Fiscal year 1890.

The revenues of the fiscal year ending June 30, 1890, are thus estimated upon the basis of existing laws:

From customs.	\$217,000,000 00
From internal revenue	125, 000, 000 00
From sales of public lands	10, 500, 000 00
From fees—consular, letters-patent, and lands	3, 250, 000 00
From tax on national banks	1,500,000 00
From customs fees, fines, penalties, &c	900,000 00
From interest and sinking-fund, Pacific railways	2,000,000 00
From sales of Government property	500,000 00
From deposits for surveying public lands	150,000 00
From profits on coinage, assays, &c	
From revenues of the District of Columbia	2,750,000 00
From miscellaneous sources	3, 950, 000 00
Total estimated receipts	377, 000, 000 00

The estimates of expenditures for the same period, as submitted by the several Executive Departments and offices, are as follows:

the several executive Departments and offices, are as for	lows:
Legislative	\$3, 381, 963 65

Or an estimated surplus of	53, 432, 511 66

Excluding the sinking-fund, the estimated expenditures will be \$275,767,488.34, showing a surplus of \$101,232,511.66.

SINKING-FUND.

The requirements of the act of February 25, 1862 (R. S., 3688, 3689), establishing a sinking-fund for the gradual extinguishment of the public

debt, estimated for the current fiscal year at \$47,583,000, have been thus far met by the redemption of treasury notes, fractional currency, and bonds of the United States which had ceased to bear interest, amounting to \$77,797.35, and by the purchase of \$26,839,650 of the funded loan of 1907 and \$12,143,150 of the funded loan of 1891, at a cost to the fund for premium of \$7,672,222.29 on the former and \$844,206.73 on the latter loan.

SURPLUS REVENUE.

In the last annual report it was estimated that the revenues for the year to end June 30, 1888, would exceed the ordinary expenditures, not including the sinking-fund, by \$113,000,000. It will be seen from the foregoing statement that such excess was in reality \$119,612,116.09, or \$6,612,116.09 more than the Department estimate. It was also estimated in the same report that the like surplus for the fiscal year to end June 30, 1889, would be \$104,313,365.64. Judging from the actual expenditures for the first quarter of this fiscal year, and in the light of receipts and expenditures to the middle of November, it is probable that this estimate will prove to have been fairly accurate, and that the surplus will almost exactly equal the predicted sum, a remarkable result since its factors were subject to all the uncertainties of future revenues and of expenditures to be authorized by a Congress not yet assembled.

The accumulated surplus on September 29, 1888, was \$96,444,845.84; the surplus revenues from that date to June 30, 1889, as estimated, are \$75,365,208.25, making the total accumulation on June 30, 1889, which could be used in the purchase of bonds, \$171,810,054.09; however, between said September 29 and November 22, \$44,399,509.50 has been paid for bonds; consequently if no more bonds were bought between now and June 30 next the surplus would then amount to \$127,000,000. Upon the basis of appropriations recommended by the Department and upon the assumption that the revenues of the fiscal years to end June 30, 1889 and 1890, will be equal, the surplus revenues for the latter fiscal year will be \$101,000,000, which, with the surplus revenues of this year and the surplus already accumulated, make a total of \$228,000,000, which might be used during the next nineteen months in the purchase of the interest-bearing debt, and which ought to be used for that purpose, unless the laws are so changed as to reduce the difference between expenditures and revenue by nearly that sum.

About \$188,000,000 of the four-and-a-half per cent. bonds are now outstanding; they are payable September 1, 1891. The total amount

of interest which will accrue on them from now until their maturity is in round numbers \$25,000,000; consequently the present surplus and the surplus which will probably accrue before July 1, 1890, will suffice to pay the principal of those bonds and all the interest which would accrue upon them should they be permitted to remain unpaid until their maturity.

The principal of the four per cent. bonds is now \$680,000,000, and the interest which could accrue upon them until their maturity in 1907 is about \$500,000,000; a calculation will show that the present surplus revenues, if continued, would pay before 1900 all of these four per cent. bonds and all of this interest. Of course all the money which is saved by purchase of bonds at less than the principal and the interest to accrue but shortens the time when all the bonds may be paid if the holders will surrender them.

Nothing more is needed than the foregoing statement to show the absolute necessity of a readjustment of the public revenues at the earliest possible date.

That it will be necessary to pay nearly the whole of the interest which will accrue upon the public debt if an attempt is made to invest the present surplus revenues in it before its maturity is evident from the fact that even now the Government is paying for the four-and-a-half per cent. bonds a price which realizes only about one-and-a-half per cent. annually, and receives but meager offerings of them at that price.

To continue taxation with no other use for its proceeds than such an investment is a cruel waste of the people's money.

PURCHASE OF BONDS.

Since the last annual report and after the completion of the sinking fund requirements for the year ended June 30, 1888, no bonds were bought until there had been an expression of opinion by resolutions in both Houses of Congress, that it was lawful and proper to invest the surplus in bonds at the premium necessary to obtain them. Under the then state of public opinion in many parts of the country upon this question, both as to its legality and propriety, it seemed wise to seek the coöperation of the Congress in this important matter. I am confident that the delay in the purchase of bonds while waiting for Congress to act resulted in no substantial pecuniary loss to the Government. The purchase was resumed under a circular of April 17, 1888, and since that time nearly all the bonds which have been offered for sale to the Government have been bought by it, as will appear from an inspection of the bond-purchase book. Of course many offerings of bonds

have been declined because the price was thought to be too high, but finally, almost all of the offered bonds were bought at some price. example will show this more clearly. Certain bonds of a par value of only \$326,000 were offered so often that the offerings aggregated over \$19,700,000, but they were at last secured by the Department. Ninetyfour millions of dollars of bonds have been secured under this circular, and a premium paid for the privilege of buying them of about \$18,000,000; the net rate of interest realized from this investment is only about two per cent., and the saving in the total amount of interest which would have been paid had the bonds been allowed to run to maturity, is about Had taxation been reduced so as to leave this money with \$27,000,000. the people, and if it is worth in their business 6 per cent. per annum, the total value of the money to them during the term which these bonds had to run would be about \$83,000,000; thus, there is a resulting loss to the people of \$56,000,000 upon this transaction alone; if this over taxation is not stopped, and if the Government is forced to continue to be a purchaser of its own bonds at the holders' prices, the loss to the people, as could be shown by a like calculation, must be hundreds of millions of dollars.

REDUCTION OF TAXATION.

I cannot too strongly repeat my recommendation of last year to reduce taxation, and as far as possible, without too sudden disturbance of existing interests, to make this reduction in customs taxation, to the end that the people may get the greatest possible benefit from the reduction.

Beside the vexed economic question as to whether a country can make itself prosperous by a tariff; whether it can increase the relative average comfort of its whole people by diverting a portion of its labor and capital from the employments which could be most profitably followed under natural conditions, thereby making certain of the necessaries of life more costly than they would be otherwise, there is a higher moral question which may well be asked, and that is, can a government be kept pure and free which, through the agency of its laws, offers vast pecuniary temptations to some kinds of business?

There are many indications that this question must be answered in the negative. There are many proofs that large classes of our business men have come to depend for success upon their skill in manipulating governmental agencies rather than upon industry, intelligence, and honorable competition.

Is it not possible that eagerness for the money which men assume

XXVIII REPORT OF THE SECRETARY OF THE TREASURY.

comes to them only through government, may lead them to use an evergrowing proportion of their gains to possess and influence the supposed source of their wealth?

And will not the endeavor to make men rich soon become the chief function of our Government? Is not this already the case? If these dangers exist, if they are not overestimated (and they do exist and are not overestimated), then can it be doubted that the true welfare of our people calls for the rescue of the Government from them as speedily as may be?

This can only be done by severing government from private business. Steps should at once be taken in that direction, always, however, let me repeat, bearing in mind interests which have become established under present laws; to the end that they may not suffer unduly while beneficient reforms are made.

CURRENCY CIRCULATION.

The following table shows changes in circulation which are interesting:

Comparative statement showing the changes in circulation from July 1, 1887, to November 1, 1888.

	In circulation July 1, 1887.	In circulation Nov. 1, 1888.	Decrease.	Increase.
Gold coin	48, 697, 259 91, 225, 437 142, 118, 017 326, 667, 219	59, 801, 350 52, 571, 712 140, 613, 658	\$16, 799, 523 41, 637, 920	4, 297, 040 3, 874, 453 49, 388, 221
Totals	1, 317, 826, 052	1,407,871,668	58, 437, 443	148, 483, 059
Net increase			ļ. 	\$90,045,610

Comparative statement showing the changes in money and bullion held in the Treasury from July 1, 1887, to November 1, 1888.

	In Treasury July 1, 1887.	In Treasury Nov. 1, 1888.	Decrease.	Increase.
Gold coin	\$192, 368, 916 211, 483, 970 26, 977, 494 20, 013, 797 2, 362, 585 85, 732, 190 3, 982, 472 6, 934, 963	\$223, 209, 020 249, 979, 440 24, 088, 769 36, 813, 320 4, 167, 954 108, 479, 213 4, 369, 972 6, 189, 142		22,747,023
Totals	549, 856, 387	657, 296, 830	3, 634, 546	111, 074, 989 \$107, 440, 445

As was the case last year, the increase in circulation this year has been in the form of small money. The increase of outstanding paper and coin in denominations of \$20 and less is more than \$115,000,000, thus exceeding the total increase of circulation among the people by about \$25,000,000, and showing a conversion of larger into smaller denominations to that extent.

SILVER COINAGE.

The ownership of silver by the Government again was largely decreased, in spite of the increase of the total stock of silver dollars in the country, by the coinage of 16 months. During the past few years the decrease of circulation caused by the cancellation of national-bank notes, and by the deposit of money with the Treasurer by the banks-to redeem their notes when presented for that purpose, has been but little exceeded by the increased circulation of silver certificates and of standard silver dollars; thus silver seems to have filled the vacuum caused by the retirement of national-bank circulation. The circulating medium in small denominations has been largely converted into silver certificates. And, finally, business has largely increased in the South and in portions of the country where there are few banking facilities. All of these causes have cooperated to postpone any evil effects which might arise from a continued and excessive coinage of the silver dollar; but the danger still exists, and should be guarded against. This can be done by the adoption of the recommendation of my last report, viz., by fixing the maximum of silver which shall belong to the Government, and by providing that when it was exceeded by \$5,000,000, the purchase of silver bullion should cease until the amount owned by the Government should be again reduced to such maximum, or by canceling United States notes to the amount of the excess over the maximum, provided the Government held the notes; if not, then by ceasing the purchase of bullion. Such plan, if adopted, would provide a safety valve which would be self-operative, and would assure the country against any possible danger from silver; for as soon as it exceeded the amount which could be absorbed in the business of the country, it would begin to flow into the Treasury in payment of taxes, and would be there held until business called for it, and when the Government's ownership fell below the maximum, the purchase of the bullion would again begin.

Thus the country's business demand would regulate the country's silver circulation, and there would be little danger of depreciation in the value of the silver dollar as compared with the gold dollar. I venture to predict that if some such safeguard is not adopted, and if thereby

the silver dollar is suffered at some time to lose a part of its purchasing power, that the people will demand the absolute stoppage of the silver bullion purchase, and furthermore, the use by the Government of the whole or a portion of the silver coinage profits for the redemption of the silver dollars which are held by them. It is to be hoped that before such crisis is reached that the nations of the world will have agreed upon some standard of bimetallism which will forever maintain a fixed ratio between gold and silver, but in the meantime there is no occasion to burden ourselves with a stock of silver which may be troublesome.

COIN CERTIFICATES.

The system of coin circulation by means of certificates has certain conveniences and advantages, but it is a costly form of money. year the cost of the \$105,000,000 silver certificates issued was about \$421,000, and as more and more of these certificates are converted into smaller denominations this cost is likely to increase. There are also certain dangers connected with it; for example, in time of war, the possession by the Government of such vast stores of the precious metals might prove embarrassing, and, at a time when the Government was in financial need, the temptation to spend the coin held against outstanding certificates might prove too strong. The loss by the abrasion of the coin, if it was in circulation, would not equal the cost of the certificates. On the whole I think it may be said that the currency of the country would be more safe and more economical if the coin were in actual circulation instead of being held by the Government on pledge against outstanding certificates, as is now the case. But whatever may be thought about the wisdom of the certificate system, there can be no doubt that with it the further coinage of gold and silver, except subsidary coin, is not necessary or Far more gold and silver coins are now in the possession of the Government than probably ever will be needed for the redemption of certificates. Future accumulation of the precious metals should be only in the form of bullion, which can be kept more safely and counted more easily than the coin. If this suggestion was adopted all but one of our mints might be closed, and large, useless expense be saved I earnestly call the attention of the Congress to this subject. annually.

PUBLIC MONEYS.

The monetary transactions of the Government have been conducted through the offices of the Treasurer of the United States, nine assistant treasurers, and two hundred and ninety-seven national bank depositaries.

The gross receipts of the Government, amounting during the fiscal year, as shown by warrants, to the sum of \$664,282,224.76 (\$285,016,150 of which were on account of United States notes, certificates, and conversion of refunding certificates), were deposited as follows, viz:

CUSTOMS ADMINISTRATION.

While much progress has been made in the reformation of abuses in the Customs Service, the inadequacy of the present laws renders it practically impossible to correct many of the evils and inequalities which have so long and so seriously affected our Customs system.

In my last annual report I called attention to the more important defects in the existing law, and indicated certain remedies which appeared advisable, and which may be briefly summarized as follows:

- 1. The elimination from the tariff schedules of the numerous ambiguities and conflicting provisions, which for many years have been constant subjects of dispute and litigation.
- 2. The amendment of the laws relating to appraisement, so as to provide for a more efficient supervision of the work of local appraising officers, by increasing the number of general appraisers, enlarging their powers, and conferring upon them exclusive appellate jurisdiction in questions of value.
- 3. The repeal of existing provisions of law which so restrict the Government in suits for fraudulent undervaluations, as to make it impossible to recover penalties or secure forfeitures.
- 4. The simplification of the law relating to the determination of the dutiable value of merchandise subject to ad valorem rates, particularly with respect to coverings, packing charges, &c.
- 5. Such modifications of the law respecting the forms of declarations to invoices by shippers as will harmonize the same with the requirements regarding entry.
- 6. The amendment of the law so as to subject merchandise entered on *pro forma* invoice to the same conditions as are imposed in case of entry upon "original" or regularly certified invoice.
- 7. The discouragement of speculative suits and of protests and appeals, by providing more effective means for the prompt and summary hearing and final decision of questions of classification.
- 8. A clear definition of what is meant by the words "component material of chief value," and a specific rule whereby the same may be determined.
 - 9. The abolition or limitation of damage allowances.

10. The amendment of the law relating to drawbacks on exported goods, so as to provide for the payment of the full amount of the duties paid on imported materials, and no more, and for such proofs and safeguards as will prevent frauds and imposition in such cases.

Bills now pending before Congress contain provisions which substantially meet these suggestions, and which have, in one form or another, received the sanction of this Department.

Incongruities of the Tariff Schedules.

Certain incongruous provisions of the present tariff schedules are so hurtful to domestic industries, so fruitful of complaints, contentions, and suits, and are so menacing to the Treasury, that I feel constrained to express the hope that they will receive attention at this session of Congress, even if there should be no further legislation respecting the tariff. I refer particularly to the provision of "Schedule K" under which worsted cloths are admitted at lower rates of duty than woolen cloths, and to which I called especial attention in my last annual report (the duties now levied on worsted cloths are, in my judgment, as high as they should be, but the duties on the wool, of which they are woven, should be reduced so as to permit their profitable manufacture, and the duties on woolen cloths should be correspondingly reduced); to the provision of the same schedule for "waste," under which the highest qualities of carded and purified wools are held to be entitled to admission at the same duty as that provided for rags, shoddy, and other adulterants; and to the provision in "Schedule N" for "Hat materials," &c., under which manufactures of silk of various kinds, including broad silks and ribbons, are claimed and held to be entitled to admission at twenty per cent. ad valorem, while "Schedule L" imposes a duty of fifty per cent. ad valorem on all such goods.

Condition and Needs of the Service.

I commend to the attention of Congress the accompanying report of the Supervising Special Agent* as containing valuable information and suggestions concerning the condition and needs of the Customs Service, with detailed statements of the amount of business transacted, the expense thereof, and number of persons employed at each of the customs ports and districts during the past fiscal year; also the value of merchandise and estimated duties thereon transported from exterior to interior ports without appraisement. It is gratifying to be able to show a further reduction in the percentage cost of collecting the customs revenue; during the past year it was 2.94 per cent., for the year 1885 it was 3.77 per cent.

^{*}This report will be found in the Appendix, page 851.

Consolidation of Districts.

I renew the recommendation made last year, and repeatedly made by my predecessors, for the consolidation of customs districts, and the abolition of useless customs establishments. It seems to have been the policy of Congress for several years past to create new ports, but not to discontinue those which have long since ceased to have any importing trade or other business of consequence, and are still maintained at large expense. If this policy is to continue, and appropriations are not to be made annually according to estimates submitted, as required by the fifth section of the act of August 5, 1885, it is imperatively necessary, for reasons detailed in my last annual report, that the permanent appropriation for the expense of collecting the revenue from customs shall be considerably increased.

Fixed Salaries for Collectors and Surveyors.

I also renew the suggestion that the compensation of all collectors and surveyors of customs be fixed by law and paid from the Treasury, and that all fees, emoluments, and perquisites now allowed to these officers be abolished. This should be done both as a measure of economy and to promote the *morale* and efficiency of the service.

Conferences of Local Appraisers.

These conferences have been continued during the past year, and under the increased appropriation made for their support by the act of October 2, last, steps have been taken towards extending their benefits to the more distant ports.

The reports received from the recording officers, and the individual opinions expressed by the appraisers who attend the conferences, so far as heard from, continue to commend their influence as exceedingly beneficial to the service.

FOREIGN COMMERCE.

The values of our imports from and exports to foreign countries during the year ended June 30, 1888, as compared with the preceding fiscal year, were as follows:

Merchandise.

	1887.	1888.
Exports— DomesticForeign	\$703, 022, 923 13, 160, 288	\$683, 862, 104 12, 092, 403
TotalImports	716, 183, 211 692, 319, 768	695, 954, 507 723, 957, 114
Excess of exports	23, 863, 443	28,002,607

XXXIV REPORT OF THE SECRETARY OF THE TREASURY.

Specie.

		:		,	ì	1887.	1888.
ExportsImports	 		 			\$35,997,691 60,170,792	\$46, 414, 183 59, 337, 986
							12, 923, 803

The total value of the imports and exports of the last fiscal year, when compared with that of the fiscal year 1887, shows an increase of \$20,992,328.

[An extended analysis of the condition, growth, leading characteristics, &c., of our foreign trade, as compared with that of preceding years, will be found in the Annual Report of the Chief of the Bureau of Statistics on Foreign Commerce.]

Exports.

The value of our exports of domestic merchandise during the last fiscal year was less than that of 1887 by \$19,160,819.

The following are the articles of domestic product or manufacture the exports of which have materially increased during the last fiscal year:

Increa	sed over 1887.
Animals	\$2, 286, 728

Value of all domestic exports	703, 022, 923 91. 6	683, 862, 104 90. 2

The values of exports of domestic merchandise during the year ended June 30, 1888, classified by groups according to sources of production, were as follows:

	Values.	Per cent.
Products of agriculture Products of manufacture Products of mining (including mineral oils) Products of the forest. Products of the fisheries. Other products.	\$500, 840, 086 130, 300, 087 17, 993, 895 23, 991, 092 5, 518, 552 5, 218, 392	73. 23 19.05 2. 63 3. 51 .82 .76
Total	683, 862, 104	100.00

Imports.

The total value of the imports of merchandise increased from \$692,-319,768 in 1887 to \$723,957,114 in 1888, being an increase of \$31,637,-346, or 4.6 per cent., of which \$9,850,484 represents the increase in the value of free merchandise, and \$21,786,862 the increase in the value of dutiable imports.

The following are the articles of merchandise the imports of which have materially increased or decreased during the fiscal year 1888:

Increase.	
Free of duty:	
Coffee	\$4, 160, 030
Fruits, including nuts, not elsewhere specified	1,020,208
India-rubber and gutta-percha, crude	2, 310, 479
Ore, silver-bearing	1, 317, 279
Tin, bars, blocks, or pigs	1,830,866
Dutiable:	, , , ,
Breadstuffs	
Hemp, and substitutes for	2, 893 , 315

XXXVI REPORT OF THE SECRETARY OF THE TREASURY.

Sisal-grass, and other vegetable substances Flax, hemp, jute, &c., manufactures of Hats, bonnets, and hoods, and materials for. Bars, railway, of steel, or in part of steel Tin-plates, terne-plates, or taggers' tin Seeds, not medicinal, not elsewhere specified	\$1, 697, 893 1, 809, 143 1, 517, 267 1, 731, 378 2, 068, 454 1, 260, 662
Silk, manufactures of. Tobacco, and manufactures of.	2, 003, 076
Tobacco, and manufactures of	2,201,327
Vegetablés	5, 015, 073
Wood, and manufactures of	1,026,845
Wool: Clothing wools	1,109,675
Manufactures of	816, 675
Decrease.	
Free of duty:	
Dutiable:	3, 411, 117
Fruits, including nuts. Hops. Pig-iron.	1, 126, 471
Hops	2,387,174
Pig-iron	1,485,909
Scrap-iron, wrought, and cast, fit only to be remanufactured	1,562,686
Ingots, blooms, slabs, billets, and bars of steel, &c	1,373,921
Sugar, molasses, sugar-candy, and confectionery	5, 025, 181
Combing-wools	1, 197, 995

Imports Entered for Consumption.

The values of imported merchandise entered for consumption in the United States, and the ordinary duty collected thereon, during the last four fiscal years, have been as follows:

Value of merchandise.		erchandise.	Ordinary	Average rate collected on-	
Year ending June 30—	Free of duty.	Dutiable.	duty collected.	Duțiable.	Free and dutiable.
1885	\$192, 912, 234 211, 530, 759 233, 093, 659 244, 104, 852	\$386, 667, 820 413, 778, 055 450, 325, 322 468, 143, 774	\$177, 319, 550 188, 379, 397 212, 032, 424 213, 509, 802	Per cent. 45.86 45.55 47.10. 45.63	Per cent. 30,59 30,13 31,02 29,98

It will be seen that while there was an increase of \$17,818,452 in the value of dutiable imported merchandise entered for consumption during the last fiscal year, as compared with the preceding year, the amount of customs revenue derived from these importations was about the same as the revenue derived from similar importations during the fiscal year 1887.

The principal changes in duties collected on articles and classes of articles imported was an increase in the duty collected on manufactures of wool; flax, hemp, jute, and manufactures of; silk, manufactures of; manufactures of iron; and potatoes; and a falling off in the duty collected on imports of sugar, molasses, and confectionery; raw wool; and iron ore and pig iron.

Leading Articles of Imports Entered for Consumption.

The following table shows the values of the leading and all other articles of imported merchandise entered for consumption in the United States, including both entries for immediate consumption and withdrawals from warehouse for consumption, during the years ending June 30, 1887 and 1888:

FREE OF DUTY.

1882 1883 1884 1885 1885 1886 1887	48, 092, 892 46, 714, 068 45, 382, 775 43, 700, 350	227, 229, 745 240, 420, 500 233, 699, 035 194, 865, 743 197, 349, 503 194, 356, 746 190, 857, 473	1, 212, 978, 769 1, 258, 506, 924 1, 127, 798, 199 1, 079, 518, 566 1, 073, 911, 113 1, 165, 194, 508 1, 174, 697, 321	1,475,181,831 1,547,020,316 1,408,211,302 1,319,717,084 1,314,960,966 1,408,502,979 1,419,911,621	15, 40 15, 54 16, 60 14, 76 15, 01 13, 80 13, 44

Note 1.—The value of commodities carried in cars and other land vehicles was not separately stated prior to July 1, 1870.

Note 2.—The amounts stated prior to 1880 include the value of coin and bullion, those from 1880 to 1888, inclusive, merchandise only.

Thus it will be seen that our foreign commerce, carried in vessels of the United States, measured by its value, has steadily declined from 75 per cent. in 1856 to less than 14 per cent. in 1888. Even of this small percentage only 53 per cent. was carried in steam-vessels bearing our flag.

IMMIGRATION.

The State commissioners heretofore employed under contracts authorized by the immigrant act, have continued during the last fiscal year to conduct, the local affairs of immigration at the following ports: Baltimore, Boston, Galveston, Key West, New Orleans, New York, Philadelphia, Portland, Me., and San Francisco. The immigration at none of the other ports was deemed sufficient to justify the employment of a commissioner, and the business has been conducted by the respective collectors of customs at those ports.

The receipts of capitation tax for the year ending June 30, 1888, were \$291,189.50. The expenditures on account of immigration during the year were \$159,836.10.

The total number of alien passengers coming into the United States, by steam or sail vessel from foreign countries, other than the Dominion of Canada and Mexico, during the year ending June 30, 1888, was 567, 510, of which number 20,621 were tourists or aliens not intending to remain in the United States.

The following statement exhibits the number of immigrants examined by the commissioners of immigration at the several ports named, and the number returned to the countries whence they came, during the year ending June 30, 1888:

	N	o. examine	ed.	No. returned.				
Ports.	Male.	Female.	Total.	Convicts.	Lunatics.	Idiots.	Liable to be- come public charge.	Total.
Baltimore	17,777 26,260 91	15, 625 19, 372 13	33, 402 45, 632 104		2 24		36 71	38 95

Total	343,774	186, 559	529, 333	15	73	19	1,011	1,118

* Includes 12,967 Chinese returning.

The recommendations contained in my last annual report respecting certain amendments to the Immigrant Act, are here repeated as follows:

"That the existing law be so amended that, in addition to the provision prohibiting the landing of aliens liable to become a public charge, idiots, lunatics, and convicts, a fine reasonable in amount should be imposed upon the master of the vessel for every such person brought by him to this country, and that such fine be made a lien upon the vessel.

"Provision should also be made that, where aliens, after having been landed, are found, within a time to be fixed, to be of either of the classes whose landing is prohibited, they should be deported by or at the expense of the master or owner of the vessel bringing them, and, on failure to do so, such master or owner to be subject to fine."

The examinations of immigrants required by the laws relating to alien contract-labor have been made by the collectors of customs at the several ports, aided by the commissioners of immigration at ports where those officers were stationed. No appropriation having been made to carry into effect the provisions of the act during the fiscal year ending June 30, 1888, its enforcement was necessarily made an incident of the customs service, and, with the limited appropriations provided for that service, the means for a perfect and successful execution of the law were wanting. It is believed, however, that the collectors have been vigilant, and have made every effort within their power to prevent the landing of all persons known to them to be within the prohibition of the statute. But their first duty is the collection of the revenue, and as the force at their command has been barely sufficient for that purpose, they should

not be held responsible for evasions of the law which they were power-less to prevent.

All cases of alleged violations of law reported to the Department rere referred to the Department of Justice for prosecution.

At the request of the Department an appropriation has been provided or the present year for the purpose of carrying into effect the provisions of the law. And, in order to render the execution of the law more effective, amendments thereto were passed, October 19, 1888, upon the recommendation of the Treasury Department, by which the Secretary of the Treasury is authorized, in case he shall be satisfied that an immigrant has been allowed to land contrary to law, to cause such immigrant within a period of one year after landing or entry, to be taken into custody and returned to the country whence he came, at the expense of the owner of the importing vessel, or, if he entered from an adjoining country, at the expense of the person previously contracting for the service.

The Secretary of the Treasury is also authorized to pay to an informer who furnishes original information that the law has been violated, such share of the penalties recovered as he may deem reasonable and just, not exceeding 50 per centum, where it appears that the recovery was had in consequence of the information thus furnished.

It is believed that these provisions of the law, with the appropriation to meet the necessary expenses of its proper enforcement, will be sufficient to prevent the landing of persons prohibited by the statute. Under the law as amended, a special force has been employed at the principal ports whose duty is to attend to the enforcement of its provisions.

It will be observed that like provisions are recommended to be inserted by way of amendment to the Immigrant Act, which, if adopted, will render these laws more effective in keeping out undesirable immigrants.

NAVIGATION.

The Bureau of Navigation reports a small increase during the last fiscal year in the tonnage of the country, arising from the building of vessels, chiefly for the coasting trade. The tonnage built during the previous year was 150,450 tons, while that built during the past year was 218,086 tons, comparing favorably, according to the statistics available, with the amount built during that time in Austria, Belgium, Denmark, France, Germany, the Netherlands, Italy, Russia, and Sweden combined. The amounts in either case, however, are small as compared with the tonnage built in the United Kingdom, where, on the

30th of June, 1888, 377 vessels, of 608,118 tons gross, were under construction. It is useless to expect any material increase in the building of iron and steel steam-vessels in this country for the foreign trade under present conditions. Were all the restrictions of the tariff removed, the business would still be hampered by the higher cost of the completed vessel as compared with the expense of a similar ship built upon the Clyde or at Belfast.

The tonnage of the country amounted at the close of the last fiscal year to the respectable figure of 4,191,915.77 tons, and is likely to increase, for the reason that the decrease of the tonnage in the foreign trade is less than the increase in the tonnage built for the domestic trade, more especially upon the Great Lakes, where the business of shipping grain and ore is growing rapidly.

The burdens imposed upon the coasting trade by Federal legislation have nearly all been removed within the past four years, with the exception of such as may arise from the present tariff. Other disabilities, springing from local legislation in regard to compulsory pilotage and taxation, should be abolished by the States. Coasting vessels of one State are forced to compete with those of others, and to burden the former with local taxation, while the latter are exempt therefrom, is injudicious, so far as the interests of the State are concerned, and unfair to the owners of the property.

INTERNAL REVENUE.

The receipts from the several objects of internal taxation during the last two fiscal years, as reported by the Commissioner of Internal Revenue, are as follows:

Ovierta este este un	Fiscal year end	led June 30—
Objects of taxation.	1887.	1888.
Distilled spirits. Manufactured tobacco. Fermented liquors.	\$65,829.321.71 30,108,067.13 21,922,187.49	\$69, 306, 166 4 30, 662, 431 5: 23, 324, 218 4
Fermented liquors. Oleomargarine. Bank circulation. Penalties, &c. Collections under repealed laws.	220, 204 85	864, 139 8 4, 202 5 155, 547 6 9, 768 8
Total		124, 326, 475 3

From the above table it appears that the increase in the collections on spirits during the last fiscal year was \$3,476,844.70; on tobacco, \$554,364.39; on fermented liquors, \$1,402,030.99; and on oleomargarine, \$140,191.84. There was a decrease of \$85.82 in the receipts from

bank circulation, and of \$19,514.62 in the collections under repealed laws. There was also a decrease of \$64,657.22 in penalties collected.

It will be observed that there is a slight discrepancy between the figures representing the total receipts for the two years, as shown in the foregoing table, and the amounts covered into the Treasury by warrants. This is explained by the fact that all sums are not deposited during the same fiscal years in which they are collected. The cost of collecting the internal revenue was reduced during this year from 3.4, the cost for the year 1887, to less than 3.2.

In the enforcement of the law for the collection of the tax on distilled spirits in some of the sparsely-settled portions of the country, and for the suppression of illicit distillation, the officers of internal revenue have suffered loss from the destruction, by persons operating unregistered stills and their lawless comrades, of their vehicles, and the killing or maining of their horses, used while traveling on official duty.

Under existing laws there is no authority to reimburse the officer for the loss or damage sustained from such causes. Section 3171 of the Revised Statutes confers jurisdiction in such cases upon the United States court in a suit for damages; but this is of little or no benefit to the injured person, for the reason that it is usually impossible to obtain evidence to sustain an action against the guilty parties. Or, if they are discovered and convicted, they are generally so irresponsible, pecuniarily, that judgments recovered are entirely worthless.

Sections 3482 and 3483 of the Revised Statutes provide for the reimbursement of the officer for property lost while in the military service. An enactment somewhat similar to the provisions of those sections would not only be just to the civil officers whose duties expose them to loss and damage in property, but would encourage them in the more faithful performance of an arduous and dangerous duty.

The Commissioner in his report reiterates his recommendation in previous reports, that the law be so amended as to authorize the distillation of brandy from all kinds of fruits, under the exemptions now accorded to distillers of brandy from apples, peaches, or grapes exclusively, and to provide for the storage of all kinds of fruit brandy in special bonded warehouses.

He also expresses the opinion, in reference to the proposition to remove the tax from brandy distilled from fruit, that the additional volume of such spirits which might reasonably be expected to be produced under the inducement afforded by competition with grain and molasses spirits, taxed at 90 cents a gallon, would materially affect the smaller producers of the latter spirits, and, by inducing illicit distillation, would present increased difficulties in the enforcement of the law.

With a view to determining the practicability of methylating spirits, as a protection against fraud in the use of alcohol in the arts, free of tax, the Commissioner caused attempts to be made with the chemical apparatus in his office to demethylate certain spirits which had been methylated by the use of wood naphtha, as in Great Britain. The detailed report of the officer who conducted the experiments, and the report received from the inland revenue officer in Canada, both published in the Commissioner's report, indicate that it is not safe to rely upon methylation to prevent frauds in the use of alcohol withdrawn from bonded warehouses, free of tax, for use in the arts.

The Commissioner also again calls attention to the great disparity between the special taxes and the tax on the article itself in the oleomargarine law, and refers to his recommendation in the matter in previous reports.

In order to supply the Congress with means for a more intelligent consideration of the subject, he furnishes copies of the most important of the European laws relating to oleomargarine. He also furnishes a list of the State laws relating to the adulteration of food and drugs, together with a very full list of scientific works of interest to analytical chemists and other officers charged with the enforcement of the recent act of Congress to prevent the manufacture and sale of adulterated food and drugs in the District of Columbia, this act having provided that the analysis of food and drugs shall be performed under the control of the Commissioner of Internal Revenue.

I renew my recommendation to amalgamate the internal revenue and customs systems, thereby reducing the number of officers and the expense of collecting the entire revenues.

A NON-PARTISAN CIVIL SERVICE.

Almost all of the subordinate service of this Department is now appointed under the civil service system of rules. But also five important branches of the Treasury Department are in a large measure removed from political influences, and yet are not under what is technically known as the civil service system. They are the Coast and Geodetic Survey, Life-Saving Service, the Revenue-Marine, the Marine-Hospital Service, and the Light-House Service. Much has been gained in this regard in all of these branches, particularly the latter, during the past three years, and if their administration continues to be conducted in the present spirit it will be of benefit to the country. If the Customs and Internal

Revenue Services were amalgamated into one service and then made strictly non-partisan like the Revenue-Marine, it could be freed from its local character and made a general service, so that a peculiarly efficient collector, appraiser, or other officer, could be sent to a port where his services were especially needed; and the location of these officers might be changed from time to time, thus providing an efficient check upon each other. Such a system, if adopted, would in my judgment promote efficiency and economy. It has been tried to a small extent during the past year with very good results.

REVENUE-MARINE SERVICE.

The arduous and steady work of the revenue cutters has been faithfully and successfully conducted by the officers of this service during the past year, and the only drawback to a large increase in the record of duty performed has been the disabled condition of some of the vessels which require replacement and more extensive repairs than the funds now available will allow.

The following is the record of regular duty for the year ended June 30, 1888:

Aggregate number of miles cruised by vessels	303, 311
Number of merchant-vessels boarded and examined	25, 552
Number of merchant-vessels found violating law in some particular and	, , , , , , , , , , , , , , , , , , ,
seized or reported to proper authorities	1,026
Fines and penalties incurred by vessels so seized or reported	\$311, 844. 00
Number of vessels in distress assisted	526
Value of vessels and their cargoes imperilled by the sea to which assist-	•
ance was rendered	67, 328, 793. 00
Number of persons on board vessels assisted	4,041

Sixty persons were picked out of the water and saved from drowning. The steamers "Rush" and "Bear" cruised during the summer in the vicinity of the Pribylov Islands without encountering any vessels in that part of Behring Sea engaged in the unlawful killing of seals. In their visits to other parts of the Territory of Alaska, the proper maintenance of the customs regulations of the United States was investigated and enforced.

Substantial aid was given by these vessels, at the various points at which they touched, to shipwrecked seamen, destitute miners and explorers, and to the natives of the Territory; medical attendance being frequently afforded, which could be obtained from no other source.

Captain Shepard brought down to San Francisco, in the "Rush," thirty persons whose removal from the exposed situations in which they were placed was a matter of necessity or humanity.

The "Bear," under the command of Captain Healy, went as far north as Point Barrow, and at that place took on board one hundred and sixty

persons, being the officers and crews of the whaling barks "Fleetwing," "Mary and Susan," and "Young Phœnix," and the schooners "Jane Gray," and "Ino," that had been wrecked in a violent gale. Some of these unfortunate seamen were transferred to other vessels of the whaling fleet, but one hundred and eight were conveyed by the "Bear" to San Francisco.

The great danger attending whaling in the Arctic, on the west coast of this country, should lead the United States to render all the assistance in its power to shipwrecked mariners in those regions.

Much assistance could be afforded by a staunch revenue steamer cruising along the coast each year during the whaling season. This duty, as well as any emergent service cannot be met by the "Bear" in her present condition, and a provision of \$25,000 to strengthen and repair this vessel is recommended.

Material assistance has been given, as customary, by the officers and vessels of this service, to the Life Saving Service. The distance cruised while performing this duty aggregated 13,045 miles.

The expenditures of the Revenue-Cutter Service for the year 1888 were about \$912,000.

LIFE-SAVING SERVICE.

The number of life-saving stations in commission at the close of the year was 222.

With the extension of the Service the number of disasters falling within its scope has correspondingly increased. The success of its operations, however, has in nowise abated. The Service has continued to improve its methods and appliances, and this year offers a record excelling any heretofore presented. More lives and property were involved in disasters than in any former year, while the loss of both is in proportion less.

There were during the year 411 disasters to documented vessels. On board these vessels there were 3,653 persons, of whom 3,641 were saved, and 12 lost. The number of shipwrecked persons succored at the stations was 743, and they received 1,898 days relief in the aggregate. The value of property involved is estimated at \$9,555,285; of this \$7,776,405 was saved, and \$1,778,880 lost. The number of vessels totally lost was 71. In addition to the foregoing there were 133 disasters to smaller craft, such as sail-boats, row-boats, &c., involving the lives of 297 persons, of whom 292 were saved, and 5 lost. The property involved in these instances is estimated at \$197,935, of which \$190,255 were saved, and \$7,680 lost.

The aggregate is as follows:

Total number of disasters	544
Total value of property involved	\$9, 753, 220
Total value of property saved	\$7,966,660
Total value of property lost	\$1,786,560
Total number of persons involved	3, 950
Total number of persons lost	17
Total number of shipwrecked persons succored at stations	743
Total number of days succor afforded	1,898
Number of vessels totally lost	71

Thirty seven persons not included in the above were rescued, who had fallen from wharves, piers, &c., and would probably have been lost but for the help of the life saving crews.

The assistance rendered in saving vessels and cargoes has been greater than ever before, 492 vessels having been worked off when stranded, repaired when damaged, piloted out of dangerous places and similarly aided by the station crews. There were also 229 instances, in which vessels were warned off by the signals of the patrolmen when in danger of stranding.

The cost of the maintenance of the Service during the year was \$928,213.03.

Four new stations were established and put in operation during the year: one at Cape Elizabeth, Maine; one at Jerry's Point, New Hampshire; one at Cape Lookout, North Carolina; and one at Velasco, Texas. Contracts have also been entered into for the construction of stations at Point Allerton, Massachusetts; Metompkin Inlet, Virginia; Oak Island, North Carolina; Fort Point, near Galveston, Texas; and Michigan City, Indiana. Several of these are now building and all will probably be completed within the current fiscal year.

Eight of the older stations have been rebuilt since the last report—at Narragansett Pier, Point Judith, and New Shoreham, Rhode Island; Napeague and Far Rockaway, Long Island; and at Bond's, Sea Isle City, and Hereford Inlet, New Jersey. The stations at Great Egg Harbor, New Jersey, and at Sheboygan, Wisconsin, are also being rebuilt. Twelve stations upon different portions of the coast have received extensive repairs and alterations.

The telephone service heretofore established between a number of the stations, having proved of great benefit, has been extended during the year, so that now a large portion of the New Jersey, Delaware, Virginia, and North Carolina coasts are provided with this advantage.

Preliminary surveys and estimates have also been made with a view of establishing it upon Long Island.

MARINE-HOSPITAL SERVICE.

The Supervising Surgeon-General of the Marine-Hospital Service reports that during the year just passed there have been treated 43,203 patients, which is the greatest number of patients furnished relief in any year since the organization of the Service.

The receipts from all sources were \$496,441.69, and the expenditures were \$528,844.66, which amount was paid from the unexpended balance to the credit of this appropriation in the Treasury.

Better facilities for laboratory work and more room for storage purposes have recently been secured by the removal of the Bureau from 1419–1421 G street, N. W., to 1306–1308 F street, N. W., the Department having leased the latter-named premises. The lease began July 1, 1888, but, owing to the necessity of making repairs and alterations in the building, the store-room 1314 F street was occupied temporarily as a store-room and laboratory. The new location of the Bureau is a marked improvement over the old, but the necessity still remains for a building specially designed for the uses of the several divisions.

The Surgeon-General also recommends that a special laboratory for bacteriological work be established at this Capital.

A full statement of the sanitary work of the Bureau is made in his The passage of the law providing for the maritime quarantine stations is a great advance on previous legislation, and will greatly improve the sanitary defenses of the country. A circular has recently been issued by the Bureau concerning the treatment of foul ships, which it is believed will, in the course of time, make a clean oceangoing fleet, as the extraordinary disinfection required in case of the second appearance of a vessel at one of our ports in a foul and unsanitary condition is, in effect, a penalty upon her. The history of the calamitous epidemic of yellow fever in Florida is included in his report, and it gives me pleasure to state that the officers of the Marine-Hospital Service have performed the delicate duties intrusted to them with courage, skill, and enthusiasm. The depopulation of Jacksonville was mainly effected by means of the establishment of a refuge camp, the Surgeon-General proceeding to Florida for that purpose. It is believed that the new legislature of Florida will pass a law creating a State board of health, which will obviate many of the difficulties contended with during the management of this epidemic, as it has been difficult to cooperate with so many boards of health, each having different regulations, scattered as they were throughout the State. For the prevention of the spread of the disease from one State to another, fumigation and inspection stations were established by regulations of August 28, which have required little modification to the It is my opinion that interstate commerce should be so present time. regulated as to strip railroads and other common-carriers of their power to convey disease from one State to another, and that the regulations to be framed in accordance with such law should be enforced by national authority. I transmitted a draft of a bill to the chairman of the Senate Committee on Epidemic Diseases, which was introduced (Senate 3467), but as yet no action has been had upon it. The passage of the bill seems to me a public necessity.

The Surgeon-General recommends the establishment of hospital buildings at New York and Philadelphia, and that an additional medical officer be detailed for his office.

STEAMBOAT INSPECTION SERVICE.

The personnel of the Service on the 30th of June, 1888, was composed of 148 officers, clerks, and messengers, as follows:

One Supervising Inspector-General, ten supervising inspectors, thirty-eight inspectors of hulls, ten assistant inspectors of hulls, thirty-eight inspectors of boilers, eleven assistant inspectors of boilers, one assistant inspector for the examination of life-preservers, ten special inspectors of foreign steam vessels; one chief clerk, three clerks, and one messenger to the Supervising Inspector-General; one clerk to the supervising inspector at New York, twenty-two clerks to local boards of inspectors, one clerk to the special inspectors at New York.

Additions have been made to the *personnel* of the service during the year, as follows: An assistant inspector of boilers appointed for the district of Boston, Mass., and a clerk appointed to the local board of inspectors at Pittsburgh, Pa.

There was discontinued during the year the office of assistant inspector at Pittsburgh, Pa.

The office of Supervising Inspector-General, supervising and local inspectors of steam-vessels, &c., are organized under the act of Congress approved February 28, 1871, now Title 52, Revised Statutes.

The special inspectors of foreign steam-vessels are organized under the amendment to section 4400, Title 52, Revised Statutes, approved August 7, 1882.

STATISTICS OF THE SERVICE FOR THE FISCAL YEAR ENDING JUNE 30, 1888.

Table giving the statistics for the different divisions of the country.

Divisions.	Steamers inspected.	Net tonnage.	Officers licensed.	
Pacific coast Atlantic coast Western rivers Northern lakes Gulf coast	1,043	127, 029, 11 478, 934, 14 181, 524, 56 380, 498, 49 67, 148, 32	2, 273 12, 081 6, 250 6, 502 2, 435	
Total	6, 425	1, 235, 134, 62	29,541	

RECAPITULATION.

Total number of vessels inspected. Total tonnage of vessels inspected. Total number of officers licensed. Increase in number of vessels inspected over preceding years. Increase in tonnage of vessels inspected from preceding year. Increase in number of officers licensed over preceding year.	1, 235 134. 62 29, 541 305 74, 858. 35 1, 553
Expenditures.	4
Salaries Supervising Inspector-General, supervising, local, and assistant inspectors, and clerks, paid from funds in the Treasury not otherwise appropriated, acts July 19, 1886, and April 4, 1888 (appointments authorized by sections 4402, 4404, and 4414, Revised Statutes) Contingent Expenses.	\$218, 563 30
Traveling and miscellaneous expenses	\$38, 593 29
Total expenditures for year	257, 156 59

While the above statement shows an increase of \$1,850.16 over the expenses of the preceding year, the total of such expenses is \$1,522.07 less than the average annual expenses of the service during the 17 years existence of the present steamboat laws, and \$7,990.63 less than the average of the first 5 years the laws were in operation, namely, 1871 to 1875 inclusive, when the average number of steamers inspected was but 3,804, as against 6,425 steamers inspected during the fiscal year embraced in this report.

