitted to the Attorney General by the honorable Secretary, and under date of the 16th of September last he transmitted his opinion in writing to the effect that the Commissioner of Internal Revenue is authorized to have stamps imprinted upon foil-wrappers for the payment of tax upon tobacco elsewhere than in the Bureau of Engraving and Printing, provided that the United States are at no expense thereabout, &c.

A contract will be made with John J. Crooke, of New York City, for the imprinting of stamps upon foil-wrappers without charge to the Government, he receiving such remuneration from manufacturers of tobacco as may be agreed upon between them, and he reimbursing to the Government the salaries of one stamp agent and one counter, amounting to \$2,500 per annum.

One reason why this work cannot well be done by the Bureau of Engraving and Printing is that the process of imprinting upon foil is a patent process, and another that a great majority of manufacturers who use the foil wrapper with the stamp imprinted as aforesaid have their manufactories in the vicinity of New York and would be subjected to much additional expense in the way of freights, should the foil be shipped here to be imprinted and then returned to them, besides the risk of injury to the wrappers in transitu.

### TOBACCO.

The internal-revenue taxes collected from tobacco during the fiscal year ended June 30, 1884, aggregated \$26,062,399.98. This amount includes taxes imposed on domestic and imported manufactured tobacco, snuff, cigars, and cigarettes, and all special taxes paid by manufacturers and dealers in tobacco. The collections from the same sources made during the fiscal year ended June 30, 1883, were \$42,104,249.79, and during the fiscal ended June 30, 1882, were \$47,391,988.91.

The collections made during the last fiscal year were nearly all under the rates of tax prescribed by the act of March 3, 1883. Those made during the fiscal year ended June 30, 1883, were partly under those rates of tax and partly under the rates of tax prescribed by previous acts. Those made during the fiscal year ended June 30, 1882, were under the rates of tax in force prior to the time when the act of March 3, 1883, took effect.

It will be observed, by comparing the receipts for the last fiscal year with those for the fiscal year immediately preceding it, that the decrease of revenue from tobacco was \$16,041,849.81, and by comparing those receipts with the receipts for the fiscal year ended June 30, 1882, that the decrease was \$21,329,588.93. This last comparison more nearly shows the effect of the reduction of the tax on tobacco under the act of March 3, 1883. For the collections of those two fiscal years were made under the different rates of tax.

But this comparison is not complete, owing to the fact that the production of tobacco, snuff, and cigars for the last fiscal year shows a large increase over the production for the fiscal year ended June 30, 1882, as will be more clearly seen from the following comparative statements:

Year.	Pounds tobacco and snuff.	Number cigars and cigarettes.
1884 1882	184, 833, 667 172, 153, 816	4, 451, 643 225 3, 662, 973, 076
Increase	12, 679 <sub>8</sub> 851	788, 670, 149

#### RECEIPTS FROM TOBACCO AND SNUFF.

Manufactured tobacco at 8 cents per pound Manufactured tobacco at 16 cents per pound Snuff at 8 cents per pound	1,147 80
Total for year ended June 30, 1884 Total for year ended June 30, 1883	13, 936, 258 99 22, 872, 425 35
Decrease in collections on tobacco and snuff	8,936,166 36

Of this decrease \$8,648,355.12 was on chewing and smoking tobacco, and \$287,811.24 on snuff.

#### RECEIPTS FROM CIGARS AND CIGARETTES.

Cigars taxed at \$3 per thousand Cigars taxed at \$6 per thousand Cigarettes taxed at 50 cents per thousand Cigarettes taxed at \$1.75 per thousand Cigarettes taxed at \$3 per thousand	3, 896 453, 972	44 57 43
Total for year ended June 30, 1884 Total for year ended June 30, 1883	$10,823,214 \\17,825,189$	28 88
Decrease in collections from cigars and cigarettes	7,001,975	60

Of this decrease \$6,526,409.88 was on cigars, and \$475,565.72 on cigarettes.

Decrease special taxes, leaf dealers	5,939	30

No export stamps were sold during fiscal year ended June 30, 1884; during previous year sales were \$876.

#### PRODUCTION OF MANUFACTURED TOBACCO, CIGARS, ETC.

The production of tobacco, snuff, cigars, and cigarettes for the fiscal year ended June 30, 1884, as shown from the several quantities removed for consumption on payment of tax, together with the quantities removed in bond for export, is as follows:

#### TOBACCO AND SNUFF.

Tobacco taxed at 16 cents per pound Tobacco taxed at 8 cents per pound Snuff taxed at 8 cents per pound	168, 586, 245
Total quantity removed for consumption	174, 196, 064
Tobacco and snuff removed for exportation	10, 637, 603
Total apparent production	184, 833, 667
Total apparent production year ended June 30, 1883	181, 313, 313
Total increase of production	3, 520, 354

This entire increase, together with the excess of the quantity exported in 1883 over that in 1884, being 314,152 pounds, was put on the market for consumption.

#### CIGARS AND CIGARETTES.

	Number.
Cigars and cheroots taxed at \$3 per thousand	3, 454, 969, 610
Cigars and cheroots taxed at \$6 per thousand	649, 407
Cigarettes taxed at 50 cents per thousand	907, 945, 140
Cigarettes taxed at \$1.75 per thousand	
Cigarettes taxed at \$3 per thousand	
Total number removed for consumption	4 363 700 740
Cigars removed in bond for export	
Cigarettes removed in bond for export	
	4 451 440 005
Total product for fiscal year 1884 Total product for fiscal year 1883	4, 451, 643, 225
Total product for fiscal year 1883	3,947,572,080
Total increase of production	504, 071, 145

Of this increase 495,799,095 were removed for consumption, and 8,272,250 were exported.

### SPECIAL TAX COLLECTIONS.

The following statement shows the number of persons and firms who paid special taxes during the fiscal year ended June 30, 1884, as manufacturers, dealers, and peddlers of tobacco, snuff, and cigars, and leaf dealers:

Manufacturers of tobacco, including snuff	852
Manufacturers of cigars, including cigarettes	
Dealers in manufactured tobacco	473,465
Dealers in leaf tobacco	4,623
Peddlers of manufactured tobacco	
- Total number of special tax payers	496, 853

STATEMENT of the NUMBER of TOBACCO FACTORIES in EACH STATE, &c.-Continued.

102

### DIRECT TAX.

#### CLAIMS FOR SURPLUS.

The act of March 3, 1883 (22 Stat., 595), authorized the Secretary of the Treasury to cause to be audited by the proper accounting officers' of the Treasury and paid the claims of the original owners of lands which were sold for non-payment of United States direct taxes, for the surplus proceeds of the same, under section 36 of the act of August 5, 1861, as interpreted by the Supreme Court in United States v. Taylor (104 United States Reports, 216), and for such purpose the sum of \$190,000, or so much thereof as might be necessary, was appropriated.

The whole number of claims which have been presented under this act is 308, representing 380 pieces of property.

Thirty-nine of these claims have been allowed and paid; 190 have been examined and disposed of, so far as this office is concerned.

Number on hand July 1, 1884, 118.

The total amount paid in settlement of these claims to July 1, 1884, was \$23,330.21, leaving on that date \$166,669.79 of the appropriation still available.

### CLAIMS FOR PURCHASE MONEY.

The number of claims for payment to purchasers at direct tax sales on account of eviction under the act of May 9, 1872: Examined and acted upon, 6; number on hand July 1, 1884, 13.

#### INTEREST CLAIMS.

Number of claims filed under section 4 of the act of February 25, 1867, for refund of interest alleged to have been illegally collected, 289.

Action upon these claims has been suspended awaiting a decision of the Court of Claims in the test case of J. H. Simons v. United States. (Int. Rev. Rec., vol. 30, p. 241.)

Total number of letters received, 773; total number of letters written, 1,016.

### REBATE, ABATEMENT, AND REFUNDING CLAIMS.

#### 1.—REBATE CLAIMS.

On the 1st day of July, 1883, there were pending 13,155 claims for rebate, amounting to \$1,259,578.30. During the fiscal year there were presented 31,753 more, amounting to \$2,227,043.82.

Of these, 44,818, amounting to \$3,483,061.26, have been allowed, and 75, amounting to \$2,353.31, have been rejected, leaving pending and undisposed of 15 claims, amounting to \$1,207.55. Of the \$3,750,000 appropriated by Congress on the 14th day of February, 1884, to pay these claims, \$212,461.55 remains unexpended, and not much more of it will probably be needed, as most of the pending claims will probably be rejected.

### 2.—ABATEMENT CLAIMS.

On the 1st day of July, 1883, there were pending 633 claims for abatement of taxes assessed, amounting to \$675,782.54, and during the year 1,931 other claims, amounting to \$1,019,742.19, were presented. Of these, 1,384 claims, amounting to \$1,063,785.50, have been allowed by this office, and 902, amounting to \$333,469.59, have been rejected or returned for amendment.

This left 278 claims for abatement still pending on the 30th of June last, amounting to \$87,075.29. Since that date and up to the 1st instant 1,359 other claims have been filed, amounting to \$1,711,200.37, 1,101 have been allowed, amounting to \$1,388,605.37, and 313 rejected or returned for amendment, amounting to \$198,601.90, and on the 1st day of October, 1884, 223 claims for abatement were pending, amounting to \$123,993.10.

### 3.—REFUNDING CLAIMS.

On the first day of July, 1883, there were pending 442 claims for the refunding of taxes collected, amounting to \$602,816.55, and during the year 217 other claims, amounting to \$83,247.27, were presented.

Of these, 97 claims, amounting to \$50,150.12, have been allowed by this office, and 83 claims, amounting to \$47,135.45, have been rejected or returned for amendment.

This left 479 claims for refunding still pending on the 30th of June last, amounting to \$588,778.25. Since that date, and up to the 1st instant, 62 other claims have been filed, amounting to \$7,348.38, 59 have been allowed, amounting to \$27,651.65, and 63 rejected or returned for amendment, amounting to \$27,827.15, and on the 1st day of October, 1884, 419 claims for refunding were pending, amounting to \$540,647.83

		•	*		<u>'</u> '		·

The total number of grain distilleries registered during the fiscal year ended June 30, 1884, was 1,291, of which number only 1,078 were operated. The numbers registered and operated in the fiscal year ended June 30, 1883, were 1,250 and 1,096, respectively, showing an increase during the last fiscal year of 41 in the number registered and a decrease of 18 in the number operated.

The increase in the number registered occurs, as was the case in the preceding fiscal year, in the class of distilleries having the smaller capacities for the production of spirits.

In the class of larger distilleries a very decided reduction occurs both in the number registered and the number operated.

During the fiscal year ended June 30, 1883, 969 of the smaller distilleries were registered, of which number 875, or 90 per cent., were operated; while of the larger distilleries, 281 were registered, and 221, or 78 per cent., were operated.

During the fiscal year ended June 30, 1884, 1,052 distilleries of the smaller class, whose daily capacities for the use of grain vary from not over 5 bushels to not over 60 bushels, were registered, and of this number 905, or 86 per cent., were operated.

Of the larger distilleries, whose daily capacities vary from not less than 60 bushels of grain to 500 bushels, and from that to near 6,000 bushels, 239 were registered, and 173, or 72 per cent., were operated. The increase (83) in the number of small distilleries registered was

The increase (83) in the number of small distilleries registered was not attended by a corresponding increase in the number operated, only 30 more of this class having been operated than in the previous year.

The decrease (42) in the number of large distilleries registered was accompanied by a still larger diminution (48) in the number operated.

The quantity of grain used in the production of spirits during the past fiscal year, 18,927,982 bushels, is an increase of 283,195 bushels above the amount used in the preceding fiscal year (18,644,787 bushels), but is 5,137,897 bushels less than the average (24,065,879 bushels) for the last five years.

A corresponding increase appears in the number of gallons of spirits produced from grain during the year, 73,724,581 gallons, which is an excess of 1,489,406 gallons over the product (72,235,175 gallons) for the year ended June 30, 1883.

The yield of spirits from each bushel of grain varies but little from that of the preceding year, but still increases slightly, being 3.895 gallons. The yield for the two preceding years was 3.874 for 1883, and 3.792 for the year 1882.

The quantity of molasses used for the production of rum during the fiscal year is 2,259,536 gallons, a decrease of 113,570 gallons from the quantity used in the year previous (2,373,106 gallons), and a decrease of 255,452 gallons from the average quantity (2,514,988 gallons) used during the last five years.

The quantity of rum distilled from molasses is 1,711,158 gallons, a decrease of 90,802 gallons from the product of the year 1883, and a decrease of 204,674 gallons from the average product of the last five years

#### DECREASE OF SPIRITS IN WAREHOUSE.

From the following comparative statement of spirits of the different kinds known to the trade, remaining in warehouse at the close of the fiscal years 1883 and 1884, it will be seen that while there was an increase in the stock of alcohol, gin, high wines, and pure spirits held in bond June 30, 1884, over the quantity so held June 30, 1883, of 753,252 gallons, there was an actual decrease in other grades of spirits (principally in bourbon and rye whiskies) of 17,750,694 gallons, or a net decrease of 16,997,442 gallons. Of the spirits held in bond June 30, 1884, nearly two-thirds was bourbon whisky:

### REPORT ON THE FINANCES.

### INCREASED PRODUCTION OF SPIRITS.

The quantity of spirits (75,435,739 gallons) produced and deposited in distillery warehouses during the fiscal year ended June 30, 1884, is greater than the production (74,013,308 gallons) of the year 1883 by 1,422,431 gallons.

This increase is distributed among the different kinds known to the trade as follows:

Increase in production of-

### DISTILLED SPIRITS ALLOWED FOR LOSS BY LEAKAGE OR EVAPORA-TION IN WAREHOUSES.

The quantity of spirits, 3,858,494 gallons, reported in the preceding table as lost by leakage or evaporation in warehouse, is that portion of the actual leakage in warehouse from packages withdrawn during the year, which has been allowed in accordance with the provisions of section 17 of the act of May 28, 1880.

The following statement shows the quantity of spirits, as per *original* gauge, withdrawn from warehouse for all purposes during the stated period, and the amount and percentage of leakage allowed thereon under the provisions of the act named.

Year.	Total quan- tity with- drawn.	Leakage allowed.	Percentage of with- drawals.
1880 1881 1882 1883 1884	Gallons.           78, 199, 283           84, 335, 900           80, 281, 611           83, 291, 190           92, 022, 503	811, 466 1, 231, 336 2, 291, 013	. 096 962 1. 533 2. 750 4. 193

The maximum allowance fixed by the act above named, on account of leakage in warehouse during the full bonded period of three years, is seven and one-half gallons to each package of not less than forty wine gallons' capacity, or 18.75 per cent. of that capacity. On this basis the average bonded period for all classes of spirits withdrawn from warehouse during the year 1884 would represent about nine months, or one-fourth of the full bonded period authorized by law.

A large percentage of such withdrawals, however, are made up of high proof spirits, such as alcohol and high wines, which are held in bond only for a limited period of time, and on which, in many cases, no leakage whatever is claimed. On the other hand spirits, such as bourbon and rye whiskies, are in a majority of cases held in warehouse for the full bonded period, and the large increase in the amount of leakage allowed during the years 1883 and 1884 over previous years is due to the proportionally large increased withdrawals of this latter class of spirits.

### DISTILLED SPIRITS LOST BY CASUALTY DURING THE YEAR.

The quantity of spirits, 410,588 gallons, reported in the table on page 85 as lost by casualty in distillery warehouses during the year ended June 30, 1884, is 225,818 gallons more than the quantity so lost during the next preceding year, or one gallon out of every three hundred and seventy-nine gallons held on deposit in such warehouses during the year.

It also appears that the greater part, 330,673 gallons out of 410,588 gallons, was lost through one casualty by fire, which occurred at a warehouse in the twenty-second district of Pennsylvania.

×

### REPORT ON THE FINANCES.

### SPIRITS WITHDRAWN FROM WAREHOUSES FOR SCIENTIFIC PURPOSES AND FOR THE USE OF THE UNITED STATES.

The quantity of alcohol withdrawn free of tax from distillery warehouses for the use of colleges and other institutions of learning in the preservation of specimens of natural history in their several museums, and for use in their chemical laboratories, and of spirits of various kinds for the use of the United States, amounted during the year to 20,837 gallons, or 7,888 gallons less than the quantity withdrawn during the previous year.

### TRANSFERS OF SPIRITS FROM DISTILLERY WAREHOUSES TO MANUFAC-TURING WAREHOUSES.

The quantity of spirits transferred to manufacturing warehouses during the year was 214,050 gallons, or 10,112 gallons more than the quantity withdrawn for transfer to such warehouses during the fiscal year 1883. The increase occurred mainly as to pure spirits.

STATEMENT of the AGGREGATE QUANTITY, in TAXABLE GALLONS, of DIS-TILLED SPIRITS of the DIFFERENT KINDS KNOWN to the TRADE, PRO-DUCED, WITHDRAWN, and REMAINING in WAREHOUSE in the UNITED STATES, for the fiscal year ended June 30, 1884.

\* Estimated as to sixth district of Ohio.

### DISTILLED SPIRITS IN THE UNITED STATES OCTOBER 1, 1884.

The quantity of distilled spirits in the United States, except what may be in customs bonded warehouses, on the 1st day of October.

### 112

1884, was nearly 97,000,000 gallons, this quantity being distributed as follows:

In distillery and special bonded warehouses In hands of wholesale liquor dealers In hands of retail liquor dealers	15, 664, 206
Total	96, 810, 521

In making the above computation the average stock of each retail liquor dealer in the United States is estimated at 150 gallons.

### OPERATIONS AT SPECIAL BONDED WAREHOUSES FOR STORAGE OF GRAPE BRANDY.

The following statement shows the quantity of grape brandy placed in special bonded warehouses, withdrawn therefrom, and remaining therein at the beginning and close of the fiscal year ended June 30, 1884, in taxable gallons:

Of the 200,732 gallons grape brandy bonded during the last fiscal year 99,312 gallons were produced in the first district and 101,420 gallons were produced in the fourth district of California.

5022 F-----8

The total product was 23,245 gallons less than in the previous year, while the amount removed tax-paid was 46,307 gallons larger than in 1883. The loss resulting from regauge under the act of May 28, 1880, was 6,506 gallons more than in the previous year.

Of the quantity in warehouse June 30, 1884, 263,578 gallons were in the following warehouses in the first district of California:

Callone

	Ganons.
No. 1. Bode & Searle, at San Francisco	152,448

\*Chairs exported during the years 1864, 1865, 1866, and 1867 under the provisions of section 171, ast of June 30, 1864.

The tax on proprietary articles was repealed by the act of March 3, 1883, section 1, and, as provided by that act, no drawback of tax on such articles when exported after July 1, 1883, has been allowed. The amount above reported as allowed on such articles was on account of exportations made prior to July 1, 1883, and outstanding on that date. The amount due and yet outstanding on this class of goods is estimated at about \$8,000, which if added to the amount above reported will about equal the amount estimated in my report for 1883 as outstanding June 30, 1883, viz, \$25,000.

#### MISCELLANEOUS ASSESSMENTS.

The following table shows the assessments made by the Commissioner of Internal Revenue during the fiscal years ended June 30, 1883, and June 30, 1884, respectively, and the increase or decrease on each article or occupation:

### ASSESSMENTS FOR 1884.

The following statement shows the amount of assessments in each of the several States and Territories of the United States during the fiscal year ended June 30, 1884:

States and Territories.	Amount.	States and Territories.	Amount
Alabama Arkansas California and Nevada Colorado and Wyoming Connecticut Delaware Florida Georgia Illinois Indiana Iowa Kansas Kentucky Louisiana Maine	$\begin{array}{c} \$6, 644 \ 43\\ 5, 607 \ 16\\ 80, 642 \ 39\\ 3, 361 \ 15\\ 4, 134 \ 19\\ 376 \ 64\\ 569 \ 82\\ 21, 167 \ 51\\ 33, 154 \ 55\\ 145, 992 \ 09\\ 37, 717 \ 63\\ 1, 318 \ 21\\ 6, 651, 233 \ 54\\ 36, 655 \ 82\\ 3, 191 \ 89\end{array}$	Missouri Montana, Idaho, and Utah Nebraska and Dakota New Hampshire New Mexico and Arizona New York North Carolina Ohio Oregon and Washington Pennsylvania Rhode Island South Carolina Tennessee Texas	\$12, 915 22 1, 607 72 941 77 4, 956 64 2, 996 74 48, 027 00 50, 918 37 251, 797 11 2, 622 84 980, 243 55 679 11 2, 834 77 106, 040 4 5, 198 8
Maryland Massachusetts Micbigan Minnesota Mississippi	616, 307 84 40, 947 85 9, 990 92 3, 719 48	Vermont. Virginia West Virginia Wisconsin	
· · · · · · · · · · · · · · · · · · ·		Total	9, 436, 223 8

The large increase of the assessments made in the last fiscal year over the assessments made during the year ended June 30, 1883, consists in the tax on distilled spirits remaining in warehouse over three years.

This tax has been continued to be assessed, instead of being collected by the two other methods, viz, suit on warehousing bond or proceeding by distraint. Thus \$8,906,401.75 of this tax was assessed against \$1,522,883.12 in the previous year.

The increase in the assessment of special taxes or licenses is owing to the fact that no stamps were issued for taxes due but not paid within the year. Such taxes are now assessed.

The tax on capital and deposits of banks and bankers was repealed by the act of March 3, 1883. The small amount of \$550.61 assessed was for tax due before the passage of the act.

The tax on legacies and successions was repealed by the act of July 14, 1870, and it is believed that there is now but a small amount due the United States from this source.

The decrease of \$68,111.55 assessed on Form 58 is owing to the circumstance that only \$181,545.11, amounts collected in compromise cases, was assessed on this form, against \$211,524.68 in the previous year.

I have the honor to subscribe myself, very respectfully,

WALTER EVANS, Commissioner.

The Hon. SECRETARY OF THE TREASURY.

REPORT OF THE COMPTROLLER OF THE CURRENCY.

119

# REPORT

# THE COMPTROLLER OF THE CURRENCY.

#### TREASURY DEPARTMENT, OFFICE OF COMPTROLLER OF THE CURRENCY, Washington, December 1, 1884.

I have the honor to submit for the consideration of Congress, in compliance with section 333 of the Revised Statutes of the United States, the twenty-second annual report of the Comptroller of the Currency.

During the year ending November 1, 1884, 191 banks have been organized with an aggregate capital of \$16,042,230; circulating notes have been issued to these new associations amounting to \$3,866,230.

The following table gives the number of banks organized in each State and Territory during the year ending November 1, 1884, with their aggregate capital and circulation:

' States and Territories.	No. of banks.	Capital.	Bonds deposited.	Circulation issued.
Kansas	22	\$1, 254, 580	\$337, 500	\$303.640

Totals	191	16, 042, 230	4, 487, 100	3, 866, 230

These banks are located by geographical divisious as follows: Eastern States ten banks, with capital of \$\$10,000; Middle States twentyfive, with capital of \$1,812,250; Southern States thirty, with capital of \$2,991,100; Western States one hundred and two, with capital of

121

\$8,905,880; Pacific States five, with capital of \$380,000; Territories nineteen, with capital of \$1,143,000.

Since the establishment of the national banking system on February 25, 1863, there have been organized 3,261 national banks. Of these, 404\* have gone into voluntary liquidation for the purpose of winding up their affairs, 70 have gone into voluntary liquidation for the purpose of reorganization, 16 are in liquidation by expiration of their charter, of which number six have been reorganized, and 100 have been placed in the hands of receivers for the purpose of closing up their affairs, leaving the total number in existence on November 1, 1884, 2,671, which is the largest number that has been in operation at any one time.

The corporate existence of 90 national banks expired during the year ending November 1, 1884, of which 83 have been extended under the act of July 12, 1882, six have permitted their corporate existence to expire and are in liquidation under section 7 of said act (four of which have been succeeded by other banks located in the same places and with nearly the same shareholders), and one has been placed in voluntary liquidation by vote of shareholders owning two thirds of its stock. The corporate existence of 154 national banks, with an aggregate capital of \$56,161,370, will expire during November and December of this year, and the corporate existence of 720 national banks, with an aggregate capital of \$188,971,475 will expire during 1885.

Eleven national banks, with an aggregate capital of \$1,285,000, have failed and been-placed in the hands of receivers during the year.

#### COMPARATIVE STATEMENTS OF THE NATIONAL BANKS FOR ELEVEN YEARS.

\* Exclusive of the Metropolitan National Bank, of New York City, which was placed in voluntary liquidation November 18, 1884. The different items of resources and liabilities in the preceding table indicate that the business of the national banks during the past elevenyears has generally increased. The items of United States bonds and circulation thereon have decreased during the past two years. It also appears from the table that the aggregate liabilities of the national banks to depositors and correspondents were reduced during the year upwards of 94 millions. This reduction of liabilities and the general reduction of loans by the banks, which amounted to over 63 millions during the year, was doubtless occasioned by the financial troubles of May and the general depression of business. The table shows that during the same period the national banks increased their cash resources by about 21 millions of specie and 11 millions of legal-tenders and United States certificates of deposit for same.

The following table is an abstract of the resources and liabilities of the national banks at the close of business on the 30th day of September, 1884, the condition of the New York City, Boston, Philadelphia, Baltimore, and other reserve city banks being tabulated separately from the other banks of the country:

#### NUMBER, CAPITAL, AND DEPOSITS OF NATIONAL BANKS, STATE AND SAVINGS BANKS, AND PRIVATE BANKERS.

Section 333 of the Revised Statutes of the United States requires the Comptroller to present annually to Congress a statement of the condition of the banks and savings banks organized under State laws. Returns of capital and deposits have hitherto been made by these institutions and by private bankers semi annually to this Department for purposes of taxation. From these returns the following table has been compiled, exhibiting in concise form, by geographical divisions, the total average capital and deposits of all the State and savings banks and private bankers of the country for the six months ending November 30, 1882, being the last semi-annual period for which State and savings banks and private bankers were required to make returns for taxation purposes :

Geographical divis-	State banks and trust companies.			Private bankers.			Savings banks with capital.			Savings banks with- out capital.

The capital of the 2,308 national banks in operation on December 30, 1882, being the date of their report nearest to that of the table given

124

#### COMPTROLLER OF THE CURRENCY.

above, as will be seen by a table in the Appendix, was \$484,883,492, not including surplus, which fund at that date amounted to more than 135 millions of dollars, while the average capital of all the State banks, private bankers, and savings banks for the six months ending November 30, 1882, was but \$232,435,330. The latter amount is less than twofifths of the combined capital and surplus of the national banks at practically the same time.

The table below exhibits the capital and net deposits of the national banks on December 30, 1882, together with the aggregate average capital and deposits of all classes of banks other than national for the six months ending November 30, 1882:

Geographical divis- ions.	bar	State banks, savings banks, private bank- ers, &c.			National ba	inks.	Total.			
	No.	Capital.	Deposits.	No.	Capital.	Deposits.	No.	Capital.	Deposits.

The total number of banks and bankers in the country at the date named was 7,448, with a total banking capital of \$717,318,822, and total deposits of \$2,902,522,245.

In the Appendix will be found similar tables for various periods from 1875 to 1882. On a subsequent page in this report, under the head of "State banks, savings banks, and trust companies," will be found tables showing the resources and liabilities of these corporations for the present year, and in the Appendix similar results for previous years.

A table arranged by States and principal cities, giving the number, capital, and deposits, and the tax thereon, of all banking institutions other than national, and of the private bankers of the country, for the six months ending November 30, 1882, and for previous years, will also be found in the Appendix.

The following table exhibits, for corresponding dates nearest to May 31, in each of the last seven years, and to November 30, 1882, the aggregate amounts of the capital and deposits of each of the classes of banks given in the foregoing table :

¥ears.	National banks.			State banks, private bankers, &c.						Savings bankswith- out capital.			Total	•

\* In the last table of the series the returns are given for the six months ending May 31, 1882, and also for the six months ending November 30, of the same year.

It will be noticed that the first two tables of this chapter are for the six months ending November 30, while all similar tables in previous reports have been for the six months ending May 31. The law repealing the tax on capital and deposits of State banks and private bankers went into effect on November 30, 1882, in accordance with the opinion of the Attorney General, and for this reason the Comptroller has given the returns to that date, which will be the last data to be obtained from this source. It is probable that the number, capital, and deposits of the State banks, savings banks, and private bankers have been materially decreased by the recent financial troubles.

#### EXTENSION OF THE CORPORATE EXISTENCE OF NATIONAL BANKS.

On November 1, 1884, 398 banks had extended their corporate existtence under the act of July 12, 1882. In the Appendix will be found a table showing the distribution and capital of these banks by States. During the year ending November 1, 1884, the periods of succession of 90 banks, as fixed by the dates of their organization certificates and the terms of their articles of association, terminated. Of these, 83 have extended their corporate existence under the act mentioned. One was placed in voluntary liquidation prior to expiration by the vote of stockholders owning two-thirds of its stock. Of the 6 remaining banks expiring during the year, 2 were not extended, but were permitted by their stockholders to close at the end of their periods of succession, and to liquidate under section 7 of the act of July 12, 1882, while 4 were succeeded by other associations, with different names, with the same shareholders wholly or in part.

The total number of banks still in operation organized under the act of June 3, 1864, and the provisions of the Revised Statutes, the periods of succession of which will terminate, unless hereafter renewed, during the years previous to 1900, is 1,488, with capital and circulation as follows:

	۰.	Years.		No. of banks.	Capital.	Circulation.
1884* .				154	\$56, 161, 370	\$32, 596, 596

#### COMPTROLLER OF THE CURRENCY.

The number, capital, and circulation of the national banks whose periods of succession will terminate during each month of the year 1885 are as follows:

Month.	Num- ber of banks.	Capital stock.	United States bonds.	Circulation.
January	109	\$27, 534, 500	\$18, 927, 450	\$17, 019, 75
February	68 125	11, 586, 000 32, 325, 750	8, 885, 500 20; 636, 700	7, 995, 74( 18, 538, 06(
April	86	25, 241, 970	16, 456, 350	14, 780, 165
May	121 139	28, 362, 340 49, 894, 915	21,550,850 24,757,100	19, 288, 92; 22, 021, 360
July	24	4, 915, 000	2, 375, 400	2, 047, 800
August	14   13	1,901,000 1,835,000	1,250,000 1,175,500	1, 129, 500 1, 053, 250
October	7	1, 175, 000	835, 000	739, 200
November	6 8	1,200,000 3,000,000	1, 180, 000 2, 025, 000	1, 062, 000 1, 808, 360
Totals	720	188, 971, 475	120, 060, 850	107, 484, 11

In the Appendix will be found a table giving the names of each of the banks whose periods of succession terminate during the year 1885, with their capital and outstanding circulation. This table shows that seven hundred and twenty national banks, with a combined capital of \$188,971,475, will thus terminate during the year 1885, unless their stockholders avail themselves of the provisions of the act of July 12, From the experience of the last two years it is highly probable 1882.the larger portion of these banks will extend their corporate existence. These associations represent more than one third of the entire capital of the national banking system, and attention is respectfully called to the large additional amount of labor the extension of these banks will throw upon the office of the Comptroller of the Currency. This labor will be augmented by the provisions of section 6 of the act referred to. requiring that the circulating notes of any association extending its period of succession which shall have been issued to it prior to its extension shall be redeemed at the Treasury of the United States as provided in section 3, act of June 20, 1874, and that such notes when redeemed shall be forwarded to the Comptroller of the Currency and destroyed as now provided by law, and that at the end of three years from the date of the extension of each bank, the association so extended shall deposit lawful money with the Treasurer of the United States sufficient to redeem the remainder of the circulation which was outstanding at the date of its extension.

The same section also provides that the notes issued to such extending associations after the date of their extension, shall be of a different design, easily distinguished from those issued before such date.

To carry out these provisions of section 6 requires the keeping of two different accounts in the case of each extended bank—one for the old and one for the new circulation. During the year 1885 the work of keeping the circulation accounts of about one half of the national banks will be doubled.

#### CIRCULATION.

Under the present provisions of law, national banks may be organized with a capital of from \$50,000 to \$150,000, upon depositing with the Treasurer of the United States, in trust, 25 per cent. of their capital stock in United States bonds, and banks with a capital of upwards of \$150,000 can be organized upon the deposit of \$50,000 of bonds. Upon this basis the 2,664 national banks in existence in the United States and Territories on October 1, 1884, would require a minimum of but \$80,443,127 of United States bonds in order to continue as national banking asso-There is no doubt but that the national banking system has ciations. been of great value to this country in many ways other than the supplying a sound and almost perfect paper currency. The additional safety afforded to depositors by the restrictions and precautionary provisions of the act, the publicity of reports of the condition of the banks, and the regular examination and supervision by officers of the Government, is well understood by the public, and it is probable that the people would demand that if possible the system be continued, even if the public debt be hereafter reduced to a point where it is impossible for the banks to issue more than the amount of circulation that can be secured by the minimum of bonds now required by law. Although it is possible that the public confidence in national banks will enable associations organized under the act to do a much larger and more profitable business than if organized under the laws of the various States, it is probable that were there no profits on circulation, Cankers as a rule might be unwilling to submit to the restrictions which, as safeguards to the public, the national banking law compels those who organize associations under it to submit to, and that therefore when the profit on circulation is reduced to a point where it does not compensate for the inconvenience of the restrictions, many national banks will leave the system.

Various plans have been advanced to perpetuate the issue by national banks of a circulation which should be safe for the public and reasonably profitable to themselves, both during the period of the reduction of the bonded debt of the United States and after such debt shall have been paid, it having been suggested that under the latter circumstances circulation might be issued upon securities other than United States bonds.

The time of the final payment of the debt is, however, yet distant, and with appropriate legislation there will probably be for many years no lack of bonds as a safe basis of circulation. Moreover, no feasible plan with other security has as 'yet been suggested, affording a sound currency redeemable on demand in specie, and the Comptroller believes that it is extremely doubtful whether after their experience for the last twenty years with the safe and convenient currency issued by the national banks, the people would be satisfied with a currency based on any security other than United States bonds.

Public sentiment seems to be in favor of the payment of the public debt as rapidly as possible, and while no doubt this is in general a correct principle, yet as it is apparent that such payment must extend under the most favorable circumstances over a long future period, the interest during which time is as much a portion of the debt as the principal, it is a question if it would not be of ultimate benefit to the country and a payment of the debt to reduce the interest upon it to a minimum rate and defer the payment of the principal, thus giving for many years a safe basis for national bank circulation. This course would be particularly advantageous if the revenues of the Government are hereafter reduced to a point which, after providing sufficient means for carrying on public business, will necessitate a more gradual reduction of the principal of the debt. Not only is the future of national bank circulation menaced by the fact that as the debt is paid it will be difficult to substitute any other secure basis for circulation, but it is also

#### COMPTROLLER OF THE CURRENCY.

evident that under present laws and the present condition of the public debt the banks cannot long afford to maintain even the circulation now outstanding. The following table gives the various kinds and amounts of bonds held by the banks on November 1, 1883, and November 1, 1884:

	1883.	1884.
Three and a halfs. Threes Four and a halfs. Pacific sixes. Fours	201, 327, 750 41, 319, 700 3, 463, 000	49, 537, 450
	352, 907, 300	325, 316, 300

Upon reference to this table it will be seen that the aggregate reduction of bonds deposited as security for circulation for the year ending November 1, 1884, was \$27,591,000, and the changes were as follows: A reduction of \$45,723,350 in amount of three per cent. bonds held; a reduction of \$632,000, being all the three and one-half per cents held; an increase of \$10,540,600 in four per cents; an increase of \$8,217,750 in four and one-half per cents, and an increase of \$6,000 in Pacific sixes. The total reduction of bonds deposited to secure circulation would have been much greater, but the financial troubles of May reduced the market price of the four and four and one-half per cents, and banks were enabled for a time to replace their called three per cents by fours and four and one-halfs at a price which afforded an increased profit on circulation, and new banks took advantage of this state of affairs and also purchased fours and four and one-halfs for deposit to secure their circulation. It will be seen upon reference to the table that the banks held on November 1, 1884, \$155,604,400 of the three per cent. bonds under the act of July 12, 1882, payable at the pleasure of the Government.\* The total amount of these bonds outstanding on November 1 was \$194,190,500, and it is probable that unless the surplus revenues are greatly reduced these bonds will all be paid within the next two years, and, as has been pointed out by my predecessor in former reports, there is great danger of a severe and rapid contraction of the circulation; for while many banks will no doubt continue to replace a portion of their called threes with other higher-rate and higher-priced bonds, the tendency is and will be to reduce the circulation to the minimum required The following table shows the decrease of national bank cirby law. culation during the years ending November 1, 1883, and November 1, 1884:

National-bank notes outstanding November 1, 1882, in- cluding notes of national gold banks Less lawful money on deposit at same date, including	\$362, 727, 747	•

It is probable that the reduction of circulation will also be increased by the withdrawal and sale of four per cent. bonds now deposited by the banks in excess of the minimum required by law, as the reduction of the debt by the payment of threes will no doubt increase the price of fours, owing to reinvestments of trust funds, &c., now invested in threes, and if for any reason the price advances, the banks will desire to realize the premium for use in business or to divide as a profit among their shareholders.

Drawing conclusions from these facts, the Comptroller estimates that unless legislation shall shortly be had which will enable the banks to issue currency at a fair profit, circulation will from the present time be reduced at the rate of at least \$40,000,000 per annum.

In the last reports of the Comptroller various suggestions were made as to legislation which should be enacted to prevent this rapid contraction of national bank circulation, and the subject attracted much attention during the last session of Congress. The most prominent measures were those introduced in the Senate by Senators McPherson and Aldrich, and in the House of Representatives by Mr. Potter.

The bill introduced by Senator McPherson provided that any national banking association shall be entitled to receive from the Comptroller of the Currency circulating notes not exceeding in amount the par value of the bonds deposited, and further provides that the total amounts of such notes issued to any association shall not exceed the amount of its paid in capital stock. This bill passed the Senate and was favorably reported to the House by the Banking and Currency Committee, and is now upon the regular calendar of the House. In case it should become a law, it would increase the aggregate circulation of national banks upon the basis of the present deposit of United States bouds with the Treasurer in trust to the amount of about \$32,000,000, and would increase the profit to the banks on circulation from two-fifths to threefifths of 1 per cent. per annum. No doubt the increased profits which by this bill would inure to the banks would induce those holding fours to continue to hold them, and the profits would probably be sufficient to induce banks who hold threes to replace them when called for redemption with four per cents. The passage of this bill seems a simple and feasible measure of relief to the banks, and while it is possible that some bill which provided for the funding of the high-rate bonds into bonds bearing a lower rate of interest would afford more permanent relief, the bill of Senator McPherson is regarded as an excellent measure by the Comptroller, and would not interfere with any funding bill which might hereafter become a law.

The bill introduced by Senator Aldrich provides for the exchange of four per cent. consols of 1907 for three per cent. bonds having the same time to run. Under its provisions the Government pays a difference of 15 per cent. between the four per cents and the threes. The bill also provides for the issuance of circulation equal in amount to the par value of the bonds deposited. The additional profits accruing under this bill, if it should become a law, would be from about one half of 1 per cent. to about 1 per cent. per annum, according to the bank rates for loans on the three per cent. bonds which replace the fours, and it is believed that this would be a permanent measure of relief to the banks. The bill introduced by Mr. Potter in the House provides for the refunding of the three, four, and four and one-half per cent. bonds into two and one-half per cents payable at same time and to be redeemed in the same manner as those for which they are exchanged. The bill also provides for a reduction of the tax upon circulation based upon the proposed two and one-half per cent. bonds of oue-half of 1 per cent. per annum, while the tax upon circulation based upon all other classes of United States bonds remains at 1 per cent. per annum. Under this bill the provisions for obtaining currency on the bonds deposited would be the same as under the present law, viz, 90 per cent. of the par value of the bonds deposited. The bill, so far as the funding of the high rate bonds is concerned, is similar to the Aldrich bill, the latter providing for the refunding of the fours only. It is believed by many that the provisions in the Potter bill relating to the purchase of the bonds by the Secretary of the Treasury would be somewhat difficult to carry out, and it is a question whether it would be constitutional for Congress to make any discriminations in the tax imposed on circulation based on different classes of United States bonds, as it must be remembered that the tax is on the circulation and not on the bonds. If this bill, with some modifications, should become a law, no doubt the additional profits which would accrue to the banks under its operation would be a permanent benefit and assist in preventing the contraction of the currency.

A table has been prepared, and will be found in the Appendix, which shows the additional circulation which the banks in each State would be entitled to in case a law is enacted permitting them to issue circulation to the amount of the par value of the bonds deposited in trust with the Treasurer of the United States.

The measures which were introduced at the last session of Congress involving a funding of the public debt provided that the bonds issued in exchange for those now outstanding shall have the same time of maturity as those for which they are exchanged. No provision is made by these bills to enable the Government to use any surplus revenue which it may desire to devote to the payment of the public debt during the long periods between the maturities of the present four and one-half and four per cent. bonds.

The following table shows the bonded debt of the United States on November 1, 1884:

Three per cents, payable option United States Four and a half per cents, payable September 1, 1891		\$194, 190, 500 250, 000, 000

NOTB.—The Navy pension fund, amounting to \$14,000,000 in three per cents, the interest upon which is applied to the payment of naval pensions exclusively, and \$264,800 of four per cent. refunding certificates, are not included in the table.

It will be seen upon an examination of this table that there are \$194,190,500 of three per cent. bonds now payable at the pleasure of the Government. These bonds will probably be paid within the next two years, even if considerable changes are made in the tariff; and from 1887 to 1891, when the \$250,000,000 of four and one half per cents shown by the table mature, there will be no bonds which the Government can call in for redemption. No doubt the accumulation of surplus revenue. if it continues to accrue at the present rate during the four years between 1887 and 1891, together with the revenues of 1892, will be more than sufficient to pay off the four and one-half per cents; and from 1892 until 1907 it will be impossible for the Government to use any of its surplus revenues for the payment of its bonds except at the option of their holders. It is apparent that the Government cannot accumulate and hold its surplus revenues, even during the short period from 1887 to 1892, without great disturbances to the business interests of the country, and much less can it do so during the longer period from 1892 to 1907.

It appears, therefore, that the foregoing considerations should be given due weight in any plan for the funding of the four per cent. bonds maturing in 1907, and the Comptroller therefore suggests that the principal difficulties of the situation may, perhaps, be obviated, as well as the reduction of interest effected, by funding these bonds into others which shall mature in proportionate amounts at certain fixed intervals. Thus the \$738,000,000 of four per cents might be funded into an equal amount of three or two and one-half per cent. bonds, one fifth of which, or \$147,600,000, to mature at intervals of five years, the first installment falling due July 1, 1897, and the remaining installments of \$147,600,000 each on the first of July in the last year of each succeeding period of five years, viz., 1902, 1907, 1912, and 1917. The average maturity of these five classes of bonds would be the same as that of the present four per cents, viz, July 1, 1907.\*

\*While considering the question of refunding the high-rate bonds forming the principal part of the public debt into bonds bearing a lower rate of interest, and paying a premium to the holders of the former to compensate them for any disadvantage in the exchange, it is interesting to note that the English Government, by an act passed at the last session of Parliament, provided for the conversion of a large portion of its national debt bearing interest at 3 per cent. into two classes of stock, bearing interest, one at  $2\frac{3}{4}$  and the other at  $2\frac{1}{2}$  per cent., on the basis of a difference of 2 per cent. between the threes and the  $2\frac{4}{4}$  per cent. stock, and of 8 per cent. between the threes and the  $2\frac{1}{4}$  per cent. stock, this difference or bonus to accrue to the holders of the threes.