As under the acts of Congress, approved June 19, 1886, and April 4, 1888, the expenses of the steamboat inspection service are to be paid from the indefinite appropriation of the surplus revenues in the Treasury, instead of from the permanent appropriation of funds collected from fees for inspection of steam-vessels and licensing officers of such vessels, as provided in section 3689, Revised Statutes, it is recommended that Congress enact a law to cover the unexpended balance of such fund \$218,913.17 into the general treasury, so that the accounts of the steam-boat inspection service in regard to it may be closed.

CASUALTIES.

Total number	of	accidents	during	the	uear	resulting	in	loss	of	life.

Cause.	Number.
Fire	
Breaking of steam-pipes and mud-drums. Explosions. Snags, wrecks, and sinking.	
Snags, wrecks, and sinking	i ————

Total number of lives lost by accident from various causes during the fiscal year ended June 30, 1888.

Cause.	Lives lost.
Fire Explosions or accidental escape of steam	54 13
Total	202
Number of lives lost in 1887	220 202
Decrease in 1888	18

Of the number of lives lost, as above reported, 85 were passengers and 117 were officers or persons employed on the steamers.

The loss of life during the past fiscal year, besides being less than in the year previous, is less than the average annual loss for the decade terminated by the year, the average being 213, while the current year's loss is but 202. The annual average loss of life for the past 4 years has been but 184.

The following comparative statement of the work of the Steamboat Inspection Service for the last 30 years, divided into decades, giving the average of each, shows a gratifying progress in the efficiency of the officers of the Service, in carrying into effect the acts of Congress to prevent the loss of life on vessels propelled in whole or in part by steam:

Term—Decade.	Average annual number steam- ers.	Average annual loss of life.	Number of steamers per each life lost.	Average number passengers carried.
1859-1868		721	2.34	100, 000, 000
1869-1878		365	9.98	300, 000, 000
1879-1888		213	25,008	500, 000, 000

Inspection of foreign passenger steam-vessels under the act of Congress approved August 7, 1882.

Annual inspection— At New York		100

The expenses of the previous year were	22, 967	
Decrease for current year.	\$676	86

LIGHT-HOUSE SERVICE.

The Light-House Board reports the changes in the aids to navigation as shown in the following table:

2	June 30, 1887.	June 30, 1888.	Increase.	Decrease.
Light-houses, light-ships, and stake-lights, including those on the rivers. New lights of all kinds established during the year. Lights discontinued during the year Unlighted beacons. Steam and hot-air fog-signals. Fog bells. Whistling-buoys in position. Bell buoys in position. Lighted buoys in position. Other buoys in position.	2,030 75 38 361 77 140 44 51 4 3,791	2, 226 204 8 386 80 152 47 60 4 3, 971	196 129 25 , 3 1 12 3 9	3

The Light-House Board states that the Pacific Coast is insufficiently lighted, and suggests that considering its present and increasing commerce, it should be supplied with every aid to navigation which can be consistently given.

The Board also calls attention to the great need of a light-house on the outer shoal off Cape Hatteras, which it styles one of the most dreaded dangers on the American coast. It gives a copy of each of the papers before it in reference to this subject in an appendix to its Annual Report. This matter is commended to the early attention of the Congress.

It also recommends additional legislation relative to the lighting of bridges over navigable streams. It points to the fact that while the

Board is required to issue regulations for lighting such bridges, that no penalty is prescribed in case of non-compliance with its regulations. It instances the case of the bridge between Brooklyn and New York City, in which the Department of Justice decided that it was not practicable to bring an action against the trustees of the bridge for failure to comply with the regulations, on the ground that the law prescribed no penalty for non-compliance with its provisions. It would seem that the Board should be relieved from the responsibility of regulating the lighting of such bridges, or that such change should be made in the law as would provide for its enforcement.

In this connection attention is called to the necessity for taking some legislative action to regulate private electric lights, on piers and other structures at the waters' edge, which dazzle the eyes of pilots, and endanger shipping in those waters.

The Board continues to call attention to the necessity for the prohibition of private lights and private buoys in United States waters, and for some provision by which it shall be enabled to establish temporarily, and pending the action of the Congress, such inexpensive lights as unforseen emergencies shall make necessary. The Board is now held responsible by public opinion for the proper care of lights over which it has no control, and complaint has been made of the failure of private lights, which mariners naturally suppose are maintained by the Government.

The Board suffers from a lack of adequate facilities for inspecting, maintaining, and repairing the 968 lights on our coasts. The small steam-tenders provided for these purposes are becoming worn out from long and hard usage, and are not being replaced as rapidly as they are needed. Two such tenders have become utterly useless and are beyond economical repair. It is recommended, therefore, that the Board's request that appropriations be made to replace the "Putnam" and the "Warrington" receive prompt and favorable consideration.

COAST AND GEODETIC SURVEY.

During the past fiscal year, every branch of the work made active progress to the full extent of the means afforded by the appropriations.

Surveys involving triangulation and topography, astronomical and magnetic determinations and observations for the value of gravity, were carried on within the limits or upon the coasts of twenty-one States, three Territories, and in the District of Columbia. Hydrographic surveys, including observations of tides and currents, off-shore and inshore soundings, observations of ice movement, and researches in physical

hydrography relating to harbors and bars, were prosecuted in the waters or off the coasts of fifteen States and two Territories.

The necessity for connecting the extended series of triangulations of the Survey with other works of similar character, carried on by independent organizations and methods, was not lost sight of. northeastern coast of Maine the connection of the Island of Grand Manan with the primary triangulation, and the advance towards completion of the triangulation of the St. Croix River, will ultimately join the Coast and Geodetic Survey with the surveys of the Dominion of Canada. In Wisconsin, the Geodetic operations in progress have effected another junction with the work of the U.S. Lake Survey, one having been previously made by the triangulation crossing the State of In Indiana and Illinois, the transcontinental triangulation advancing eastward near the thirty-ninth parallel has been connected with the second and third principal meridians of the General Land The accurate determinations of geographical positions made in the progress of the work, according to the most approved methods of modern geodesy, whether on the coast or in the interior, continue to be freely communicated to the Geological Survey, and serve to check the approximate positions obtained in the course of its preliminary triangulations.

Among the more important field operations of the year may be mentioned the combined observations of precise leveling and direction and velocity of currents for ascertaining the successive tidal levels in New York Harbor, and the relation of the under-run of the Hudson River to New York Bar; the continuation of the study of ice formation and movement in Delaware River and Bay; the prosecution of the explorations of the Gulf Stream; the advance towards completion of the triangulation needed to extend the oblique arc of the meridian from Calais, Me., to Mobile, Ala., and to unite the triangulations of the Atlantic and Gulf Coasts; the extension of the line of transcontinental leveling from the Mississippi River to Little Rock, Ark.; shore-line resurveys of important harbors on the Pacific Coast; determinations of gravity at San Francisco, Mount Hamilton, Cal., and Washington D. C., in connection with similar determinations made on the the Hawaiian Islands, and progress made in the surveys of harbors and channels in Southeastern Alaska.

The special triangulation asked for by the Commissioners of the Topographical Survey of the State of Massachusetts was continued; geodetic operations, in coöperation with State geological or topographical surveys, were carried on in the States of Pennsylvania, New Jersey,

Tennessee, Indiana, Wisconsin, Arkansas, and Minnesota; additional determinations of geographical positions were made by the longitude parties on the Pacific slope.

By direction of the Secretary of the Treasury, and on the request of the Attorney General of the United States, for the use of the Government in the Potomac-Flats litigation, and for the sake of preserving the record of the early maps, already seriously injured by time, the Survey prepared and published an edition, in *fac simile*, of the original "L'Enfant Plan" of the City of Washington (1791), and a reproduction of the "L'Enfant Plan," with the obliterated lines and faded colors restored; an edition of the "Dermott Map" of Washington (1798), and an edition of the "King Plats" of Washington (1803).

By direction of the Secretary of the Treasury, and on the request of the Secretary of State, a special examination and survey was made of the boundary-line between the United States and Canada, in the vicinity of Burnt Island, Lake Huron.

In cooperation with the District Commissioners unusually rapid progress was made in the detailed topographical survey of the District of Columbia.

By direction of the Secretary of the Treasury, and on the request and at the expense of the Hawaiian Government, observations for the determination of latitude and gravity were made on the Hawaiian Islands by an officer of the Survey who was granted leave without pay for that purpose.

Measurements were made upon British admiralty charts of the waters involved in the recent fisheries negotiation with the Government of Great Britain, and memoranda and a large display-map relating to the same were supplied for reference during the discussion of the Fisheries Treaty by the Senate.

In the office special attention was given to the prompt publication of results of immediate value to the interests of commerce and navigation. Discoveries and developments made in the progress of the hydrographic operations were published in the form of Notices to Mariners. Fifteen of these notices were issued during the year, and 35,500 copies were printed for distribution. Corrections made to charts are published in monthly editions of these notices; also lists of new charts and new editions.

Tide Tables, predicting for 1889 the times and heights of high and low water at all of the principal ports on the Atlantic and Pacific coasts, were published; also a new Catalogue of Charts and a new volume of the Atlantic Local Coast Pilot, covering the coast from Tybee Roads to

Jupiter Inlet. A fourth edition of the Pacific Coast Pilot was prepared for the press.

There were published 35 new charts, 12 of which were from engraved plates and 23 from photolithographs. Ten new editions of charts were published from engraved plates, and 15 new editions (including reprints) from photolithographs. Thirteen index maps to the charts of the Survey were engraved on stone; an edition of these maps forms part of the new Chart Catalogue.

The whole number of charts printed during the year was 42,312, an increase of nearly 5,000 over that of the year preceding. Of this number 30,784 were from engraved plates and 11,528 from photolithographs. Distribution was made of 41,327 copies of charts, 8,235 of which were for the use of the Executive Departments, 2,483 for Congress, and 25,278 for sale agents.

Of the annual reports for various years 1,152 copies were distributed. Under the designation of Bulletins, the publication was begun of a series of papers, intended to appear from time to time, as material for them accumulates, and to give early announcement of work accomplished or information of importance obtained. Two of these Bulletins have been published, and three more are ready for the printer.

A desire for the utmost efficiency in the work of the Survey, and for its economical administration, has led during the past few years to a careful preparation of itemized estimates upon a basis adjusted to meet the demands for its extension and development which come from various localities throughout the country. These estimates, when approved by the Department, should, it is urged, receive also the sanction of Congress.

ENGRAVING AND PRINTING.

The work turned out by the Bureau of Engraving and Printing during the last fiscal year exceeded the production of any previous year in its history. There were printed and delivered to the various offices by which they are used, 38,040,984 sheets of securities, an increase of 5,388,777 over the production of 1887, and exceeding the output of any former year by 4,710,238 sheets. A comparison of the results for the three years ending June 30, 1888, with those for the three preceding fiscal years, shows an increase in production of 5,594,336 sheets of securities, and a decrease in expense of \$540,802.18. Of the appropriations made for the support of the Bureau for the last four years, balances amounting to \$270,840.84 have been returned to the Treasury unused.

There were printed during the last year 8,147,000 sheets of silver certificates of the series of 1886. Of this amount \$14,308,000 consisted of one-dollar certificates, and \$10,552,000 of two-dollar certificates. To October 31, 1888, there had been delivered to the Treasurer of the United States \$30,652,000 in one-dollar certificates, and \$20,304,000 in two-dollar certificates.

The great increase in the work of the Bureau during the last two years has made it necessary to increase the number of plate printing-presses operated by steam-power. The new presses have been used to print the green backs of the silver certificates and United States notes and certain varieties of internal-revenue stamps. Their use has resulted in a great economy of expense and room, and the quality of the securities printed by them has been satisfactory to the officers of the Department, by whom they are used, and no complaint has been heard from the general public.

By the executive order of June 29, 1888, all of the places in the Bureau of Engraving and Printing, except the watchmen and the lowest grade of laborers, were brought within the classified civil service, to be filled only by selection from candidates standing highest in the civil service examinations, and certified for employment by the Civil Service Commission. This change in the method of selection for employment caused at once an almost complete cessation of the importunity for place, and it is not doubted that it will result in an improvement in the qualifications of the persons entering this important branch of the public service.

PUBLIC BUILDINGS.

During the year work was commenced on nineteen new buildings, and upon three buildings where extensive repairs were specially appropriated for. Of the new buildings commenced, seven were provided for by legislation of the session of the Congress just closed, and, but for the fact that many of the appropriations have only lately become available, a greater number of buildings would have been under way.

In addition to legislation extending the limits of cost of buildings already under construction, rendering necessary the preparation of new drawings, &c., Congress directed the erection and extensive repairs of forty-one buildings.

An agent of this Department is now visiting the various points to select the most suitable sites, thus providing for the commencement of operations in the Spring.

Work has been so actively prosecuted, and such satisfactory terms secured, that of the seventy-five buildings under construction during

the past year, nineteen have been completed, with every indication that, before the close of the calendar year, this number will be increased to twenty-three, and, under the terms of existing contracts, fourteen more will be completed before the close of the current fiscal year, making in all thirty-seven buildings that will be completed before June 30, 1889.

In addition to the work of construction and special repairs, this Department has under its control nearly two hundred and fifty buildings completed and occupied, to be cared for from the annual appropriation for "Repairs and Preservation," "Vaults, Safes, and Locks," and "Repairs to Heating Apparatus," involving a total expenditure of \$3,914,248.25, which is fully accounted for in the report of the Supervising Architect of this Department, as follows:

The total expenditures during the year for sites, construction of new	
buildings and repairs specially appropriated for	\$3, 414, 057. 63
Repairs and preservation of completed buildings	206, 190, 16
Heating apparatus, buildings under construction	
Heating apparatus, repairs in completed buildings	
Vaults, safes and locks, completed buildings	
Plans, &c	2, 123. 87

In nearly all cases, where the appropriation has permitted such action, the Department has included the entire work of the erection and completion of the building under one contract, and has by this method simplified the records and accounts, secured a more rapid prosecution of the work, and removed the plea so often made that the work of one contractor was delayed by the slow progress made by another.

The most active competition in bidding has been secured by a greater publicity given to the advertisements, and in enlisting the co-operation of the building exchanges throughout the country. The work on all the buildings now under construction has been adapted to the limits of cost placed by Congress, and unless some incident, now unforseen, arises, no request will be made for deficiency appropriations for the prosecution of work.

HALL OF RECORDS.

I again call attention to the necessity for the construction of a fireproof building suitable for the storage of the files and records of the several Departments.

Year by year valuable papers and records are crowded into unsafe and almost inaccessible places, and serious damage and loss must ultimately follow.

I earnestly urge the matter upon the attention of the Congress.

DISTRICT OF COLUMBIA.

The net expenditures on account of the District of Columbia for the fiscal year 1888 were \$4,278,113.48. The revenues deposited in the Treasury on this account for the same period were \$2,650,350.31.

During the fiscal year 1888 there has been issued in payment for judgments of the Court of Claims \$53,400 of the 3.65 per cent. bonds. There has been retired through the operations of the sinking-fund, \$353,000 of the bonded indebtedness of the District, making a net reduction of \$299,600, and reducing the amount annually required for interest \$18,753.50. The issue of the 3.65 per cent. bonds is limited by law to \$15,000,000. The total issue to the close of the fiscal year 1888, was \$14,636,750.

Since the duties of the commissioners of the sinking fund of the District of Columbia were devolved on the Treasurer of the United States by the act of Congress of June 11, 1878 (20 Stat., 106), the bonded debt of the District has been increased \$893,500, by the issue of 3.65 per cent. bonds in exchange for certificates of the board of audit and in payment for judgments of the Court of Claims. Also, by the issue of \$1,092,300 Twenty-year 5 per cent. funding bonds to replace maturing indebtedness. There has been retired during the same period \$3,511,000 of the bonded debt, making a net reduction of \$1,525,200, reducing the annual interest charge \$109,516.72.

The amount realized from the sale of bonds in which the 10 per cent. retained from contractors with the District of Columbia was invested, as required by the act of June 11, 1878, exceeds the sum necessary to pay the amounts originally withheld. The net surplus at the close of the fiscal year 1888 was \$25,966.42, and has been deposited in the Treasury as a miscellaneous receipt to the credit of the United States and District of Columbia in equal parts, as required by the act of February 25, 1885.

Detailed information in regard to the affairs of the District of Columbia will be found in the reports to be submitted by the District commissioners, and by the Treasurer of the United States as ex-officio commissioner of the sinking-fund of the District.

REPORTS OF HEADS OF OFFICES, &C.

The several reports of the heads of offices and bureaus are herewith transmitted. An inspection of these reports will show that the business of the Government has been kept well in hand, that the arrears which the present officers found have been cleared away in most of their bureaus, and that important reforms have been made in the interest of economy and efficiency. These officers are entitled to re-

spect and honorable mention for the zeal and faithfulness with which they have served the public. I wish also to express my high appreciation of the ability and fidelity shown by the great bulk of the officers, clerks, and employés of the Department, both those who have been long in the service and those who have been appointed under this administration. With few exceptions, all have worked harmoniously together to promote the public weal.

CHARLES S. FAIRCHILD, Secretary of the Treasury.

The Honorable

THE SPEAKER OF THE HOUSE OF REPESENTATIVES.

TABLES ACCOMPANYING THE REPORT ON THE FINANCES.

X	LEGAL-TENDER NOTES.							!	٠.
2	The act of February 25, 1862 (12 Statutes 345), authorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denominations, not less than five dollars, as the Secretary of the Treasury might deem expedient, \$50,000,000 to be applied to the redemption of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender in payments of all debts, public and private, within the United States, except duties on imports and interest on the public debt, and to be exchangeable for six per cent. United States bonds. The act of July 11, 1862 (12 Statutes, 532), authorized an additional issue of \$150,000,000 of such denominations as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than \$35,000,000 of a lower denomination than five dollars; these notes to be a legal tender as before authorized. The act of March 3, 1863 (12 Statutes, 710), authorized an additional issue of \$150,000,000 of anch denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The same act limited the time in which the Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act were to be in lieu of \$100,000,000 authorized by the resolution of January 17, 1863 (12 Statutes, 822). the Navy to invest in registered securities of the United States so much of the Navy pension fund in the Treasury January 1 and July 1 in each year as would not be required for the payment of naval pensions. Section 2 of the act of July 23, 1868 (15 Statutes, 170), fixed the interest on this fund at 5 per centum per annum in lawful money, and confined its use to the payment of naval pensions exclusively.					,

FIVE PERCENT. LOAN OF 1881.			•			*	-
The act of January 14, 1875 (18 Statutes, 296), authorizes the Secretary of the Treasury to use any surplus revenues from time to time in the Treasury not otherwise appropriated, and to issue, sell, dispose of, at not less than par, in coin, either of the description of bonds of the United States described in the act of July 14, 1870 (16 Statutes, 272), to the extent necessary for the redemption of fractional currency in silver coins of the denominations of ten, twenty-five, and fifty cents of standard value. The act of March 3, 1875 (18 Statutes, 466), directs the Secretary of the Treasury to issue bonds of the character and description set out							v
in the acro of July 14, 1870 (16 Statutes, 272), to James B. Eads, or his legal representatives, in payment at par of the warrants of the Secretary of War for the construction of jetties and auxiliary works to maintain a wide and deep channel between the South Pass of the Mississippi River and the Gulf of Mexico, unless Congress shall fave previously provided for the payment of the same by the necessary appropriation of money.			-

TABLE A-STATEMENT OF THE OUTSTANDING PRINCIPAL OF THE PUBLIC DEBT, ETC.—Continued.

	Length of loan.	When redeemable.	Rate of interest.	Price at which sold.	Amount authorized.	Amount issued.	Amount out- standing.
The act of July 14, 1870 (16 Statutes, 272), authorizes the issue of \$200,000,000 at 5 per centum, principal and interest payable in coin of the present standard value, at the pleasure of the United States Government, after ten years; these bonds to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. Bonds and coupons payable at the Treasury of the United States. This act not to authorize an increase of the bonded debt of the United States. Bonds to be sold at not less than par in coin, and the proceeds to be applied to the redemption of outstanding 5-20's, or to be exchanged for said 5-20's, par for par. Payment of these bonds, when due, to be made in order of dates and numbers, beginning with	10 years	May 1, 1881	5 per cent	Par		\$517,994,150.00	\$52, 050. 0 0
each class last dated and numbered. Interest to cease at the end of three months from notice of intention to redeem. The act of January 20, 1871 (16 Statutes, 399), increases the amount of 5 per cents to \$500,000,000, provided the total amount of bonds issued shall not exceed the amount originally authorized, and authorizes the interest on any of these bonds to be paid quarterly. The act of December 17, 1873 (18 Statutes, 1), authorized the issue of an equal amount of bonds of the loan of 1858, which the holders thereof may, on or before February 1, 1874, elect to exchange for the bonds of this loan. FOUR-AND-ONE-HALF-PER-CENT. LOAN OF 1891. (RE-FUNDING.)					\$1,500,000,000.00		·
The act of July 14, 1870 (16 Statutes, 272), authorizes the issue of \$300,000,000 at 4½ per centum, payable in coin of the present standard value, at the pleasure of the United States Government, after fifteen years; these bonds to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. Bonds and coupons payable at the Treasury of the United States. This act not to authorize an increase of the bonded debt of the United States. Bonds to be sold at not less than par in coin, and the proceeds to be applied to the redemption of outstanding 5-20's, or to be exchanged for said 5-20's, par for par. Payment of these bonds, when due, to be made in order of dates and numbers, beginning with each class last dated and numbered. ^{&#}x27;In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redemption, and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years. † Exclusive of gold, silver, and currency certificates held in the Treasury's cash, and including \$64,623,512 bonds issued to the several Pacific railroads.

Note 1.—The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific railway bonds.

Note 2.—The figures for July 1, 1879, were made up assuming pending funding operations to have been completed.

Note 3.—The temporary loan, per act of July 11, 1862, is included in the 4 per cents. from 1862, to 1868, inclusive, with the exception of the amount outstanding for August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent. to 6 per cent., and was redeemable on ten day's notice after thirty days; but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent. interest on an average

Note 4.—In the recent monthly statements of the public debt the interest accrued has been added to the principal, making the net debt larger in that amount than the amount herein stated for each year.

LXXIV REPORT OF THE SECRETARY OF THE TREASURY.

^{*}See statement which follows, showing conversions of refunding certificates, for an explanation of the increase during the year in the interest-bearing debt.

Since November 1, 1887, refunding certificates issued in 1879, under the act of February 26, 1879, have been presented for conversion into 4 per cent. bonds, as fol-

Principal	\$25, 460.00
Accrued interest due thereon	9, 122, 90
Total	34, 582. 90
For which settlement was made as follows:	

Four per cent. bonds issued on account of principal	\$25, 460.00	+ *
Four per cent, bonds issued on account of accrued interest	7, 790, 00	
- · ·	7, 790. 00	\$33, 250.00
Interest paid in cash		1, 332, 90
Total		34, 582. 90

The certificates still outstanding amount to \$129,620.

The reduction in the annual interest charge, by reason of the changes during the year ended October 31, 1888, is as follows:

	cent. bonds issued		
37-4348		_	0.510.111.40

During the twelve months ended October 31, 1888, the interest-bearing debt was reduced by the redemption of 4 per cent. bonds amounting to \$50,412,650, \$10,000 of which was purchased under the circular of September 22, 1887, and was applied to the sinking-fund for the fiscal year 1888. The balance, \$50,402,650, was purchased under the circular of April 17, 1888, and \$26,839,650 of the amount was applied to the sinking-fund for the fiscal year 1889.

Four and one-half per cent. bonds were also purchased under the circular of April 17, 1888, amounting to \$33,242,600, and \$12,143,150 of the amount was applied to the sinking-fund for 1889. The average rates of net premium paid for the bonds purchased for the sinking-fund were 6.952 per cent. for the 41 per cents., and 28.659 per cent for the 4 per cents. Average rates for those purchased with the surplus were 7.558, and 27.017 for 41 and 4 per cent. bonds, respectively.

LXXXIV REPORT OF THE SECRETARY OF THE TREASURY.

TABLE H.—STATEMENT SHOWING THE CHANGES IN THE INTEREST-BEARING DEBT OF THE UNITED STATES, ETC.—Continued.

The redemptions and cancellations of United States bonds and seven-thirty notes during the twelve months ended October 31, 1888, were as follows:

• • •	
Seven-thirty notes of 1861	
Seven thirty notes of 1864 and 1865	. 3, 400
Oregon war debt, act March 2, 1861	. 1,150
Five-twenties of February 25, 1862	*10,000
Ten-forties of 1864	5, 200
Consols of 1865, act of March 3, 1865	. 16,500
Consols of 1867, act of March 3, 1865	
Consols of 1868, act of March 3, 1865	
Loan of July and August, 1861 (6 per cent.)	26, 450
Loan of March 3, 1863 (81s) (6 per cent.)	
Funded loan of 1881 (5 per cent.)	
Loan or July and August, 1861 (continued at 31 per cent.)	. 3,050
Loan of March 3, 1863 (continued at 32 per cent.)	
Funded loan of 1881 (continued at 32 per cent.)	
Loan of July 12, 1882, 3 per cent	835, 900
	1, 089, 500
Funded loan of 1891, 44 per cent., purchased under circular April 17, 1888	
Funded loan of 1907, 4 per cent., purchased under circular September 22, 1887	
Funded loan of 1907, 4 per cent., purchased under circular April 17, 1888	50, 402, 650
Total redemptions and cancellations	84, 744, 750

^{*} By anthority of the act of August 5, 1882, \$500 was added January, 1888, to the amount outstanding on the debt statement of the loan of February 25, 1862, to adjust an erroneous settlement of \$500 bond No. 1716.

NOTE 1.—The aggregate circulation should be reduced by the total amount of gold, silver, and legal-tender certificates, to obtain the net circulation, as the funds which these certificates represent are also included in the aggregate.

NOTE 2.—The stock of gold coin and bullion and of silver coin and bullion in the United States at the close of each year from June 30, 1873, to June 30, 1888, is the amount estimated by the Director of the Mint.

Gold certificates.

Gold.

Silver dollars.

Subsidiary silver.

Note 3 .- Of the fractional currency outstanding, it is estimated that \$8,375,934 have been lost or destroyed, act of June 21, 1879.

NOTE 4.—The State bank circulation includes only the notes of State banks converted to national banks. The amount of the outstanding notes of non-converted State banks is estimated at \$148,434.

[†] Includes trade-dollars.

EXPLANATION OF DIAGRAM.

The diagram shows the amount in millions and tens of millions—a million being indicated by each space between the lines.

The reason for its non-extension beyond the year 1878 is that a new element was introduced into the circulating medium of the country in this year, just as in 1862 the introduction of the legal-tender notes brought about an entire change in the monetary system of the United States.

The first item upon the diagram designates the amount of the national-bank notes in actual circulation, excluding therefrom the notes held by national banks and those which had become a charge upon the Treasury, owing to the deposit of legal-tenders made in order to retire these notes from circulation.

The second item shows the amount of gold coin and bullion in the United States Treasury, held as a reserve for the redemption of the legal-tender notes and for the redemption of the gold certificates. These amounts being deducted, the balance will show the free gold and bullion contained in the Treasury.

The third item shows the reduction or increase of the public debt, as shown by the monthly statement published at the end of each month.

The fourth item shows the amount of legal tenders held in the Treasury, and, with the fifth item, which must be first deducted, shows the amount of these notes applicable to the redemption of national-bank notes.

The sixth item shows the amount of gold certificates actually in circulation, and which had become a charge upon the gold coin and bullion in the Treasury.

The seventh item shows the amount to the credit of the national-bank redemption fund. This fund represents the amount of unredeemed national-bank notes, which, so long as they remain outstanding, inure to the benefit of the Treasury.

The eighth item includes the subsidiary coin, silver bullion, and standard silver dollars in the Treasury, the issue of the standard dollar having resulted in the retirement into the Treasury of the subsidiary silver, which would otherwise have remained in circulation.

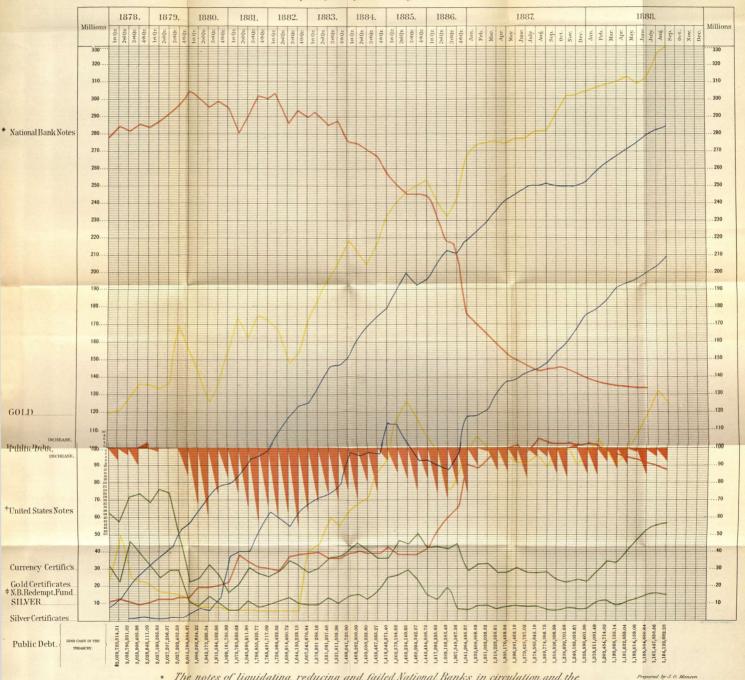

The ninth item shows the amount of silver certificates actually outstanding, which had become a charge upon the standard silver dollars held in the Treasury.

The tenth item shows the total amount of the public debt, less the cash in the Treasury, at the close of each period given.

LXXXVI

DIAGRAM

Showing the amount of NATIONAL BANKNOTES in circulation, the amount of GOLD, SILVER and UNITED STATES NOTES in the TREASURY of the UNITED STATES, with the corresponding liability in outstanding GOLD, SILVER and CURRENCY Certificates, and the Public Debt.

- The notes of liquidating, reducing and failed National Banks, in circulation and the notes held by National Banks are not included herein.
- The issue of United States Notes is fixed by law at \$ 346, 681, 016. See Act May 31, 1878.
- Held by Treasurer U. S. for redemption of notes in circulation, of liquidating, reducing and failed National Banks.

Prepared by J. O. Manse U.S. Treasurer's Office.

Table J.—Statement of the Standard Silver Dollars, Silver Bullion and Subsidiary Silver Coin in the Treasury at the end of each monte from December 31, 1877, to October 31, 1888.*

1

APPENDIX.

REPORTS OF HEADS OF BUREAUS AND SUPER-VISING SPECIAL AGENT.

(No. 1.)

REPORT OF THE TREASURER.

TREASURY OF THE UNITED STATES, Washington, November 1, 1888.

SIR: I have the honor to submit the annual report on the operations and condition of the Treasury.

RECEIPTS AND EXPENDITURES.

The net revenues for the fiscal year ending June 30, 1888, were \$379,266,074.76, and the net expenditures \$267,924,801.13. As compared with the preceding year, the revenues were \$7,862,797.10 greater and the expenditures \$7,378.84 less. The following statement shows the amounts for the two years and the increase and decrease:

ň	1887.	1888.	Increase.	Decrease.

The revenues of the Post-Office Department were \$52,229,384.97, of which \$22,877,485.05 was deposited in the Treasury and \$29,351,899.92 was disbursed by postmasters. The total expenditures were \$55,894,-298.06, or \$3,664,913.09 more than the receipts. The advances from the deficiency appropriation amounted to \$3,160,820.47.

THE STATE OF THE TREASURY.

The net changes that occurred during the year in the state of the Treasury were an increase of \$37,526,468.86 in the total assets and a decrease of \$23,053,394.77 in the total liabilities, making an increase of \$60,579,863.63 in the aggregate balance. There was an increase in every class of assets excepting silver, and minor coin, and a decrease in every class of liabilities excepting checks and drafts outstanding and balances remaining to the credit of disbursing officers. The total assets, including certificates of deposit in the Treasury cash, increased \$142,425,251.29, from \$622,304,284.22 to \$764,729,535.51. A summary of the assets and liabilities on June 30, 1887, and June 30, 1888, and of the changes between the two dates, is given in the following statement:

In the appendix will be found the detailed statements for the same dates, together with statements of the assets and liabilities of each office of the Treasury, and the composition of the bullion fund on June 30, 1888, summed up and reconciled with the accounts of the Register of the Treasury. These statements show the actual condition existing at the close of business in each office on the day for which they are made up, and therefore differ from the monthly statements heretofore published, and also from the statistical tables in the appendix, which are compiled for the last day of each month from the latest reports then in the Treasurer's hands. The difference is therefore one of date and not of amount. Similar differences have been minutely explained in former reports.

UNAVAILABLE FUNDS.

There occurred during the fiscal year a deficit of \$10,197.65 in the sub-treasury in New York. The amount of the deficit in the sub-treasury in New Orleans was reduced by \$681.75. The net change in the total sum described as unavailable was therefore an increase of \$9,515.90. In the appendix will be found a statement of these funds, classified as they appear in the statement of assets and liabilities of the several The amount on deposit with the States under the act of June 23, 1836, is not carried on the books of the Treasurer as an asset, though it stands charged against him on the books of the Register of the The amount of the deficit in the branch mint at San Francisco is carried as an asset by the mint, but those in the other mint offices are not. Of the total of \$1,429,450.34 unavailable from loss, \$1,396,879.50 is excluded from the cash as reported in the public debt statement, while \$32,590.84, composed of the deficit of \$20,959.81 in the sub-treasury at New Orleans and the defalcation of \$11,611.03 in the assay office at Boisé City, is included.

There is no fund that can be used for the detection of crimes resulting in the loss of any of the moneys or securities in the Treasury, or for bringing the guilty persons to trial and punishment. If such work should become necessary it would have to be undertaken at the Treasurer's private expense. It is respectfully urged that a sufficient fund be provided for this purpose. There should also be a fund that would enable the Treasurer personally to visit the sub-treasuries whenever, during the regular examinations or at other times, it would be to the

advantage of the public service.

THE PUBLIC DEBT.

In the appendix will be found a recapitulation of the public debt statement for the end of each fiscal year since June 30, 1880. There is also given a statement of the changes that occurred during the last fiscal year in the principal of the interest-bearing debt and debt on which interest has ceased, showing a net decrease of \$74,788,920. Four per cent. bonds of the face value of \$48,150 were issued in exchange for \$37,200 in refunding certificates and the interest on them. The amount of 5 20 bonds of 1862 outstanding, as shown by the debt statement, was increased by \$500, under the provisions of the act of August 5, 1882, which enabled the accounting officers to make the necessary entries on the books of the Department to correct an error caused by the payment of a bond, in 1877, on fraudulent evidence that it had been destroyed. The redemptions of this class of bonds were \$11,800, but the decrease shown by the debt statement was only \$11,300.

Under the Department circular dated August 3, 1887, interest amounting to \$2,136,839.48 on 4 and 4½ per cent. bonds was prepaid with a rebate of 2 per cent. per annum. The amount of the rebate was \$9,259.22. The following statement shows the particulars of this transaction:

COIN AND PAPER CIRCULATION.

The gold and silver coin and bullion in the country and all kinds of notes and certificates amounted, on June 30, 1887, to \$1,925,259,882,37, and on June 30, 1888, to \$2,093,562,072.17. The increase of the stock of gold and silver was \$84,877,789.35, the greater part of which was in gold. The increase of the paper currency was \$83,424,400.45, resulting from an increase of \$110,319,955 in certificates and a decrease of

\$26,895,554.55 in notes and fractional currency. The following statement, taken from a table in the report of the Secretary of the Treasury, compiled in this office, shows the amounts and total of gold and silver and also of the several kinds of paper money on the two dates:

Kind.	June 30, 1887.	June 30, 1888.

Aggregate	1, 925, 259, 882, 37	2, 093, 562, 072. 17

The gold and silver are given as estimated by the Director of the Mint and the bank notes as reported by the banks to the Comptroller of the Currency. The amounts of the Government issues of notes and certificates are taken from the public-debt statement.

In the appendix will be found, in addition to the usual tables, statements showing the total issues and redemptions of United States notes and gold and silver certificates, and also the amounts and percentage, of the denominations of each outstanding for a series of years.

UNITED STATES NOTES.

The redemptions of United States notes at the Treasury during the year amounted to \$63,652,000, against \$74,068,000 the year before. The redemptions at New York in gold were \$692,596, making \$26,736,454 in all since the resumption of specie payments. There have been no redemptions in gold at San Francisco under authority of the act of March 3, 1887. The amounts of each denomination outstanding at the close of each of the last four fiscal years are shown in the following table:

Denomination.	1885.	1886.	1887.	1888.
One dollar Two dollars Five dollars Ten dollars Ten dollars Tiventy dollars Fifty dollars Fifty dollars Five hundred dollars Five hundred dollars Five thousand dollars Ton thousand dollars Ten thousand dollars	25, 295, 069, 20 75, 997, 805, 00 64, 539, 386, 00 55, 124, 509, 00 23, 459, 895, 00 32, 896, 790, 00 16, 557, 000, 00 28, 716, 500, 00	\$17, 603, 922. 40 18, 204, 369, 60 85, 629, 219, 00 66, 658, 661, 00 55, 078, 379, 00 23, 291, 265, 00 31, 359, 700, 00 12, 424, 000, 00 37, 361, 500, 00 60, 000, 00	\$8, 797, 376. 50 9, 008, 572. 00 95, 064, 850. 50 80, 371, 471. 00 63, 929, 361. 00 21, 908, 985. 00 29, 643, 400. 00 7, 704, 500. 00 45, 000. 00 10, 000. 00	\$5, 180, 232. 50 4, 976, 936. 00 81, 054, 872. 50 86, 264, 401. 084, 813, 924. 00 21, 870, 550. 00 31, 104, 100. 00 8, 068, 000. 00 24, 303, 000. 00 35, 000. 00 10, 000. 00

Outstanding	346, 681, 016. 00	346, 681, 016. 00	346, 681, 016. 00	346, 681, 016. 00

With the increase of the gold and silver certificates, the volume of which together is now larger than that of the United States notes, the importance of the latter in the circulation of the country has declined. The denominations below ten dollars are being displaced by silver certificates, and those above one hundred dollars largely by gold certificates.

The question of the probable loss and destruction of paper currency has received some attention, without any very definite result. In the appendix are given tables showing the course of the redemptions of the first issues of United States notes. It must be borne in mind that these notes have lost none of their qualities as money through age or any other cause than wear. Many of them, of certain denominations, have doubtless performed the single function of lying in the reserves of banks, where they have had little handling, and where they are likely to remain until they are called in by the Government. Until this is done, or some other cause brings them to the Treasury, the loss from destruction must be more or less a matter of conjecture. The most careful estimate from the data at hand would place it at 1 per cent. or less, according to the denomination. This is supported, too, by the history of earlier paper issues of the Government.

CERTIFICATES OF DEPOSIT, ACT OF JUNE 8, 1872.

The certificates of deposit issued during the year for United States notes received from national banks amounted to \$24,110,000. The redemptions were \$18,465,000, leaving outstanding \$14,665,000, which is a little below the average for the last nine years. The total amounts issued, redeemed, and outstanding at the end of each fiscal year since the first issue are shown in the following table. The decrease of the use of these certificates since 1886 is due in great part to the change in the manner of redeeming them, the holders now receiving the same notes that were deposited, instead of new notes as formerly.

Fiscal year.	Total issued.	Total redeemed.	Outstanding at close of fiscal year.	Fiscal year.	Total issued.	Total redeemed.	Outstand- ing at close of fiscal year.
1873	\$57, 240, 000 137, 905, 000 219, 000, 000 301, 400, 000 378, 285, 000 464, 965, 000 554, 730, 000 601, 785, 000	78, 915, 000 159, 955, 000 268, 260, 000 324, 305, 000 418, 720, 000 525, 400, 000	58, 990, 000 59, 045, 000 33, 140, 000 53, 980, 000 46, 245, 000 29, 330, 000	1882 1883 1884 1885 1886	649, 790, 000 676, 660, 000 733, 215, 000 780, 865, 000	616, 400, 000 636, 610, 000 664, 430, 000 703, 930, 000 762, 755, 000 806, 745, 000	13, 360, 000 13, 180, 000 12, 230, 000 29, 285, 000 18, 110, 000 9, 020, 000

In the appendix will be found a tabulated statement of the United States notes and of these certificates in the Treasury cash, the amount of the certificates in circulation, and the net amount of United States notes in the Treasury at the end of each month from March, 1878.

GOLD CERTIFICATES.

The volume of gold certificates outstanding increased in the year to \$142,023,150, the highest point yet reached at the end of any year since the issue began. The excess of the issues over the redemptions for the year was \$20,536,333. In the same time the amount in the Treasury cash decreased from \$30,293,310 to \$20,928,500, so that

the total increase of the circulation was \$29,901,143. The greater part of the change was in the denominations of \$1,000 and \$5,000, which are much used in the transactions of the sub-treasury in New York with the custom house and the clearing-house. The amount outstanding of the series of 1863 was reduced to \$2,333,580. The following statement shows the amounts of each denomination issued and redeemed during the year, the total issued and redeemed, and the amounts outstanding June 30, 1887, and June 30, 1888:

		:	Issued.	Rede		
Denomination.	Ontstanding June 30, 1887.	During fiscal year.	To June 30, 1888.	During fiscal year.	June 30, 1888.	Outstand- ing June 30, 1888.

The table below exhibits the amounts issued, redeemed, and outstanding for each fiscal year since the issue began, on November 13, 1865:

SILVER CERTIFICATES.

The silver certificates issued during the year amounted to \$105,896,000, and those redeemed to \$21,947,378, increasing the amount outstanding from \$145,543,150 to \$229,491,772. The holdings of the Treasury, however, increased from \$3,215,200 to \$28,732,115, so that the increase in the actual circulation was only \$58,431,707. The certificates issued were nearly all of the denomination of \$10 and under, of which the bulk of this circulation now consists. The following table shows, by de-

nominations, the amount outstanding June 30, 1887, the amounts issued and redeemed during the year, the total issues and redemptions, and the amount outstanding June 30, 1888:

Denomination.	Outstanding June 30, 1887.	Iss	aed.	Redee		
		During fiscal year.	To June 30,	During fiscal year.	To June 30, 1888.	Outstanding June 30, 1888.

Total	145, 543, 150. 00	105, 896, 000	375, 898, 000	21, 917, 378. 00	146, 406, 228	229, 491, 772

As it had been impossible to meet the demand for the one and two dollar certificates, it was deemed expedient to suspend their issue for a while in order to accumulate a supply, and accordingly none were paid out between October 18, 1887, and February 3, 1888. Since the latter date the Treasurer has been able most of the time to furnish them as they have been asked for. The seasoning which the notes now receive after they come from the presses fits them better for wear, and the result is seen in the improved condition of those now in circulation.

The excess of standard silver dollars in the Treasury over the silver certificates outstanding, inclusive of those on hand, rapidly declined during the first eight months from about sixty-six millions to a daily average of about twenty millions. Whether the limit will be reached, so that the issues must be confined to the amount of the redemptions and of the receipts of the dollars, depends of course upon the capacity of the country to absorb the paper, and can not certainly be foretold. It seems likely, however, that before long the whole of the Treasury stock of the coin will be represented by certificates.

The issues and redemptions and the amounts outstanding, by fiscal years, are given in the following statement:

Fiscal year.	Issued dur- ing fiscal year.	Total issued.	Redeemed during fiscal year.	Total re- deemed.	Outstanding at close of fiscal year.
1878 1879 1880 1881 1882 1883 1883 1884 1885 1886 1887	\$1, 850, 410 9, 149, 590 10, 018, 000 40, 912, 000 24, 300, 000 52, 280, 000 40, 000, 000 4, 600, 000 51, 852, 000 105, 896, 000	\$1, 850, 410 11, 000, 000 21, 618, 040 61, 930, 060 86, 230, 000 121, 270, 000 213, 550, 000 218, 150, 000 270, 002, 000 375, 898, 000	\$8, 460, 050 183, 680 2, 119, 740 9, 369, 820 12, 519, 879 20, 005, 140 20, 990, 045 28, 523, 971 22, 286, 525 21, 947, 378	\$8, 460, 050 8, 643, 730 10, 763, 470 20, 133, 290 32, 653, 169 52, 658, 309 73, 648, 354 102, 172, 325 124, 458, 850 146, 406, 228	\$1, 850, 410 2, 539, 950 12, 374, 270 51, 166, 530 66, 096, 710 88, 616, 831 120, 891, 691 115, 977, 675 145, 543, 150 229, 491, 772

STANDARD SILVER DOLLARS.

The coinage of standard silver dollars during the year amounted to \$32,484,673, bringing the total coinage to \$299,424,790. Of the year's increase in the stock of these coins, \$32,445,517 rested at the year's end in the vaults of the Treasury, and \$39,156 in the hands of the people.

The following table shows the annual coinage and movement:

Fiscal year.	Annual coinage.			Net distribu- tion during year.	inget alone	of annual	Percentage of total coinage out- standing.	
1878 1879 1880 1881 1882 1683 1884 1885 1886 1886 1887	27, 637, 955 27, 772, 075 28, 111, 119 28, 099, 930	\$8, 573, 500 35, 801, 000 63, 734, 750 91, 372, 705 119, 144, 789 147, 255, 899 175, 355, 829 233, 884, 381 233, 723, 286 266, 990, 117 299, 424, 790	\$7,718,357 28,147,351 44,425,315 62,544,722 87,153,816 111,914,019 135,560,916 165,418,112 181,253,566 211,483,970 243,879,487	\$855, 143 6, 798, 506 11, 655, 786 9, 518, 548 3, 162, 981 3, 350, 916 4, 453, 933 -1, 323, 644 13, 998, 451 3, 036, 427 39, 156	\$855, 143 7, 653, 649 19, 309, 435 28, 827, 983 31, 990, 964 35, 341, 880 39, 794, 913 38, 471, 269 52, 469, 720 55, 506, 147 55, 545, 303	9. 9 24. 9 41. 7 34. 4 11. 3 11. 9 15. 8	9. 9 21. 3 30. 2 31. 5 26. 8 24. 0 22. 6 18. 8 22. 4 20. 7 18. 5	

Owing to the scarcity of one and two dollar notes, and the annual demand occasioned by the movement of crops, between the end of May and the end of November, 1887, nearly nine millions of the dollars were drawn into circulation, many of them against the protest of the persons who took them, but when the notes were again to be had the dollars came back to the Treasury as fast as they had gone out. The various efforts that have been made to put the coins into greater circulation have pretty clearly demonstrated that the people, who are willing to pay for them, through the Treasury, in gold, and to be at the expense of coining and transporting them, have all of them they want or are willing The recent movement to make room for them by stopping the issue of paper currency of less denomination than \$10 was met by the law creating the small silver certificates—another expression of the will that the purchase of silver should be continued, but the circulation of the dollars restricted. The opinion of the late Treasurer, that \$65,000,000 is the extreme limit of the circulation that may be obtained, has so far been borne out by experience.

Whatever may be said of the policy of buying silver in a falling market—a speculation that is not likely to prove any the less losing because the public funds are employed in it—the reasons why the coinage of the bullion into dollars should be stopped seem to be conclusive. titious value at which the coins are issued makes them a purely subsidlary domestic currency, the limit of the amount of which must be fixed by our own wants. Once coined, they are on our hands. can not be melted or exported. Their accumulation loads us down with tokens and threatens to hamper us in our dealings with other nations, while we are rich enough to have good money. It is plain that not more than one to each inhabitant can be kept in circulation; the rest must lie in the vaults of the Treasury—the representatives of the greater value of the gold that was paid for them, or the basis of a circulation of certificates. The number already coined will probably answer every demand that will be made for many years to come. The increase of the certificate circulation could be maintained with perfect safety and prompt redemption if the coinage were stopped and the bullion lodged in the Treasury in the form of heavy bars or ingots. In this way the expense of coinage would be saved, the labor and risk of transportation, counting, and safe keeping much lessened, and the metal at the same time be kept available, in convenient shape and without loss or confusion of values, for any use that could be demanded of it.

The new silver vault in the Treasury building was turned over to the Treasurer on the 7th day of August. It is 89 feet long, 51 feet wide, and 11 feet 9 inches high in its interior dimensions. In it is set an iron cage divided perpendicularly into sixteen compartments, each 20 feet long and 10 feet wide. It will hold a hundred million silver dollars, and is said to be the largest treasure vault in the world. The first shipment of coin to be stored in it was received on the 29th of August. Since then the shipments have been at the rate of half a million dollars a day, and they will be continued at this rate until the vault is filled. The additional storage capacity is equal to the total coinage of dollars for three years; but by the end of that time, unless the coinage is suspended, still further vault-room will probably have to be provided.

The Treasury holdings of silver coin on June 30, 1887, and June 30, 1888, are exhibited in the following table:

FRACTIONAL SILVER COIN.

The amount of fractional silver coin in the Treasury has changed but little since the first accumulation after the resumption of specie payments. There was a decrease during the first five months of the fiscal year, followed by an increase of less volume in the next seven months. The net decrease in the year was \$919,936.63, from \$26,963,998.98 to \$26,044,062.35.

The following table shows the amount of each denomination in each office on June 30, 1888. It will be seen that there was \$20,503,136.50 in half dollars and only \$5,540,925.85 in other pieces. There has been no great variation recently from this proportion. It would seem to be plain that there is an excess of something like \$15,000,000 of the fifty-cent pieces in the country above the amount that is needed for circulation, and this

excess the Treasury will doubtless be obliged to carry until the pieces are recoined into other denominations or absorbed by the growth of business.

MINOR COIN.

The minor coin in the Treasury is mostly in good condition and not in excess of what is needed. The holdings decreased from \$115,472.94 to \$112,920.73 during the year. On June 30, 1888, they were as follows:

Office.	Five cents.	Three cents.	Two cents.	One cent.	Unassorted.	Total.

RECOINAGE OF UNCURRENT COINS.

There were transferred to the mint, during the year, for recoinage, \$6,565 in gold coins and \$535,355.99 in silver coins, the net loss on which was \$20,275.46. There were also transferred minor coins amounting to \$157,418.60 to be recoined or cleaned. The silver, which was of the following denominations, was selected with a view to relieve the Treas-

ury, to the best advantage possible, of worn pieces and pieces that are no longer coined or circulated:

•	Denomination.	Amount.
Fifty cents		\$117 577.5

The appropriations for this purpose have not been sufficient to maintain the coin circulation at its standard. The condition of the gold coins in the Treasury is good, with the exception of a small amount that is worn very nearly to the limit of tolerance; but the fractional silver has been steadily deteriorating for some years. Most of the pieces in the sub-treasury at San Francisco, especially the half-dollars, are very much worn, many of them being quite smooth. It has been impossible to recoin them, as the loss would have been too great in proportion to the new coinage that it was necessary to produce. There has been a steady demand for dimes, which at times in former years the Treasury was able to supply only by melting up new pieces of higher denominations, thus avoiding apparent loss, but incurring a useless waste of labor. A liberal appropriation, if made available until used, could be employed to advantage in the recoinage of worn and redundant fractional silver coins.

MUTILATED, STOLEN, AND COUNTERFEIT CURRENCY.

As compared with the preceding year, there was a marked decrease in the amount of the deductions from the face value of mutilated paper money redeemed, and also in the amounts of spurious and irredeemable notes and coins presented at the Treasury, showing a gratifying improvement in the condition of the money circulation in this respect. The deductions for mutilations decreased from \$8,304.23 to \$4,214.39; the amount of counterfeit notes, from \$7,420 to \$6,738; the amount of stolen unsigned national bank notes, from \$245 to \$100; and the number of spurious silver coins from 6,449 to 5,458. There have appeared counterfeits of the one-dollar and five-dollar silver certificates, of which a few have come to the Treasury. There has also occured a theft of \$700 in unsigned notes of the First National Bank of Atchison, Kans., of the denominations of ten and twenty dollars, bearing the Treasury numbers 679,929 to 679,942, and bank numbers 655 to 668. None of these notes, which are irredeemable, have yet been seen at this office.

The following table shows the denominations and amounts of counterfeit United States and national-bank notes rejected during the year:

	Denomination.	United States notes.	National- bank notes.
Two dollars Five dollars Ten dollars Twenty dollars Fifty dollars One hundred dollars		66 405 760 940	\$28 530 860 780
Total		 4, 140	2, 598

The year's receipts of silver coin at the several offices of the Treasury and the number of spurious pieces found are shown in the following statement:

Denomination.	Amount received.	Number of counterfeits.
Standard dollars Half dollars Quarter dollars	\$41, 936, 019. 00 7, 340, 366. 00 7, 014, 826. 75	3, 694 742 1, 022
Total	56, 291, 211. 75	5, 458

FRACTIONAL CURRENCY.

The net value of the fractional currency redeemed during the year was \$7,400, an increase of \$276.85 over the year before. The sum of \$16,920.55, accumulated since April 30, 1875, from discounts on the face value of mutilated notes redeemed, was covered into the Treasury on May 12, 1888, making a total decrease of \$24,320.55 in the volume outstanding, as shown by the accounts. The increase in the regular redemptions, though slight, is noteworthy as making prominent the tendency toward a steady annual rate. This tendency, which has been apparent for some time, and which is clearly seen in the following statement of redemptions since the issue ceased, may be taken to show that there is still extant a considerable volume of this currency, of which a small percentage is likely to find its way to the Treasury year by year for some time to come.

Fiscal year.	Amount.	Fiscal year.	Amount.
1877	\$14, 043, 458. 05	1883	\$46, 556. 96
1878	3, 855, 368. 57		20, 629. 50
1879	705, 158. 66		15, 885. 43
1880	251, 717. 41		10, 088. 36
1881	109, 001. 05		7, 123. 15
1881	58, 705. 55		7, 400. 00

POSTAL REVENUES.

The method of handling the revenues of the Post-Office Department lacks several of the safeguards that surround other moneys of the Government. The greater part of the receipts never reach the Treasury, but are disbursed by the postmasters into whose hands they were paid, and upon whose statements both the Post-Office Department and the Treasury must, in a certain sense, rely. Hence there is no separate check upon either the receipt or the disbursement. The accounts themselves do not pass through the same channels as all other accounts of revenues and expenditures. The whole system, in comparison with the excellent one that has been devised for the public revenues, is crude and unscientific, and there does not seem to be any good reason why it should not be amended so that all of the postal funds shall be deposited in the Treasury and there received, disbursed, and accounted for in the same manner as all other public moneys.

SPEAKER'S CERTIFICATES.

The disbursements during the year on certificates of the Speaker of the House of Representatives for the compensation and mileage of Members and Delegates amounted to \$1,824,480.48. The method of making these payments is anomalous, as the Treasurer performs regular duties of a class which, with this exception, are devolved upon disbursing officers. Besides, it is a hardship to him to be required to pay out nearly \$2,000,000 every year, without the warrant of the Department, on accounts which have not been audited and passed, but which are afterwards subjected to that test. The recommendation made in former annual reports, that this duty be transferred to a disbursing officer, is respectfully renewed.

RECEIPTS FROM CUSTOMS AT NEW YORK.

The receipts of the custom house in New York were nearly the same in amount as those of the preceding year. The only noteworthy change in the kinds of money was an increase of about \$23,000,000 in the amount of gold certificates and a corresponding decrease in the amount of United States notes. This is accounted for by the increased volume of gold certificates outstanding, and the greater use made of them by the assistant treasurer in New York in the settlement of balances at the clearing house. Under the new arrangement, by which the receipts of the custom-house are deposited by the banks of the city directly into the sub-treasury, the payments are made in large sums and mostly in large denominations of gold certificates. The receipts of silver certificates and silver coin show no increase, notwithstanding the increase in the amounts of the former in circulation.

The following table shows the amount of the receipts and the percentage of the total receipts, of each kind of money, by fiscal years, beginning with 1884, and by months for the fiscal year 1888:

Period.	United States notes.	Per ct.	Gold coin.	Per ct.	Gold cer- tificates.	Per ct.	Silver cer- tificates.	Per ct.	Silver coin.	Per ct.	Total re- ceipts.

CLEARING HOUSE TRANSACTIONS.

The transactions between the New York sub treasury and clearinghouse show a decrease of volume as compared with the preceding year, and a slight increase in the balances due the clearing house. The following is a statement of the transactions for the past five fiscal years:

			·	
Period.	Checks sent to clearing house.	Checks received from clearing- house.	Balances due assistant treasurer.	Balances due clearing- house.

GENEVA AWARD.

The payment of the balance of the Geneva award, amounting to \$249,168.41, heretofore withheld from claimants, was begun on May 19, 1888, under a decision of the Court of Claims, affirmed by the Supreme Court, the Treasurer acting, by direction of the Secretary, as a special disbursing officer. Up to June 30 four hundred and seventy claims, amounting to \$38,286.87, had been received and paid.

NATIONAL BANKS.

At the close of the fiscal year the Treasurer held United States bonds of the face value of \$178,312,650 for 3,128 national banks, in trust to secure their circulating notes, and United States bonds of the face value of \$56,128,000 and the market value of \$68,568,192.50 for 290 national banks designated as depositaries, in trust to secure public moneys lodged with them. The aggregate face value of the bonds held was \$234,440,650. There was a decrease during the year of \$13,654,050 in the amount held as security for circulation, and an increase of \$29,642,500 in the amount held as security for public moneys, making a net increase of \$15,988,450 in all. The amount of bonds deposited was \$49,189,700, of which \$12,647,700 were for circulation and \$36,542,000 for public moneys. The amount withdrawn was \$33,201,250, of which \$26,301,750 had been held for circulation and \$6,899,500 for deposits. The following table shows by classes the amounts of the bonds held on June 30, 1888. The three per cent. bonds of the loan of 1882 had been called for payment and interest on them had ceased.

All the bonds held for the banks are examined once a year or oftener by officers or agents of the banks, as required by law. The examinations are based on statements furnished by the banks to the Comptroller of the Currency, setting forth the kinds and amounts of bonds they have deposited, which statements are certified by the Comptroller as to the bonds held for security of circulating notes, and brought to this office without notice. These examinations, averaging in number more than ten a day, are a continuous inventory of the vault in which the bonds are kept.

The table below exhibits the number of banks, the number of depositaries, and the amounts of bonds held by the Treasurer at the close of each year from the establishment of the national banking system:

		-			
Fiscal year.	Number of banks.	Number of deposi- taries.	Bonds held to secure cir- culation.	Bonds held to secure public funds.	Total of bonds held.

SEMI-ANNUAL DUTY.

The semi-annual duty assessed upon and collected from the national banks, on circulation, for the fiscal year, amounted to \$1,616,127.53, which is \$428,795.22 less than was collected for the preceding year. The national banks have paid into the Treasury since the organization of the system in 1863, on circulation, \$67,457,848.83; on deposits, \$60,940.067.16; on capital, \$7,855,887.74, making an aggregate of \$136,253,803.73.

This duty, from the regularity and certainty with which it has been collected, is remarkable in the history of taxation. It is assessed on a full valuation of the property upon which it is levied. The returns are made to the Treasurer on blank forms furnished by him, and are susceptible of direct verification by the records of the Department. The amount of the assessment is readily ascertained, and is paid into the Treasury by the banks themselves, without the intervention of an assessor, collector, or any other public officer. There are no licenses, stamps, or formalities, excepting the blank on which the returns are made and the simple receipt which is the evidence of payment. There have been no delinquencies, except in the case of a few insolvent banks, and even in most instances where banks are placed in the hands of receivers the assets are found to be sufficient to fulfill the conditions under which the law requires duty to be paid. Delays, which are infrequent, are of no avail in avoiding ultimate payment. Two or threeclerks in this office have always performed all the necessary labor, evenwhen the tax amounted to \$7,000,000 a year. Their salaries and the trifling cost of the stationery needed, have comprised all the expense, which has not exceeded a mill on the dollar of the amount collected.

INDIAN TRUST FUNDS.

The several funds held in this office in custody for the Secretary of the Interior, under the act of June 10, 1876, remain as reported for the last fiscal year, as follows:

Class of bonds.	Registered.	Coupon.	Total.
State and canal bonds.			
Arkansas—funded debt Florida—State stocks Louisiana—State stocks Maryland—state stocks North Carolina—State stocks South Carolina—State stocks Tennessee—State stocks Tennessee—State stocks Virginia—Chesapeake and Ohio Canal bonds.	\$8, 350. 17 191, 666. 663 540, 000, 00	132, 000 37, 000 192, 000 125, 000 123, 000	\$168, 000, 00 132, 000, 00 37, 000, 00 8, 350, 17 192, 000, 00 125, 000, 00 314, 666, 668, 540, 000, 00
United States bonds.			
Bonds issued to Pacific railroads	280, 000. 00		280, 000. 00
Total	1,020,016.833	778, 000	1, 798, 016. 833

Interest is received and placed to the credit of the funds on the Maryland State stock and the Pacific Railroad bonds as it matures, and on a portion of the North Carolina State stock at irregular intervals, butnone on any of the other stocks or bonds.

MISCELLANEOUS TRUSTS.

United States bonds are held in this office in custody for the following trusts:

American Printing House for the Blind, 4 per cents	\$250,000
Pennsylvania Company, 4½ per cents	200,000
Manhattan Savings Institution, 4 per cents	75,000
Alaska Commercial Company, 4 per cents	55,000

The bonds described below are the property of the United States, and are held in this office for the Secretary of the Treasury:

Arkansas State bonds.	\$625,000
Louisiana State bonds	545, 480
North Carolina State bonds	13,000
Tennessee State bonds	21,000
Virginia State bonds	41,800
Nashville and Chattanooga Railroad bonds	500,000
Chesapeake and Ohio Canal bonds	
	, ,

Of these the Louisiana State bonds are held as captured and abandoned property. The others have been acquired by settlements in pursuance of law and by payments out of regular appropriations to trusts to which they originally belonged. Interest is paid as it matures on the Nashville and Chattanooga Railroad bonds, but none on any of the others. Tabulated statements of the bonds of the States have frequently been furnished to the State authorities for information in relation to proposed adjustments of the claims of the Government.

PACIFIC RAILROAD SINKING FUNDS.

United States bonds and first-mortgage Pacific Railroad bonds were held for account of the Pacific Railroad sinking funds at the close of the year as follows:

		,		•

First mortgage Pacific Railroad bonds to the amount of \$835,000 were added to the sinking fund of the Union Pacific Railroad during the year, and \$310,000 of the same class of bonds to the sinking fund of the Central Pacific Railroad, making a total of bonds held as given above.

DISTRICT OF COLUMBIA TRUST FUNDS.

The following described securities are held in this office for the District of Columbia:

Class of securities.	Contract- ors' guaranty fund.	Metropolitan Police fund.	Firemen's relief fund.	Miscellane- ous.	Total.
District of Columbia 3.65 per cents United States 4 per cents United States 4½ per cents Unsigned District of Columbia 3.65	\$59, 000. 00 133, 500, 00 850. 00	\$28,000.00 1,000.00	800.00		\$88, 000. 00 135, 000. 00 850. 00

A full statement of the operations and condition of the sinking fund of the District of Columbia is given in a separate report, as required by law.

CAPTURED AND ABANDONED PROPERTY.

In pursuance of instructions from the Secretary of the Treasury, a sealed box of captured and abandoned property, deposited in this office for safe keeping, December 16, 1868, was opened on the 16th of May, and the contents, consisting of watches, jewelry, knives, pistols, and other articles, were scheduled by a committee appointed by the Secretary, and delivered to an auctioneer for sale, as provided for by an act of Congress approved April 22, 1886. Jewelry, plate, and other articles, the contents of a box received June 11, 1869, have also been disposed of by return to claimants, and by sale, as provided for in the same act. The only remaining articles held as captured and abandoned property, excepting the Louisiana State bonds described elsewhere in this report, are the three swords formerly belonging to General David G. Twiggs, which are now in this office.

REDEMPTION OF NATIONAL-BANK NOTES.

The national-bank notes presented for redemption during the year were valued by the owners at \$99,152,364.34. This total included \$806,396.48 in United States and other currency, which was returned or otherwise separately accounted for, \$1,979.40 in notes not redeemable under the regulations of the Department, and \$2,722 in spurious notes. The corrections in count aggregated \$14,749.28 in favor of the owners and \$2,741.70 against them. The net proceeds, exclusive of \$716.62, applied in payment of express charges, were \$98,246,727.42, with \$105,830 remaining uncounted.

The redemptions were a little more than \$11,000,000 greater than those of the preceding twelve months, in the face of a reduction of nearly twenty-seven millions in the total outstanding circulation within the year, and of fifty-six millions and a half in the two years. In proportion to the circulation, the redemptions were greater than those of every other year, excepting the two from June 30, 1884, to June 30, 1886, since 1879. The increase, which began to be felt in December and was steadily kept up during the remainder of the year, being specially noticeable in May and June, came from the city of New York, for checks-

on the Assistant Treasurer and silver certificates of the denominations of one and two dollars. As compared with the preceding year there was no other change worthy of notice in the receipts from different localities or in the character of the returns asked for.

The notes assorted and charged to the 5 per cent. redemption fund amounted to \$43,379,185. Notes fit for circulation, of the value of \$17,453,780, were returned to the banks, and notes unfit for circulation, of the value of \$25,843,765, were delivered to the Comptroller of the Currency for destruction. The redemptions from this fund were less than half of the total redemptions, and less, both in amount and proportion to the outstanding circulation, than those for any previous year. The falling off is due to the increase of the fund for the retirement of circulation in a greater degree than to the decrease in the volume of notes outstanding. The redemptions from the latter fund amounted to \$50,163,957.45, an increase of nearly \$13,000,000 over the year before, and only \$8,000,000 less than double the average for the five years before.

This fund, by its growth and fluctuations, excited much concern during the year, not only in the Treasury Department, but also in Congress and throughout the country. After having slowly increased during four years after June 30, 1881, from \$33,146,858.85 to \$38,596,332.10, it rapidly rose the next year to \$60,248,705.85, and to \$97,992,918.10 by June 30, 1887. At the close of business on the 8th of July following, it stood at \$107,827,754.60, the highest point it has ever reached. Then after declining slowly to \$102,265,787.60 by the end of September, it showed little change until the latter part of January, when there began a slow but steady decrease. The following table shows the net deposits, the redemptions, and the balance in the Treasury for each month of the fiscal year:

Month.	Deposits.	Redemptions.	Balance.
1887—July August September October November December 1888—January February March April May June Total	1, 116, 515, 00 1, 316, 854, 50 2, 446, 276, 15 3, 002, 090, 26 4, 595, 853, 64 3, 790, 728, 05 2, 469, 790, 00 3, 343, 240, 00 2, 876, 739, 40 4, 643, 109, 25	\$2, 942, 574. 50 3, 121, 204. 00 3, 002, 572. 50 1, 930, 504. 60 4, 333, 054. 60 3, 511, 681. 05 5, 033, 741. 75 5, 623, 001. 60 4, 700, 863. 90 4, 804, 934. 25 5, 660, 239. 80 5, 499, 585. 00 50, 163, 957. 45	\$105, 956, 194, 60 103, 951, 505, 60 102, 285, 787, 60 102, 781, 559, 25 101, 450, 594, 91 102, 534, 767, 56 101, 291, 753, 80 98, 198, 542, 20 96, 780, 918, 80 94, 882, 723, 45 93, 835, 592, 96 91, 952, 843, 65

Of the total deposits, \$174,250 on account of banks that have failed, the net sum of \$19,760,511 for the reduction of circulation under the act of June 20, 1874, and \$5,375,325 of the total on account of banks in liquidation, including \$4,782,990 for reductions of circulation under section 6 of the act of July 12, 1882, in all \$25,310,086, represented contractions of currency, there being no corresponding issue of any kind of money. These deposits were made chiefly in consequence of the operations of the Treasury in the redemption and purchase of bonds held to secure circulation. The remainder, amounting to \$18,813,797, was deposited under the requirements of section 6 of the act of 1882, for the retirement of circulation issued under expired charters, and did not affect the total volume of currency, as new circulating notes were issued to the depositing banks immediately on the receipt of the deposits.

The table below shows the amounts deposited each month of the year for the retirement of the notes of banks in voluntary liquidation or in the hands of receivers, for the reduction of the circulation of banks in active existence, and for the retirement of the notes issued prior to the extension of the charters of the banks, and the reissue of new notes. The deposits under the latter head in former years were inconsiderable, so that all the deposits before June 30, 1887, may be said to have been made for the retirement or reduction of circulation without reissue.

The fluctuations in the aggregate fund were produced, therefore, by two distinct causes, whose probable effects could be foreseen with reasonable certainty. As the redemption of 3 per cent. bonds was practically completed in July, when the fund reached the highest point, and as the deposits required by the act of 1882 were less after January than the probable redemptions from the funds, and would become unimportant after June, it was expected in the middle of the fiscal year that the balance on deposit would decline gradually during the next six months and then would fall off rapidly, unless unforeseen causes should come into operation meanwhile. This expectation has been fully justified by events, as has been shown, and the fund has ceased to be a cause of anxiety. However, unless the contraction of the bonded debt should be stopped, or unless some other basis should be provided for the circulation of national banks, it is certain that the retirement of bank notes will continue, and it may be expected that the Treasury will always hold a considerable sum for that purpose.

In the appendix will be found tabular statements of the operations of the Treasury in the redemption of national bank notes, showing by fiscal years, from the beginning, the lawful money received on the several accounts, and the manner in which it has been applied, and also the amounts of notes received and redeemed and the disposition made of them. These tables will be found to differ at times from those heretofore given, in the amount of the deposits. The tables in former reports included under this head the sums of money only that were received in the first instance for the particular account, and excluded other sums properly applied from moneys already in the Treasury but originally received for another account and so reported. These transfers, which are made necessary by various causes, do not affect the total deposits on all the redemption accounts, or the aggregate balance on hand, and therefore are not within the scope of the tables before given, which deal with deposits, redemptions, and balances only, without undertaking to show how the balances in the several accounts are produced. In some cases, too, where deposits have been refunded the

amount was deducted in the old tables from the total deposits or included in the redemptions. The statements now given exhibit all the transactions as they are recorded in the books, and show what has not been attempted before—how the vast sums that have been received into the Treasury for the redemption of national-bank notes are accounted for.

The expenses incurred during the year and paid out of the 5 per cent. fund amounted to \$141,141.48. Of this sum the proportionate share for \$89,685,839.50 redeemed will be charged to the accounts of the banks at the rate of $\$1.52\frac{297}{1000}$ per \$1,000 on the amounts of the notes redeemed for each, and the share for \$2,989,280 will be reimbursed from the fund arising under the provisions of section 8 of the act of July 12, 1882, from assessments on banks making deposits of lawful money for the retirement of their circulation in full. The assessments made during the year under that section amounted to \$1,470.01. The charge against the fund for the expenses of the fiscal year 1887 was \$5,256.48, leaving a balance of \$15,927.61 in the Treasury on June 30, 1888.

FISCAL YEAR ENDING JUNE 30, 1889.

A statement of the assets and liabilities of the Treasury on September 30, 1888, prepared from the reports of the several offices for that day, is given in the appendix. The tables showing the amounts of gold, silver, United States notes, and certificates of deposit in the Treasury and in circulation at the end of each month are brought down to the same date. These fully exhibit the condition of the Treasury, and also, by comparison with other dates, the changes that have taken place.

The net reduction of the public debt during the months of July, August, and September, exclusive of certificates of deposit, was \$30,560,637.35, resulting from the redemption of \$77,797.35 in notes and called bonds, the purchase of \$20,617,850 in 4 per cents and \$9,867,050 in 4½ per cents, and the conversion of \$2,060 interest on 4 per cent. refunding certificates into bonds. The premiums paid on the bonds purchased amounted to \$5,869,010.86 on the 4 per cents and \$670,925.86 on the 4½ per cents. The amount of gold certificates in circulation, as shown by the assets and liabilities, increased \$15,372,760, and the amount of silver certificates \$18,198,962. The legal-tender certificates in circulation decreased \$1,895,000.

The national bank notes presented for redemption during the quarter amounted to \$21,415,035.03, as against \$16,925,918.74 in the same period last year. The deposits in the fund for the reduction and retirement of national bank notes amounted to \$6,071,295, and the redemptions to \$10,716,407. The balance of the fund in the Treasury decreased in July to \$90,029,866.65, in August to \$87,819,564.65, and in September to \$87,307,731.65. The decrease in the last two months was small, owing to the large deposits made in consequence of the purchase of bonds. The limit of \$3,000,000, fixed by law as the maximum amount that may be deposited during any month, was reached at the end of September and again in the second week of October. With the present rate of redemption the balance in the Treasury would now continue to grow less, even though the full amount of \$3,000,000 were deposited each month.

WORK OF THE OFFICE.

The volume of business transacted during the fiscal year was greater than that for the year before. From the statement in the appendix showing the amount of the receipts and disbursements on all accounts, it will be seen that this office received \$459,887,716 and paid out \$264,993,970. These figures do not include the national bank notes redeemed and delivered on account of the 5 per cent fund. The receipts and payments at all the Treasury offices, which make up the total movement of moneys, reach on both sides the astonishing aggregate of between twelve and thirteen hundred million dollars, having increased from about nine hundred million the previous year. The receipts at this office that year were \$213,428,505.80, and the payments \$152,475,064.48. The labor required in these vast operations has been promptly performed, and all the work of the office well kept up. In a good many particulars the methods have been simplified and improved. The Treasurer gratefully acknowledges the ability and fidelity of the officers and employés associated with him. I have the honor to be, very respectfully, your obedient servant,

JAMES W. HYATT,

Treasurer of the United States.

Hon. Charles S. Fairchild, Secretary of the Treasury.

NOTE.—The difference between this and other statements of the Treasurer's reports and the public-debt statements in the amounts of one and two year notes and compound interest notes outstanding is due to the fact that the Treasurer's statements are compiled from the reports of destructions, while the debt statements are made up from the reports of redemptions, and the method of settling the accounts of these interest-bearing notes does not permit their destruction until some time after the redemption. The following will explain the differences on June 30, 1888:

	One and two year notes.	Compound-in- terest notes.
On hand undestroyed at beginning of the fiscal year	\$50 1,770	\$330 3,350
Total	1, 820	3, 680
Destroyed during the fiscal year: Account of redemptions during the fiscal year 1887. Account of redemptions during the fiscal year 1888. On hand undestroyed July 1, 1888.	50 1,750 20	330 3, 120 230
Total	1,820	3, 680

July 17, 1861 August 15, 1864 June 15, 1865 July 15, 1865	\$140, 094, 750 299, 992, 500 331, 000, 000 199, 000, 000	\$140, 078, 950 299, 941, 350 330, 966, 900 198, 949, 650	\$5,000 300 1,000	\$140, 083, 950 299, 941, 650 330, 966, 900 198, 950, 650	\$10, 800 50, 850 33, 100 49, 350
Total	970, 087, 250	969, 936, 850	6, 300	969, 943, 150	144, 100

NOTE —The public debt statement shows \$128,300 7.30s of 1864 and 1865 outstanding on June 30, 1888, or \$5,000 less than the amount given in the above table. The discrepancy arose in deducting \$5,000 redeemed in August, 1868, which was suspended in settlement and again deducted when suspension was removed.

# REPORT OF THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
Washington, D. C., November 1, 1888.

SIR: I have the honor to submit a report of the operations of the mints and assay offices under my charge for the fiscal year ending June 30, 1888, being the sixteenth annual report of the Director of the Mint, and the fourth of the same series prepared by me.

# DEPOSITS AND PURCHASES OF GOLD AND SILVER.

The gold deposited at the mints and assay offices of the United States during the fiscal year 1888, not including redeposits, was 3,882,120.497 standard ounces, of the value of \$72,225,497.56, against \$68,223,072.87 in the preceding year, an excess of \$4,002,424.69 over the fiscal year 1887.

In addition, there were redeposits of the value of \$8,668,959.11. Of the redeposits of gold, \$4,395,315.84 represents the value of unparted bars, the product of the minor assay offices of the United States, and \$4,273,643.27 of fine bars bearing the stamp of the United States assay office at New York, redeposited—principally at that institution.

The total deposits of gold during the fiscal year 1888, including redeposits as above cited, were 4,348,077.049 standard ounces, of the

value of \$80,894,456.67.

The deposits and purchases of silver, not including redeposits, were 35,518,839.97 standard ounces, of the coining value of \$41,331,014.66, against \$47,756,918.75 in the preceding year.

In addition, there were redeposits of silver of the coining value of \$491,831.79, of which \$275,189.75 consisted of unparted bars, principally

of the minor assay offices, and \$216,642.04 of fine bars.

The total deposits and purchases of silver were 35,941,507.92 standard ounces, of the value (calculated at coining rate in standard silver dollars) of \$41,822,846.45.

The value of both the gold and silver deposited and purchased at the mints and assay offices during the fiscal year, not including redeposits, was \$113,556,512.22, and including redeposits, \$122,717,303.12.

A statement of the value of the gold and silver received at the mints

and assay offices of the United States (not including redeposits) during each fiscal year since 1880 is here appended:

VALUE OF THE GOLD AND SILVER (NOT INCLUDING REDEPOSITS) RECEIVED AT THE MINTS AND ASSAY OFFICES DURING THE FISCAL YEARS 1880-1888.

Fiscal years	. Gold.	Silver.	Total.
1880	\$98, 835, 0	96 \$34, 640, 522	\$133, 475, 618
1881	130, 833, 1		
1882	66, 756, 6	33, 720, 491	100, 477, 143
1883	46, 347, 1	36, 869, 834	83, 216, 940
1884	46, 326, 6	36, 520, 290	82, 846, 968
1885	52, 894, 0	75 36, 789, 774	89, 683, 849
1886	44, 909, 7	49 35, 494, 183	80, 403, 932
1887	1	72 47, 756, 918	115, 979, 990
1888		197 41, 331, 014	113, 556, 511

Of the gold received at the mints and assay offices during the year, \$32,406,306.59 was classified as of domestic production, against \$32,973,027.41 in the preceding year. A reduction of a little over half a million dollars in the production of the United States is thus indicated.

The foreign gold bullion deposited aggregated \$21,741,042.44, and the foreign gold coin \$14,596,885.03; a total of \$36,337,927.47, against \$32,467.840.08; in the warr preceding

\$32,467,840.98 in the year preceding.

The value of the United States light-weight gold coin deposited, principally by individuals, for recoinage, was \$492,512.60.

Old material was deposited in the form of jewelry, bars, plate, etc.,

containing gold of the value of \$2,988,750.90.

Of the silver bullion deposited and purchased, \$37,393,648.34 (32,135,165.79 standard ounces) was classified as of domestic production; and 29,671,470.54 standard ounces, of the coining value of \$34,526,803.02, consisted of fine bars bearing the stamp of well-known private refineries in the United States, but, as explained in previous reports of this series, and more elaborately in the reports of the Director of the Mint on Production of the Precious Metals in the United States, the classification at the mints of silver bullion is inexact, for the reason that fine silver bars purchased from private refineries in the United States are all necessarily classified at the mints as of domestic production, while as a matter of fact they are to a large extent composed, as for several years they have been, of silver obtained from ore and bullion imported from Mexico.

The silver bullion classified as foreign bullion received at the mints

during the year was \$1,668,384.25 (1,433,767.71 standard ounces).

Foreign silver coins of the value of \$87,336 (75,054.37 standard ounces)

were melted at mints of the United States during the year.

United States silver coins, consisting almost entirely of transfers from the Treasury of worn and uncurrent subsidiary coins and old silver dollars, were melted, of the value, at coining rate in standard silver dollars, of \$494,155.64 (424,665.01 standard ounces). In addition, trade dollars were received and melted of the coining value in silver dollars of \$1,060,174.11 (911,087.13 standard ounces).

Old material, consisting of plate, jewelry, etc., was deposited, containing silver of the value of \$627,316.32 (539,099.96 standard ounces).

#### COINAGE.

Coinage during the fiscal year 1888 consisted of 109,030,547 pieces, of the value of \$63,719,242.32. It was executed at the mints at Phila-

delphia, San Francisco, and New Orleans.

The gold consisted of 2,350,534 pieces, of the value of \$28,364,170.50, of which \$16,301,740 was in double eagles; \$8,998,260 in eagles; \$2,995,510 in half-eagles; \$34,098 in \$3 pieces; \$15,682.50 in quartereagles; and 18,880 gold dollars.

The silver coinage consisted of 32,718,673 dollars; \$2,836.50 in half-

dollars; \$194,668.25 in quarter-dollars; and \$1,219,917.50 in dimes.

The subsidiary coinage amounted to 12,983,521 pieces, of the value of

\$1,417,422.25.

The minor coinage consisted of 15.207,173 five cent nickel pieces, of the nominal value of \$760,358.65; 45,573 three-cent nickel pieces, of the nominal value of \$1,367.19; and 45,725,073 one-cent bronze pieces, of the nominal value of \$457,250.73; the total minor coinage amounting to 60,977,819 pieces, of the nominal value of \$1,218,976.57.

The coinage of the fiscal year exceeded in number of pieces even the large coinage executed the preceding year, being 109,030,547 pieces in

1888 against 98,122,517 in 1887.

The mint at Carson was not open for coinage during the year, its operations having been limited to those of an assay office with an acid refinery.

The coinage of the mints was as follows:

Coinage, Fiscal Year 1888.

	Description.	Pieces.	Value.
Gold			\$28, 364, 170, 50
Silver dollars		32, 718, 673	32, 718, 673. 00
Subsidiary silver	coins	12, 983, 521	1, 417, 422, 25
Minor coins		60, 977, 819	1, 218, 976. 57
Total		109, 030, 547	63, 719, 242. 32

In the Appendix will be found the usual tables exhibiting the coinage by mints and by denomination of pieces during the fiscal year 1888 and the calendar year 1887.

A table will also be found showing, by institutions and by denomination of pieces, the coinage each calendar year since the organization of the Mint in 1792, brought forward to the close of the fiscal year 1888.

This tabulation, first compiled in 1887, and printed in the Report of the Director of the Mint for the fiscal year, is now presented in the Appendix with an explanatory note, it having transpired that at the several mints it has not been invariably the practice, as now imperatively required, to complete all coiner's deliveries within the year of the date of All coinage statements, on the other hand, are of coin delivered by coiners to superintendents, the sum delivered within a given year being entered as the coinage of that year. Thus it has happened that coinage entered as of a given year has included unreported coin of the preceding year, or (in case of failure of continuity of coinage), indeed, of another anterior year.

What justification, if any, can be found for such a practice, so subversive of a tabulation of coinage strictly accurate as to year of date,

is probably in section 3536 Revised Statutes. This law provides the limit of deviations in weight, known as tolerence or mint remedy, in terms of one thousand pieces. As "deliveries by the coiner to the superintendent" are specifically mentioned, justification has perhaps been found for carrying over from the year of date a number of coins within the legal tolerance of a single piece, but not of a thousand pieces. Such a practice has been by way of alternative from a condemnation of coin at the end of a year which at any other period would pass the requirements of law, and which have heretofore been held for subsequent averages.

To obviate the objections to the practice above indicated the following instructions have been given to superintendents of the several

coinage mints:

In order that registration of coinage of the mints of the United States shall be in exact agreement with the calendar year of date, all coin in the custody of the coiner shall be delivered to the superintendent on or before the last day of the calendar year in which struck, and be recorded as the coinage of that year.

No coin bearing date of a preceding year shall remain in the custody of the coiner.

#### MANUFACTURE OF GOLD AND SILVER BARS.

In addition to the coinage executed during the year, gold and silver bars were manufactured as follows:

#### BARS MADE, 1888.

Gold	\$51,765,436	. 55
	7, 547, 578	. 27
Total	59, 313, 014	. 82

# Corresponding values for the preceding year were as follows:

#### BARS MADE, 1887.

Gold	\$58, 188, 953. 66
Silver	
to the second second second second second second second second second second second second second second second	
Total	64, 670, 564. 91
· · · · · · · · · · · · · · · · · · ·	

With the exception of unparted bars of the minor assay offices, mostly shipped to the mint at Philadelphia for refining and coinage, the bars were manufactured mainly at the assay office at New York. The value of the bars made at that institution during the fiscal year was as follows:

#### BARS MADE AT THE ASSAY OFFICE AT NEW YORK, 1888.

Gold	 \$46, 763, 125. 71
	,,

In the Appendix will be found the usual tables showing the weight and value, as well as the character, of the bars manufactured at each mint and assay office during the year.

#### MEDALS AND DIES MANUFACTURED.

The number of medals manufactured at the mint at Philadelphia during the fiscal year ended June 30, 1888, was as follows:

# MEDALS MANUFACTURED, 1888.

Gold		124
Silver	 	531
Bronze	 	742
	· · · · · · · · · · · · · · · · · · ·	11

The number of medals sold was 1,409, of the value of \$6,088. Proof sets of the coinage of the year were sold to the number of 4,001, for which was received \$4,610.68, also 1,129 single pieces, for which was received \$3,370.75. The net profit on the sale of medals and proof coins was *\$3,253.64.

One thousand one hundred and sixty-six coinage dies were manufactured at the mint at Philadelphia: 111 for gold, 332 for the silver dollar, 176 for subsidiary silver, 521 for minor coins, and 26 for proof coins. Nine medal dies were made.

The cost of manufacturing dies for coinage of the mints at San Francisco and New Orleans was reimbursed the appropriations of the mint at Philadelphia from the appropriations of the institutions for which the dies were prepared.

In the Appendix will be found the usual statement, exhibiting in

detail the dies manufactured for each of the coinage mints.

# EXCHANGE OF GOLD BARS FOR GOLD COIN.

As provided in the act approved May 26, 1882 (22 Stats., 97), gold bars have been exchanged at the mint at Philadelphia and at the assay office at New York for deposits of United States gold coin, presented in sums of not less than \$5,000.

The value of the gold bars exchanged for gold coin at the mint at Philadelphia was \$486,881.25, and at the assay office at New York \$15,360,105; total, \$15,846,986.25, against \$7,604,059.89 in the preced-

ing fiscal year.

The large increase in the value of bars exchanged at the assay office at New York, being more than double the amount in the preceding fiscal year, indicates an increased demand for gold bars for export, the principal purpose of the exchange.

The value of gold bars exchanged at the two institutions for gold coin

is exhibited in the following table:

^{*} Includes \$676.54 of prior years not previously credited.

FINE GOLD BARS EXCHANGED FOR GOLD COIN AT THE MINT AT PHILADEL-PHIA AND ASSAY OFFICE AT NEW YORK FROM JULY 1, 1887, TO JUNE 30, 1888.

#### REFINING BY ACIDS.

The acid refineries of the coinage mints, including the mint at Carson, and the assay office at New York, operated on 6,729,419 gross ounces of the precious metals, containing gold and silver of the coining value of \$29,748,566.30.

The number of ounces of gold and silver and the value of the bullion delivered to the acid refineries during the year were as follows:

PRODUCT OF ACID REFINERIES, 1888.

	Bullion.	Standard ounces.	Value.	
			<b>\$23,</b> 275, 03 <b>6</b> . 95	
Silver		5, 563, 189. 300	6, 473, 529. 35	
Total		6, 814, 222. 537	29, 748, 566. 30	

The total value was against \$30,397,422 in the preceding year, a slight decrease.

The following table exhibits the weight and value of the bullion treated by refineries of the several mints and the assay office at New York:

REFINING (BY ACIDS), FISCAL YEAR 1888.

#### SILVER PURCHASES. "

During the fiscal year 27,235,601.06 standard ounces of silver bullion, at a cost of \$23,398,466.06, was delivered upon purchases by the Secretary of the Treasury through the Bureau of the Mint upon offers made Tuesday and Friday of each week. The average cost per standard ounce was \$0.8591129 or \$0.9545699 per ounce fine.

Computed from cable quotations received daily by the Bureau of the Mint, the average London price for silver .925 fine, British standard, was 43.675 pence, which at the average rate for sterling sight exchange, \$4.8602, equals \$0.8607 per ounce .900 fine, United States standard.

Upon purchases by the superintendents of the mints at Philadelphia, San Francisco, New Orleans, and Carson, at rates fixed from time to time by the Director of the Mint, was delivered 837,360.83 standard ounces of silver at a cost of \$723,683.70.

By purchase of silver parted from gold deposits, by bar fractions, and by charges on deposits of silver for return in fine bars, 133,844.02 standard ounces was acquired at a cost of \$115,403.44.

The total amount of silver bullion delivered upon purchases for the coinage of standard silver dollars was therefore 28,206,805.91 standard ounces and the cost \$24,237,553.20, an average cost per standard ounce of \$0.8592803, equal to \$0.9547559 per ounce fine.

The amount and cost of the silver bullion delivered upon purchases are exhibited in the following table:

## BULLION FOR THE SILVER DOLLAR COINAGE, 1888.

Mode of acquisition.	Standard ounces.	Cost.
Purchases, Treasury Department, Bureau of the Mint	27, 235, 601. 06	\$23, 398, 466. 06
Purchases at mints	837, 360. 83	723, 683. 70
Partings, bar charges and fractions	133, 844. 02	115, 403. 44
Total delivered on purchases	28, 206, 805, 91	24, 237, 553. 20
Balance July 1, 1887	4, 052, 268. 68	3, 560, 848. 97
Available for coinage of silver dollars during fiscal year 1888	32, 259, 074. 59	274798, 402. 17

The increase in purchases at mints arose from the fact that the superintendent of the mint at San Francisco was authorized to purchase quantities exceeding 10,000 ounces.

On the 1st of July, 1887, the amount of silver available for the silver dollar coinage was 4,052,268.68 standard ounces, costing \$3,560,848.97. Adding to this the amount delivered upon purchases, as shown in the above table, 28,206,805.91 standard ounces, costing \$24,237,553.20, gives the total amount available during the fiscal year for the silver dollar coinage, namely, 32,259,074.59 standard ounces, costing \$27,798,402.17.