As the English Government does not appear to have a surplus revenue available to pay the difference in cash, it is added to the face of the lower rate stocks given in exchange. The act which authorizes this exchange is not compulsory, and if the conversion takes place, it will be through the voluntary action of the holders of the higher-rate stock. The Chanceller of the Exchequer, however, claims that under an old law or regulation he has compulsory power and can call some six hundred and twelve millions sterling of 3 per cent. stocks upon giving a year's notice. Although this view is disputed, it has had the effect to depreciate the 3 per cent. stock, and will no doubt have an effect in inducing holders of threes to convert on the terms offered into the new stocks.

The editor of the London Bankers' Magazine, in commenting upon the action of the Government, remarks that "the mass of threes (which it is claimed can be called) is so large, that it may very probably prove a difficult matter to deal with the whole if paid off compulsorily." Another comment is that, "that the debt of the British Government been divided into separate funds of moderate amount, the operation (of funding) would have been comparatively an easy one. As matters stand, there will probably be great difficulty in carrying the operation through."

From the foregoing it appears quite evident that the successful funding of the debt of the United States from time to time into bonds bearing lower rates of interest has attracted the favorable attention of the English Government. It is particularly to be noted that the proposed 22 and 22 per cent, stocks are to mature in 1905, that is, they are to become payable at the option of the Government at a fixed date twenty years

The surplus revenue could, by this plan, be used after July 1, 1897, and July 1, 1902, as well as after July 1, 1907, in paying the public debt; and it is believed that any disadvantage there might be to the Government in postponing the payment of one fifth of the debt now in fours due in 1907 until after 1912, and another fifth until after 1917, would be more than offset by the benefit derived from the opportunity of paying one fifth after 1897, and another fifth after 1902. The reduction of 1 per cent. per annum in the interest, if threes be issued, would be a direct benefit to the Government in the same manner as provided in the Aldrich bill; but while under that bill the amount of premium paid by the Government to induce the acceptance of a three per cent. bond payable in 1907 for a four per cent. bond maturing at the same date will be at a fixed rate for the total amount exchanged, it is believed that in the case of this proposition the rather larger premium that might have to be paid in exchanging threes due in 1897 and 1902 for fours of 1907 would be more than compensated by the smaller premiums paid in exchanging the threes of 1912 and 1917 for the same fours. In other words, the aggregate amount paid in premiums in exchanging bonds under the plan now suggested would probably be not more and possibly less than 15 per cent.

It is important to the success of this plan that in carrying it into practice each holder of four per cent. bonds who accepts the proposed threes in exchange should take one fifth of the amount of his fours in each class of threes. Thus the holder of a \$500 four per cent. bond of 1907 would receive five three per cent. bonds of \$100 each, one maturing on July 1, 1897, and the remaining four on July 1, 1902, 1907, 1912, and 1917, respectively.\*

Whatever course may be deemed expedient by Congress in regard to the funding or future payment of the public debt, the Comptroller is of the opinion that it is perfectly safe and will afford great benefit to the public to permit an issue by the national banks of circulation to the extent of 100 per cent. of the par value of the bonds deposited instead of 90 per cent., as under the present law, and that the present limit of issue to 90 per cent. of the paid-in capital stock should also be extended to 100 per cent. of such paid-in capital. Two of the bills

after the date of their issue, and cannot be called before that date. This is a new departure in the management of the public debt of Great Britain. The attitude of the Chancellor of the Exchequer seems to indicate that he has particularly in view the funding of our 5s and 6s into  $3\frac{1}{2}$  per cents in 1881. His proposed method of carrying out the act of Parliament referred to is very similar in principle to that adopted by Secretary Windom in 1881.

by Secretary Windom in 1881. On October 17, 1884, being the expiration of the period under which proposals were received by the Chancellor for the conversion of the 3 per cents., the total amount of stock of private holders that had been converted was but £9,686,000, or less than 1<sup>4</sup>/<sub>2</sub> per cent. of the entire 3 per cent. stock held by the public. It would appear, therefore, that the conversion of 3 per cent. English consols into stock of a lower rate of interest is not popular, although the lower-rate stocks have a mininum of twenty years to run, and notwithstanding the premium offered by the Government.

\* A computation based upon the realized rate to the Government or any investor in four per cent. bonds having twenty-two years to run from July 1, 1835, at a market rate of 120 indicates that the average difference in present value between three per cent. bonds maturing at the dates mentioned and a four per cent. bond maturing in 1907 is about sixteen per cent. It is believed that the desirability of the long-time bonds for banking and trust purposes would induce the bankers and the public to make the exchange for a less difference than sixteen per cent., which is simply the mathematical difference. The history of securities put out by Governments whose credit is unquestioned shows that the long-time securities are invariably considered the most valuable, and that the premium paid for such securities is more in proportion than would naturally be indicated by a computation based upon any present realized rate of interest.

The following table has been prepared by E. B. Elliott, esq., Government actuary, in order to show the difference in value between three and four per cent. bonds maalready referred to as introduced at the last session of Congress contained these provisions. Even admitting that the bonds representing the public debt when funded at lower rates might at times in the future be below par in the market, the Government would, if forced to redeem the notes of insolvent national banks, always have the right to cancel the bonds on deposit securing the same, and thus extinguish an amount of its debt equal dollar for dollar to the notes redeemed. It would also gain from such notes as are never presented for redemption, which form a certain percentage in the case of the circulation of each and every bank, and taking all banks together would form a large reserve fund. Tables in relation to this gain may be found in the Appendix.

It is further submitted that the profit on circulation may be increased to a point which will induce the banks to keep up their circulation to a maximum, and stop the contraction of their circulation which is now occurring, by repealing the law taxing such circulation at the rate of one-half of 1 per cent. semi-annually. This tax is regarded by many as only a fair bonus to the Government for the privilege of issuing circulation which the banks receive from it, and in times when the Government needed the money and when the profit on circulation was comparatively great this view had much in its favor. But under existing circumstances<sup>\*</sup> the Government should in justice either enact laws

turing at the periods mentioned, computing on a basis of the realized rate to the Government at 1.20 for four per. cent. bonds having twenty-two years to run:

n in the second se		Year.			Fours.	Threes.	Differ- ence.
1897		·····		)		( 1.0222	. 1778
<b>19</b> 02 <b>19</b> 07		· · · · · · · · · · · · · · · · · · ·	<i>.</i>	···· [	1.20	1.0295 1.0359	. 170 164
1912 1917	•••••			[]		1.0474	. 1580 . 1538

\* The following table shows the annual per centage of profits on circulation, at rates of interest for bank loans from 5 to 8 per cent., based on 4 per cent. bonds of 1907, having twenty two and a half years to run, the average market price for the year being 1.215529, and based on 4½ per cent. bonds having seven years to run, the average market price for the year being 1.127131. There are three rates of profit shown on each class of bonds, each derived by a different method of computation. The method by which the first figures in each case are obtained assumes that the premium paid would be made up by a sinking fund at compound interest, and also that the 5 per cent. redemption fund which banks are required to keep is no charge on circulation account.

The second figures are obtained assuming a sinking fund similar to that in the first method, but that the 5 per cent. fund is a charge on circulation account, and reduces the loanable circulation.

The third figures are obtained by a method which assumes that the premium is reduced by charging off an equal proportion each year, according to the time the bonds have to run, and that the 5 per cent. fund is no charge on circulation. The figures generally show that under average conditions a national bank issuing circulation, based on either 4 or  $4\frac{1}{2}$  per cent. bonds, at ordinary rates of interest for bank loans, receives an average profit of not more than one-balf of 1 per cent.

Classes of bonds.		Profit with loans at 5 per cent.	Profit with loans at 6 per cent.	Profit with loans at 7 per cent.	
Fours of 1907	$ \begin{bmatrix} 1 \\ 2 \\ 3 \\ 3 \\ 1 \\ 2 \\ 3 \end{bmatrix} $	. 00781 . 00596 . 00439 . 00803 . 00604 . 00548	. 00590 . 00368 . 00180 . 00650 . 00410 . 00350	. 00380 . 00121 . 00000 . 00480 . 00215 . 00145	. 00162 . 00009 . 00000 . 00337 . 00018 . 00000

which will make the issue of circulation a real privilege, or it should remove the tax, which under present laws is fast becoming prohibitory. As it now stands, the Government is exacting a bonus for a privilege which no longer exists, and the inevitable consequence of the continued collection of the tax without measures of relief in other directions wilk be the gradual retirement of this form of circulating medium.

The expenses of keeping up the national banking system by the Government are at present paid in part from the proceeds of this tax and in part by assessment on the banks. If the tax be abolished, all of these expenses should be paid by the last-named method. Under the head of "Taxation," on page 65, will be found a detailed statement of the amount received from the tax on circulation and of the very small proportion used in payment of expenses of the Government in keeping up the system.

In concluding this subject the Comptroller wishes to have it distinctly understood that he is not in favor of any measure which will cause inflation. He is of the opinion that the present aggregate paper circulation, made up of legal-tender and national bank-notes and of gold and silver certificates, is ample for all the needs of business. He believes, however, that the sudden contraction of national bank circulation, which without appropriate legislation is imminent, will seriously embarrass the business of the country, and that if this contraction is permitted to go on, it may result in the entire discontinuance of the issue of notes by national banks. The Comptroller believes that this form of currency, which can be increased or diminished in accordance with the natural laws which control business, should be continued in preference to any other now permitted by law. If at any time the aggregate of outstanding paper becomes too great, reduction should be made by retiring the direct issues of the Government, in view of the fact that the most eminent authorities in finance agree that such direct issues are in the long run highly detrimental and fraught with danger. A bank circulation as well secured and convenient as that of the banks in the national system, with a credit so deservedly well established in the minds of the people, should not be permitted to go out of existence.

#### CIRCULATIÓN BASED ON SILVER.

Notwithstanding the fact that the national banking circulation of the country has been reduced about 24 millions during the past year, on account of the redemption and payment of the 3 per cent. United States bonds, held as security for the same, and is likely to continue to be reduced as the debt is paid, the circulating medium of the country has been increased by the issuance of silver certificates under the •act of February 28, 1878, these certificates being issued upon standard silver dollars, of which at least 2 millions are coined every month of the year.

The perplexities of bimetallism and the silver question have attracted attention and interested the public for many years. Statistics have been worn threadbare, and the number of articles and essays that have been written on this subject are of almost interminable extent. The law making it mandatory on the Secretary of the Treasury to coin each month 2 millions of what are called standard silver dollars, or, in other words, the stamping of 2 million pieces of silver of  $412\frac{1}{2}$ grains in weight each as a dollar, no doubt was intended to appreciate the price of silver and to bring this precious metal into more general use as money. As the production of silver in the United States is so large, the Government should do all in its power to sustain the value of silver and promote its circulation as money by appropriate legislation, but it is submitted that the operation of the present law defeats the object in view.

The exact relative position of silver to gold in the commercial world is extremely difficult to determine. No one can gainsay the fact that in our commercial relations with England and other countries we must settle our exchanges upon a gold basis. This being true, necessarily, we can use silver in settlement of international balances only at its market price. This market price tests the proportionate value of silver as compared with gold. The present market price of silver throughout the world shows that the intrinsic value of a dollar weighing 4123 grains is about 85.20 cents. The law, therefore, which compels the coinage of 2 millions of standard silver dollars per month is an arbitrary attempt to make the price of silver more dear by fixing a ratio between gold and silver for the people of this country different from the ratio fixed by the market price, making the standard silver dollar practically a depreciated currency as compared with the gold coin of the country, and with the legal-tender and national-bank notes, which are redeemable in gold at par. It has been and still is contended by many that if the United States as a nation takes strong ground in favor of bimetallism and insists upon the recognition of silver as money, valued in proportion to gold at the ratio of  $15\frac{1}{2}$  to 1, that its comparative market value can be increased.

The practical working of the silver bill seems to prove the folly of this position. For some reason or other the intrinsic value of silver has decreased in a greater proportion than that of gold. This reason is exceedingly difficult to determine. In fact it is next to impossible to obtain the data and draw the deductions to ascertain the reason why the changes in the ratio or proportion of the value of gold to that of silver have invariably throughout the world been against silver. Some statisticians assert that the annual increase of gold throughout the world is at least 13 per cent. of the world's total stock of gold money, while as to silver it is claimed the increase is only about 1 per cent. of the total stock of silver money.\* If this calculation is correct, some other reasons than those based on the proportionate production of gold and silver must be brought forward to prove that the increased production of silver over gold has depreciated the value of the former, for there is no question but that the purchasing power of silver, in proportion to the purchasing power of gold, has steadily decreased for more than a thousand years. Perhaps one reason for this depreciation in value is the inconvenience of silver as a circulating medium as compared with gold. It is proportionately to value about fifteen and a half times as heavy and nearly twenty eight and a half times as bulky.

Whether its weight and bulk be the cause or not, the fact is undoubted that in this age of the civilized world the people have a strong distaste to the use of silver as a circulating medium in the form of coins weighing four hundred grains or more.

The law which stamps 412<sup>1</sup>/<sub>2</sub> grains of silver and arbitrarily insists upon its circulation as a dollar, with unlimited legal-tender qualities, when its true value as indicated by the market price of silver is but 85.2 cents, is unworthy of this nation, and will sooner or later bring upon us financial trouble and disgrace. The practical working of the silver coinage act has established the fact that the public do not readily accept, circulate, and do business with these standard silver dollars. In order to insist upon the arbitrary value which has been fixed upon silver by law, Congress has ingeniously arranged to permit the people to deposit their inconvenient silver coins in the Treasury of the United States and obtain therefor certificates which represent a certain number of these dollars. These certificates, being a convenient circulating medium, were first used for shipments from commercial centers to the South and West for the purpose of supplying currency for moving the crops. As legal-tender and national-bank notes are frequently in limited supply during the fall months, the convenience of obtaining these certificates and thereby saving express charges on gold which would otherwise have to be shipped has caused the circulation of many millions among the people of the country.\* The public, who daily receive and disburse these certificates, hardly realize that the intrinsic value of the silver which is represented by a \$10 silver certificate is but \$8.52; neither do they realize that the certificate is not a promise to pay on the part of the United States, but simply a promise to return to the bearer ten 412<sup>1</sup>-grain silver dollars.

If it is for the best interests of the United States to issue a circulation based upon silver, the Comptroller believes that the circulation should be issued upon coin or bullion which contains a sufficient number of grains of silver to have an intrinsic value equal in the markets of the world to its nominal value.

Some writers have suggested that a circulating medium might be based upon bullion, both gold and silver, and the Comptroller is of the opinion that under certain restrictions and regulations it would be far more correct in principle to issue silver certificates based upon a deposit of silver bullion, to be valued in the exact proportion of silver to gold, than to continue the issue of certificates under the present law. If this were done, silver bars might be stamped at their market value and held in the Treasury for the redemption of the certificates, which should call an amount of silver equal in value to their nominal or face value expressed in gold. The bullion represented by certificates should be periodically valued at its market price in gold, and a certain proportionate amount of silver so held might, perhaps, be coined to provide the means for redemption of the certificates, if redemption was desired for business purposes. These dollars should be in the nature of a subsidiary coin and should be reconvertible into bullion certificates.

The actual circulation of the silver dollar under the present law indicates that the necessary number of coins required probably would not exceed \$50,000,000. This plan might possibly bring about a loss to the Government by the depreciation of silver, which loss, however, would be partially borne by the certificates which were lost and destroyed, as it is well known that from the loss and destruction of legal tenders and national bank notes the Government is even now a large gainer. The Comptroller believes that the use of silver as money in this manner, and its periodical valuation, would have more influence in appreciating the market value of silver among the nations of the world than the present arbitrary coinage of  $412\frac{1}{2}$  grains of silver as a dollar.\*

\*From information derived from the Treasurer of the United States, it is found that silver certificat-s issued at the subtreasuries in the west and south, on deposits of gold coin with the Assistant Treasurer of the United States at New York from September 18, 1880, to October 31, 1884, amounted to \$69,625,500

\* Considering the strong ground taken against bimetallism by the British Government, apparently for the reason that it is difficult to ascertain the intrinsic value of silver as compared with gold, it is interesting to note that the Chancellor of the Exchequer, Mr. Childers, in his budget speech of the 24th of April, proposed, in order These reflections are upon the theory held by many, that it is for the best interests of this country to maintain a circulation based upon silver. The Comptroller doubts the correctness of this theory; but it is submitted that the circulation now outstanding based on silver is a depreciated currency, by the issue of which the Government has gained at the expense of the people who now hold the silver dollars and certificates, and that therefore it is incumbent on the Government, if it continues to issue circulation based upon silver, to do so under a plan which will not only provide a sound circulation for the future, but also prevent the holders of the present certificates and dollars from sustaining loss. This might all be accomplished by exchanging the bullion certificates suggested for the silver-dollar certificates now outstanding.

The issue of currency based upon silver should not, however, be unlimited, and the present laws making the purchase and coinage of a fixed amount of silver bullion mandatory are very pernicious in their effect, as the unlimited and continued issuance of *full legal tender* silver coin and certificates based thereon, of intrinsic value less than their face, has already caused the hoarding of gold, and will eventually drive it from the channels of trade, thereby causing a practical suspension of gold payments. There are many indications of this, notably the uneasiness in financial circles in June and July last, caused by the reserve of gold in the Treasury falling so near to the point at which under the law the issuance of gold certificates ceases. It is also to be observed that during the present year the national banks throughout the country have increased their holdings of gold, including certificates, in the sum of \$19,615,350.

The amount of silver bullion purchased by the Government under the act of February 28, 1878, for coinage into standard silver dollars was, from the 1st of July, 1878, to the 1st of July, 1884, 144,366,242,43 standard ounces, costing \$146,631,495.26. The number of silver dollars coined under the provisions of the act of February 28, 1878, up to November 1, 1884, amount to 184,730,829. The profits to the Government on the coinage of silver from July 1, 1878, to June 30, 1884, amount to \$20,972,913,52.\* Of the silver dollars coined \$142,926,725 remain in the Treasury of the United States, leaving in circulation \$41,804,104.

Silver certificates have been issued, which are represented by the standard silver dollars in the Treasury of the United States, to the amount of \$131,556,531. Of the silver certificates so issued \$30,814,970 remain in the Treasury of the United States, leaving \$100,471,561 of these certificates in circulation. It will be seen, therefore, that of the total amount of silver dollars coined but \$41,804,104 are in actual circulation, and that the people of the United States now hold a paper circulation based upon silver dollars in an amount equal to more than one-third of the national-bank circulation.

to restore the gold coinage of England to its nominal value, to issue a depreciated half sovereign. In other words Mr. Childers's plan is that the Government shall issue to the people a half sovereign containing only nine-tenths of the amount of gold at present contained in that coin, rather than have the Government bear the loss of the recoinage of the outstanding sovereigns and half sovereigns which are known to be light. This new half-sovereign is to be *legal tender to the amount of £5 only*, but it seems a noticeable fact that the Chancellor of the Exchequer should submit in his annual budget a proposition to debase one of the gold coins of the United Kingdom, a country which has heretofore been so particular as to its money standards. Although it is not proposed to change the intrinsic value of the sovereign, this alteration of the value of the half-sovereign would no doubt have the effect of discrediting the gold coinage of England, which has for many years been recognized throughout the world as an almost infallible standard of value.

\*These figures have been obtained from the honorable Director of the Mint.

#### DISTRIBUTION OF COIN AND PAPER CURRENCY.

In previous reports tables have been given showing the amount of coin and currency in the country and its distribution in the Treasury, in the banks, and among the people, on January 1, 1879, the date of the resumption of specie payments, and on November 1 of each of the last four years preceding the date of the report. These tables are again presented, the amounts on November 1, 1880, being omitted, while those on November 1, 1884, are added.

The amounts of gold and silver in the country available for circulation are based upon the estimates of the Director of the Mint for January 1, 1879. The amounts of gold for the succeeding dates have been, obtained by adding the gold production of the country, less the amounts used in the arts, from estimates of the same officer, adding the excess of gold importations during the year, or deducting the excess of gold exportations for the same period, according to the reports of the Bureau of Statistics. The amounts of silver are obtained by adding for each year the amount of silver dollars and fractional coinage, less amounts recoined. For the year 1884 the silver bullion purchased by the Government for coinage and on hand on 'November 1 is included.

From November 1, 1883, to November 1, 1884, the production of gold by the mines of the United States is estimated to have been about \$29,000,000. During the period from November 1, 1883, to October 1, 1884, the amount of gold, foreign and domestic gold coin and bullion exported in excess of the amount imported has been \$20,483,382, making an increase in the stock of gold in the country of \$8,516,618. From this amount must be deducted the amount used in the arts during the same period (\$4,875,000), leaving \$3,641,618 as the increase in the stock of gold coin and bullion in the country.

The total excess of imports of gold over exports of the same from the date of resumption to October 1, 1884, has been \$165,712,128, and the total estimated gold product of the mines of the United States for the same period has been about \$191,725,000. The total amount of silver coined during the year has been, after deducting the recoinage, \$28,387,010, of which \$28,009,880 were standard silver dollars. The total amount of the latter coined since the passage of the act of February 28, 1878, authorizing that coinage, up to November 1, 1884, has been \$184,730,829.

The following table, based upon the estimates and figures given above, shows the amount of coin and currency in the country on January 1, 1879, and on November 1 of the years named:

\*The sum of \$41,710,163 in lawful money has been deposited by the national banks to retire circulation of a like amount which has not yet been presented for redemption.

There has been no change in the aggregate of legal-tender notes outstanding, which still remains as fixed by the act of May 31, 1878. National bank notes have decreased \$18,453,974 during the year; the . 4

amounts of gold and silver have increased \$3,641,618, and \$33,033,507, respectively, making the total increase during the year in gold, silver, and currency, \$18,221,151.

The table below gives the portion of the gold, silver, and currency held by the United States Treasury and by the national and State banks. The amounts in the United States Treasury are for the corresponding dates with those in the preceding table. The amounts in the national banks are for the corresponding dates nearest thereto on which returns were made to the Comptioller, viz: January 1, 1879; October 1, 1881; October 3, 1882; October 2, 1883; and September 30, 1884. The amounts in the State banks, trust companies, and savings banks have been compiled in this office from official reports for the nearest obtainable dates.

The gold in the Treasury, including bullion in the process of coinage, has decreased during the year \$22,682,970, and in the banks has increased \$27,288,807. The paper currency in the Treasury has decreased \$4,737,390, and in the banks has increased \$16,671,605. The decrease of gold outside of the Treasury and the banks has been \$964,219, and of silver coin \$5,954,136, and the decrease of paper currency exclusive of silver certificates, \$30,388,289. In the foregoing tables the silver certificates issued by the Treasury have not been included, but the standard silver dollars held for their redemption on presentation form a portion of the silver coin in the Treasury. The silver certificates in the hands of the people and the banks at the following dates were as follows:

January 1, 1879	\$413, 360
November 1, 1880	
November 1, 1881	
November 1, 1882	
November 1, 1883	
November 1, 1884	100,741,502

It will be seen that the amount of these certificates in circulation has increased \$15,407,180 during the year 1884.

The gold certificates issued under section 12 of the act of July 12, 1882, outstanding in the hands of the people and banks on November 1, 1882, November 1, 1883, and November 1, 1884, not including the amount in the Treasury, were \$6,962,280, \$48,869,940, and \$85,301,190, respectively.

As before stated, the total amount of standard silver dollars coined up to November 1, 1884, was \$184,730,829, of which, as shown in one of the foregoing tables, \$142,926,726 was then in the Treasury, although an amount equal to \$100,741,561 was represented by certificates in the hands of the people and the banks, leaving \$42,185,165 then held by the Treasury. Of the \$184,730,829 coined, \$41,804,103 was therefore evidently outside of the Treasury, and \$100,741,561 of the amount in the Treasury was represented by certificates in circulation. The remainder of the silver, \$91,004,610, consisted of subsidiary coin, trade dollars, and bullion purchased for coinage, of which \$33,993,284 was in the Treasury, and about \$57,011,326 was in use with the people and the banks, consisting principally of subsidiary coin, in the place of the paper fractional currency for which it was substituted.

The increase of gold and silver coin and paper currency, exclusive of silver certificates, outside of the Treasury and the banks, since the date of resumption, is thus estimated to have been \$263,956,936, and the decrease during the year ending November 1, 1883, \$6,306,372. To these sums the amounts of silver certificates in the hands of the people may be added. On November 1, 1883, the amount of these certificates held by the people and the banks was, as has been seen, \$100,741,561; but the proportion of this amount in the hands of the people cannot be exactly determined.

SPECIE IN BANK AND IN THE TREASURY OF THE UNITED STATES, AND ESTIMATED AMOUNT IN THE COUNTRY-SPECIE IN THE BANK OF ENGLAND AND IN THE BANK OF FRANCE.

The following table exhibits the amounts of specie held by the national banks at the dates of their reports for the last eleven years, the coin and coin certificates held by the New York City banks being stated separately:

The national banks held silver coin amounting on October 1, 1877, to \$3,700,703, and on October 1, 1878, to \$5,392,628. On October 2, 1879, the amount held was \$4,986,493, on October 1, 1880 it was \$6,495,477, including \$1,165,120 in silver Treasury certificates; on October 1, 1881, it was \$7,112,567.18, including \$1,662,180 of silver certificates; on October 3, 1882, it was \$8,273,815, including \$1,807,600 of silver certificates; on October 2, 1883, it was \$10,247,926, including \$2,653,030 of silver certificates; and on September 30, 1884, it was \$11,424,067, including \$3,331,510 of silver certificates. The latest official reports of the State banks in New England, New York, Pennsylvania, Maryland, Georgia, Texas, Obio, Indiana, Michigan, Wisconsin, Missouri, and the Territory of Montana show that these banks held specie amounting to \$14,834,133, of which the banks in New York City held \$10,506,059.

The official returns from the State banks of California do not give separately the amount of coin held by them, but it is estimated that the total cash reported, amounting to \$10,542,432, consisted almost entirely of coin. The amount of coin held by State banks in the States before mentioned, including California, was, therefore, \$25,376,565.

The Director of the Mint, in his report for 1882, estimated the amount of coin in the country on June 30, 1882, at \$700,455,545, of which \$500,862,185 was gold and \$199,573,360 was silver.

His estimate for the fiscal year ending June 30, 1884, is as follows:

United States coin.	Gold.	Silver	Totals.
Circulation July 1, 1883 Year's coinage	\$537, 254, 794 27, 932, 824	\$228, 216, 199 28, 773, 388	\$765, 470, 995 56, 706, 212
Totals	565, 187, 618	256, 989, 587	822, 177, 205
Less net exports Deposits for recoinage Used in the arts Trade dollars withdrawn from circulation	263, 117 4, 875, 000	4, 199 152, 031 216, 000 6, 000, 000	8, 421, 258 415, 148 5, 091, 000 6, 000, 000
Total loss Circulation July 1, 1884 Not gain during the year.	551, 632, 442	6, 372, 230 250, 617, 357 22, 401, 158	19, 927, 406 802, 249, 799 36, 778, 806

From July 1, 1884, to October 1, 1884, there has been added to the coin \$5,955,999 of gold and \$6,582,350 of silver, making the stock of coin in the country at the latter date \$\$14,788,148, of which \$557,588,441 was gold and \$257,199,707 was silver.

The amount of bullion in the mint and in the New York assay office on October 1, 1884, is stated to have been \$52,950,000 of gold and \$4,935,000 of silver, making in all \$57,885,000, which, added to the amount of coin stated above, gives \$872,673,148, of which amount \$610,538,441 was gold and \$262,134,707 was silver.

The following table shows the amount of gold and silver, including the amount held to protect gold and silver certificates, and the percentage of each, in the Treasury of the United States, on September 30 of each year from 1876 to 1884, and on November 1, 1884:

#### AMOUNT OF INTEREST BEARING FUNDED DEBT IN THE UNITED STATES AND THE AMOUNT HELD BY NATIONAL BANKS.

The public debt reached its maximum on August 31, 1865, at which time it amounted to \$2,845,907,626. More than 1,275 millions of this debt were in temporary obligations of the Government, of which 830 millions bore interest at 7.30 per cent. per annum. The average rate of interest on 1,725 millions of the debt at that date was 6.62 per cent. This large amount of temporary obligations was funded within the three years which followed the close of the war, chiefly into 6 per cent. bonds. The 6 per cent. bonds were gradually reduced during the year 1869 and the seven years following by payment and refunding into 5 per cents. The 6 per cents, together with the 5 per cents, were subsequently rapidly replaced by 41 and 4 per cent. bonds, which were authorized to be issued by the act of July 14, 1870. In the year 1881 all of the un-

144

redeemed 5 and 6 per cent. bonds, amounting to \$579,560,050, were continued payable at the pleasure of the Government, with interest at  $3\frac{1}{2}$ per cent., by agreement with the holders. The act of July 12, 1882, authorized the refunding of the three and one-halfs into three per cents, and since its passage all of these bonds have been converted into three per cents. The Secretary, during the year ending November 1, called for payment nearly \$111,338,500 of the threes.

The report for 1879 and subsequent reports contain tables exhibiting the classification of the unmatured interest-bearing bonded debt of the United States, and of the bonds held by the national banks for a series of years.

These tables are again presented, and exhibit the amount of the outstanding bonds of the Government and the amount held by the banks on July 1 of each year and November 1 of the present year.

The following table exhibits the classification of the unmatured interest bearing bonded debt of the United States at the dates named :

Date.	Six per cent.	Five per cent	T		
÷.	bonds.	bonds.	Four and a half per cent. bonds.		Total.
Aug. 31, 1865   July 1, 1867   July 1, 1867   July 1, 1870   July 1, 1870   July 1, 1871   July 1, 1870   July 1, 1871   July 1, 1871   July 1, 1871   July 1, 1872   July 1, 1873   July 1, 1875   July 1, 1876   July 1, 1877   July 1, 1877   July 1, 1878   July 1, 1878   July 1, 1878   July 1, 1880   July 1, 1881   July 1, 1881	\$908, 518, 091 1, 008, 388, 469 1, 421, 110, 719 1, 431, 110, 719 1, 841, 521, 800 1, 764, 932, 300 1, 764, 932, 300 1, 374, 883, 800 1, 281, 238, 630 1, 213, 624, 700 1, 100, 865, 550 984, 999, 650 738, 619, 000 310, 932, 506 235, 780, 400 196, 378, 600 (Continued at		\$140,000,000 240,000,000 250,000,000 250,000,000 250,000,000		\$1, 108, 310, 191 1, 206, 916, 904 1, 619, 644, 154 2, 063, 110, 200 2, 107, 930, 600 1, 986, 521, 600 1, 888, 133, 756 1, 780, 451, 100 1, 695, 805, 956 1, 724, 252, 756

The Navy pension fund, amounting to \$14,000,000 in 3 per cents, the interest upon which is applied to the payment of naval pensions exclusively, and \$264,800 of refunding certificates, are not included in the table.

The operations of the Treasury Department for a series of years have largely reduced the amount of interest receivable by the national banks on the bonds held by them.

Seventeen years ago the banks had on deposit as security for circulation 327 millions in United States bonds, of which amount 241 millions bore interest at 6 per cent., and 86 millions at 5 per cent., and on July 1, 1882, they held 227 millions of 3½ per cent. bonds. These bonds have now entirely disappeared from the list of securities held by the national banks. The average rate of interest now paid by the United States on the bonds deposited as security for circulating notes is about 3.6 per cent. upon their par value.

The banks now hold 49 millions of four and one-halfs, 116 millions of fours, and 155 millions of three per cents, which have been refunded from three and one half per cents. This will be seen from the following table, which exhibits the amount and classes of United States bonds

5022 F-10

owned by the banks, including those pledged as security for circulation and for public deposits, on the 1st day of July in each year since 1865, and upon November 1 of the present year:

The banks also held \$3,469,000 of Pacific Railway six per cents. They also had \$9,586,200 of three per cents, which were called and matured on and prior to November 1.

About one-half of the bonds now held by the national banks are three per cents.

If the public debt continues to be paid as rapidly as it has been during the past year, all of these bonds will probably be called within the next two years. Those of the lower numbers, which it is safe to estimate will be among the last called, cannot be purchased for a premium of much less than 2 per cent., and at that price there will be very little, if any, profit on circulation based on this class of bonds if they are redeemed within the next two years.

The profits on circulation, based on other bonds held by national banks, are merely nominal, after paying the annual tax of 1 per cent. on circulation.

#### SECURITY FOR CIRCULATING NOTES.

During previous years there have been many changes in the classes of United States bonds held by the national banks as security for their circulation, owing to the payment or refunding or extension of the different issues of 5 and 6 per cent. bonds, bearing interest at  $4\frac{1}{2}$ , 4,  $3\frac{1}{2}$ , and 3 per cent.

The amount of United States bonds held by the Treasurer as security

#### COMPTROLLER OF THE CURRENCY.

for the circulating notes of the national banks on the 1st day of November, 1884, is exhibited in the following table:

5	Class of bonds.	Authorizing act.	Rate of interest.	Amount.
runded	10an of 1907	July 14, 1870, and January 20, 1871 dodo July 12, 1882 July 1, 1862, and July 2, 1864	4	\$49, 537, 450 116, 705, 450 155, 604, 400 3, 469, 000
To	tal			325, 316, 300

During the year 1871, and previous thereto, a large portion of the bonds bore interest at the rate of 6 per cent., and until the year 1877 all of the bonds bore interest at either 5 or 6 per cent.

The 5 and 6 per cent. bonds in the year 1881 entirely disappeared from the list of these securities, with the exception of  $3\frac{1}{2}$  millions of Pacific sixes, and at the present time more than 47.8 per cent. of the amount pledged for circulation consists of bonds bearing interest at 3 per cent. only, and the remainder, with the exception of 33,469,000 of Pacifics, bear interest at the rate of 4 and  $4\frac{1}{2}$  per cent.

#### AMOUNT OF UNITED STATES BONDS HELD BY THE NATIONAL BANKS AND BY BANKS ORGANIZED UNDER STATE LAWS.

Through the courtesy of State officers the Comptroller has obtained official reports made to them under State laws by State banks in twentytwo States, by trust companies in five States, and by savings banks in fourteen States, at different dates during the years 1883 and 1884, and from these returns the following table has been compiled :

Held by 817 State banks in twenty-two States Held by 35 trust companies in five States Held by 636 savings banks in fourteen States	23, 371, 084

The interest bearing funded debt of the United States was, on November 1, 1884, \$1,206,475,600. The total amount of bonds held by the national (\$342,156,300) and State and savings banks and trust companies (\$221,934,991) is nearly one half of the interest-bearing debt.

The amount of United States bonds held by State banks is given by geographical divisions for the years 1881, 1882, 1883, and 1884, as follows :

Geographical divisions.	1881.	1882.	1883.	1884.
Eastern States	\$40, 468, 340	\$42, 667, 248	\$37, 399, 819	\$30, 806, 938
	176, 373, 889	197, 135, 239	182, 847, 588	188, 640, 523
	1, 073, 460	268, 350	646, 500	96, 750
	5, 735, 518	3, 369, 414	3, 105, 024	2, 390, 780
	14, 874, 332	20, 020, 175	17, 743, 978	(*)
	238, 525, 539	263, 460, 426	241, 742, 909	221, 934, 991

\*The United States bonds held in the Pacific States are not included in the above table, as the re turns for 1884 did not separate United States bonds from other bonds held. It is estimated that the aggregate amount held is \$18,000,000, the estimate being based upon the proportion of United States. bonds to the total amount of bonds held in these States in 1883. In previous reports the Comptroller has given the amount of United States bonds held by banks organized under State laws, and by private bankers, as returned to the Commissioner of Internal Revenue for purposes of taxation. The tax on deposits and capital having been repealed, no further returns of this kind will be available. The last returns to the Commissioner was for the six months ending November 30, 1882, and from these returns the following table has been compiled for the purpose of comparison with previous tables presented since the year -1880:

	Amount invested in United States bonds.

The data which have heretofore been obtained from the Commissioner of Internal Revenue included the returns from private bankers, and were, therefore, more complete than those obtained from the reports of State officers, but the amounts held by State and savings banks have not greatly differed.

#### THE FINANCIAL CRISIS OF MAY.

Owing to the large number of mercantile failures which had occurred during 1883, considerable financial uneasiness was felt at the beginning of 1884, and the year opened inauspiciously, by the appointment on January 1 of a receiver for the New York and New England Railroad. Following closely upon this failure were the troubles of the Oregon and Transcontinental Company, and the appointment on January 12 of a receiver for the North River Construction Company. The months of February, March, and April were characterized by many commercial failures, rumors affecting the credit of various corporations, and a still further depreciation in price of stocks and bonds, and in fact of all products and commodities.

This feeling of uneasiness and of uncertainty as to values culminated on May 6 with the failure of the Marine National Bank of New York whose president was a member of the firm of Grant & Ward. The failure of this firm immediately followed, and owing to the prominence of some of its members and its large liabilities, exceeding \$17,000,000, its failure caused great excitement, that had not subsided when on May 13 the president of the Second National Bank of New York was discovered to be a defaulter to the extent of \$3,185,000. Although this defalcation was immediately made good by the directors of the bank and did not result in its suspension or failure, such a shock was given to credit, and to the confidence of the public in all institutions and firms supposed to have loaned money upon such railroad and other securities as had greatly decreased in value or whose managers were supposed to be directly or indirectly interested in speculation in Wall street, was so shaken, that there was great pressure to sell stocks and securities and an active demand on the banks for deposits.

This condition of affairs culminated on May 14 in the suspension of the Metropolitan National Bank, the failures of Donnell, Lawson & Simpson, Hatch & Foote, and several other bankers and brokers. These failures were followed on May 15 by that of the Newark Savings Bank, and by the suspension of Fiske & Hatch and others. Failures and suspensions continued through the months of May and June, including those of the Wall Street Bank, the Philadelphia and Reading Railroad, the West Shore Railroad, of C. K. Garrison, M. Morgan's Sons, and of other bankers and brokers.

The suspension of the Metropolitan National Bank on May 14 caused great excitement. All stocks and securities called upon the New York Stock Exchange were greatly depreciated under the pressure to sell, and it was practically impossible for the banks to collect their call loans, as their borrowers could not obtain money by sale of their securities except at ruinous rates; neither could they borrow elsewhere; and it was impracticable and impolitic to throw the mass of securities held as collateral to the call loans of the associated banks upon the market. If it had been done it is probable that a suspension of gold and currency payments by the banks throughout the country would have followed the general panic that would have ensued. In this emergency the members of the New York Clearing House Association, realizing that an immediate demand for deposits would be made by their country correspondents, called a meeting at the clearing house on the afternoon of May 14, and the following plan for settling balances at the clearing house was unanimously adopted :

Resolved, That, in view of the present crisis, the banks in this association, for the purpose of sustaining each other and the business community, resolve:

That a committee of five be appointed by the chair, to receive from banks members of the association bills receivable and other securities to be approved by said committee, who shall be authorized to issue therefor to such depositing banks certificates of deposit bearing interest at six per cent. per annum not in excess of 75 per cent. of the securities or bills receivable so deposited, except in case of United States bonds, and said certificates shall be received in settlement of balances at the clearing house.

After consultation with the officers and directors of the Metropolitan National Bank, a committee of examination was appointed to visit the bank and to ascertain if some plan could not be arranged to permit it to open again for business. The greater part of the securities of the

bank were found to be of such a character that loan certificates could safely be issued upon them, and in this way the Metropolitan National was enabled to resume business on May 15 and settle its balances at the clearing house. The prompt action of the members of the associated banks and the resumption of the Metropolitan National Bank greatly assisted in allaying excitement and staying the panic, and although confidence was not immediately restored, and although the banks in the city of New York were largely drawn upon by their country correspondents reducing their reserve for a time below the 25 per cent. limit prescribed by law, and although on account of the great depreciation of values and the stringency of the money market occasioned by the want of confidence other failures of State banks, private bankers, and mercantile firms occurred in New York and throughout the country, there was no suspension of gold and currency payments at any point, and the issue of loan certificates was confined to the banks of New York City, which were soon enabled to collect their loans and make good their reserves.

The crisis of May, 1884, seems to have been even more unexpected to the country than that of September, 1873. Although many conservative people had predicted that the large increase in railroad and other securities, and the general inflation which had been going on for a number of years would bring financial troubles and disasters to the country, it was nevertheless generally believed that the depreciation of values and the liquidation which had already been going on for many months, and the further facts that the country was doing business upon a gold basis, that the prices of all commodities were already very low, that an increased area of territory was under cultivation, and that the prospects were excellent for good crops, together with the larger distribution of wealth throughout the Union, would prevent a repetition of the panic of 1873. This general belief was measurably correct, as the panic or crisis was confined principally to New York City, although its effects were more or less felt in all parts of the country, and the liquidation resulting therefrom has not yet been fully completed.

The most profound students of political economy have for many years endeavored to explain the causes which have led to financial troubles similar to those of 1857, 1873, and 1884, and it is not to be expected that the Comptroller can obtain sufficient data to enter into a complete and satisfactory explanation of the causes of the financial disturbances of the present year. The causes that lead to financial crises in a country so rich in agriculture, of which the manufacturing and mining interests are so varied and important, the imports and exports so great, of so extensive an area of territory, and in which wealth is becoming so equally distributed, and the population of which is increasing so rapidly, are difficult to explain, and the issue of currency and creation of debt requires elaborate study to ascertain the reasons for the rise and fall in value of commodities and realty which cause a panic. It is scarcely possible at this time to explain why it should be necessary for the country to go through the liquidation and financial trouble which is now being experienced.

It is apparent, however, that a repetition of some of the same circumstances which brought about the monetary crisis of 1873 has been largely influential in causing the present crisis. Property of all kinds had been capitalized, as it is called; bonds and stocks had been issued for the purpose of building railroads, carrying on manufacturing and other business; municipal and other bonds had been issued for public improvements. These bonds and stocks were put upon the market, and

#### COMPTROLLER OF THE CURRENCY.

commercial credit was extended until a point was reached where capitalists of this and other countries questioned the intrinsic value of these securities and the earning power of the property on which they were based, and also doubted the solvency of many firms in commercial business. This lack of confidence induced them to decline to make farther advances or investments. A decrease in the earnings of railroads, manufacturing, and other enterprises followed, and the entire business of the country has consequently been restricted and deadened.

There is little doubt that one of the causes which led to the local disturbances among the banks, national and State, and private bankers of the city of New York, was their intimate relation in many instances to the New York Stock Exchange, and the fact that a large portion of the loans made by the banks and bankers of New York were based upon the security of stocks and bonds, often speculative in their character, which are dealt in and regularly called at the Stock Board.

It is no doubt correct in principle to advance money in aid of enterprises which are legitimate in their aims, and from which reasonable returns may be expected, and in order that the general business and commerce or the carrying trade of the country may be benefited. Due care should, however, be taken that loans so made should not exceed the amount which it would be safe to advance upon the intrinsic value of the property represented by the securities, and not upon a fictitious or unreal valuation. Lines should be closely drawn between legitimate business and speculation. The principles which underlie judicious and sound banking are the growth of an experience of many years. Banks not only loan their own capital but that of their depositors and creditors, and are therefore, to a certain extent, trustees, and should not encourage speculation or lend money for the furtherance of doubtful enterprises, even though the profits promise to be exorbitant. The proper relation of the New York Stock Exchange to the business of the United States is yet to be determined. The value of an exchange for the convenient sale and handling of stocks and securities is unquestioned; but when the members of this exchange, who have associated themselves together for the purpose of furthering the business and commerce of the country, use the machinery of this exchange to create speculative values and to increase or decrease prices of stocks and bonds for purposes of speculation solely, or, more properly, to encourage a form of gambling, it is a matter for serious consideration whether legislation by the State of New York or by the Congress of the United States should not be had to regulate a business which appears at times to be carried on to the great detriment of the true business interests of the country.

Just what restrictions should be placed upon the business of the New York Stock Exchange, or what legislation should be had, is difficult to determine. Just how far the Federal or State law can interfere with the business of private citizens is a delicate and difficult matter to settle.

In considering the financial troubles of May, 1884, in the city of New York, the Comptroller desires to call attention to the fact that while many banks and private banking firms of excellent repute failed, but one association organized under the national bank act failed, and but one suspended.

The liabilities of State banks and private bankers failing during the month of May in the city of New York it is estimated exceeded in the aggregate 32 million dollars, while the liabilities of the only national bank in the same category was about 44 millions, no loss to the public occurring through the national bank which suspended.

Upon learning of the defalcation at the Second National Bank on May 14, and when it was apparent that a financial crisis was imminent in the city of New York, the Comptroller ordered expert and reliable examiners to the assistance of the national-bank examiner stationed at New York in order to protect the public. The examiners were instructed to exercise the utmost caution and vigilance, and to visit any of the national banks that appeared to be in trouble, or where violations of law or irregularities were suspected. They were especially instructed to report any criminal irregularities or violations of section 5209. Before permitting the Second National Bank, whose president had misappropriated over 3 millions of its funds, to open for business, the defalcation was made good under the supervision of the examiner. The plan of resumption for the Metropolitan National Bank, by obtaining loan certificates of the New York Clearing-House Association upon its securities, was also submitted by the examiner in charge of the bank to the Comptroller, the examiner remaining in charge until the plan was carried into effect and the bank permitted to resume.

During the crisis in New York, bank examiners throughout the country were directed to exercise the utmost vigilance in the districts to which they were assigned, to visit any of the national banks which appeared to be in trouble or which were suspected of irregularities. They were further instructed to report promptly by telegraph any matters of importance which might occur in their respective districts.

The Comptroller desires to call attention to the fact that only eleven national banks failed in the United States during the year ending November 1, 1884, although more than one hundred banks and bankers other than national failed during the same period. The records of this office show that many of the transactions of the national banks which failed, including the Marine and Metropolitan National Banks of New York City, were looked upon with disfavor, and that these associations as a rule had been frequently reprimanded for irregularities during the past few years. None of the disclosures made by the examiner's reports, however, gave the Department an adequate idea of the dangerous character of the business which was being carried on by the Marine National Bank of New York, and this is not singular, as the directors of the bank, as will hereafter be seen, were equally deceived in regard to the situation.

Further information relating to this and other matters pertaining to the banks that have failed during 1884 will be found under the head of national bank failures in this report.

## CLEARING-HOUSE LOAN CERTIFICATES.

As has been stated, a meeting of the members of the New York Clearing-House Association was held on May 14, 1884, to consider what measures could be adopted to protect the reserves of the associated banks and to prevent suspension of gold and currency payments in New York.

Resolutions were there adopted, which are given elsewhere, authorizing the issuance by the loan committee of the Clearing-House Association of what were termed clearing-house loan certificates, of which the following is a copy:

No. --.]

Loan committee of the New York Clearing-House Association.

New York, May 15, 1884.

[\$10,000.

This certifies that the —— National Bank has deposited with the committee securities in accordance with the proceedings of a meeting of the association held May

# 152

14, 1884, upon which this certificate is issued. This certificate will be received in payment of balances at the clearing-house for the sum of ten thousand dollars from any member of the Clearing-House Association. On the surrender of the certificate by the depositing bank above named, the committee will indorse the amount as a payment on the obligation of said bank, held by them, and surrender a proportionate share of collateral securities held therefor.

These certificates were to be issued to banks who were members of the association upon their securities or bills receivable, at the rate of 75 cents on the dollar. By the cooperation of all the members of the Clearing-House Association, the certificates were accepted in payment of balances at the clearing house. Similar resolutions were adopted and certificates issued during the panic of 1873, but this measure of relief was not taken until after the panic had assumed such proportions that their use and the consequent relief to the banks in settling their balances at the clearing-house could not restore confidence. There is little doubt but that the prompt action of the associated banks in May last in issuing these loan certificates had a most excellent effect not only in the city of New York but throughout the country. The greatest amount of these certificates outstanding on any one day was on May 24, 1884, when they amounted to \$21,885,000. After that date they were issued in limited amounts only, and on June 7 their further issue was discontinued.

Of the eighty-two banks, members of the Clearing-House Association, only twenty took out these certificates, and several of the banks so taking them out, did so simply as a precautionary measure and did not use them. The total amount issued was \$24,915,000, and about \$7,000,000 of these were issued to the Metropolitan National Bank. On and after June 10 balances at the clearing-house were paid in lawful money. The principal security on which these certificates were issued consisted of mercantile paper.

On July 1 all of the loan certificates, with the exception of a portion of those which had been issued by the loan committee to the Metropolitan National Bank, had been returned to the committee and canceled and the securities taken up. This bank had been compelled, owing to its suspension and the lack of confidence which was caused thereby, to liquidate almost its entire deposit account, having reduced its deposits from \$11,294,000, on May 15 to \$1,338,000 on September Ôwing to this enormous liquidation of deposits, the Metropolitan 30. National Bank was unable to collect its loans and realize upon its securities with sufficient promptness to cancel its loan certificates by July 1, and as these certificates bear interest at six per cent. and are secured by a deposit of ample collaterals, as heretofore stated, the associated banks were willing to carry them as loans, and on October 3, 1884, were still carrying \$5,290,000 of the certificates issued to the Metropolitan National Bank. Since that time this bank has gone into voluntary liquidation, and these certificates will be paid and canceled as rapidly as the collection of the securities upon which they are based can be made.
#### REPORT ON THE FINANCES.

The following table shows the aggregate issuance and cancellation of clearing-house certificates from day to day from May 15, 1884, to October 3, 1884 :

Daté.	Issued.	Canceled.	Outstanding.
May 15	\$3, 820, 000		\$3, 820, 000
May 16	6, 885, 000		10, 705, 000
May 17			17, 445, 000
May 19	1, 190, 000		18, 435, 000
May 20	1, 950, 000		20, 385, 000
May 21	580,000	800, 000	20, 165, 000
May 22	1, 560, 000		21, 725, 000
May 23	140,000		21, 865, 000
May 24	180,000	160,000	21, 885, 000
May 26 May 27		415,000	21, 470, 000
May 27	640,000	460,000	21, 650, 000
May 28		450,000	21, 200, 000
May 29	700,000	400,000	21, 500, 000
June 2	335,000	1, 100, 000	20, 735, 000
•June 3		90,000	20, 715, 000
June 4	40,000	1, 030, 000	19, 725, 000
June 5		120,000	19, 605, 000
June 6	85,000		18, 640, 000
June 6 to July 1		9,070,000	9, 570, 000
July 1 to August 1		2, 850, 000	
August 1 to September 1		1, 220, 000	5, 500, 000
September 1 to October 3		210, 000	5, 290, 000
•	24, 915, 000		

As has been stated, loan certificates were issued during the panic of 1873. On September 20 of that year resolutions \* were adopted for the issuance of these certificates, as follows:

That in order to enable the banks of this association to afford such additional assistance to the business community, and also for the purpose of facilitating the settlement of the exchanges between the banks, it is proposed :

That any bank in the Clearing House Association may, at its option, deposit with a committee of five persons, to be appointed for that purpose, an amount of its bills receivable and other securities, to be approved by said committee, who shall be authorized to issue therefor to said depositing banks certificates of deposit, bearing interest at seven per cent. per annum, in denominations of five and ten thousand dollars, to an amount not in excess of seventy-five per cent. of the securities or bills receivable so deposited; except that when the securities deposited shall consist either of United States stocks or gold certificates, the certificates of deposit may be issued upon the par value of such certificates.

These certificates may be used in settlement of balances at the clearing-house for a period not to extend beyond the first of November proximo, and they shall be received by creditor banks during that period daily in the same proportion as they bear to the aggregate amount of debtor balances paid to the clearing-house. The interest which may accrue upon these certificates shall, on the first of November next, or sooner, should the certificates be all redeemed, be apportioned among the banks which shall have held them during that time.

The securities deposited with the committee above-named shall be held by them as a special deposit pledged for the redemption of the certificates issued thereon.

The total amount of loan certificates issued under this resolution was \$26,565,000, and the following table shows the issue and cancellation of same:

Issued.		Canceled.		
	September 22 to 29, 1873 October 1 to 29, 1873 November 1 to 20, 1873	\$22, 080, 000 3, 205, 000 1, 280, 000 \$26, 565, 000	October 3 to 31, 1873 November 3 to 29, 1873 December 1 to 31, 1873 January 5 to 14, 1874	\$5, 370, 000 8, 235, 000 12, 020, 000 940, 000 26, 565, 000

\* These resolutions were first<sup>e</sup> printed in the Comptroller's report<sup>\*</sup> for the year 1873.

#### 154

Upon comparison it will be seen that the issue of loan certificates<sup>\*</sup> during September, October, and November, 1873, exceeded the issue of May and June 1884 by only \$1,650,000.

#### NATIONAL-BANK FAILURES.

Eleven banks have been placed in the hands of receivers during the year ending November 1, 1884, viz :

Name of bank.	Capital.	Receiver ap- pointed. j
The First National Bank of Leadville, Colo The City National Bank of Lawrenceburgh, Ind The First National Bank of Saint Albans, Vt. The First National Bank of Saint Albans, Vt. The Marine National Bank of New York, N. Y. The Hot Springs National Bank of Hot Springs, Ark The Richmond National Bank of Hot Springs, Ark The Richmond National Bank of Livingston, Mont. The First National Bank of Albion, N. Y The First National Bank of Albion, N. Y The First National Bank of Jamestown, Dak The Logan National Bank of West Liberty, Ohio	\$60,000 100,000 75,000 400,000 50,000 250,000 50,000 100,000 50,000 50,000	Jan. 24, 1884 Mar. 11, 1884 Apr. 22, 1884 Apr. 22, 1884 June 2, 1884 July 23, 1884 Aug. 25, 1884 Aug. 26, 1884 Oct. 18, 1884

One of these, the City National Bank of Lawrenceburgh, Ind., had previously been placed in voluntary liquidation by the vote of shareholders, owning two thirds of its stock, but failed to pay its depositors on demand.

In the case of the following six banks a final dividend to depositors has been paid during the year, and the affairs of all of them except those of the National Bank of the State of Missouri, have been finally closed. These banks, with the total dividend paid by each to their creditors, are as follows:

Name of bank.	Total divi- dends on principal.	Proportion of interest paid.
	Per cent.	Per cent.
The First National Bank of Austin, Nev The Atlantic National Bank of New York, N. Y		50.
The Miners National Bank of Georgetown, Col.		
The National Bank of Fishkill, N. Y.	100.	38.5
The National Bank of the State of Missouri, Saint Louis, Mo		100.
The German National Bank of Chicago, Ill	100.	42.3
	I	1

In the case of the National Bank of the State of Missouri there still remains a portion of the assets which can only be liquidated at the close of protracted litigation. Whatever may be realized from this source will eventually be distributed among the stockholders of that bank who have paid an assessment upon their stock liability.

The affairs of a number of national banks in the hands of receivers have been completely liquidated, with the exception of litigation pending in the courts, which may protract their final settlement for some time, although in three cases, those of the First National Bank of Allentown, Pa., the First National Bank of Waynesburg, Pa., and the City National Bank of Chicago, Ill., a speedy settlement is now expected.

\* The Comptroller is indebted to Mr. W. A. Camp, manager, and Mr. F. D. Tappen, chairman of the loan committee of the New York clearing-house, for valuable information regarding the issue of loan certificates. The names of these banks, with the dividends already paid to the creditors, are as follows:

	Per cent.
Venango National Bank of Franklin, Pa	15
Scandinavian National Bank of Chicago, Ill.	
New Orleans National Banking Association of New Orleans, La

\* Of interest.

The failures of national banks during the year ending November 1, 1884, have been more numerous than for a number of preceding years, and this is not surprising considering the great depreciation in values and the consequent general liquidation, which has resulted in failures among traders and others having an aggregate indebtedness of about \$200,000,000, as nearly as can be estimated. These failures have entailed large losses upon the banks generally, and the national banks mentioned, as well as many State banks and private bankers, have been unable to meet the continued strain. It is, however, surprising that the occasional failure of a national bank, to whatever cause due, with comparatively small capital and liabilities, should give rise to so much comment and excitement, when the numerous failures of State banks and private banks, of mercantile and manufacturing firms, and of joint-stock enterprises, causing losses vastly larger than those occasioned by the failures of national banks, attract comparatively little attention or criticism. As a rule, the jobber, manufacturer, or joint stock concern has obtained his or its capital in such a manner that the effects of their disasters are more widely distributed, and therefore less noticed. The failing State bank and private banker, however, equally with the national bank, inflict loss upon the immediate community in which they are located, and apparently the complaint should be as great of one class as of the other, which, however, is not the case.

It is also of interest to know that this is not the only country which has suffered from financial troubles, caused by the failure of banks and bankers. Banks of note have failed during the year in England and her provinces. The failure of the Oriental Bank was especially noticeable. This institution was represented by branches in India, Australia, and elsewhere throughout the British empire. It owed its depositors about six or seven million pounds sterling, equivalent to thirty to thirty-five millions of dollars. The liabilities of this one institution were therefore about equal to the aggregate liabilities of all the State and private bankers failing in the State of New York during the last year. The failure of the Oriental Bank was in some measure due to its giving its support to what in this country would be termed wildcat land speculations.

The most notable national-bank failure of the year in the United States was that of the Marine National Bank, of the city of New York, which closed its doors about 11 a. m. on the 6th of May. The bank examiners of the city of New York immediately took possession of the bank and found that it had been indebted to the clearing house that day in the sum of \$555,000. The examiner also found the account of one firm overdrawn on the books of the bank to the amount of \$766,570.14. Upon further examination it was found that this firm owed a total of about \$2,430,500, being more than six times the capital of the bank. A portion of this indebtedness was in the names of other parties -clerks in their office and relations of one of the firm. How far the officials of the bank are criminally responsible for these matters is a subject now under investigation in the courts. The Comptroller finds from the report of the examiner that this firm had three different accounts with the bank-a private account of a member of the firm, a general account and a special account. It appears, from an examination of the transcript of these accounts, that on May 5 their special account was overdrawn by certified checks \$383,402.07, and that on the same day their general account was also overdrawn. It is apparent, therefore, that the bank had violated the law in regard to certifications by permitting these overdrafts. It is claimed, however, by the officers of the bank that these certifications were made against securities which were subsequently obtained from the bank by one of the firm upon his representations that he had obtained a loan upon them elsewhere, and would make good his account. A further examination of the various accounts of the firm shows that while the certification of their checks was carried on to an enormous extent, they also made very heavy deposits from day to day, and it will, perhaps, be very difficult to furnish evidence proving conclusively that the checks were certified before the deposits were made.

An examination of the minutes of the board of directors of the bank shows that on the 11th day of April, 1884, twenty-five days before the failure of the bank, the committee of examination appointed by the board of directors reported that they had examined the securities, counted the bills and specie, and examined the balances on the ledgers of the bank, and found the recorded statement of the 7th of April, 1884, to be correct. The minutes further show that the directors were in session about an hour before the bank closed. They apparently had no suspicion of the state of its affairs, and voted to discount certain offerings of commercial paper; and within half an hour after the adjournment of this meeting the bank closed its doors. It would seem, therefore, that the board of directors was grossly deceived as to the true state of affairs.

In this connection I desire to state that the records of the Comptroller's office show that many of the transactions of the Marine National Bank of the city of New York have been looked upon with disfavor, and that the association had been frequently reprimanded for irregularities during the past few years. None of the reports of examinations of the bank made to this office, however, disclosed any violations of the law forbidding the overcertification of checks, or gave the Department any adequate idea of the dangerous character of its loans, and this is not surprising, the directors of the bank having been equally deceived in regard to the situation.

After reviewing the information in his possession, it seems to the Comptroller that the failure of the Marine National Bank is in consequence of the board of directors having chosen for their president a man who was willing to risk his own honor and the funds of the bank He joined with himself another, who is now in Ludlowin speculation. street jail under indictment, and who was also a member of the board of directors of the bank. While it is true that the final failure has shown that there were overcertifications on the last day, the Comptroller judges, from the information which he has received, that the bank had been for a long time in the power of the firm to whom the certifications were granted, through the president's copartnership. This matter was carried to the extent of permitting one of the firm to have access to, and apparently free disposal of, the securities left as collateral to his loans, and, so far as actual results are concerned, he might as well have had the combinations of the cash vaults of the bank and helped himself to their contents.

The Metropolitan National Bank suspended and closed its doors about noon on May 14, and opened again for business at 12 o'clock on the following day, the bank examiner remaining in charge of the bank during its suspension. He also remained at the bank during the first days of its resumption, and has frequently visited it since, and forwarded reports as to its liquidation of deposits. Before permitting the bank to resume business the Comptroller received assurances from the examiner that the bank was solvent, and also received telegrams from the president and chairman on loans of the New York Clearing-House, stating that in their opinion the bank was solvent and should be permitted to resume. The bank is now closing its affairs, having arranged to pay its depositors in full and gone into voluntary liquidation under sections 5220 and 5221 of the United States Revised Statutes.

It is difficult to determine, in the case of this bank, what brought about its suspension. From the information which the Comptroller has, however, it appears that the president of the Metropolitan National Bank had the credit, at least, of being a very large speculator. He was supposed to be a man of very large means and was interested in many enterprises which required the use of large sums of money. The general liquidation in railroad and other securities which has been going on for the past two years had no doubt affected the properties in which the president was interested, and the public having become suspicious, and apparently believing that he was a large borrower from the bank, and had loaned money to parties who were interested with himself, all of whom were assumed to have lost largely by this depreciation of property, rumors were circulated which excited distrust and suspicion against his bank and caused the run upon it which resulted in its suspension. Reports of examinations do not disclose any overcertification of checks, and I cannot conclude that irregularities of this kind had anything to do with bringing about the suspension.

The Metropolitan National Bank was examined on April 28, 1884. The examination disclosed certain irregularities, and a letter was promptly written to the bank, requiring the correction of the irregularities, and forbidding the declaration of any further dividends until this had been done. While this letter was acknowledged, the matter was pending at the time of the suspension of the bank.

The trouble at the Second National Bank of the city of New York grew out of a defalcation amounting to 33,185,000 by the president of the bank. The amount of this defalcation was immediately guaranteed and the money paid in by the directors. Owing to this prompt assistance the bank did not suspend, and is going on with its business in a solvent condition. As far as this office is advised, the president used the money in speculations in Wall street, and was able to conceal the fact of his misappropriation of the funds of the bank on account of the securities being kept in a vault located at some distance from the regular banking rooms, which are on the corner of Twenty-third street and Fifth avenue. It appears that the president had access to these securities without check or hindrance, and used them to obtain money for his own private speculations.

In the matter of the failure of the Marine National Bank of New York, and the defalcation at the Second National Bank of New York, it appears from the information on file in this office that there have been not only irregularities, but violations of section 5209 United States Revised Statutes. The United States district attorney at the city of New York is in communication with the national bank examiner and the receiver of the Marine National Bank in regard to these matters, and the facts, which have been submitted to this office, the Comptroller has formally transmitted to the Attorney-General of the United States through the Secretary of the Treasury.

Since the commencement of the national banking system 100 banks have been placed in the hands of receivers, 474 banks have voluntarily closed their business, by the vote of shareholders owning two thirds of their stock, under the provisions of sections 5220 and 5221 of the Revised Statutes of the United States, and the corporate existence of 15 banks has expired by limitation. Of the banks in the hands of receivers, 9 had been previously placed in voluntary liquidation by their stockholders, but failing to pay their depositors, receivers were afterwards appointed by the Comptroller to wind up their affairs. Of the 100 banks placed in the hands of receivers, 63 have been finally closed, leaving 37 still in process of settlement; 21 of which, as has been seen, are awaiting the results of pending litigation, leaving about 16 receiverships only in *active* operation.

The loss to creditors of national banks which have been placed in the hands of receivers during the twenty-one years that have elapsed since the passage of the act of February 25, 1863, as near as can be estimated, including dividends which will probably be hereafter paid, has been about \$8,266,000. The annual average loss has been, therefore, about \$400,000 in the business of corporations having an annual average capital of about \$450,000,000, and which have been responsible for the safe keeping of deposits in their hands, averaging constantly over \$800,000,000, or about one twentieth of 1 per cent. of annual loss to depositors.

The total amount paid to creditors of insolvent national banks amounts to \$23,499,522, upon proved claims amounting to \$38,489,810.

The dividends so far paid thus equal about 61 per cent. of the proved claims. The amount paid during the year was \$1,720,850.

Assessments amounting to \$8,901,750 have been made upon the stockholders of insolvent national banks for the purpose of enforcing their individual liability under section 5151 of the Revised Statutes, of which \$3,633,957 has been collected—\$282,678 during the past year.

A table showing the national banks which have been placed in the hands of receivers, the amount of their capital, of claims proved, the rates of dividends paid, and also showing the amount of circulation of such banks issued, redeemed, and outstanding, will be found in the appendix.

Whenever the failure of a national bank has disclosed criminal violations of the national bank act on the part of officers or directors, or whenever the reports of national bank examiners have disclosed similar violations, all the evidence procured pertaining to such transactions has been communicated to the Department of Justice through the proper channels, and receivers and examiners have been instructed to furnish all assistance in their power to the United States attorneys in the several districts.

It is the intention of the Comptroller to rigidly enforce the bank act and to call the attention of the Department of Justice to any criminal violations of the same, but experience has proved that it is difficult, not only under the bank act, but generally under criminal statutes, to always obtain sufficient evidence to convict offenders. The Comptroller is of the opinion that, with a few exceptions, the national bank act has adequate provisions for the prosecution and conviction of those who lay themselves liable to its penalties. As stated elsewhere, bank failures are not so much due to the inadequacy of the law as to the failure on the part of the directors to maintain a proper supervision of the affairs of their associations and of the conduct of their officers.

#### ILLEGAL CERTIFICATION OF CHECKS.

In reference to the matter of illegal certification of checks by the national banks of the city of New York, the records of this office show that immediately upon the passage of the act of July 12, 1882, the bank examiner for New York City was directed to furnish information as to whether it was the custom and practice of the national banks of that city to certify checks in violation of section 13 of that act, and section 5208, United States Revised Statutes. Many of the banks in New York immediately took advice of their attorneys, and opinions were sent to this office which were deemed of importance in the matter. The main point of these opinions was that the certifications forbidden were a form of acceptance, and that the right to make a general acceptance was not interfered with, reference being made to the third clause of section 5136, United States Revised Statutes, which confers upon national banks the power to make contracts. Many of the banks of New York, acting upon these opinions of their attorneys, changed the form of certifications, and the majority of the banks seem to have stamped their checks,

for the purpose of certification, with the word "accepted," giving the date, and with the name of the teller written underneath.

On October 4, 1882, a letter was addressed to the Secretary of the Treasury asking him to refer certain questions which had arisen under the law to the Attorney-General for an opinion.

On November 24 the Attorney General returned his opinion. In reply to the first question, whether a national bank had the right to *accept* checks drawn apon it unless the drawer has the amount stated in the check actually on deposit in the bank, he replied in the negative. To construe otherwise he held would be to allow a device to evade the provisions of law.

In reply to the second question, whether an acceptance under such circumstances would create a liability to the bank for money borrowed, and as such be subject to the limitation of section 5200 of the Revised Statutes, confining such liability to one-tenth of the capital stock of the bank, the Attorney-General replied in the negative, as the acceptance under such circumstances would not be a loan of money but of credit.

To the third question, as to whether such acceptances to an extent greater than the capital of the bank would be a violation of section 5202 of the Revised Statutes, the Attorney General replied in the affirmative.

Immediately upon receipt of this opinion the banks were notified of the same, and warned that due regard must be had to the law as interpreted.

On July 19, 1883, a circular letter was sent to the New York banks asking information as to the large amount of certified checks and acceptances appearing in their last previous quarterly report, to which answers were duly received.

By an examination of the Wall Street National Bank, made on September 4, 1883, what appeared to be a clear case of violation of law was discovered, and a letter was addressed by my predecessor to the Secretary of the Treasury, inclosing a copy of the report, and asking him to transmit it to the Department of Justice for action. Although an endeavor was made by the district attorney to have all the officers of the bank indicted, yet the grand jury found an indictment only against the teller of the bank. When brought up for trial he plead guilty, but presented an affidavit showing that he had acted under the direction of his superior officers. The judge suspended sentence to admit of evidence of the implied charge against these officers. The district attorney was heard in this matter before a United States commissioner, and presented evidence against the officers, and a decision has been rendered holding all the officers for trial, as follows:

The teller, — — , stands indicted for the offense with which the defendants here are charged, and I am informed that the court has suspended action pending proceedings to ascertain the relations of the principal officers of the bank to the transactions in question. The bank examiner, during his examination, stated that this was the first case arising under the law in which proceedings bad been instituted. I feel the delicacy of any position in having to pass upon the questions involved in the absence of any adjudication. It appears that the defendants, Evans and Timpson, had no knowledge of these transactions with reference to Cecil, Ward & Co., and it has been suggested in the course of this examination that they be regarded as practically out of the investigation. The statute reads: "Any officer, clerk, or agent who shall," &c. The clerks did not adopt the plan of accepting checks in lieu of certifying. What part the cashier may have had in the adoption of it remains to be seen. I do not regard him as necessarily the guilty party or the only offender simply because he carried out the instructions of the bank or its policy. The device which constistutes this evasion need not to have originated on the day in question when it resulted in the violation of the law. The cause, the device, may have originated long prior. I shall surely hold those who caused the violation. From the evidence before me I

5022 F----11

cannot avoid the conviction that the model of accenting was r sorted to purposely to evade the law; in other words, that they might in this way give customers credit beyond the amount of their deposit; that is exactly what the law forbids by certified checks, and it forbids it also by resorting to a device to accomplish it otherwise. That the law has been violated I have no doubt. Whom of the defendants should be adjudged the guilty party, and whether one or more, is for the court to determine and not for me to say. I have come to the conclusion to hold all the defendants, that all questions presented by this case may be fully heard and determined by the court.

The reports to Congress of my predecessor for the years 1882 and 1883 contained full information in regard to the certification of checks, legal and illegal, and enumerated the numerous ways there were of evading a technical violation of the law. At the same time a history of the growth of the practice of certifying checks was given. Certification was in use as a method of business for more than thirty years previous to the organization of the national banking system, and at least twenty years previous to the establishment of the clearinghouse. It is the province of the office of the Comptroller of the Currency to call the attention of the proper officers of the Government to evidence by which violations of law may be punished. In regard to over-certification of checks, unless they result in loss, it is almost impossible to obtain evidence which will convict the offenders. The examiner cannot be in the bank at all times. He must depend for his knowledge of its business upon an examination of its books and accounts, and the general conduct of its business while he is making his examination. In any case of certification, where no loss is encountered, the books at the close of the day, as a rule, show deposits equal to or greater than the checks drawn. In the case of the Wall Street National Bank a loss occurred by which the violation of the law was made apparent, and proceedings were commenced. In the case of the Marine National Bank the Comptroller judges from the information on file that there is good evidence of over-certification, and, as has been seen, action has already been taken by the United States district attorney. It has been stated to the Comptroller that on the day of the suspension of the Metropolitan National Bank many of the brokers engaged in business on Wall street, in New York, were very indignant at the national banks because they would not overcertify their checks, and in this way lend their credit to afford the brokers relief in the emergency. It is the opinion of the Comptroller that since the passage of the act of July 12, 1882, the officers of the national banks of New York have given the matter of certification of checks their serious attention, and that they have endeavored to diminish the dangerous features of this method of doing business.

After the passage of the act of July 12, 1882, my predecessor suggested the establishment of a stock clearing house to enable the brokers to make their settlements without calling upon the banks to certify their checks for the purpose of clearing their stocks. This matter has received careful consideration by the bankers and brokers of New York. No plan has yet been suggested, however, which has seemed to meet the peculiar requirements of the Stock Exchange business in New York. The Comptroller hopes that the recent troubles growing out of Wall street speculations will force the bankers and brokers of New York, for their own protection, to agree upon a stock clearing house system, and he believes that the present is an excellent time for the conservative bankers in the city of New York to make a move in this matter.

The Comptroller believes, however, that overcertification of checks, viz, the certification of checks as "good" when no funds are to the

credit of the drawer of the checks, is not only practiced for the accommodation of the brokers who deal in stocks, but is also done for the accommodation of the dealers in produce. These dealers often require large temporary accommodations of money to take up bills of lading for produce which has been shipped to them from the interior, and which they desire to take from cars and warehouses for shipment abroad, and some accommodation is necessary in the interim until the ocean bills of lading can be obtained and exchange drawn against the While this practice is reprehensible and is not legiticonsignment. mate as a banking transaction, business has been and is carried on in this manner, and the fact that the national banks of the city of New York are endeavoring to comply with the law in regard to illegal certification of checks has caused many dealers in produce to withdraw ' their accounts from the national banking associations and has largely increased the business, of certain of the State banks, which are under no restrictions of law in this matter. This is particularly noticeable in the case of the bank which was organized under the auspices of the New York Produce Exchange.

#### BANK EXAMINATIONS.

The recent financial disturbances throughout the country, and the consequent failures of national and State banks, have called the attention of the public to the official examination of banks as conducted under the authority of the national bank act, and under various State laws.

The national bank act provides for the issue and regulation of a national currency secured by United States bonds, and provides, also, for a banking system, in order to facilitate the issue of this circulation. It contains provisions bestowing certain privileges upon the banks organized under it, and provides many safeguards for the public by imposing on these banks such restrictions as the history of banking throughout the world has seemed to indicate were of a character to create a safe and permanent banking system. This law has been amended and improved from time to time, but it is not to be supposed that the national banking system is absolutely perfect, nor that imprudent banking under it can be altogether prevented.

In order to enable him to ascertain if the provisions of the law are followed, section 5240 Revised Statutes authorizes the Comptroller to appoint suitable persons to make an examination of the affairs of every national banking association. It has been customary from the establishment of the system to have a regularly appointed examiner visit each national bank at least once a year, in many cases twice a year, and when deemed necessary, even more frequently. The examination of national banks is conducted by the examiners in accordance with instructions issued from this office, which instructions, both general and specific, have grown with the growth of the system. The first general instructions to examiners were issued September 15, 1864, by the Hon. Hugh McCulloch, then Comptroller of the Currency, and as the bank act has been amended and revised these instructions have been altered as circumstances seemed to warrant. It has been the aim of the Comptroller to increase the efficiency of the examinations by carefully noting the causes that have in particular cases led to the suspension or failure of national banks, and calling the attention of the examiners to these causes, suggesting such methods of examination as seemed to be best calculated to prevent repetition of such disasters, and to expose violations of law which led to the same.

This official inquiry into the affairs of a national bank does not end with the mere inspection of the cash, bills receivable, books and accounts of the association, but the examiners are instructed to closely scrutinize the business of the bank, to investigate the standing and fitness for their positions of the persons to whom the management of the affairs of the association are intrusted, and the manner in which the business is usually conducted, whether prudently or otherwise; to ascertain as far as possible the character of the loans and discounts of the bank, and what losses, if any, have been or are likely to be sustained.

The examiner is also instructed to ascertain how frequently the board of directors meet together to consult in relation to the affairs of the bank, and to discover if possible any malfeasance in office or willful neglect of business on the part of the management; and is moreover particularly instructed to report to the Comptroller whether any excessive accommodations are granted in violation of section 5200 Revised Statutes, and to note if the officers of the bank are borrowing largely from the association; to ascertain the customary state of the lawful money reserve by examining the daily statements for some time previous to the examination; whether or not the bank borrows money to loan again; and in short, to discover and report to this office all violations of law of whatever character.

Upon receipt of the report at this office all matters above mentioned, and such others as may be referred to therein, are carefully reviewed and considered, and the directors of the bank are immediately notified of all violations of the law, and they are required to have the same promptly corrected. The attention of the directory is also specially called to the reform of such matters as are deemed detrimental to the safety and welfare of the association.

The general public do not understand the amount of labor performed weekly, monthly, and yearly by the examiners of national banks, many of whom have for years rendered most excellent service. It can hardly be expected, however, with the limited compensation allowed by law for making these examinations, that the Comptroller can in all cases retain the services of the most expert accountants, although by systematic division of the labor he has endeavored to obtain the best results possible under the circumstances.\*

For the purposes of bank examination the United States is apportioned into twenty-five districts, bank examiners being stationed in each district. Important reserve cities, such as New York and Boston, generally form a district of themselves, and the duties of the examiner stationed there are usually confined to that city and its immediate vicinity. Owing to the nature of the work, the position of a nationalbank examiner is one of great responsibility. Notwithstanding their vigilance, the most competent examiners are liable to be deceived, and

<sup>\*</sup> It is submitted that the compensation allowed national-bank examiners by section 5240, Revised Statutes, is often insufficient. The assessments upon the banks, by which the law provides that the examiners' fees shall be paid, are based upon the capital of the national banks examined, and vary, according to capital, from \$20 to \$75. In many instances the capital is not the proper basis upon which to compute the compensation of national-bank examiners, as many banks with a comparatively small capital have large lines of deposits, and consequently do a much larger business and require more time and labor from the examiner than other associations with the same capital. The Comptroller is of the opinion that the fees paid to nationalbank examiners should be based upon the capital and average deposits of the nationalbanking association.

sometimes find it impossible to discover and remedy in time even gross mismanagement of the affairs of national banks.

No laws or system of examinations will prevent dishonest men from keeping false accounts and rendering untrue statements, and by means of these and other devices they can conceal from the examiner the fact that they are using the money intrusted to their charge in private speculations until final disaster makes longer disguise impossible. It is thus exceedingly difficult to detect violations of law or misuse of the funds of a bank.

The surest preventive is to have an honest, active, and competent board of directors. A rogue or a dishonest man, who acquires the confidence of his associates to such an extent that he can appropriate the funds of a bank for his own use without their knowledge or that of the board of directors, can have but little trouble in deceiving the examiner and hiding his peculations from him.

In times of financial disaster and of a stringent money market the acts of dishonest and corrupt officials in any bank or banking firm or private corporation are more liable to be discovered, and naturally during the last year the consequences of disastrous speculation, which had been for a long period carried on with impunity with the aid of misappropriated funds, have been brought to the surface. Men who were supposed to be worthy of the entire confidence of communities, whose character stood so high that they were intrusted not only with the management of corporations, but with the investment of private funds, have now been proven to have dishonestly betrayed their trust. Never were the instances of this kind more numerous than during the financial troubles of the present year.

Such practices and the resulting disasters, however, do not prove that the national banking laws are inefficient, or that the national bank examiners do not do their duty. They rather indicate that the shareholders of joint-stock corporations of all kinds, and particularly those of banks, should be more careful to elect men as directors and trustees who are competent and who will exercise proper care and supervision over the management of the affairs intrusted to them, who will select competent and honest officers, provide suitable rules and regulations for the conduct of the bank, keeping its accounts, &c., and appoint regular committees of examination, whose duty it shall be not only to verify the accounts, but to keep a watchful eye over the affairs of the association and the officers who immediately carry them on.

The public frequently draw wrong deductions as to the responsibility of the Government and the bank examiners in particular cases. For instances, in many cases where failures occur the principal cause is found in the character of the loans made, which are either excessive or made on improper security. There are 2,671 national banks in the country. The loans and discounts of the banks at the close of business September 30, aggregated more than \$1,240,000,000, and it is of course not the province of the bank examiners to supervise the making of these loans. Section 5200, Revised Statutes, provides that no loans shall be made to any one individual, firm, or corporation in amount exceeding one-tenth of the paid in capital of a bank, but there are many ways of evading this law, and it is a physical impossibility for the Government to maintain the constant espionage over the affairs of the national banks which alone would prevent the violation of this statute. Any attempt to direct the making of loans and to dictate to the directors and managers of the national banks throughout the country as to what use they shall make of their funds would, of course, be impracticable.

Many instances occur daily, which are not seen or known to the general public, where the banks are notified of violations of law, and where their condition is improved by action upon the reports of the examiner. When, however, some unexpected failure occurs, brought about by injudicious banking, bad management, or adventurous speculation, or by dishonesty and fraud on the part of the officers or directors, who are the very men to whom the examiner must more or less look for information, the Government and the national banking laws are unjustly criticised. The fault is not with the law and not with the examiner, on whose reports the directors have very likely been notified and warned to exercise more care in the management of their affairs and to hold their officers in check.

A national bank being a joint stock association, its aggregation of capital having been brought together by bankers or other persons for the purpose of utilizing more effectually the resources of the locality in which it is doing business, it is not the intention of the bank act to interfere with the business of said association so long as it is conducted in accordance with the law. The exact line at which the Government shall interfere and the point at which Government discipline shall commence is a matter of some delicacy to determine. It is exceedingly difficult to add materially to the restrictions of the national bank act without such an interference with the business of the banks as would be practically prohibitory, for it is well known that banking can be carried on under the laws of most of the States of the Union with but very little interference and scarcely any espionage on the part of the officials of the State government. It is because the national banking system has raised the standard of banking, and because it is generally understood that money deposited with a national bank is as a rule much safer than in institutions not under similar restrictions, that bankers and capitalists avail themselves of the national-bank act in order to gain the confidence and thereby the deposits and business of the public.

The act appears to contain ample provisions for the punishment of criminal offenders, and the Comptroller is of the opinion that it is not so much the lack of law, as it is the difficulty of detection of offenders and of obtaining sufficient evidence to convict, that has prevented the punishment of officers and others connected with national banks who have violated the criminal sections of this act. In some cases the directors and shareholders of banks have apparently suppressed information and evidence, and in many instances it has been with great difficulty that the Comptroller was able to present the necessary facts to the Department of Justice to make a case. For obvious reasons, the number of instances in which this office has endeavored to secure the arrest and conviction of offenders by reporting to the proper officers of the law facts that came to the knowledge of the Comptroller, which seemed to indicate certain violations of law, cannot be presented, but it is believed that the records of the various States and United States courts show a larger number of indictments and of convictions for violations of the national-bank act than is generally known to the public.

It is possible that the provisions of the act relating to the punishment of offenders in the matter of false oaths of officers of banks with intention of deceiving the Comptroller as to the correctness of reports might be profitably amended. The Comptroller is of the opinion that if the criminal provisions of the bank act are to be amended, the Department of Justice of the United States should be consulted for suggestions as to any weakness or defect in the existing law.

#### TRANSACTIONS OF THE NEW YORK CLEARING-HOUSE.

The New York Clearing House Association is composed of forty-four national and seventeen State banks, and the assistant treasurer of the United States at New York.

Through the courtesy of Mr. W. A. Camp, its manager, a statement of the transactions during the year ending October 1, 1884, has been obtained, which shows that the total exchanges were more than thirty four thousand millions of dollars, while the balances paid in money were nearly 1,525 millions. The daily average balances paid were \$4,967,202, or nearly 4.5 per cent. of the amount of the settlements.

The balances paid in money during the year consisted of \$751,382,000 in clearing house certificates of the Bank of America, clearing house certificates for legal-tender notes amounting to \$20,320,000, and clearing house loan certificates, \$70,510,000; legal-tenders amounting to \$42,198,994; United States gold certificates, \$640,370,000; and \$150,000 in gold coin. Since the date of the issue of the new gold certificates (October 4, 1883) authorized by the act of July 12, 1882, the greater portion of the balances due from the Government have been paid in these certificates instead of coin, thus dispensing with the movement of large amounts in bags and upon drays from the Treasury to the custody of the banks. During the last six months, however, a portion of the balances due from the United States have been paid in legal-tender notes.