The accompanying table exhibits the amount and cost of silver bullion delivered at the several mints:

#### Deliveries on Purchases of Silver Bullion, 1888.

	Mints.	Standard ounces.	Cost.	
			\$14, 275, 836. 81	
New Orleans	***************************************	9, 784, 268. 84	8, 407, 095. 32	
San Francisco		1, 753, 466. 92	1, 525, 393. 37	
Carson	• • • • • • • • • • • • • • • • • • • •	33, 626. 21	29, 227. 70	
		28, 206, 805. 91	24, 237, 553, 20	

The number of silver dollars manufactured was 32,718,672*, containing

28,117,608.74 standard ounces of silver, costing \$24,310,749.68.

The operative wastage in this coinage was 15,117.80 standard ounces, costing \$15,250.97, and there was sold in sweeps 39,877.82 standard ounces, of the value of \$34,496.61. The gross consumption of silver in the silver dollar coinage was 28,175,604.36 standard ounces, costing \$24,360,497.26.

Upon the silver dollars coined during the year there was a seignorage

of \$8,407,922.32.

The amount and cost of bullion available for the silver dollar coinage at the coinage mints, June 30, 1888, are shown in the following table:

BULLION FOR SILVER DOLLAR COINAGE ON HAND JUNE 30, 1888.

	Mints.	Standard ounces.	Cost.
Philadelphia		2, 819, 695. 94	\$2, 370, 688. 56

			91, 300. 79
Carson		78, 269. 59	69, 855. 36
Total		4, 083, 470. 24	3, 437, 904. 91

The Appendix contains tables showing by months the amount and cost of silver delivered on purchases, the amount and cost of silver used, and the number of silver dollars coined.

#### PRICE OF SILVER.

At the beginning of the fiscal year, July 1, 1887, the London price of silver was 44 pence. A demand for bar silver both on Indian and continental account tended to raise the price on the 21st of July to  $44\frac{7}{16}$  pence. Owing to a decline in Indian exchange, a reaction took place, the price having closed on the 31st of the month at  $44\frac{1}{8}$  pence.

Subsequently a progressive rise in the price followed an improvement in rates for Indian exchange. The price rose on August 26 to

 $45_{16}^{3}$ , the highest reached during the fiscal year.

The price again declined early in September to 44½, and after advancing to 44½, ranged from September 20 to October 18 from 44½ to 44½ pence.

^{*} Exclusive of one for Mint cabinet.

Toward the end of October the price declined, and during the month of November fluctuated between 44 and  $43\frac{1}{16}$  pence.

Owing to increased demand for shipment to the East, the price on December 19 reached 45½ pence, closing on the 31st at 44½ pence.

In January, 1888, commenced a decline which continued steadily with slight fluctuations until the 19th of May, when the price reached 415 pence, the lowest price of which this Bureau has record.

During the remainder of the year the price gradually advanced,

closing June 30 at 42½ pence.

According to daily cable quotations to the Bureau of the Mint, the average London price of silver during the year was 43.675 pence, equivalent with exchange at par (\$4.8665) to \$0.95741 per fine ounce. At this rate the bullion value of the standard silver dollar was \$0.7505; or \$0.7661 at the highest price ( $45\frac{3}{16}$  pence), and \$0.7057 at the lowest price ( $41\frac{5}{8}$  pence).

The highest, lowest, and average price of silver in London each month during the fiscal year, compiled from daily cable dispatches to the Bureau of the Mint; and also the equivalent values of an ounce of fine silver at par of exchange, and at average monthly rate of exchange, and a similar exhibit for the calendar year 1887, are set forth

in the following tables:

HIGHEST, LOWEST, AND AVERAGE PRICE IN LONDON OF SILVER BULLION, 925 THOUSANDTHS FINE, AND VALUE OF A FINE OUNCE, EACH MONTH, DURING FISCAL YEAR 1888.

[Compiled from daily telegraphic cable dispatches to the Bureau of the Mint.]

# CIRCULATION OF SILVER DOLLARS.

The following is a comparative statement of the total number of silver dollars coined, held by the Treasury for redemption of certificates, held in excess of certificates outstanding, and the number in circulation July 1, 1887, and subsequent dates:

COINAGE, MOVEMENT, AND CIRCULATION OF STANDARD SILVER DOLLARS.

		ð		
		In the T		
Period.	Total coinage.	Held for payment of certificates outstanding.	Held in excess of certifi- cates outstand- ing.	In circula- tion.
July 1, 1887	\$266, 990, 117 283, 295, 357 299, 708, 790 306, 750, 890	\$142, 118, 017 176, 855, 423 200, 387, 376 218, 561, 601	\$69, 365, 953 42, 062, 116 43, 492, 111 30, 229, 933	\$55, 506, 147 64, 377, 818 55, 829, 303 57, 959, 356

#### DISTRIBUTION OF SILVER DOLLARS.

The following table shows the number of silver dollars on hand at the several coinage mints July 1, 1887, coined during the year, distributed under section 3527 Revised Statutes, and the number transferred to and from the United States Treasury:

#### DISTRIBUTION OF SILVER DOLLARS, 1888.

Period.	Philadel- phia.	San Fran- cisco.	New Or- leans.	Carson.	Total.
In mints July 1, 1887	35, 386, 110	18, 788, 015	8, 163, 744	9, 821	62, 347, 690
Coinage of fiscal year	18, 514, 673	2, 304, 000	11, 900, 000		32, 718, 673
Transferred from sub-treasury $\dots$ .	.:	5, 000, 000			5, 000, 000
Total	53, 900, 783	26, 092, 015	20, 063, 744	9, 821	100, 066, 363
Transferred to Treasury	4, 000, 000			<u>:</u>	4, 000, 000
Available for distribution	49, 900, 783	26, 092, 015	20, 063, 744	9, 821	96, 066, 363
In mints June 30, 1888	47, 016, 836	25, 142, 074	11, 850, 034	5, 315	ø 84, 014, 259
Distributed from mints	2, 883, 947	949, 941	8, 213, 710	4, 506	12, 052, 104

The above table shows the distribution from mints of 12,052,104 silver dollars during the year, an excess over distribution of the preceding year of 1,150,176.

Owing to the crowded condition of the vaults at the sub treasury at San Francisco, 5,000,000 silver dollars were transferred to the mint in that city. A transfer of 4,000,000 silver dollars was made from the mint at Philadelphia to the Treasury of the United States.

#### SUBSIDIARY SILVER COINAGE.

The balance of silver bullion available for subsidiary coinage on hand at the mints at San Francisco and Philadelphia July 1, 1887, was 2,756,323 standard ounces, the cost of which was \$3,167,212.07. Nearly all of this bullion was derived from trade-dollars transferred in 1887 melted for recoinage.

During the year transfers for recoinage into subsidiary coin were made from the Treasury to the mints at San Francisco and Philadelphia, of worn and uncurrent silver coin of the nominal value of \$535,355.99; and of 745,690 trade-dollars redeemed.

The number of ounces at standard fineness contained in the worn and uncurrent silver coin and trade-dollars transferred from the Treasury to the mints at Philadelphia and San Francisco, and the cost of the metal contained therein, are shown in the following table:

SILVER COINS TRANSFERRED FOR COINAGE INTO SUBSIDIARY COIN, 1888.

Precedence having been given at the mint at Philadelphia to the mandatory coinage of silver dollars, that institution was unable to meet the demand for dimes. The mint at San Francisco was therefore called upon to execute a coinage in dimes, of which \$395,284.80 was coined.

It was also found that the stock of quarter dollars held by the sub-treasury at San Francisco was likely to be soon absorbed. The same mint therefore coined during the fiscal year from trade-dollar bullion ou hand \$192,000 in this denomination of subsidiary coin. This coinage was increased to \$250,000 in August, 1888.

The following table shows the denominations and value of subsidiary coin manufactured during the fiscal year:

SUBSIDIARY COINAGE, FISCAL YEAR 1888.

Denominations.	Pieces.	Value.
Half dollars	5, 673	\$2,836.50
Quarter dollars	778, 673	194, 668. 25
Dimes	12, 199, 175	1, 219, 917. 50
Total	12, 983, 521	1, 417, 422. 25

The seignorage upon subsidiary coinage during the year is shown in the accompanying table:

# SEIGNORAGE ON SUBSIDIARY COINAGE, 1888.

From recoinage of half and quarter dollars coined prior to 1853, and of silver dol-	
lars coined prior to 1873, and other uncurrent coin	\$68.09
From trade dollars transferred	71, 015. 17
From silver bullion purchased	108. 54
Total	71, 191. 80

The standard weight and cost of silver bullion available for subsidiary coinage at the mints at Philadelphia and San Francisco June 30, 1888, are set forth in the following table:

SILVER FOR SUBSIDIARY COINAGE ON HAND AT COINAGE MINTS JUNE 30, 1888.

#### TRADE-DOLLAR RECOINAGE.

Trade dollars redeemed under the act of March 3, 1887 (24 Stats., 634) and remelted yielded 6,687,690.71 standard ounces of silver bullion, of which there has been recoined at Philadelphia and San Francisco to June 30 of the current calendar year 994,978.45 standard ounces, or 14.87 per cent., namely, \$1,040,920.30 of dimes, \$194,500 of quarter dollars, and \$2,500 of half dollars.

The seignorage or profit on this recoinage from March 3, 1887, to June 30, 1888, aggregates \$94,438.67, a net gain of about 8.3 per cent., the

average abrasion being about .006 per cent.

The following tables, with others in the Appendix (pp. 180-183), brought down to date of this report, exhibit the recoinage of trade dollars:

# SEIGNORAGE ON SILVER COINAGE.

The seignorage on the coinage of silver dollars, being the difference between the cost of the bullion and the nominal value of the coins, during the fiscal year 1888, amounted to \$8,407,922.32.

The seignorage on subsidiary silver coins manufactured was \$71,191.80, of which \$71,015.17 was derived from melted trade dollars recoined; \$68.09 from recoinage of halves and quarters of date prior to 1853, and of mutilated silver coins. The remainder of the profit, \$108.54, accrued on coins manufactured from purchased bullion.

The seignorage on the entire silver coinage of the year was \$8,479,-

114.12.

The balance of silver profits remaining in the mints at the close of the fiscal year 1887 was \$150,645.95, which added to the seignorage of the year makes the gross profits to be accounted for \$8,629,760.07.

Of this the sum of \$28,961.96 was paid for expenses connected with the distribution of silver coins, and \$23,157.52 was used to reimburse the operative loss of silver and the loss of silver in sweeps sold. There was deposited in the Treasury of the United States \$8,435,550.14, leaving on hand June 30, 1888, in the coinage mints at Philadelphia, San Francisco, and New Orleans the sum of \$142,090.45, which balance has since been deposited in the Treasury. The numbers of certificates of deposit are cited in the table of seignorage printed in the Appendix.

The seignorage on the coinage of silver from July 1, 1878, to June

30, 1888, has amounted to \$47,536,681.02.

Adding the balance of silver profits in the coinage mints July 1, 1878 (the beginning of the fiscal year following the passage of the act providing for the coinage of the silver dollar), namely, \$424,725.47; and also the sum of \$9,237.54 refunded by Adams Express Company for overcharges in bills for shipping silver dollars; and the further sum of \$4,560.30, consisting of profits arising from surplus silver bullion recovered, and from adjustments of silver values, not strictly seignorage on silver coins but carried to the credit of the Silver Profit Fund, makes the total silver profits to be accounted for since the above date \$47,975, 204.33.

Of the gross profits the sum of \$715,562.64 has been paid for expenses of distributing silver coins, as provided by law, including \$9,237.54 refunded by the express company, as above explained.

The additional sum of \$231,369.42 has been used to reimburse wastage incurred in the coinage of silver, and loss on silver sold in sweeps at-

tending that coinage.

The net profits on manufacture of silver coin for the ten years ended June 30, 1888, including the balance in mints July 1, 1878, has therefore amounted to \$47,028,272.27.

Of net profits there has been deposited in the Treasury of the United States by covering warrants, prior to the close of the fiscal year 1888, the sum of \$46,886,181.82.

The balance of the net profits, \$142,090.45, was in the mints at Philadelphia, San Francisco, and New Orleans June 30, 1888, and has since.

been deposited in the Treasury.

The usual table, showing for the fiscal year 1888 the seignorage at each institution on the manufacture of silver dollars and subsidiary coin, separately, as well as disposition of the profits, will be found in the Appendix.

#### MINOR COINAGE.

During the fiscal year the minor coinage was the largest in the history of the mint at Philadelphia, the remarkable demand for 5-cent and 1 cent pieces during the two preceding years having been maintained and even exceeded.

Blanks for this coinage were supplied under contract with Mr. Joseph Wharton, the same as during the preceding year, in order to enable the mint to meet requisitions for coins of all denominations, including two thirds of the mandatory coinage of silver dollars.

The amounts of 1-cent bronze and 5-cent nickel blanks delivered to the mint during the year, and the cost of the same are shown in the

following table:

i .	Blanks for—	Weight in pounds.	Cost.
Bronze 1-cent piece	s	275, 557. 55	\$74, 026. 69
Nickel 5-cent piece	8	136, 119. 99	60, 341. 38
Total		411, 677. 54	134, 368. 07

Under authority conferred by act of Congress approved March 3,1887, minor coins amounting to \$157,418.60 were transferred to the mint for recoinage and re-issue. The amount and denominations of coins so transferred are shown in the following table:

MINOR COINS TRANSFERRED BY THE TREASURER OF THE UNITED STATES AND DISPOSITION THEREOF DURING THE FISCAL YEAR 1888.

Denominations.	Redeemed.	Re-issued.	Balance for recoinage.
Bronze 1-cent pieces	\$25, 777. 61	\$19,400	\$6, 377. 61
Bronze 2 cent pieces	4, 752, 70		4, 752. 70
Nickel 1-cent pieces	5, 466, 31		5, 466. 31
Nickel 3-cent pieces	11, 706. 27		11, 706. 27
Nickel 5-cent pieces	109, 406, 50	99, 900	9, 506, 50
Old copper cent pieces	309. 21		
Total	157, 418, 60	119, 300	37, 809. 39

Of the coins transferred the value of \$37,809.39 being unfit for reissue was melted for recoinage, while \$309.21 in old copper cents, unfit for coinage purposes, has been melted and sold as old metal under an appropriation* by Congress to reimburse the Treasury for the loss.

The following table exhibits the denomination, nominal value, and

distribution of minor coins during the fiscal year 1888:

Total	19, 656, 182. 35	1,700,288.02	17, 915, 968. 22

^{*}There is no record of the melting at the Mint of any old copper half-cents; but it is believed that few, if any, are in circulation.

#### APPROPRIATIONS AND EXPENDITURES.

The amount specifically appropriated for the support of the mints and assay offices of the United States for the fiscal year 1888 was \$1,096,390.

This amount is in excess of the appropriations stated in my last fiscal report, by the sum of \$1,890, which is the amount of a subsequent deficiency appropriation for wages at the assay office at Boisé City made March 30, 1888. (25 Stats., 48.)

The appropriations included the sum of \$2,000 for repairs of building

at Denver, and \$1,000 for repairs of building at Boisé City.

Besides the amount specifically appropriated, the unexpended balance of the appropriation for renewal of steam power plant at the mint at Philadelphia, namely, \$43,174.93, was used during the fiscal year.

Of the specific appropriations there was expended \$1,039,492.35. There was also expended by the mints from the permanent appropri-'ation* for the coinage of the silver dollar the sum of \$233,559.84, and, \$921 by the Bureau of the Mint, the latter amount for daily quotations by telegraph of the price of silver in London. The total expenditures for the service of mints and assay offices, including mandatory coinage of the silver dollar, amounted during the fiscal year to \$1,273,973.19.

Appropriations and expenditures for the mints and assay offices are

exhibited in the following table:

# APPROPRIATIONS AND EXPENDITURES, 1888.

# EARNINGS AND EXPENSES OF REFINERIES OF MINTS AND THE ASSAY OFFICE AT NEW YORK,

Under the provision of law (paragraph 8, chapter 329, volume 1, Supplement to the Revised Statutes) which requires that refining and parting of bullion shall be carried on at the mints of the United States and at the assay office at New York, and that the charges collected from depositors shall be used to defray the expenses of operations, the refineries of the mints at Philadelphia, San Francisco, Carson, and New Orleans, and of the assay office at New York have been in operation during the past year.

The value of charges collected from depositors and carried to credit of the appropriation for parting and refining bullion, amounted to \$157,727.45, and the gross expenditures to \$171,645.39.

It is proper to state, however, that the net expenditures of the refineries amounted to only \$155,903.16, or \$1,824.29 less than the charges

collected from depositors for parting and refining.

The amount received from sale of blue vitriol and spent acid from the refineries, and covered into the Treasury as a miscellaneous profit, was \$15,742.23, which, under a decision of the First Comptroller, has ceased to be used, since the fiscal year 1885, in offsetting payments for acids.

Your attention, and that of Congress, was invited in my last fiscal report to the advisability of changing existing law so as to allow of the use of moneys received from sale of by-products from operations of acid refineries, for defraying the expenses thereof, and the legislation necessary to carry this into effect was proposed. The necessity for further legislation in this important particular of mint practice and Treasury accounting failed however to receive the attention of Congress.

The receipts for parting and refining since July 1, 1876, when the Government refineries were required to be self supporting, have, however, exceeded gross expenses by \$174,248.15. This was the amount standing to the credit of the appropriation for parting and refining bul-

lion on July 1, 1888.

The charges collected at each institution from depositors for parting and refining bullion, and the gross and net expenses at each during the fiscal year, are exhibited in the following table:

Charges collected and Expenditures for parting and refining Bullion, 1888.

Institutions.	Charges collected.	Gross ex- penditures.	Net expendi- tures.
Mint at Philadelphia	\$19, 600. 23	\$10, 505. 85	\$10, 505. 85

# EARNINGS AND EXPENDITURES OF MINTS AND ASSAY OFFICES.

The total earnings and gains from all sources at mints and assay offices of the United States amounted to \$9,788,592.80, while the total expenditures and losses of all kinds amounted to \$1,534,210.11, a net profit in the operations on bullion during the year of \$8,254,382.69.

It will be understood that the bulk of the earnings consisted of seign-

orage on silver dollars, subsidiary and minor coins.

In the Appendix will be found the usual table exhibiting in detail the earnings at each institution from all sources, and the expenditures and losses of all kinds.

# CLASSIFIED STATEMENT OF EXPENDITURES, 1888.

There was presented in my report for the fiscal year 1886, for the first time, a classified statement exhibiting the expenditures of the coinage mints and of the assay office at New York.

In my last fiscal report a similar statement was exhibited comprising all the institutions under the control of this Bureau, instructions having been given that the accounts should be so kept that cost sheets could

be prepared showing the expenditures for each department and for each class of supplies.

At the close of the review in this report of the business of each mint

will be found a similar statement.

The following condensation of the tabular statements of all the institutions, exhibits their operations as well as expenditures:

EXPENDITURES AT THE UNITED STATES MINTS AND ASSAY OFFICES DURING THE FISCAL YEAR 1888.

EXPENDITURES AT THE UNITED STATES MINTS AND ASSAY OFFICES DURING THE FISCAL YEAR 1888—Continued.

#### OPERATIONS.

Bars manufactured:	
Gold	\$51, 765, 436. 95
Silver	7, 547, 578. 27
Total	59, 313, 015. 22
Coinage executed:	•
Silver	34, 136, 095, 25
Minor	1, 218, 976. 57
Total	63, 719, 242, 32

#### SUMMARY OF OPERATIONS.

The value of the gold and silver deposited at mints and assay offices of the United States during the fiscal year 1888 was \$122,717,303.12.

The amount of bullion operated upon by the melters and refiners of the mints at Philadelphia, San Francisco, Carson, and New Orleans, and assay office at New York, was as follows:*

#### BULLION OPERATED UPON BY MELTERS AND REFINERS, 1888.

	Metals.		l ounces.
	erchars.	Received.	Operated on.
		,	6, 361, 144 67, 446, 226
Total	· · · · · · · · · · · · · · · · · · ·	78, 818, 885	73, 807, 370

The operations of the coining departments of the mints at Philadel-, phia, San Francisco, and New Orleans were as follows:

#### OPERATIONS OF COINING DEPARTMENTS, 1888.

	1	4 · · · · · · · · · · · · · · · · · · ·		Standard	ounces.
		Metals.	.	Received.	Operated on.
				3, 474, 589 60, 303, 345	3, 37 <b>4</b> , 292 59, 957, 537
Total				63, 777, 934	63, 331, 829

*In another place (p. 160) I have called attention to the terms of section 3542 Revised Statutes. The same section affords the only grounds in mint statements for reports of deliveries of bullion to operative officers, as of amounts operated upon. As in mint practice deliveries of bullion to the melter and refiner and the coiner are usually in excess, and may, at any given time, be greatly in excess of amounts operated upon, and any excess over the latter amount is returned to the superintendent at times of the annual or other settlements, the sum of "deliveries" is of no practical moment, except perhaps in case of a question as to the legal allowance for operative wastage under the terms of section 3542. I have accordingly introduced into this report statements of the amount of bullion actually operated upon.

The legal allowance for wastage, already unnecessarily large, becomes indefinitely extended as long as the present statute can be construed to prescribe its computation

upon "deliveries" of bullion rather than the net amount operated upon.

The amount of gold and silver melted at the mint at Denver and at the assay offices at Boisé City, Helena, Charlotte, and Saint Louis was as follows:

	Metals.	Standard ounces.
Gold		237, 825
Silver		, t
Total		321, 391

The total operations on bullion in mints and assay offices, were as follows:

Bullion Operated upon by Melting and Coining Departments of all the Institutions, 1888.

			Standard ounces.		
	Metals.	,	Received.	Operated on.	
			10, 646, 589 132, 271, 621	9, 973, 261 127, 487, 329	
Total			142, 918, 210	137, 460, 590	

The total value of precious metals wasted in the operations of both the coiners' and melters and refiners' departments was \$26,946.53.

In addition to the operative wastage on gold and silver there was a loss on the sale of sweeps, being the difference between the assay value of gold and silver contained in sweeps recovered and the amount realized from their sale, amounting to \$15,644.61. The total loss on operations of gold and silver bullion at mints and assay offices during the year was accordingly \$42,591.14.

There was, on the other hand a gain of bullion larger than the entire loss. The value of the surplus bullion returned during the year by operative officers of coinage mints and the assay office at New York was

**\$**39,998.96.

In addition, gold and silver in granules and sweeps were recovered

from the deposit melting room of the value of \$10,993.55.

There was an operative gain, arising from differences in assays and in charges in favor of the small assay offices, on bullion shipped to Philadelphia for coinage amounting to \$5,318.45.

There was also a gain on the sale of plumbic melts at the assay of-

fice at New York, amounting to \$18.27.

The total gains thus shown from operations on bullion (not including, of course, any seignorage or proceeds of sale of old materials or byproducts) were therefore \$56,329.23, against a loss, as shown above, of \$42,591.14, a net gain of \$13,738.09.

H. Ex. 2—8

The coinage of the three coinage mints for the fiscal year 1888, numbers and percentages of pieces coined, and mean cost per piece are exhibited in the following table:

#### MINT AT PHILADELPHIA.

With sorrow I am called upon to record the death, on March 21, 1888, of Dr. James C. Booth, in the seventy-eighth year of his age and the thirty-ninth year of continuous service as melter and refiner of the mint at Philadelphia, an important and responsible office, which he filled with distinguished honor, unfailing skill, and untiring efficiency.

Dr. Booth was succeeded, March 29, 1888, by Dr. David K. Tuttle,

melter and refiner of the mint at Carson.

Mention was made in my last fiscal report of improvements in the steam motive plant of the mint at Philadelphia, under a special appropriation* of \$54,639.20, but not completed until about the close of the first quarter of the present fiscal year. Incidental to this important improvement in plant, valuable space has been cleared for vaults and other necessaries. Two of the cashier's vaults have been lined with steel and supplied with a double set of Dexter locks.

In the same report it was suggested that the Supervising Architect be requested to prepare plans for the extension of the edifice of the mint at Philadelphia, and to prepare estimates in accordance therewith for the consideration of the Department as a basis for such recommendations as it might be found expedient to make to Congress.

On this subject I was led to the following remarks:

From the fact that measures for the extension of the ground area of the mint at Philadelphia have repeatedly been presented to Congress without its concurrence, I am bound to assume that no similar proposal would be sufficiently practicable to meet the present exigency in the case of that mint—now the most important mint of the whole service, as always it has been, and as constituted by numerous sections of law which have been perpetuated from the period previous to 1873, when it was alone

the Mint of the United States, and all other mints its branches. Indeed, opportunities presented from time to time for the acquisition of ground space for an extension of this mint, at a moderate cost, can hardly be expected to recur.

Nor was it considered that such an expedient as the sale of the present very valuable site and the purchase of a larger one of less value could receive the approval of Congress in time to meet recent emergencies, such as the necessity for the new steam

plant, erected by authority of Congress during the pist summer.

Notwithstanding the recent renewal of steam plant, at a cost of some \$55,000, and the present exigency for further renewals of a more portable kind, it may not be held that fixed improvements of this description really preclude the subject of change of site from further consideration. As alternatives, therefore, from the addition of a third story and the extension of the front basement, it becomes my duty to make succinct mention of two other expedients which have previously been proposed, namely, (1) the sale of the present very valuable site and purchase of a larger one of less relative value: or (2) the costly acquisition of new ground adjoining the present site.

In accordance with my recommendation, and with estimates prepared by the Supervising Architect, there was included in an act approved October 2, 1888, making appropriations for sundry civil expenses of the Government, an appropriation, namely, "For the United States mint at Philadelphia, Pa.—for an additional story to, and enlarging the building, including vault, alterations, and other necessary work, \$220,000."

Inadequate as the appropriation is for any measure of enlargement equal to the purpose of an advanced establishment, it is hoped that, judiciously applied, it will prove enough for an enlargement within the narrow limits of the ground space and the present building without radical and complete reconstruction, for which authority has neither been given nor sought. Nor, for reasons stated in my last report, has the question of another site for the mint at Philadelphia been presented to Congress as an alternative from the alteration and enlargement of the present edifice, so singularly wanting in adaptation to the requirements of a manufacturing establishment in respect to ground space and environments as well as to original construction.

The Supervising Architect of the Treasury Department has been charged with the enlargement and improvements under the appropriation, and at the present date has nearly completed plans for entering

upon the work.

The business of the mint at Philadelphia has been larger during the past year than ever, severely taxing the capacity not only of the plant but of the whole establishment.

The value of deposits and purchases of gold and silver during the year was as follows:

## DEPOSITS AT THE MINT AT PHILADELPHIA, FISCAL YEAR 1888.

Gold			\$5, 155, 253. 91
Silver			
Total	 	•••••	25, 534, 443. 80

In addition, minor coinage metal was received of the weight of 6,919,966 ounces.

The total weight of the bullion received, gold, silver, and minor coinage metal, was about 1,4991 tons.

The number of assays made in the assayer's department was approximately as follows:

Gold	15, 000
Silver	44, 000
·	

The gold operated upon in the melter and refiner's department amounted to 1,129,051 standard ounces and the wastage to 472.325 standard ounces. In the melter and refiner's department 37,311,197 standard ounces of silver was operated on, with a net wastage of 1,918.57 standard ounces. The number of melts made in the same department was as follows:

				For ingots.		
	Description.		For bars.	Made.	Condemned.	
			240 199	184 12, 932	13	
Total	·		439	13, 116	91	

The operations of the acid refinery are exhibited in the following table:

#### MINT AT SAN FRANCISCO.

The value of deposits of gold and silver at the mint at San Francisco during the fiscal year is exhibited in the following table:

DEPOSITS AT THE MINT AT SAN FRANCISCO, FISCAL YEAR 1888.

	Metal.	Standard onnces.	Value. •
	0	1 ' '	\$23, 567, 636. 8a 2, 802, 360. 43
, Total			26, 369, 997. 24

The melter and refiner operated upon 2,603,513 standard ounces of gold, made 890 melts of gold ingots, of which 3 were condemned, and at the close of the fiscal year returned to the superintendent 1,103.185 standard ounces of gold in excess of the amount with which he was charged.

The same officer operated upon 4,675,920 standard ounces of silver during the year, made 2,821 melts of silver in gots, of which 4 were condemned, and returned in settlement a surplus of 1,216 standard ounces.

The coiner operated upon 2,592,643 standard ounces of gold, and coined \$12,555,000 in double eagles, \$7,260,000 in eagles, and \$2,995,000 in half eagles; a total of 1,952,750 pieces of gold, of the value of \$22,810,000, with a percentage of 47.2 of good coin from ingots operated upon. His wastage in gold was 64.248 ounces.

The same officer operated upon 5,135,397 standard ounces of silver, and manufactured 2,304,000 silver dollars, \$192,000 in quarter dollars, and \$395,284.80 in dimes; a total of 7,024,848 pieces of silver of the value of \$2,891,284.80, with a percentage of 47.8 of good coin produced. His wastage of silver was 851.91 standard ounces.

The business of the melting department of the mint at San Francisco for a series of years, is exhibited in the following table:

#### MINT AT NEW ORLEANS.

The amount and value of the gold and silver deposited at the mint at New Orleans during the year were as follows:

#### DEPOSITS AT THE MINT AT NEW ORLEANS, FISCAL YEAR 1888.

Metals.	Standard ounces.	Value.
Gold	1 ' 1	\$130, 578, 56 11, 385, 064, 09
Total		11, 515, 642. 65

The melter and refiner operated upon 63,071 standard ounces of gold during the year, with a wastage of .331 standard ounce. The same officer operated on 19,487,283 standard ounces of silver, with a wastage of 9,606.29 standard ounces. While the silver wastage of the melter and refiner was larger than usually incurred in the other mints, it was considerably less than for the preceding year.

The coiner operated upon 33,796 standard ounces of gold, and manufactured 13,500 eagles (\$135,000). His wastage was 3.362 standard ounces. He operated on 19,050,561 standard ounces of silver, manufacturing 11,900,000 silver dollars, with a wastage of 2,953.92 standard ounces.

The value of the foreign coins deposited at the mint at New Orleans during the year is exhibited in the following table:

#### MINT AT CARSON.

The business of the mint at Carson during the fiscal year has been confined to the receipt of gold deposits for payment of value in coin or bars, and to the receipt of silver deposits for bars, the gold contained being paid for in coin when desired.

The acid refinery of the mint has been in operation during the year.

The coiner's department was closed.

VALUE OF DEPOSITS AND OF BARS MANUFACTURED AT THE MINT AT CARSON, FISCAL YEAR 1888.

	Metals.	Deposits.	Bars manu- lactured.
Gold		\$894, 921. 30	\$89.60
Silver		909, 890. 21	\$89.60 *845,357.85
Total		1, 804, 811. 51	845, 447. 45

Mr. John H. Dennis became melter and refiner April 14, 1888, succeeding Dr. D. K. Tuttle, who was appointed to the same office at the mint at Philadelphia.

The melter and refiner's department operated upon 45,538 standard ounces of gold during the year, with a surplus of 99.940 ounces. same department operated upon 766,394 ounces of silver, with a surplus of 167.65 standard ounces.

The expenditures of the mint at Carson during the year for the several classes of supplies and in the different departments are exhibited in the following table:

EXPENDITURES AT THE MINT AT CARSON FOR THE FISCAL YEAR 1888.

Total		

There was 1,630,465 pounds of sulphuric acid used in parting operations. There were sold during the year 248,635 pounds of blue vitriol, and 2,389,200 pounds of waste acid, for which was received \$13,869.06. Old lead and iron were also sold, for which was received \$633.96, making the total amount received for by-products and old material of the melter and refiner's department, \$14,503.02.

There was 652,713 gross ounces of silver from the refinery used over

in the parting of gold deposits.

The business of the assay department was very large, consisting of assays of gold and silver deposits, as well as of fine gold and silver bars, the whole involving about 117,000 weighings.

A large proportion of the silver deposits at the assay office at New York contained mercury. The difficulty of humid determinations in this class of deposits has been largely overcome by the use of the "Levol" ammonia method.

A plant of gas furnaces for melting gold deposits was put in during the year, and has proved satisfactory both in convenience and economy.

Cornish rolls were placed in the sweep-cellar early in the year.

The artesian well, electric-light plant, and independent steam supply, referred to in my last report as having been introduced, have continued to work satisfactorily.

The values of the foreign gold coins deposited at the assay office at New York during the past fiscal year are exhibited in the following

table:

#### ANNUAL TRIAL OF COINS.

The following-named gentlemen were designated by the President of the United States to examine and test the fineness and weight of coinsreserved by the several mints during the calendar year 1887, as required by section 3547 of the Revised Statutes: Zebulon B. Vance, United States Senate; Thomas M. Norwood, House of Representatives; GeorgeF. Becker, San Francisco, Cal.; C. Elton Buck, Wilmington, Del.; Charles B. Dudley, Altoona, Pa.; W. P. Lawver, Bureau of the Mint, Washington; J. W. Mallet, University of Virginia, Va.; Alfred M. Mayer, Hoboken, N. J.; Frank Nicholson, Saint Louis, Mo.; John M. Ordway, New Orleans, La.; Charles S. Peirce, Milford, Pa.; Charles E. Pellew, New York, N. Y.; Raphael Pumpelly, Newport, R. I.; David K. Tuttle, Carson City, Nevada; Henry F. Wild, Boisé City, Idaho.

The ex officio members present were Judge William Butler, of the United States district court for the eastern district of Pennsylvania, and Herbert G. Torrey, assayer of the United States assay office at

New York.

The Commission met at the mint at Philadelphia Wednesday February 8, 1888, and in the presence of the Director of the Mint proceeded to test as to fineness and weight the gold and silver coins reserved at the mints at Philadelphia, San Francisco, and New Orleans during the calendar year 1887.

The committee on weighing reported that an examination of the coins reserved showed that all the coins tested were correct within the limits

of deviation allowed by law.

The committee on assaying reported that the average fineness of 65 pieces of gold executed by the mint at Philadelphia, melted in mass, was .900 [standard], and of 5 pieces tested singly, .90016; of 44 pieces of gold executed by the mint at San Francisco, melted in mass, the average fineness was .8999, and of 24 pieces of gold coined at the same mint, tested singly, .89995. The average fineness of 110 silver dollars coined at the mint at Philadelphia, melted in mass, was .8998, and of 22 pieces assayed in tests of 2 pieces, .8995. The average fineness. of 931 dimes coined at the same mint, melted in mass, was .900 [standard], and of 16 pieces assayed in tests of 2 pieces, .89956.

The average fineness of 50 silver dollars coined at the mint at San Francisco, melted in mass, was .8998, and of 10 pieces assayed in tests of 2 pieces, 89976. The average fineness of 821 dimes coined at the same mint was .8998, and of 8 pieces, assayed in tests of 2 pieces. .89977.

The average fineness of 120 silver dollars coined at the mint at New Orleans, melted in mass, was .9004, and of 24 pieces coined at the same mint, assayed in tests of 2 pieces, .89953.

The committee on assaying reported that "no coin among those examined was found to deviate from the standard fixed by law beyond the legal tolerance." The result of the examination and test as to weight and fineness of the coinage of the United States is embodied in the following resolution adopted by the Commission:

Resolved, That the Assay Commission having examined and tested the reserved coins of the several mints for the year 1887, and it appearing that these coins do not differ from the standard fineness and weight by a greater quantity than is allowed by law, the trial is considered and reported as satisfactory.

It will be seen that the result of the annual trial of coins was satisfactory, and that the coinage of the year was found to have been close to the standard fixed by law.

#### VALUES OF FOREIGN COINS.

In accordance with the requirements of section 3564 of the Revised Statutes the values of the standard coins of the principal countries of the world were estimated by me and proclaimed by the Secretary of the Treasury January 1, 1888.

These estimates, to be followed at custom-houses of the United States during the calendar year 1888, in determining values of invoices expressed in terms of foreign units of account, are shown in the following table:

#### ESTIMATE OF VALUES OF FOREIGN COINS.

Note.—The "standard" of a given country is indicated as follows, namely: Double, where its standard silver coins are unlimited legal tender, the same as its gold coins; single gold or single silver, as its standard coins of one or the other metal are unlimited legal tender. The par of exchange of the monetary unit of a country with a single gold, or a double, standard is fixed at the value of the gold unit as compared with the United States gold unit. In the case of a country with a single silver standard, the par of exchange is computed at the mean price of silver in the London market for a period commencing October 1 and ending December 24, 1887, as per daily cable dispatches to the Bureau of the Mint.

Venezuela	Singlesilver	Bolivar	.14	Gold: 5, 10, 20, 50, and 100 bolivars. Silver: 5 bolivars.

^{*} Gold the nominal standard; silver practically the standard. † Coined since January 1, 1886. Old half-imperial = \$3.986.

The average price of silver in London for the period commencing October 1, 1887, and ending December 24, 1887, was 44.0876 pence per ounce, British standard, equivalent at the par of exchange to \$0.96645 per ounce fine, a decline of \$0.0389 from the average price for the corresponding period of the preceding year. This decline in the price of silver occasioned a change in the estimated values given the following coins:

#### CHANGES IN VALUES OF FOREIGN COINS FROM 1887 TO 1888.

Coins.	Value Jan. 1, 1887.	Value Jan. 1, 1888.
Florin of Austria		\$0.345
Boliviano of Bolivia	. 727	. 699
Sucre of Ecuador		. 699
Rupee of India	.346	. 332
Yen of Japan	. 784	. 753
Dollar (or peso) of Mexico	. 790	. 759
Sol of Peru	. 727	. 699
Rouble of Russia	.582	. 559
Mahbub of Tripoli		. 630
Dollar (or peso) of Colombia	. 727	. 699
Bolivar of Venezuela		140

It may be proper to state that the change in the bolivar of Venezuela from \$0.193, corresponding to the value of the French franc, to \$0.14 on the 1st of January, 1888, was occasioned by the change upon the part of Venezuela from the double to the single silver standard.

In the Department circular of values of foreign coins the value of the pesos of Guatemala, Honduras, and Nicaragua, the same for the three

countries, was estimated for the first time January 1, 1888.

Efforts have been made at the instance of this Bureau by the Department of State to obtain definite information in regard to the monetary unit, or money of account, of Tripoli, but so far the information has not been satisfactory.

The values of the gold and silver yen of Japan were again estimated separately for the reason, as stated in my last report, that while the standard of Japan by law is gold, silver is practically the standard, and invoices of merchandise from Japan are generally in terms of the silver

yen.

In response to a resolution of the Senate dated April 30, 1888, requiring the Director of the Mint to furnish certain information relative to the annual estimate of values of foreign coins prepared by him under the provisions of section 3564 of the Revised Statutes, the following letter with part of its appendix was communicated to the Senate May 7, 1888, when it was ordered to lie on the table and be printed (Mis. Doc. No. 106):

#### TREASURY DEPARTMENT, BUREAU OF THE MINT, Washington, D. C., May 4, 1888.

SIR: I have the honor to acknowledge the receipt of Senate resolution dated April

30, 1888, as follows:
"Resolved, That the Director of the Mint be, and he is hereby, directed to furnish the Senate with the circular values of foreign silver coins prepared by him under the provisions of section 3564 of the Revised Statutes, and to inform the Senate of the exact amount of pure silver in each of the silver coins named in said circular, and also to inform the Senate whether the values of such silver coins as designated in said circular are estimated by him according to the pure silver contained in them respect-

Along with the last circular of this Department, proclaiming, in accordance with section 3564 of the Revised Statutes, the values of foreign coins, expressed in the money of account of the United States, in terms of which invoices of foreign merchandise are commonly expressed, I have the honor to submit, in conformity to the above resolution, a table of the number of grains of pure silver contained in each foreign silver coin mentioned in the circular referred to.

In estimating the values of foreign coins in the case of countries of a single silver standard the values of the monetary units, and consequently of the silver coins, are determined by ascertaining the market value of the pure silver in such units, based upon the mean price of silver in the London market for a period commencing October 1 and ending December 24 last preceding, as per daily cable dispatches to the Bureau of the Mint.

In the case of countries having the double standard the value of the bimetallic par is ascertained by comparing the amount of pure gold in a given unit with the pure gold in the unit of the United States.

Respectfully yours,

JAS. P. KIMBALL, Director of the Mint.

The President pro tempore of the Senate.

Number of Grains of Pure Silver Contained in Each of the Silver Coins Named in the Circular of January 1, 1888 (Treasury Department).

Country.	Silver coins.	Grains of pure silver contained.

Venezuela	5 bolivars	347. 22

The estimate of values of foreign coins appended to the above com-

munication is cited on a preceding page of this volume (p. 55).

The following is a transcript of Department Circular No. 11, division of customs, dated January 16, 1888, addressed by the Secretary of the Treasury to collectors of customs and others:

"The Department, by its decision of October 16, 1886, by the advice of the Director of the Mint, prescribed that the Shanghai tael should be taken at the value of \$1.1094 for custom-house purposes. It has, however, been claimed that such valuation is excessive at the present time, and the matter was again referred to the Director of the Mint for investigation, who reports, under date of the 12th instant, that the value of the Haikwan, or customs tael of China, based on the same price of silver that was used in estimating the values of foreign silver coins proclaimed in the circular of January 1, 1888, is \$1.1505, and that the values of the local taels of the various Chinese ports, based on the same valuation of silver, are as follows:

Amoy	\$1.0459	Ki kiang	\$1.0822
		New Chwang	
		Ning-Po	
Chin Kiang	1. 1039	Shanghai	1,0328
		Swatow	
Hankow	1.0579	Tien-tsin	1.0957

These values should be adopted by customs officers for the respective taels mentioned in all cases of liquidation of entries and importations made after the date of these instructions."

The following memorandum relative to the tael of China is here ap-

pended:

The Chinese Government coins neither gold nor silver money. The only coins struck in the Empire consist of copper and zinc, called "cash." These are of various sizes and issues, very many of which, from 2,000

to 3,000, equal the value of a tael.

The tael is not a coin but a weight. Originally a measure of weight, as representing a given quantity of fine silver, it has become the measure of value. All payments, in silver coin or bullion, are determined by weight as compared with the ideal tael, the fineness of foreign coins being determined by Chinese assay. Hence the tael has become the unit of account of China. As a weight the tael is divided thus:

1 tael=10 mace, =100 candarenes, =1,000 cash.

As a unit of account, its divisions are reckoned in cents, 100 cents equaling 1 tael. By the treaties of commerce of November 15, 1858, the ideal tael was to weigh 583.20 grains and to consist of sycee (pure) silver.

As a matter of fact, it weighs only 579.84 grains, and its fineness, as determined by fifty-two assays made at the Japanese imperial mint at Osaka, varies from .9845 to .9865, the greater number of pieces tested being .9855.*

Not only does the ideal tael not correspond in weight and fineness with the standard fixed for it, but taels differing in weight and fineness are employed for local purposes in nearly all the ports of China.

Mr. Williams, in the fifth edition of the Chinese Commercial Guide, remarks that, at Peking, he found five scales, in which the taels differed as follows: 548, 541, 552, 539, and 579 grains.

On January 15, 1874, Dr. Henry R. Linderman, Director of the Mint, addressed a communication to Mr. S. Wells Williams, secretary of

^{*}Letter of German consul at Canton: Report of Director of Mint, 1878, p. 40. Memorandum on Currency of China, by Minister George F. Seward, in Foreign Relations of the United States, 1878, p. 136.

legation at Peking, requesting information in regard to the different kinds of taels in use in China, the weight of each kind in grains, the fineness or contents in pure metal of each kind, and the kind of tael most in use.

Mr. Williams, after conference with the different consuls in China, transmitted, under date of September 21, 1874, to Director Linderman, answers from six consuls at different ports of China, with the following remarks:*

You will perceive, from a comparison of these six reports, how confused and uncertain is the real value of the Chinese tael, the monetary unit. I have only a faint expectation that these six reports will help you to arrive at a definite decision as to the real value of the Chinese tael.

In 1878 Mr. George F. Seward, then United States minister at Peking, addressed to the United States consuls in China communications relative to the trade dollar, incidentally touching on the subject of the weight and fineness of the Chinese tael.

The taels, however, more commercially important, are, first, the Haikwan tael, that in which all customs dues are payable, and the Shanghai (Chauping) tael, used at Shanghai in ordinary mercantile transactions and exchanges with foreign countries.

It is generally agreed that the weight employed by the Chinese Government in collecting revenue, commonly known as the Haikwan tael, is about 580 grains, and the actual fineness of sycee, or Haikwan silver, about .9855.

Mr. Williams, in his Chinese Commercial Guide, page 274, gives the weight of this tael as 579.84 grains. Minister Seward places it at 579.84 grains. In his Memorandum on the Currency of China, & he says:

The inspector-general of customs has given me a memorandum on the weight and fineness of the Haikwan tael. According to this it should weigh 1 ounce 4 pennyweights 3.84 grains troy, say 579.84 grains (misprinted 589.84), or 37.578 grams.

In reply to the interrogatory from the Bureau of the Mint in respect to the standard of value in China, the secretary of the United States legation at Peking says, under date of March 16, 1886:

The silver tael, according to the Treasury standard (Kuping), is absolutely pure. The weight of this tael is 579.84 grains.