The following table shows the yearly transactions of the New York Clearing House for the thirty-one years since its organization in 1853, and the amounts and ratios of currency required for the payment of daily balances:

Years.	No. of banks.	Capital. *	Exchanges.	Balances paid in money.	Average daily exchanges.	Average daily bal- ances paid in money.	Ratios.
1854         1855         1856         1857         1858         1860         1861         1862         1863         1864         1865         1866         1867         1868         1869         1868         1869         1870         1873         1874         1875         1876         1877         1878         1878         1878         1880         1881         1882         1883         1884	$\begin{array}{c} 48\\ 50\\ 46\\ 47\\ 75\\ 50\\ 50\\ 50\\ 50\\ 50\\ 50\\ 50\\ 50\\ 50\\ 5$	$\begin{array}{c} \$47,\ 044,\ 900\\ 48,\ 884,\ 180\\ 52,\ 883,\ 700\\ 64,\ 420,\ 200\\ 67,\ 146,\ 018\\ 67,\ 921,\ 714\\ 69,\ 907,\ 435\\ 68,\ 900,\ 605\\ 68,\ 972,\ 508\\ 68,\ 586,\ 763\\ 70,\ 200\\ 81,\ 420,\ 200\\ 81,\ 420,\ 200\\ 81,\ 420,\ 200\\ 81,\ 420,\ 200\\ 81,\ 420,\ 200\\ 81,\ 552,\ 500\\ 81,\ 731,\ 200\\ 71,\ 855,\ 200\\ 81,\ 752,\ 508\\ 60,\ 800,\ 2^{10}\\ 60,\ 475,\ 500\\ 61,\ 162,\ 700\\ 60,\ 412,\ 700\\ 710,\ 410,\ 412,\ 700\\ 710,\ 410,\ 412,\ 700\\ 710,\ 410,$		$\begin{array}{c} \$297, 411, 494\\ 289, 694, 137\\ 334, 714, 489\\ 365, 813, 902\\ 314, 228, 911\\ 363, 954, 683\\ 850, 693, 438\\ 353, 383, 944\\ 415, 550, 331\\ 677, 625, 483\\ 885, 719, 205\\ 1, 035, 765, 108\\ 1, 035, 765, 108\\ 1, 036, 135, 106\\ 1, 144, 963, 451\\ 1, 125, 455, 237\\ 1, 120, 318, 308\\ 1, 036, 454, 822\\ 1, 209, 721, 029\\ 1, 428, 582, 707\\ 1, 295, 042, 029\\ 1, 373, 996, 302\\ 1, 373, 996, 302\\ 1, 373, 996, 302\\ 1, 373, 996, 302\\ 1, 373, 996, 302\\ 1, 373, 996, 302\\ 1, 373, 996, 302\\ 1, 568, 883, 136\\ 1, 568, 983, 199\\ 1, 524, 930, 994\\ \end{array}$		$\begin{array}{c} \$988, 078\\ 940, 565\\ 1, 079, 724\\ 1, 182, 246\\ 1, 016, 954\\ 1, 177, 944\\ 1, 232, 018\\ 1, 151, 088\\ 1, 344, 758\\ 2, 027, 252\\ 2, 866, 405\\ 3, 373, 828\\ 3, 472, 753\\ 3, 3717, 414\\ 3, 642, 250\\ 3, 637, 397\\ 3, 805, 210\\ 3, 927, 662\\ 4, 636, 632\\ 927, 662\\ 4, 636, 632\\ 927, 662\\ 4, 636, 632\\ 927, 662\\ 4, 243, 050\\ 6, 244, 000\\ 5, 253, 010\\ 5, 105, 440\\ 95, 263, 010\\ 5, 105, 440\\ 967, 202\\ 1, 966, 203\\ 1, 967, 202\\ $	$\begin{array}{c} Per \ ct. \\ 5.2 \\ 5.4 \\ 4.4 \\ 4.6 \\ 6.6 \\ 5.6 \\ 5.6 \\ 5.6 \\ 6.0 \\ 4.6 \\ 5.6 \\ 4.6 \\ 5.7 \\ 4.0 \\ 3.7 \\ 4.0 \\ 3.7 \\ 4.0 \\ 3.7 \\ 4.0 \\ 3.7 \\ 4.0 \\ 3.7 \\ 4.1 \\ 5.5 \\ 5.9 \\ 5.8 \\ 4.1 \\ 5.5 \\ 5.9 \\ 5.8 \\ 4.1 \\ 5.5 \\ 5.9 \\ 5.8 \\ 4.5 \\ 3.5 \\ 4.5 \\ 3.4 \\ 3.9 \\ 4.5 \\ 5.8 \\ 5.8 \\ 4.5 \\ 5.8 \\$

\* The capital is for various dates, the amounts at a uniform date in each year not being obtainable. † Yearly averages for thirty-one years. ‡ Totals for thirty-one years. The total amount of transactions for the thirty-one years given in the table is \$719,444,447,427, and the annual average is \$23,207,885,401.

The clearing house transactions of the assistant treasurer of the United States at New York for the year ending October 1, 1884, were as follows:

Exchanges received from clearing-house	\$303,006,595 76
Exchanges delivered to clearing-house	114,259,250 65
Balances paid to clearing-house	189, 774, 471 02
Balances received from clearing-house	1, 027, 125 91
Showing that the amount paid by the assistant treasurer to the clear	100 010 015 11

ing-house was in excess of the amount received by him ..... 188,747,345 11

A table compiled from statements made by the New York Clearing-House, giving the clearances and balances weekly from September 6, 1879, to November 29, 1884, inclusive, will be found in the appendix, and is valuable for purposes of comparison.

The following interesting table has been copied from the Commercial and Financial Chronicle, of New York City, of November 8, 1884, which gives the latest information concerning the exchanges at New York and other cities, having clearing houses, for the week ending November 1, comparing them with those for the corresponding week in 1883, and showing the percentage of differences.

The exchanges at the same places for the month ending November 1, 1884, are also given, with the percentage of differences resulting from a comparison with the exchanges for the same month of the previous year.

<i>,</i> .	.•	Week.			October.

The following table exhibits the transactions of clearing houses located in 25 cities for the year ending October 1, 1884, from official returns received by the manager of the New York Clearing House:

Cities.	Exchanges.	Balances.
New York	\$34, 092, 037, 338	\$1, 524, 930, 994
Boston	3, 314, 358, 919	432, 036, 602
Philadelphia	2, 664, 317, 901	232, 817, 299
Chicago	2, 349, 152, 846	247, 193, 028
Saint Louis	817, 462, 162	> 132, 557, 690
Baltimore	653, 205, 248	85, 917, 655
San Francisco	581, 116, 161	100, 552, 123
Pittsburg New Orleans	492, 317, 784	101, 364, 739
New Orleans	502, 013, 067	48, 069, 710
Cincinnati	480, 400, 000	. (*)
Providence	227, 300, 000	(*)
Louisville	221, 921, 422	50, 634, 610
Milwaukee	181, 052, 907	33, 671, 920
Kansas City	166, 237, 922	24, 110, 27
Detroit	138, 393, 736	23, 373, 73
Hartford	85, 683, 599	24, 295, 53
ndianapolis	77, 530, 440	12, 851, 23
Columbūs	69, 417, 717	10, 673, 86
Memphis	58, 465, 436	11, 543, 37
Peoría	47, 182, 994	11, 543, 37
Worcester	41, 738, 383	13, 422, 73
pringfield	38, 800, 656	11, 112, 03
Portland, 9 months	33, 324, 643	8, 476, 83
Syracuse	28, 139, 070	6, 989, 70
Lowell°	25, 837, 924	9, 891, 35
Twenty-five cities	47, 387, 408, 275	3, 146, 487, 07

\* No record kept.

From the above table it will be seen that the exchanges in New York City amounted to 71.9 per cent. of the whole sum, and the balances in that city were nearly one-half of the total balances.

#### CLEARING-HOUSE CERTIFICATES.

Section 5192 Revised Statutes provides that clearing-house certificates, representing specie or lawful money specially deposited for the purposes of any clearing-house association, shall also be deemed to be lawful money in the possession of any association belonging to such clearing house holding and owning such certificate; and section 5193 provides that the Secretary of the Treasury may receive United States notes on deposit, without interest, from any national-banking association, in sums not less than \$10,000, and issue certificates therefor in denominations of not less than \$5,000, which certificates may be counted as part of the lawful money reserve, and may be accepted in the settlement of clearing-house balances at the places where the deposits therefor were made.

The legal tender note certificates were first issued in the fiscal year 1873. On June 30, 1875, there were outstanding \$59,045,000 of these certificates, of which the national banks held \$47,310,000. On June 30, 1876, the amount outstanding was \$33,140,000, of which the banks held \$27,955,000. On June 30, 1879, the amount had been reduced to \$29,330,000, and the banks held on June 14 of the same year \$25,180,000. The amount outstanding on September 30, 1884, was \$15,945,000, and the national banks held on that day \$14,200,000.

The issue of the gold certificates was authorized by the fifth section of the act of March 3, 1863, and they were used for clearing-house purposes soon after the passage of the national-bank act. The first issue was made on November 13, 1865. On June 30, 1875, there were outstanding \$21,796,300, of which the national banks in New York City held \$12,642,180. The issue of these certificates was discontinued on December 1, 1878, and the amount outstanding had decreased on June 30, 1879, to \$15,413,700, and on October 1, 1880, to \$7,480,100. The amount outstanding on October 3, 1882, was \$4,907,440, of which the national banks held \$4,594,300. The issue of gold certificates having been discontinued by the Government, and the amount of gold coin having rapidly increased, the banks in New York found it necessary to establish a depository of gold coin for the convenience of the clearing house.

This depository at the present time is the Bank of America, by which bank certificates of deposit were first issued on October 14, 1879. The amount of such certificates outstanding on January 1, 1880, was \$25,610,000, and on October 1, 1883, was \$22,955,000. The largest amount of coin on deposit was on January 21, 1882, viz, \$45,330,000, the capacity of the vault having been increased since 1880. Of this amount the national banks of New York City held on October 2, 1883, \$20,345,000; on September 30, 1884, \$15,123,000. These banks on the same date held of gold Treasury certificates issued under the acts of March 3, 1863, and July 12, 1882, \$40,815,140.

The act of February 28, 1878, authorized any holder of silver dollars of the weight of 412½ grains troy of standard silver to deposit the same with the Treasurer or any assistant treasurer of the United States in sums not less than \$10, and receive therefor certificates of not less than \$10 each, corresponding with the denominations of the United States notes. It required that the coin deposited, or representing the certificates, should be retained in the Treasury for the payment of the same on demand, and that said certificates should be receivable for customs, taxes, and all public dues, and also authorized their reissue.

This act did not authorize their use as clearing-house certificates, nor make them available as reserve for the national banks.

Section 12, act of July 12, 1882, provides that the Secretary of the Treasury is authorized and directed to receive deposits of gold coin with the Treasurer or Assistant Treasurers of the United States, in sums not less than twenty dollars, and to issue certificates therefor in denominations of not less than twenty dollars each, corresponding with the denominations of United States notes. The coin deposited for or representing the certificates of deposit shall be retained in the Treasurv for the payment of the same on demand. Said certificate shall be receivable for customs, taxes, and all public dues, and when so received may be reissued; and such certificates, as also silver certificates, when held by any national-banking association, shall be counted as part of its lawful reserve, and no national banking association shall be a member of any clearing house in which such certificates shall not be receivable in the settlement of clearing house balances.

The amount of silver certificates outstanding on November 1, 1884, less the amount held by the Treasury, was \$100,741,561. The amount of gold certificates November 1, 1884, less the amount held by the Treasury, was \$87,865,570.

On September 30, 1884, the national banks held \$3,331,510 of silver certificates, and \$47,217,710 of gold certificates issued under the acts of March 3, 1863, and July 12, 1882.

# LOANS AND RATES OF INTEREST.

The following table gives the classification of the loans of the banks in the city of New York, in Boston, Philadelphia, and Baltimore, in the other reserve cities, and in the remaining banks of the country at corresponding dates in each of the last three years:

The attention of Congress has previously been called to section 5200 of the Revised Statutes, which places restrictions upon loans, and to the difficulty of enforcing its provisions. In cities where large amounts of produce are received and stored, it is represented that it is impossible for the banks to transact this class of business, if restricted to loans for an amount not exceeding in any instance one tenth of their capital.  $\mathbf{It}$ is true that the limitation does not apply to loans upon produce in transit, where the drafts are drawn on existing values; but if produce is stored, instead of being shipped, large loans cannot be made except in violation of law. ' In such case the Comptroller has no means of enforcing the law, except by bringing a suit for forfeiture of charter, and this course might result in great embarrassment to business, as well as loss to many innocent stockholders of the banks. It is evident that the law should be so amended as to exclude from the limitation mentioned legitimate loans upon produce or warehouse receipts, and some other classes of collateral security, as well as loans upon United States bonds.

### RATES OF INTEREST IN NEW YORK CITY, AND IN THE BANK OF ENG-LAND AND THE BANK OF FRANCE.

The average rate of interest in New York City for each of the fiscal years from 1874 to 1884, as ascertained from data derived from the Journal of Commerce and the Commercial and Financial Chronicle, was as follows:

1874, call loans, 3.8 per cent.; commercial paper, 6.4 per cent. 1875, call loans, 3.0 per cent.; commercial paper, 5.8 per cent. 1876, call loans, 3.3 per cent.; commercial paper, 5.3 per cent. 1877, call loans, 3.0 per cent.; commercial paper, 5.2 per cent. 1878, call loans, 4.4 per cent.; commercial paper, 5.1 per cent. 1879, call loans, 4.4 per cent.; commercial paper, 5.1 per cent. 1880, call loans, 4.4 per cent.; commercial paper, 5.4 per cent. 1881, call loans, 3.8 per cent.; commercial paper, 5.0 per cent. 1882, call loans, 4.4 per cent.; commercial paper, 5.0 per cent. 1883, call loans, 5.7 per cent.; commercial paper, 5.7 per cent. 1884, call loans, 2.4 per cent.; commercial paper, 5.6 per cent.

The average rate of discount of the Bank of England for the same years was as follows:

During the calendar year ending December 31, 1874, 3.69 per cent. During the calendar year ending December 31, 1875, 3.23 per cent. During the calendar year ending December 31, 1876, 2.61 per cent. During the calendar year ending December 31, 1877, 2.91 per cent. During the calendar year ending December 31, 1878, 3.78 per cent. During the calendar year ending December 31, 1879, 2.50 per cent. During the calendar year ending December 31, 1880, 2.76 per cent. During the calendar year ending December 31, 1880, 2.76 per cent. During the calendar year ending December 31, 1880, 2.76 per cent. During the calendar year ending December 31, 1881, 3.49 per cent. During the calendar year ending December 31, 1883, 3.57 per cent. During the calendar year ending December 31, 1882, 4.10 per cent. During the fiscal year ending December 31, 1883, 3.57 per cent.

In the calendar year ending December 31, 1883, the rate of discount of the Bank of England was increased three times, and three times reduced. During the fiscal year ending June 30, 1884, the rate was increased once and decreased five times. The present rate is 5 per cent.

The average rate of interest in New York City for the four months previous to November 8, 1884, was on call loans 1.4 per cent., and on commercial paper 5.6 per cent.; the rate of interest on that date was on call loans 1 to 2 per cent., and on commercial paper 5 to 6 per cent.

\* From the Financial Chronicle only. *†* From the London Bankers' Magazine.

The rate of discount in the Bank of France, which was lowered from 4 to  $3\frac{1}{2}$  per cent. on March 23, 1882, was lowered to 3 per cent. on February 23, 1883. The average rate of discount during the year 1883 was 3.08 per cent.

The number of trade bills admitted to discount in the Bank of France during the year 1883 was 5,047,179, representing a sum of \$956,569,720. Of this number of bills there were 13,069 bills of \$2.08 and under; 548,720 bills from \$2.29 to \$10; 787,481 bills from \$10.21 to \$20; 3,697,909 bills above \$20. That is to say, nearly a fourth part in bills under \$20.21. The number of trade bills under \$20 steadily increases. In 1880 there were 1,014,412 of these small discounted bills; in 1881, 1,160,945; in 1882, 1,224,326, and in 1883 they have increased to 1,349,250.

The governor of the Bank of France in his report of its transactions for the year 1882 said, "These figures will show how great are the services rendered by the bank to the retail trade of Paris."

#### INTEREST ON DEPOSITS.

The practice of paying interest on deposits by the national banks has been the subject of discussion for some time past. It is the custom of the country banks to pay interest on current accounts, and also to issue certificates of deposit bearing interest, which latter usually state upon their face that no interest will be paid upon the same unless the deposit remains with the bank for three, six, nine, or twelve months, as the case may be.

Banks located in the cities, where a portion of the lawful money reserve of country banks may legally be kept, have been for many years in the habit of paying interest upon the daily balances of the accounts of their country depositors. Owing to the fact that the banks in the reserve cities other than New York keep large current accounts with their correspondents in that city, who in turn pay interest on the average daily balances of their correspondents, the result is that in times of easy money large sums accumulate in the city of New York subject to interest on current account. It is believed that this accumulation of money in the New York banks occasioned by this custom has a tendency to encourage speculation in stocks, as these banks are compelled to find some use for the money deposited with them on which they are in turn compelled to pay interest, and as this money is liable to be called for at any time, it is necessary to make loans payable on demand, and dealers in stocks called on the stock exchange, which theoretically can be readily sold at any time, are in consequence enabled to obtain money for speculation by pledging these securities as collateral and agreeing to repay the sum advanced on demand. The panic of 1873 and the financial troubles of May, 1884, have shown that these so-called demand loans are of such a character that the banks are not always able to realize upon them in case of emergency. The members of the New York Clearing House Association, after the panic of 1873, discussed the abolition of the payment of interest upon current accounts. Again, upon the 4th of June, 1884, the association endeavored to have its members agree to discontinue the payment of interest on daily balances, but owing to the persistent dissent of a few members the association was unable to make the arrangement.

While the united action of the Clearing-House Association in favor of the abolition of the payment of interest on deposits would doubtless have great effect, yet so long as it is the almost universal custom of banks, State and national, and of private bankers throughout the country, to pay such interest, it is probable that if the associated banks should discontinue the practice, they would do so to their own great detriment and loss of business. Many of the accounts of country banks and out-of-town correspondents would be transferred to the trust companies, State banks, and private bankers who are not members of the association, and who would not be bound by its regulations, and for this and other reasons it seems very difficult to bring about an absolute cessation of the practice. Until all the bankers in the principal cities of the country agree to discontinue the payment of interest, it is probable that it will continue to be paid upon current accounts.

It has been held by the courts that the conferring of special powers upon national banking associations prohibited them from the exercise of certain other powers not specifically conferred, and the decisions of the United States courts seem to indicate that it is unlawful for a national bank to borrow money to lend again or to receive deposits payable at fixed future dates with interest thereon.

Notwithstanding the fact that it has been held that national banks could not receive deposits payable otherwise than on demand, it is possible that, in view of the fact that the custom of purchasing deposits by the payment of interest is so universal, the courts might hold that national banks would have the same rights as other bankers to receive deposits subject to repayment upon a notice of from five to thirty days, and if this should be the case it is submitted that they should pay interest only upon deposits of this character, for there can be no doubt that it is extremely injudicious to receive current accounts payable on It would appear that if this course was *demand* subject to interest. adopted two classes of accounts would have to be maintained with most of the country correspondents of national banks in reserve cities, as it would be impracticable for a national bank in the interior to have any portion of its reserve deposited in such a manner that it could not be drawn upon demand. In view of the facts as stated, it is doubtful if any legislation upon this matter should be had which would discriminate against the national banks.

It is a question if in the business of banking it is not a correct principle to use every legitimate means to bring together an aggregation of funds for the purpose of carrying on large commercial transactions incident to the business of handling produce and carrying on the jobbing and other trades, which would otherwise be impossible. It is believed by many that the financial supremacy of London has been partially brought about by the custom of the bankers of that city of purchasing deposits and stimulating the accumulation of funds by the payment of interest. While the London joint-stock banks do not pay interest on their customers' accounts as a rule, they do pay interest on deposits on demand at a low rate, and at a higher rate where the money is left on seven days' and other longer notice, and enormous sums are constantly on deposit in London subject to interest in this manner.\*

In some instances the money must be left for a month. These deposits are received from the general public, and also very largely from country correspondents. It is the custom, however, for the London banks to charge a commission, generally a fixed sum, but sometimes varying with the transactions, upon the business done with their correspondents in the country. The private bankers of London also pay interest in the same manner, and in many instances allow interest upon their

\* For information relating to customs of London bankers in regard to paying interest on deposits, the Comptroller is indebted to Mr. W. Talbot Agar, secretary of the Institute of Baukers, London, England.

## COMPTROLLER OF THE CURRENCY.

customers' accounts, payable on demand. The rate of interest allowed on deposits in the city of London is usually but from one to one and a half per cent. per annum below the Bank of England rate for the time being on discounts. The country banks throughout the United Kingdom are in the habit of allowing interest on deposits and current accounts, to offset which, to a certain extent, they usually charge a commission on the transactions of their customers.

The following table exhibits the rate of interest charged by the banks and bankers of London for discounts, and also the rate of interest allowed on deposits during 1882, 1883, and first half of 1884:

#### COMPTROLLER OF THE CURRENCY.

#### STATE BANKS, TRUST COMPANIES, AND SAVINGS BANKS.

The act of Congress of February 19, 1873, section 333 of the United States Revised Statutes, requires the Comptroller to obtain from authentic sources, and report to Congress, statements exhibiting under appropriate heads the resources and liabilities of such banks and savings banks as are organized under the laws of the several States and Territories. In compliance with this act he has presented annually in the appendices to his reports the resources and liabilities of these corporations, so far as it has been possible to obtain them. Through the courtesy of State officers, returns of State banks, savings banks, and trust and loan companies have during the past year been received from twenty-two States. Many of the States and Territories, including Virginia, West Virginia, North Carolina, Alabama, Arkansas, Tennessee, Illinois, Kansas, Oregon, and Dakota, do not require periodical returns of the condition of the different classes of banks organized under their laws.

From these returns the following abstract has been compiled showing the resources and liabilities of State banks and trust companies for the last four years, the number reporting in 1881 being 683; in 1882, 704; in 1883, 788; and in 1884, 852:

The foregoing table was prepared from all the New England States, except Maine; from four Middle States, not including Delaware; and from all the Western States, excepting Illinois, Kansas, and Nebraska. The only Southern States from which reports have been received were South Carolina, Georgia, Louisiana, Texas, Kentucky, and Missouri. The only Pacific States were California and Colorado. There are no State banks in Maine, but one in New Hampshire, seven in Vermont, and none in Massachusetts. There are, however, six trust and loan companies in the latter State, one in Rhode Island, and six in Connecticut.

The following table exhibits the aggregate resources and liabilities of 629 savings banks in 1881 and 1882; 630 in 1883, and 636 in 1884:

The foregoing table includes the returns from six New England States, from four Middle States, not including Delaware; from the States of Ohio, Indiana, California, and the District of Columbia. The aggregate of loans in the New England States is \$288,905,262 and of deposits \$475,358,305. In the Middle States the aggregate of loans is \$163,328,406 and of deposits \$522,771,526.

Some of the largest savings banks in the city of Philadelphia, organized under old charters, are not required to make reports to any State officer. Returns directly received from four of these banks having deposits amounting to \$34,031,154, are included in the returns from the State of Pennsylvania.

The savings banks' deposits, given in the foregoing table for 1884, based upon reports made to State authorities, are \$1,073,294,955, and the deposits of the State banks and trust companies were \$514,111,591. These returns do not include bank deposits. The deposits of the national banks on October 1, 1884, exclusive of those due to banks, were \$989,320,509. No just comparison of the deposits of national banks with those of savings banks and State banks and trust companies can be made, owing to the fact that the reports of many of the latter classes of banks were made to the State authorities in 1883 or in January, 1884, and do not show the effects of the business depression resulting from the failures during the year 1884. The total population of New England, according to the census of

The total population of New England, according to the census of 1880, was 4,010,529, and the number of open deposit accounts of the savings banks in the year 1884 is 1,430,857, which is equal to nearly 35.7 accounts to each one hundred of the entire population. The average amount of each account is \$332.21, and if the total deposits were divided

among the entire population, the average sum of \$118.52 could be given to each individual.

The deposits of the savings banks in the State of New York were \$431,080.010, while the population is 5,082,871, showing that an equal distribution of the savings banks' deposits among the entire population of the State would give \$84.81 to each individual.

Tables showing the aggregate resources and liabilities of State banks, trust companies, and savings banks in each State, from which returns have been received from the State authorities, appear in the appendix. A table is also there given showing, by States, the number of savings banks' depositors, and the average amount due to each in 1883 and 1884.

The Comptroller has for the last eight years compiled the returns received by the Commissioner of Internal Revenue from the State and savings banks and private bankers for purposes of taxation, showing the average amount of their capital and deposits for each six months, and the amounts invested in United States bonds. The law requiring such returns to be made has not been repealed, but as the tax on capital and deposits ceased on November 30, 1882, it is not expected that such returns will hereafter be transmitted. The Comptroller must therefore depend exclusively for this information upon the returns to be received from the officers of the different States, and when such returns are required to be made they are, as a rule, promptly and courteously forwarded to this office in reply to his request.

The legislature of Missouri recently passed a law requiring all banks in the State to make reports in the month of December. With a view of rendering this system of reports more complete and effective than at present, the Comptroller prepared in the year 1876 the form of a bill, which is herewith presented; and it is respectfully suggested to members of Congress and State officers residing in those States where no returns are required that, if approved by them, they shall lend the weight of their influence to procure the enactment of a law, similar in form, by the legislatures of their respective States. It may be mentioned that a bill, substantially the same as that here presented, has been passed by the legislature of Ohio.

A BILL to provide for obtaining and publishing reports of banks, savings institutions, and trust companies organized under State laws.

Be it enacted, That each and every banking institution, organized under the laws of this State, shall make a report to the auditor of state, showing the condition thereof before the commencement of business on the first Monday in the months of January, April, July, and October of each year.

April, July, and October of each year. SEC. 2. That the auditor of state shall issue his requisition upon all banking institutions, for the reports required to be made by section 1 of this act, a convenient number of days prior to the first day of January, April, July, and October, in each year, and each banking institution shall, upon receipt thereof, immediately forward to the auditor a balanced report of its condition, verified by the oath or affirmation of one or more of the officers of such institution, and shall also publish such report in full at its own expense, in a newspaper issued at the place where the institution is located, or, if there be no newspaper in that place, then in the one nearest thereto; and any banking institution neglecting to make and transmit to the auditor of state, and publish, such reports, shall, after the expiration of five days from the receipt of the requisition therefor, be subject to a penalty of thirty dollars for each day's delay, which penalty may be collected by suit to be brought by the auditor of state, or by any creditor of the association, before any court of competent jurisdiction in the district wherein such banking institution is located; and all sums of money collected for penalties under this section shall be paid into the treasury of the State.

SEC. 3. That banks, trust companies, savings banks, and other banking institu-

tions, having capital stock, shall report their resources and liabilities in the following form:

#### PRIVATE BANKERS.

The first official information relating to the private bankers of the country published by this office was contained in a table in the Comptroller's report for 1880. The law requiring private bankers to make returns for taxation purposes having been repealed, it is now impossible to obtain authentic information with reference to them. A table will be found in the appendix giving information on this subject for the six months ending November 30, 1882, being the last semi-annual period for which they were required to make returns of the amount of their deposits, &c., for taxation, and also similar information for preceding years.

#### TAXATION.

The law imposing a tax upon the capital and deposits of national banks, State banks, and private bankers was repealed by the act of March 3, 1883.

The only United States tax now paid by the national banks is the semiannual duty of one-half of 1 per cent. upon the average amount of their notes in circulation during the preceding six months. The prohibitory tax of 10 per cent. upon State bank circulation paid out, as provided by section 3412 of the Revised Statutes, is also still in force.

Section 5173 of the Revised Statutes provides that the expenses of the Bureau of the Comptroller of the Currency, including those of the plates and dies used for the printing of national bank notes and of the printing of such notes, shall be paid out of the proceeds of the tax on circulation.

The act of June 20, 1874, provides for the redemption of national-bank notes in the office of the Treasurer of the United States, and that the cost of such redemptions shall be paid by the banks, and that the cost of the plates for printing, up to that time paid out of the proceeds of the tax on circulation, shall thereafter be paid from the proceeds of an assessment upon the banks. Section 6 of the act of July 12, 1882, for extending the corporate existence of national banking associations, provides that the cost of engraving plates for the issue of circulation of new design, required by the section, should also be paid by the banks. It was the evident intention of the enactors of the original banking law that all the expenses which were incurred by the Government in preparing circulation to be issued to national associations, as well as the expenses of carrying on the Bureau of the Comptroller of the Currency and enforcing the restrictions of the national banking laws, should be defrayed from the tax on circulation. As has been seen, this principle was changed by the act of June 20, 1874, which, without abolishing the tax on circula tion, imposed on the banks the expense of the redemption of their notes and of the printing of their plates, and that this course was followed in the act of July 12, 1882. In lieu of this additional expense, however, the act of June 20, 1874, abolished the requirement of keeping in bank a reserve of legal-tender notes and specie for the redemption of circulation. As has been suggested elsewhere in the report, the abolishment of the tax on circulation would be a ready and simple way of avoiding the contraction of national-bank circulation, now constantly going on, on account of the small profit to the banks in keeping up their issues, and if abolished the expenses of the Bureau of the Comptroller of the Currency could be paid by a pro rata assessment on the banks, as is now done in the case of the expenses of the redemption of their notes by the Treasurer of the United States, and in the case of the expense of preparing plates for printing the notes.

The total expense of the office of the Comptroller of the Currency from its organization to June 30, 1884, was \$5,840,923.99, and the ex-

pense for the year ending on that date \$230,224.92. The tax on circulation for the year ending on the same date was \$3,024,668.24. The total taxes collected from the national banks to the end of the present fiscal year are shown in the following table:

Years.	On circulation.	On deposits.	On capital.	Total.

The shares of national banks are still subject to State taxation, and in previous reports tables exhibiting the average rates paid by national banks in the several States and Territories have been given, for purposes of comparison and to show the total burden of taxation heretofore borne by the national banks.

The national banks having been relieved of the United States tax on deposits, it has been thought unnecessary to continue the collection of information in reference to State taxation, which can only be obtained from separate returns to be made by each bank to this office. Complaints are from time to time received indicating that in some States there is an unfavorable discrimination made in the taxation of national banks, as compared with that of State institutions doing business of a

# 182

similar character. The United States Supreme Court has, however, in several instances shown that when cases of discrimination are properly brought to its attention it will sustain the Federal law. It is, moreover, doubtful whether Congress, by any law short of one taking from the States the right to tax national bank shares, could prevent occasional instances of discrimination in assessments, but it is believed that in most of the States the intention is to place the taxation of national banks on the same footing with other institutions doing a similar business.

#### UNITED STATES LEGAL-TENDER NOTES AND NATIONAL-BANK CIR-CULATION.

The acts of February 25, 1862, July 11, 1862, and March 3, 1863, each authorized the issue of 150 millions dollars of legal-tender notes, making an aggregate of 450 millions of dollars.

On February 3, 1864, the amount of such notes outstanding was \$449,479,222, which was the highest amount outstanding at any one time. The act of June 30, 1864, provided that the total amount of United States notes issued, or to be issued, should not exceed 400 millions of dollars, and such additional sum, not exceeding 50 millions, as might be temporarily required for the redemption of temporary loans.

By the act of June 20, 1874, the maximum amount was fixed at 382 millions. Section 3, act of January 14, 1875, authorized an increase of the circulation of national banks in accordance with existing law, without respect to the limit previously existing, and required the Secretary of the Treasury to retire legal tender notes to an amount equal to 80 per cent. of the national bank notes thereafter issued, until the amount of such legal-tender notes outstanding should be 300 millions and no, more. Under the operations of this act \$35,318,984 of legaltender notes were retired, leaving the amount in circulation on May 31, 1878, the date of the repeal of the act, \$346,681,016, which is the amount now outstanding.

In the following table are given the amount and kinds of the outstanding currency of the United States and of the national banks on January 1 of each year from 1866 to 1884, and on November 1, 1884, to which is prefixed the amount on August 31, 1865, when the public debt reached its maximum:

\*Includes \$534,079 notes of gold banks, and omits \$552,041 mutilated currency.

The act of June 20, 1874, provided that any national banking association might withdraw its circulating notes upon the deposit of lawful money with the Treasurer of the United States in sums of not less than \$9,000. Under this act and on account of liquidating and insolvent banks, and under the act of July 12, 1882, which provides for a deposit of lawful money to retire the circulation of national banks whose corporate existence has been extended, \$213,047,258 of lawful money has been deposited with the Treasurer. This includes \$2,583,720 for the redemption of the notes of national gold banks, and \$4,135,470 for the redemption of national-bank notes under section 6 of the act of July 12, 1882. Since June 20, 1874, \$175,150,769 of bank notes have been redeemed, destroyed, and retired. This includes \$2,129,641 of the notes of national gold banks and \$1,000,307 of the notes of national banks whose corporate existence has been extended under the act of July 12, 1882.

In the following table<sup>\*</sup> are shown, by States, the amount of circulation issued and retired during the year ending November 1, 1884, and the total amount issued and retired since June 20, 1874:

\*In this table gold notes are excluded.

The amount of circulation issued to national banks for the year ending November 1, 1884, was \$10,371,694, including \$3,866,230 issued to banks organized during the year. The amount retired during the year was \$28,670,198, and the decrease for the same period was, therefore, \$18,298,504,\* and the total outstanding on November 1 was \$333,025,734.†

During the year ending November 1, 1884, lawful money to the amount of \$33,689,476 was deposited with the Treasurer to retire circulation, of which amount \$2,153,506 was deposited by banks in liquidation, \$27,445,500 by banks reducing circulation under the act of June 20, 1874, and \$4,090,470 by banks retiring circulation under the act of July 12, 1882.

The amount previously deposited under the acts of June 20, 1874, and July 12, 1882, was \$139,832,692; by banks in liquidation, \$51,186,180, making a total of \$224,708,348. Deducting from the total the amount of circulating notes redeemed and destroyed without reissue (\$183,452,264), there remained in the hands of the Treasurer on November 1, 1884, \$41,256,084 of lawful money for the redemption and retirement of bank circulation.

The portion of lawful money on deposit by insolvent banks, by banks in voluntary liquidation, and by banks reducing or retiring their circulation on the first of each of the last five months, was as follows:

•	July 1.	August 1.	Septem- ber 1.	October 1.	Novem- ber 1.

\* Does not include \$534,079 on deposit to retire notes of gold banks.

## DENOMINATIONS OF PAPER CIRCULATION OF THE UNITED STATES, THE IMPERIAL BANK OF GERMANY, THE BANK OF FRANCE, AND THE BANK OF ENGLAND.

In accordance with the law, no national bank notes of a less denomination than five dollars have been issued since January 1, 1879, when the amount outstanding was \$7,718,747. Since that date the amount, of ones and twos issued by the banks has been reduced \$6,934,538, leaving the amount outstanding \$784,209, and during the same period the legal-tender notes of these denominations have been increased \$13,249,202. The total increase of the amount of ones and twos outstanding in national-bank and legal-tender notes is \$6,314,664.

\* Lawful money has been deposited during the year to retire \$5,872,172 additional circulation which has not yet been presented for redemption. Therefore the actual reduction of circulation during the year has been \$24,170,676, as shown on page 14. † Omits \$534,079 gold notes and includes \$552,041 mutilated currency.

# REPORT ON THE FINANCES.

The following table exhibits by denominations the amount of nationalbank and legal-tender notes outstanding on October 31, 1884, and the aggregate amounts of both kinds of notes at the same periods in 1882 and 1883:

		1884.	1883.	1882.	
Denominations.	National- bank notes.	Legal-tender notes.	Aggregate.	Aggregate.	Aggregate.

Deduct for legal-tender notes destroyed in Chicago fire		-1, 000, 000	-1, 000, 000		
Total	*332, 473, 693	346, 681, 016	679, 154, 709	697, 460, 452	707, 681, 96

\* Exclusive of \$552,041 due to banks for mutilated notes destroyed and to be replaced by new notes and of \$534,079 notes of gold banks.

The amount of one and two dollar notes outstanding is slightly less than one fourth of 1 per cent. of the whole circulation of the banks; the fives constitute 25.7 per cent.; the tens 33.5 per cent.; the twenties 23.8 per cent., and the fifties and larger notes 16.8 per cent. of the entire circulation.

Of the entire amount of national-bank and legal-teuder notes outstanding nearly 8 per cent. consists of one and two dollar notes; nearly 30.6 per cent. of ones, twos, and fives; 58.6 per cent. is in notes of a less denomination than \$20, and about 78.5 per cent. is in notes of a lower denomination than \$50. Of the entire issue about 21.6 per cent. is in denominations of fifties, one hundreds, five hundreds, and one thousands.

There are outstanding twenty-one legal-tender notes of the denomination of \$5,000 and six notes of the denomination of \$10,000.

# 186

## COMPTROLLER OF THE CURRENCY.

The circulation of the Imperial Bank of Germany on January 1, 1883, was \$207,782,594, showing a decrease of \$7,853,959 during the following year; on January 1, 1879, the circulation was \$165,933,942, showing an increase during the five years preceding January 1, 1884, of \$33,994,693.

The following table\* gives the circulation of the Bank of France and its branches, with the number of notes and the denominations, in francs and in dollars, on January 31, 1884:

Number of notes.	Denominations (francs).	Value of each note in dollars.	Amount in francs.	Amount in dollars (franc=20 cents).
$\begin{array}{c} 5\\ 1, 311, 255\\ 629, 368\\ 2, 676\\ 12, 230, 116\\ 6, 141, 815\\ 21, 693\\ 169, 378\\ 170, 539\\ 1, 204\end{array}$	5,000 1,000 200 100 50 25 20 5 Forms out of date.	1,0002001004020105.41	$\begin{array}{c} & 25,000\\ 1,311,255,000\\ 314,684,000\\ 535,200\\ 1,223,011,600\\ 307,090,750\\ 542,325\\ 3,387,560\\ 852,695\\ 420,406\end{array}$	$\begin{array}{c} 5,000\\ 262,251,000\\ 62,936,800\\ 107,040\\ 244,602,320\\ 61,418,150\\ 108,465\\ 677,512\\ 170,539\\ 84,081\end{array}$
20; 678, 049			3, 161, 804, 536	632, 360, 907

The amount of circulation of the Bank of France on January 25, 1883, was 2,899,528,130 francs, or, say \$579,905,626, showing an increase of 262,276,406 francs, or \$52,455,281, between that time and January 31, 1884, the date of the foregoing table, and since January 30, 1879, an increase of 870,833,706 francs, or \$174,166,741.

It will be seen that the Imperial Bank of Germany has in circulation no notes of a less denomination than seven dollars and a half (ten thaler), and issues none of less than twenty-five dollars (one hundred marks), and that the Bank of France issues but little over a million of dollars in value of notes of a less denomination than ten dollars. The Bank of England issues no notes of less than £5, or twenty-five dollars, and the Irish and Scotch banks none of less than £1, or five dollars.

#### **REDEMPTION.**

Since the passage of the act of June 20, 1874, section 3 of which requires the banks at all times to keep on deposit in the Treasury 5 per centum of their circulation as a redemption fund, that fund as a rule has been maintained, and circulating notes of the banks have been promptly redeemed at the Treasury without expense to the Government.

From the passage of the act of June 20, 1874, to November 1, 1884, there was received at the redemption agency of the Treasury \$1,448,485,411 of national-bank currency for redemption. During the year the receipts amounted to \$136,577,732, of which amount \$63,926,000, or nearly 47 per cent. was received from banks in the city of New York, and \$21,800,000, or about 16 per cent. from banks in the city of Boston. The amount received from Philadelphia was \$6,888,000; from Chicago, \$5,490,000; from Cincinnati, \$1,903,000; from Saint Louis, \$1,136,000; from Baltimore, \$3,229,000; from Providence, \$1,852,000; and from Pittsburgh, \$798,000.

The following table exhibits the amount of national-bank notes received monthly for redemption by the Comptroller of the Currency during the year ending October 31, 1884, and the amount received during

<sup>\*</sup> London Bankers' Magazine, August, 1884, page 829.

## REPORT ON THE FINANCES.

The amount of notes fit for circulation returned by the redemption agency to the banks of issue during the year was \$33,080,300, being an increase over last year of \$12,295,200.

The total amount received by the Comptroller of the Currency for destruction from the agency and from the banks direct, was \$71,192,954. Of this amount \$6,399,030 were'the issues of banks in the city of New York, \$9,169,340 of banks in Boston, \$3,052,990 of Philadelphia, \$3,052,-900 of Providence, \$1,949,550 of Baltimore, \$1,724,000 of Pittsburgh, \$1,184,500 of Cincinnati, \$767,100 of Louisville, \$443,200 of Albany, \$478,000 of New Orleans, and of each of the other principal cities less than \$400,000.

The following table exhibits the number and amounts of nationalbank notes of each denomination, which have been issued and redeemed since the organization of the system, and the number and amount outstanding on November 1, 1884:

	1. A.	Number.			Amount.	
Denominations.	Issued.	Redeemed.	Outstand- ing.	Issued.	Redeemed.	Outstand- ing.

During the year ending October 31, 1884	93, 178, 418
Additional amount of insolvent and liquidating national banks	43, 289, 045

#### 

#### APPENDIX.\*

Tables will be found in the Appendix exhibiting the reserve of the national banks as shown by their reports from October 1, 1878, to September 30, 1884; the reserve by States and principal cities for September 30, 1884; and in the States and Territories, in New York City, and, in other reserve cities, separately, at three dates in each year from 1881 to 1884.

Special attention is called to the synopsis of judicial decisions contained in the Appendix, to the numerous and carefully prepared tables in both report and Appendix, and to the index of subjects and list of tables to be found on page 255. At the end of the full volume is an alphabetical list of the cities and villages in which the national banks are situated.

The Comptroller, in concluding this report, desires to gratefully acknowledge the industry and efficiency of the officers and clerks associated with him in the discharge of official duties, many of whom, in addition to attending to their regular duties, have been compelled, owing to the growth of the national banking system, the extension of the corporate existence of national associations, and the financial troubles of the year, to perform a large amount of extra work, without regard to office hours.

# HENRY W. CANNON, Comptroller of the Currency.

## Hon. J. G. CARLISLE, Speaker House of Representatives.

\* The appendix, which is omitted for want of space, will be found in the bound volumes of the Comptroller's report.

# REPORT OF THE DIRECTOR OF THE MINT.

191

# REPORT

# THE DIRECTOR OF THE MINT.

# TREASURY DEPARTMENT, BUREAU OF THE MINT, Washington, D. C., October 14, 1884.

SIR: I have the honor to submit my sixth annual report, being the twelfth annual report of the Director of the Mint since the creation of this Bureau, showing the operations of the mints and assay offices of the United States, and the business of this Office, during the fiscal year ended June 30, 1884.

The amount of gold and silver received for coinage or manufacture into bars varied but slightly from that deposited during the previous year. The coinage of silver was about the same, but a greater proportion than heretofore was coined at the Philadelphia and New Orleans Mints. The San Francisco Mint was principally engaged in the coinage of gold bullion.

The Philadelphia Mint was chiefly occupied with the coinage of silver and minor coins, and this occasioned a reduced coinage of gold—only \$2,777,154—although the mint had on hand during the year over \$25,000,000 of gold bullion.

The amount of gold and silver parted and refined was considerably greater at the New York Assay Office and Philadelphia Mint, but, on account, probably, of the reduced production, was less at the San Francisco Mint than in the previous year.

## DEPOSITS AND PURCHASES.

The deposits of gold amounted to \$46,326,678.66, of which \$29,079,596.33 consisted of gold bullion of domestic production, and \$6,023,734.45 of foreign bullion; \$9,095,461.45 of foreign, and \$263,117.17 of United States coin, and \$1,864,769.26 of jewelry, old plate, &c.

The silver purchased for coinage and contained in bullion deposits amounted at its coining value to \$36,520,290.36, of which \$31,463,113.88 consisted of bullion of domestic production; \$2,524,742.53 of foreign bullion; \$1,984,365.62 of foreign and \$152,031.20 of United States coin, and \$396,037.13 of plate, jewelry, &c.

In addition to these several amounts received, fine and unparted bars prepared at these institutions, were redeposited as follows:

Gold:	
Fine bars	<b>\$1,382,778 81</b>
Unparted bars	2,647,310 96
Silver:	,,
Fine bars	1 029 887 29
Unparted bars	48 907 64
	40,207 04
5022 r - 13	193

The total value of the gold and silver received in deposits and purchases was \$82,846,969.02, and, including redeposits, \$87,955,153.92.

Nearly all of the gold and two thirds of the silver of domestic production came to the mints and assay offices, which also received of foreign bullion and coin imports an aggregate in gold of \$15,119,195.90 out of \$19,006,355 imported during the year, and, in silver, \$4,509,108.15 out of \$13,908,763.

The net imports, less re exports, of foreign coin during the year were, in gold, \$8,223,431, and, in silver, \$372,557, and the deposits at the mints and assay offices of foreign coin amounted to \$9,095,461.45 gold, and \$1,984,365.62 silver, and exceeded the net imports by \$872,030.45 gold, and \$1,611,808.62 silver, the former being probably brought by immigrants upon their persons, and the latter by railroad and not reported to the custom house.

#### COINAGE.

The coinage of gold was about eight millions less than in the previous year. This was caused in part by the diminished receipt of gold bullion at the San Francisco Mint, where the deposits of gold of domestic production fell off three and a half, and the total deposits of gold about three millions of dollars; and in part by a lessened coinage of gold at Philadelphia, which mint was principally occupied in manufacturing silver and minor coins.

The character of the coinage executed during the year was as follows:

Description.	 Pieces.	Value.
、 		-i

Of the total coinage \$23,765,900 were in double-eagles, \$2,033,040 in eagles, and \$2,116,020 in half-eagles. In silver \$28,099,930 were in standard dollars, \$665,160.30 in dimes, \$4,465 in half-dollars, and \$3,832.50 in quarter-dollars.

For the reasons stated in my last report a large portion of the silver dollar coinage was executed at the Philadelphia and New Orleans Mints, which coined 22,135,930 dollars, while the coinage of this denomination at the San Francisco and Carson Mints amounted only to 5,964,000 dollars.

In order to satisfy the demand for dimes on the Pacific coast, the superintendent of the San Francisco Mint was authorized to purchase bullion for the coinage of dimes, and during the year 500,000 pieces were struck.

The demand for bronze cents continued about the same as during the previous year, and 40,571,962 pieces, of the nominal value of \$405,719.62, were issued from the Philadelphia Mint; while the coinage of five-cent pieces was much less than in the previous year, being 15,374,905 pieces, of the nominal value of \$768,745.25.

## HAWAIIAN COINAGE.

Application having been made by the Hawaiian Government for the coinage at the San Francisco Mint of one million dollars in silver of denominations to correspond with the coins of the United States in weight and fineness, regulations of the 9th of November, 1883, were prescribed by the Secretary of the Treasury as required by the act of January 29, 1874.

The coinage applied for having been authorized by the Secretary of the Treasury, the Director, with his approval, fixed the charges for coining the number of pieces specified, and the charges having been paid, the coinage was commenced on the 17th of November, 1883.

The dies prepared for the purpose and furnished by the agent of the Hawaiian Government were, upon completion of the coinage in June, 1884, forwarded to and remain in the possession of the Director of the Mint.

The application specified the coinage of a piece of the value of oneeighth of a dollar, but this was subsequently changed to a piece of ten cents.

The total coinage, in pieces and value, was as follows:

Denomination.	Pieces.	Value.
Dollars	. 700,000	\$500,000 350,000 125,000 25,000
Total		

## BARS.

Besides the manufacture of coin, gold bars of the value of \$23,875,585.57, and silver bars of the value of \$7,639,724.42—a total of \$31,515,309.99—were prepared at the mints and assay offices.

The bars manufactured in the last fiscal year exceeded in value those of the previous year by \$5,195,502.63. The increase was occasioned by a greater demand for these bars at the New York Assay Office, which prepared during and held at the beginning and close of the year bars containing gold and silver at standard fineness as follows:

Date, &c.	Fine.	Mint.	Standard.	Sterling.	Total.
July 1, 1883 Manufactured Add reclassified Deduct reclassified		Stand. ozs. 1, 019, 821. 937 307, 869. 103 495, 715, 871	Stand. ozs. 12, 876. 284 74, 655. 883 215, 722, 602	Stand. ozs. 77, 066. 236 32, 961. 346 251, 282. 926	Stand. ozs. 1, 385, 613. 758 1, 122, 914. 308

# REPORT ON THE FINANCES.

#### GOLD BARS EXCHANGED FOR COIN.

Gold bars were paid out in exchange for gold coin during the year, at the Philadelphia Mint, to the value of \$3\$1,269.71, and at the New York Assay Office to the value of \$25,419,530.15, a total of \$25,800,799.86. Of the bars thus exchanged \$22,966,975.44 worth were paid out at

New York to exporters for shipment to Europe, and \$2,833,\$24.42 worth were delivered for use in manufactures, arts, and ornamentation.

# PARTING AND REFINING.

The work of the mints and New York Assay Office in separating gold and silver, and refining bullion, increased from that in the preceding year, the increased receipts of bullion to be parted or refined being over 400,000 ounces, containing nearly \$3,000,000 of gold and \$400,000 in silver. The number of gross ounces of bullion refined or parted in the acid refineries and the ounces at standard fineness and values of the gold and silver resulting from those operations are shown in the following table:

OUNCES.

Mint or assay office.	Gross.	Standard gold.	Standard silver.

Total	25, 003, 328 71	13, 681, 746 79	38, 685, 075 50

#### DIES AND MEDALS.

Fewer dies for coinage were prepared at the Philadelphia Mint than in the previous year, a less number being required for striking subsidiary silver and minor coins. The total number of dies manufactured for medals and coinage was 1,520, of which 132 were for the gold, 388 for the silver, and 958 for the minor coinage; 36 for proof and experimental coins, and 6 for medals. Sixty coinage dies were prepared for the New Orleans Mint, 49 for Carson, 160 for San Francisco, and 1,209 for Philadelphia.

The number of medals struck at the Philadelphia Mint during the year aggregated 10,777; of which 97 were of gold, 524 of silver, 777 of bronze, and of goloid from planchets furnished for the "Toronto semi-centennial," 10,000.

During the same period 3,992 medals and 4,118 proof sets were sold, and the receipts from this source amounted to \$12,410.48.

#### SILVER PURCHASES AND COINAGE.

The silver bullion belonging to the Government available for the coinage of standard silver dollars on hand at the coinage mints July 1, 1883, amounted to 3,936,880.10 ounces, of standard fineness, and cost \$3,918,793.05. During the year 24,358,835.02 standard ounces, at a cost of \$24,378,383.91, were purchased and delivered at the several mints, as follows:

•	Mint at which delivered.	Standard ounces.	Cost.
San Francisco New Orleans		4, 117, 383. 29	\$1,602,821 80 4,102,719 47 7,853,507 11 819,335 53.
Total		24, 358, 835. 02	24, 378, 383 91

The average cost of silver per ounce of standard fineness purchased during the year was \$1.00080, and per ounce fine \$1.11200. The average London price for silver 925 fine (British standard) during the year was 50.791 pence, equivalent with sterling exchange at par (\$4.8665) to \$1.11339 per ounce 1,000 fine. The average New York price during the year was \$1.1156. Of the silver on hand, and purchased during the year, 24,148,377.35 standard ounces, costing \$24,133,257.34, were used in the coinage of silver dollars, and contained, in sweeps sold, 33,967.51 ounces, costing \$34,023.10, and 36,184.10 standard ounces, costing \$36,-292.23, wasted by the operative officers, leaving a balance of silver bullion available for the silver dollar coinage on hand June 30, 1884, of 4,077,186.16 standard ounces, costing \$4,093,604.29. The amount purchased during the year averaged monthly \$2,031,531.99 worth.

### SUBSIDIARY COINAGE.

On the 1st of July, 1883, the Philadelphia Mint had on hand of bullion resulting from the melting of uncurrent silver coins transferred for recoinage, and of silver transferred prior to July 1, 1883, from the New York Assay Office and purchased for the coinage of fractional silver, 19,160.09 ounces, costing \$22,465.35.

19,160.09 ounces, costing \$22,465.35. The superintendent of the mint at Philadelphia, with the approval of the Director, purchased in open market, for the coinage of dimes, for which the demand continued from the Treasury and the public, 333,446.29 standard ounces, at a cost of \$333,288.06; and purchased from the New York Assay Office during the year, for such coinage, 188,546.16 standard ounces, costing \$219,399.16; making the total amount at the Philadelphia Mint available during the year for the fractional coinage 541,152.54 standard ounces, costing \$575,152.57, of which 501,104.21 standard ounces, costing \$530,659.34, were consumed at that mint in the coinage of dimes.

The Secretary of the Treasury having requested, under date of December 1, 1883, the coinage at the San Francisco Mint of \$50,000 in dimes, the superintendent of that mint, with the approval of the Director, purchased 41,199.01 standard ounces, at a cost of \$41,157.81. Of this amount 40,187.50 ounces of silver bullion, at standard fineness, costing \$40,147.31, were used in coining dimes.

Upon the bullion purchased for this coinage the deductions for charges were equal to 764.46 ounces, costing \$763.70, which amount was transferred and carried into the accounts of the Mint as a purchase for the

# REPORT ON THE FINANCES.

silver-dollar coinage. The balance, 247.05 standard ounces, costing \$246.80, was also subsequently transferred in the accounts and purchased for the silver-dollar coinage, closing the account of silver purchased during the year at the San Francisco Mint for the fractional coinage.

The total of silver bullion on hand at the mints June 30, 1884, belonging to the Government, excluding amount due depositors, was as follows:

Purpose.	Standard ounces.	Cost.
For standard dollar coinage For subsidiary silver coinage	4, 077, 186. 16 40, 048. 33	\$4, 093, 604 29 44, 493 23
Total	4, 117, 234. 49	4, 138, 097 52

### PROFITS ON SILVER COINAGE AND THEIR DISPOSITION.

The balance remaining in the coinage mints to the credit of the silverprofit fund on the 1st of July, 1883, was \$1,278,596.59; the profits on the coinage of silver dollars during the year were \$3,966,672.66; and on subsidiary silver coined at Philadelphia and San Francisco, \$102,651.15; making the total to the credit of the silver-profit fund during the year \$5,347,920.40. Of this amount \$26,667.04 were paid for wastage and loss on sale of sweeps, properly payable from silver profits, and \$57,824.45for expenses incurred in distributing the coins, and \$3,485,984.21 were deposited in the Treasury of the United States, leaving the balance in the coinage mints to the credit of this fund on the 30th of June, 1884, \$1,777,444.70. This balance has been deposited in the Treasury by the several mints as follows:

Mint.	Date of deposit.	Amount.
Philadelphia	August 25, 1884 July 26, 1884 August 25, 1884	78, 311 81 334, 903-44 317, 891 08
Total		\$1, 777, 444 70

The profits on the coinage of silver on hand at the coinage mints on the 1st of July, 1878, amounted to \$424,725.47; the profits on the coinage from that date to the 30th of June, 1884, amounted to \$20,972,913.52. Adding to these two amounts the sum of \$9,237.54, refunded by Adams Express Company for overcharges, and the sum of \$4,560.30, carried to the credit of silver profits on account of surplus bullion and adjustments of silver values, makes a grand total of silver profits to be accounted for during the period of \$21,411,436.83. Of this amount \$416,223.52were paid for expenses in distributing the coin, \$150,070.77 for loss on silver in sweeps sold and for silver wasted by the operative officers; making the net profits \$20,845,142.54, all of which have been deposited in the Treasury, \$19,067,697.84 prior to and \$1,777,444.70 since the 30th of June, 1884.

## DISTRIBUTION UNDER SECTION 3527, REVISED STATUTES.

The following statement shows in detail the silver dollars on hand at the several coinage mints July 1, 1883, and coined during the year, and the balance on hand June 30, 1884, which, deducted from the former,

# 198

gives the aggregate amount exchanged and paid out by the mints during the year \$17,303,586.

AMOUNT of SILVER DOLLARS REPORTED by the COINAGE MINTS on HAND June 30, 1883, COINED during the year, and on hand at the close of the fiscal year ended June 30, 1884.

# CIRCULATION OF SILVER DOLLARS.

The total circulation of silver dollars from the passage of the act of February 28, 1878, to the commencement, middle, and close of the fiscal year 1884, and to the 1st of October, 1884, as appears from the records of the mints, and the amount held in the Treasury, as reported by the Treasurer, and balance in general circulation for those periods, respectively, are shown by the following statement:

COMPARATIVE STATEMENT of the COINAGE, MOVEMENT, and CIRCULATION of STANDARD SILVER DOLLARS at the end of each six months from July 1, 1883, to July 1, 1884, and for the three months ending October 1, 1884.

Period.	Total coin- age.	Held for payment of certificates outstanding.	Held in ex- cess of cer- tificates outstanding.	Total.	In circula- tion.
July 1, 1883. January 1, 1884. July 1, 1884. October 1, 1884.	\$147, 255, 899 161, 425, 119 175, 355, 829 182, 380, 829	\$72, 620, 686 96, 717, 721 96, 427, 011 96, 491, 251	\$39, 293, 333 22, 731, 664 39, 133, 905 45, 567, 536	\$111, 914, 019 119, 449, 385 135, 560, 916 142, 058, 787	\$35, 341, 880 41, 975, 734 39, 794, 913 40, 322, 042

The foregoing statement shows that from July 1, 1883, to October 1, 1884, the increase in the total coinage of silver dollars was \$35,124,930, in the amount held by the Treasury \$30,144,768, and in the total circulation outside of the Treasury only \$4,980,162.

REVIEW OF THE OPERATIONS OF THE MINTS AND ASSAY OFFICES.

In the appendix will be found comparative summaries of the work of each of the mints, and of the New York Assay Office, for the last and the previous fiscal year, and of the other assay offices for the fiscal year 1884, which indicate the character, amount, and degree of accuracy of the operations at these institutions, respectively, during the periods named. The deliveries of bullion by depositors to the superintendents of the coinage mints and the New York Assay Office and transfers to and receipts from the operative officers of gold and silver bullion during the year, involving the weighing, handling, assaying, and working of more than three hundred and fifty millions of dollars of bullion, have been accomplished without any discrepancies in the accounts of the officers, without loss to the Government, and with general satisfaction to the public.

In the appendix also will be found a table showing the value of the precious metals wasted by the operative officers at the coinage mints, in the business of the year, and the loss arising from the sale of gold and silver bullion contained in sweeps at a price less than the assay value, and the manner in which the wastage was paid or reimbursed in the accounts. The value of the gold and silver wasted at the mints during the year was \$40,601.48, while gold and silver of the value of \$60,364.24 was returned by the melter and refiners of the mints and the New York Assay Office in excess of the amounts with which they were charged during the year, and bullion of the value of \$8,521.45 was obtained from the sweepings of the deposit-melting and weigh rooms of the institutions named; making a total gain of \$68,885.69, or an actual excess over and above the amount wasted by the operative officers in the business of the year of \$28,284.21.

From this it will be seen that although the law contemplates a loss in the operations on bullion and makes provision for its allowance, if *bona fide* and within the prescribed limits, the business has been so carefully and honestly conducted that instead of a net loss there has been a profit in the operations on bullion.

This is highly creditable to the officers in charge of the different branches of work in the various institutions, as well as to the workmen engaged in these delicate and responsible operations.

# APPROPRIATIONS, EARNINGS, AND EXPENDITURES.

The amount appropriated for the support of the mints and assay offices for the fiscal year ended June 30, 1884, was \$1,191,650 or about \$7,000 less than the preceding year. Uf this amount there was expended at the various institutions the sum of \$1,154,660.80, and in addition thereto there was expended from the appropriation contained in the act directing the coinage of the standard silver dollar \$136,054.78on account of the mints and \$1,261.96 at the Treasury Department, the latter being principally for cablegrams giving daily London price of silver. The total expenses of the service amounted, therefore, to \$1,291,977.54, about \$30,000 less than the amount expended in 1883.

The following table exhibits the appropriations for the support of the several institutions and the amounts expended to each:

#### APPROPRIATIONS, 1884.

Institution.	Salaries.	Wages.	Contingent.	Coinage of the standard silver dollar, act of Feb- ruary 28, 1878 (indefinite).	Total.
Philadelphia Mint San Francisco Mint Carson Mint New Orleans Mint Denver Mint New York Assay Office Helena Assay Office Boisé Assay Office		\$293,000 00 242,000 00 54,000 00 74,000 00 12,000 00 25,000 00 12,000 00	100,000 00 70,000 00 25,000 00 35,000 00 6,000 00 10,000 00 8,000 00 5,000 00 5,000 00		$\begin{array}{c} 108,55000\\ 140,95000\\ 28,95000\\ 74,25000\\ 27,95000\\ 8,00000 \end{array}$

Total	212, 226 28	699, 501 20	242, 933 32	136, 054 78	1, 290, 715 58

EXPENDITURES, 1884.

\* Includes \$229.91 expended from reimbursements by Hawaiian Government for coinage dies. † Includes \$173.35 from reimbursements for materials used.

In the appendix will be found the annual table of earnings and expenditures, showing the earnings, profits, and gains from all sources under their appropriate titles, and all expenditures and losses of every kind incurred during the year. The total amount earned was \$5,433,-102.64, and the total expenditures and losses of all kinds amounted to \$1,676,002.73.

#### REFINERY EARNINGS AND EXPENDITURES.

The amount collected at the various mints and the New York Assay Office of depositors and sellers of bullion during the fiscal year, as charges for parting, refining, and toughening bullion, amounted to \$268,489.33. These charges are by law required to be used in paying the expenses of the operations, for which purpose the sum of \$247,798.79 was expended at the institutions named during the year.

The following statement shows the amount collected and expended for this purpose at each institution:

Institutions.	Charges col- lected.	Expenditures.
Philadelphia Mint San Francisco Mint Carson Mint New Orleans Mint New York Assay Office	16, 630 97 738 63	\$10, 309 27 132, 579 53 21, 803 33 34 77 83, 071 89
Total	268, 489-33	247, 798 79

The balance remaining in the Treasury of the United States at the close of the fiscal year 1884 to the credit of the parting and refining appropriation, being the excess of the charges collected for those operations over the expenditures from the 1st of July, 1876, to June 30, 1884, was \$182,484.83.

## PHILADELPHIA MINT.

The deposits and purchases of gold and silver bullion at this mint during the fiscal year 1884 amounted to \$16,802,750.40, being an increase over the previous year of nearly a million and a half.

The coinage of gold continued to fall off, being about \$5,000,000 less than in 1883, but the coinage of silver was \$1,500,000 more. The minor coinage executed was about the same as in the prior year.

In the melter and refiner's and coiner's departments about 3,000,000 more ounces of silver were treated than in 1883. The amount of gold

bullion operated was considerably less than in the prior year, being scarcely two-thirds. The ratio of wastage was about the same.

In preparing ingots, the melter and refiner operated upon 538,576.550 ounces of gold, making 109 melts, of which 6 were condemned, and 25,227,322 ounces of silver, making 8,281 melts, of which 47 were condemned.

The coiner received 538,576.550 ounces of gold ingots, of which he delivered in coin 27.8 per cent., and 25,047,074 ounces of silver, of which he delivered 47.2 per cent. in coin.

#### SAN FRANCISCO MINT.

On account of the declining production and import of gold on the Pacific coast, and the diminished purchase of silver bullion, in consequence of the accumulation of silver coin at San Francisco, the deposits and purchases of bullion, as well as the coinage of both gold and silver, and amount of bullion refined, were considerably less than in the previous year. The deposits and purchases in the fiscal year 1884 were 330,458,125.14, as against 335,328,140.74 in 1883. The number of pieces struck in 1884 was only 62,550 less in gold and 100,000 less in silver, including Hawaiian coinage, than in 1883; but the value of the gold coinage was 3,216,500 less, and of silver, including the coinage for the Hawaiian Government, 1,500,000 less, and 562,985 less ounces of bullion were received and operated upon at the refinery.

The melter and refiner again returned on settlement a surplus of gold bullion valued at \$15,896.89. His silver wastage was again heavy, amounting to 16,309 ounces of standard bullion, and but 264 ounces less than that of the previous year.

Upon careful examination to ascertain the cause of this wastage it seemed probable that it was occasioned by the greater proportional deposit of base silver bullion, upon which insufficient deductions had been made. To cover the unavoidable loss in refining such bullion instructions were given to increase the deductions on low-grade and refractory silver bullion.

The coinage authorized for the Hawaiian Government, of one million dollars in silver coius was executed in a satisfactory manner and completed before the close of the fiscal year.

#### CARSON MINT.

The gold deposits, coinage, and work at this mint varied but little from that of the previous year. A steady supply of silver has been purchased, mostly in lots of less than 10,000 ounces, and the silver coinage has averaged about \$100,000 per month.

During the year the melter and refiner made 56 melts of gold ingots, of which 6 were condemned, and 1,187 melts of silver ingots, of which 28 were condemned. The coiner operated upon 172,920.20 standard ounces of gold, and produced 86,654 standard ounces of coin, or 50.11 per cent., and upon 2,194,569.80 standard ounces of silver, and produced 1,000,312 standard ounces of coin, an average of 45.58 per cent.

#### MINT AT NEW ORLEANS.

No gold was coined at this mint during the year.

Standard silver dollars were struck of the value of \$8,905,000, being an increase of \$865,000 over their coinage in the previous fiscal year. The melter and refiner operated on 15,457,500.70 standard ounces of silver, and made 1,818 melts, of which 10 were condemned.

The coiner operated on 15,128,638.30 standard ounces of silver ingots, from which were produced and delivered to the superintendent 50.5 per cent. in silver dollars.

# NEW YORK ASSAY OFFICE.

The deposits of gold bullion at this institution during the year amounted to \$20,270,958.31, and of silver to \$6,297,114.84; a total of \$26,568,073.15. The deposits of gold exceeded those of the prior year by something over \$3,000,000, while the deposits of silver were about the same. Gold bars were manufactured for depositors of the value of \$20,891,428.98, and silver bars \$6,300,639.42. The gold bars manufactured exceeded in value those manufactured during the prior year by nearly \$5,000,000.

The melter and refiner has maintained the high reputation of his department. The surplus of gold and silver returned at the last annual settlement exceeded that of any previous year.

#### OTHER ASSAY OFFICES.

The deposits of gold at these institutions and also the bars manufactured, exceeded by a half million dollars those of the previous year.

The charges and other earnings were about \$4,000 more than in 1883, while the expenses were increased less than \$3,000.

## EXAMINATIONS OF MINTS AND ASSAY OFFICES.

During or after the close of the fiscal year all of the mints and assay offices were officially visited by myself or representatives, and the methods of keeping the accounts and conducting the operations were examined.

The amount of moneys and bullion called for by the books was found upon actual count to be in the possession of the officers or satisfactorily accounted for.

At the close of the year the operative officers at the coinage mints and the New York Assay Office delivered under the supervision of the representatives of this office all the gold and silver in their possession to the several superintendents, and in no case was the deficiency in excess of the legal allowance for wastage. After the deliveries in settlement were completed the amount of coin and bullion in the hands of the superintendents was counted or weighed.

#### ANNUAL ASSAY.

The commissioners appointed under the provisions of section 3547 Revised Statutes for the purpose of making the annual trial of the coins reserved at the several mints, met at Philadelphia on the 13th of February last. They tested the weight and fineness of the coins taken from deliveries made by the coiners to the superintendents in each month of the year. The committee on weighing reported "that all the coins weighed are within the limits of exactness required by law, and that in fact very few vary from the standard by one-half the tolerance." The committee on assaying reported the greatest excess in the assay value of the gold coinage above the standard at the different mints to be as stated in the following table (the limit of tolerance being one-thousandth):

At Philadelphia At San Francisco At New Orleans	
At Carson	
The greatest deficiency below the standing one-thousandth):	dard (the limit of tolerance be-
At Philadelphia   At San Francisco   At New Orleans   At Carson

At San Francisco	• · • • • • • • • • • • • • • • • • • •	<b></b> . <b></b>	1.1 of .001
At New Orleans	· • • · · · · · · • • • • • · · ·		1.1 of .001
At Carson			

The assay committee also assayed the inquartation silver, the copper, and the lead used in assaying gold bullion, and found them free from gold. The weights employed were carefully tested and found to be correct. The reagents were also examined with perfectly satisfactory results; whereupon the commission reported:

That the assay commission having examined and tested the reserved coins of the several mints for the year 1883, and it appearing that these coins are within the tolerance prescribed by law, the trial is considered and reported as satisfactory.

The proceedings of the annual assay commission show that the average fineness of 315 gold coins from the mints of Philadelphia, San Francisco, and Carson melted in mass, was 900 and of 49 single pieces 899.5. The assays made monthly in the assay laboratory of this Office gave an average for 40 pieces of 899.68.

The commission ascertained that the average fineness of 960 silver dollars of all the mints melted in mass was 900.6, and 70 single pieces taken from each month's coinage at each mint, 900.3.

The monthly tests made at the assay laboratory of 597 silver dollars gave an average fineness of 899.85.

The assays made by the commissioners and those made by the assayer of this Bureau show that the coinage for the year was close to the standard of fineness. Tables of the annual and monthly assays appear in the appendix.

# MONETARY STATISTICS.

#### ESTIMATION OF THE VALUES OF FOREIGN COINS.

By section 3564 of the Revised Statutes it is made the duty of the Director of the Mint to estimate annually the values of the standard coins in circulation of the various nations of the world. For the purpose of ascertaining the circulation and the weight and fineness of the standard coins of foreign countries inquiries are annually made through representatives of the United States in regard to the coinage and movement of the precious metals and the amount and character of the circulating medium. Upon the basis of such and other information the estimation required by law has been made.

In the estimation of the values proclaimed by the Secretary of the Treasury on the 1st of January, 1884, no changes were made in the values of foreign gold coins. The price of silver bullion having declined, a corresponding reduction was made in the value of the coins of those countries where silver coins are the standard of value, and whose currency is upon a silver basis.

For the reason stated, the value of the Austrian florin was reduced in the circular of January 1, 1884, from 40.1 to 39.8 cents; the boliviano of Bolivia from 81.2 to 80.6 cents; the peso of Ecuador and United States of Colombia and the sol of Peru from 81.2 to 80.6 cents; the rupee of India from 38.6 to 38.3 cents; the yen of Japan from 87.6 to 86.9 cents; the dollar of Mexico from 88.2 to 87.5 cents; the rouble of Russia from 65 to 64.5 cents, and the mahbub of Tripoli from 73.3 to 72.7 cents.

## PRODUCTION OF GOLD AND SILVER IN THE UNITED STATES.

Inquiries to ascertain the production of the precious metals in the United States (for the expense attending which an appropriation is made by Congress for this Office) were continued as heretofore, and the facts collected and my conclusions as to the amount obtained from the mines of the United States during the year 1883 were submitted and published in a special report.

To estimate with any degree of accuracy the production of gold and silver it is necessary to ascertain the movement, consumption, or other disposition of the precious metals, and it seems, therefore, proper also to present succinctly the facts obtained in regard to the monetary condition of the country, and its metallic circulation, connected with the production, coinage, and circulation of the precious metals.

From my last special report the production of the several States and Territories in 1883 appears to have been as follows:

State or Territory.	Gold.	Silver.	Total.	
Alaska   Arizona   Callifornia   Co orado   Dakota   Georgia   Idaho   Montana   Nevada   New Mexico   North Carolina   Oregon   South Carolina	$\begin{array}{c} 950,000\\ 14,120,000\\ 4,100,000\\ 3,200,000\\ 199,000\\ 1,400,000\\ 1,800,000\\ 2,520,000\\ 280,000\\ 167,000\\ 660,000\\ 56,500\end{array}$	\$5,200,000 1,460,000 17,370,000 150,000 2,100,000 6,000,000 5,430,000 2,845,000 3,000 2,000 5,000	\$300,000 6,150,000 15,580,000 21,470,000 3,500,000 7,800,000 7,800,000 7,800,000 7,950,000 3,125,000 170,000 680,000 57,000	
Ūtah Virginia. Washington Wyoming Other (Alabama, Tennessee, &c.) Total.	140,000 6,000 80,000 4,000	5, 620, 000 500 46, 200, 000	5, 760, 00 6, 00 80, 50 4, 00 17, 50 76, 200, 00	

This is a decline from the production of the previous year, in gold of two million five hundred thousand, and in silver of six hundred thousand, and much more than I had anticipated in estimating in my last annual report the probable production of the year. It resulted chiefly from the interruption of hydraulic gold mining in California in many localities by mandate of the courts, at the instance of the owners of agricultural lands damaged by the deposit of *débris* and sediment in the valleys and on the bottom lands adjacent to the streams in the lower counties, and from the diminished yield of silver from some of the most productive mines of Arizona and Utah.

A comparison of the receipts of gold and silver at the mints and exports of domestic silver during the first eight months of the calendar years 1883 and 1884 indicates a decline in the yield of the mines of the United States during the present year of about \$1,000,000 in gold and a probable increase of \$2,000,000 in silver; for while the deposits of domestic gold for the first eight months in 1883 were \$20,265,384.34, for the corresponding period in 1884 they amounted to only \$19,584,511.64, a decline of \$680,872.70. During the same time the deposits and purchases of domestic silver varied but slightly, but the exports of domestic silver were about \$1,500,000 greater in 1884 than in 1883. On the other hand the reported production of thirty silver mines, as published in the mining journals, shows a diminished yield of over a million of dollars.

It seems probable that the full returns of production at the close of the year will show a production by the mines of the United States of \$29,000,000 of gold and of silver at its standard dollar coining rate of nearly \$48,000,000.

### CONSUMPTION OF GOLD AND SILVER IN UNITED STATES.

For the purpose of obtaining more complete information in regard to the use of the precious metals in the arts and ornamentation, circular letters to the number of 7,969 were again sent to all persons and firms in the United States whose address could be obtained reported to be using and consuming the precious metals for industrial purposes.

To these letters 5,418 replies were received, which showed the con-sumption by 2,734 persons and firms engaged in the manufacturing or the repair of articles of ornamentation and use of nearly \$14,500,000 worth of gold, and over \$5,500,000 worth of silver, a total of over \$20,000,000. This is an increase of \$7,000,000 over that reported in 1882, when, however, less than half as many persons and firms reported. The Superintendent of the United States Assay Office at New York states that the value of the bars furnished presumably for use in the arts and manufactures during the fiscal year 1883 was, gold, \$4,615,118; silver, \$5,205,996; total \$9,821,114. The value of the bullion, consisting of stamped United States or refinery bars, reported by manufacturers to have been used, was of gold \$7,137,761, and of silver \$4,552,172. This would indicate an increased use of gold and silver in ornamentation and for industrial purposes, especially in United States gold coin and of United States or refinery bars, as reports show over seven millions of stamped United States or refinery bars used by the manufacturers. It would seem probable that six millions of this is gold bullion of domestic production, and that four and a half millions of the silver produced in the United States during the last calendar year were appropriated for use in the arts.

#### CIRCULATION OF THE UNITED STATES.

Upon the basis of the annual gains by coinage and import of coin, less the losses by recoinage, export, and consumption in the arts, I estimated in my last annual report the coin circulation of the United States at the close of the last fiscal year to have been about \$765,000,000, of which \$537,000,000 was gold, and \$228,000,000 silver. Upon the same basis I estimate the coin circulation on the first of July, 1884, to have been \$802,000,000, of which \$250,000,000 was silver, and nearly \$552,000,000 gold.

In arriving at these figures I have deducted from the silver circulation six million out of the seven millions of trade dollars heretofore estimated to constitute a part of the silver circulation, and \$4,875,000 gold coin reported to have been used in the arts, which exceeds the similar deduction for 1883 by \$2,375,000.

The net gain to the coin circulation was \$14,000,000 in gold and \$22,000,000 in silver, as appears from the following table giving the exact figures of the gains and losses during the year:

United States coin.	Gold.	Silver.	Total.	
Circulation July 1, 1883 Year's coinage	\$537 254, 794 27, 932, 824	\$228, 216, 199 28, 773, 388	\$765, <b>470, 993</b> 56, 706, 212	
Total	565, 187, 618	256, 989, 587	822, 177, 205	
Less net exports Deposits for recoinage Used in the arts Trade dollars withdrawn from circulation	263, 117 4, 875, <b>0</b> 00	4, 199 152, 031 216, 000 6, 000, 000	8, <b>421</b> , 258 415, 148 5, 091, 000 6, 000, 000	
Total loss Circulation July 1, 1884 Net gain during the year	001, 002, 442	6, 372, 230 250, 617, 357 22, 401, 158	19, 927, 406 802, 249, 799 36, 778, 806	

This circulation, from the statements of the Treasurer and Comptroller of the Currency for the periods nearest to the 1st of July, would appear to have been owned on July 1, 1884, as follows:

		•	Total United		
Belonging to—	Gold.	Legal tender.	Subsidiary.	Total.	States gold and silver coins.
Treasury	*\$89, 190, 346 197, 682, 848 130, 000, 000 334, 759, 248	*\$39, 133, 905 †8, 978, 833 } 127, 243, 091	\$29, 600, 720 13, 000, 000 42, 660, 808	\$68, 734, 625 11, 978, 833 169, 903, 899	\$157, 924, 971 109, 661, 681 534, 663, 147
Total	551 632, 442	175, 355, 829	75, 261, 528	250, 617, 357	802, 249, 799

\* Less outstanding certificates. † Includes Treasury and clearing-house certificates. ‡ Estimated.

In computing the above table I have deducted from the coin in the Treasury and added to that in banks and the hands of private parties the amount of the gold and silver certificates outstanding, for the payment of which the law requires a corresponding amount of coin to be held in the Treasury.

The coinage from July 1 to October 1 was, of gold \$6,876,299, and

silver \$7,097,000. The deposits of United States coin at the mints and assay offices were, gold \$69,180 and silver \$271,550, making the net gain from coinage, less recoinage, \$6,807,119 gold and \$6,825,450 silver.

The net imports of United States gold coin were \$368,880, and the net export of silver coins \$193,100. Estimating the consumption in the arts at \$1,220,000 gold and \$50,000 silver, one fourth of the amount reported for the previous year, leaves the circulation of United States coin on the 1st of October instant gold \$557,500,000 and silver \$257,000,000, a total of \$814,500,000, as appears from the following tabular statement:

Items.	Gold.	Silver.	Total.
Circulation July 1, 1884 Coinage (less recoinage) to October 1, 1884 Net imports	\$551, 632, 442 6, 807, 119 368, 880	\$250, 617, 357 6, 825, 450	\$802, 249, 799 13, 632, 569 368, 880
Total	558, 808, 441	257, 442, 807	816, 251, 248
Less used in the arts and manufactures Net exports		50,000 193,100	1, 270, 000 193, 100
Total	1, 220, 000	243, 100	1, 463, 100
Circulation October 1, 1884	557, 588, 441	257, 199, 707	814, 788, 148

#### GAIN in COIN from JULY 1 to OCTOBER 1, 1884.

This does not include the bullion in the Treasury belonging to the Government and held for coinage, which amounted on the 1st of October to \$52,950,000 of gold and \$4,935,000 of silver bullion, which may be properly considered a portion of the Treasury reserve, andwould make the total amount of coin and bullion available for coinage at that date, gold \$610,500,000 and silver \$262,000,000, being a total of \$872,500,000.

The following table, compiled from the published statements of the Treasurer of the United States and the Comptroller of the Currency, so far as relates to the money in the Treasury and in national banks, shows the character and possession of the circulating medium of the United States on the 1st of July 1884:

	In Treasury.	In national banks.	In other banks and general circulation.	Total.
Gold bullion	\$44, 193, 050			\$44, 193, 050
Silver bullion	4, 950, 785			
Gold coin	160, 336, 986	\$71, 045, 738	\$320, 249, 718	551, 632, 442
Silver dollars	135, 560, 916	6, 117, 333	33, 677, 080	175, 355, 829
Fractional silver coin	29, 600, 720	*3, 000, 000	42, 660, 808	75, 261, 528

Fractional currency	7, 027	473, 046	6, 499, 988	6, 980, 061
Total	474, 273, 975	210, 438, 634	1, 078, 555, 436	1, 763, 268, 045

STATE of CIRCULATION JULY 1, 1884.

# \* Estimated.

# $\mathbf{208}$

From the 1st of July to the 1st of October an increased amount of gold and silver coin and gold and silver certificates was in circulation as well as held by the Treasury as shown by the following statement:

STATE of TOTAL UNITED STATES CIRCULATION OCTOBER 1, 1884.

	In Treasury.	In banks and general cir- culation.	Total.
Gold bullion Silver bullion Gold coin Silver dollars. Fractional silver coin Gold certificates. Silver certificates. Silver certificates. United States notes National bank notes. Fractional currency.	4, 934, 404 164, 957, 455 142, 058, 787 29, 474, 160 33, 546, 960 26, 769, 470 36, 524, 872 11, 078, 957	\$392, 630, 986 40, 322, 042 45, 344, 718 87, 389, 660 96, 491, 251 310, 214, 484 324, 750, 271 6, 970, 155	\$52, 946, 587 4, 934, 404 537, 588, 441 182, 380, 829 74, 518, 873 120, 936, 620 123, 260, 721 346, 739, 356 335, 829, 228 6, 977, 260
Total	502, 298, 757	1, 304, 113, 567	1, 806, 412, 324

Assuming the amount of paper and specie in the national banks to have been the same October 1 as on June 22, the amount held by the public and banks, other than national, on October 1, 1884, was about \$1,094,000,000, or over \$15,000,000 more than on July 1, 1884.

#### CIRCULATION OF FOREIGN COUNTRIES.

In the appendix to this report will be found the official dispatches<sup>\*</sup> in answer to inquiries submitted at your request for the use of this Office in ascertaining the character and standards of the circulation of the various countries of the world, but I have thought it desirable to present a brief summary of the more important information furnished in regard to each country.

#### GREAT BRITAIN AND COLONIES.

Great Britain and Ireland.—Under date of March 21, 1884, Minister Lowell forwards replies by the English Government to the inquiries in reference to the coinage, currency, &c., of that Kingdom during the year 1883:

Description.	Value.	Value in United States money.
Gold coinage	£1, 403, 713 1, 274, 328	\$6, 831, 169 <b>31</b> 6, 201, 517 21

\* This matter is omitted for want of space, but it may be found in the separate volumes of the Director's report.

5022 F—14

## REPORT ON THE FINANCES.

In arriving at the amount of gold in circulation in Great Britain and Ireland I have added to my estimate of last year, \$587,683,000, the net imports of gold into Great Britain, namely, £1,175,000, and deducted the amount probably consumed in the arts and manufactures, estimated by Mr. Giffen to be £2,000,000 annually, which leaves a net loss of £825,000, say \$4,000,000, making the circulation \$583,500,000.

Canada.—Consul General Stearns forwards from Montreal, under date of January 17, 1884, a report on the coinage, production, &c., of the Dominion of Canada for 1882:

Imports:	
Gold	
Silver	880,000
Exports: Gold	476, 192
Production: Gold	954.000
In treasury December 31, 1882 (gold coin)	2,471,148
'In banks December 31, 1882 (gold coin)	6,551,761
In circulation:	
Government notes	16, 115, 084
Bank notes	36,501,695
	. ,

#### FRANCE.

Hon. L. P. Morton, United States minister, forwards, under date of April 24, 1884, a statement furnished by the French minister of finance relative to the imports, production, &c., of that Republic for 1883:

Coin and bullion.	Im	ports.	Exports.	
Gold coin. Gold bullion Silver coin. Silver bullion	Francs. 37, 134, 275 26, 208, 198 61, 037, 506 23, 828, 906	\$7, 166, 915 08 5, 058, 182 21 11, 780, 238 66 4, 598, 978 86	Francs. 89, 371, 277 45, 459, 652 82, 092, 954 18, 953, 006	\$17, 248, 656 46 8, 773, 712 84 15, 843, 940 12 3, 657, 930 16

Notes of the Bank of France in circulation	2, 946, 774, 450	568, 727, 468 85

In my report of last year I estimated the circulation of France to have been, gold, \$\$73,000,000; silver, full legal tender, \$540,000,000; silver, limited tender, \$57,900,000. The gold must be reduced by the net loss from exports, \$14,000,000, and the probable amount consumed in the arts, \$11,000,000, a total of \$25,000,000, which would make the circulation of gold \$\$48,000,000, and the silver \$3,000,000 loss from exports, which would place the silver circulation of that country at \$537,000,000.

# 210

#### SWITZERLAND.

M. J. Cramer, United States minister, forwards, under date of March 5, 1884, information relative to the production, consumption, &c., of the precious metals in that Republic during the calendar year 1883. Coinage, gold, 5,000,000 francs (\$965,000).

1883.		Imports.		Exports.	
Silver		909	\$49, 845 00 37, 784 40 87, 629 40	Kilograms. 19 242 261	\$12, 627 <b>40</b> 10, 059 21 22, 686 61

Circulation.	۸.,	
Description.	Value.	Valuein United States money.
In Treasury December 31, 1883: Gold Silver In banks:	Francs. 402, 000 244, 000	\$77, 586 47, 092
Gold	39, 401, 000 24, 021, 000 117, 551, 000	7, 604, 393 4, 636, 053 22, 687, 343

#### BELGIUM.

Minister Fish, under dates of March 10 and July 4, 1884, forwards information from the minister of foreign affairs relative to the monetary affairs in 1883. The imports and exports of gold and silver were:

1883.	Imports.		Exports.	
Gold Silver Total	Kilograms. 1, 062 401, 171 402, 233	\$705, 805 20 16, 675, 474 95 17, 381, 280 15		\$3, 265, 844 40 3, 457, 002 70 6, 722, 847 10

#### Coin in Banque Nationale December 31, 1883.

	 Coin.	Value.	Value in United States money.
Gold		Francs. 62, 296, 945 17, 313, 520	\$12, 023, 310 39 3, 341, 509 36

Legal-tender circulation (Banque Nationale notes exclusively) December 31, 1883 (payable at sight), 357,611,140 francs (\$69,018,950.02).

In arriving at my estimate of the circulation of gold and silver in Belgium I have deducted from my estimate of last year the loss by exports, \$2,560,000 gold, and \$1,500,000 as the amount used in the arts and ornamentation, leaving the circulation of gold \$64,000,000. - To silver I have added the excess of imports over exports, \$13,000,000, making the estimated silver full legal-tender circulation \$53,000,000.

#### SPAIN.

Mr. Dwight T. Reed, charge de affaires and consul-general at Madrid, transmits two papers from the minister of foreign affairs of the Kingdom of Spain, giving statistics of coinage and movement of precious metals, the first paper relative to the year 1881, and the other, of which a résumé is given, relating to 1883.

The coinage was:

	Description.	Value.	Value in United States money.
Gold (1883)		16.721.425	\$21, 067, 127 30 3, 080, 193 73 3, 227, 235 03 10, 523, 421 20

In Public Treasuries December 31, 1883.

# DIRECTOR OF THE MINT.

#### MEXICO.

A number of communications have been received from Minister Morgan, principally in relation to the loans of the Mexican Government. Under date of March 3, 1884, he forwards a dispatch from the department of foreign relations, containing data in regard to the production, coinage, &c., of Mexico for the fiscal year ending June 30, 1882.

Description.	Gold.	Silver.
Coinage Exports		\$24, 083, 921 28, 600, 854

Production, based on reports of mints and custom houses: Gold, \$955,639.23; silver, \$29,568,576.96.