Taking, then, the actual weight of the Haikwan tael to be about 580 grains (579.84), and its fineness the average of the results obtained by the assay of sycee silver at the Japanese mint, viz, .9855, the quantity of pure metal contained in this tael would be 571.43 grains. At the value of silver used in estimating the values of foreign coins in the circular of January 1, 1888, namely, \$0.96645 per ounce fine, the value of the Haikwan tael is \$1.1505. The Shanghai (Chauping) tael is reckoned in the proportion of 100 Haikwan taels to 111.4 Shanghai taels.

Accordingly, the Shanghai tael contains about 513 grains (512.95) of pure silver, which, at the price used in estimating the values of foreign silver coins in the circular of January 1 of the present year, namely, \$0.96645 per ounce fine, would give the value of the Shanghai tael at

\$1.0327.

^{*} Report of Director of the Mint, 1875, p. 90.

[†] Report of Director of the Mint, 1878, p. 38. ‡ Report of Director of the Mint, 1878, p. 38.

[§] Foreign Relations of the United States, 1878, p. 136.

Report of Director of the Mint, 1886, p. 236.

Memorandum on Currency of China, United States Consular Reports, 1878, p. 135. Report of Director of the Mint, 1875, p. 90. "Arbitrages et Parités," Ottomar Haupt, Paris, 1887, p. 259.

The following table exhibits the values of the different taels of the Chinese ports, based upon the value given the Haikwan tael. In arriving at these values the ratios established between the various local taels and the Haikwan tael, as communicated by the secretary of the United States legation at Peking, under date of March 16, 1886,* have been used.

These ratios agree exactly with the equivalents given by Ottomar Haupt in his "Arbitrages et Parités," 1887, p. 258.

#### VALUES OF LOCAL TAELS.

[Based on value of Haikwan (customs) tael, \$1.1505.]

Name of port.	Value of tael.	Name of port.	Value of tael.
A moy Canton Che Foo Chin Kiang Foo Chow Hankow	1, 0354 1, 1020	Kikiang New Chwang Ningpo Shanghai Swatow Tientsin	1. 0004 1. 0866 1. 0328

The Bureau of the Mint has been called upon, at various times, to estimate the value of the Chinese tael for customs purposes. On May 12, 1875, Dr. Linderman, in a communication addressed to the Secretary of the Treasury, estimated the value of the Haikwan (Haikuan) tael, and also transmitted a table exhibiting the values at six of the principal ports of the various taels, at the different rates of exchange then ruling. In this communication Dr. Linderman took the weight of the Haikwan tael at 579.84 grains and the fineness at .980.

April 18, 1879, Director Burchard, in a communication addressed to the Secretary of the Treasury, estimated the value of the Haikwan tael, taking its weight to be 579.84 grains and its fineness .980, the same as Director Linderman.

In a communication addressed to the Secretary of the Treasury April 27, 1881, Director Burchard estimated the value of the Shanghai tael based on the market price of silver at that time. In this calculation he took the Haikwan tael to weigh 579.84 grains and its fineness at .9855, and, relatively, the value of the Shanghai to the Haikwan to be 111.4 Shanghai taels to 100 Haikwan taels.

March 10, 1885, Director Burchard again estimated for the Secretary of the Treasury the value of the Shanghai tael, based on the price of silver used in estimating the values of foreign silver coins January 1, 1885. In this valuation he took the amount of pure silver contained in the Shanghai tael to be 512.95 grains, the same as before.

On October 14, 1886, the value of the Shanghai tael was estimated by me at the value of silver used in estimating the values of foreign silver coins January 1, 1886. In this calculation the weight of fine silver contained in the Shanghai tael was taken at 512.95 grains.

#### REGULATIONS GOVERNING THE TRANSACTION OF BUSINESS.

As mentioned in my last fiscal report, the edition of the Regulations Governing the Transaction of Business at the Mints and Assay Offices of the United States in force at the date of my entry upon the duties of Director of the Mint was dated 1881. For the purpose of

^{*} Report of the Director of the Mint, 1886, p. 236.

embodying all the regulations a new edition was issued, to take effect

April 1, 1887.

Attention was also directed to the fact that another edition, embodying still later regulations, was in course of preparation. This has since been issued.

#### IMPORTS AND EXPORTS OF GOLD AND SILVER.

In the Appendix will be found the usual tables showing by months and by customs districts imports of coin and bullion into the United States during the fiscal year 1888, and exports for the same period.

Tables will also be found showing the imports of gold and silver ores. The value of the gold bullion imported into the United States during the year was \$17,180,332. All of this was foreign, no bars of gold bearing the stamp of a United States mint or assay office having been re-imported during the year.

Foreign gold coin was imported of the value of \$21,572,472. The total importation of foreign gold coin and foreign gold bullion was \$38,752,804.

There was exported gold bullion of domestic production \$9,348,685,

and re-exported of foreign gold coin \$5,816,150.

Of United States gold coin the imports amounted to \$5,181,513 and

the exports to \$3,211,399.

There was a net gain of gold to the United States by imports of bullion and coin over exports of \$25,558,083.

The movement of gold to and from the United States during the year is exhibited in the following table:

#### MOVEMENT OF GOLD, FISCAL YEAR, 1888.

IMPORTS.	1
Bullion	. \$17, 180, 33
Foreign coin	. 21, 572, 47
Total	38, 752, 804
United States coin	. 5, 181, 513
Total bullion and coin	43, 934, 317
EXPORTS.	= :=====
Domestic bullion.	9, 348, 685
Foreign coin	
Total	15, 164, 835
United States coin	. 3, 211, 399
Total bullion and coin	. 18, 376, 234
Excess of imports	25, 558, 083

There was imported into the United States during the year foreign silver bullion of the commercial value of \$5,619,006. No bars of silver bearing the stamp of a United States mint or assay office were imported. Foreign silver coin imported was of the value of \$9,478,084. The total value of foreign silver bullion and foreign silver coin imported was \$15,097,090.

In addition, foreign silver ores were imported, principally from Mexico, containing silver of the commercial value of \$5,115,563. value of foreign silver bullion, silver coin, and silver ores imported was

\$20,514,232.

Domestic silver bullion was exported of the commercial value of \$20,563,956, and foreign silver coin, principally Mexican dollars, shipped from the port of San Francisco to China, to the amount of \$7,370,549. Foreign silver bullion was re-exported of the value of \$31,980. The total value of exports of domestic silver bullion and of foreign silver coin and foreign silver bullion was \$27,966,485.

United States silver coins were imported during the year of the value of \$306,579, of which \$240,973 consisted of subsidiary coin, and \$65,606 of trade-dollars. United States subsidiary coin was exported during

the year of the value of \$71,464.

Ores, gold and silver bearing, distinctively manifested as such, and produced in the United States, were exported during the year of the value of \$107,878, and a small quantity of foreign silver ores re-exported of the value of \$683.

The excess of exports of silver bullion, silver coin, and silver ores from the United States over imports was \$7,632,278.

The movement of the silver is exhibited in the following table:

#### MOVEMENT OF SILVER, FISCAL YEAR 1888.

IMPORTS.	Ì
Foreign silver bullion	\$5, 619, 006
Foreign silver ores	5, 115, 563
Foreign silver coin	9, 478, 081
Total	20, 207, 653
United States silver coin (including trade dollars)	306, 579
Total	20, 514, 232
EXPORTS.	
Domestic silver bullion	20, 563, 956
Domestic silver ores	
Foreign silver bullion re-exported	31, 980
Foreign silver coin re-exported	7, 370, 549
Foreign silver ores re-exported	683
Total	28, 075, 046
United States silver coin	71, 464
Total exports	28, 146, 510
Net loss by export	

### PRODUCTION OF GOLD AND SILVER IN THE UNITED STATES.

The production of the precious metals from mines of the United States was exhibited and explained in detail in my special report on that subject covering the calendar year 1887, being the eighth of a series of reports prepared by this Bureau under annual appropriations for collecting statistics of production of the precious metals in the United States.

The estimated product of the mines of the United States for the calendar year 1887 was there stated to have been:

PRODUCTION OF THE PRECIOUS METALS IN THE UNITED STATES, CALENDAR YEAR 1887.

Metal.	Fine ounces.	Coining value.
	01, 596, 375 41, 268, 305	\$33, 000, 000 53, 357, 000

In the above estimate silver was reckoned at its coining rate in silver dollars.

The average price of silver for the calendar year 1887 was about \$0.98. The commercial value of the silver product of the United States was accordingly about \$40,450,000.

The estimate of the aggregate production of gold and silver was approximately distributed in round numbers among States and Territories as in the following table:

in the following twole:

Approximate distribution, in round numbers, by States and Territories, of the estimated total production of Precious Metals in the United States for 1887.

	. Go	old.	Sil		
State or Territory.	Fine ounces.	Value.	Fine ounces.	Value.	Total value.
Alaska	32, 656	\$675,000	232	\$300	\$675, 300
Arizona	40, 155	830, <b>0</b> 00	2, 939, 129	3, 800, 000	4, 630, 000
California	648, 283	13, 400, 000	1, 160, 183	1,500,000	14, 900, 000
Colorado	193, 517	4, 000, 000	11, 601, 825	15, 000, 000	19, 000, 000
Dakota	116, 110	2, 400, 000	417, 690	540, 000	2, 940, 000 [,]

Washington	7, 257	150, 000	77, 346	100, 000	250, 000
Texas			193, 364	250,000	250, 000
Alabama, Tennessee, Virginia,					
Vermont, and Wyoming	967	20, 000	387	500	20, 500
Total	1, 603, 049	33, 136, 000	41, 721, 592	53, 941, 800	87, 077, 800

The estimates of the Bureau of the product of gold and silver from the mines of the United States from 1880 to date are presented in the following table:

i	Years.	•	Gold.	Silver.	Total.
1880			\$36, 000, 000	\$39, 200, 000	\$75, 200, 000
1881			34, 700, 000	43, 000, 000	77, 700, 000
1882			32, 500, 000	46, 800, 000	79, 300, 000
1883			30,000,000	46, 200, 000	76, 200, 000
1884			30, 800, 000	48, 800, 000	79, 600, 000
1885			31,800,000	51, 600, 000	83, 400, 000
1886			35, 000, 000	51, 000, 000	86, 000, 000
1887		· · · · · · · · · · · · · · · · · · ·	33, 000, 000	53, 357, 000	86, 357, 000

In the Appendix (page 280) will be found a table showing the production of gold and silver in the United States from the year 1792.

H. Ex. 2—10

INDUSTRIAL EMPLOYMENT OF GOLD' AND SILVER IN THE UNITED STATES.

The results of the several censuses, four in number, taken by the Bureau of the Mint, covering the years 1880, 1881, 1883, and 1885, as to the amount of gold and silver, and the several classes of material, used by goldsmiths and others in manufactures and the arts, have been presented in the reports of this Bureau, both fiscal and calendar.

In my last fiscal report the result of the census covering the calendar year 1885 was revised from later information, and without presenting the results of such revision at length, the following brief table exhibits the latest work of the Bureau in this line, that is, so far as returns have been sought from consumers or direct employers of the precious metals in manufactures and the arts.

REVISED TABLE SHOWING THE CHARACTER AND VALUE OF THE PRECIOUS METALS REPORTED BY MANUFACTURERS, JEWELERS, AND OTHERS, AS USED BY THEM DURING THE CALENDAR YEAR 1885.

Character.	Gold.	Silver.	Total.
United States coin	\$2,827,378	\$133, 644	\$2, 961, 022
Stamped United States or refined bars	. 6, 234, 034	4, 436, 603	10, 670, 637
Foreign coin	. 178, 913	62, 708	241, 621
Old jewelry, plate, and other old material	. 847, 715	245, 413	1, 093, 128
Native grains, nuggets, etc	. 502, 893	103, 272	606, 165
Wire or rolled plate	. 561, 187	216, 773	777, 960
Total	11, 152, 120	5, 198, 413	16, 350, 533

Inquiries as to direct use of the precious metals by jewelers and others can be undertaken only at intervals of several years, as they involve great clerical labor and unduly tax the patience and courtesy of those from whom information is sought. The Bureau has nothing on the part of consumers to offer later than the above report of consumption for the calendar year 1885.

At the institutions under the control of this Bureau, however, effort is made to ascertain the uses for which gold and silver bars are intended, and the accounts are kept in such form as to show the composition of bars of gold and silver destined for industrial use, that is, the character of the material used in the manufacture of such bars, distinguishing United States and foreign coin and domestic and foreign bullion.

From private refineries in the United States engaged in the business of manufacturing bars for industrial use information on this point is readily communicated to the Bureau.

For the purpose, therefore, of ascertaining the value of bars supplied to goldsmiths and others for industrial use, the mints and the assay office at New York were instructed to forward statements of the value and character of the material used in the manufacture of bars of gold and silver so furnished during the calendar year 1887.

Inquiries were also addressed to forty-three firms believed to comprise all the private refineries in the United States engaged in this business. Replies have been received from forty one. Twenty-six firms communicated the value of bars manufactured during the calendar year, and the rest of the number reported none manufactured. The work in this line of each of the Government institutions, and of twenty-six private refineries, is exhibited in tabular form in my Report on the Production of the Precious Metals for the calendar year 1887.

The following table is a condensation of the work of both Government and private refineries in this line:

VALUATION AND CLASSIFICATION OF GOLD AND SILVER BARS PREPARED BY UNITED STATES MINTS AND ASSAY OFFICE AT NEW YORK, AND BY PRIVATE REFINERIES, DURING THE CALENDAR YEAR 1886, FOR USE IN THE ARTS.

Classification.	Assay Office, New York.	Mint, Philadel- phia.	Mint, San Fran- cisco.	Private refineries.	Total.

The following tables recapitulate the value of bars manufactured for industrial use for the two calendar years 1886 and 1887, the value of the refined bars bearing the stamp of a United States mint or assay office, reported by private refineries as having been sold to manufacturers and

dealers during the year, being deducted from the totals to avoid duplication:

RECAPITULATION OF THE VALUE OF THE GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ARTS DURING THE CALENDAR YEAR 1886, AND THE CLASSIFICATION OF THE MATERIAL USED.

Gold.	Silver.	Total.	
\$365, 261. 94	\$2, 358. 97	\$367, 620. 91	
7, 003, 480, 22	3, 626, 194. 86	10, 629, 675, 08	
638, 002, 55	825, 614. 75	1, 463, 617. 30	
1, 928, 046. 39	404, 155. 00	2, 332, 201. 39	
9, 934, 791. 10	4, 858, 323. 58	14, 793, 114, 68	
	\$365, 261. 94 7, 003, 480. 22 638, 002. 55 1, 928, 046. 39	\$365, 261. 94 \$2, 358. 97 7, 003, 480. 22 3, 626, 194. 86 638, 002. 55 825, 614. 75 1, 928, 046. 39 404, 155. 00	

RECAPITULATION OF THE VALUE OF THE GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ARTS DURING THE CALENDAR YEAR 1887, AND CLASSIFICATION OF THE MATERIAL USED.

Material.	Gold.	Silver.	Total.
United States coin	\$362, 261. 15	\$3, 667. 30	\$365, 928. 45
Domestic bullion	9, 090, 341. 55	4, 102, 733. 94	13, 193, 075. 49
Foreign coin and bullion	384, 121. 93	654, 991. 21	1, 039, 113. 14
Old material	1, 835, 881. 77	480, 605. 74	2, 316, 487. 51
Total	11, 672, 606. 40	5, 241, 998. 19	16, 914, 604. 59

It will be noticed that the amount of United States coin reported as used in the preparation of jewelers' bars is small as compared with the value of United States coin melted annually for industrial employment, the estimate of the latter being the amount reported by jewelers and others to have been used in their business during the calendar year 1885, viz, \$3,500,000 in United States gold coin and \$200,000 in United States silver coin.

The melting of coin for industrial use is principally on the part of jewelers for the manufacture of small articles and in repairs, and the amount so melted would not appear in an inquiry of the kind here presented.

It is proper to state, however, as was pointed out in my last fiscal report,* that there is a growing tendency to use bars for industrial pur-

poses rather than to melt coin.

The value of the gold bars furnished for industrial uses during the calendar year 1887 was \$11,672,606.40, and of silver bars \$5,241,998.19 (coining value), a total of \$16,914,604.59, against \$9,934,791.10 gold in 1886, and \$4,858,323.58 silver, a total of \$14,793,114.68.

Unless there has been a considerable diminution in the quantity of coin used, the employment of gold and silver in the industrial arts during the calendar year 1887 aggregated \$14,600,000 gold and \$5,280,000

silver (coining value).

The following tables exhibit the work in the same line of the United States assay office at New York and of the mint at Philadelphia, the only Government institutions which furnished bars for industrial purposes, covering the fiscal year 1888:

VALUE AND COMPOSITION OF BARS FURNISHED FOR USE IN THE ARTS, ISSUED: 9
BY THE UNITED STATES ASSAY OFFICE AT NEW YORK, DURING THE FISCAL
YEAR 1888.

	Bars manufactured.				
Material used.	Go	old.	Silver.		
	Fine ounces.	Value.	Fine ounces.	Value.	
United States coin			2, 091. 73	\$2, 324. 14	
Foreign coin	3, 545, 150	\$73, 284, 75	21, 723. 79	24, 137. 55	
Domestic bullion	86, 777. 191	1, 793, 843. 75	3, 533, 328. 74	3, 925, 920. 82	
Foreign bullion	12, 290. 369	254, 064. 48	613, 714. 81	681, 905. 35	
Old plate, jewelry, etc	66, 683. 034	1, 378, 460. 65	279, 912. 98	311, 014. 42	
Total for use in arts	169, 295, 744	3, 499, 653, 63	4, 450, 772. 05	4, 945, 302, 28

less charges and fractions paid in gold coin	180, 715. 646	3, 735, 723. 94			
Large gold bars taken by manufact- urers in exchange for gold coin	119, 715. 109	2, 474, 730. 94			
Total	300, 430, 755	6, 210, 454. 88		.,	
Grand total gold	469, 726. 499	9, 710, 108. 51			

VALUE AND COMPOSITION OF BARS FURNISHED FOR USE IN THE ARTS, ISSUED BY THE MINT AT PHILADELPHIA, DURING THE FISCAL YEAR 1888.

	Bars manufactured.			
Material used.	Gol	d.	Silver.	
	Fine ounces.	Value.	Fine ounces.	Value.
United States coin	1, 875. 490	\$38, 769. 83		
Old plate, jewelry, etc	2, 460. 556	50, 864. 20	16, 192, 87	\$17, 992. 08
Foreign bullion	4. 955	102. 42		
Philadelphia mint bar	10.389	214. 77		. <b></b> .
Exchange bars sold for coin	23, 552, 882	486, 881. 28		
Total	27, 904, 272	576, 832. 50	16, 192. 87	17, 992. 08

The value of bars furnished by these two institutions during the fiscal year 1888 was gold, \$10,286,941.01; silver, \$4,963,294.36; against \$9,719,585.40 gold and \$4,834,814.19 silver during the calendar year 1887.

This would indicate a continued increase in the industrial employment of the precious metals in the United States, being more than half a million dollars greater in the value of the gold furnished by these two institutions between the last fiscal year and the last calendar year, and about \$130,000 greater in silver.

#### STOCK OF COIN IN THE UNITED STATES.

In continuation of the estimates of the Bureau of the Mint as to the stock of coin in the United States, the following is presented showing the stock of coin at close of the fiscal year 1888:

ESTIMATE OF STOCK OF COIN JULY 1, 1888.

Items.	Gold.	Silver.	Total.
Estimated stock July 1, 1887	\$569, 008, 065	\$342, 537, 916	\$911, 545, 981
Coinage, fiscal year 1888	28, 364, 170	34, 136, 095	62, 500, 265
Net imports	1, 970, 114	169, 509	2, 139, 623
Total	599, 342, 349	376, 843, 520	976, 185, 869
Less deposits of United States coin	492, 512	528, 354	1, 020, 866
Used in the arts,	3, 500, 000	200, 000	3, 700, 000
Total	3, 992, 512	728, 354	4, 720, 860
Estimated stock July 1, 1888	595, 349, 837	376, 115, 166	971, 465, 003

In addition to the gold and silver coin estimated to have been ing the country on the 1st July, 1888, the value of the gold and silverbullion in the mints and assay offices awaiting coinage at that date wasas follows:

GOLD AND SILVER BULLION IN MINTS AND ASSAY OFFICES JULY 1, 1888.

	Metals.	Cost.
Gold		\$110, 469, 018

Adding this to the stock of coin, the total metallic stock in the United States at close of the fiscal year 1888 was as follows:

TOTAL METALLIC STOCK, JULY 1, 1888.

	Metals.	Value.
Gold		\$705, 818, 855
Silver		386, 611, 108
	·	

The total gold coin and gold bullion estimated by this Bureau tohave been in the United States at close of the fiscal year 1887 was \$654,520,335. Hence a gain during the fiscal year of \$51,298,520 gold.

The total stock of silver June 30, 1887, was estimated to have been \$352,993,566. Hence a gain in silver during the fiscal year of \$33,617,542; a total gain in gold and silver of \$84,916,062.

The ownership, as distinguished from the location of the gold and silver coins, estimated to have been in the country on July 1, 1888,

together with the bullion in the mints awaiting coinage, is exhibited in the following table:

Total	161, 495, 733	44, 288, 254

In the above table the gold and silver bullion belonging to the Government, awaiting coinage in the mints, has been added to the stock of coin. Heretofore, in the corresponding table in reports of this Bureau, coin only has been exhibited.

In the above table the amount of gold coin shown to be in banks other than national is placed at \$44,288,254, being the amount specifically reported to the Comptroller of the Currency by 3,527 banks other than national, but it will be noticed in the foot-note to the table that

\$106,005,258 of the assets reported by these 3,527 banks was reported "not classified." Of this, \$19,664,374 reported by California banks, was taken as gold, for the reason that only gold circulates on the Pa-

cific coast, except for small-change purposes.

It is probable that a very large portion of the \$86,340,884, reported by banks other than the banks of California as not classified assets, consisted of gold coin, but how much it is impossible to tell. It will be remembered also that the number of banks other than national, reporting to the Comptroller of the Currency, forms a small proportion of the number of such in the United States. As there is no law requiring official reports from banks other than national, it is practically impossible to ascertain the stock of coin held by such banks, though believed to be largely in excess of \$44,288,254 as presented in the table.

The following is an exhibit of the amount of metallic and paper money

in the United States and the location of same on July 1, 1888:

#### PROPOSED LEGISLATION.

#### NEW DESIGNS OF UNITED STATES COIN.

A bill to amend section 3510, Revised Statutes, and to provide for new designs of authorized devices of United States coins, was introduced by Mr. Morrill in the Senate March 15, 1888, and referred to the Committee on Finance. The same bill was also introduced in the House of Representatives by Mr. Bland, referred to the Committee on Coinage, Weights, and Measures, and ordered to be printed.

The bill thus introduced in both branches of Congress failed to be reported by either committee to which it was referred. It was as fol lows:

#### [Additions in italics; omissions in brackets.]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section thirty-five hundred and ten of the Revised Statutes of the United States be, and the same is hereby, amended so as to read as follows: SEC. 3510. The engraver shall prepare from the original dies already authorized all

the working-dies required for use in the coinage of the several mints, and, when new

coins, emblems, [or ] devices, legends or designs are authorized, shall, if required by the Director of the Mint, prepare the devices, models, [moulds, and matrices,] hubs or original dies for the same. The Director of the Mint shall have power, with the approval of the Secretary of the Treasury, to cause new designs or models of authorized emblems or devices to be prepared and adopted, in the same manner as when new coins or devices are authorized, but no change in the design, or die of any coin, shall be made oftener than once in twenty-five years from and including the year of the first adoption of the design, model, die, or hub for the same coin: Provided no change be made in the diameter of any coin: And provided further, that nothing in this section shall prevent the adoption of new designs or models for devices or emblems already authorized for the standard silver dollar and the five-cent nickel piece as soon as practicable after the passage of this act.

But the Director of the Mint shall nevertheless have power, with the approval of the Secretary of the Treasury, to engage temporarily for this purpose the services of one or more artists, distinguished in their respective departments of art, who shall be paid for such service from the contingent appropriation for the mint at Philadelphia.

The following is a transcript of the official correspondence upon the above bill:

COMMITTEE ON FINANCE, UNITED STATES SENATE,

March 19, 1888.

DEAR SIR: With this I send you a copy of the bill introduced by request of the Director of the Mint (S. 2382), and would like to have any facts or suggestions from you as to the necessity or propriety of the proposed bill.

Very truly yours,

JUSTIN S. MORRILL.

Hon. C. S. FAIRCHILD, Secretary of the Treasury.

## TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., March 20, 1888.

SIR: In response to your request for any facts or suggestions from me as to the necessity or propriety of the proposed bill (S. 2382) "to amend section 3510, Revised Statutes, and to provide for new designs of authorized devices of United States coins." I have the honor to state that the bill referred to was draughted by the Director of the Mint, with my concurrence, and that its provisions commend themselves to my judgment as perhaps the simplest that can be devised to accomplish the important purpose contemplated without radical change of existing laws.

The designs at present employed on our older coins date from periods of thirty to fifty years, and are commonly recognized as far behind the state which the arts of design and sculpture have since attained. Representations on the part of many intelligent persons have been made to me, as well as to my predecessors, by way of calling the attention of the Department to the defects in the artistic execution of our coinage and of urging the importance of its improvement.

Having referred your request to the Director of the Mint, I return herewith his report, embodying a few pages on the same subject from his report for the fiscal year 1887.

Respectfully yours,

C. S. FAIRCHILD, Secretary of the Treasury.

Hon. J. S. MORRILL, Chairman Committee on Finance, U. S. Senate.

### TREASURY DEPARTMENT, BURKAU OF THE MINT, Washington, D. C., March 20, 1888.

SIR: Returning herewith the note of inquiry from the Hon. Justin S. Morrill, chairman of the Committee on Finance, United States Senate, together with a copy of Senate bill 2382, introduced by Senator Morrill, to amend section 3510, Revised Statutes, and to provide for new designs of authorized devices of United States coins I inclose also a copy of a previous paper by me, stating in a succinct form the technical and practical points involved in the present inquiry.

In order to exhibit the character and extent of the proposed amendment, I append a copy of the bill, with omissions from the present statutes and additions thereto

indicated

I can respond to your present reference of this bill to no better purpose, perhaps, than to forward these papers in a separate form. The bill introduced by Senator Morrill was intended to be in line with the representations and suggestions made by me in my fiscal report for 1887.

Suffice it to add that although the motto "In God we trust" was added in 1766 to the legends of several coins, no material change in the designs of any of them has been made since the following dates, respectively:

Gold:	
Double-eagle	1849
Eagle	
Half-eagle	
Three dollars	
Quarter-eagle	
Dollar	
Silver:	•
Dollar	
Half-dollar	
Quarter-dollar	1838
Dime	1638
Minor:	
Five-cent nickel	1883
Three-cent nickel	
One-cent bronze	
Respectfully yours,	+ - + - +
	T

James P. Kimball, Director of the Mint.

Hon. CHARLES S. FAIRCHILD, Secretary of the Treasury.

#### DEVICES AND DESIGNS OF COINS.*

[Extract from the Report of the Director of the Mint for the fiscal year 1887.]

The prevailing laws in respect to the devices and designs of current coins of the United States are those of the Coinage Act of 1873, namely, sections 3510 and 3517 of the Revised Statutes, as follows:

SEC. 3510. The engraver shall prepare from the original dies already authorized all the working dies required for use in the coinage of the several mints, and, when new coins or devices are authorized, shall, if required by the Director of the Mint, prepare the devices, models, moulds, and matrices, or original dies, for the same; but the Director of the Mint shall nevertheless have power, with the approval of the Secretary of the Treasury, to engage temporarily for this purpose the services of one or more artists, distinguished in their respective departments of art, who shall be paid for such service from the contingent appropriation for the mint at Philadelphia.

SEC. 3517. Upon the coins there shall be the following devices and legends: Upon

SEC. 3517. Upon the coins there shall be the following devices and legends: Upon one side there shall be an impression emblematic of liberty, with an inscription of the word "Liberty" and the year of the coinage, and upon the reverse shall be the figure or representation of an eagle, with the inscriptions "United States of America" and "E Pluribus Unum," and a designation of the value of the coin; but on the gold dollar and three-dollar piece, the dime, five, three, and one cent-piece, the figure of the eagle shall be omitted. * * *

Section 3517 is substantially a re-enactment of the thirteenth section of the act of January 18, 1837, except as to coins subsequently introduced into the coinage.

The devices of coins of the United States, including the subsidiary coins, are prescribed by this section, 3517, and by the provision in section 3510, which practically limits both designs and devices to such as were employed at the time of the passage of the Coinage Act of 1873. The joint effect of the two sections is to render mandatory the preservation of present designs as well as present devices.

By the laws of February 21 and March 3, 1853, was prescribed the weight of subsidiary coin then authorized. It was also by the latter

† According to precedent, the phrase "Upon one side there shall be an impression emblematic of liberty" has been interpreted to provide either for a head of Liberty or for

a figure of Liberty.

^{*} In the following text a distinction will be drawn between the terms device and design as applied to coins, and the former employed, as in the Revised Statutes, in the sense of emblem; the latter, as in its ordinary application to works of art. In the coinage laws of the United States the term design does not appear, the term model having been adopted to the same purpose.

that the Director of the Mint was "empowered, with the approval of the Secretary of the Treasury, to engage temporarily," for the purpose of preparing devices, "the services of one or more artists, distinguished in their respective departments," to be paid from the contingent appropriation for the mint at Philadelphia. The language of section 3510, Revised Statutes, as in the Coinage Act of 1873, was, in respect to this provision, essentially the same as in the laws of 1853.*

The authority which is given by section 3510, Revised Statutes, to the Director of the Mint, with the approval of the Secretary of the Treasury, to fix designs of new coins in conformity with prescribed devices, is not believed by me, nor by such law officers of the Government as have been consulted, to admit of such a construction as also to provide

for changes in the designs of existing coins.

In a speech in the Senate by Senator Justin S. Morrill, then, as now, chairman of the Committee on Finance, December 5, 1883, on Senate bill 226, the artistic execution, as well as other characteristics of our coinage, was ably criticised, and the omission of the law pointed out to provide for its improvement, especially in the designs adopted for regular coinage dies.

"The Director of the Mint" [said Mr. Morrill], "the coiner and engraver, do not appear to have any discretion in regard to existing coins, which must be made from the original dies already authorized,' and 'conformable in all respects to the law,' and mainly the law of eighty years' standing. It is, even under the law of 1873, only when new coins or devices are authorized that the Director of the Mint has power to seek any improvement through the services of competent artists. This law was in the right direction, but wholly inoperative, as it has no application except 'when new coins or devices are authorized." No new coins being authorized, no changes can be made in the old matrices and dies; and the engraver, however expert and skillful, has no possible opportunity to show any rare skill or advancement in the perfection f his work."

Yet my official attention has been called by numerous intelligent citizens to the inartistic quality of the designs upon several of our current coins, in the hope that means may be found, if only in the precedents above cited, for the improvement of such coins of the series as may be decided to stand most in need of it.

Under the circumstances above set forth, it becomes clear that the

Director of the Mint is without official resources in this matter.

Having become aware of what I believe to be a popular desire for an improvement of the coinage in respect to the present designs (distinguished from devices) as prescribed by law, I deem it my duty to here invite attention to the matter, and to offer such suggestions as seem to be proper to the office now held by me.

It is sometimes considered that Congress has advisedly omitted to provide for an execution of the coinage in keeping with the art of the day, for the reason that any unnecessary change of design is contrary to the interests of the public. Whether this is so can hardly be said. It is open to question, however, how far artistic merit in coins should

be sacrificed to custom.

Whatever the intention of this section may have been held to be by Director Linderman, the same executive officer of the mint by whom, in co-operation with Comptroller of the Currency John Jay Knox, the Coinage Act was mainly collated and draughted, the terms of this section absolutely fail to provide for change of design in

existing coins.

^{*} If any authority of law was found for the change of device of the gold dollar in 1854 from that of 1849, for the complete change in design of the silver dollar in 1878 from the design of 1866, or for the 5-cent nickel piece in 1833 from the design of 1867, and of the latter from that of 1866, such authority must have been found in provisions of law subsequently codified into section 3510, as above cited. So too with regard to other minor changes.

It has also been urged that readiness of identification of coins is incompatible with changes in their designs. This can hardly be denied in the case of frequent changes; but again the question arises whether a coin for any reason unsatisfactory ought to be perpetuated.

The coins of a nation are for the sole use of the nation itself. A knowledge of the commercial status of coins shows that no nation has anything to expect in the way of consideration for its coins outside of

its own borders.

As shown in my report for 1885 on Production of the Precious Metals in the United States, the foreign coins which come to these shores are hastened to the melting pot at our several mints and assay offices, while no more consideration is accorded to our own coins at foreign mints.*

In the eight years ended June 30, 1884, no less than 1,358,822 English sovereigns were melted at the United States assay office at New York, or an average of £169,853 a year. In three years ending June 30, 1887, English sovereigns of the value of \$1,992,871.45 were melted at the same institution.

In the eleven years ended in 1885 the same institution melted foreign gold coins of a total value of \$122,464,824. (See Annual Report, Di-

rector of the Mint, 1886, p. 151.)

I have also shown that it is fresh coin, and not worn coin, which, when diverted from domestic circulation and turned into channels of foreign trade, is at foreign hands speedily consigned to the melting-pot.†

The coins of all commercial nations are in part produced from the melting of coins of other nations. It is as bullion only that the nations

of the world treat each other's coins.

The consideration sometimes given to the commercial or foreign standing of our coins outside of the United States is, under the familiar circumstances above indicated, one which, from a technical or practical point of view, does not apply at least to the form or execution of coins, and one which in my opinion ought not to weigh against a domestic in-

terest in the amelioration of the coinage itself.

No encouragement on the part of the Government of exportation of United States gold coins can reasonably be asked, especially as facilities for exportation of gold are provided by law in the issue of gold bars in exchange for gold coin. Nor should anything of domestic interest or importance be deferred to a foreign employment of United States silver coins, as in the case of certain subsidiary coins. For it is safe to assume that substantially all for which a limited temporary circulation is found in several other countries of the western continent eventually find their way back to the United States in a worn condition for redemption at a considerable loss to the Treasury for recoinage.

No silver coin of the United States has longer any claim to recognition as an international coin, like the dollar of Mexico and the Levant thaler of Austria, or such as the now historical trade-dollar was designed to be, and had well-nigh become—as now shown by the absorp-

tion by foreign countries of four fifths of its whole coinage.

It is the public at home alone, therefore, that is concerned in the means provided by the Government for the preservation of the types of its coins by fixing their devices. As long as these laws stand it is hardly possible that any changes of designs can so alter the type or facies of our coins as to raise against such changes the objection referred to.

It does not seem to me that wonted use of coins with unworthy or insignificant designs of certain emblems or devices is likely to weigh with the public of the United States against a change for the better in design, especially where any change of device is out of the question.

If objections as sometimes heard in this country against a change in the designs of any of the coins of a nation are real and valid, how much greater their force in the case of countries where neither devices nor designs are prescribed by law, and where either or both may be changed at the will of a personal Government. In all monarchies both kinds of changes may be made at the will of the sovereign. All know how frequent have been such changes in the coins of the several nations of the world in almost every period of history. To these very changes alone

coins owe their incomparable historical value.

The designs impressed upon the coins of any nation, ancient or modern, are accepted as an expression of the art of their time. But few citizens, who, with an artistic sense, have carefully scrutinized the current coins of this Republic, would consent to accept as a standard of excellence for their own day and generation almost any of the present compositions of statutory devices. The inferiority of our coinage to the same kind of work by almost every other advanced nation of the earth, as well as to the well-known work of numerous able designers in relief at home, seems to be perceived by all who have given attention to the subject, and to be keenly felt by many as unworthy of the development which the arts of sculpture and design have here attained.

The series of United States coins, past and present, taken as a whole, is not without meritorious designs, even within the narrow limits of traditional, and later statutory, devices. But whatever art value be attributed to any of the series seems to be in impressions from certain

long-superseded dies.

It sometimes happens that the present subject is discussed wholly from an artistic point of view, and that accordingly too much is exacted in the way of improvement. It does not, indeed, seem to be always understood that, unlike medals, coins are no longer struck in high relief, on which so much of the beauty of design in the coinage of ancient Greece is found to rest.

The last legislation by Congress in the matter of devices, designs, and legends of United States coins was a part of the Coinage Act of 1873, and, as already stated, by re-enactment of old laws—except as then provided for the 3-dollar piece, subsidiary and minor coins. This legislation did not go beyond the perpetuation or adoption of the whole series of designs as then found, and precisely as then employed. This was at least the most direct way out of a difficulty, such as would present itself to any legislative body, called upon to decide a question of art, æsthetics, or numismatology. And it seems not improbable that, as the most practicable alternative from any future difficulty of a similar kind, optimistic views would again prevail.

Whenever any measure for changes in the devices or designs of existing coins be adopted, it will be by act of Congress. And whenever such a measure comes to be practically entertained by Congress, one of the first questions for decision will be whether its action shall be executive as well as legislative—that is, whether it shall reserve to itself final action as to the changes themselves; or, as an alternative, whether it shall delegate the determination of their precise character to an executive branch of the Government. In the former case, a measure of this kind would, in the ordinary course of legislation, be first committed to the Committee on Finance of the Senate, or to the Committee on

Coinage, Weights, and Measures of the House of Representatives, or

to both, if introduced by joint resolution.

In the latter case, under ordinary procedure upon such questions, the action of Congress would take the form of an amendment of prevailing sections of law specific as to the scope and limitation of power delegated, and as to the way and means for its exercise. Power delegated by Congress to an executive branch of the Government to make any external changes in coins would naturally be committed to the same administrative officer of the Treasury Department, namely, the Director of the Mint, to whom is committed the "power, with the approval of the Secretary of the Treasury, to engage temporarily" "the services of one or more artists distinguished in their respective departments of art" for the preparation of designs, or for the artistic execution of devices when new coins or devices are authorized.*

If new devices, or, indeed, only new designs, be authorized by Congress by amendment of section 3517, Revised Statutes, the executive provisions of section 3510 prescribe ready to hand a course which, if intelligently and earnestly followed, is perhaps as well devised as practicable in a representative government to satisfy the public requirement of an artistic execution of our coinage in keeping with contemporaneous

art.

If new designs for present, or for new statutory, devices be invited, the question naturally arises, how far competition shall be general or

public.

That a public competition for designs in relief would be productive of satisfactory results does not appear likely, and is certainly contrary to the experience of this Bureau in the way of suggestions from the public in such matters. It is believed, in agreement with section 3510, Revised Statutes, that desirable results are rather to be sought from the special engagement of the services of artists "distinguished in their respective departments of art."

The question now arises, who shall decide between the claims of artists more or less distinguished? This onerous responsibility falling, in the terms of section 3510, upon the Director of the Mint, is virtually shared with the Secretary of the Treasury. Perhaps this is the only

division of responsibility practicable under an official limitation.

In the selection of designs, however, this responsibility might be further divided, not necessarily by law, so as to admit also of the services of judges distinguished for their discernment in matters of art and design; such judges, on the invitation of the Secretary of the Treasury, to act with the Director of the Mint in the acceptance or rejection of

designs submitted.

The above suggestions are made not without full recognition of the fact that the voice of every citizen of the United States is heard upon a matter of art or æsthetics such as a design employed on a familiar coin of the Republic; or of the fact that while distinguished artists stand ready to offer designs, no public officer could reasonably be called upon alone to pass upon the professional merit of artists or the art value of their productions.

A bill in part designed to effect the object of the above bill passed the Senate April 2, 1884, and was introduced in the House of Representatives May 31, 1884 (Forty-eighth Congress), and ordered to be printed. This bill, which has come to my knowledge since the bill draughted by me was introduced in the Fiftieth Congress, provided as

follows:

# Relating to the improvement of the coinage.

That the Director of the Mint is hereby authorized and directed to employ, temporarily, five persons distinguished in departments of art or in knowledge of coinage and medals, to be approved by the Secretary of the Treasury, who shall investigate and examine the whole subject of our existing system of coinage, with a view to its improvement and greater perfection of execution as to metals, relative value of the minor coins, and also as to devices, legends, and inscriptions; and the artists or persons so employed shall each be paid out of the contingent fund provided for the support of the mint the sum of two thousand dollars; and any person whose designs for any coin shall be accepted and adopted as hereinafter provided for shall be paid a sum not exceeding seven hundred and fifty dollars for each design so accepted and adopted, to be determined by the Director of the Mint.

adopted, to be determined by the Director of the Mint.

SEC. 2. That on or before the first day of December, eighteen hundred and eightyfour, the Secretary of the Treasnry, the Secretary of State, and the Director of the
Mint shall examine the work and designs, together with any explanations submitted
as mentioned in the preceding section, and shall transmit the same, accompanied by
a report, to Congress, with such recommendations as they shall judge most expedient.

The disposition of the above bill after passage by the Senate appears not to be indicated in the index of the Congressional Record. But the bill failed to become a law for want, it is presumed, of action in the House of Representatives.

# DELIVERIES OF COIN WITHIN THE CALENDAR YEAR OF DATE.

Inviting attention to what has been said in a previous part of this report (p. 6) upon the subject of the past failure at the mints of the United States of the deliveries of coin within the year of date, whence the registration of a portion of the coinage as that of a later year, I deem it important to recommend that the present requirements on the part of this Bureau in correction of such a practice be given the force of law, and that an additional clause to section 3536 be suggested to Congress, and that this section be amended as follows:

SEC. 3536. In adjusting the weight of the silver coins the following deviation shall not be exceeded in any single piece: In the dollar, the half and quarter dollar, and in the dime, one and one-half grains. And in weighing [a] large number of pieces together, when delivered by the coiner to the superintendent, and by the superintendent to the depositor, the deviations from the standard weight shall not exceed two-hundredths of an ounce in one thousand dollars, half dollars, or quarter dollars, and one-hundredth of an ounce in one thousand dimes, but all coin shall be delivered by the coiner to the superintendent on or before the last day of the calendar year in which struck, and be recorded as the coinage of that year.

#### OPERATIVE WASTAGE OF BULLION.

Certain allowances for bona fide wastage of bullion incurred in the operations of the melter and refiner and of the coiner are authorized by section 3542 Revised Statutes, as follows:

# [Additions in italics.]

SEC. 3542. When all the coins, clippings, and other bullion have been delivered ["Surrendered up"—Coinage Act, sec. 44] to the superintendent, it shall be his duty to examine the accounts and statements rendered by the coiner and the melter and refiner. The difference between the amount charged and credited to each officer shall be allowed as necessary wastage, if the superintendent shall be satisfied that there has been a bona fide waste of the precious metals, and if the amount shall not exceed, in the case of the melter and refiner, one thousandth of the whole amount of gold, and one and one-half thousandths of the whole amount of silver delivered to him since the last annual settlement, and in the case of the coiner, one-thousandth of the whole amount of gold that has been delivered to him by the superintendent. All copper used in the alloy of gold and silver bullion shall be separately charged to the melter and refiner, and accounted for by him.

Under this section operative officers claim an allowance for wastage on bullion once received or "charged," whether the whole or only a part has been operated upon. It can hardly be presumed that it could have been the intention of the law to allow the proportion of wastage to be reckoned upon any other amount of bullion than the net amount operated upon. A bona fide wastage can indeed be proportionally determined in no other way.

It is obvious that either legal allowance for operative wastage of the precious metals, whether determined in one or the other way, may be very materially different. There can be no fixed exaction of law upon this subject, nor can uniformity of terms be observed in mint statements of wastage, if the present statute be authoritatively held to suffer allowances for wastage to be proportionally reckoned upon so variable a function as the amount of bullion charged to an operative officer rather than upon the net amount operated upon.

The following by way of amendment of section 3542 should, in my

opinion, be submitted for the consideration of Congress:

#### [Substitutions in italics.]

SEC. 3542. When all the coins, clippings, and other bullion have been delivered to the superintendent, it shall be his duty to examine the accounts and statements rendered by the coiner and the melter and refiner. The difference between the amount operated upon by each officer and the amount returned less the amount, if any, returned not operated upon shall be allowed as necessary wastage, if the superintendent shall be satisfied that there has been a bona fide waste of the precious metals, and if the amount shall not exceed, in the case of the melter and refiner, one thousandth of the whole amount of gold, and one and one-half thousandths of the whole amount of silver operated upon by him since the last annual settlement, and in the case of the whole amount of gold operated upon by him. All copper used in the alloy of gold and silver bullion shall be separately charged to the melter and refiner, and accounted for by him.

#### REDEMPTION OF MUTILATED SILVER COIN.

On September 5 there was passed in the House of Representatives a bill (H. R. 7933) "providing for the exchange of defaced, clipped, punched, or otherwise mutilated silver coins of the United States, of smaller denominations than one dollar, for new or unworn subsidiary silver coins, at designated places and under certain circumstances," as follows:

That the holder of any of the silver coins of the United States, of smaller denominations than one dollar, which have become defaced, punched, clipped, or otherwise mutilated, may, on presentation of the same in sums of the nominal value of five dollars, or any multiple thereof, at the office of the Treasurer, or any Assistant Treasurer, of the United States, receive any amount of new or unworn subsidiary silver coins equal to the coinage value in subsidiary silver coin, of the said coins, by weight, so presented, and when so redeemed the same shall be recoined into current subsidiary coins at the discretion of the Secretary of the Treasury.