#### HAYTI.

Minister Langston, under date of March 7, 1884, informs the Department of the particulars of a law passed by the Corps Legislatif of Hayti for the issue of 1,000,000 gourdes (\$965,000) of paper money, the redemption to take place inside of three years, guaranteed by 30 per cent. of the tax on imports, to be set aside annually for that purpose.

#### UNITED STATES OF COLOMBIA.

Hon. William L. Scruggs, minister resident at Bogota, forwards, under date of March 31, 1884, statistics of coinage, &c., of that Republic for the calendar year 1883. The coinage of silver was \$699,114. Imports of gold were \$4,340; of silver, \$346,320. Exports of gold and silver, \$2,400,083.

Production of the mines in 1882:

	· / {	\$3, 856, 000 760, 000
Total		4,616,000

Bank notes outstanding December 31, 1883, \$1,097,830.

#### SALVADOR.

Mr. Frank H. Titus, under date of October 22, 1883, forwards a paper from the minister of foreign affairs of the Republic of Salvador in relation to the production, imports, exports, and circulation of that Republic, and also of Honduras, for the year 1882.

#### Salvador.

The production of gold and silver	\$804,034
Imports (coined money)	313 194
Exports	920,235
National notes outstanding December 31, 1882	1,589,861
International Bank of Salvador, December 31, 1882	420,000

#### Honduras.

Silver coinage 1882 (in 10 and 50 cent pieces)	\$76, 314
Exports of silver bullion	42, 028 227, 955,
Total	269, 983

#### BOLIVIA.

Minister Gibbs, under date of February 20, 1884, forwards a very interesting paper in relation to the production, coinage, exports, &c., of that Republic. He gives the export of silver bars and metal in 1882, as 19,996,347 bolivianos (\$16,117.055.68).

The production of the mines he estimates at about 15,900,000 ounces of silver annually.

The silver coinage in 1882 was 2,090,404 bolivianos (\$1,684,865.62), and in 1883 about the same.

The national bank notes outstanding on the 31st December, 1883, were 1,871,629 bolivianos (\$1,508,532.97).

#### ARGENTINE REPUBLIC.

Minister Thomas O. Osborn, under date of August 7, of this year, forwards a reply to the interrogatories of the Department in relation to the coinage, production, &c., of that Republic during the calendar year 1883.

The coinage of gold was \$4,530,210, and of silver \$1,715,445. The imports were: gold, \$5,576,999; silver, \$836,684. Exports: gold, \$2,875,835; silver, \$2,506,704. The amount of gold and silver money in active circulation he estimates to be \$6,523,645.58, and in the banks \$14,196,461.24; a total of \$20,720,106.82. The issue of bank notes he reports as \$50,651,850.76.

#### VENEZUELA.

Hon. Jehu Baker, minister at Caracas, under date of December 31, 1883, furnishes replies to the interrogatories of the Department relative to the affairs of that Republic.

#### Circulation, December 31, 1883.

Description.	Value in bolivars.	Value in United States money.
Coin	11, 000, 000	\$2, 123, 000
Banks	2, 900, 000	559, 700

Gold production 1882 (exports), 125,548 ounces. Exports 1882, 3,011,730 bolivars (\$581,263.89). Population, 1881, 2,675,245.

BRAZIL.

In the absence of the Minister, Hon. Thomas A. Osborn, Mr. Charles B. Trail forwards, under date of June 6, 1884, information in relation to the monetary affairs of Brazil for 1883, obtained in part from official sources and in part from publications, &c.

Coinage from March 1, 1883, to February 29, 1884.

•	Description.	Value in milreis.	, Value in United States money.

#### CIRCULATION.

#### SANDWICH ISLANDS.

Hon. Rollin M. Daggett, United States minister at Honolulu, forwards, under date of February 15, 1884, an address from the chamber of commerce to the minister of finance, asking that no further introduction of Hawaiian silver be allowed, without a withdrawal of other silver coins, and also under date of February 27, 1884, a reply to the interrogatories of the Department relative to the monetary affairs of that Kingdom, as well as some valuable views in regard to the affairs of those islands.

Imported during 1883:

Gold coin	\$35,173 87
Silver coin	316, 564 85
Gold: In treasury December 31, 1883	263,450
In banks, December 31, 1883	95,250
<sup>0</sup> In circulation, December 31, 1883	191,300
Silver: In treasury, December 31, 1883	
In banks, December 31, 1883	
In circulation, December 31, 1883	500,500
Government notes in circulation, December 31, 1883	

On the 17th of last July, King Kalakaua approved an act which had passed the Legislative Assembly of the Hawaiian Islands, which provides that from and after December 1, 1884, the gold coins of the United. States shall be the standard of value in that Kingdom, and a legal tender at their nominal value for all debts, public and private; also that the silver coins of the United States shall be a legal tender to the extent of \$10. The act further provides that the gold and silver coins of countries other than the United States and Hawaii shall be received by the Government at their bullion value only.

The act also provides for changing the funds of the Government held in silver into United States gold.

#### MONETARY STATISTICS OF THE WORLD.

The foregoing information in reference to the circulation of the standard coins of the various nations of the world has been tabulated and used in revising the estimation of the amount and character of the total circulation of different countries and of the world, and the annual increase or loss by the production, coinage, or other disposition of the precious metals, and the results and conclusions are brought down to the latest dates attainable.

### PRODUCTION OF THE PRECIOUS METALS IN THE WORLD.

The table showing the amount of gold and silver obtained from the mines of different countries is presented for the year 1883 and revised for the last two preceding years. The production of twenty-one countries appears, from the official information in this and previous reports and other authorities cited, to have been, for the calendar year 1883, 141,479 kilograms of gold, valued at about ninety four millions of dollars, and 2,747,785 kilograms of silver, valued, at the coining rate of the standard dollar, at about one hundred and fourteen millions. This appears to be over four millions less in gold and a like amount greater in silver than the reported production in the previous year, and results chiefly from a diminished production of gold in Russia and the United States, and an increased production in silver of about five millions of dollars in Bolivia.

I have no late official information as to the production of gold in Russia in 1883, which is claimed by some to have largely fallen off from the yield of the previous year.

#### WORLD'S COINAGE.

Statements of the coinage in 1883 have been received from twentythree countries, which report the coinage of gold and silver coins valued, at the official estimation, at \$101,265,357 in gold and \$113,-769,901 in silver.

Of the silver coinage nearly one fourth was executed by the United States and two-fifths by Mexico and India. In each of the latter the silver coinage averaged about two millions of dollars per month. Next in order are Spain, Brazil, and then Great Britain, which alone issued from the London mint during the last year over \$6,000,000 of silver coin.

In the coinage of gold the United States still stands first, although it coined a much less amount than in the preceding year. Germany follows with a coinage of over twenty one millions; Australia, sixteen millions, and Russia over twelve millions.

## CIRCULATION OF THE PRINCIPAL COUNTRIES OF THE WORLD.

The information obtained as to the circulation of the various nations of the world has been tabulated and will be found in the appendix to this report. The circulation of the paper and specie of thirty-nine countries aggregates \$9,991,964,524, of which \$3,293,606,836 is gold and \$2,754,611,080 silver. This does not include the bronze, copper, nickel, or other minor token coinage in circulation.

Comparing the aggregate amounts of gold, silver, and paper circulation with those stated in previous reports, it will be found that the statistics show a decrease in gold and gain in silver and paper.

I have reduced the estimate of the gold circulation of Italy from \$160,000,000, the amount claimed to be in that country at the date it resumed specie payments, to \$140,000,000, the later estimate of Ottomar Haupt.

It is probable that not sufficient allowance is made for the yearly appropriation of gold to industrial uses, besides the wear of coins and waste in melting and handling bullion, for the net imports of gold into India during the year 1883 are stated to have amounted to 49,308,715 rupees (\$19,033,164), while only 174,945 rupees (\$67,529) were coined at the India mints, the remainder evidently being employed for other purposes, such as ornamentation, &c.

Adding to this the amount of coin and new gold used for similar purposes in the United States, \$13,000,000, in France, \$11,000,000, and Great Britain and Ireland, \$10,000,000, these four countries alone withdrew from the monetary stock of gold \$53,000,000.

In the table of Government and bank issues and metallic reserves, will be found columns showing for each country respectively, as far as ascertained, the character and amount of paper money issued in the countries named and the amounts of gold and silver held by the treasuries or banks. Against the Government issues of notes amounting to \$1,191,158,368, their treasuries held \$263,000,000 of gold and \$270,000,000 of silver, a total of \$533,000,000, and the banks, to protect \$2,752,498,039 of notes, held of gold and silver a total of \$1,424,000,000, being an aggregate of the bullion and coin reserves of \$1,959,000,000.

From these tables an additional table has been compiled, giving the per capita and total active circulation of each of the countries, which shows that after deducting the specie held in the banks and national treasuries, thirty-nine principal countries of the world had \$8,032,392,760 of paper and specie in active use among the people.

#### CONCLUSION.

In submitting this report I desire to acknowledge the valuable assistance of the officers in charge of the mints and assay offices, who have promptly forwarded reports and information in regard to the operations at their institutions, as well as the efficient aid of the clerks having charge of the principal divisions of the business pertaining to my office, and to commend their industry and faithfulness in the discharge of the duties assigned to them, and especially in the preparation and compilation of material for the annual and special reports.

I am, very respectfully,

# HORATIO C. BURCHARD,

Director.

Hon. WALTER Q. GRESHAM, Secretary of the Treasury.

#### **XXII.**—REGULATIONS PRESCRIBED by the SECRETARY of the TREASURY in RELATION to the EXECUTION of COINAGE for FOREIGN COUNTRIES at the MINTS of UNITED STATES.

Bullion or metal to be used in coinage authorized by the Secretary of the Treasury to be executed for any foreign Government shall be delivered to the Superintendent of the Mint where the coinage has been authorized, who shall ascertain the weight and fineness and give a special receipt therefor, stating the amount and the purpose for which received.

Accounts will be kept in the books of the Mint in such manner as the Director of the Mint may prescribe, showing the character, amount, value, and disposition of the bullion or metal thus received and of the coinage executed and of the transactions relating thereto with the agent of the foreign Government. The bullion or metal received shall be delivered to the operative officers, and ac-

counted for as in the case of bullion purchased or deposited for coinage.

The ingots will be prepared and the coin manufactured in the same manner as the coins of the United States, the fineness and weight being according to the standard prescribed by the foreign Government, and the tolerance for weight and fineness being the same as that fixed by its law.

The dies for the coinage shall be furnished by or at the expense of the Government applying for the coinage. The coinage shall be executed from time to time, but shall not interfere with the

necessary coinage of United States coins.

From each delivery of coin by the coiner the Superintendent shall take, without selection or weighing, two coins of each denomination and forward them to the Director of the Mint monthly for test and assay. Upon payment to the Superintendent of the Mint of the charges fixed by the Di-

rector of the Mint, with the approval of the Secretary of the Treasury, the Superintendent shall deliver from time to time to the agent of the Government the coins as struck, not exceeding the nominal sum for which the coinage has been authorized containing the same number of fine ounces of bullion or metal as were received for coinage.

Should bullion furnished for such coinage require refining or toughening, the charges will be imposed usually collected for those operations on similar bullion.

The moneys received in payment of the charge for executing such coinage will be deposited in the Treasury and applied to reinburse the appropriations from which the expenses incurred may appear to have been paid.

Any necessary instructions as to details for carrying into effect the foregoing regulations will be given by the Director of the Mint.

After the completion of the authorized coinage the dies furnished the Superintendent for its execution shall be forwarded by him to the Director of the Mint, who shall cause them to be defaced or returned to the Government for which the coinage was executed, if so requested by its official representative at Washington.

H. F. FRENCH, Acting Secretary of the Treasury.

#### **XXV.**—ASSAY of JAPANESE COINS.

### LEGATION OF JAPAN,

Washington, 28th of 8th month, seventeenth year of Meiji.

SIR: In compliance with the request of His Imperial Majesty's minister of finance I have the honor to transmit herewith several specimens of the gold and silver coinage of the Japanese mint for one year from the July of 1883 to the June of 1884, and beg that you will request the honorable the Secretary of the Treasury to add to the obligations under which he has already placed my Government by his courteous compliance with similar applications in the past, by directing that the same be assayed at the United States mint.

According to the letter of the assayer of the imperial mint, a copy of which I have the honor to inclose, the accompanying packet contains one five-yen gold piece of the pyx of 1883 and two of the pyx of 1884, and one cutting from a gold bar; also three one-yen silver pieces of the pyx of 1883, two of the pyx of 1884, and one specimen of silver yen granulation.

Accept, sir, the renewed assurance of my highest consideration. NAITO RUIJIRO.

Hon. FREDERICK T. FRELINGHUYSEN, Secretary of State.

LY at the MINT BUREAU-Continued.

THE IMPERIAL MINT, Assay Department, July 8, 1884.

DEAR SIR: Three five-yen and five silver yen coins selected this day by his excellency Matsukata Masayoshi, minister of finance, from the pyx pieces representing the coinage of the mint for the financial year 1883-'84 have been individually assayed by me. Ninety-six of the remaining five-yen coins were melted together and cast into a

bar; a cutting was taken from this bar and assayed.

Two hundred of silver yen coins were melted together, and a "dip" was taken from the molten metal and granulated and the granules were assayed. The results are as follows:

No. 1.	Gold five-yen coin, December 14, 1883	900. <b>0</b>
No. 2.	Gold five-yen coin, February 15, 1884	900.1
	Gold five-yen coin, May 28, 1884	
	Gold five-yen cutting from bar	
	Silver yen coin, July 28, 1883	
	Silver yen coin, August 22, 1883	
	Silver yen coin, December 20, 1883	
	Silver yen coin, February 27, 1884	
	Silver yen coin, May 28, 1884	
No. 6.	Silver yen dip, granulated	900.2

Each coin, dip, and cutting was divided into four parts; one part was assayed by me as above, and the other three parts were separately scaled up in your presence and delivered to you. In over, one deviation permitted by law. I have the honor to be, sir, your obedient servant, WILLIAM GOWLAND, F. C. S., delivered to you. In every case the fineness of the coins is within the limits of the

Associate of the Royal School of Mines.

The COMMISSIONER OF THE MINT.

# TREASURY DEPARTMENT, BUREAU OF THE MINT, Washington, D. C., October 1, 1884.

SIR: The following is the result of assays of the pyx coins sent from the imperial mint of Japan, handed me by you for assay. I also give the assay of the imperial mint of Japan':

Description.	Japanese mint assay.	United States mint assay.
GOLD. Five-yen coin, December 14, 1883 Five-yen coin, February 15, 1884 Five-yen coin, May 28, 1884 Five-yen cutting from bar	900. 1 900.	900. 4 900. 2 900. 2 900. 2 900. 1
SILVEB. Silver yen coin, July 28, 1883 Silver yen coin, August 22, 1883 Silver yen coin, December 20, 1883 Silver yen coin, Rebruary 27, 1884 Silver yen coin, May 28, 1884 Silver yen dip, granulated	900, 9 900, 3 900, 2	901. 3 900. 4 900. 4 901. 3 901. 9 901. 9 900. 3

Very respectfully,

W. P. LAWVER, Assayer Mint Bureau.

HOD. HORATIO C. BURCHARD, Director of the Mint.

The foregoing statement omits mention of a large amount of official work which does not admit of systematic classification and detailed report, and yet has occupied much time and care, such as, *e. g.*, investigation of legal points arising in the adjustment of accounts and the preparation of opinions and decisions printed under the authority of Congress; the examination of, and decision upon, applications for the issuing of duplicate bonds and other securities lost and destroyed; examination of powers of attorney for collection of money due to creditors of the United States; decisions upon the rights of persons claiming to be executors, administrators, or heirs of deceased claimants to receive money due from the United States; examination of official bonds; copying of letters forwarded; answering calls for information made by Congress, the Departments, and private persons; receiving and examining emolument **r**eturns, and other work of a miscellaneous character.

Folios copied ....

### ADDITIONAL CLERKS.

It is impossible with the present clerical force of this office to promptly transact the public business therein. I respectfully recommend that Congress be asked to appropriate for one additional clerk of class 4, two additional clerks of class 3, and two additional clerks of class 2. These will be required for at least one year.

In this office the work of the division of accounts settled by the Commissioner of the General Land Office is fully two years behind. The

12, 360

work in some other divisions is also in arrears. It is a great hardship and wrong to claimants that there should be any considerable delay in the settlement of their accounts. It may result also in loss to the Government.

### JURISDICTION TO REQUIRE STATEMENTS OF ACCOUNTS.

Section 236 of the Revised Statutes provides that—

"All claims and demands whatever by the United States or against them, and all accounts whatever in which the United States are concerned, either as debtors or as creditors, shall be settled and adjusted in the Department of the Treasury."

It may sometimes happen that the First Comptroller, in the examination of an account, or otherwise, will ascertain that some party is indebted to the United States against whom an account should be stated by an auditing officer, in order that a balance may be certified as due to the United States from such party. Thus, if a party having money due to him from the United States is surety on the bond of a defaulting officer, it is only just that an account should be stated against such officer and surety in order that a set-off may be made. In those cases in which the salary of any officer should be retained to meet his liability as surety on the bond of a defaulting officer, it becomes necessary that accounts be stated (McKnight v. United States, 98 U. S., 185; Pease's Case, 4 Lawrence, Compt. Dec., 502). The First Comptroller has no jurisdiction to settle an account until it has been stated by the proper auditing officer (15 Op. Att.-Gen., 139).

It is provided by section 271 of the Revised Statutes that-

"The First Comptroller, in every case where, in his opinion, further delays would be injurious to the United States, shall direct the First and Fifth Auditors of the Treasury forthwith to audit and settle any particular account which such officers may be authorized to audit and settle, and to report such settlement for revision and final decision by the First Comptroller."

This section, it is believed, should extend to all accounts over which the First Comptroller has jurisdiction. And, if any doubt exists as to its proper construction, which seems probable, it is respectfully suggested that said section should be so amended as to authorize the Comptroller to direct the proper auditing officer to state any account in favor of or against the United States which it may be lawful for him to state.

### AUTHORITY TO REQUIRE AND OBTAIN EVIDENCE.

In some instances it has been found that disbursing officers and others have, on request, neglected or refused to furnish the accounting officers with evidence in the possession of the former, essential to a proper adjustment of their accounts. The Revised Statutes contain certain provisions for obtaining evidence in relation to claims "against the United States" (Rev. Stat., 183–187). These provisions do not seem adequate to secure evidence, either in the classes of cases mentioned or as to claims in favor of the United States. Attention is called to this subject as one worthy of consideration, with a view of securing suitable legislation in relation thereto.

REPORTS UNDER SECTION 272 OF THE REVISED STATUTES.

Section 272 of the Revised Statutes provides that—

"The First Comptroller shall make an annual report to Congress of such officers as shall have failed to make settlement of their accounts for the preceding fiscal year, within the year, or within such further time as may have been prescribed by the Secretary of the Treasury for such settlement."

In my annual report for the fiscal year which ended June 30, 1881, I called attention to the fact that no report had ever been made under this section, and to the impracticable nature of the requirement thereof. If the reports required by it could be made, they would more frequently than otherwise present honest and efficient officers as apparently defaulters when not really so, and thus would do great injustice.

A resolution of the Senate, dated February 9, 1876, called on the Secretary of the Treasury for a detailed statement of balances due from public officers no longer in the public service, which had arisen since 1830. The Secretary made the statement, but the Senate did not order it to be printed (Congressional Record, Forty-fourth Congress, first session, pp. 4136-4164).

Section 272 of the Revised Statutes should, however, be complied with, if practicable. It is taken from section 13 of the act of March 3, 1817 (3 Stat., 368), providing "for the prompt settlement of public accounts," which enacted that—

"It shall be the duty of the First Comptroller to lay before Congress annually, during the first week of their session, a *list of such officers* as shall have failed *in that year* to make the settlement [of their accounts] required by law."

This does not seem to require any statement concerning those officers whose accounts have been settled, and against whom balances have been found.

Prior to the passage of this act there was but one Comptroller, and the accounts of all public officers passed through his office, so that he had the superintendence of the records showing all such officers whose accounts remained unsettled (act September 2, 1789, 1 Stat., 66; act February 20, 1792, 1 Stat., 234; act March 13, 1825, 4 Stat., 102). There was then no Commissioner of Customs, who is also a Comptroller (act March 3, 1849, 9 Stat., 396, sec. 12). The office of Auditor of the Treasury for the Post-Office Department was created by the act of July 2, 1836 (5 Stat., 81, sec. 8).

Among the difficulties of making the statement required by section 272 of the Revised Statutes are these : It is impossible for public officers "to make settlement of their accounts for the preceding fiscal year, within the year." Then, again, the First Comptroller does not now have the superintendence, by way of "adjustment and preservation," of all the public accounts subject to the revision of the Second Comptroller, the Commissioner of Customs, or the Auditor of the Treasury for the Post-Office Department (Rev. Stat., 269, par. second). If Congress shall be of the opinion that the First Comptroller must make the report required by section 272 of the Revised Statutes, it will be well to consider whether provision should not be made requiring the requisite information to be furnished to said officer. This seems advisable, at least, to remove all doubt as to the obligation to furnish such report. The Second Comptroller, the Commissioner of Customs, and the Auditor of the Treasury for the Post-Office Department, have recently been requested to furnish, if practicable, the information necessary to enable the First Comptroller to comply with the now impracticable requirement of section 272 of the Revised Statutes. And I have directed the chiefs of divisions in this office to prepare, so far as practicable, information on the same subject, so that the whole matter may be laid before Congress, if required, by either House, or by any committee thereof, or by the Secretary of the Treasury.

## REPORT ON THE FINANCES.

## ADDITIONAL PENAL PROVISIONS.

The accounting and other officers in the Treasury Department are respectively required to affix their signatures to a vast multitude of papers in the examination and allowance of claims, or for the purpose of making payments thereof. It is not possible for the officers so signing to personally examine all the papers relating to each claim. It is respectfully suggested that there should be proper penal legislation against persons guilty of fraudulently preparing, or being concerned in preparing, any unauthorized or illegal papers relating to claims, or of fraudulently attempting to procure an official signature thereto. An instance of this sort recently occurred in this office, in the division of public land accounts, in connection with a claim in favor of the State of Florida.

# EXTRA COMPENSATION AND PAY FOR EXTRA SERVICES.

Sections 1763, 1764, and 1765 of the Revised Statutes, and section 3 of the act of June 20, 1874 (18 Stat., 109) contain provisions which would seem designed to prohibit extra compensation, as also pay for extra services, to officers and employés in the public service who receive fixed salaries or compensation. So many different and conflicting coustructions have been given to these provisions, that it is believed to be important that Congress should re-enact them in such definite form as will leave no ground for doubt as to what the law is.

## DISTRICT OF COLUMBIA TEN PER CENT. GUARANTEE FUND.

The amount realized from the sale of the bonds, in which the ten per centum retained from contractors in the District of Columbia was invested as required by the Act of June 11, 1878 (20 Stat., 106), has exceeded the sum necessary to pay the amounts originally withheld, owing to the advance in the securities in which the investments were made.

The surplus has been covered into the Treasury as Miscellaneous Receipts on account of Proceeds of Sales of Guarantee Fund, District of Columbia (Rev. Stat., 3618). One half the amount originally retained was paid by the United States, and one half by the District of Columbia.

It is, therefore, recommended that Congress be advised to appropriate the surplus for expenses of the District (Guarantee-Fund Case, 5 Lawrence, Compt. Dec., 209, 231).

I respectfully renew the recommendations made in former reports, and again invite attention to what is said in my last annual report in relation to the Comptroller's decisions for 1880 and 1881.

I have the honor to be, very respectfully, WILLIAM LAWRENCE,

First Comptroller.

The Hon. HUGH MCCULLOCH. Secretary of the Treasury.

## OF

# THE SECOND COMPTROLLER OF THE TREASURY.

# TREASURY DEPARTMENT, SECOND COMPTROLLER'S OFFICE, Washington, D. C., October 31, 1884.

SIR: In compliance with the direction contained in your letter of the 13th ultimo, I have the honor to submit the following report of the transactions of this office during the fiscal year which ended on the 30th of June, 1884:

This report is condensed into two tabular statements. The first shows the total number of accounts, claims, and cases of every kind, settled and adjusted, and the amounts allowed thereon. The second statement furnishes a more detailed summary of the same accounts, claims, and cases, showing the character of the same, the source from which received, the number of each kind, and the several amounts allowed.

A still more detailed statement has been prepared and filed for preservation in this office, but it is deemed too voluminous for publication.

Official letters written and copied	1.670
Requisitions countersigned and recorded	13.275
Settlements recorded	
Differences recorded	
Clerks employed (average)	

A large amount of additional official work has been performed, which cannot be presented in tabular form, such, for example, as the investigation and decision of legal questions arising in the adjustment of accounts, and in many cases referred for decision from the several Departments that report to this office; decisions as to rights of heirs, executors, administrators, and other legal representatives of deceased claimants; questions arising on powers of attorney, and in contests of attorneys for claimants; answering calls for information from Congress, the Departments, and private persons. Many of these matters require and have received careful attention from the several chiefs of divisions, as well as from the Comptroller and his deputy.

All the public business intrusted to my charge during the year has been, I believe, promptly and properly actended to by the officers and clerks of the office, and has progressed with reasonable dispatch.

Very respectfully,

W. W. UPTON, Comptroller.

Hon. HUGH MCCULLOCH, Secretary of the Treasury. \$

Special attention is called to the following summary of official work performed on what is known as "Miscellaneous Desks" in this bureau. The total amount involved in these settlements during the fiscal year is \$1,470,087,686.44, and embraces a very large variety of accounts and claims against the Government.

An examination of the work performed by the several clerks in charge compels the conclusion that an additional division should be created to be known as "The Division of Miscellaneous Accounts," and the whole

### FIRST AUDITOR.

work to be supervised by a capable and efficient chief, whose duty will be to superintend this work and inspect the accounts before they are presented for signature of the Auditor.

It is for this reason that recommendation is made for an additional chief of division, who shall have charge of this class of accounts, affecting no less than 1,200 different appropriations.

### MISCELLANEOUS DESKS.

No. 1.—Comprising Accounts of Disbursing Clerks of the Departments for Salaries, Salary Accounts of the various Assistant Treasurers, and of the Congressional Library, Public Printer, and Executive Office, Accounts for Salaries of the Officers and Employés, House of Representatives, and the Accounts relating to the Coast Survey.

The foregoing exhibits of the official work of this bureau present, in a summary, much condensed, the varied and increasing labor of this office.

The change in appropriations made by Congress in recent years, requiring expenditures to be limited to amounts stated in each subdivision of stated service, has greatly increased the labor in the examination of accounts rendered thereunder,

The amount of clerical work performed during the last four years has been greater per capita than in former years, as shown by the records of the office, and this admonishes me that greater care and vigilance should be exerted in the supervision of the work. It is for this reason I would urge the creation of a new division in the office, to be known as the "Division of Miscellaneous Accounts," and request is made for an additional chief of division to have supervision of all miscellaneous work. This will provide for an additional inspection of accounts stated, before signature of the Auditor, and secure a more prompt adjustment of current accounts in the absence of clerks in charge of the various desks enumerated.

In response to the recommendation in my last report, asking for ten additional clerks for this bureau, an increase of four was authorized by Congress, which relieved somewhat the great pressure upon the force in adjustment of accounts; yet it is inadequate to the work required. It has become necessary to ask for detail of clerks from other offices to dispatch the pressing work waiting examination and audit in this Bureau.

SUMMARY STATEMENT OF WORK AS SHOWN BY THIS REPORT.

Attention is called to the following statement of the work of this bureau for the fiscal year:

Number of accounts examined and adjusted Number of certificates recorded	
Number of letters written	
Number of requisitions answered	1,109
Powers of attorney approved and filed	2,339
Total amount involved in settlements made embracing receipts	
aud disbursments of public moneys \$2, 307, 939	9, 433. 93

## CONDITION OF OFFICIAL WORK.

It is a pleasure to report that at no time within the last five years has the work of this office been in so satisfactory condition.

All current work has been kept well in hand, with no greater delay in the general work than is unavoidable in the settlement of large monthly and quarterly accounts, requiring much time in their examination and settlement.

The list of accounts awaiting adjustment has never been so small as at this writing, during the period mentioned, yet some accounts are necessarily held for explanation, completion of vouchers, &c., before final settlement can be properly made.

In conclusion, I take much pleasure in commending the Deputy Auditor, chiefs of division, clerks and employés of this bureau for intelligent and efficient services rendered.

I am, sir, very respectfully, your obedient servant,

R. M. REYNOLDS,

Hon. WALTER Q. GRESHAM, Secretary of the Treasury. Auditor.

# REPORT OF THE SECOND AUDITOR.

### REPORT OF

## THE SECOND AUDITOR OF THE TREASURY.

#### TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, Washington, October 10, 1884.

SIR: In accordance with section 283 of the Revised Statutes, and your request of the 15th ultimo, I have the honor to submit my report for the fiscal year ending June 30, 1884, showing the application of moneys appropriated for the War Department and the Indian service, the work performed in each division of the office during the year, and the condition of the public business assigned to me at the close of the year.

The following is a summary of the work performed in the bookkeep ers' division incidental to keeping the accounts of the office:

Requisitions registered, journalized, and posted, 4,909; settlements recorded, journalized, and posted, 3,670; settlements made in the division chiefly to adjust appropriations and close accounts, 164; statements of balances, &c., furnished to settling clerks, 2,368; certificates listed and indexed, 1,307; repay requisitions prepared for the War and Interior Departments, 514; appropriation warrants recorded and posted, 43; official bonds of disbursing officers entered, 61; certificates of nonindebtedness issued in cases of officers and enlisted men, 2,069; letters written, 795. The amount drawn from the Treasury on settlements made in this division was \$133,203.26, which included the following sums on Soldiers' Home account:

Withdrawn from the "permanent fund" of the Soldiers' Home and paid	•
to the treasurer of said Home, to meet current expenses (section 8, act	
March 3, 1875, 22 Stat., 565)	\$126,600 00
Interest on Soldiers' Home permanent fund (same act)	3,215 75
Effects of deceased soldiers, credited to the permanent fund	1,043 35

#### PAYMASTERS' DIVISION.

Number of accounts on hand July 1, 1883	*
Number of accounts audited and reported to the Second Comptroller	$\begin{array}{c}1,278\\654\end{array}$
Remaining on hand June 30, 1884	624

On July 1, 1883, seventy "longevity claims" remained unsettled; eighty have been received since that date, and one hundred and fortyfour have been disposed of, leaving six on hand. The record of deposits by enlisted men under the act of May 15, 1872, shows that 8,665 deposits were made, amounting to \$471,204.75, and that the sum of \$382,001.87, heretofore deposited, was repaid to the men on their discharge from the service. The service records of two hundred and four officers of the Army have been revised and corrected under the acts of June 18, 1878, and February 24, 1881.

The amount involved in 654 accounts, 144 claims, and 235 miscellaneous settlements was \$15,851,126.98, as follows:

Amount disbursed by paymasters, as per audited accounts	\$15.6	574.937	43
Amount of longevity claims allowed under the "Tyler decision"		21,301	
Amount certified to be due the Soldiers' Home on account of contri-		· .	
butions (12 <sup>1</sup> / <sub>2</sub> cents per month), fines and forfeitures by sentence of	· . ·		
courts-martial, &c		132, 145	76
Amount transferred to the books of the Third Auditor's Office, on account of subsistence and quartermaster's stores, transportation			
furnished soldiers on furlough, &c		7,458	46
Charges raised against officers for overpayments, double payments,

#### MISCELLANEOUS DIVISION.

Number of ordnance, medical, recruiting, and miscellaneous disbursing	
accounts on hand July 1, 1883	
Received during the year	
Number audited and reported to the Second Comptroller	
	~,044
Number on hand June 30, 1884	355

The amount of disbursements allowed was \$4,035,988.63, under the following appropriations:

	<b>\$2, 049, 18</b> 0 (	)2
Medical and hospital department, artificial limbs, Medical Museum and library, and other appropriations of the Medical Department	160, 970 5	54
Contingencies of the Army, publication of Official Records of the War of the Rebellion, expenses of military convicts, expenses of the command-		
ing-general's office, contingencies of the Adjutant-General's Depart-	117, 316 3	) <i>C</i>
ment, &c Expenses of recruiting, collecting, drilling, and organizing volunteers,		
bounties, and arrears of pay to colored soldiers, &c	306, 292 5	
Support of National Home for Disabled Volunteer Soldiers	1,402,229 1	-0
Total	4, 035, 988 6	33

The record of payments to officers of the Army from 1815 has been brought up to date, and a comprehensive index to the fifty-nine large volumes of which the record consists is now being prepared. The register of payments to officers of volunteers, in forty-eight volumes, is not quite completed, but is so far advanced as to be of very great service. The time of two clerks is occupied in furnishing statements of payments to officers whose claims are being settled in other divisions. Prior to October, 1883, the office had to depend upon the Paymaster-General of the Army for statements of this kind. The number of payments to officers (regular and volunteer) recorded during the year was 96,500, of which twenty-five were double payments made several years ago.

Letters written, 10,136; letters recorded, 1,468; clerks employed, 11.

#### INDIAN DIVISION.

The following is a summary of the work of this division since last report:

		Property accounts.	Claims.
On hand July 1, 1883	186	79	68
Received during the year	739	666	3, 108
Total	925	745	3, 176
Audited and reported to the Second Comptroller	728	538	3, 091
On hand June 30, 1884	197	207	85

The amount allowed by this office in the settlement of money accounts of Indian agents, special agents, inspectors, and other disbursing officers of the Indian service was \$2,579,821.83, and the amount certified to be due contractors and others for supplies furnished and services rendered was \$4,406,955.85, making the total disbursements \$6,986,777.68.

Forty-nine transcripts of disbursing officers' accounts have been prepared for suit. The balances in dispute amount to \$369,751.53 and consist almost entirely of items disallowed by the accounting officers in consequence of apparent infractions of law or regulations on the part of agents. Some of these balances have been standing on the books for several years, the limited force of the office precluding earlier action.

It is to be regretted that the force assigned to this division is not always available for its current work. The time of one of the best clerks has been occupied for several months upon an investigation of Cherokee Indian accounts under the treaty of 1835, while two others are engaged in preparing a report of Union Pacific Railroad settlements which will require months of patient examination. These labors are at the instance of the Court of Claims and are entirely foreign to the ordinary business of the division.

The Indian Division has to state accounts under no less than three hundred and twenty-four heads of current appropriations, besides a large number brought forward from previous years. The transactions concerned in these accounts are of the greatest possible variety, and it is scarcely necessary to say that the execution of the duties devolving upon the clerical force employed demands all the best qualities of skilled accountants as well as the sound judgment, general knowledge, and faithful industry required in the performance of work of other kinds.

The number of letters written was 3,592; 924 letters were recorded, and 22 clerks employed.

#### Examining branch.

The claims settled and allowed averaged not quite \$140.40 each, the total amount being \$506,698.70, which includes the following items: Payments under the "Tyler decision" to officers out of service, and to the legal representatives of deceased officers, \$21,644.22; payments of 33; per cent. additional compensation under the act of March 2, 1867, and decision of the Second Comptroller, November 25, 1881, \$35,924.73.

Ninety-six settlements were made under section 4,818 of the Revised Statutes in favor of the Soldiers' Home for \$208,732.70 unclaimed moneys belonging to the estates of deceased soldiers of the United States Army.

Letters written, 126,216; clerks employed, 64.

#### DIVISION FOR THE INVESTIGATION OF FRAUD.

On July 1, 1883, 6,533 cases remained on hand, 739 new cases were received during the year, 559 cases were disposed of, leaving 6,533 on hand for future action. Abstracts of material facts were made in 328 cases of illegal or erroneous payments, and 35 cases were prepared for suit and referred to the Department of Justice. The sum of \$4,564.60 was recovered by suit and otherwise; judgments for \$1,171.42 were obtained but have not yet been satisfied, and \$3,753.80 was returned to the Treasury through the Pay Department, in cases of colored soldiers and their heirs whose claims were certified more than seven years ago but who cannot be found.

The 6,533 cases remaining on hand consist of 1,940 unsettled claims (372 white and 1,568 colored); 4,338 settled claims (973 white and 3,365 colored); and 255 cases of overpayments and double payments to officers. Apparent, alleged, or suspected fraud is involved in 4,637 of these cases, and 1,896 are settled colored claims in which the claimants could not be found within seven years after the claims were ready for payment. After the lapse of that period the legal presumption is that claimants who do not apply for their money are dead, and the amounts certified to be due them are covered into the Treasury. About onefourth of the 1,896 seven year cases have been called up by persons claiming payment and are now undergoing a careful investigation.

Six clerks were employed in this division during the year, and 5,284 letters were written.

#### PROPERTY DIVISION.

The number of property accounts (quarterly returns of clothing, camp and garrison equipage) on hand July 1, 1883, was 4,356; 3,759 were received, and 4,089 were settled during the year, leaving 4,026 on hand June 30, 1884. Charges amounting to \$1,500.92 were made against officers (including volunteers) for property not accounted for, and the sum of \$1,547.80 was collected and repaid to the appropriations from which the articles were purchased. Certificates of non-indebtedness were issued to 1,274 officers, chiefly those who served during the late war, who have claims pending either in this office for arrears of pay or in the Third Auditor's Office for the value of horses lost in service. Letters written, 2,112; letters recorded, 1,374; clerks employed, 5.

#### DIVISION OF INQUIRIES AND REPLIES.

Subjoined is a tabular statement of inquiries received, answered, and awaiting replies:

Officer making inquiry.	On hand July 1, 1883.	Received.	Answered.	On hand June 30, 1884
Adjutant-General Quartermaster-General	44	5, 733 634	6, 357 674	260 4
Commissary-General Chief of Ordnance		1,647 20	1, 596 18	52 2
Commissioner of Pensions Commissioner of the General Land Office	- 3	5, 080 77	4, 856 78	544
Third Auditor Fourth Auditor Miscellaneous	1	1, 878 9 526	1, 863 8 526	72
Total	1, 310	15, 604	15, 976	938

#### Miscellaneous work.

Rolls and vouchers copied for the Adjutant-General of the Army, 429; letters, affidavits, final statements, certificates of disability, and other papers, 1,824; pages of foolscap used in copying, 1,587; letters written, 3,584; signatures of claimants compared with their signatures while in the service, 5,377; descriptive lists of soldiers briefed and filed away, 22,344. Overpayments and double payments amounting to \$5,864.14 have been discovered and proper steps taken toward securing restitution. Of this amount \$2,870.11 consists of overpayments to soldiers of volunteer cavalry regiments for use and risk of horses furnished by themselves, and will be deducted by the Third Auditor from the value of horses lost in service, in accordance with section 3,482 of the Revised Statutes. Average number of clerks employed, 16.

#### DIVISION OF CORRESPONDENCE AND RECORDS.

Letters received, 35,040; letters written, 15,201; letters referred to other offices, 279; letters returned uncalled for, 1,114; claims received, briefed, registered, and distributed, 20,748; miscellaneous vouchers received, stamped, and distributed, 49,879; letters with additional evidence received, briefed, and registered, 17,211. Average number of clerks employed, 4.

#### ARCHIVES DIVISION.

Paymasters' accounts received from the Pay Department Confirmed settlements received from the Second Comptroller entered, in- dexed, and filed: paymasters', 72; Indian, 2,751; miscellaneous, 1,177	665 4,000
Miscellaneous accounts withdrawn and returned to files	
Vouchers withdrawn for reference Vouchers returned to files	
Vouchers briefed and examined	648, 189
File boxes briefed and stenciled	
Settlements (Indian and miscellaneous) rearranged and placed in file boxes.	105, 470
Mexican war vouchers re-examined and properly filed Letters written	$116,000 \\ 324$
Number of pages copied	3,264
Clerks employed	16

Nearly all the rolls and vouchers pertaining to the war with Mexico were withdrawn from the files thirty years ago and have been kept

5022 F-20

separate ever since. They are now being carefully overhauled and returned to their proper places where they will be as easy of access as those connected with the late war-any one of which can be found in a few minutes. Owing to age, indifferent paper, and constant use many of the abstracts of disbursements filed with paymasters' accounts. to which they are indexes, have become so fragile and torn that they can be handled with difficulty, and it has been found absolutely necessary to copy them. Over 2,500 pages were thus replaced during the For the purpose of facilitating the work of returning musteryear. rolls and vouchers to the accounts to which they belong, the file boxes containing settlements subsequent to 1860 have been numbered consecutively. Clerks withdrawing vouchers are required to indorse the number of the box on the voucher, so that its place in the files is shown at once without the necessity of referring to any abstract, register, or other record. This simple device has been found to work admirably.

Description of accounts, &c.	On hand July 1, 1883.	Received.	Disposed of.	On hand June 30, 1884

Net amount paid out	23, 105, 048 42
Total number of letters written Average number of clerks employed	

It will be perceived that there is a slight increase in the number of accounts and claims remaining on hand, as compared with last year's returns. With an inadequate force of clerks no other result could be expected, and I see no prospect of bringing the work up to date so long as claims arising out of the late war continue to be filed at the rate of one thousand per month.

#### CLAIMS OF INDIAN SOLDIERS.

The 36,204 claims pending in the examining branch of the pay and bounty division include 1,224 claims of Indians who served in the war

#### SECOND AUDITOR.

of the rebellion. No action has been taken in these cases other than to acknowledge their receipt and to call upon the Adjutant General of the Army for the military history of the soldiers. The applications in many cases are very imperfect, and even in those that are correct in form no confidence is felt in the statements of the claimants and their witnesses, nor has this office any means of verifying or disproving said statements. In some instances questions of identity, heirship, &c., are involved that can only be determined by special investigation. I recommend that a small appropriation be placed at the disposal of this office to defray the actual and necessary expense of investigating these and other claims of like character.

#### THE SOLDIERS' HOME ACCOUNTS.

The accounts of the Soldiers' Home for moneys belonging to the estates of deceased soldiers of the United States Army which have remained unclaimed for three years are nearly all settled. As soon as they shall have been fully disposed of the accounts of deserters will be taken up. In the mean time the Adjutant General has been requested to furnish such information in regard to soldiers who have deserted from the regular Army since 1815 as will enable this office to ascertain the amount of "all forfeitures on account of desertion" which, by the act of March 3, 1851 (Section 4818 Revised Statutes), are set apart and appropriated for the support of the Home.

The total amount, from all sources, placed to the credit of the permanent fund of the Soldiers' Home under section 8 of the act of March 3, 1883. from the date of said act to September 30, 1884, is \$547,840.78. From this fund payments amounting to \$174,029.66 have been made to the Treasurer of the Home to meet current expenses, leaving \$373,311.12 to the credit of said permanent fund.

#### A STATUTE OF LIMITATION RECOMMENDED.

I beg leave to invite attention to the remarks under this head in my last annual report (which will be found on page 398 of the Finance<sup>\*</sup> Report for 1883), and to renew the recommendation therein made for the passage of an act which will bar and preclude from settlement all claims growing out of the late war not presented for payment within one or two years after the enactment of such a law. Another year's experience has strengthened my conviction that a law of this kind is absolutely necessary for the protection of the Government, and that it would not operate to the prejudice of honest claimants.