The above bill by way of substitute for the bill (H. R. 6631) introduced by Mr. Morrow February 6, 1888, was passed as recommended by the Committee on Coinage, Weights, and Measures, to which the original bill had been referred (Report 780). In the Senate September 6, 1888, it was referred to the Committee on Finance, but at the close of the first session of the Fiftieth Congress no report upon the bill had been made by this committee.

H. Ex. 2---11

The insertion of the following communication upon the subject-matter of the above bill will serve to indicate the reasons for further consideration:

TREASURY DEPARTMENT, BUREAU OF THE MINT,

Washington, D. C., February 18, 1888.
Sir: At the request of the chairman of the Committee on Coinage, Weights, and Measures, I have the honor to submit an opinion as to the provisions of House bill 6631, "for the exchange of worn, defaced, clipped, punched, or otherwise mutilated silver coins of the United States, of smaller denominations than one dollar, for new or unworn subsidiary silver coins, at designated places and under certain conditions."

The redemption of worn subsidiary coins at nominal value by the Treasury of the

United States is not excluded from the provisions of the act of June 9, 1879 (21 Stat. Moreover, Treasury regulations for the redemption of subsidiary silver coins

specifically provide for their redemption at nominal value.

Gold and silver coins of all kinds in a mutilated state, for whose redemption by the Treasury the law fails to provide, may be deposited for recoinage at mints and assay offices at bullion value; not, however, in the case of silver coins, without a loss to the depositor of the now large difference between coinage and bullion value, in addition to all other losses, such as correspond to abrasion and depletion. This difference corresponds to the seignorage which has accrued to the Government in the act of their first issue, and which, indeed, upon recoinage will accrue to it again. In the case of subsidiary coin there is a loss of 26.7 grains of standard silver more than in the case of a silver dollar.

Although the present bill applies alone to mutilated subsidiary coins, there seems no reason why the silver dollar should be exempted from any provisions made for the

redemption of mutilated silver coins of less denomination.

It seems that the present penalty imposed upon the holder of mutilated subsidiary

coin is considerably more severe that in the case of other coins.

Prima facie, indeed, it would seem to be just to provide by law for the redemption of such uncurrent coins as are now excluded from recourse to a valuation at mints and assay offices by weight at coinage value, and thus in respect to redemption to put them on an equality with all other coins whose bullion and coinage values are coincident.

Respectfully yours,

JAS. P. KIMBALL, Director of the Mint.

Hon. CHARLES S. FAIRCHILD, Secretary of the Treasury.

## PROPOSED DISCONTINUANCE OF THREE-CENT NICKEL COINAGE.

A bill (H. R. 4342) "to discontinue the coinage of three cent pieces" was introduced in the House of Representatives January 10, 1888, and referred to the Committee on Coinage, Weights, and Measures.

The bill provided—

That so much of section thirty-five hundred and fifteen of the Revised Statutes of the United States as authorizes the coinage of the three-cent piece be, and the same

is hereby, repealed.

SEC. 2. That as the said coin shall be paid to the United States the same shall be withdrawn from circulation and the metal thereof coined into five-cent pieces, in accordance with section thirty-five hundred and fifteen of the Revised Statutes of the United States. All laws in conflict with this act are hereby repealed.

January 26 the committee reported the bill and recommended its passage (Report No. 133). The bill passed the House of Representatives* February 9, and the same day in the Senate was referred to the Committee on Finance.

PROPOSED DISCONTINUANCE OF THREE DOLLAR GOLD COINAGE.

February 13, 1888, was introduced in the House of Representatives a bill (H. R. 7214) "to prohibit coinage of three dollar gold pieces," providing-

^{*} Congressional Record, Fiftieth Congress, p. 1138.

That so much of section thirty-five hundred and eleven of the Revised Statutes of the United States as authorizes the coinage of the three-dollar gold piece is hereby

SEC. 2. That the three dollar pieces in the Treasury of the United States, or which may hereafter be received by the Treasury, shall not be paid out or in any other manner issued, but shall be transmitted to the coinage mints and recoined into other denominations of gold coins.

SEC. 3. That all laws in conflict with this act are hereby repealed.

March 1 a report (No. 781) on the above bill was submitted from the Committee on Coinage, Weights, and Measures, as follows:

The Committee on Coinage, Weights, and Measures, to whom was referred House bill No. 7214, report the same back with a recommendation that it do pass. This bill 'is recommended by the Treasury Department.

This bill, after reference to the House Calendar, received no further action, its purpose being effected by bill No. 7409, introduced February 20, 1888, by Mr. Bland, which also provided for discontinuance of the coinage of the three dollar gold piece.

PROPOSED DISCONTINUANCE OF COINAGE OF THREE-DOLLAR AND ONE-DOLLAR GOLD PIECES, AND LIMITATION OF COINAGE OF THE DOUBLE EAGLE.

February 20 a bill (H. R. 7409) was introduced by Mr. Bland, "limiting the coinage of double eagles and discontinuing the coinage of certain United States coins" (one and three dollar gold-pieces).

This bill provides-

That after the passage of this act the following denominations of coin, namely, the three-dollar gold piece and the gold dollar shall not be struck or issued by the mints of the United States.

SEC. 2. That hereafter not exceeding twenty per centum of the gold bullion deposited in the mints, and paid for and belonging to the United States, under the provisions of section thirty-five hundred and forty-five of the Revised Statutes, shall be coined into double eagles.

March 13 the Committee on Coinage, Weights, and Measures reported* the bill, and recommended that it-

Should be amended by striking out the second section thereof; also that the title of said bill be amended so as to read as follows: "To discontinue the coinage of the three-dollar gold piece and the gold dollar."

That the bill so amended meets the approval of the Director of the Mint. Wherefore the committee report said bill, and recommend that it beso amended and that it pass.

. March 19 the House of Representatives, after changing the title to read, "To discontinue the coinage of the three-dollar gold piece and the gold dollar," passed the bill (H. R. 7409)† introduced February 20, amended so as to read:

That after the passage of this act the following denominations of coin, namely, the three-dollar gold piece and the gold dollar shall not be struck or issued by the mints of the United States.

The legislation as above in the House of Representatives has thus far failed to be advanced by the Seuate.

The following communication will serve to indicate my views upon the subject-matter of the proposed legislation:

> TREASURY DEPARTMENT, BUREAU OF THE MINT, Washington, D. C., March 5, 1888.

SIR: In compliance with the request of the chairman of the Committee on Coinage, Weights, and Measures, I have the houor to submit my views as to the propriety of the enactment of bill H. R. 7409, discontinuing the coinage of certain United States coins and limiting the coinage of double eagles.

^{*}Report No. 1020. t Congressional Record, Fiftieth Congress, pp. 2347, 2348.

#### THREE-DOLLAR GOLD PIECE.

Observing by the Congressional Record (p. 1695) that the bill (H. R. 7214) prohibiting the coinage of the three-dollar piece was reported back with a favorable recommendation from the Committee on Coinage, Weights, and Measures, and as this bill has been referred to the House Calendar and, with the accompanying report, ordered to be printed, I assume it to be unnecessary to refer further to the proposed legislation in the matter of the three-dollar gold piece. I may say, however, that the discontinuance of the issue of the three-dollar piece would, in my opinion, be very desirable. This is a denomination which subserves no useful purpose, its pres-The value ent coinage being in fact limited to its production for cabinet purposes. of over \$153,000 in three-dollar pieces still on hand at the mint at Philadelphia can not be disposed of, owing to the unpopularity of this coin as a circulating medium.

It is supposed that the three-dollar piece was designed to be a multiple of the threecent piece, for the convenience of postal transactions, when the three-cent unit for letter postage prevailed. As a consequence of the change in postal rates, and there existing no present reason for the continuance of a duodecimal coinage, the coinage of the three-dollar piece, as well as the three-cent piece, should, in my opinion, be

discontinued.

#### GOLD DOLLAR.

Referring to the proposal to discontinue coinage of the gold-dollar piece, I may say that such a measure commends itself to my judgment. Since 1862 (except for two years) the coinage, at a single mint, of this piece has been limited to such a number as would satisfy the demand for it as a "proof coin" and to such a supplementary coinage as was deemed sufficient to prevent an undue enhancement of value of the proof coin. The practice of the Department, therefore, for twenty-five years, except 1873 and 1874, has been in harmony with the measure now proposed, and for the Beason that little practical use has been found for this coin except for special purposes, such as sonvenirs and for manufacture into articles of personal adornment. No encouragement by this Department has been given to the demands of manufactwers, on account of the mutilation incidental to the use of coin for the purpose indicated.

A notable demand for this coin for shipment to China and Japan for manufacture into necklaces, bracelets, etc., has for many years existed, and still exists. Indeed, a premium is often put by dealers on this coin, so that in spite of the efforts of this Department the larger part of the supplementary coinage is believed still to be absorbed by manufacturers of articles of the kind indicated and for shipment.

A measure in the terms of the bill in question would relieve this Department from the necessity of further issuing proofs, which have a tendency to become enhanced in value from the absorption for illegitimate purposes of the supplementary coinage designed to prevent such enhancement.

#### DOUBLE-EAGLE COINAGE.

I now pass to the proposition contained in the same bill for the limitation of the coinage of double eagles to 20 per centum of gold bullion deposited in the mints and paid for and belonging to the United States under the provisions of section 3545 of the Revised Statutes.

Theoretically and technically considered all permanent deposits of gold at United States mints and assay offices are made for coinage. Under section 3544, Revised Statutes, it is provided that, "In the denominations of coin delivered, the superintendent shall comply with the wishes of the depositor, except when impracticable or inconvenient to do so." It seems to be the right of the depositor also to receive new or full-

The demand for gold coin of the denomination of the double eagle is principally at the mint at San Francisco by large depositors of gold bullion, their preferences for this denomination appearing to arise from the convenience of tale. Its use is understood to be principally in large coin transactions on the Pacific coast and for bank reserves.

The Treasury Department has undertaken to supply this demand within certain limitations, which have been met not without protest on the part of depositors, who have urged the claim to the exercise of a free option in the matter of denomination of coins

for which deposits are made.

The value of the coinage of double eagles at the mint at San Francisco has, up to the 1st of July, 1887, been 861 per cent. of the value of the total gold coinage executed

In favor of the issue of double eagles for their present principal distribution and mode of circulation there are to be stated certain important considerations. are altogether in favor of the Government, namely: (1) the cost of coinage of a given amount of gold, which is in inverse ratio to the size of the denomination; (2) the loss

by abrasion on a given amount of gold coin and a given degree of use, which is in inverse ratio to the diameter of the piece.

Thus it appears that there is an important economy to the Government as well as to the holder in a given circulation of the double eagle as compared with coins of

smaller denominations.

The importance to be attached to the first consideration has been stated in my Report on the Production of the Precious Metals in the United States during the callendar year 1885, page 86, et seq. In my last fiscal Report, page 157 (Finance Report, page 207), will be found results of certain inquiries instituted by me to indicate the practice of foreign governments in the matter of the exercise of an option by the de-

positor of gold bullion as to the denomination of coin received in return.

Having briefly stated the technical points which bear upon the provision of the bill in question, and called upon as I am to express my views as to the expediency of the ratio limit of the coinage of the double eagle, I have to state that it does not occur to me that any advantage over the present practice of the Treasury Department in the matter of proportioning the coinage of this piece according to the demand of the public would be secured great enough to offset the disadvantage which weight arise from restrictive statutes of the kind proposed. On the other hand, I am aware of no disadvantage which arises from the present practice of the Department, which enables it to keep the coinage of this piece within actual requirements of depositors from time to time.

It is sometimes urged that the double-eagle is a popular coin for exportation to oriental countries, and especially to China, on the persons of returning Chinese. While this is probably true, it should be considered that coin is so taken out of the country in preference to bars only in comparatively small amounts; but that for any given amount economy of manufacture is in favor of the exportation of the largest piece. It should also be considered that where gold coin is required for shipment or for use abroad, and where a coin of a given denomination is not available for such purpose, coins of other denominations will be used. For where the shipment of gold coin is required, no substitute is available. The double eagle comes near a stamped ingot of small unit. Its use for export in place of smaller denominations of gold

coin is clearly to the advantage of the Government.

In conclusion, it will be well to point out the importance of more explicit provisions of law in the way of restrictive legislation of the kind proposed. It does not appear from the terms of the bill whether (1) the limitation shall apply to bullion already the property of the United States, (2) whether to bullion hereafter acquired and paid for in cash from the bullion fund, or (3) whether any individual depositor shall be entitled to receive 20 per centum of his own deposit in double-eagles. And I may further point out that while 20 per centum of the gold coinage in double-eagles at the mint at Philadelphia might be beyond the requirements for circulation in the East, the same limit for the mint at San Francisco would undoubtedly be far below the requirement. Such inequalities in the metallic circulation of opposite parts of the country would undoubtedly lead to a heavy cost for transfer of double-eagles from the eastern to the western institutions.

Respectfully yours,

JAS. P. KIMBALL, Director of the Mint.

Hou. CHARLES S. FAIRCHILD, Scoretary of the Treasury.

#### PROPOSED AMENDMENTS OF LAWS.

Consideration is recommended of further proposed legislation as set forth in my preceding report.

The several matters may here be referred to as follows:

(1): Amendments to the Revised Statutes relative to issue and redemption of minor coins. [Fiscal Report, 1887, p. 107.]
(2) Amendment of law relating to statutory limit of subsidiary silver

coin outstanding in circulation. [Fiscal Report, 1887, p. 108.]

(3) Amendment of law relating to the sale of by products incidental to the parting and refining of bullion at mints and assay offices. cal Report, 1887, p. 114.]

(4) Amendment of law relating to the annual assay of coins.

cal Report, 1887, p. 116.]

BILL FOR THE RELIEF OF JAMES C. BOOTH, DECEASED, LATE MELTER AND REFINER, U. S. MINT AT PHILADELPHIA.

On April 26, 1886, a bill (H. R. 8256) for the relief of James C. Booth, melter and refiner of the mint at Philadelphia, was introduced in the House of Representatives, read twice, referred to the Committee on Claims, and ordered to be printed.

On the 21st of March this honored and venerable officer expired, after nearly thirty-nine years of remarkable usefulness in one of the

most responsible offices in the mint service.

The same bill, adapted to the circumstance of the decease of the beneficiary, was introduced in the Senate by Mr. Cameron (S. 2735) April 19, 1888, and referred to the Committee on Finance. This bill was as follows:

For the relief of the heirs and legal representatives of James C. Booth, deceased, late melter and refiner of the mint of the United States at Philadelphia.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury be, and he is hereby, anthorized and required to pay [to the heirs at law and legal representatives of] James C. Booth, deceased, [late] melter and refiner of the mint of the United States at Philadelphia, out of any money in the Treasury not otherwise appropriated, the sum of one thousand eight hundred and forty-one dollars and eighty-seven cents, in full for the cost value of one thousand nine hundred and eighty ounces and twelve-hundredths of an ounce of silver bullion, of standard fineness, deposited by him with the superintendent of the mint at Philadelphia to make good a deficiency of that amount of bullion in the accounts of the mint for the fiscal year eighteen hundred and eighty-five, the same being the number of ounces of standard silver bullion contained in three bars missing from said mint, supposed to have been stolen while in the charge of the melter and refiner, but for which safe storage could not be provided, for want of vault capacity in the mint.

On the 27th of April, 1886, the Director of the Mint addressed to the chairman of the Committee on Claims, House of Representatives, the following communication on the subject of the above bill:

> TREASURY DEPARTMENT, BUREAU OF THE MINT, Washington, D. C., April 27, 1886.

SIR: Referring to H. R. bill 8256, for the relief of James C. Booth, melter and refiner of the mint of the United States at Philadelphia, introduced in the House of Representatives yesterday by the Hon. Samuel J. Randall, and referred to the Committee on Claims, I have the honor to invite the attention of your honorable committee to the following statement. On page 14 of my annual report for 1885, with refer-

ence to the mint at Philadelphia, appears the following:

"The melter and refiner had received during the year 646,626.931 standard ounces of gold bullion, with a wastage of 7.885 ounces; and 28,936,069.91 standard ounces of silver bullion, with an apparent wastage of 3,541.93 ounces. It appears, however, that on January 3, 1885, silver bars numbered 7087, 7093, and 7113, containing 1,980.12 ounces of silver, not having been melted, were missed by the melter and refiner and the loss communicated by letter on the next working day to the superintendent. The wastage thus far actually allowed him was only 1,561.81 ounces."

This matter is again referred to on page 20 of the same report as follows:

"From this mint (Philadelphia) were missing silver bars containing 1,980.12 onnces of silver, valued at \$1,936.62, the supposed their of which, in the winter of 1884-35, is now under investigation. Though promptly reported to the general department by the operative officer to whose custody such bars are technically committed, neither the theft of these bars nor the specific deficit equivalent to their value was duly reported to this Bureau until so reported by the present superintendent. The specific deficit created by the loss of these bars is at present borne on the books in a 'suspense account,' there seeming no justification for charging it as wastage, as, from the circumstance that it was not duly reported, seems to have been proposed."

It was found necessary to hold the melter and refiner technically responsible, under section 3508, Revised Statutes, for the 1,980.12 ounces of silver as above. Upon the demand of the Bureau, the melter and refiner has promptly deposited with the super-

intendent of the mint at Philadelphia this quantity of silver.

The "suspense account," specially opened for the purpose in the books of the mint at Philadelphia and to which was provisionally charged this amount of silver, has been credited with the same amount, and therefore closed. The facts as briefly recited by me in my annual report will, so far as the melter and refiner is concerned, be seen to leave none but technical grounds for the responsibility of that officer in this case, no question arising as to the faithful discharge of his duties, or as to the exercise of due vigilance in the matter of the custody of silver bullion.

Referring in my report to the unsatisfactory conditions of the storage of bullion and coin in mints and assay offices, under the exigency of the accumulation of silver coin which the Treasury has not found it expedient to remove, I instanced the necessary exposure of bullion in the court of the mint at Philadelphia, where the thefts

were committed.

Although responsible for all bullion delivered at the mint and obliged to receipt for the same, the melter and refiner is without the power to provide extra means for the safety of what is beyond the capacity of his own vaults. The melter and refiner

is thus to be exonerated from moral responsibility.

In my report, as above quoted, it is stated that "the melter and refiner had received during the year * * * 28,936,069.91 standard ounces of silver bullion, with an during the year * * * 28,936,069.91 standard ounces of silver bullion, with an apparent wastage of 3,541.93 ounces," and that "the wastage thus far allowed him

was only 1,561.81 ounces."

Section 3542, Revised Statutes, precludes the loss corresponding to the quantity of silver stolen being charged to "wastage," as it clearly can not be classified as "bona fide waste." In view, however, of the facts here presented, and of the exceedingly small proportion of wastage as compared with the large amount of silver operated upon, I have the honor to recommend, as an act of simple justice to the melter and refiner, that the relief asked for in bill 8256 be recommended by resolution of your honorable committee for enactment by Congress.

Very respectfully,

JAS. P. KIMBALL, Director of the Mint.

Hon. WILLIAM M. SPRINGER, Chairman Committee on Claims, House of Representatives.

On the 3d of February, 1887, the following communication was addressed to the Secretary of the Treasury with reference to a letter of the chairman of the Committee on Claims, House of Representatives, on the same subject:

TREASURY DEPARTMENT, BUREAU OF THE MINT,

Washington, D. C., February 3, 1887. Sir: In reply to your reference of the inclosed letter of the chairman of the Committee on Claims, House of Representatives, I have the honor to state that the claim of Dr. James C. Booth, melter and refiner of the United States mint at Philadelphia, for \$1,841.87, is based on the payment by him of this amount, corresponding to the value of 1,980.12 standard ounces of silver stolen in the winter of 1884-85 while technically in his custody from the fact of his having receipted for the same. His responsibility, as a matter of fact, was thus only technical, owing to the circumstance that no provision was made by the superintendent for the safe custody of silver bullion for want of vault room.

It was therefore stored in the court of the mint and thus exposed to depredation, a circumstance over which the melter and refiner had no control. When called upon by me to make good the deficiency charged to him this was done without demur, and the account closed on the books of the mint.

All the circumstances in the case, with their technical bearing, were related by me in my report for the fiscal year 1885, pages 14 and 20, and again referred to in my report for the fiscal year 1886, pages 13 and 23. A statement in detail was submitted on April 27. 1886, to the honorable chairman of the Committee on Claims, House of Representatives. Both in my two reports and in my letter to the chairman I have urged the favorable consideration of Dr. Booth's claim, as an act of simple justice to this efficient and venerable officer, who has grown old in the position which he has held for nearly forty years.

Very respectfully,

JAS. P. KIMBALL, Director of the Mint.

The SECRETARY OF THE TREASURY.

So far as this Bureau is informed no action on the above bill was reached by the Committee on Claims in the Forty ninth Congress, nor by the Committee on Finance in the first session in the Fiftieth Congress,**

# TECHNICAL OPERATIONS OF MINTS.

In my last report (p. 139 et seq.) attention was briefly called to certain defects in the technical operations of mints of the United States, as exhibited by working results compared with those of foreign mints

and private manufacturing establishments.

A comparison of the mint practice of the United States with that of advanced countries in Europe is unequal in several important particulars. While European institutions are favored with permanent organizations, skilled superintendence as well as skilled operatives, the mints of the United States, in common with the whole mint service (with the single exception of the clerical force of this Bureau), are subject to quadrennial changes in the whole personnel, a remarkable fact obviously incompatible with the practical interests and business methods of a high class of manufacturing establishments, as the mints and the assay offices of the Government should always be considered.

Whatever degree of economy and skill be from time to time attained by these public institutions must be attributed to the degree of moderation on the part of superintendents in the exercise of practically plenary power of appointment conferred by section 3504 of the Revised

Statutes.

The continuance, through personal and political changes in the administration of the Government, of the term of skilled operative and fiduciary officers, not appointed by the President, and experienced operatives, while in some measure due to forbearance on the part of superintendents in exercising the power of dismissal involved in the specific power of appointment, must be more directly ascribed to necessities of the public service, and to good purposes personal to superintendents: not to any provision of law for the maintenance of economy and skill, not to say efficiency, in the practical operations of the mint. By checks and tests applied by law and by the Treasury Department to the produce of the several institutions, the efficiency of the service is secured, but with what degree of economy sustained is a question as to which I have felt bound to institute some detailed inquiries.

Another circumstance in favor of European institutions as compared with those of the United States is one to which attention has been

*In a memoir read before the American Philosophical Society October 5, 1885, by Mr. Patterson DuBois (In Memorian James Curtis Booth, Ph. D., LL. D.), the following appears as an extract from a private letter, written by Dr. Booth in October, 1887, and may here be cited by way of aiding an understanding of the grounds for relief:

"The whole truth is, that the constantly increasing business of the mint beyond its

[&]quot;The whole truth is, that the constantly increasing business of the mint beyond its capacity for bullion storage has been increasingly weighing down my anxious thoughts for its safety, and you may add to that the consciousness that I was personally responsible for every ounce of bullion received, and then you will readily perceive sufficient ground for a constant, anxious care, which I sometimes imagined to be as the square or cube of the extra quantity of bullion continually poured in. * * * It was that constant and constantly augmenting ounce for ounce responsibility that finally affected my mind, and I rather think broke me down, I went home quite sick from the mint early in April, and lay on my back for about three months. I suppose that such a statement will be quite sufficient to explain my present position. I am glad to say that I had sufficient strength to resign from my place in the mint, although no one is yet appointed to take my place. * * * From my age, over seventy-seven, I hardly expect restoration of full strength, and am satisfied with what Providence designs."

called by others.* Allusion is here made to the extension and complexity of the mint service from the multiplicity of institutions, which may be said to be double the number for which there exists any present

necessity.

Two mints are all that are required by the Republic, one on the Atlantic and the other on the Pacific seaboard. The mints at Philadelphia and San Francisco are, or easily could be, adapted to all requirements for coinage. The increase of this number of institutions entails an unnecessary expenditure for a given coinage, and a cost of production high in comparison with what it is in other countries and should be in this Republic, as well as a cost for transportation and distribution of coin quite out of proportion to benefits local to points where other mints have been established.

The particulars of mint practice noted in my last report were by way of exhibiting the disparity of results obtained at our several mints, as well as the superior economy of work at certain mints of the more advanced countries of Europe and their colonies. These particulars were indicated in the hope that operative officers in the several institutions might be induced to investigate the cause of unfavorable differences, with the purpose of overcoming whatever might be found not to arise from defects inherent to the organization of our mint service, or not

beyond remedy within their power to apply.

This hope has not met with disappointment. The mint at Philadelphia, which by law is intrusted with the greatest number of separate operations, and which on account of its location and equipment, rather than size, is called upon for a volume of coinage in excess of the contribution of other mints, has conducted through its operative officers judicious experiments, some of which promise valuable results if zealously prosecuted in the same spirit in which they were undertaken, and if eyentually incorporated into practice.

The experiments referred to relate as follows:

(1) To the preparation of the alloy in a condition of greatest ductility, and to a determination of the best form or ingot for the subsequent operations of rolling and cutting.

(2) To the rolling, and incidentally to the question of annealing, as a factor in the production of uniform fillets, even with rolls of precision.

(3) To the problem of readily adjusting heavy blanks. If satisfactorily solved, as seems likely, the present question, what to do with light blanks, will cease to be of practical importance, since the production of these in large numbers will be avoided when heavy blanks can

be expeditiously reduced to standard weight.

Alloy.—It is well known that only the very best grade of copper should be used in making either silver or gold standard alloy. The deleterious effect of copper oxide in an otherwise pure metal, on the alloys into which it enters, seems not to have received the attention which the phenomenon deserves, although, in his work on the Royal Mint, mentioned by Mr. Ansell in the case of gold alloys. Dr. Percy states that copper may dissolve as much as 13.5 per cent. copper oxide.

It is also well known that best commercial copper becomes brittle

from over-poling or if remelted under charcoal.

It had been the practice at the mint at Philadelphia to remelt all purchased copper ingots for the purpose of subdivision, as well as for the sake of convenience in making up melts. This remelting, unless skillfully accomplished, renders the copper brittle, and it is quite con-

^{*} See Engineering and Mining Journal, July 14, 1883.

ceivable that this property is imparted to alloys into which such deteriorated metal enters.

It having been suspected that frequent defects developed by ingots in rolling, and their irregular occurrence, might be due to notable quantities of copper oxide in the alloy, the practice of preparing copper for alloy by a preliminary remelting was abandoned, except for such small volumes as are necessary to adjust weights in making up melts. Ingots, tough and ductile and otherwise in the same condition as when purchased, are simply cut through one of the bridges and weighed into the melts.

The result has been in the highest degree satisfactory. The return to the melter of brittle ingots of standard silver and of fillets with crushed edges is believed to have ceased. In a test recently made, dol-dar ingots, one-half inch thick and 1½ inches wide, were reduced by successive draughts in the break-down rolls to a thickness of  $\frac{35}{1000}$  inches without annealing. The metal was still tough, and the process of rolling might evidently have been carried much farther.

But a much more interesting observation is, namely, that the form of the ingot has a marked effect on the edges of the fillet obtained from it.

The moulds habitually in use have been made with a liberal flare or "draft," for the sake of convenience in dropping the ingot, regardless of any evil from the degree of angles in their section. It appears, however, that when the face of the ingot is materially wider than the back, the unsupported marginal portion is, in rolling, continually crushed over until all tenacity is lost, whence a jagged or serrated edge if not a ruined fillet.

It has been found that by dressing out the mould so that its section varies but slightly from rectangular, the ingot will still drop out freely, and, without annealing, may then be rolled, from one half inch to the thickness of a finished dime or less, while still preserving a perfect ribbon-like edge. The marked difference effected by the device seems

quite disproportionate to its simplicity.

Annealing.—Blanks were cut from dollar fillets prepared without annealing or drawing, and their uniformity in weight compared with similar blanks cut from fillets rolled and drawn in the usual way with two annealings. The results were in favor of unannealed fillets. It is desirable that more extended experiments be made in the same direction. Facts, however, have been ascertained tending to show that many of the inequalities attributed to defective rolls are properly chargeable to uneven temper in the annealed fillets, and that only the most perfect annealing is better than no annealing.

It was also observed that want of uniform temper in the fillet affects in two ways the weight of the blanks. If a number of blanks be cut from a bard fillet, leaving spaces between the perforations, and the remaining part of the fillet be now annealed and blanks cut by the same punch, alternate blanks of hard and others of soft temper will be produced, all having as near an approach to uniform thickness as can be It will then be found that the hard blanks are materially heavier than the softer ones. A difference of 8 grains from this cause alone has been observed in dollar blanks. The reason is not far to seek. The edges of the soft blanks are somewhat drawn in cutting, and hence Convexity not found in the harder blanks is thus imparted are thinner. to the surface of soft blanks. The diameter of the former is also slightly Not only will hard places in fillets resist compression under the rolls, but, as it appears, a punch will cut from such harder parts a blank fuller than from soft fillets.

These facts show that imperfect or unequal annealing must tend to negative all the good results expected from tools of precision. And in present practice it will probably be difficult to find an annealed silver fillet as uniform in temper as the ingot from which it was made.

Probably no manufacturing industry treating great volumes of metal requires such precision in rolling as the manufacture of coin. Most, if not all, so called rolls of precision would probably fail to prove themselves such under the severe requirements of preparing fillets for coin. One thousandth of an inch in the thickness of a dollar blank represents the weight of nearly 5 grains. Variance of less than 5 grains

from standard weight causes condemnation of blanks.

In view therefore of the difficulty of obtaining rolls of enduring precision under unremitting and heavy work, and so long as the practice of annealing remains unsettled and imperfect, it is probable that in the near future, at least, we must continue to deal with blanks which will, in the case of the standard dollar, vary from 1 to 6 or 8 grains. The problem which, if solved, would the earliest give good results is, in a simple and easy manner, to bring such blanks within the adjusting limit. The preliminary work, in the present-line of inquiry, done at the mint at Philadelphia seems to promise practical results of value in this direction.

The plan of selecting fillets by weighing a sample blank cut from each fillet, and then sending the selected fillets to cutting punches varying slightly in size, fails to be a practical solution of the problem, for the reason that blanks of greatly varying weight may be cut by the same

punch from different parts of a single annealed fillet.

If varying blanks, as now received from the cutting presses, be assorted according to nearly similar weights, it will then be practicable to subject selected blanks to a recut in an appropriate press, and thus to adjust them all to a given weight. A recutting press, similar in general construction to the ordinary cutting press, is provided with a proper device for placing the rough blanks accurately under a punch slightly less in diameter than that by which they were originally cut. Thus from off the periphery of the blanks is taken a slight shaving, which differs in amount with the diameter of the recutter to which it is sent.

A hand press of this kind has been tested at the mint at Philadelphia. A series of dollar blanks were weighed, and the weight taken from each was accurately noted. The average cut was 5.04 grains per blank, while the highest was 5.4 grains and the lowest 4.5 grains. This is one of many experiments going to show that by a recut uniformity of weight may be obtained with nearly the same accuracy as in the selection and distribution of the rough blanks. This selection, of course, may be made either by hand or by mechanical separators. It is thought that three sizes of cutter, varying by one to two thousandths of an inch in diameter and used on three selected weights of "heavies," would bring all within easy adjusting limit. The pieces would be placed in a tube and fed to the cutter by a mechanical feed, like that of a coinage press—80 to 100 per minute.

It might be considered bad practice to take as much as 5 to 7 grains from the periphery of a blank. But it has not been found that the reduced blank fails to fill out the collar in the coining press. Indeed, the recut leaves a superior edge, greatly to the perfection of the reeding on the coins. The result of a test on 100 coins reduced from 419 grains by

recut was entirely satisfactory.

If this device be found equal to an expeditious and economical reduction of heavy blanks, it will evidently be desirable to avoid the cutting of light ones by running fillets slightly heavier than in present practice. Results of another series of experiments also in line with the suggestions made in my last fiscal report, have been contributed by operative officers of the mint at Philadelphia. Too voluminous for reproduction here, and, so far as they are positive rather than negative, tending to confirm methods of present practice, they tend to indicate that the draw-bench comes nearer a tool of precision in the production of fillets than any rolls employed for the purpose of the experiment. But no general conclusion can be reached on this point without further experiments, and with rolls superior to those thus far employed.

Experiments have also been made to ascertain the relative production of coin after rapid cooling of ingots on the one hand and slow cool-

ing on the other. These are exhibited as follows:

COIN PRODUCED AND FILLETS BLISTERED IN ANNEALING [JANUARY, 1888,] FROM SILVER DOLLAR INGOTS, RAPIDLY AND SLOWLY COOLED AFTER CASTING.

No.		Ingots in each heat.	Ingots annealed in each heat.	Blistered fillets and broken ingots re- jected.	Production in coin.
1	Ingots after casting cooled in the usual or rapid way by immediately dipping red-hot into water, afterward, while still warm, immersed in diluted sulphuric acid for cleansing pur-				
	poses, and again dipped into water to re-		ļ		•
	move the acid. The fillets from annealing				
2	cooled quickly in water	70	50	.007	. 448
	the same manner as above	70	50	.007	. 466
3	Ingots cooled in the same manner as in the two former cases. One half of the number of fillets of this lot, after annealing, were al- lowed to lose their bright-red color by ex- posure to the air before final cooling in		,		
	water	70	50	:006	. 453
4	Ingots cooled in the same way as Nos. 1 and 3 and fillets after annealing cooled gradually				
5	in the air like part of No. 3  These ingots were permitted to cool slowly in the air until the red color had disappeared	70	50	. 013	. 485
	and then plunged into a bath of weak sul- phuric acid, after which they were given a water bath to rinse off the acid. The fil- lets, after annealing, were cooled in the open	•			
	air, from a bright cherry red color, for a period of about ten minutes, and were then				
6	dipped into water	70	50	, .012	. 507
0	the same way as the proceding lot	70	50	. 013	.442
.7	dodo	70	50	. 015	. 466
8	do	70	45	.008	. 497
9	do	70	50	.011	. 511

Average production, ingots cooled rapidly: blistered fillets, .008 per cent.; coin product, 463 per cent.

Average production, ingots cooled slowly: blistered fillets, .012 per cent.; coin product, .485 per cent.

The following exhibit of working results is sufficiently explicit without verbal explanations. Remarkable disparities in economy of results seem to be in favor of those institutions whose operations are the least miscellaneous, especially in point of variety of coinage, and the least extensive in number of coins executed and distributed:

# WORLD'S ANNUAL PRODUCTION OF GOLD AND SILVER.

In the Appendix will be found a table compiled principally from official communications furnished by foreign governments through the Department of State at the instance of this Bureau, and revised from latest information, showing the production of gold and silver by the principal producing countries for the calendar years 1884, 1885, 1886, and 1887.

The product is expressed in terms of kilograms and values. The value of silver, wherever the calculation has been made by this Bureau, will be understood to be at the coining rate in United States silver dollars of \$41.56 to the kilogram.

A résumé of the total product each year is here presented:

WORLD'S PRODUCTION OF GOLD AND SILVER FOR 1887, WITH REVISED ESTIMATE FOR THREE PRECEDING YEARS.

Calendar years.	Go	ld.	s	ilver.
Carontal Jeans.	Kilograms.	Value.	Kilograms.	Value.
1884	. 153, 017	\$101, 694, 000	. 2, 665, 386	\$110, 773, 000
1885	156, 103	103, 744, 000	2, 954, 766	122, 799, 800
1886	149, 355	99, 250, 877	3, 027, 632	125, 828, 400
1887	149, 048	99, 056, 850	3, 259, 144	135, 449, 410

For reasons stated in my Report on Production of the Precious Metals for the calendar year 1887* the estimate employed by this Bureau for production of silver in Bolivia has been reduced from sixteen to ten millions of dollars.

The silver product credited to Germany in 1887 is some \$5,000,000 in

excess of prior years.

It is probable that there is a duplication of at least this amount in an estimate of the silver product of the world by crediting to Germany silver extracted from foreign ores previously credited to exporting countries. But as this Bureau has no satisfactory information as to the amount or value of silver obtained from foreign ores, the only deduction made from Germany's product has been 88,000 kilograms, the amount stated by Dr. Soetbeer for 1884. As the product of the silver mines of Germany has not materially increased, it is obvious that more than 88,000 kilograms was reduced from foreign ores.

It will be noticed that the production of gold has remained nearly constant, although increasing slightly in 1885 from that of 1884, and decreasing slightly in each of the years 1886 and 1887.

The production of silver, on the other hand, shows a steady increase of \$12,000,000 from 1884 to 1885; \$3,000,000 from 1885 to 1886, and nearly \$10,000,000 from 1886 to 1887, an increase in four years of \$25,000,000.

# WORLD'S COINAGE.

In the Appendix (on page 282) will be found a table showing the value in United States money of the coinage of gold and silver during the calendar years 1884, 1885, 1886, and 1887 by each of the nations of the world.

It will be noticed that the coinage reported for Mexico and for Brazil

is for fiscal years.

It is believed that this table includes substantially the entire coinage of the world for the years mentioned.

The following summary is presented:

#### WORLD'S COINAGE.

	Calendar years.	Gold.	Silver.
1884		 \$99, 432, 795	\$95, 832, 084
1885		 95, 757, 582	126, 764, 574
1886		 94, 642, 070	124, 854, 101
1887	,	 124, 992, 465	160, 984, 877

The large increase in coinage of silver, as well as gold, in the calen-

dar year 1887 is noteworthy.

In regard to coinage of silver it may be stated that in addition to coinage of full legal-tender silver by this Republic and by Mexico, India, and Japan, a large recoinage of old "pillar" dollars, coined prior to 1868, into full legal tender silver 5-peseta pieces was executed by A large silver coinage was also executed at the mints of Austria-Hungary, consisting partly of "Maria Theresa" silver thalers for circulation in the Levant, and of silver florins for domestic use. The greater proportion of the other silver coinages consisted of limited legaltender silver.

As the coinages reported above included recoinages to a considerable amount, the following table, compiled from official sources, has been prepared, showing, as fully as the information at hand will permit, recoinages by certain nations: that is, mint deposits of domestic and foreign coins for recoinage, during the calendar year 1887:

RECOINAGES REPORTED BY CERTAIN NATIONS, 1887.

# MONETARY STATISTICS OF FOREIGN COUNTRIES.

In continuation of annual statistics of coinage, production, and movement of the precious metals in foreign countries, a list of interrogatories proposed by this Bureau covering the calendar year 1887 was transmitted by the Secretary of State to the diplomatic and consular representatives of this Government in foreign countries.

At the date of publication of the last fiscal report of this Bureau, replies to the circulars of two preceding years, 1885 and 1886, had not been received from all of the foreign countries addressed. As, in some cases, communications from foreign Governments, published in the Appendix, contain answers to questions referred to by numbers only, the three sets of interrogatories for the calendar years 1885, 1886, and 1887 are here appended.

INTERROGATORIES ADDRESSED TO THE REPRESENTATIVES OF THE UNITED STATES IN FOREIGN COUNTRIES, CALENDAR YEAR 1885.

(1) What is the legal unit of account?

(2) What is the legal standard: Double, single gold, or single silver? If double, at what ratio between the two metals?

(3) What is the weight in grams of each of the gold coins authorized by law to be coined, and what is the fineness expressed in thousandths?

(4) Same for silver.

(5) Is the mint open to deposits by individuals of gold and silver for coinage, or of one metal to the exclusion of the other?

(6) In case of deposits by individuals of gold and silver, what coinage charge, if

any, is imposed on each metal?

(7) For what amount are gold coins a legal tender in the payment of debts or Government dues?

(8) Same for silver.

(9) What is the "tolerance" or "mint remedy" allowed by law in coinage on each piece, both as to weight and fineness—that is, what deviation is allowed from the legal standard?

(10) What are the legal provisions as to the recoinage of worn gold and silver coins ?:

(11) What was the amount of gold coined during the calendar year 1885, by denominations and value?

(12) Same for silver.

(13) What has been the total coinage of gold from the establishment of the mint? Amount recoined?

(14) What has been the total coinage of full legal-tender silver from the establish-

ment of the mint? Amount recoined?

(15) What has been the total coinage of subsidiary or limited-tender silver from

the organization of the mint? Amount recoined?

(16) What was the weight, expressed in kilograms, and the value of the gold produced from the mines during the calendar year 1885?

(17) Same for silver.

(18) The import and export of gold and silver coin and bullion, separately, during the calendar year 1885?

(19) Estimated amount of gold coin in the country? What proportion in active

circulation?

(20) Same for full legal-tender silver.

(21) Same for limited-tender silver. (22) Amount of paper currency outstanding December 31, 1885; Government and bank notes separately?

(23) Copy of the coinage laws and regulations of the mint as to coinage.

## INTERROGATORIES ADDRESSED TO THE REPRESENTATIVES OF THE UNITED STATES IN FORÈIGN COUNTRIES, CALENDAR YEAR 1886.

(1) What was the amount of gold coined during the calendar year 1886, by denominations and value? What amount was recoined during the year?

(2) Same for silver.

(3) What was the import and export of gold coin and of gold bullion during thecalendar year 1886?

(4) Same for silver.(5) What was the weight, expressed in kilograms, and the value of the gold produced from the mines during the calendar year 1886?

(6) Same for silver.

(7) Were any laws passed during the year 1886 affecting the coinage, issue, or legaltender character of the metallic and paper circulation? If so, please transmit copies.

(8) Is the denomination of gold coin paid for deposits of bullion optional with the private depositor at the mints or other receiving institutions?

(9) Is there, in the case of gold coins, any restriction upon the issue of different denominations; and, if so, in what branch of the Government is discretion in this

(10) In case of the existence of bureaus of guaranty or departments of the Government for the verification and stamping of articles of gold and silver, and a collection of a tax for the same, report the amount of tax collected and the corresponding weight in kilograms and the value of manufactured goods—gold and silver separately

Note. - Any information in line with the researches of the Bureau of the Mint of the United States in the industrial consumption of the precious metals will be very

acceptable.

Coin and bullion should be given separately where practicable.

INTERROGATORIES ADDRESSED TO THE REPRESENTATIVES OF THE UNITED STATES IN FOREIGN COUNTRIES BY THE BUREAU OF THE MINT, THROUGH THE DEPART-MENT OF STATE, CALENDAR YEAR 1887.

(1) What was the amount of gold coined during the calendar year 1887, by denominations and values? What amount was recoined during the year, national and foreign coins separately?
(2) Same for silver.

H. Ex. 2-12

(3) In case of an organized mint service, give name and official title of chief officer, and location of mints.

(4) What was the import and export of gold coin and of gold bullion during the calendar year 1887? Coin and bullion should be given separately where practicable.

(5) Same for silver.

(6) What was the weight, expressed in kilograms, and the value of the gold produced from the mines during the calendar year 1887?

(7) Same for silver.
(8) Were any laws passed during the year 1887 affecting the coinage, issue, or legal tender character of the metallic and paper circulation? If so, please transmit copies

Supplemental to the information received in answer to the circulars of the Bureau of the Mint, much valuable statistical matter in the way of official publications, extracts from some of which will be found in the

Appendix, has been received at this Bureau.

Among the most important official publications may be mentioned the following: Eighteenth Annual Report of the Deputy Master of the Royal Mint, London, 1887; Direction Générale des Monnaies et Médailles, Compte rendu pour l'Exercice, Paris, 1885 and 1886; Proposta e Relatorio, Rio de Janeiro, 1887; Miscellaneous Statistics Relating to the Finances of British India, Calcutta, 1888; Financial Statement for 1888-'89, Calcutta; The Gold Fields of Victoria, Report of the Mining Registrars, September 30, 1887; also, December 31, 1887; Mining and Mineral Statistics of the United Kingdom of Great Britain and Ireland, 1887; Algemeen Verslag van het Munt College, Netherlands, 1887; Second Report of the Royal Commission Appointed to Inquire into the Recent Changes in the Relative Values of the Precious Metals, London, 1888; Noticia de la Exportacion de Mercancias en el Año Fiscal de 1886 á 1887, formado bajo la dirección de Javier Stávoli, Jefe de la seccion séptima, Mexico, 1888; Noticias de las Acuñaciones é Introducciones de Metales Preciosos en el Año Fiscal de 1886 a 1887 (by the same), Mexico, 1887.

The replies received to the interrogatories of the Bureau of the Mint

will be found in the Appendix.

A brief statement of the more important contents of these papers and publications, so far as they relate to the production, use, and movement of the precious metals, is here inserted.

# GREAT BRITAIN AND BRITISH COLONIES. Great Britain and Ireland.

Items reported for 1887.	Pounds ster-	Value in United States money.
Gold coinage	1, 908, 686	\$9, 288, 620
Light gold coin withdrawn from circulation	2, 301, 206	11, 198, 819
Silver coinage	861, 498	4, 192, 480
Worn silver coin withdrawn from circulation	353, 831	1, 721, 918
Imports of gold coin and bullion	10, 000, 000	48, 665, 000
Exports of gold coin and bullion	8, 700, 000	42, 338, 550
Gain in gold by imports	1, 300, 000	6, 326, 450
Imports of silver coin and bullion	7, 680, 000	37, 374, 720
Exports of silver coin and bullion	7, 620, 000	37, 082, 730
Gain in silver by imports	60, 000	291, 990

Two proclamations of the Queen establishing new designs for coins will be found in the Appendix.*

Gold coins of the denominations of £5 and £2 were coined during the year, the former to the value of £265,996 (\$1,294,469), and the latter to the value of £170,567 (\$830,064). This is the first time during the present reign that there has been any demand for £5 or £2 pieces, and it is thought that all previously issued have been hoarded as specimens.