#### THE CLERICAL FORCE.

The conduct of the clerks of this office merits approbation. As a body they are diligent, faithful and efficient. Considering the importance of their duties, their long experience and unquestionable integrity many of them are entitled to a more substantial recognition than the annual thanks of the head of the Bureau, but the Second Auditor's Office, in consequence of a paucity of the higher grades of clerkships, has always been notorious for tardiness of promotion. When a vacancy occurs in one of the higher grades it is an embarrassing and a thankless duty to select a man for promotion, because there are never less than twelve or fifteen applicants equally deserving of advancement. In the belief that the efficiency of the clerical force will be greatly promoted by a fair allowance of higher grade clerkships, I have, in my estimate for salaries for the ensuing fiscal year, asked for the number of clerks now authorized by law (185), but have so classified them as to make the proportion of chiefs of division and third and fourth class clerks approximate a little more closely than it now does to the classification in other bureaus of the Treasury Department. This can be accomplished at an increase of \$2,920 per annum, a little more than one per cent. of the present expenditure.

Very respectfully,

O. FERRISS, Auditor.

The Hon. SECRETARY OF THE TREASURY.

# REPORT OF THE THIRD AUDITOR.

### REPORT

#### OF THE

### THIRD AUDITOR OF THE TREASURY.

#### TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, Washington, D. C., October 15, 1884.

SIR: I have the honor to transmit herewith report of the operations of this office for the fiscal year which ended June 30, 1884. The following statement shows, in tabular form, the number and amount of accounts and claims remaining on hand unsettled at the close of the previous fiscal year, the number received and audited, and the number remaining unsettled June 30, 1884, viz:

STATEMENT showing the FINANCIAL OPERATIONS of the OFFICE. during the fiscal year ended June 30, 1884-Continued.

The number of credit and counter requisitions drawn by the Secretaries of War and Interior on sundry persons in favor of the Treasurer of the United States is 1,483, on which repayments into the Treasury have been made through the Third Anditor's Office during the fiscal year ended June 30, 1884, as follows: deposits, 1816.648,664.84; transfers, \$42,224.23; total, \$16,691,107.66. The number of certificates of deposit received, entered, and listed during the fiscal year 1884 is 3,069.

#### THE QUARTERMASTER DIVISION.

The money accounts and property returns of the Quartermaster Department and of the Signal Service are examined and adjusted in this division.

The accounts of quartermasters cover a wide range of money and property responsibility.

Under the provisions of the act of March 3, 1883, and subsequent acts making appropriations for the Signal Service, the appropriations for said service cover nearly as wide a range of expenditure as that for the Quartermaster Department, although the aggregate of the disbursements is not so large. The same system of accountability for funds and property of the Signal Service obtains as in the Quartermaster Department, and the same mode of credit is applied.

THE COLLECTION DIVISION.

#### QUARTERMASTER ACCOUNTS.

In the foregoing statement of the Quartermaster Division, it will be seen that the amount involved in the settlements made during the year is \$16,203,247.27, being \$6,654,258.38 greater than during the year 1883. The total number of settlements in this division in 1883 was 8,875; in 1884, 10,246.

A vigorous effort has been made to close, as far as practicable, accounts where settlements have been made and balances found due the United States, as the records and files bore abundant evidence that a very large number of accounts of officers who were no longer in the military service remained open. It was determined, therefore, that the proper course to pursue, in such cases, would be to report them to the Second Comptroller, so that, if deemed to the best interest of the Government, actions could be brought to recover the amounts due the United States, and, with that end in view, 384 such cases, with balances aggre-. gating \$1,240,692.05 due the United States, were reported to the Collection Division, in order that the necessary papers might be prepared and transmitted to the Second Comptroller for the purpose indicated The probability whether collections could be made of the above. respective balances reported was not considered for the reason that, under existing laws, the accounting officers are not vested with equity jurisdiction, and can only give credits upon satisfactory receipts for proper expenditures, and in the absence of such receipts or other evidences of the proper expenditure of the public funds for the benefit of the public service, it remained the duty of the accounting officers to make an effort to collect the balances in question.

The cases above referred to are almost wholly those of accounts of volunteer officers, rendered during the rebellion.

In cases where the interested officers are still in the service and neglect to pay balances found due from them to the United States, or make necessary corrections in their papers, ample time has been afforded them to file answers to objections noted, but, if the matter re-

#### THIRD AUDITOR.

main unanswered, the delinquents have been notified that unless repayments or corrections, as the case may be, are made within a given period—usually thirty days—the amount shown to be due the United States, on the last settlement of their accounts, will be reported for stoppage against their pay. During the year 1,874 of such notices were given, the amount involved being \$114,510.50. Quite a number of officers took the necessary steps to close their accounts, but 74 cases, involving \$27,773.01, were reported to the Second Comptroller, in order that the amount in question might be reported for stoppage, in pursuance of section 1766, Revised Statutes of the United States.

The good effect of pursuing the course indicated is already quite apparent, in the promptness with which a large majority of officers now make necessary corrections and repayments to close their accounts. This is further evidenced in the fact that a much larger number of accounts have been balanced during the year than for several years, even when the force employed was much larger than now. It is found that during the fiscal years mentioned below balanced settlements were made as follows, viz: in 1881, 331; in 1882, 291; in 1883, 438; and in 1884, 698.

Considerable trouble is still experienced in adjusting many accounts, by reason of the expenditure of funds pertaining to a given fiscal year in payment of liabilities incurred in another fiscal year. The difficulty originates in large part by reason of "allotments" made by the War Department. As a fiscal year draws near its close, Army officers ascertain what amount of funds remain of the respective appropriations, and of such remainder allotments are made to the respective military departments and divisions, and from thence to the respective posts and stations where it is desired to use the funds. Improvements and repairs of every kind are undertaken, the cost of which is paid out of funds pertaining to another fiscal year than that for which they are used, very often in violation of the spirit and intent of the law on the When such accounts are reached for adjustment it frequently subject. happens that the appropriations out of which the expenditures should have been made are exhausted, or have lapsed under existing law, and repayment cannot be made out of funds for the fiscal year properly chargeable with the expenditures in question.

When possible the necessary transfer is made, which adjusts the error in the immediate transaction, but the course indicated does not cure the matter entirely, for the reason that the appropriation for the year, out of which repayment is made, is reduced by that amount, and in the meanwhile a like course of expenditure has been made during *that* fiscal year, and so on from year to year, debts being incurred in excess of appropriations, thus rendering nugatory the law governing such cases.

In my annual report for the fiscal year 1883 mention was made that on settlement of sundry accounts for disbursements in the Signal Service it was found that, in violation of law, expenditures had been made of the receipts from commercial business over certain United States military telegraph lines, and that in the adjustment of such accounts the officers were debited with such receipts, but were not allowed credit for the disbursements made therefrom. The officers interested were notified of the adjustment of their accounts, and that they were held accountable for the funds expended in violation of law. Their answers thereto were, in substance, that they made the expenditures in conformity with instructions received from the Chief Signal Officer. During the year that officer addressed a letter to the Third Auditor, in 5022 F—21

#### REPORT ON THE FINANCES.

which he claimed that the expenditures were made in conformity with law. This letter was referred to the Second Comptroller for consideration and decision, and was returned to this office with that officer's concurrence in the view held by the Third Auditor, which fact was communicated to the Chief Signal-Officer, with the suggestion that it would be well to present the matter to Congress, with the view of obtaining such legislative action as would enable the accounting officers to allow credits for the expenditures referred to. It is under tood some action was taken, but it is believed Congress failed to provid a remedy for the matter, consequently the accounts referred to remain suspended

#### THE PENSION-ROLL.

From the foregoing tables it will be seen that there is in this office an accumulation, steadily increasing from year to year, of unexamined accounts of pension agents, extending at present through a period of fifteen months, amounting to the sum of 72.089,177.65; represented, in round numbers, by 1,500,000 vouchers. The number of vouchers paid by the agents during the year was 1,279,040, and the number audited during the same period was 1,154,811. The average number of clerks employed in the examination of accounts during the year was 27, and the average number of vouchers per clerk was 42,771.

In addition to the 1,500,000 vouchers unexamined at the close of the fiscal year, it is estimated that at least 1,300,000 will be paid by the agents during the present year; the bulk of which or at least 1,000,000, will be received at this office before the close of the year, and be then awaiting examination. The force now available for the examination of these 2,500,000 vouchers is 32 clerks.

In justice to the pension agents, their accounts should be audited within a reasonable time, thereby giving them timely notice of any errors or overpayments, in order to enable them promptly to correct their rolls and recover amounts overpaid, and it is of great importance to the Government that the accounts of officers disbursing such large sums should be examined and adjusted as soon as possible after payment.

Should the present rate of increase in the work of this division continue, a permanent increase in the working force of this office will be required to meet its demands.

#### THE FILES.

The number of money settlements added to the files during the year ended June 30, 1884, was 6,786, and the number of property returns 4,520, making a total of 11,306. The accounts are well arranged, with the exception of some very old vouchers and a portion of the pension abstracts, which have become badly worn by frequent handling. An effort has been made to have these abstracts properly bound. About 100 have been sent to the Government bindery to be bound, making as many volumes; but the progress made in doing the work is slow. There are about 900 additional volumes to be bound, and the total cost will probably be \$1,000. All money settlements received in this fiscal year have been filed in wooden boxes, of which 2,500 are now in use. They seem 'to answer the purpose of file-holders better than any other that have been tried. No additional room will be required for the files during the present fiscal year. Four clerks are employed on the files, and this is deemed sufficient for the present.

The number of miscellaneous papers registered in the copyist division was 5,027; difference sheets, 974; total 6,001. The number of pages of miscellaneous papers copied was 18,181; number of pages of miscellaneous papers compared, 18,676. The number of letters copied and compared was 290; number of names indexed, 2,123.

It affords me pleasure to commend the persons engaged in the public service in this office for their general faithfulness in the discharge of the important duties intrusted to their charge.

Respectfully submitted.

E. W. KEIGHTLEY, Auditor.

Hon. WALTER Q. GRESHAM, Secretary of the Treasury.

## REPORT OF THE FOURTH AUDITOR.

### REPORT

### OF THE FOURTH AUDITOR OF THE TREASURY.

#### TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, Washington, November 1, 1884.

SIR: A growing evil in the expenditure of money by the Navy Department has been the increasing disregard by some of the Bureaus of the law requiring advertising and contract for purchases made. The recently-discovered fraudulent practices in the Bureau of Medicine and Surgery were greatly facilitated by the persistent determination of the late Surgeon General to nominally make all purchases himself, while it was practically impossible for him to personally supervise transactions taking place scores or hundreds of miles from the seat of Government. This was in direct contravention of the spirit of the law and in open violation of the regulations of the Department.

I have caused a careful examination to be made of the amounts expended for supplies by the different Bureaus during the fiscal year 1883. The following table contains a summary of the result of that examination :

Payments made at Navy pay offices in United States for the several Bureaus during fiscal year 1883 for pur- chases.	Contracts.	Open pur- chase.	Exempt by law from contract or advertise- ment.
Bureau of Navigation		\$49,636 11 19,659 59	\$4, 049 70 34, 965 51
Burean of Equipment and Recruiting Bureau of Yards and Docks		192, 933 45	152,076 15
Bureau of Yards and Docks	\$158, 186 95 45, 669 15	161,518 $6449,322$ $26$	18,.771,10 21,912,78
Bureau of Medicine and Surgery Bureau of Provisions and Clothing	257, 922 92	130, 220 52	7, 376 38
Bureau of Construction and Repair	217, 573 07	139,653 19	6,685 74
Bureau of Steam Engineering	6,000.00	353, 891 60	265, 832, 56
, Total	685, 352 09	1, 096, 835-36	511, 669 92

\$2, 293, 857-37 Aggregate .....

It is thus made apparent that three of the Bureaus wholly neglected the law requiring advertising, and that another, the one making the largest purchases of all, only advertised and contracted for one per cent. of goods and materials bought! About \$1,000,000 of the open and exempt purchases were made of six individuals or firms, one dealer getting over \$300,000. Open purchases, or purchases without advertising or contract, are permitted by law when the public exigencies require the immediate delivery of articles. Special laws have been passed from time to time exempting certain articles from the law requiring advertising. See sections, Revised Statutes, 3721, 3726-29 inclusive, and

#### REPORT ON THE FINANCES.

also act of June 14, 1878, Statutes at Large, volume 20, page 253. Under this latter act, affecting materials for boilers, hundreds of thousands of dollars' worth have been bought, practically with no competition at all. These various acts need careful revision at the hands of Congress, and some of them unquestionably, for the good of the service, ought to be repealed.

#### EXPENDITURES FOR 1884.

The following table exhibits the appropriations and expenditures for the fiscal year ending June 30, 1884.

The sums in the column of expenditures. as shown by vouchers, include returns from foreign stations and vessels abroad, received and charged to the appropriations since the close of the fiscal year, as the liability was incurred within that period, hence the apparent discrepancy between the amount drawn out by warrant and the expenditures by vouchers.

In the case of appropriations Ordnance and Steam Machinery, 1884, the expenditure in excess of the appropriation in the former is occasioned by the sum of \$6,949.29 being deposited to the credit of said appropriation by the chief of the Bureau, received from the sale of howitzers and equipments to the Army; in the latter the sum of \$70,264.50 was carried to the credit of Steam Machinery, 1884, on account of labor and material furnished the Lady Franklin Bay Expedition, which has augmented the appropriations to that extent.

At the close of the fiscal year the following liabilities existed:

Amount due and unpaid officers and men         Amount due 'naval hospital fund         Amount due clothing Navy         Amount due small stores         Amount due expenditures abroad	26, 798 68, 738 24, 417	88 41 14	
Total	1, 481, 103	71	

The most of this has been liquidated since June 30, although there remains a considerable amount due and unpaid to officers and men, which will further diminish the balance of the appropriation "Pay of the Navy." Under the system of drawing money under the "general account," as heretofore explained, deficiencies are liable to occur, and unless made good by additional appropriations, will at last fall upon "Pay," which is a continuous appropriation. With these explanations it is thought the table will be easily understood.

### APPROPRIATIONS and EXPENDITURES of the UNITED STATES NAVY for the fiscal year ending June 30, 1884.

#### EXCHANGE SOLD in 1884, 1883, 1882, 1881, and 1880.

#### FOURTH AUDITOR.

#### ACCOUNT WITH SELIGMAN BROTHERS.

A commission of 1 per cent. is paid to Seligman Brothers, London, for disbursements made by them. Their commissions for the year amounted to \$19,064.11. They pay 4 per cent. interest on daily balances remaining on deposit with them, and receive 5 per cent. interest on advances they make. The interest paid by them during the year was \$1,784.65, and that received \$6,691.84, making a net loss to the Department of \$4,907.19.

Money is transferred to London from New York by means of sixtyday bills. Exchange was favorable during the greater part of the year, and the net gain from this source was \$4,096.74.

The commission paid to Messrs. Seligman Brothers is, as has been several times pointed out in my reports, at least twice as much as it should be, while the interest given them during the year was wholly unnecessary, as the appropriations were ample and the money was lying idle in the United States Treasury.

#### WORK OF THE OFFICE.

The following tables exhibit a summary of the work performed in the different divisions of the office for the fiscal year ending June 30, 1884:

Date.	Рау	requisitions.	Repa	y requisitions.	Letters received.	ers written.	Accounts journalized, entered, and balanced.	Ledger extracts for settlement.	Answers to inquiries for accountson ledgers.	ccounts received and settled.	Monthly returns of receipts and expend- itures.

GENERAL CLAIMS DIVISION.

Claims remaining on hand June 30, 1883 ..... 1, 04 Claims remaining on hand June 30, 1844 ..... 1, 40

#### NAVAL FRAUDS.

The recently discovered frauds in the Bureau of Medicine and Surgery are now undergoing investigation in a court of justice, and I forbear making any remarks on the subject further than to call attention

#### FOURTH AUDITOR.

to the fact that a large balance in the continuous hospital fund, shown in this report to be nearly \$100,000, has furnished a temptation not existing in the case of annual appropriations made by Congress. This fund arises from the twenty cents a month deducted from the pay of each officer, seaman, and marine, and from fines imposed on them for any cause. The aggregate sum is variable, and is generally larger than is needed for any legitimate purpose. The correct method would be to cover these assessments and fines into the Treasury, and let the naval hospitals be sustained wholly by direct appropriations, as other parts of the service are. It is a question for Congress.

#### · A STATUTE OF LIMITATIONS.

I again urge the propriety of some action by Congress tending to prevent the entertainment or opening of claims arising under ancient statutes that have received recent new constructions by the courts.

Claims are now being received, under the decision in the Graham case, that arise in travel performed forty years ago, and a considerable force of the clerks of this office has been employed for the past fiscal year in endeavoring to settle such cases. The lines of communication of a period long past have to be studied, and distances estimated as the "shortest routes" of 1840 to 1860 are not now easily determined.

The desirability of some statute giving repose to settlements cannot be doubted when it is considered that no lapse of time on acquiescence by the claimant is any bar to the readjustment of accounts. A claim founded upon an old statute may be sued upon in the Court of Claims if suit is commenced within six years from the date of the cause of action, and, if the decision is against the United States, the accounting officers are flooded with claims too old to be themselves sued upon, but which the Auditor must entertain for want of some statute of limitation upon his action. I respectfully recommend that some limit be fixed by law beyond which the accounting officers shall not recognize such claims.

#### ADDITIONAL CLERKS NEEDED.

In submitting the estimate of appropriations for the ensuing year, on the 18th of September last, I asked for an addition of four clerks to the force now employed in this office.

By reference to the tabular statements herewith submitted it will be seen that the number of unsettled accounts remaining on hand at the close of the fiscal year largely exceeds that of the preceding year. The clerks have been constant, punctual, and industrious, and the office hours have been increased, and it is thus shown that the present number is inadequate to perform the work required. I therefore respectfully repeat the request for an increase.

I have been greatly aided in the work of the office by the intelligence and faithfulness of the deputy auditor, Mr. B. P. Davis, and the chiefs of divisions, and the skill and general good conduct of the clerks and employés.

I have the honor to be, &c.,

#### CHAS. BEARDSLEY, Auditor.

#### Hon. HUGH MCCULLOCH, Secretary of the Treasury.

# REPORT OF THE FIFTH AUDITOR.

## REPORT

## THE FIFTH AUDITOR OF THE TREASURY.

OF

## TREASURY DEPARTMENT, FIFTH AUDITOR'S OFFICE,

Washington, November 8, 1884.

SIR: I have the honor to submit herewith the annual report of this office for the fiscal year ending June 30, 1884, accompanied by an appendix of tabular statements, as follows:

Table A, giving the names of diplomatic officers, including ministers, chargés d'affaires, secretaries, and interpreters, with salaries, contingent expenses, and passport fees.

Tables B and C, showing the salaries of consuls and their compensation from agencies; salaries for instruction, transit, and while awaiting exequatur; fees collected, contingent expenses, loss by exchange, and allowance for clerks at the several consulates.

Table D, showing the fees collected at unsalaried consulates and the compensation of consuls; also, rent, clerk hire, and contingent expenses.

Table E, giving the names of consular clerks, with their salaries and location.

Table F, showing the expenses for rent of prisons and wages of prison keepers at consulates in China, Japan, Siam, and Turkey; also, salaries of marshals and interpreters.

Table G, showing the number of seamen afforded relief at the various consulates, with the amount expended and the extra and arrears of wages collected.

Table H, showing the number of seamen sent to the United States, with the amount paid at the Treasury for their passage.

Table I, showing the character and amount of the fees and charges collected at each consulate, inclusive of agencies.

Tables K and L, showing the internal-revenue assessments and the amount of cash deposited by districts and States.

Table M, showing the salaries of collectors of internal revenue, with the amounts paid deputies, clerks, storekeepers, gaugers, and for incidental expenses.

#### DIPLOMATIC AND CONSULAR DIVISION.

In this division the expenses of the diplomatic and consular service of the United States are adjusted, including salaries and contingent expenses, relief and passage of American seamen, estates of American citizens and seamen dying abroad, awards of commissions, expenses of international exhibitions, &c.

Diplomatic service.—The accounts of ministers and other officials in

this service, so far as they have been presented for settlement (Table A), show \$282,091.25 paid for salaries of ministers and charges d'affaires, \$15,291.15 for salaries of charges d'affaires *ad interim*, \$31,418.87 for salaries of secretaries, interpreters, and clerks of legations, \$85,010.04 for contingent expenses, and \$2,198.88 for loss by exchange, aggregating \$416,010.20. Included in the above are the expenses of three additional missions at Corea, Persia, and Siam, amounting to \$14,351.04. Passport fees were collected to the amount of \$3,872.40.

Consular service.—During the year accounts have been adjusted showing that official fees were received and expenses paid as follows (Tables B, C, and D):

Fees for official services		\$895,780	27
Consular salaries	\$410,735 23		
Loss by exchange	3,792 75		
Compensation from fees	215,642 83		
Rent and clerk-hire (sec. 1732, R. S.)	9,560 88		
Contingent expenses	137,529 50		
Allowance for clerks	55, 974 80	· ,	
Rent of prison, wages of keepers, &c., China	7,254 54		
Rent of prison, wages of keepers, &c., Japan	2,899-09		
Rent of prisons, wages of keepers, &c., Siam and Turkey	1,054 00		
Salaries of interpreters in China, Japan, and Siam	13, 145-48		'
Salaries of marshals for consular courts	7,530 97		
Expenses of interpreters, guards, &c., in Turkish dominions	2,979 01		
Boat and crew for consul at Osaka and Hiogo	227 00		
Shipping and discharging seamen	4,019 00		•
		872, 345	08

#### 

The salaries of consular officers not citizens of the United States, aggregating \$9,010.85, and covered by a separate appropriation, are included in the above, with the amounts allowed consular officers for instructions, transit, and while awaiting exequatur.

Consular fees.—The report of this office for 1883 gave the fees for that year at \$914,839.74, but several accounts then unadjusted have increased that amount to \$926,054.95, as shown in Tables B, C, and D of the appendix. For the fiscal year just closed the fees adjusted to date aggregate \$895,780.27. Accounts not yet received and adjusted will probably increase this amount from \$10,000 to \$12,000. This falling off is not confined to any particular class of fees, being about \$5,000 on vessels' fees and \$13,500 on invoices and other fees. The following totals, taken from Table I, exhibit the sources from which the consular fees were derived:

#### VESSELS' FEES AND CHARGES.

Shipping and discharging crews Receiving and delivering ships' papers Bills of health, clearances and other fees Extra wages	49,528	60		•
Total from vessels			\$124,870 04	•
MISCELLANEOUS FEES.			ŗ	
Invoices Other fees.	57,232	63		
Total, including extra wages				

Relief of seamen.—During the year accounts for relief afforded seamen, as shown in Tables G and H, were adjusted as follows:

Extra wages collected Arrears of wages collected	20.022	55		
Extra and arrears of wages refunded	<u>-</u>	<u> </u>	53, 860 21, 715	33
Balance of extra wages and arrears Board and lodging Clothing Passage to United States Other expenses	8,681 4,646 5,626	84 78 75		
-			30, 723	15
Excess of wages not refunded over relief			1.419	25

Several accounts not yet received and adjusted will probably increase the amount of relief for the year to \$32,000 or \$33,000. Last year it amounted to \$36,473.95.

Of the 1,100 seamen relieved and reported in accounts adjusted 633, or about 57 per cent., were shipwrecked, and 102 received medical aid. Only 97 deserters received relief, and of this number 23 were reported from Fayal and 33 from Hull. Of the men reported as relieved at Bahia, Calcutta, Cape Town, Gibraltar, Kingston, and Pictou, all, or nearly all; had suffered shipwreck. Returns of this character show that with few exceptions consular officers are very careful in their disbursements for relief, and that only those are cared for who are entitled to become the wards of the Government.

Other expenses of the foreign service.—During the year othe acc ounts pertaining to the foreign service have been adjusted, as follows:

French and American Claims Commission	\$96, 886	01
Court of Commissioners of Alabama Claims		
Commissioner to negotiate a commercial treaty with Mexico		
Extending diplomatic relations with Governments of Eastern Asia, 1884 .	5,000

Morton, Rose & Co.'s accounts.—During the year Messrs. Morton, Rose & Co., bankers of the United States at London, received \$253,367 on account of consular fees; \$15,174.31 on account of extra wages and other money of seamen. Their disbursements were as follows:

Contingent expenses consular service, 1883, \$200; 1884, \$400	\$600	00
Salaries consular service, 1883, \$1,744.46; 1884, \$4,016.01	5,760	47
Expenses interpreters, guards, &c., in Turkish dominions, 1883, \$125;		
1884, \$253.86	378	86
Salaries of secretaries of legation, 1883, \$4,864.25; 1884, \$27,350.28	32,214	53
Contingent expenses of foreign missions, 1883, \$6,591.23; 1884, \$29,289.96.	35,881	19
Salaries of ministers, 1883, \$36,455.33; 1884, \$165,782.76		09
International Fishery Exhibition, 1883, at London		83
Transporting remains of ministers and consuls to their homes for inter-	-	·
ment, 1884		66

Estates of decedents.—Amounts were paid from "estates of decedents trust fund," having been previously covered into the Treasury, as follows:

Edmund Cook, deceased citizen. Thomas S. Scipio, deceased seaman W. G. Featherstone, deceased citizen John J. Higgins, deceased citizen. Gerret S. Backus, deceased citizen.	172 40 118	07 88 42

#### INTERNAL-REVENUE DIVISION.

The total collections of internal revenue, as shown by the adjustment of collectors' accounts and exhibited in detail in Tables K and L, amounted to \$121,421,981.97, not including \$163,051.85 derived from the sale of adhesive stamps, and \$24.53 from other sources.

The total expenses of collectors, including compensation of storekeepers and gaugers, aggregated \$4,068,409.29, as follows: Salaries of collectors, \$322,834.72; deputies and clerks, \$1,474,812.44; rent, fuel, and lights, \$46,555.45; stationery and other expenses, \$23,185.33; storekeepers, \$1,398,180.50, and gaugers, \$802,840.85.

The following exhibit shows these expenses by States:

#### STAMPED FOIL WRAPPERS.

To wrappers received from printer.. \$197, 156 60 | By wrappers sent to collectors..... \$197, 156 60

Stamps, paper, and dies.—The following accounts were adjusted, being expenses incurred for dies and paper and for the engraving and printing of internal revenue stamps, &c.:

Bureau of Engraving and Printing	\$406,232 70
Fairchild Paper Company	35,433 78
John J. Crooke	5,495 90

Miscellaneous expenses.—The following sums embrace payments made by collectors of internal revenue and revenue agents for the detection of frauds upon the revenue; also disbursements made by T. J. Hobbs. for the cancellation and redemption of stamps, and for other expenses incident to the collection of the internal revenue:

Traveling expenses	\$62,606 15,404 19,925 15,251 1,025 5,000 5,592 6,262 6,262 4,358 296,579 2,500 1,182	84 56 83 20 00 80 50 29 82 98 00 08	
	1, 182 802, 840		

Rebate on tobacco and other claims.—During the year rebate claims on tobacco, snuff, and cigars were received and amounts allowed under the provisions of section 4, act o<sup>c</sup> March 3, 1883, as follows:

State.	Claims received.	Amount al- lowed.	State.	Claims received.	Amount al- lowed.

An adjustment of the accounts of 131 stamp agents shows a deposit of \$1,409,213.61.

Five thousand one hundred and three claims for the redemption of stamps, amounting to \$328,852.50, were settled during the year, from which \$16,838.38 were discounted, leaving \$311,914.12 actually paid.

By the last report the Secretary of the Treasury had on deposit to his credit on account of "fines, penalties, and forfeitures" (special deposit account No. 1), \$141,255.27. During the year \$307,932.35 have been deposited, and \$362,264.86 disbursed, leaving a balance to his credit January 1, 1884, of \$86,922.76. The balance to his credit January 1, 1883, on account of "offers in compromise" (special deposit account No. 5), was \$60,446.86. During the year \$144,545.17 were deposited, and \$159,064.09 disbursed, leaving a balance to his credit January 1, 1884, of \$45,927.94.

Accounts were adjusted for the following sums refunded: Taxes erroneously assessed and collected, \$43,105.68; drawback on merchandise exported, \$49,075.20, and "surplus proceeds" of lands sold for taxes in the insurrectionary States, \$16,708.88.

Moneys refunded on lands sold for taxes in the insurrectionary States amount to \$1.050.

Accounts have been adjusted with the States of California and Oregon on account of direct tax imposed by the act of August 5, 1861.

The disbursements by George Waterhouse, chairman of the South Carolina free-school fund commissioners, amounted to \$2,857.50.

Disbursing clerks' accounts.—Accounts rendered by R. C. Morgan, late disbursing clerk of the Department of State, have been adjusted as follows:

Publication of consular and other commercial reports, 1883, \$5,518.29;	
1884, \$8,362.61	30 90
Editing, publishing, and distributing Revised and Annual Statutes, 1883,	
\$240.31; 1884, \$4,085.28	15 59
Books and maps, 1883, \$863.08; 1884, \$1,723.19	6 27

Books and maps, Department of State, 1883, rendered by D. T. Reed	105 60	

#### THE WORK OF THE OFFICE.

During the year, 59,506 accounts have been adjusted, aggregating \$1,093,944,231.08 and requiring the examination of 476,896 vouchers. There have also been 11,559 reports copied, 5,278 letters written, 29,792 coupon books counted, and 29,645 coupon books scheduled. Compared with other years the work performed has been unprecedented in the history of the office. In order to secure prompt settlement of the 45,409 claims for rebate of taxes on tobacco, snuff, cigars and cigarettes. it became necessary to extend the time of labor for several weeks during the winter months to include the hours from half-past six to nine o'clock in the evening. The entire cierical force of the Bureau was thus employed, and the willingness exhibited in the performance of this additional work, and the promptness with which it was done. attest the fidelity and interest of those employed. A similar disposition to dispose of accounts additional to the regular work of the office was shown in the adjustment of 946 Alabama judgments, which required immediate settlement, and which were adjusted and forwarded to the First Comptroller within two weeks after their reception from the Department of State. It was impossible to perform so much extra work even with the working hours extended, without some delay in the regular work of the office. But this was temporary, and on the 30th of June, last, as exhibited by the work report of the office for that month. there was scarcely an unadjusted account in the Bureau which was in shape for settlement.

A very important feature of what is now a part of the regular work of the office is the comparison of consular returns with the returns made by collectors of customs, as required by section 4213 of the Revised Statutes. It is necessary to the proper adjustment of consuls' accounts. and its good effects are evidenced not only as an aid in such settlements, but by securing a better observance of the consular regulations. As shown elsewhere the great bulk of consular fees is derived from the certification of invoices, the fee for such service being \$2.50. Last year about 300,000 invoices were thus certified, and the fact that the failure to account for the fees thus received is corrected by returns from the collectors of customs, shows the accuracy afforded by the comparison. Until these returns of consul and collector were brought together in this office, about three years ago, nothing could be learned as to the correctness of consular reports beyond what was shown on their face. Errors and omissions might have existed without fear of discovery. It is now known that discrepancies, often amounting to considerable sums, were of frequent occurrence, and that in some cases gross care-

lessness and dishonesty existed on the part of clerks employed by consular officers. This work, therefore, not only insures a correct accounting of fees to the Government, but it affords consular officers the means of knowing whether subordinates are properly and honestly performing their duties. To reduce this work to a system has required a patient and careful study of details, but the results are so highly satisfactory as to entirely justify the labor and the increased force given the office two years ago. It is found, however, that the space heretofore given those employed in this work is entirely inadequate, and K have the honor respectfully to recommend that an additional room be allowed and set apart for this work.

I have the honor to be, very respectfully, your obedient servant,

D. S. ALEXANDER, Auditor.

Hon. HUGH McCulloch, Secretary of the Treasury.

### REPORT ON THE FINANCES.

# REPORT OF THE SIXTH AUDITOR.

## REPORT

#### OF THE

## AUDITOR OF THE TREASURY FOR THE POST-OFFICE DEPARTMENT.

#### OFFICE OF THE AUDITOR OF THE TREASURY FOR THE POST-OFFICE DEPARTMENT, Washington, D. C., November 13, 1884.

SIR: I have the honor to submit the report of the business operations of this office for the fiscal year ended June 30, 1884.

The annual report to the Postmaster-General exhibits in detail the financial transactions of the Post-Office Department during the last fiscal year.

The following is a summary\* of the principal labors of this office during the last fiscal year, viz :

ACCOUNTS SUBMITTED for SUIT during the fiscal year ended June 30, 1854.

Third quar- ter, 1883. Fourth quar- ter, 1883.			rst quar- er, 1884.		ond quar- er, 1884.	Total.

WEIGHT of FOREIGN MAILS sent during the fiscal year 1884.

I invite your attention to the necessity for an increase of the clerical force of this office.

Seven hundred and fifty-eight new money-order offices were established July 1, 1884, which added to the work the auditing of 39,416 weekly money-order statements and the money-orders and postal notes pertaining thereto. This increase was not provided for in the estimate submitted at the last session of Congress. An addition of twenty-four clerks is needed for this purpose.

Postal notes have been found by experience to involve much more labor and time in auditing than money-orders—at least one-third more and the number issued has greatly exceeded the expectations of the Department. Until the present year, no force has been provided for auditing them, and the portion of the present force which it is practicable to assign to the work is inadequate.

It is estimated that at the beginning of the next fiscal year four hundred additional money order offices will be created, which will add to the present labors of the office the auditing of 20,800 weekly statements, and the money orders and postal notes accompanying them, and upon a proper basis of distribution of labor, will require an addition of twelve clerks to the force.

It has been found for the best interests of the service to employ upon the current work the force of ten clerks authorized for ascertaining the number and amount of unpaid money orders, with a view to the destruction or other disposition of the accumulation of weekly money-order statements. It is desirable that this force be engaged upon the work which it was designed to perform, as it is becoming constantly more embarrassing to find space for the statements, rendered weekly, from all money-order offices, since the establishment of the system. This force, unless additional help is provided, cannot be withdrawn from the current work without allowing it to fall in arrears. With all possible effort it has been found impossible to keep the work of the money-

order branch up to the requirements of the office. A large number of the clerks are engaged at their duties before and after office hours, at night, and on holidays.

Before the annual reports of this office to the Secretary of the Treasury and to the Postmaster-General can be made, it is necessary that all accounts pertaining to the fiscal year for which the reports are made be fully audited, that the aggregate results of the transactions for the year may be reached: The reports for the fiscal year ended June 30, 1884, are necessarily delayed, for the reason that the present force of the money-order division has been found insufficient to adjust the accounts of that division. Until the accounts are closed, the revenue from the money-order business, which forms part of the postal revenues for the year, cannot be ascertained. Unless the force is increased, it will be exceedingly difficult, if not impossible, to furnish the annual reports to the Secretary of the Treasury and to the Postmaster-General within the required time.

Through lack of clerical help it has been found impossible to make a report, quarterly, of the revenues of the money-order business, as is done with respect to other branches of the postal service, and as, in my opinion, is required by law. It is desirable that such reports should be made, and it is earnestly hoped that the necessary help may be provided.

It has been the custom of the office to record all official letters written, but the system has been abandoned, because of greater need, upon other current work, of the services of the clerks so engaged. The only record now preserved is that contained in the letter-press books, which, while convenient and accessible, is hardly sufficiently permanent and enduring.

While the revenues of the Department have decreased by reason of the reduction in the rate of letter postage, the labor of auditing the accounts has not been diminished, but has been considerably increased by - reason of the added number of new post-offices, the increase in the number of mail routes, and the consequently augmented number of orders of the Post-Office Department, affecting the accounts of postmasters and contractors; the legislation requiring the payment of readjusted salaries, all of which affects and increases the work of the several divisions of the office.

During the fiscal year ending June 30, 1886, this office will be required to prepare the material for the portion of the Biennial Register of the United States which pertains to the postal service—more than one-half of the Register. This service will require at least twelve clerks for three months.

Much inconvenience is experienced on account of the insufficient office accommodations allotted to this Bureau, both in the Post-OfficeDepartment building and in the rented building opposite. The present force of the Money-Order Division is crowded to such an extent as to materially interfere with the proper conduct of its business, and it is a question of serious importance to find space for the rapidly increasing files of that division.

I urgently call your attention to the imperative necessity for additional office accommodations, and recommend the renting of some convenient and neighboring building for the purpose.

The system in use in this office for filing the quarterly accounts and general postal accounts of postmasters, and the various books, papers, and vouchers connected with the payments for transportation of the mails, is not sufficiently compact and convenient for their preservation, and to afford easy access for reference. It is therefore recommended that Congress be requested to appropriate a sufficient sum for the purchase of necessary file boxes and shelving, book-cases and file-cases to effect the needed improvement.

The magnitude of the work of this office is shown by the statement that during the last fiscal year it received 667,398 accounts, accompanied by over 12,000,000 vouchers, involving \$212,691,826.31, each of which demanded close scrutiny by capable and experienced clerks to protect the revenues of the Department.

Very respectfully,

R. F. CROWELL, Auditor.

Hon. HUGH MCCULLOCH, Secretary of the Treasury.

REPORT OF THE TREASURER OF THE UNITED STATES.

ç

## REPORT

## THE TREASURER OF THE UNITED STATES.

OF

#### TREASURY OF THE UNITED STATES, Washington, D. C., November 1, 1884.

SIR: I have the honor respectfully to submit the following report, showing the operations of the Treasury of the United States for the fiscal year 1884 and its condition at the close of the year:

#### SUMMARY OF OPERATIONS.

The net revenue of the Government was less than that of 1883 by \$49,767,712.03, having been \$348,519,869.92, while in 1883 it amounted to \$398,287,581.95. The decrease in the receipts from customs was \$19,639,007.17; in the receipts from internal revenue, \$23,134,296.47, and in the receipts from miscellaneous sources, \$8,849,248.98. From the aggregate of these items should be deducted an increase of \$1,854,-840.59 in the receipts from sales of public lands, leaving the net reduction as stated above.

The net expenditures aggregated \$244,126,244.33, a decrease from the amount in 1883 of \$21,281,893.21. The surplus applicable to the reduction of the public debt amounted to \$104,393,625.59, a decrease of \$28,485,818.82 from that of the previous year. The items of expenditure showing a decrease are as follows: On account of War Department, \$9,481,779.57; on account of Interior Department, \$11,469,936.63; on account of interest on public debt, \$4,581,752.77. There was an increase of \$2,242,411.49 in the expenditures on account of civil and miscellaneous, and of \$2,009,164.27 in the expenditures on account of Navy Department.

The disbursing officers of the United States had to their credit on the books of the Treasury at the close of the year, \$32,463,980.77.

The receipts on account of the Post Office Department amounted to \$43,822,485.82, a decrease of \$2,223,857.07 from those of 1883; the expenditures increased \$2,969,766.38, having been \$46,281,124.87; \$24,236,893.93 of the amounts was received and expended by postmasters without being deposited in the Treasury.

There was no change in the amount of the unavailable funds of the Treasury during the fiscal year; \$29,514,665.44 being still charged as such; and the unavailable funds of the Post-Office Department remain as on June 30, 1883, \$37,277.06.

There was collected during the fiscal year from the national banks \$3,024,668.24, on account of semi-annual duty accruing on their circulation, making a total collected on account of such duty and that heretofore levied on capital and deposits, since the organization of the national banking system of \$127,206,148.11.

There were held in this office for the national banks, at the close of the fiscal year, bonds of the United States amounting to \$351,207,850, of which \$334,147,850 was held to secure the circulation issued to the banks, and \$17,060,000 as security for public moneys on deposit with such national banks as were designated depositaries. There were withdrawn during the year \$69,701,250 of such bonds, and \$47,196,600 were deposited; showing a reduction in the amount held of \$22,504,650 and a decrease in the total movement of bonds of \$422,108,150; the movement in 1883 having been \$539,006,000.

There was outstanding at the close of the fiscal year \$362,378,580.64 of the various issues of United States currency; the amount redeemed and destroyed during the year was \$85,972,970.50, making a total redemption since the first issue of currency of \$2,453,305,593.81.

Silver certificates to the amount of \$52,280,000 were issued during the year; \$20,005,140 were redeemed, making the total redemptions \$52,658,309. The amount nominally outstanding at the close of the year was \$120,891,691.

The issues of gold certificates authorized by the act of July 12, 1882, amounted to \$41,470,000 and the redemptions to \$24,567,410, making the total redemptions \$32,402,040, and leaving nominally outstanding \$95,777,960. The total amount of gold certificates of the old issue redeemed to the close of the year was \$978,520,180.46, and the amount outstanding \$2,614,700.

The several offices of the Treasury paid during the year \$8,839,320.78 in coupons from United States bonds, which were forwarded to this office for examination; and \$44,518,196.76 of interest on registered bonds of the United States was paid by means of 271,494 checks on the Treasurer and assistant treasurers.

Coupons from District of Columbia 3.65 per cent. bonds, amounting to \$126,878.08, were also paid and examined; and 1,051 checks for \$394,-173.75 registered interest on such bonds were issued.

Payment of the warrants of the Secretary of the Treasury required the issue of 83,279 drafts; 70,408 drafts on warrants of the Postmaster. General, and 40,312 transfer checks on assistant treasurers were issued; making a total of 466,544 drafts and checks issued by the office during the year.

There were redeemed during the year bonds of the United States amounting to \$99,838,300, of which amount \$46,769,600 was for the sinking fund; and \$1,329,250 of the bonds continued at 3½ per cent. were exchanged into three per cents. From May, 1869, the date of the first retirement, to the close of the fiscal year, the amount of bonds redeemed, purchased, converted, or exchanged was \$2,684,031,800, of which \$484,890,150 was for the sinking fund.

There were received for redemption during the year circulating notes of national banks amounting to \$126,152,572, making a total of such notes received since the act of June 20, 1874 went into operation, of \$1,404,430,725. Included in the amounts received are notes of national banks that have failed, gone into liquidation, or are reducing circulation; the amount of such notes redeemed during the year was \$26,857,689.

### THE STATE OF THE TREASURY.

The general balance was reduced from \$163,232,463.09 in 1883 to \$149,525,062.44 in 1884, a reduction of \$13,707,400.65, accounted for in part as follows:

By a decrease of \$20,149,115.18 in the amount of gold coin and bullion owned by the Treasury, or from \$151,524,594.04 in 1883 to \$131,375,478.86 in 1884.

By a decrease of \$291,807.85 in the amount of silver bullion, or from \$5,010,801.58 to \$4,718,993.73.

By a decrease of \$4,970,016.47 in United States notes, after providing for outstanding certificates.

By an increase of \$10,108,315 in the amount of standard silver dollars owned by the Treasury, or from \$35,146,213 in 1883 to \$45,254,528 in 1884.

By an increase of \$2,699,284.05 in fractional silver coin.

By an increase in the amount of national bank notes held in the Treasury of 4,811,727.13, or from 6,301,907.43 in 1883 to 11,113,634.56 in 1884.