The silver coinage included a new coin of the denomination of the double florin. This is the only coin of new design that has been added to the coinage during the present reign. The number of these pieces struck during the year was 482,130, of the value of £96,426 (\$469,257). The silver coinage of Great Britain during the year was the largest since 1877, except that of 1883, which was owing to the suspension of all coinage during the greater part of the year 1882.

The following coinages of silver for the British Colonies were exe-

cuted at the Royal Mint at London in 1887:

A silver coinage for Hong Kong of the nominal value of \$400,000, in 20, 10, and 5 cent pieces.

A silver coinage for the Straits Settlements of the nominal value of

\$177,000, in 50, 20, 10, and 5 cent pieces.

A silver coinage for Canada of the nominal value of \$85,000, in 25,

10, and 5 cent pieces.

In addition to the above the following silver coinages for the respective colonies have been executed at the Royal Mint at London since the beginning of the calendar year 1888:

A silver coinage for Hong-Kong of the nominal value of \$350,000, in

20, 10, and 5 cent pieces.

A silver coinage for Canada of the value of \$180,000, in 50, 25, 10, and 5 cent pieces.

A silver coinage for the Straits Settlements of the nominal value of

\$79,000 in 50, 20, 10, and 5 cent pieces.

In addition to these coinages application was received at the Royal Mint during the month of March for a further silver coinage for Hong-

Kong of the nominal value of \$200,000.

Messrs. Ralph Heaton & Sons, of Birmingham, executed during the year 1887 a silver coinage for the Republic of Nicaragua, consisting of 20, 10, and 5 cent pieces, of the nominal value of \$400,000. The same firm has been engaged in supplying machinery to the Chinese government, a portion of which was shipped to China during the year, for a mint at Canton.

Orders in council were issued during the year regulating the currency in the colonies of Labuan and British Honduras. In the case of Labuan the Mexican dollar was declared to be the standard of value, and the United States trade dollar, the Japanese yen, and the Hong-Kong dollar and half dollar were made unlimited legal tender. In the case of British Honduras, the Guatemalan silver dollar was proclaimed the standard of value, concurrent circulation being given to the Peruvian sol and other dollars.

The Second Report of the Royal Commission Appointed to Inquire into the Recent Changes in the Relative Values of the Precious Metals, consists of a continuation of the minutes of evidence taken before the commission between the dates of June 10, 1887, and December 9, 1887, with appendices of tabular matter by way of exhibits by witnesses, and replies to a circular letter addressed by the commission to Mr. Pierson (Holland); Professor Nasse (Germany); Professor Lexis (Germany); M. de Laveleye (Belgium); and Hon. David A. Wells (United States), propounding a series of questions in regard to the fall in the value of silver and the wholesale prices of commodities; to the extent these falls

have resulted in material prejudice to commerce, and to the practicability of an international agreement for the free coinage of gold and silver, and to the probable effect of such an agreement on the prices and production of the precious metals.

In advance of the receipt of the Final Report of the commission, the following brief notice of its contents is made up from a synopsis in The

London Economist, of November 10, 1888.

The report is divided into three parts. Part I, which is subscribed by all the commissioners, sets out the facts to which their attention has been called, summarizes the arguments on either side, and states the conclusions as to which all are agreed. Part II presents the views of Lord Herschell, the Hon. C. W. Fremantle, Sir John Lubbock, and Messrs. T. H. Farrer, J. W. Birch, and Leonard H. Courtney, in opposition to bimetallism. Part III, which is signed by Sir Louis Mallet and Messrs. A. J. Balfour, H. Chaplin, D. Barbour, W. H. Houldsworth, and S. Montagu, advocates a double standard. This part is supplemented by two statements in which Sir Louis Mallet and Mr. D. Barbour respectively set forth at length their individual views and opinions.

The following as given by The Economist is a summary of Parts II

and III.

#### Part II.

We have yet to consider whether the adoption of the bimetallic system, even if it did effect a cure of all or some of the evils at present experienced, would be itself productive of mischief as great or greater.

We have already pointed out that, so far as the finances of India have suffered from the fall in the gold price of silver, the burden due to this cause would then be-

come permanent.

It is also obvious that if, and in so far as, the gold price of commodities has fallen owing directly to the fall in the gold price of silver, that fall would, other things remaining the same, be permanent also, and the chance of some rise in these gold prices, due to a rise in the gold price of silver, would be lost.

But if, on other grounds, the adoption of bimetallism were deemed expedient, we should not regard this as a fatal objection, or as counterbalancing the advantages to

be obtained from it.

There are other reasons against its adoption deserving of far more serious consideration.

It is alleged that the position of England as the financial center of the world depends greatly upon the fact that she has, and has for a long time enjoyed, a gold standard.

This is no doubt strenuously controverted, and it is asserted by other authorities that the financial position of England is in no way bound up with the circumstance

that she is monometallic, and that her standard is a gold one.

We need hardly dwell upon the fact that the financial position which this country occupies is a matter of immense importance; that the risk even of interfering with it, or of taking any course which could reasonably be expected to affect it, is not to be lightly encountered; and even those who do not entertain grave apprehensions of a disturbance of existing financial conditions, if we were to depart from monometallism and accept the bimetallic standard, can not dispute the fact that the existence of such apprehensions is not to be treated as a trivial circumstance, or one to be lightly regarded.

The danger may be enhanced by the circumstance that the mere fact of one change

having been made would lead to the apprehension that others might follow.

It has not been suggested by the advocates of bimetallism that we ought, if that system were adopted, to prohibit contracts requiring performance by the payment specifically of one or other of the precious metals; and in the present state of financial opinion and practice it seems by no means certain that such contracts, if permitted, would not be common.

The result of this might be not only to cause some strain upon the bimetallic ratio, but to send gold to a premium, and to produce considerable financial disturbance.

A further danger to be apprehended is that the nations who were parties to the bi-

metallic arrangement might not continue to adhere to it.

It may be difficult to suggest any motives which should make it their interest to secede; and it may be capable of proof that any country violating the international compact would subject itself and its people to loss and serious inconvenience; but,

unhappily, enlightened self-interest is not the only motive of the political action of nations, nor is self-interest always enlightened. A desire to inflict injury may often exercise as potent an influence as self-interest, and the idea that the financial position of one country might be endangered with a resulting advantage to other countries might well afford a sufficient motive for action.

Any such departure from an international compact might indeed set this country free again to act as she chose, but if the result were to compel her to revert to the system she had abandoned, she would undoubtedly find herself in a position worse and fraught with greater evils than if she had maintained her existing standard.

At present the action of this country is unfettered, and not dependent upon the course taken by any other power. This condition of freedom would cease as soon as

she became a party to an international agreement.

Dangers arising from this cause would be aggravated if it were found necessary, as we think it would be, to embody in an international agreement detailed stipulations with regard to the coinage, currency, or internal financial arrangements of the sev-

eral countries joining in it.

Another serious consideration is that the governments as well as the banks and financial institutions of particular countries might, notwithstanding the existence of a bimetallic system, seek to accumulate gold. It may truly be described as at present the more esteemed metal of the two. There has certainly been a tendency of late years to substitute it for silver as the standard, and to use it to an increased extent for currency purposes throughout the commercial world. With the single exception of the Bland Act in the United States, all recent changes in currency legislation have been in the direction of using gold rather than silver for currency purposes. This fact shows, at any rate, a sentiment in favor of gold which may not be without its influence; and, indeed, beyond the mere sentiment the superior convenience of that metal for monetary purposes may tell in the same direction.

In addition to this, the apprehension that the bimetallic arrangement could not be relied on as permanent, and the fear of secession from it, might operate strongly to induce bankers and financiers to hold as large a stock as possible of gold rather than This might cause a struggle for the possession of gold, with consequent financial disturbance, and with the result that nations who are accustomed to the use of gold for the actual purposes of currency, and who have enjoyed its superior advantages for that purpose, owing to its bulk being less in proportion to its value, might not be able easily to acquire or retain all that their people needed for these purposes.

We have thus pointed out the advantages and disadvantages to be anticipated as

the result of entering into the bimetallic compact suggested.

We have now to weigh the advantages against the disadvantages, and to answer the question whether in our opinion the result of the change would, upon the whole,

prove beneficial.

It is comparatively easy to estimate with substantial accuracy the extent and force of evils or inconveniences of which we have had experience. To weigh with just and accurate balance the possible dangers and evils that might result from a change is a very different matter. They must be largely the subject of conjecture. The opinions of economists and men of experience in financial matters with respect to them have Even if not prepared to rate them as high as some differed, and are likely to differ. have done, we can not question their reality.

The change proposed is tremendous, and we can not but feel that to a great extent

it would be a leap in the dark.

The public mind certainly is not prepared for it at present, and the very novelty of the proposal would excite apprehensions, which, in themselves, might not be without their danger.

We speak of the novelty of the proposal, because, though it has been for some years' publicly advocated with great ability and earnestness, it has not found anything like general acceptance, and those accustomed to the existing system have often been dis-

posed to put it aside as a chimerical proposal, unworthy of serious consideration.

Under all these circumstances, while fully impressed with the difficulties of the present situation, and more especially with those which affect the government of India, we are not prepared to recommend that this country should proceed to negotiate with other nations a treaty embodying a bimetallic arrangement. We feel that the matter needs much more discussion and consideration in the financial world, and by practical men, than it has yet received, and that we are not in a position to advise with any confidence that the change could be made safely, or without the risk of creating evils exceeding those which we at present experience.

# Part III.

It only remains for us to give our reasons for thinking that our colleagues have attached undue importance to the several objections which have been urged against the proposed change. These objections are as follows:

(1) That "the change proposed is tremendous," and that its "very novelty would

excite apprehensions which in themselves might not be without their danger."

To this we reply that the system of currency which we recommend was in existence in other countries for many years before 1873, and its effects practically extended to all the commercial countries of the world. We are not aware that so long as it was maintained in its integrity any evil results ensued. The only novelty in our proposal is that the United Kingdom should join with the other countries specified below, in section 35, in re-establishing a bimetallic system. We are therefore unable to understand how, in view of the experience of the past, any ground for serious apprehension can exist.

(2) That the position of the United Kingdom, and especially of London, as the

commercial or financial center of the world, would be endangered.

This position, it is urged, is due to the fact that the standard of value in this country is a definite quantity of a particular metal, and that persons entering into transactions, expressed in pounds sterling, consequently know with absolute certainty what it is that they will have to give or receive. This certainty, it is said, would disappear if an option were given to debtors, as is proposed under the bimetallic sys-

tem, of tendering either one or two metals.

To this we reply: (a) That the commercial and financial pre-eminence of London dates back to a period anterior to the establishment of the single gold standard in this country, and a period when, as a matter of fact, the currency of the country was bimetallic; (b) That if the transactions of other countries are now largely carried out by means of bills drawn upon London, it is because London is, for many reasons, the best market for such bills, and that this fact is not likely to be affected by our joining with other nations in a common system of currency; (c) That the option conceded to debtors under the bimetallic system could rarely have any practical effect, inasmuch as, if that system were established and maintained in its integrity, there would be no appreciable inducement to select one metal rather than the other.

(3) That if bimetallism resulted in a fall in the value of gold, England, as a country entitled to receive large gold payments, would lose, and other countries would gain at

her expense.

In reply to this objection we need only refer to the arguments stated in section 96

(k) of Part I of the report, to which we have nothing to add.

(4) That the bimetallic system depends for its successful working upon international support, and that, for adequate or inadequate reasons, other nations would,

sooner or later, cease to adhere to it.

To this we reply (a) that no sufficient motive can be suggested for the secession of any of the contracting powers; (b) that provided the system was maintained over a sufficiently large area, the secession of one or more powers would not be of vital importance; (c) that in any case the seceding power would cause more injury to its own subjects than to those of other countries; and (d) that such an objection applies with equal force to all international agreements.

(5) That the tendency which is observable among the more civilized nations to use gold rather than silver would be likely, notwithstanding the existence of a bimetallic system, to encourage the accumulation of that metal and the creation of an agio upon it, which would thus disturb the ratio fixed by law between the two metals.

To this we reply that the tendency above mentioned is mainly the result of the apprehensions and uncertainty attending upon the existing relations between the two metals; and that all inducement to accumulate gold would cease with a return to a stable ratio of value between them.

(6) That there might be a tacit refusal of the people of a country to accept both metals as legal tender, and that contracts would be largely made in one of the two

metals only.

The question raised in this objection is rather a matter of opinion than of argument, and we only say that we do not share the apprehensions of those who foresee any serious difficulty arising from such a course.

Even if it be admitted that it would be largely adopted, we do not think, that so long as the legal ratio between the two metals continued in force, any real difficulty

could occur.

But we may point out that the objection appears to assume what has, of course, never been suggested, that the bimetallic system could be introduced into a country without the consent of those sections of the population who would be most interested in the adoption of such a change. We are satisfied that no such measure as the introduction of the double standard could be passed into law, in this country at least, without such an amount of popular support as would practically prevent the possibility of the adoption of such a course as is supposed in the objection we are noticing.

(7) That if debts contracted in gold could be paid in silver, the claims of all creditors would unjustly suffer, and that the adoption of a bimetallic system would thus

amount to a breach of faith.

This last objection is that which appears to us to call for the most serious consider-

ation, and we are not disposed to underrate its importance.

If it be right that a government should adopt and impose upon its people a legal standard of value, it is clearly its duty to provide, as far as possible, that such stand-

ard shall not be wanting in its most essential attribute, viz, that of the greatest at-

tainable stability.

Recent experience has shown that by the monetary policy of Germany, the Latin Union, and the United States, over which this country had no control, the standard of value in the United Kingdom has been gravely impaired, and its future stability, as well as that of the silver standard of India, seriously endangered.

In these circumstances it is evident that if the Government, by its direct action in changing the standard, injured the interests of creditors and disturbed existing contracts, it may, by abstaining from action, injure the interests of debtors to an equal or greater extent, and affect future contracts.

It appears to us that if it is wrong in a government to make any change in its standard of value on the ground that it would disturb the relations of debtors and creditors, it must be equally wrong to abstain from any action which it is in its power to take by which a disturbance in those relations may be averted.

But it is essential to observe that this objection, whatever force attaches to it, is not directed against the policy of bimetallism as such, but merely against the return to the ratio of 15½ to 1, or some other ratio differing much from the current relative

value of gold and silver.

It must also be recollected that it can not be urged by those who have insisted that, the fall in prices is due to causes primarily affecting commodities, and not to the appreciation of gold. If the rupture of the bimetallic par has not led to the appreciation of gold and to a fall in prices, there appears to be no sufficient reason for sup-

posing that its renewal would affect the value of gold or cause a rise in prices.

For these reasons we do not think that, after giving due weight to the foregoing objections, they are such as ought to be allowed to stand in the way of such a policy

as we are prepared to recommend.

Neither metal alone exists in sufficient quantity to serve as a sole standard without causing such a change in the level of prices as to amount to a financial and commercial revolution; but we can not doubt that if a sufficiently wide area of agreement between the leading commercial countries can be secured, this most important result may be effectually attained, and a great international reform successfully accomplished.

Further, we are strongly impressed with the conviction that whatever evils may be expected to flow from a return to the status quo ante, the evils, both present and pro-

spective, of the existing situation are infinitely more serious.

Failing in any attempt to re-establish the connecting link between the two metals, it seems probable that the general tendency of the commercial nations of the world will

be toward a single gold standard.

Any step in that direction would, of course, aggravate all the evils of the existing situation, and could not fail to have a most injurious effect upon the progress of the world.

A further fall in the value of silver might at any moment give rise to further evils of great and indefinite magnitude in India, while a further rise in the value of gold might produce the most serious consequences at home.

No settlement of the difficulty is, however, in our opinion, possible without interna-

tional action.

The remedy which we suggest is essentially international in its character, and its

details must be settled in concert with the other powers concerned.

It will be sufficient for us to indicate the essential features of the agreement to be arrived at, namely: (1) Free coinage of both metals into legal-tender money; and (2) the fixing of a ratio at which the coins of either metal shall be available for the payment of all debts at the option of the debtor.

The particular ratio to be adopted is not, in our opinion, a necessary preliminary to the opening of negotiations for the establishment of such an agreement, and can, with other matters of detail, be left for further discussion and settlement between

the parties interested.

We therefore submit that the chief commercial nations of the world, such as the United States, Germany, and the states forming the Latin Union, should in the first place be consulted as to their readiness to join with the United Kingdom in a conference, at which India and any of the British colonies which may desire to attend should be represented, with a view to arrive, if possible, at a common agreement on the basis above indicated.

We have indicated what appears to us to be the only permanent solution of the difficulties arising from the recent changes in the relative value of the precious metals, and the only solution which will protect this and other countries against the risks of the future. At the same time we approve the recommendations of our col-

leagues in sections 134-137.

We do not attach much importance to their probable direct effects; but their influence at the present time would be beneficial, while their adoption would place no obstacle in the way of a more satisfactory solution at a future date, and might possibly facilitate it.

Australasia.—Mr. George Anderson, deputy master of the Melbourne branch of the Royal Mint, has kindly communicated, under date of September 4, 1888, a statement of the production of gold and silver in the several provinces of Australia and New Zealand during the year 1887, as follows:

PRODUCTION OF AUSTRALIA AND NEW ZEALAND FOR 1887.

•	Metals.		Ounces.
Gold	·		1, 436, 958 224, 43°

As previously explained in reports of this Bureau* the ounces given in this statement are gross ounces. Making a deduction of 8 per cent., as heretofore, the net production of precious metals in Australia and New Zealand for 1887 was as follows:

\ Metals.	Fine ounces.
	1 ' '

New Zealand.—Mr. John T. Campbell, United States minister at Auckland, transmits, under date of March 21, 1888, replies to the interrogatories of the Bureau of the Mint relative to the colony of New Zealand.

Items reported for 1887	Ounces.	Pounds sterling.	Value in United States money.

India.—Monetary statistics of India are compiled and published in very complete form. Copies of recent publications by the government bearing on the precious metals in India have been received at this Bureau.

Mr. J. E. O'Conor, assistant secretary to the Government of India, transmits, under date of November 24, 1887, tables showing, for the calendar years 1885 and 1886, the coinage of the mints at Calcutta and Bombay, the production of gold in India by districts, and names of companies, and imports and exports of gold and silver.

Answers to the interrogatories covering the years 1885 and 1886,

which have not heretofore appeared, have also been forwarded.

The same gentleman transmits, under date of April 30, 1888, reports of the workings of the mints at Calcutta and Bombay for the years 1886 and 1887.

Mr. Benjamin F. Bonham, consul-general at Calcutta, transmits, under date of July 27, 1888, replies to the interrogatories of the Bureau of the Mint covering the year 1887, together with tabular exhibits:

Items.reported, calendar years.	Rupees.	Value in United States money.

Silver:		
Imports	608, 271	3, 006, 683
Exports	481, 996	2, 382, 506

^{*}Includes recoinage 373,602 Egyptian pounds of Egyptian silver coins.

The values at which the government received foreign silver coins during the years 1886 and 1887 are also transmitted, and will be found in the Appendix.

SIAM.

	Items reported for 1887.	Ticals.	Value in United States money.
Coinage: Silver*		 3, 922, 240	\$2,216,065

^{*}The tical is a silver piece weighing 233.55 grains, and of a fineness averaging about .902.

## TRIPOLI.

A special inquiry was addressed, at the instance of this Bureau, by the Secretary of the Treasury to the Department of State relative to the unit of value of Tripoli. This was intended to apply to Tripoli, one of the Barbary States of Africa, but was sent to the United States consul at Beirut in Syria, who endeavored to obtain the information in regard to Tripoli, Barbary.

According to the statement of this consul, forwarded under date of April 12, 1888, the money of account of Tripoli, Barbary, is the Turkish piaster. He states that this piaster does not exist as a coin, the nearest approach to it being the Turkish silver piece of 40 paras, which the government receives at 38 paras, the present market value being 45 paras.

He states that both silver and gold are legal tender in Tripoli. This information fails to cover the inquiries of this Bureau.

In invoices from Tripoli, Barbary, and in accounts kept by merchants there, the mahbub of 20 piasters is the money of account, the Turkish

piaster and other foreign coins constituting the circulating media.

Until further information be received the value of the mahbub of 20 piasters will continue to be estimated as the money of account of Tripoli,

Barbary.

#### TUNIS.

A decree has been issued by the Bey assimilating the coinage system of Tunis to that of the States of the Latin Union. It ordains that the full legal-tender coins of the Latin Union shall be received at all the public treasuries of the Regency, at a proportion of six-tenths of a franc for a Turkish piaster, and that they shall be re-issued by the public treasuries in the same proportion.

#### JAPAN.

Mr. Richard B. Hubbard, United States minister to Japan, transmits answers to the interrogatories of the Bureau of the Mint so far as they relate to the Japanese Empire, covering the calendar year 1887.

#### CONCLUSION.

In closing my fourth annual report it is my privilege to remark that no shortage has been incurred in the mint service of the United States since my entry upon the duties of this office.

It may be proper also to state that there have been no disallowances of any moment in the settlement by the accounting officers of the Department of the accounts of expenditures in the mint service which have received my approval, or in the technical accounts of operations on bull-

ion and coin.

It is a pleasure to be able to bear testimony to the ability and cheerful zeal with which not only the regular work of the service has been performed, but also much extra work by way of meeting the requirements of the Bureau in the annual collection of statistics of the precious metals, and enabling me to present in the annual report of those statistics numerous exhibits for the calendar year uniform with, and supplementary to, those for the fiscal year contained in the several reports of the present series.

Acknowledgments are due to the clerical staff, and especially to Messrs. R. E. Preston, F. P. Gross, and H. E. Spackman, whose intelligent services in the regular work of the Bureau and in the preparation of both series of annual reports have been unremitting. Mr. E. O. Leech, computer of bullion, has rendered, as usual, invaluable statisti-

cal and editorial assistance.

I am, very respectfully, yours,

JAMES P. KIMBALL, Director of the Mint.

Hon. Charles S. Fairchild, Secretary of the Treasury.

#### REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE, Washington, D. C., November 1, 1888.

SIR: I have the honor to submit the following report with regard to the operations of this Bureau during the fiscal year ended June 30, 1888, together with certain additional information relating to the work performed during the first quarter of the current fiscal year.

The tables contained in the appendix to the separate bound volume of this report have been carefully prepared and are printed in the fol-

lowing order, viz:

Table A, showing the receipts from each specific source of revenue, and the amounts refunded in each collection district, State, and Territory of the United States for the fiscal year ended June 30, 1888.

Table B, showing the number and value of internal-revenue stamps ordered from the office of the Commissioner, the receipts from the sale of documentary stamps for validating unstamped instruments, and the number and value of stamps for special taxes, tobacco, cigars, cigarettes, snuff, distilled spirits, fermented liquors, and oleomargarine, issued monthly to collectors, during the fiscal year ended June 30, 1888.

Table C, showing the percentages of receipts from the several general sources of revenue in each State and Territory of the United States to the aggregate receipts from the same sources, by fiscal years, from July

1, 1863, to June 30, 1888.

Table D, showing the aggregate receipts from all sources in each coldection district, State, and Territory of the United States, by fiscal

years, from September 1, 1862, to June 30, 1888.

Table E, showing the receipts in the United States from each specific source of revenue now taxable, by fiscal years, from September 1, 1862, to June 30, 1888.

Table F, showing the ratio of receipts in the United States from specific sources of revenue to the aggregate receipts from all sources, by

fiscal years, from July 1, 1863, to June 30, 1888.

Table G, showing the returns of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, and cigarettes, under the several acts of legislation, and by fiscal years, from September 1, 1862, to June 30, 1888; also statement of the production of distilled spirits and fermented liquors in the several States and Territories, by fiscal years, from July 1, 1877, to June 30, 1888.

Table H, showing the receipts from special taxes in the several States

and Territories for the special-tax year ended April 30, 1888.

Table I. Abstract of reports of district attorneys concerning suits and prosecutions under the internal revenue laws during the fiscal year ended June 30, 1888.

Table K. Abstract of seizures of property for violation of internal-

revenue laws during the fiscal year ended June 30, 1888.

#### COLLECTIONS FOR THE CURRENT FISCAL YEAR.

I estimate that the sum of \$125,000,000 will be collected from the various sources of internal-revenue taxation during the current fiscal year, provided no changes are made in the existing rates of taxation now imposed by the internal-revenue laws.

I estimated in my last annual report that the receipts for the fiscal year ended June 30, 1888, would reach the sum of \$120,000,000. I am gratified to be able to say that the actual receipts for that year were

\$124,326,475.32, exceeding my estimate \$4,326,475.32.

#### RECEIPTS FOR THE PAST SEVEN FISCAL YEARS.

#### COST OF COLLECTION.

The cost of collection for the past fiscal year, distributed among the different items of appropriation, was approximately as follows:

For salaries and expenses of collectors, including pay of deputy collectors, clerks, etc.; and including expenses incident to enforcing the provisions of law taxing elemangarine	\$1,722,997.82
gaugers, storekeepers, and miscellaneous expenses	1, 931, 987, 93
For paper for internal-revenue stamps	45, 729, 57
For expenses of detecting and punishing violations of internal-revenue laws	24, 930, 91
For salaries of officers, clerks, and employés in the office of Commissioner of Internal Revenue	252, 637. 16
Total	3, 978, 283, 39
being less than 3.2 per cent. of the amount collected.	1

The cost of collection for the fiscal year 1887 was \$4,065,148.87,

which was about 3.4 per cent. of the collections for that year.

The statement of the cost of collection does not include the cost of printing internal revenue stamps, the appropriation for which is made directly to the Bureau of Engraving and Printing, and is not under the control of this office.

#### GENERAL CONDITION OF THE SERVICE.

As frequently during the year as was possible with the limited number of revenue agents at my command, the offices of the several collectors of internal revenue were subjected to rigid examinations. The reports of these examinations indicate a generally satisfactory condition of the service.

#### MISCELLANEOUS EXPENSES.

The act of Congress approved August 7, 1882, making provision for sundry civil expenses for the year ending June 30, 1883, required the Commissioner of Internal Revenue to make a detailed statement of all miscellaneous expenditures in the Bureau of Internal Revenue for which appropriation was made in that act. In accordance with the aforesaid requirement, I submit the following detailed statement of miscellaneous expenses incurred:

Express charges on public money forwarded by collectors and deputy col-	
lectors to depository	\$3,780.29
Telegraphing on public business	465, 71
Locks for distilleries	2,917,01
Hydrometers for use in gauging spirits	5, 995, 32
Gauging rods	38.00
Stationery for internal-revenue officers	13, 958, 69
Internal-revenue record	2,400.00
Federal reporter for office of Commissioner	11.00
Compensation of United States attorneys in internal-revenue cases allowed	
under sections 827 and 838, Revised Statutes	1,380,00
Traveling expenses of clerks under special orders of the Department	248.89
Expenses of seizures and sales by collectors	259.07
Total	31, 453, 98

#### REVENUE AGENTS' DIVISION.

Twenty revenue agents have been employed during the last fiscal year—one as chief of division in this office, twelve in charge of territorial divisions, three in the examination of the offices and accounts of collectors, and four in assisting agents in charge of divisions and on special duty.

#### EXPENSES OF REVENUE AGENTS.

There has been expended from the appropriation for salaries and expenses of revenue agents during the year as follows:

Aggregate salary of agents	expenses		29, 365, 14 157, 66
Total		•	73 897 44

#### WORK OF REVENUE AGENTS.

One thousand and seventy-four violations of internal-revenue law have been reported by revenue agents during the year, seven hundred and eighty-one persons have been arrested on their information, property to the value of \$132,744.35 has been reported by them for seizure, and \$73,619.14 for assessments for unpaid taxes and penalties. One hundred and ninety-two examinations of the accounts of collectors have been made and the condition of the offices reported upon by agents, and ten transfers of collectors' offices under new bond have been made under their supervision.

#### ILLICIT STILLS SEIZED.

The following statement shows the number of illicit stills seized, persons arrested, and casualties to officers and employés during the fiscal year, ended June 30, 1888:

	Stills	seized.	Number	Casualties.			
Districts.	Destroyed.	Removed.	of persons arrested.	Officers or employés killed.	Officers or employés wounded.

#### AMOUNT EXPENDED FROM APPROPRIATIONS NOT HERETOFORE REPORTED.

Name.	District.	Amount.	Fiscal year.
Hunter Wood H. Shepperd W. H. Chapman, revenue agent George B. Clark, revenue agent Rewards under Circular 99.		\$2.85 40.00 12.00 4.00 1,184.75	1887 1887. 1887. 1887.

The accounts for expenditures under this appropriation are rendered monthly, with an itemized statement, and in all cases supported by proper subvouchers duly sworn to. These accounts pass through all the accounting offices in the Treasury Department, and are filed in the Register's office.

## DESTRUCTION OF THE PERSONAL PROPERTY OF OFFICERS AND EMPLOYES.

In the enforcement of the laws for the collection of the tax on distilled spirits in some of the sparsely settled portions of the country, and for the suppression of illicit distillation, officers of the internal revenue have been subjected to a considerable loss from the destruction by persons operating illicit stills and their lawless comrades, of their vehicles and the killing or maining of their horses used while traveling on official business.

Under existing laws there is no authority to re-imburse the officer forloss or damage sustained from such causes:

Section 3171 of the Revised Statutes authorizes the officer so injured to maintain suit for damages in the circuit court of the United States in the district where the party doing the injury may reside or shall be found. The only concession to the injured officer made by this section is the right to maintain suit in the United States court. He, of course, has a just claim for damages against the trespassers which he may bring in the State courts. By this statute he is permitted to bring an action in the United States court, but is compelled to go to the district where the injury is done.

The present statutory or common law remedies are of little or no benefit to the injured person, for the reason that it is usually impossible to obtain sufficient evidence to sustain an action against the guilty parties, or, if they are discovered, they are generally so irresponsible pecuniarily that judgments against them are entirely worthless.

The frequency of such outrages has had a tendency to make the officers less active than they otherwise would be in visiting portions of their districts infested by law-breakers, on account of the loss of or damage to property to which they are exposed, with little or no hope

of re-imbursement for the same.

This damage is inflicted, not for personal reasons, but in a spirit of retaliation against the agent of the Government for his lawful acts.

So frequent have such outrages become that in my opinion the sub-

ject should be brought to the attention of Congress.

Sections 3482 and 3483 of the Revised Statutes provide for the payment to officers for horses lost in battle and for property lost while in military service. It occurs to me that an enactment somewhat similar to the provisions of these sections would not only be just to the civil officers, whose duties expose them to loss and damage in property, but would encourage them in the more faithful performance of an arduous and dangerous duty. I think an act could be so framed as to provide against any abuse of it, or the recovery of any improper or unjust claims under it.

#### OFFERS IN COMPROMISE.

The following statement shows the number of internal-revenue cases compromised under section 3229, Revised Statutes, for the fiscal year ended June 30, 1888, with amount of tax, assessable penalty, and specific penalty accepted:

#### ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal-Revenue Service for the fiscal year ending June 30, 1890, as follows:

For salaries and expenses of collectors, including pay of deputy collectors and clerks, and expense of enforcing the act of August 2, 1886, taxing oleomargarine, and the act of August 4, 1886, imposing on the Government the expense of the inspection of tobacco exported.  For salaries and expenses of twenty revenue agents, for surveyors, for fees and expenses of gaugers, for salaries of store-keepers, and for miscellaneous expenses.  For paper for internal-revenue stamps.  For detecting and bringing to trial and punishment persons guilty of violating the internal-revenue laws, including payment for information and detection.  For salaries of officers, clerks, and employes in the office of the Commissioner of Internal Revenue.  For expenses incident to the enforcement of the act of October 12, 1888, for the prevention of the manufacture and sale of adulterated foods and drugs in the District of Columbia, which provides for the analysis of such articles under the direction of the Commissioner of Internal Revenue	1, 950, 000 60, 000 50, 000 265, 280
nue	10,000
Total	4, 135, 280

#### SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors for the fiscal year ending June 30, 1889, are based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections should vary from the amounts estimated the salaries will be re-adjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of-	Salary.
\$25,000 or less. 25,001 to \$37,500 37,501 to 50,000 50,001 to 75,000 75,001 to 100,000 100,001 to 125,000 125,001 to 175,000 175,001 to 275,000 225,001 to 275,000 225,001 to 325,000 325,001 to 375,000 325,001 to 375,000	2, 125 2, 250 2, 375 2, 500 2, 625 2, 750 2, 875 3, 000 3, 125	\$375,001 to \$425,000 425,001 to 475,000 475,001 to 550,000 550,001 to 625,000 625,001 to 700,000 700,001 to 775,000 775,001 to 850,000 850,001 to 925,000 925,001 to 1,000,000 1,000,001 and upwards	3, 500 3, 625 3, 750 3, 875 4, 000 4, 125 4, 250 4, 375

#### OFFICIAL FORCE.

The force connected with this Bureau during the fiscal year which ended June 30, 1888, in the various districts throughout the United States, as reorganized under the Executive order of May 21, 1887, was 63 collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
31	4, 375 4, 250 4, 000	3	3, 625 3, 500	5 4 3 2	\$3,000 2,875 2,750 2,625

There were also employed 947 deputy collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
22 11 33 1 10 31 2 47 8	\$2,000 1,900 1,800 1,750 1,700 1,600 1,550 1,500 1,450	1 130 1 132 2 66 4 23 1 1 11	950 900 850 800 750 700	1 9 3 229 3 2 9 6 4 4 2	\$42 40 36 30 25 24 20 15 12
35 51	1, 350 1, 300 1, 200	20 10	600 500 - 480	1	. <del>0</del>

Also 181 clerks, who received per annum salaries as follows:

Number.	Salary	Number.	Salary.	Number.	Salary.
1 2 3 3 9 4 1 34	\$1,800 1,600 1,500 1,400 1,300 1,250 1,200	9	\$1, 150 1, 100 1, 000 900 800 750 720	9 2 11 1	\$700 650 600 500 400

Also 29 porters, messengers, or janitors, who received per annum salaries as follows:

Number.	Salary,	Number.	Salary.	Number.	Salary.
5	\$600 500 480 450	1	\$400 360 300 200	1	\$144- 120- 100- 75

#### STORE-KEEPERS, GAUGERS, ETC.

There are also employed 605 gaugers who receive fees not to exceed \$5 per diem, 507 store-keepers and 867 store-keepers and gaugers whose pay does not exceed \$4 per diem, and 3 distillery surveyors. All the foregoing officers are paid only when actually employed.

The pay of store-keepers and store-keepers and gaugers assigned to distilleries whose registered daily capacity is 20 bushels or less is fixed by law at \$2 per diem. The pay of those assigned to larger distilleries

has been graded according to the following scale:

Compensation for store-keepers and gaugers, and store-keepers assigned to distilleries having a surveyed daily capacity exceeding 20 bushels and not exceeding 40 bushels, \$3 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 40 bushels and not exceeding 60 bushels, \$3.50 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 60 bushels, \$4 per day.

#### CONDITION OF THE OFFICE.

At the close of the year ended June 30, 1888, 193 officers, clerks, messengers, and laborers were employed in this Bureau, and the aggregate amount paid during the year for their salaries was \$252,637.16.

During the year ended June 30, 1887, 198 persons were employed, and the aggregate payments on account of their salaries was \$250,702.74.

At the close of the year ended June 30, 1885, the number of persons so employed was 220, and the aggregate amount paid for salaries during that year was \$284,591.65. During the year ended June 30, 1884, there were 241 persons employed, and the aggregate payments on account of their salaries was \$296,421.48.

Notwithstanding this reduction in the force of nearly 50 persons during the last four years, the work of the office is in good shape. For this condition of affairs I am indebted to the officers, clerks, and other employes of this Bureau, who have generally performed their duties in a most acceptable manner.

#### SALARIES.

I have the honor to recommend that Congress appropriate, for the fiscal year ending June 30, 1890, the sum of \$265,280 as salaries for the following officers, clerks, and employés in this Bureau:

One Commissioner, at	\$6,000
One Deputy Commissioner, at	
One chemist, at	
One microscopist, at	
Two heads of division, at	2,500

	\$2,250 2,000
	1,800
Twenty-four clerks, at	1,800
Twenty-four clerks, at	1,600
	1,400
	1,200
Thirteen clerks, at	
Forty clerks, at	900
Two messengers, at	840
Sixteen assistant messengers, at	720
Thirteen laborers, at	660

An aggregate of 204 persons.

The chemist and microscopist were authorized by the act of August 2, 1886, taxing oleomargarine, and the additional head of division and the two assistant messengers asked for are rendered necessary to carry out the provisions of that act; and these officers embrace all the additional force connected with this Bureau that will be needed to enforce this additional tax.

I also recommend the appropriation of the sum of \$2,500 as salaries for one stamp agent at \$1,600, and one counter at \$900, the same to be re-imbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

#### STAMP DIVISION.

STATEMENT SHOWING NUMBER, KIND, AND VALUE OF INTERNAL REVENUE STAMPS ISSUED FOR THE FISCAL YEAR ENDED JUNE 30, 1888.

Class of stamps.	Number.	Value.
Tax-paid Exportation, spirits Other than tax-paid Tobacco and snuff Exportation, tobacco Cigar and cigarette Exportation, cigars Special-tax Fermented liquors Brewers' permits Oleomargarine Exportation, cigars Tin-foil for tobacco issued by stamp agent at New York Documentary, issued for stamping documents under section 3422 Revised Statutes	12, 800 3, 741, 200 354, 290, 323 77, 200 239, 255, 137 4, 400 898, 880 75, 495, 500 92, 800 1, 036, 800	12, 711, 013. 3 9, 075, 426. 0 25, 246, 400. 0 789, 664. 0
Total	705, 579, 717	138, 420, 198. 8

#### REDEMPTION OF CHECK STAMPS.

There have been received for redemption since June 1, 1887, to June 30, 1888, 101 claims for check and proprietary stamps, amounting to \$325.20, and the time for the redemption of such stamps having expired June 30, 1886, the same were rejected and returned.

At the close of the last fiscal year there were remaining 78 packages of check and proprietary stamps undisposed of. These packages are made up, some without claims and some without stamps. None of the old claims have been disposed of, and are chiefly those for which no clue to their ownership can be obtained.

# MANUFACTURE OF STAMP PAPER.

After due advertisement for proposals to furnish paper for the present fiscal year, to be used in printing United States internal-revenue stamps, two bids were presented. The bids were opened August 27, 1888, and after due consideration of the same, and a just and fair test of the various samples presented with the bids, the contract for supplying such paper was awarded on the 29th day of August to the Fairchild Paper Company, of Boston, Mass., at the rate of  $6\frac{7}{10}$  cents per pound, including all expenses for the transportation and delivery at the Treasury Department.

Under the contract for the previous year the price paid was  $7\frac{2}{10}$  cents

per pound.

The contract for the manufacture of the paper by the Fairchild Paper

Company was executed on the 6th of September, 1888.

The advertisement for proposals stated the quantity of paper likely to be required for the present fiscal year would be about 500,000 pounds. It is now apparent, by the regular annual increase of the demands for the several classes of stamps, the amount of paper required will be at least 600,000 pounds.

The manufacture of the paper under the present contract commenced

September 14, 1888.

#### PRODUCTION OF STAMPS.

During the past fiscal year all internal-revenue stamps have been produced by the Bureau of Engraving and Printing, with the exception of stamps for tobacco imprinted on tin-foil wrappers, which have been printed by John J. Crooke, of New York, under contract which provides that the imprinting of such stamps shall be without cost to the Government, the contractor receiving such remuneration from the manufacturers of tobacco as may be agreed upon between them, and re-imbursing to the Government the salaries of one United States stamp agent and one counter, amounting to \$2,500 per annum.

# OFFICIAL COUNT OF STAMPS IN VAULT MADE BY COMMITTEE APPOINTED BY THE HONORABLE SECRETARY OF THE TREASURY.

A committee appointed by the honorable Secretary of the Treasury on the 6th day of January, 1888, took possession of the vaults of the stamp division of this Bureau at 9 o'clock Monday morning on the 16th of January, 1888, and with an adequate force of counters, clerks, and laborers selected from the different offices and bureaus of the Department immediately proceeded with the count, and completed the work at noon on Thursday, the 19th of the same month.

They reported the balances found by actual count to agree in every respect with the balances reported by the superintendent of the vault, and a statement of balances called for by the books of the Division of Loans and Currency in the office of the Secretary, which balances and statement were verified by the count and found to be absolutely correct.

The committee further reports that the gratifying results shown by this examination, involving the receipt, custody, and disbursement of 765,934,261 stamps, aggregating in value over \$186,000,000, without loss to the Government could only have been secured by the strictest integrity and a most thorough and conscientious discharge of duty on the part of those upon whom this responsibility devolves, and leaves no room for other than favorable comment.

# TOBACCO DIVISION.

The aggregate amount of taxes collected from tobacco during the last fiscal year was \$30,662,431.52. This amount includes internal-revenue taxes paid by stamps on imported manufactured tobacco, snuff, cigars, and cigarettes.

The increase of collections for the last fiscal year over those for the

previous fiscal year was from-

Manufactured tobacco and snuff	\$229,046.46
Cigars and cigarettes	308, 347. 07
Special taxes	16, 970, 86

The increase in the quantity of tobacco and snuff and in the number of cigars and cigarettes for the last fiscal year over those taxed during the previous fiscal year was:

bacco		1,987,870 875,211
,	<del></del>	

Total 2, 863, 081

Number.

Cigars	56, 421, 207
Cigarettes	278, 220, 900
,	

The export account shows a decrease in manufactured tobacco of 224,705 pounds; a decrease in the number of eigars exported of 462,425; and an increase in the number of eigarettes exported of 40,834,500.

The number of cigars imported during the fiscal year ended June 30, 1888, was 84,203,780. The value of the manufactured tobacco imported

was \$88,537.

#### COMPARATIVE STATEMENT.

The following exhibit shows in detail the receipts for the fiscal year ended June 30, 1888, from each particular source of the tobacco tax, as compared with those for the previous fiscal year:

# RECEIPTS FROM TOBACCO AND SNUFF.

Manufactured tobacco, tax 8 cents Snuff, tax 8 cents per pound	per pound	\$16, 154, 049, 05 594, 959, 13
	1888	
Increase in collections		229 046 46

The increase in collections from chewing and smoking tobacco was \$159,029.59, and from snuff \$70,016.87.

#### RECEIPTS FROM CIGARS AND CIGARETTES.

Cigars and cigarettes, at \$3 per 1,000	\$11,534,179,95
Cigarettes, at 50 cents per 1,000	

Total for year ended June 30.	, 1898	12, 465, 543, 00
'Total for year ended June 30,	1887	12, 157, 195. 93

Of this increase \$169,263.62 was on cigars and \$139,083.45 was on cigarettes.

#### RECEIPTS FROM SPECIAL TAXES.

Manufacturers of cigars	\$116,398.09
Increase, manufacturers of cigars	
Manufacturers of tobacco and snuff	5, 125, 00
Decrease, manufacturers of tobacco	438.75
Dealers in manufactured tobacco	1, 268, 294, 89
Increase, dealers in manufactured tobacco	22, 882, 24
Peddlers of tobacco	13, 116, 53
Decrease, peddlers of tobacco	1,585.41
Leaf dealers	44, 945, 83
Decrease, leaf dealers	6, 945. 31

# PRODUCTION OF TOBACCO, SNUFF, CIGARS, AND CIGARETTES.

The production of tobacco, snuff, cigars, and cigarettes for the fiscal year ended June 30, 1888, computed from the receipts from stamps sold for all such goods as were put on the market for consumption, together with those removed in bond for export, and including importations, was:

Tobacco, taxed at 8 cents per pound	201, 925, 613 7, 436, 989
Total tobacco and snuff Increase over last fiscal year Tobacco and snuff exported	2,863,081 $13,504,227$
Total production for fiscal year 1888	
Total increase over fiscal year 1887	2, 638, 375
Cigars, taxed \$3 per 1,000	Number. 3, 844, 726, 650 1, 862, 726, 100
Total taxed. Increase over last fiscal year. Cigars exported. Cigarettes exported.	1,432,625
Total product for fiscal year 1888	6, 224, 297, 282 5, 514, 640, 993

### SPECIAL-TAX PAYERS.

Increase .

The number of special-tax payers, on the computation that each paid special tax for a full year, as shown by the receipts from the sale of special-tax stamps during the fiscal year 1888 was:

Manufacturers of tobacco, including snuff	855
Manufacturers of cigars and cigarettes	19,400
Peddlers of tobacco	1,456
Dealers in leaf tobacco	4, 235
Dealers in manufactured tobacco	528, 456
Total number of special-tax payers	554, 402 545, 225
Increase during last fiscal year	9, 177

#### THE TABULAR STATEMENTS.

In the tables annexed will be found statements showing the manner in which the manufacturing is distributed through the different States, the number of persons and firms engaged in each of the two branches of manufacturing, the quantity of different kinds of material used, and the quantity and kinds of products manufactured. These taxes are compiled from the reports received from collectors of internal revenue of the transactions of manufacturers in their several districts for the calendar year ended December 31, 1887, a period of time differing from the fiscal year, which will account for any apparent discrepancies between them and the previous part of the report relating to tobacco.