The aggregate amount of gold and silver coin and bullion held by the Treasury increased from \$352,510,809.45 in 1883 to \$395,216,297.22 in 1884; an increase of \$42,705,487.77. The gross assets increased from \$456,119,817.85 in 1883 to \$519,690,249.14; an increase of \$63,570,431.29.

#### THE RESERVE.

The excess of the cash assets of the Treasury, excluding certificates and other obligations held by it, over the net current liabilities payable on demand, other than United States notes, constitutes the reserve. The following table presents a comparison of the net assets and lia-

bilities on November 1, 1884, with those on the same day in 1883:

<i>'</i>	1883.	1884.
ASSETS.

#### REPORT ON THE FINANCES.

The following table, a continuation of similar ones presented in previous reports, shows for the first day of each of the past thirteen months the amount of the current liabilities, both excluding and including United States notes; the net cash in the Treasury, and the percentage of the reserve to the United States notes outstanding and of the net cash to the current liabilities, including such notes. All certificates, together with the moneys held for their redemption, have been excluded entirely.

Month.	Current liabilities, excluding United States notes and coin and currency certificates.	Current liabilities, excluding certificates and including United States notes, viz, \$346.681,016.	Cash, less amount of coin and currency certificates.	Percentage of reserve to United States notes outstanding.	Percentage of cash to demand liabilities, including United States notes, certificates hav- ing been eliminated.

If it be assumed that the cash in the Treasury in excess of demand liabilities as here stated, should be maintained at about 40 per cent. of the amount of United States notes outstanding (\$346,681,016), it will be seen that during the period the reserve fell below that rate in August only, having been as high as 46.4 per cent. a year ago, and being at present 42.7 per cent. The average for the five years and eleven months since resumption has been 39.5 per cent.

If, however, the percentage be computed between the cash in the Treasury and the liabilities, including United States notes, after excluding all certificates and moneys held for their redemption, the proportion ranged from 58.2 per cent. to 54.2 per cent., and the average since resumption has been 52.9 per cent.

#### UNITED STATES NOTES.

The changes which have taken place in the denominations of United States notes outstanding at the close of each of the last four fiscal years are shown by the following table:

Denomination.	1881.	1882.	1883.	1884.
One dollar Two dollars. Five dollars. Ten dollars Twenty dollars Fifty dollars. One hundred dollars Pive hundred dollars One thousand dollars Ten thousand dollars. The appropriation for printing notes for the fiscal year 1884 having been found insufficient for the printing of the notes required, the Secretary of the Treasury, in February last, directed that the printing of one- and two- dollar notes be suspended. The issue of such notes by this office ceased in consequence about the 29th of February. On June 23 the Bureau of Engraving and Printing resumed the delivery of ones and twos, and the issue was resumed by this office on June 26. The supply of these notes has not, up to this time, been sufficient to meet the demand; none can, therefore, be held in reserve, as they should be, to undergo the seasoning which experience proves to be economical, extending, as it does, the life of the notes by increasing the capacity to sustain usage.

Owing to this suspension in the issue, the amount of one and twodollar notes outstanding was reduced.

The decrease in the notes outstanding was as follows: \$1,076,272 in one-dollar notes, \$626,508 in two-dollar notes, \$3,205,870 in ten-dollar notes, \$4,292,280 in twenty-dollar notes, \$777,000 in fifty-dollar notes, \$661,400 in one-hundred dollar notes, \$185,000 in five-thousand-dollar notes, and \$100,000 in ten-thousand-dollar notes; an aggregate of \$10,924,330 made up by an increase in five-dollar notes of \$4,402,830, in five-hundred-dollar notes of \$1,815,500, and in one-thousand-dollar notes of \$4,706,000.

The number of notes outstanding at the end of the year was 64,928,629, a decrease of 1,058,025 notes in the year.

The following table shows the issues and redemptions during the last three fiscal years by denominations:

As stated in the report for 1883, the issues and redemptions for that, as well as the preceding year, were augmented by passing through the accounts from the reserve fund of unissued currency, for destruction, notes of the denominations of \$5,000 and \$10,000. The actual redemptions were \$61,635,424 in 1882, and \$77,764,714 in 1883; and the redemptions for 1884 having been as above stated, \$85,948,236, exceeded those of 1883 in amount \$8,183,522, and those of 1882 \$24,312,812.

The number of notes redeemed was only 86,267 in excess of the number redeemed in 1883, having been 20,425,431.

During a portion of the year and since its close the amount of United States notes received monthly in payment of duties on imports was greater than for several years past, as the following table shows:

Month.	1879.	1880.	1881.	1882.	1883.	1884. ´

The amount received to September 30, 1884, since the resumption of specie payments, was \$248,149,578—a monthly average of \$3,596,371. The receipts for the fiscal year were \$29,530,663, while in 1883 the amount was \$27,937,216, and the preceding year \$20,595,119. The monthly average for the year was \$2,460,889.

During the fiscal year there were redeemed in coin at the office of the assistant treasurer at New York, under the act of January 14, 1875, United States notes amounting to \$590,000; there having been no redemption prior to this since December, 1881. The total amount of notes so redeemed since the resumption of specie payments under the act was on June 30, 1884, \$12,659,086. There have been no redemptions since the close of the year.

**4**06

## SILVER CERTIFICATES.

There were nominally outstanding at the close of the fiscal year silver certificates amounting to \$120,891,691, an increase of \$32,274,860 during the year; the amount held by the Treasury increased from \$15,996,145 to \$23,384,680, thus leaving actually outstanding \$97,507,-011, an actual increase of \$24,886,325 during the year.

The amount nominally outstanding increased to \$123,260,721 on September 30, 1884, and the amount held by the Treasury to \$26,165,840.

There were issued under the departmental circular of September 18, 1880, on deposits of gold coin with the assistant treasurer at New York, silver certificates to the amount of \$20,556,000 during the fiscal year; of these there were issued at the Cincinnati office \$1,240,000; at the New Orleans office, \$16,191,000; at the Saint Louis office, \$3,025,000; and at the Philadelphia office, \$100,000.

The aggregate of such issues to June 30, 1884, was \$63,505,500, and to September 30, 1884, \$65,295,500.

The following table shows the issues and redemptions by denominations:

Denomination.	Outstand-	Issu	ied.	Rede	Outstand-	
	ing June 30, 1883.	During fis- cal year.	ToJune30, 1884.	During fis- cal year.	ToJune 30, 1884.	ing June 30, 1884.

\*The public debt statement reports outstanding \$119,811,651; a difference of \$1,080,000. This amount, orwarded to an assistant treasurer on June 30, was entered as issued on that day after the report for he debt statement had been made up.

## GOLD CERTIFICATES.

There were still outstanding at the close of the year \$2,614,700 gold certificates of the old issue under the act of March 3, 1863; \$888,840 having been redeemed during the year, making the total amount redeemed \$978,520,180,46.

Of the issue authorized by the act of July 12, 1882, there were nominally outstanding on June 30, 1884, \$95,777,960; an increase over the amount a year before of \$16,902,860. The amount held by the Treasury increased in the same period from \$22,571,270 to \$27,246,020, thus leaving actually outstanding \$68,531,940, or \$12,228,110 more than on June 30, 1883.

Of the issues, which aggregated \$41,470,000 during the year, \$34,550,000 was of the New York and \$6,920,000 of the departmental series.

On September 30, 1884, the amount nominally outstanding was \$120,936,620, of which the Treasury held \$33,640,920.

The following table shows the amounts of the series of 1882 issued, redeemed, and outstanding by denominations, to June 30, 1384:

Denomination.	Outstand-	Issu		Rede	Outstand-

# EXPRESS CHARGES ON UNITED STATES MONEYS.

In the last annual report a recommendation was made in regard to an appropriation for the expense of transportation of United States moneys sent for redemption, for which an estimate was made by the Secretary of the Treasury, but which failed to receive the favorable action of Congress.

It is submitted that the duty of the Government to bear the expense of replacing these notes has been recognized by the action of Congress in appropriating therefor every year, to and including 1875, and again for the years 1881 and 1882.

The following on this subject is from the last report:

The Government has required of the national banks that they provide, through a deposit in the Treasury, for the redemption of their worn and mutilated notes, and they bear the expense of transportation to this office for such redemption. It would seem that the Government should do at least as much toward keeping in good condition among the people the notes of its own issue, as it requires of the banks in regard to their issues. Otherwise the United States notes now in circulation, many of them already worn and defaced, will in a short time become more wretched in condition and more unfit for use. The gain to the Government, and of course the corresponding loss to the holders, by non-presentation for redemption of the United States notes will be considerable, and it can well afford the comparatively small expense necessary to keep the notes in good condition.

to keep the notes in good condition. It is natural that the holder of a note, however much it may be defaced, should hesitate to incur the expense of express charges; and thus the note will be kept in circulation as long as it can possibly be used. A note-holder in a city where there is an assistant treasurer may obtain redemption by presentation to that officer, who forwards the notes to the Treasurer at the expense of the Government, payable from another appropriation; but this does not afford equal facilities of redemption to all holders of notes; and it makes necessary an extra count by the assistant treasurer of money which should come directly to this office.

The gold and silver certificates are also rapidly becoming defaced and worn. Although not issued as a circulating medium, but as certificates of deposit, they have, from various causes, passed into the circulation of the country. The charges for transportation of these for redemption have never been borne by the Government; nor is it proposed now to pay any charges where redemption in coin is demanded; but it is submitted that it would be proper to furnish new certificates for those which have been defaced in handling, and that the express charges thereon be paid by the Government. Authority is asked for such payment in any appropriation that may be made.

It is respectfully recommended that for these purposes an appropriation of \$30,000 be asked for, for the remainder of the current year, and one of \$70,000 for the ensuing year.

## STANDARD SILVER DOLLARS.

The following table shows the amount of silver dollars coined, on hand, distributed, and outstanding at the close of each year since the coinage was resumed; the percentage of the annual coinage distributed each year; and the percentage of the total coinage outstanding at the close of each year:

Fiscal year ended June 30—	Annual coinage.	Total coinage.	On hand at close of year.	Net distri- bution during year.	Outstand- ing at close of year.	age of dis-	standing
1878* 1879 1880 1881 1882 1883 1883 1884	28, 111, 119	\$8, 573, 500 35, 801, 000 63, 734, 750 91, 372, 705 119, 144, 780 147, 255, 899 175, 355, 829	\$7, 718, 357 28, 358, 589 45, 108, 296 63, 249, 300 87, 524, 182 112, 362, 510 135, 810, 368	\$855, 143 6, 587, 268 11, 184, 043 9, 496, 951 3, 497, 193 3, 272, 791 4, 652, 072	\$855, 143 7, 442, 411 18, 626, 454 28, 123, 405 31, 620, 598 34, 893, 389 39, 545, 461	9.924.24035.812.611.616.5	9.9 20.8 29.2 30.8 26.5 23.7 22.6

\* Coinage began in March.

The amount coined to September 30, 1884, was \$182,380,529, of which the Treasury held \$142,349,409. Of this amount \$97,094,881 was for the redemption of silver certificates outstanding. The amount in circulation was \$39,801,953, or about 21.8 per cent. of the total coinage.

The following table shows the coinage and distribution in each month of the fiscal year and to September 30, 1884:

Month.	Monthly coin- age.	Total coined to the end of the month.	On hand at close of the month.	Net distribu- tion during the month.	Outstanding at close of the month.
1883. July August September October November December	2, 340, 000 2, 350, 000 2, 350, 050 2, 350, 000	\$149, 680, 899 152, 020, 899 154, 370, 899 156, 720, 949 159, 070, 949 161, 425, 119	\$113, 904, 649 115, 002, 838 115, 249, 663 116, 654, 559 118, 534, 491 120, 221, 095	\$882, \$61 1, 241, 811 2, 103, 175 945, 154 470, 068 667, 566	\$35, 776 250 37, 018, 061 39, 121, 236 40, 066, 390 40, 536, 458 41, 204, 024
1884. February. March April. May. June July. August. NOTE.—The difference between the amount "on hand," as stated in this table, and the amount in the Treasury, as it appears in the statement of assets and liabilities (p. 7), is \$229,467. Of this amount \$91,998 consists of dollars not yet shipped on orders for which payment has been made, \$10,000 was in transit between offices, and \$147,469 in dollars held in the silver profit fund of the United States mint at San Francisco.

As usual, the amount outstanding reached the highest point in December, when it exceeded \$41,000,000, an aggregate never before reached. The decrease to June was not as great as in previous years, probably owing to the scarcity of one and two dollar notes; and on September 30 the amount was \$680,717 greater than on the same date in 1883.

In September last the new vault in the Treasury building at Washington, having been completed, was turned over to the Treasurer and the storage of silver coin therein was commenced. This vault, with an estimated capacity for \$50,000,000 in silver, and the one approaching completion in New Orleans, the capacity of which is estimated at \$28,000,000, will for some time to come relieve the Treasury offices, which have long been over crowded.

The following table shows the amount of standard silver dollars and fractional silver coin in each office of the Treasury on September 30, 1884, and on that date last year:

	Standard si	lver dollars.	Fractional	silver coin.
Office.	September 30, 1883.	September 30, 1884.	September 30, 1883.	September 30, 1884.

# FRACTIONAL SILVER COIN.

The increase in the amount of fractional silver coin held in the Treasury, nearly \$2,700,000 in the year ended September 30, 1884, was chiefly in fifty and twenty-five cent pieces, and the accumulation was probably due in part to the fact that for the first seven months of that period the expense of distribution was not borne by the Government, and in part to the resumption of the issue of one- and two-dollar notes in June, 1884.

There were 3,897 packages, containing \$2,797,369.62 of such coin, forwarded by express in return for currency redeemed or for deposits in the Treasury of lawful money, during the fiscal year, a decrease of 940 in number of packages and over \$1,000,000 from the shipments of the preceding year.

There were sent by registered mail 2,133 packages, containing \$143,-804.10. an increase of 588 packages over 1883.

The appropriation to pay the cost of transportation by express was exhausted about October 1, 1883, and the deficiency appropriation was not made until May 1, 1884. It is recommended that an appropriation equal to that made for the current year—\$20,000—be requested for the ensuing year. The denominations of the fractional silver coin held in each office of the Treasury on September 30, 1884, were as follows:

# MINOR COIN.

The minor coin in the Treasury increased from September 30, 1883, to the same date in 1884, by over \$300,000, chiefly in five and three cent pieces. Of the latter denomination more than 300,000 pieces found their way back to the Treasury during that period, and it is believed that since the reduction of letter postage there is no good reason for the coinage and circulation of this coin, which resembles the silver dime so much as to be troublesome. The recommendation made in the last report, that provision be made for its redemption and retirement by recoinage, is therefore repeated.

The following table shows the denominations of the minor coin held in each office of the Treasury on September 30, 1884:

In office of	Five cents.	Three cents.	Two cents.	One cent.	Mixed.	Total.
Treasurer United States, Washington	\$1, 074 50	\$11, 919 00	\$800 00	\$1, 547 47	\$984 18	\$16, 325 15

Ì

# FRACTIONAL CURRENCY.

The amount of fractional currency redeemed during the year was \$20,629.50; less than one-half the amount redeemed during the preceding year. The amount outstanding at the close of the year was \$15,355,999.64. The amounts redeemed annually since the issue ceased in 1876, are as follows:

Year.	Amoant.	Q Year.	Âmount.
1877 1878 1879 1880	3, 855, 368 57 705, 158 66	1881	58, 705 55 46, 556 96

Attention is directed to the decrease yearly in the amount of this currency presented for redemption, from which it will be apparent that the estimates carried to the public debt statement of \$8,375,934, as lost or destroyed, will prove to be far below the actual loss or destruction.

The reports by the national banks, of their condition on June 20, 1884, show that they had then on hand of fractional currency \$473,046.66 only. There are no means of tracing any other considerable amounts, and it is not known that there is much more in existence; so that it is believed that the gain to the Government will be not less than \$14,000,000 of the \$368,724,079.45 of such currency issued.

The following statement shows, by issues, the date when the issue ceased, the amount outstanding at the close of the fiscal year 1884, and the amounts redeemed during the year:

Issue.	Date when issue ceased.	Outstanding June 30, 1884.	Redeemed fis- cal year 1884.
Third Fourth	May 27, 1863 February 23, 1867 April 16, 1869 February 16, 1875 February 15, 1876 Total	2, 985, 381 44 3, 698, 439 03	\$245 36 230 33 1, 025 78 5, 101 91 14, 026 12 20, 629 50

## MUTILATED, STOLEN, AND COUNTERFEIT CURRENCY.

The deductions on account of mutilation, from the face value of United States notes redeemed during the year, amounted to \$1,997, on fractional currency to \$33.86, on silver certificates to \$85, and on gold certificates to \$10. The notes from which these deductions were made have not been passed through the accounts and destroyed, but have been retained in this office for the purpose of comparison with fragments of notes that may hereafter be presented for redemption.

There was also deducted, on account of mutilation, from notes of national banks that have failed, gone into liquidation, or are reducing circulation, \$47.50.

There were detected in remittances of United States notes received for redemption 233 counterfeits, of the nominal value of \$3,484; and in remittances of national bank notes, 62 notes stolen prior to regular issue, with the signatures of the bank officers forged thereon, amounting to \$670, and 452 counterfeits, of the nominal value of \$4,895. The denominations of the counterfeit notes received and detected were as follows:

De	nomination.	· · · · ·	U. S. notes.	National- bank notes.
One dollar Two dollars Five dollars Ten dollars Twenty dollars Fifty dollars One hundred dollars			26 305 610 1, 180	\$80 1, 315 1, 060 640 100 900
		•	3, 484	4, 095

Counterfeit fractional currency of the nominal value of \$239.95 and a counterfeit compound interest note of the denomination of \$50 were also detected.

In February last the several assistant treasurers were requested to report to this office the number of counterfeit silver coins detected in the receipts at their offices. Including those detected in this office, the number from February 1, 1884, to September 30, 1884, was as follows:

	Amount received.	Number of counterfeits.
Standard silver dollars. Half-dollars Quarter-dollars		1, 554 579 792

## CERTIFICATES OF DEPOSIT, ACT OF JUNE 8, 1872.

There were issued during the year, under the provisions of the act of June 8, 1872, on deposits of United States notes by national banks, certificates amounting to \$26,870,000; there were redeemed \$27,820,000; leaving outstanding at the close of the year \$12,230,000.

The total issues and redemptions each year, and the amount outstanding at the close of the years, from the date of the first issue, is shown by the following table:

Fiscal year.	Total amount issued.		Outstanding, as shown by the Treas- urer's books.
1873     1874     1875     1876     1877     1878     1879     1879     1880     1881     1882     1884	219, 000, 000 301, 400, 000 378, 285, 000 464, 965, 000 554, 730, 000 601, 785, 000 612, 850, 000 629, 760, 000	$\begin{array}{c} \$25, 430, 000\\ 78, 915, 000\\ 159, 955, 000\\ 268, 260, 000\\ 324, 305, 000\\ 418, 720, 000\\ 525, 400, 000\\ 588, 660, 000\\ 601, 235, 000\\ 616, 400, 000\\ 636, 610, 000\\ 634, 430, 000\\ \end{array}$	\$31, 810, 000 58, 990, 000 59, 045, 000 53, 980, 000 53, 980, 000 46, 245, 000 13, 125, 000 13, 125, 000 13, 360, 000 13, 180, 000 12, 230, 000

Note.—The amounts outstanding differ from those shown by the Public Debt Statements, for the reason that the reports of issues and redemptions of the last days of the fiscal year at the several offices do not reach the Department until after the statements of the debt are made up.

# RECOINAGE OF UNCURRENT COINS.

No appropriation for the recoinage of uncurrent coins was made for the fiscal year 1884; for the current year, however, \$15,000 was appropriated, and in August last \$135,870.27 of fractional silver coin was recoined, at a loss of \$7,229.58.

It is recommended that Congress be requested to appropriate the same amount for the ensuing year.

### SALES OF EXCHANGE.

In addition to the transfers of silver certificates issued upon deposits of gold coin with the assistant treasurer at New York, there were issued during the year, for like deposits, orders payable in gold as follows: Payable at San Francisco, \$1,600,000, on which a premium of \$190.62 was received; payable at New Orleans, \$500,000, at a premium of \$250; and from San Francisco, payable at New York, \$250,000, on which \$750 was realized.

# CLEARING-HOUSE TRANSACTIONS.

In January, 1879, the Treasury became a member of the New York clearing house so far as to make settlements with banks through that institution, instead of separately. It was considered that such an arrangement would be advantageous to the Treasury in aiding resumption and in saving useless handling of money; and in these respects the anticipations have been realized.

There was in force at the time a rule, adopted November 12, 1878, prohibiting the "payment of balances at the clearing-house in silver certificates or silver dollars, excepting as subsidiary coin, in small sums (say under \$10)." Subsequent to the passage of the act of Congress of July 12, 1882, which prescribed that "no national banking association shall be a member of any clearing-house in which such [gold and silver] certificates shall not be receivable in settlement of clearing-house balances," the associated banks resolved that "the resolutions adopted November 12, 1878, be amended so far as they conflict with section 12 of the act of July 12, 1882."

Notwithstanding this formal declaration of compliance with law, neither standard silver dollars nor silver certificates have been or are now offered in settlement of balances at the clearing house; and the Treasury has refrained from taking any steps to enforce the receipt of either of these descriptions of funds, which have therefore not been used in payment of obligations presented through the clearing-house.

The statements which are presented below show that there has been paid to the associated banks, through the clearing-house, from the 1st day of July, 1882, to the 31st day of October, 1884, a period of two years and four months—

During the same period the amounts received by the New York office on account of duties on imports at the port of New York aggregated \$328,533,000, of which there was—

In gold coin and gold certificates	\$208, 590, 000
In United States notes	35,278,000
In silver coin	335,000
In silver certificates	84, 330, 000

From the reports of silver certificates issued, transferred, and redeemed, and of the amounts received for duties and the amount on hand in the New York office, it appears that, after allowing for the reissue by the New York office of a portion of those paid in, silver certificates to a large amount have been brought from other points to New York and used in the payment of duties on imports, for which otherwise gold coin or certificates, or United States notes would have been used.

Of the loss of gold to the Treasury through the mode of settlement with the clearing house, there has been made up to it during the same period \$60,844,000 by means of gold deposits at the New York office, for \$39,771,000 of which silver certificates were issued at Treasury offices in the South and West, and for \$21,073,000 of which silver certificates were paid out at the New York office.

As a consequence of the inability of the Treasury, under the existing practice, to use either the silver dollars or the silver certificates in its settlements with the New York clearing-house, where by far the greater part of its disbursements is made, the available gold ran down from \$155,429,600 on January 1, 1884, to \$116,479,979 on August 12, 1884; while the silver dollars and bullion on hand, not represented by silver certificates outstanding, increased during the same period from \$27,266,037 to \$48,603,958.

As a temporary expedient to stop this drain of gold from the Treasury, the assistant treasurer at New York was directed to use in payments to the clearing house United States notes to the extent of onehalf of the payments. But the amount of these notes in the Treasury, which at the time of the commencement of this mode of payment had accumulated beyond its needs, has now become so much reduced, that they are no longer available for such payments to any considerable extent.

If a return to the former practice of making payments entirely in gold or gold certificates shall result in a continuous loss of gold to the Treasury, not made up to a sufficient extent by receipts of gold from other sources, the question must soon arise for the decision of the Department as to whether it will continue to make in gold or its representative the payments now made through the clearing house, or use in its payments the silver dollars or their representative certificates in some proportion to the relation which silver dollars in the Treasury, not held for certificates outstanding, bear to the available assets, and to an extent similar to that in which they are used at other offices of the Treasury.

In ascertaining what this proportion is, it is to be considered that of the \$134,670,790 in gold coin and bullion now owned by the Government, \$95,500,000 was obtained by the sale of bonds under the resumption act.

ą

If it be held that this amount is available for no other purpose than the redemption of United States notes, the gold which may be used for ordinary payments is \$39,170,790, compared with \$46,831,660 in silver dollars, including bullion, available for the same purposes. Or if it be held that the provision in section 12 of the act of July 12, 1882, suspending the issue of gold certificates whenever the amount of gold coin and bullion in the Treasury reserved for the redemption of United States notes falls below \$100,000,000, is by implication a requirement that this sum shall be held for the redemption of notes, then the balance of gold which may be used for ordinary payments is \$34,670,790.

The following statement shows the transactions of the Treasury with

the New York clearing house for the past two fiscal	years and by months
for the last sixteen months:	

Date.	Checks sent to the clearing- house.	Checks re- ceived from the clearing- house.	Balances due the assist- ant treas- urer.	Balances due the clearing- house.

# DEPOSITARY BANKS.

During the fiscal year the public moneys deposited with national banks designated as depositaries amounted to \$129,100,449.35; making a total of such receipts by them since the establishment of the nationalbanking system of \$4,087,797,294.23.

The balance remaining at the close of the year to the credit of the Treasurer was \$10,716,144.17; and to the credit of disbursing officers, \$3,375,161.01; a total of \$14,091,305.18, to secure the safe keeping and prompt payment of which there were held United States bonds amounting to \$17,060,000. There were 135 national banks acting as depositaries at the close of the fiscal year.

The utility of these agencies of the Government becomes apparent when it is observed that during the fiscal year \$129,100,449.35 of the receipts into the Treasury were deposited with them, thus saving to the Government the expense and risk of transportation to Treasury offices of funds in many instances needed at the places of receipt for the accommodation of disbursing officers and public creditors.

The transfers of amounts from the banks, at times when the balances approached the limit fixed by the securities on deposit, have been accomplished without expense to the Treasury and with satisfactory promptness.

The following table shows for twenty-one fiscal years the transactions with depositary banks:

# SPEAKER'S CERTIFICATES.

The attention of Congress is again respectfully directed, through you, to the mode of paying the certificates issued by the Speaker of the House of Representatives to members for their compensation and mileage. The amount of these disbursements is very large, \$1,805,624 having been appropriated for these purposes for the ensuing year. The Treasurer is unable to verify the accounts upon which the certificates are issued, but is nevertheless held responsible, by the accounting officers, for their proper payment. The duty of making these payments should be devolved by law upon a disbursing officer regularly qualified.

## PACIFIC RAILROAD SINKING FUNDS.

At the close of the fiscal year United States bonds were held in this office for account of the Pacific Railroad sinking funds established by the act of May 7, 1878 (20 Statutes, 56), as follows:

	For the Union Pacific Rail- road Com- pany.	For the Central Pacific Rail- road Com- pany.
Bonds issued to Pacific Railways (currency sixes) Loan of July 12, 1882, 3 per cents Funded loan of 1907, 4 per cents	1,876,450 00	\$444,000 00 194,900 00 199,100 00
Total	2, 270, 100 00	838, 000 00

# TRUST FUNDS.

# The Indian Trust Fund.

The bonds and stocks of the Indian trust fund in the custody of this office, under the act of Congress of June 10, 1876 (19 Statutes, 58), at the close of the fiscal year, amounted to \$1,808,016.83<sup>2</sup>/<sub>3</sub>. Of this amount

418

\$280,000 was in bonds issued to the Pacific Railways (currency sixes), and the remainder in State and corporation stocks and bonds, as shown in the table in the appendix.

Interest is due and unpaid on all the bonds of the following named States, held for account of this fund: Arkansas, Florida, Louisiana, North Carolina, South Carolina, Tennessee, and Virginia. Interest on the remaining bonds, those of the States of Indiana and Maryland, and bonds issued to the Pacific Railways, is paid to date.

# Miscellaneous Trusts.

United States bonds are held in trust for the following:

American Printing House for the Blind	\$250,000
Pennsylvania Company	
Manhattan Savings Institution	75,000
Cincinnati Chamber of Commerce	40,000

One hundred and twenty-five thousand dollars in United States three per cent. called bonds, held for account of the Manhattan Savings Institution, have been delivered to the Secretary of the Treasury for redemption for account of said Institution, leaving \$75,000 in United States four per cent. bonds on deposit. These bonds are held in trust for that Institution as indemnity for certain stolen bonds, as provided for by the act of December 19, 1878 (20 Statutes, 589).

The following described bonds are held in custody in this office for the Secretary of the Treasury, all with the exception of the Louisiana bonds having become the property of the United States, by payment of the principal and interest to the trusts for which they were originally purchased:

Arkansas State bonds	\$625,000
Chesapeake and Ohio Canal bonds	
Louisiana State bonds

# UNITED STATES BONDS HELD FOR NATIONAL BANKS.

At the close of the fiscal year the United States bonds held in trust for the national banks amounted to \$351,207,850. Of this amount \$334,-147,850 was held to secure circulation, and \$17,060,000 to secure public moneys, as follows:

#### To secure circulation.

Bonds issued to Pacific Railways, 6 per cents	\$3, 498, 000
Funded loan of 1891, 4 <sup>1</sup> / <sub>2</sub> per cents	46, 546, 400
Funded loan of 1907, 4 per cents	
Loan of July 12, 1882, 3 per cents	172, 412, 550

334, 147, 850

### To secure public moneys.

Bonds issued to Pacific Railways, 6 per cents	\$120,000
Funded loan of 1891, 41 per cents	1, 776, 500
Funded loan of 1907, 4 per cents	6,776,050
Loan of July 12, 1882, 3 per cents	8, 387, 450

17,060,000

The amount of bonds deposited during the year was \$47,196,600, and of bonds withdrawn, \$69,701,250.

The total movement of bonds held in trust for national banks was \$116,897,850, against \$539,006,000 for the year ended June 30, 1883. The amount of bonds held to secure circulation June 30, 1883, was \$356,596,500, and the amount held June 30, 1884, was \$334,147,850, showing a decrease during the year of \$22,448,650, compared with \$4,126,200 in the preceding year. There was a decrease of \$28,465,300 in the amount of bonds of the

There was a decrease of \$28,465,300 in the amount of bonds of the 3 per cent. loan of 1882, held to secure circulation, making a total withdrawal of this class of securities since the first issue, of \$37,271,300. Up to and including June 30, 1884, calls for about \$80,000,000 3 per cents had matured.

During the fiscal year proceeds of called bonds to the amount of \$14,231,740 were deposited in the Treasury to retire outstanding circulating notes.

### SEMI-ANNUAL DUTY.

The amount of semi-annual duty assessed upon, and collected from the national banks for the fiscal year, the duty being upon circulation only, was \$3,024,668.24.

The total amount of semi-annual duty collected by this office from the national banks since the organization of the system is, as shown in the appendix:

On circulation On deposits On capital	60, 940, 067 16
Total	127, 206, 148 11

### THE REDEMPTION OF NATIONAL-BANK NOTES.

During the fiscal year \$126,152,572.34 in national-bank notes, contained in 23,185 remittances, were presented for redemption, being 22.83 per cent. more than in the preceding year. The smallest monthly receipts during the year were \$7,387,226.93 in September, and the largest \$17,463,933.43 in January; the average monthly receipts were about \$10,500,000. Of the amount presented \$86,922,000, or 68.90 per cent., came from the four cities, New York, Boston, Philadelphia, and Chicago—New York leading in amount with \$54,327,000, or 43.07 per cent., followed by Boston with \$19,971,000, or 15.83 per cent., by Philadelphia with \$6,830,000, or 5.41 per cent., and by Chicago with \$5,794,000, or 4.59 per cent.; the remainder, \$39,230,000, or 31.1 per cent., represents remittances from all other places, and from every section of the country.

The payments made during the year for bank notes redeemed, amounted to \$125,760,169.18. Of this amount, \$77,991,916.83, or 62.02 per cent., was effected by the Treasurer's transfer checks, thus saving the transportation of lawful money. These checks were drawn on all of the assistant treasurers, with due care for the convenience of the party receiving the check; \$24,080,304.62 in United States notes were forwarded by express from Washington, and \$1,173,646.70 in standard silver dollars and fractional silver coin from Washington and the mints; making in all \$25,253,951.32, or 20.08 per cent. of the returns by shipments by express. The remainder of the redemptions, \$22,514,301.03, or 17.9 per cent., was effected by payments at the counter and by credits in account.

The receipts of bank notes for redemption from the principal cities

and the kinds of returns made therefor when compared by percentages are very like those of the preceding year, except that the amounts involved are larger.

The increase of 22.83 per cent. in the amount of bank notes presented for redemption reflects the condition of the mercantile and monetary affairs of the country as shown by reports of increasing business failures and decreasing clearing house transactions; and it is a continuation in the course that bank note redemptions have been pursuing year by year since 1881.

The redeemed national-bank notes assorted by banks of issue and disposed of during the year amounted to \$125,379,514; \$26,255,500 of which were forwarded by express to the banks of issue as fit for further use, \$95,616,064 were delivered to the Comptroller of the Currency, and \$3,507,950 were notes of banks which had failed or which had gone into voluntary liquidation before the passage of the act of Congress of July 12, 1882.

The deposits of lawful money made by national banks during the fiscal year for the withdrawal of their circulating notes amounted to \$29,519,570.

Of these deposits, \$1,301,090 were made under the provisions of section 5222 of the Revised Statutes, \$3,287,410 under section 6 of the act of Congress approved July 12, 1882, and \$24,931,070 under section 4 of the act of June 20, 1874, as modified by section 9 of the act of July 12, 1882. Of the latter amount, \$14,231,740 was deposited from the proceeds of United States bonds called for redemption, that were held by the Treasurer as security for circulation. The largest amount deposited under the act of 1874, during any calendar month, was \$1,607,650 in September, falling far below the limit of \$3,000,000 placed upon such deposits by section 9 of the act of July 12, 1882.

The expenditure from the 5 per cent. fund for transporting, redeeming, and assorting national bank notes during the year was \$160,896.65 on the following accounts: for charges for transportation incurred on remittances of bank notes for redemption to Washington, and on assorted notes fit for circulation forwarded from Washington to banks of issue, \$68,684.11; for salaries, \$88,426.79; for printing and binding, \$1,935.91; for stationery, \$1,133.84; and for all other expenses, \$716. This expenditure is by law required to be assessed on the national banks in proportion to the circulation of each redeemed. There were assorted during the year \$121,911,764 in national-bank notes that are assessable under the law. This amount divided into the expenditure of \$160,896.65 makes an average rate of assessment of \$1.31978 per \$1,000, as against. an average rate of \$1.55634 per \$1,000 for the preceding fiscal year, a decrease of 23.656 cents in the expense per \$1,000, and a decrease in the rate of expense of 15.1 per cent.

The fiscal year last ended makes ten years of national bank note redemptions under the act of June 20, 1874. A brief summary of these redemptions may be of interest:

The aggregate amount of bank notes presented for redemption during the ten years, expressed in round numbers, was 1,404 millions of dollars a yearly average of 140 millions. The actual redemptions varied widely from this average, running up to 242 millions in 1877 and falling off to 59 millions in 1881; in the one case exceeding the average by 102 millions and in the other falling 81 millions below it. To consider these redemptions in periods of five years shows facts equally striking. For instance, the aggregate amount of bank notes presented for redemption during the first five years (1875–1879) was 978 millions of dollars;

while the aggregate amount for the last five years (1880-1884) was but 426 millions-the former amount being more than 129 per cent. greater than the latter. The yearly average of redemptions for the first five years was 195 millions of dollars; the smallest redemptions being 155 millions in 1875, and the largest 242 millions in 1877; for the last five years the yearly average was 85 millions, the actual redemptions varying from 59 millions in 1881, to 126 millions in 1884. In no year of the last five did the redemptions equal those of any of the first five The large redemptions of the years 1875–1879 were to some exvears. tent due to the depression in business succeeding the financial and commercial panic of 1873; and the comparatively small redemptions in the last five years (1880-1884) may be attributed to the recovery during those years from the effects of that panic, the increased activity of business, and the benefits attending the resumption of specie payments. The statistics of the ten years show that the redemptions are invariably affected by the business seasons, decreasing in spring and autumn, when trade is active, and increasing in midwinter and midsummer when trade is dull.

The balances of funds held for the redemption of notes of national banks that have failed, gone into liquidation, or are reducing circulation, have for some years past exceeded \$30,000,000.

The following table shows by fiscal years since 1877 the amounts deposited and redeemed, and the balances remaining on hand :

_		Failed.		Liquidating.

The bank notes presented for redemption during the first three months of the current fiscal year are 31 per cent. in excess of the amount presented during the corresponding period of the last fiscal year. It was in anticipation of this increase that the Treasurer asked and received an appropriation for ten additional clerks for the current year. Of the clerks thus provided, it has been found necessary thus far to appoint but five, and if the work for the remainder of the year can be performed without any further increase of force, it will be done, as it is proposed to conduct the business of redemptions with the least possible expense to the banks consistent with safety and the requisite celerity.

# TREASURER OF THE UNITED STATES.

The assessments made during the year under section 8 of the act of Congress approved July 12, 1882, on national banks making deposits for the retirement in full of their circulation, amounted to 6,239.72. The assessments previously made under that section were in amount 12,979.34; making an aggregate fund that has been placed to the credit of the account "Assessments for Retirement of Circulation" of 19,219.06. Against this fund there will be charged 4,040.87 for expenses incurred during the year in redeeming the notes of the banks so assessed; and there has been previously charged to the fund, 3,220.46; making a total charge of 7,261.33.

## WORK OF THE OFFICE.

The tables herein given and appended show the general result of the work of the office, which has not decreased on the whole, although in some particulars there have been changes. It has been sufficient to require diligent and faithful service from all employed thereon.

During the fiscal year the Treasurer was authorized and required in two instances to act as the disbursing officer, for brief periods, of two of the Departments at Washington, viz: for the State Department during the vacancy occasioned by the death of R. C. Morgan, disbursing clerk, and for the Post-Office Department during the vacancy caused by the removal of J. O. P. Burnside, disbursing clerk; the Treasurer making the payments of salaries usually made by those officers, from the dates when they ceased to act until he was relieved by the appointment and qualification of their successors.

The Treasurer is able to commend the management of the offices of the assistant treasurers, and to state that no loss of the public funds has occurred during the year.

# RESTORATION OF SALARIES.

The Treasurer on this occasion renews the recommendation annually made that an amount be appropriated sufficient to restore salaries in his office to the amounts formerly paid. He is constrained to ask this as an act of justice to faithful and competent officers holding highly responsible positions, from whose salaries as fixed by statute deductions ought not to have been made, even of sums so small as were taken therefrom.

Very respectfully, your obedient servant,

A. U. WYMAN, Treasurer of the United States.

Hon. HUGH MCCULLOCH, Secretary of the Treasury.

NOTE.—The difference between this and other statements of the Treasurer's reports and the publicdebt statements, in the amounts of one and two year notes and compound interest notes outstanding, is due to the fact that the Treasurer's statements are compiled from the reports of *destructions*, while the debt statements are made up from the reports of *redemptions*, and the method of settling the accounts of these interest-bearing notes does not permit their destruction until some time after the redemption. The following will explain the differences on June 30, 1884:

		Compound-in- terest notes.
Reden ptions during fiscal year 1884	\$2,000	\$5, 960
Destrayed during the year On hand undestroyed at beginning of year	580 160	2, 980 1, 150
Destrcyed on account of redemptions of 1884	420	1, 830
On hand undestroyed July 1, 1884	1, 580	4, 130

The redemptions are correctly reported in statement No. 1, ante.

# No. 14.—REDEMPTIONS of UNITED STATES CURRENCY for the fiscal year 1884, and TOTAL REDEMPTIONS to June 30, 1884.

**No. 38.**—APPROPRIATIONS MADE FOR, and SALARIES PAID TO, the FORCE EMPLOYED in the TREASURER'S OFFICE during the fiscal year 1884. REPORT OF THE REGISTER OF THE TREASURY.

# REPORT

#### OF

# THE REGISTER OF THE TREASURY.

### TREASURY DEPARTMENT, REGISTER'S OFFICE,

### November 1, 1884.

SIE: I have the honor to submit herewith a report of the work performed in the several divisions of this office during the fiscal year ended on the 30th of June last.

The work of the loan division decreased on account of the cessation of the operation of refunding the national debt, and the clerical force in that division has been reduced from 35 persons to 23 persons in the aggregate.

The work of the currency division having diminished somewhat, the force there has been reduced also.

The surplus force has been detailed to other divisions and bureaus where its services were required.

The work of the note and coupon division is nearly two years in arrears, owing to the detail of clerks from that division for the performance of current work in other divisions of pressing importance.

If sufficient room should be furnished, I would be able to bring this work up, but with the present accommodations for that division it will not be possible to do so for a very long time, if at all.

Upon the establishment of the Bureau of Navigation the clerical force, records, and files of the tonnage division of this office were transferred thereto in accordance with the requirements of the sixth section of the act of Congress approved July 5, 1884 (23 Stat. at Large, p. 119).

In the estimates for appropriations for the coming fiscal year the number has been reduced to correspond with the actual requirements of the Bureau.

### LOAN DIVISION.

Total number of coupon and registered bonds issued	10 100
Total number of compon and registered bonds issued	48.172
roun number of couper and registered sends issued	10,100
	444 004
Total number of coupon and registered bonds canceled	111,831
	1111001

### AMOUNT ISSUED.

Direct issue (coupon) Direct issue (registered) Registered bonds issued in exchange for conpon bonds Registered bonds issued upon transfers, including Spanish indemnity.	1, 388, 900 00 18, 092, 650 00
Total	181, 174, 208 75

# LIABILITIES OF THE UNITED STATES TO INDIAN TRIBES UNDER TREATY STIPULATIONS.

## LIABILITIES

#### OF THE

# UNITED STATES TO INDIAN TRIBES UNDER TREATY STIPULATIONS.

#### DEPARTMENT OF THE INTERIOR, Washington, September 18, 1884.

SIR: I have the honor to transmit herewith a statement of liabilities of the United States to Indian tribes under treaty stipulations, together with letter of the Commissioner of Indian Affairs, dated 17th instant, forwarding the same.

Very respectfully,

H. M. TELLER, Secretary.

Hon. SECRETARY OF THE TREASURY.

#### DEPARTMENT OF THE INTERIOR, OFFICE OF INDIAN AFFAIRS, Washington, D. C., September 17, 1884.

SIR: I have the honor to inclose herewith, for transmittal to the Hon. Secretary of the Treasury, a statement showing the present liabilities of the United States to Indian tribes under treaty stipulations, the same being required for his report on finances for the year 1884. Very respectfully,

> H. PRICE, Commissioner.

Hon. SECRETARY OF THE INTERIOR.

Names of treaties.	Description of annuities, &c.	Number of installments yet unap- propriated, explanations, &c.	Reference to laws, Statutes at Large.	Annual amount necessary to meet stipulations, indefinite as to time, now allowed, but liable to be discontinued.	Agregate of future appropri- ations that will be required during a limited number of years to pay limited annui- ties incidentally necessary to effect the payment.	Amount of annual liabilities of a permanent character.	Amount held in trust by the United States on which 5 per cent, is annually paid, and amounts which, invest- ed at 5 per cent, produce permanent annuities.
Apaches, Kiowas, and Comanches.	Thirty installments, provided to be expended under the tenth article treaty of October 21,	Thirteen installments, unappro-