STATEMENT SHOWING THE NUMBER OF CIGAR MANUFACTURERS' ACCOUNTS REPORTED, THE NUMBER OF CIGARS AND CIGARETTES REPORTED MANUFACTURED DURING THE CALENDAR YEAR 1887, AND THE QUANTITY OF TOBACCO USED THEREIN.

# DIRECT TAX.

A bill to refund to the several States and Territories and the District of Columbia the taxes collected under the direct-tax act of 1861 has passed the Senate and is still pending before the House of Representatives.

SCHOOL FARMS.

The act of March 3, 1887, provided for the redemption of lands in Beaufort County, S. C., known as "school farms," owned or held by the United States by virtue of proceedings under the act entitled "An act for the collection of direct taxes in insurrectionary districts within the United States, and for other purposes," approved June 7, 1862, and acts supplementary thereto.

The law required applications to be made within one year from the passage of the act. The time for filing applications has therefore expired, and a bill, H. R. 8053, has passed the House of Representatives

proposing to extend the time for one year.

When the aforesaid act of March 3, 1887, passed, there were eighteen school farms in Beaufort County, S. C., owned by the United States, portions of which were leased from year to year by the collector of internal revenue.

Each school farm contained about 160 acres, with the exception of three, which were reported as containing respectively 40, 30, and 800 acres, making a total of 3,370 acres, more or less.

Their value was estimated at an average of about \$3 per acre, or

about \$10,000 in the aggregate.

The revenue which was derived from leasing these lands has been invested in United States bonds and the interest used for the support of public schools, under the provisions of section 6 of the act of June 8, 1872 (17 Stats., 330), as amended by the act of March 3, 1873 (17 Stats., 600).

The fund accumulated and invested in United States bonds, the interest of which is for the benefit of public schools in the parishes of

Saint Helena and Saint Luke, S. C., is as follows:

United States 4's, face value \$49,000 United States 4's, face value 700

#### RELEASES GRANTED.

There have been released, up to the present time, to the original owners of the school farm lands, heirs at law, devisees or grantees of such original owners, under the provisions of the act of March 3, 1887, 2,127.61 acres, included in eighteen different releases. The amount paid to redeem these lands, including the refund of surplus proceeds already paid, was \$772.06.

# ABATEMENT, REBATE, AND REFUNDING CLAIMS.

#### ABATEMENT CLAIMS.

On the 1st of July, 1887, there were pending 61 claims for abatement of assessed taxes, amounting to \$31,252.35, and during the year 3,121 claims, amounting to \$380,179.07, were presented.

Of these, 2,249 claims, amounting to \$324,147.19, have been allowed by this office, and 828 claims, amounting to \$78,723.25, have been re-

jected or returned for amendment.

This left 95 claims for abatement still pending on the 30th of June, 1888, amounting to \$8,560.98.

Since that date and up to the 1st of October, 685 other claims have been filed, amounting to \$98,681.92; 522 claims have been allowed, amounting to \$71,366.80, and 203 rejected or returned for amendment, amounting to \$33,256.24, and on the 1st day of October, 1888, 55 claims for abatement were pending, amounting to \$2,619.86.

#### REBATE CLAIMS.

No claims for rebate of the tax on tobacco and cigars were received during the fiscal year ended June 30, 1888, and no claims of this character are now pending in this office. Since June 30, 1888, two claims amounting to \$32.80, previously disallowed, have been reconsidered and allowed.

#### REFUNDING CLAIMS.

On the 1st of July, 1887, there were pending 194 claims for the refunding of taxes collected, amounting to \$211,574.53, and during the year 271 other claims, amounting to \$46,597.36, were presented, and one rejected claim, amounting to \$312.95, was reconsidered. Of these, 126 claims, amounting to \$7,323.37, have been allowed, and 116 claims, amounting to \$30,532.92, have been rejected or returned for amendment. This left 224 claims for refunding still pending on the 30th of June, 1888, amounting to \$220,629.05. Since that date and up to the 1st of October, 1888, 44 other claims have been received, amounting to \$5,542.10. Of these, 37 claims have been allowed, amounting to \$2,366.99, and 33 have been rejected or returned for amendment, amounting to \$5,563.45, and on the 1st of October, 1888, 198 claims for refunding were pending, amounting to \$218,240.71.

# COMPARATIVE STATEMENT OF DISTILLERIES REGISTERED AND OPERATED.

The whole number of grain distilleries registered during the fiscal year ended June 30, 1888, was 1,300, of which number 1,029 were operated.

The numbers registered and operated during the fiscal year ended June 30, 1887, were 1,160 and 969, respectively, showing an increase during the last fiscal year of 140 in the number registered and of 60 in

the number operated.

The increase, both in the number registered and in the number operated, occurred in the class of distilleries having the smaller capacities for the production of spirits, there having been an increase of 152 in the number of distilleries of this class registered, and of 137 in the number operated.

In the larger distilleries there was a decrease of 12 in the number

registered and of 77 in the number operated.

During the fiscal year ended June 30, 1887, 918 distilleries of the smaller class, varying in daily grain capacity from not over 5 bushels to not over 60 bushels per diem, were registered, and of this number 756, or 82 per cent., were operated.

Of the larger distilleries having daily capacities varying from 60 bushels to several thousands of bushels per diem, 242 were registered,

and 213, or 88 per cent., were operated.

During the fiscal year ended June 30, 1888, of the smaller distilleries 1,070 were registered, and 893, or 83 per cent., were operated.

Of the larger distilleries 230 were registered and 136, or only 59 per

cent., were operated.

There were 10 rum distilleries registered and 10 operated, the same number reported for the previous fiscal year.

There were 2,684 fruit distilleries registered and 2,607 operated, a decrease of 1,302 in the number registered, and 1,319 in the number operated during the fiscal year.

The total numbers of grain, molasses, and fruit distilleries registered

and operated during the year were 3,994 and 3,646, respectively.

COMPARATIVE STATEMENT OF MATERIALS USED AND SPIRITS PRODUCED DURING THE LAST TEN (FISCAL) YEARS.

Year.	Grain used.	Spirits produced.	Molasses used.	Rum produced.
879	24, 006, 359 31, 291, 175 27, 459, 095 18, 644, 787 18, 927, 982 17, 865, 203 10, 195, 332 17, 959, 565	Gallons. 69, 649, 166 87, 915, 969 115, 609, 644 104, 149, 077 72, 235, 175 73, 724, 581 72, 834, 198 78, 544, 428 75, 974, 376 68, 388, 160	Gallons. 2, 801, 307 3, 110, 190 2, 710, 307 2, 121, 804 2, 373, 106 2, 259, 536 2, 719, 416 2, 308, 130 2, 428, 783 2, 519, 494	Gallons. 2, 243, 455 2, 439, 301 2, 118, 506 1, 704, 084 1, 801, 966 1, 711, 158 2, 081, 166 1, 799, 955 1, 857, 223 1, 891, 246
Total	210, 207, 821	819, 024, 774	25, 352, 073	19, 648, 050
Average	21, 020, 782	81, 902, 477	2, 535, 207	1, 964, 80

The quantity of grain used in the production of spirits during the fiscal year ended June 30, 1888 (16,122,509 bushels), is a decrease of 1,837,056 bushels from the amount used in the preceding fiscal year (17,959,565 bushels), and is 4,898,273 bushels less than the average (21,020,782 bushels) for the last ten years.

The number of gallons of spirits produced from grain during the year (68,388,160) shows a decrease of 7,586,216 gallons from the product (75,974,376 gallons) of the year ended June 30, 1887, and is 13,514,317 gallons less than the average product (81,902,477 gallons) for the last

ten years.

The yield of spirits from each bushel of grain is 4.24+ gallons. The yield for the two preceding years was 4.23+ for 1887 and 4.09+ for 1886.

The quantity of molasses used for the production of rum during the fiscal year (2,519,494 gallons) shows an increase of 90,711 gallons over the quantity used in the previous year (2,428,783 gallons), and is 15,713 gallons less than the average (2,535,207 gallons) for the last ten years.

The quantity of rum distilled from molasses during the fiscal year (1,891,246 gallons) shows an increase of 34,023 gallons over the product of the previous year (1,857,223 gallons), and is 73,559 gallons less than the average product (1,964,805 gallons) for the last ten years.

# FRUIT BRANDY—DISTILLATION FROM ANY FRUIT—STORAGE IN SPE-CIAL BONDED WAREHOUSES—PROPOSED REPEAL OF TAX.

In previous reports I have recommended that the distillation of all kinds of fruit under the regulations which govern the production of brandy from apples, peaches, or grapes exclusively should be authorized by law, and also the establishment of special bonded warehouses for the storage of brandy distilled from any kind of fruit, in addition to those authorized for the storage of brandy distilled from grapes exclusively. By an act passed at the recent session of Congress my recommendation in the latter respect has been carried out, and the provisions of the act of March 3, 1877, which provided for the establishment of special bonded warehouses for the storage of brandy made from grapes exclusively, have been extended and made applicable to brandy distilled from apples or peaches, or from any other fruit, the brandy distilled from which is not now required or hereafter shall not be required to be deposited in a distillery warehouse.

So soon as suitable warehouses shall have been established under this act the distillers of apple and peach brandy, as well as the distillers of grape brandy, will be able to store their product therein for a period not exceeding three years from the date of the original gauging of the same.

This relief will not extend to brandy distilled from any other fruits than apples, peaches, or grapes, as the distillation of all other fruits is still required to be carried on under the general distilling law and the brandy produced is required to be deposited in a distillery warehouse.

Legislation is, however, pending to place all fruits on the same footing with apples, peaches, and grapes, and the subject does not, there-

fore, call for further notice at this time.

I will add, however, that the applications and inquiries which have been received this season concerning the distillation of spirits from berries, tomatoes, cherries, the Maguey plant, etc., serve to show the demand existing for the privilege referred to, and to indicate an increase to the revenue obtainable from this source.

The deprivation of the liberty of distilling these fruits (except under the general law, which is usually impracticable for distillers of this class) affords a constant temptation to the violation of law and the illicit pro-

duction of spirits.

In this connection, it may be observed, in reference to the proposition frequently made to remove the tax from brandy distilled from fruit, that it appears to be probable that the relief of this article from taxation would lead to the utilization of a large number of different fruits for the distillation of spirits, and to the production of an additional volume of such spirits, which might reasonably be expected to have an appreciable effect upon the tax paid grain and molasses spirits with which it would come into competition. Under the present law, which practically confines the brandy producer to the use of apples, peaches, or grapes, and despite the endeavor to exercise as close a supervision as it has been found practicable to apply to a business carried on by so many individuals and scattered over so large an area, it is supposed that a considerable percentage of the product escapes tax; and even this amount is the subject of complaint from the distillers of whiskies, who declare that it is perceptibly felt in some places.

If, then, in addition to this fraudulent quantity, the whole legitimate product of fruit brandy should be put upon the market tax free, and this should again be swollen by the unrestricted use, not only of apples, peaches, and grapes, but of any and all other fruits, under the inducement offered of competition with whisky and rum loaded with a tax of 90 cents a gallon, I believe that the grievance to the whisky producers would prove not to be an imaginary one. A large quantity of free fruit brandy would surely be marketed in localities where the smaller grain distilleries are mainly situated and could not fail to seriously affect the business of the latter. For instance, during the last fiscal year there were operated 715 grain distilleries, having each a daily spirit producing capacity not exceeding 30 gallons. Of these an average of not far from 350 was in operation each month. In the same collection districts there were operated, at various times during the fruit season, 2,065 fruit distilleries. In good fruit seasons twice this number of fruit distilleries are

not infrequently operated.

If all restriction and limitation were removed from fruit distillation, and the stimulant of large profits added, the disproportion in numbers between these fruit and grain distilleries, and the product of the former, must speedily increase. The circumstances would offer to the small

grain distillers the strongest temptation to meet the free fruit spirits with illicit grain spirits, just so far as might be found possible.

The reduction in the revenue by the abolition of the tax upon fruit brandy is not, therefore, I consider, to be measured by the subtraction

of the present collections from that source.

A considerably larger amount would, in all probability, be lost, while mischief to the revenue service, and increased difficulties in the enforcement of the law as to grain and molasses spirits, out of all proportion to the amount of tax surrendered, must be seriously apprehended.

### DIVISION OF ASSESSMENTS.

The following statements relative to assessments; to spirits deposited in and withdrawn from distillery warehouses and special bonded warehouses, the number and location of such warehouses and the names of the proprietors thereof; to the stock of spirits in the United States October 1, 1887; to exportations of spirits, tobacco, snuff, cigars, and cigarettes in bond; to exportations of tobacco, cigars, fermented liquors, and stills, with benefit of drawback; and to the production, consumption, and exportation of oleomargarine and other particulars concerning. the operation of the "oleomargarine law;" also preliminary steps taken under the act of October 12, 1888, entitled "An act to prevent the manufacture or sale of adulterated food or drugs in the District of Columbia," are prepared from reports in the division of assessments. statements relative to assessments are to be found on this page and the page following; statements relative to operations in distillery warehouses commence on page L (see also special index on page XLIX); to operations in special bonded warehouses on page CXXXIX; to exportations in bond free of tax as to spirits on page CIII; as to tobacco, snuff, cigars, and cigarettes on page CXLI, and as to oleomargarine on page CXLVI; to exportations of tax-paid spirits, tobacco, cigars, cigarettes, fermented liquors, and stills, with benefit of drawback of the tax, page CXLII; to the subject of methylated spirits, page CXIII; of oleomargarine, page CXLIII; and of adulteration of food and drugs, page CLXXXV.

#### MISCELLANEOUS ASSESSMENTS.

The following table shows the assessments made by the Commissioner of Internal Revenue during the fiscal years ended June 30, 1887, and June 30, 1888, respectively, and the increase or decrease on each article or occupation:

		ing fiscal year ed—	Fiscal year ended Jun 30, 1888.		
	June 30, 1887.	June 30, 1888.	Increase over 1887.	Decrease from 1887.	
Tax on deficiencies in production of distilled spirits	\$41,438.20	\$24, 498. 09		\$16, 940. 11	
tion of distilled spirits	1, 463. 17 4, 288. 37	1, 087. 19 12, 370. 10	\$8,081.73	375, 98

unstamped	4, 941. 16	12, 950. 43	8, 009. 27		
factory unstamped	12, 744. 11	6, 683. 34		6, 060. 77	
tax on income and dividends	666.54 9,527.62	222. 00		444. 54 9, 527. 62	

		ing fiscal year ed—	Fiscal year ended June 30, 1888.		
	June 30, 1887.	June 30, 1888.	Increase over 1887.	Decrease from 1887.	
Tax on legacies and successions.  Assessed penalties Unassessed and unassessable penalties, interest, deficiencies in bonded accounts which have been collected taxes previously abated, conscience money; also flues, penalties, and forfeitures and costs paid to collectors by order	\$35.00 83,515.56	\$15. 25 85, 148. 14	\$1, 632. 58	\$19.75	
of court or by order of Secretary, and unas- sessable taxes recovered; also amount of pen- alties and interest received for validating un- stamped instruments (Form 58).  Special taxes (licenses)		161, 889, 93 45, 126, 16 4, 326, 133, 78		52, 043, 39 429, 89	

# ASSESSMENTS FOR 1888.

The following statement shows the amount of assessments in each of the several States and Territories of the United States during the fiscal year ended June 30, 1888:

States and Territories.	Amount.	States and Territories.	Amount.
AlabamaArkapsas	\$3, 134. 60 3, 802. 59	Montana, Idaho, and Utah Nebraska and Dakota	\$2, 478. 26 2, 340. 88
California and Nevada		New Hampshire, Maine, and Ver- mont	10, 721, 9
Connecticut and Rhode Island Florida		New Jersey	7, 324. 38 1, 075. 34
Georgia	39, 351, 38	New York North Carolina	56, 279, 66 38, 667, 68
IndianaIowa Iowa Kansas and Indian Territory	7, 685, 97	Ohio Oregon, Washington, and Alaska. Pennsylvania	83, 717, 56 1, 269, 88 515, 184, 13
KentuckyLouisiana and Mississippi	2, 850, 113. 28 5, 486, 48	South Carolina. Tennessee	4, 102. 88 39. 514. 9
Maryland, Delaware, and District of Columbia.	366, 089. 51	Virginia	3, 133. 60 28, 004. 14
Massachusetts	7, 232, 70 19, 615, 06	West Virginia	67, 577. 47 6, 686. 60
Minnesota	7, 018. 64 12, 217. 44	Total	4, 326, 133. 7

The increased assessments on circulation of banks and others is owing to the tax of 10 per centum levied upon Canadian bank notes discovered to have been paid out within the United States.

As was intimated in my last annual report, the balance of distilled spirits in warehouse at the close of that year being about 2,000,000 gallons greater than at the close of the next preceding year, an increase in assessments of taxes overdue has resulted, the increase being \$642,847.25.

The increase of assessments on fermented liquors is due to fraudulent

removals occurring in one of the city districts.

The decrease in taxes on deficiencies in the production of distilled spirits and on excess of materials used is \$17,316.09. Taxes of this character abated before assessment, under the provisions of the act of March 1, 1879, as amended by the act of May 28, 1880, amounted to \$74,610.25, as follows:

Fifty-seven claims from grain distilleries, amount of tax abated—	
On excess of materials used	\$2,687.31
On deficiencies in production of spirits	69, 551, 75
Twenty-seven claims from fruit distillers, amount of tax abated on deficien-	
cies	2, 371, 19
. 0	
m-4-1	74 C10 OF

#### DECREASED PRODUCTION OF SPIRITS.

The quantity of spirits (70,279,406 gallons) produced and deposited in distillery warehouses during the fiscal year ended June 30, 1888, is less than the production (77,831,599 gallons) of the year 1887 by 7,552,193 gallons.

The difference is distributed among the different kinds known to the

trade as follows:

Increase in the production of— Alcohol	Gallons. 738, 604
Rom	34, 023
Gin Pure, neutral, or cologne spirits Miscellaneous	2, 409, 694 1, 519, 383
Total increase	4,827,669
Decrease in the production of—	
Bourbon whisky         Gallons.           Rye whisky         9, 551, 425           Rye whisky         1, 433, 950           High wines         1, 394, 487	
Total decrease	12, 379, 862
Net decrease	7, 552, 193

### INCREASED TAX PAID WITHDRAWALS OF SPIRITS.

The quantity of spirits (70,541,811 gallons) withdrawn tax paid from distillery warehouses during the fiscal year ended June 30, 1888, is more than the quantity (66,183,303 gallons) withdrawn from distillery warehouses during the tiscal year ended June 30, 1887, by 4,358,508 gallons, the increase being distributed among the different kinds known to the trade, as follows:

Increase in withdrawals of— Bourbon whisky	Gallons. 2, 087, 094
Rye whisky	425, 909
AlcoholRum	
Gip	128, 915
Pure, neutral, or cologne spirits	1, 249, 193 1, 076, 342
Total increase	<del></del>
Decrease in withdrawals of—	
High wines	1,366 941
Net increase over 1887	4, 358, 508

If the quantity, 2,635,792 gallons (as stated by the Chief of the Bureau of Statistics), of exported domestic spirits re-imported during the year upon payment of a customs duty equal to the internal-revenue tax be added, the quantity virtually withdrawn from distillery warehouses during the year ended June 30, 1888, is found to be 73,177,603 gallons, or 4,777,655 more than during the year 1887, including the 2,216,645 gallons re-imported and tax-paid during that year.

DISTILLED SPIRITS ALLOWED FOR LOSS BY LEAKAGE OR EVAPORATION IN WAREHOUSE.

The quantity of spirits (2,209,327 gallons) reported in the preceding table as lost by leakage or evaporation in warehouse, is that portion of actual leakage in warehouse from packages withdrawn during the year which has been allowed in accordance with the provisions of section 17 of the act of May 28, 1880.

The following statement shows the quantity of spirits, as per original gauge, withdrawn from warehouse for all purposes during the stated period, and the amount and percentage of leakage allowed thereon under

the provisions of the act named:

Year.	 Total quantity withdrawn.	Leakage allowed.	Percentage of withdrawals.
1880 1881 1882 1883 1884 1885 1886 1887	 80, 281, 611 83, 291, 190 92, 022, 593	Gallons. 75, 834 811, 466 1, 231, 336 2, 291, 013 3, 858, 94 4, 424, 314 1, 806, 868 1, 833, 681 2, 209, 327	. 096 . 962 1. 533 2. 750 4. 193 4. 866 2. 299 2. 591 2. 969

a Includes 7,750,696 gallons stamped for export not actually withdrawn. b Includes 2,494,091 gallons stamped for export not actually withdrawn.

The increase of 375,646 gallons leakage allowed under section 17 of the act of May 28, 1880, over the quantity so allowed during the previous year, is distributed among the different kinds of spirits known to the trade as follows:

Increase o	f leakage allowe	d for—					Gallons.
Bourb	on whisky				· · · · · · · · · · · · · · · · · · ·		260,806

# SPIRITS REMOVED IN BOND FOR EXPORT.

The following statement shows the quantity and percentage of production of distilled spirits removed in bond for export during each fiscal year since the passage of the act of June 6, 1872:

Year.	Taxable (proof) gal- lons exported.	Percentage of production.	Year.	Taxable (proof) gallons exported.	Percent- age of pro- duction.
1873 1874 1875 1876 1877 1878 1889	2, 358, 630 4, 060, 160 587, 413 1, 308, 900 2, 529, 528 5, 499, 252 14, 837, 581 16, 765, 666	3. 45 + 5. 90 + 0. 96 + 2. 25 + 4. 22 + 9. 80 + 20. 63 + 18. 55 +	1881/ 1882 1883 1884 1885 1886 1886	15, 921, 482 8, 092, 725 5, 326, 427 9, 586, 738 10, 671, 118 5, 640, 656 2, 223, 913 1, 514, 205	13.52+ 7.64+ 7.19+ 12.70+ 14.24+ 7.02+ 2.85+ 2.15+

The falling off in exportations in 1888, as compared with 1887, is due mainly to the decreased withdrawals for export of alcohol and pure, neutral, or cologne spirits, and is distributed as follows:

Decrease in withdrawals of—			Ġallons.
Bourbon whisky			4 970
Alcohol			600, 199
Gin Pure, neutral, or cologne spirits Miscellaneous			217, 041

#### METHYLATED SPIRITS.

Inquiry having been made at this office by members of Congress as to the practicability of withdrawing spirits from distillery warehouses free of tax for use in the mechanical arts, and protecting the revenue against fraud by methylating the spirits in bonded warehouses established for the purpose, the microscopist of this office was requested to make experiments in the chemical laboratory for the purpose of ascertaining whether such spirits could be demethylated. It appears from his report herewith that he has succeeded, by the use of a small still, in separating the methyl or wood alcohol, from the ethyl or taxable alcohol; and in deodorizing a portion of the ethyl alcohol through the use of bone-black and other chemical substances.

It may be urged that if the demethylation can not be accomplished without the use of a still, the operator is readily liable to detection because of the special surveillance required by the internal-revenue laws in the matter of stills and distilling, but I do not take this view of the case. The internal-revenue laws do not prohibit the use of stills by persons other than distillers of spirits, and, as a matter of fact, many druggists and others use stills on their premises. It is true that these laws prohibit the making of a mash fit for the distillation of spirits except on the premises of a distiller, brewer, or vinegar manufacturer. It is also true that the process of mashing is readily discoverable by the peculiar smell which pervades the premises on which the business is conducted, but the process of demethylation does not involve any process of mashing or fermenting, nor the use of the large still which even the smallest distillers who produce spirits from a mash are compelled to use. The still used in this office was among the smallest of the stills which druggists and others, not distillers, are permitted to use.

#### REPORT OF THE MICROSCOPIST ON METHYLATED SPIRITS.

The question whether methyl or wood alcohol can be separated from methylated spirits, by distillation or otherwise, and leave the ethyl alcohol contained therein in such a state of purity that it can be placed on the market at a profit, has been the subject of several investigations by special committees in England and Germany, and of one in this country.

The English committee, consisting of Professors Graham, Hofmann, and Redwood, in their reports of July 24, 1854, and January 3, 1855, reached the conclusion that there was no economical method then known for separating the two alcohols, and that the presence of a very small quantity of methyl alcohol rendered the mixture unpalatable; they recommended the use of purified wood naphtha for this purpose.

In Germany the subject has been investigated by Kraemer, Gerick, and Dietze. They recommended the use of the first and last very impure products obtained in the distillation of crude wood spirits.

Drawing their information from the reports of these committees most writers of textbooks on the subject declare that methylated alcohol can not be made drinkable by any commercial process. These conclusions being based on the results of laboratory experiments, where no distilling apparatus approaching the perfection of a modern column still for differentiating and separating liquids of different boiling points were employed, should not be regarded as final.

As the English law and regulations against any attempt at removing or purifying the methyl are very stringent, it may be inferred that such attempts have been successfully made.

Methyl alcohol is the lowest form of the alcohol series, and when pure is a colorless, mobile liquid, having a vinous smell closely resembling that of ethyl alcohol. It has a specific gravity of 0.8142 at 0° C. (32° F.) (Kopp.). The boiling point, as stated by various observers, varies from 58.6° to 66.5° C. (137° to 152° F.), owing to the great

difficulty of obtaining it in a perfectly anhydrous condition. The difference between the densities of mixtures of methyl alcohol and ethyl alcohol with the same proportions of water is so small that the tables ordinarily used for the latter may be employed for most purposes in ascertaining the strength of the former.

Methyl alcohol is miscible in all proportions with water, ethyl alcohol, and ether. In its solvent and chemical properties it closely resembles ethyl alcohol.

Wood naphtha, pyroxylic spirits, is the name given to the impure commercial methyl alcohol. It is a very complex liquid, containing variable proportions of methyl alcohol, acetone, methyl acetate and formate, allyl alcohol, aldehyde, water, etc. The best commercial wood naphtha contains about 95 per cent. of methyl alcohol, the common varieties from 75 to 90 per cent., and sometimes going as low as 30 to 40 per It has a very characteristic odor, and if taken internally will generally produce nausea and other deleterious effects. Pure methyl alcohol, however, is free from these objections. Cases may be cited from the English court reports and daily papers where persons habitually drank methylated alcohol without any other toxic effect than that common to ethyl alcohol.

The higher alcohols, propyl, etc., have a greater toxic effect than ethyl alcohol. Brockhaus has recently personally investigated the effects of propyl, butyl, and amyl alcohols on the system. He found the disagreeable symptoms, giddiness, nausea, etc., to increase with the molecular weights of the alcohols, and amyl alcohol itself proved to be a very violent poison. According to the experiments of Rabuteau, amyl alcohol is fifteen times as intense as ethyl alcohol, and is even fatal in small doses.

cohol is one of the chief constituents of fusel oil.

An addition of 10 per cent. of wood naphtha to ethyl alcohol lowers the boiling point of the mixture  $3.3^{\circ}$  C. (6° F.) (Ure.)

Ethyl alcohol, spirits of wine, ordinary or grain alcohol is next to methyl alcohol in the ascending order of the alcohol series, is the alcohol on which the internal-revenue tax is levied, and is the alcohol with which most people are familiar. limpid, colorless liquid, of a hot pungent taste, and has a peculiar pleasant smell. According to Mendelejeff, absolute alcohol boils under the normal pressure at 78.3° C. (173° F.), and has a specific gravity of 0.80625 at 0° C. (32° F.) compared with water at its maximum density 4° C. Dr. E. R. Squibb, of Brooklyn, N. Y., in 1884 obtained alcohol of a specific gravity lower than that recorded by any previous observer, viz., 0.80257 at 4° C., or 0.80591 at 0° C. compared with water at its maximum density (4° C.).

Ethyl alcohol is miscible with water in all proportions, a considerable evolution of heat and contraction in bulk taking place on admixture. It is nearly impossible to remove the last traces of water, owing to the tendency of alcohol to quickly absorb moisture from the air. It is a powerful solvent for fluid and solid bodies, both organic and inorganic. It absorbs many gases with considerable avidity. As found on the market, ethyl alcohol often contains traces of higher homologues, of aldehyde and acetic acid, of volatile oils, of various fixed impurities, both organic and inor-

ganic, and is more or less mixed with water.

In September, 1882, a committee of the National Academy of Sciences, consisting of Profs. Ira Remsen, C. F. Chandler, and G. F. Barker, in their report on methylated spirits to the honorable Green B. Raum, Commissioner of Internal Revenue,

reached the following conclusions:

"That by treating the mixtures of ethyl alcohol and wood spirits (in the proportion proposed in the bill now before Congress) with bone-black, filtering, adding a caustic alkali-as, for example, caustic potash-and then distilling with the aid of the Hempel tube, the principal product obtained is nearly free from methyl alcohol, and that the odor and taste of this product are not very marked. At the same time, even in the best product thus obtained, the odor and taste characteristic of wood naphtha can be detected, though only with difficulty, by those who are unskilled in such matters. We believe that the method employed by us which gave the best product could be applied economically on the large scale, and a product fully as good as our best, if not better than it, might thus be obtained." (Senate Mis. Doc. No. 85, Forty-eighth Congress, first session, 1884, p. 62.)

They submitted their best specimens to some dealers in alcohol and alcoholic beverages and were informed that the purified product might easily be used in the manu-

facture of low-grade whiskies and rum.

The committee used in their experiments a Hempel tube to represent, on a laboratory scale, the column still used by the manufacturers of alcohol. "This consists of a glass tube about  $1\frac{1}{2}$  inches in diameter, and 3 feet long, filled with glass beads. The tube is inserted in the cork of the distilling-flask, and the vapor of the distilled substance is caused to pass through the tube before it reaches the condenser." (Loc. cit., p. 61.)

Although no mention is made in their report of the quantity of alcohol used in their experiments, I think it may be assumed that the quantity employed in any one

experiment was less than 1 gallon.

In the experiments conducted in the laboratory of this office a small 3-gallon still, steam jacketed, by which means the temperature was kept well under control, and furnished with a column head having a series of diaphragms which offered more or less condensing surface, according to the set used, was employed. Such a still conforms more to the large column still used by manufacturers than the Hempel tube em-

ployed by the committee. The column head is 1 foot high and 2 inches inside diameter. The set of diaphragms, which can be inserted in the head, divide the space into from seven to twenty-one The vapors are thus partially condensed and drop back into the lower The whole apparatus is made of the best tinned copper and is propart or boiler. vided with a block-tin worm. Openings for thermometers in the boiler and at the top of the column are made which can be closed with corks. The apparatus worked

very satisfactorily, and quantities distilled by it were large enough to determine what might be done for commercial, purposes.

The ethyl alcohol used in the experiments was purchased from a firm of large chemical dealers in New York; it was slightly colored from tannin and other extractive matter derived from the barrel in which it was kept, had a specific gravity, by the hydrometer standardized at 60° F., at 62° F. of .823, corresponding to a content of 93.40 per cent. absolute alcohol by volume.

The wood naphtha, methyl alcohol, pyroxylic spirit, was purchased from the same firm; it was highly colored and had a specific gravity of .841 at 61° F., corresponding to a content of 87.85 per cent. alcohol by volume.

The methylated spirit was made, at room temperature, by taking 90 per cent. by volume of the ethyl alcohol and 10 per cent. by volume of the wood naphtha, the proportions used in Great Britain; the mixture was colored by the latter to a considerable extent, and had a specific gravity of .825 at 62° F., 92.75 per cent. by volume of absolute alcohol.

The methylated spirit so prepared was the starting-point of all the experiments. A larger loss of alcohol was experienced than would happen on a commercial scale, owing first, to the high temperature of the laboratory, which ranged from  $90^{\circ}$  to  $75^{\circ}$  F. during most of the experiments, causing loss by excessive evaporation; second, to the mechanical retention in the pores of the bone-black of a considerable volume of the alcohol, as there was no means in the laboratory for filtering under pressure; and third, to the tank water employed for condensation not being cool enough to thoroughly condense the alcoholic vapors, although the distillation was purposely conducteď very slowly.

The results obtained are stated in percentages of the original volume of methylated spirit taken for the experiment and of the total volume of product obtained by dis-

llation.

The bone-black, used for filtration, was ground moderately fine and placed in a percolator having a piece of fine copper gauze at the bottom on which was first placed some coarse bone-black, then the fine. By proportioning the coarse and the fine a mechanical filter was obtained that would allow of a more or less rapid filtration. By the use of long and narrow columns a greater surface was presented, thus allowing the bone-black to more fully act on the alcohol. One pound of bone-black was used to one gallon of alcohol.

The liter (1.056 quarts) was used as the standard volume for all measurements, thus permitting of the easy reading of percentages by volume at any course of the

experiments.

#### FIRST EXPERIMENT.

Ten liters of the methylated alcohol were taken and filtered over bone-black. Βv this treatment the greater part of the disagreeable odor and all the color were re-The alcohol was passed only once over the bone-black. The filtered alcohol was then placed in the still, steam turned on, and the distillate received in suit-

The first 12.50 per cent. of the original volume (16.125 per cent. of the total volume of distillate) contained the greater part of the wood naphtha. Specific gravity .823 at  $63^{\circ}$  F. = 93.45 per cent. of absolute alcohol by volume. This can be used for 1.325 at 65° F. = 95.45 per cent. of absolute around by volume. This can be used for the manufacture of varnish or burning in lamps. The middle portions of the distillate, 47.50 per cent. of the original volume (61.275 per cent. of volume of distillate) were saved, and are nearly free from the odor and taste of the wood naphtha. The specific gravity varied from .8215 at  $60^{\circ}$  F., 93.60 per cent. alcohol by volume, to .8255 at  $60^{\circ}$  F., 92.45 per cent. alcohol by volume in the different portions. The last portions of the distillate, 17.50 per cent. of the original volume (22.575 per cent. of volume of distillate) had a disagreeable odor and taste, and were rejected. Ten gallons of methylated alcohol, of 92.75 per cent. of absolute alcohol by volume, would be equal to 18.50 gallons of proof spirits. These would yield by this experiment 5.5 proof gallons of alcohol that would be rejected, and 8.85 proof gallons of fairly demethylated alcohol.

#### SECOND EXPERIMENT.

Ten liters of the methylated alcohol were treated with 2.5 per cent. of recently burnt quicklime, coarsely powdered, with frequent agitation for twenty-four hours. This treatment had the effect of intensifying the yellow color. The alcohol was then filtered first through paper to remove the line, and then through bone-black, which decolorized it. The filtrate was treated with 0.1 per cent. permanganate of potash dissolved in water, and allowed to stand for twenty-four hours, when it was filtered through paper and bone-black and distilled.

The treatment with lime raised the specific gravity from .8244 at 60° F., 92.75 per cent. of alcohol by volume to .8215 at 60° F., 93.60 per cent. by volume. The addition of the watery solution of permanganate, however, lowered it to .8272 at 60° F., 91.95 per cent. before it was placed in the still. Through the breaking of a flask, over

4 liters of this filtrate were lost, so that no percentage results are given.

The first and last portions of the distillate were received separate from the middle

portions.

The middle portion of this distillate has such a faint taste and odor of the wood naphtha as to be nearly indistinguishable. Specific gravity .8314 at 60° F., 90.75 per cent. of alcohol by volume.

#### THIRD EXPERIMENT.

This was a repetition of the second experiment, except that the quantity of permanganate of potash was increased to 0.2 per cent.

The first 12.50 per cent. of the original volume (10 liters of 92.75 per cent. alcohol), (15.74 per cent. of the total volume of distillate) had a specific gravity of .8304 at 60° F. 91 per cent. of elechal by volume, and was rejected.

The middle portions of the distillate, 57.50 per cent. of the original volume (72.41 per cent. of the volume of distillate, 57.50 per cent. of the original volume (72.41 per cent. of the volume of distillate) was very nearly tasteless. The specific gravity varied from .8367 to .8437 at 60° F., 89.10 to 86.90 per cent. of alcohol by volume. The last 9.40 per cent. of the original volume (11.83 per cent. of the volume of distillate) was very nearly tasteless.

The last 9.40 per cent. of the original volume (11.83 per cent. of the volume of distillate) was rejected. As soon as the distillate began to have an offensive odor the steam was turned off the still. The last portion of the distillate, 6.25 per cent. of the original volume (7.87 per cent. of the distillate) had a specific gravity of .8491 at 60° F., 85.10 per cent. of alcohol by volume. The contents of the still, 3.15 per cent. of the original volume (3.96 per cent. of the distillate) had a specific gravity of .9324 at 60° F., 51 per cent. of alcohol by volume.

F., 51 per cent. of alcohol by volume.

Ten gallons of methylated alcohol of .8244 specific gravity at 60° F., 92.75 per cent. of alcohol by volume (18.50 gallons of proof spirit) would yield by this experiment 10.20 proof gallons of alcohol that is drinkable, and 3.66 proof gallons of alcohol that

has a decided taste.

#### FOURTH EXPERIMENT.

Five liters of the methylated alcohol were treated with 2.5 per cent. caustic lime for twenty-four hours, filtered through paper, then diluted with 40 per cent. of its volume of distilled water, filtered over bone-black, treated with 0.1 per cent. of permanganate of potash for twenty-four hours, filtered over paper, then over bone-black. The filtrate had a specific gravity of .8261 at 60° F., 89.30 per cent. of alcohol by volume.

The first portion of the distillate had a specific gravity of .8537 at 60° F., 83.60 per

cent. of alcohol by volume, and was rejected.

The middle portion of the distillate had a specific gravity varying from .8617 to .8700 at  $60^{\circ}$  F., 80.75 per cent. to 77.70 per cent. of alcohol by volume, and was the one most nearly free from smell and taste thus far produced.

The distillation was then stopped, and the contents of the still removed when sufficiently cool. This portion had a specific gravity of .9735 at 60° F., 22.45 per cent. of

alcohol by volume.

#### FIFTH EXPERIMENT.

Twelve liters of the methylated alcohol were taken and first filtered over boneblack; the bone-black used in the third experiment for filtering the alcohol after treatment with permanganate was used for this purpose

treatment with permanganate was used for this purpose.

The filtrate was then treated with 2.5 per cent. of freshly burnt quicklime, coarsely powdered, for forty-eight hours (a Sunday intervening), then filtered through paper to remove the lime, and afterwards through a fresh portion of bone-

black. This was then treated with 0.2 per cent. of permanganate of potash dissolved in water, and allowed to stand for twenty hours; then filtered over paper and finally over fresh bone-black. It was then distilled. It had a specific gravity of .834 at 60° F., 89.95 per cent. of alcohol by volume. The distillate was received in small quantities, so as to keep it more distinctly separated. The first portion of the distillate, 8.333 per cent. of the original volume (11.111 per cent. of the volume of distillate), had a specific gravity of .8258 at 60° F., 92.35 per cent. of alcohol by vol-It has a faint disagreeable odor of the wood naphtha.

The next portion of the distillate, 4.166 per cent. of the original volume (5.555 per cent. of the volume of distillate), had a specific gravity of .8258 at 60° F., 92.35 per cent. of alcohol by volume. It did not smell as strong as the first portion. The next portion of the distillate, 4.166 per cent. of the original volume (5.555 per cent. of the volume of distillate), had a specific gravity of .8271 at 60° F., 91.95 per cent. of alco-

This had a very slight peculiar taste. hol by volume.

The next portion of the distillate, 4.166 per cent. of the original volume (5.555 per cent. of the volume of distillate), had a specific gravity of .8268 at 60° F., 92.05 per cent. of alcohol by volume. The next six portions of the distillate, each 8.333 per cent. of the original volume (11.111 per cent. of the volume of distillate), ranged in specific gravity from .8285 to .8405 at 60° F., 91.55 to 87.90 per cent. of alcohol by

volume, and with the two preceding portions are drinkable.

The last portion of the distillate, 4.166 per cent. of the original volume (5.555 per cent. of the volume of distillate), had a specific gravity of .8488 at 60 °F., 85.25 per. cent. of alcohol by volume. This has a slight disagreeable taste and odor. On the basis of this experiment 10 gallous of the methylated alcohol of 92.75 per cent. of alcohol by volume (18.50 gallons of proof spirits) would yield 10.50 proof gallons of drinkable alcohol, and 3.03 proof gallons of alcohol fit for varnish or burning pur-

Recapitulation of results of experiments on the basis of 10 gallons of methylated alcohol of .8244 specific gravity, at 60° F., 92.75 per cent. of alcohol by volume, 18.50 gallons of proof spirits being used, stated in proof gallons:

Experiment	1	3	5.
Middle (drinkable) portion of distillate First (rejected) portion of distillate Last (rejected) portion of distillate Loss by treatment	8. 84	10. 20	10. 50
	2. 34	2. 28	2. 32
	3. 17	1. 38	. 71
	4. 15	4. 64	4. 97

#### CONCLUSION.

From the results of these experiments I am led to the conclusion that a 10 per cent. methylated spirit can be so purified, at a moderate cost for materials and apparatus, that the great majority of purchasers would fail to detect the slight odor or taste of the methyl alcohol in the treated and distilled product, and would find it still more

difficult in the artificial liquors.

The mere mechanical filtration over bone-black so deodorizes and decolorizes the methylated alcohol that a sufficiently prolonged treatment gives a filtrate that is nearly free from the smell or taste of the wood naphtha. On subjecting such a filtrate to the action of freshly burnt quicklime and again filtering over bone-black and then distilling, a product is obtained that has but the faintest taste of the methyl. Probably if the middle portion of such a distillate was diluted with about 40 per cent. of its volume of water, filtered over bone-black and redistilled, a product would be obtained that would compare favorably with most cologne spirits.

The time at my disposal has not been sufficient to allow of carrying out modifications which have suggested themselves as the experiments progressed, especially where all the different distillates have been saved and measured in working quantitatively. No doubt filtration of the different distillates over bone-black would further improve

them, i. e., render them more nearly tasteless.

From the middle portions of all these distillates artificial Bourbon whiskies have A Bourbon whisky used by rectifiers for blending was procured from Lexington, Ky. The alcohols were first diluted with water until the collector at Lexington, Ky. they had the same specific gravity as the whisky, viz, 9315 at 60° F. The diluted alcohol was then mixed with one-third its volume of whisky. Being so recently made, these samples have a decidedly "raw" smell and taste.

From the middle portion of the distillate of the fifth experiment an artificial brandy and a rye whisky have been made in the same manner as the Bourbon, viz., by dilution to the same alcoholic strength and mixture in the proportion of two-thirds alcohol to one-third liquor. The cognac brandy and rye whisky being old and of a delicate flavor, the artificial samples allow of the more accurate judging whether the alcohol imparts any disagreeable taste or smell.

#### COST OF TREATMENT.

Fifty dollars would be a very liberal estimate for the total cost of plant refor treating 10 gallons of methylated alcohol at one time.  A.10-gallon still, made of heavily-tinned copper, with column head and set of diaphragms, with block-tin condenser, costs.  A Fletcher solid-flame gas-burner, consuming 35 cubic feet of gas per hour, costs (A kerosene or ordinary coal stove may be used, instead of gas, at less expense.) Three stoneware filtering cylinders of 7½ gallons capacity, 34 inches high, 8½ inches wide, cost \$3.75 each.  Four tin funnels, 1 gallon capacity, cost 30 cents each.  Four tin caus, 5 gallons capacity, cost 30 cents each.  Outfit of measures, United States standard.  Thermometer  Filter paper and rubber tubing.	\$30.00 2.00 11.25 1.20 1.32 1.00 .75 2.00
This estimate is evidently higher than ordinary practice would call for, bein suitable for the requirement of laboratory work.  On the basis of the results obtained in the fifth experiment, the treatmen indicated being pursued on 10 gallons of methylated alcohol at one time, t based on the actual retail price paid for the materials and \$50 for plant, a profit may be stated as follows:	t there he cost
9 gallons of ethyl alcohol, 95 per cent., \$2.40—1.70, present tax, equals 70 cents per gallon.  1 gallon wood napththa, methyl alcohol.  10 pounds bone-black, granular, 8 cents per pound.  1 ounce permanganate of potash, 8 cents per ounce.  2 pounds quicklime, 1 cent per pound.  Cost of 35 cubic feet of gas, for six hours, at \$1.25 per thousand.  1 per cent. cost of plant.	$\begin{array}{c} .26 \\ .50 \\ \end{array}$
Total	9.31
Would yield— 3 proof-gallons methylated alcohol, at 50 cents 10.5 proof-gallons demethylated alcohol, at \$1	1.50 10.50 12.00
Profit	2, 69

This profit would be further increased by the additional amount of methylated alcohol recovered from the saturated bone-black by distillation. The bone-black can

be recharred and used over again, as is done in sugar refineries.

Wood charcoal may be used instead of bone-black, at a less cost for material, but in this case the filtration would have to be done under considerable pressure, as the finely-ground charcoal clogs the filter so as to make filtration under atmospheric pressure exceedingly slow and nearly impossible if the layer of charcoal is of any considerable thickness. Besides, the charcoal contains resins and other extractive organic matters which the alcohol dissolves in passing through it and imparts a decided taste to the filtrate. Bone-black, on the other hand, contains less organic matter, and so yields a more nearly tasteless product.

# LIST OF EXHIBITS.

	Accompanying this report are the following samples:	
		Per cent. alcohol by volume.
1.	Commercial 95 per cent. ethyl alcohol, specific gravity .823, at 62° F. = 8224, at 60° F.	93, 40
2.	Commercial methyl alcohol, wood naphtha, specific gravity .841, at 61° F. = .8407, at 60° F.	87.85
3.	Methylated alcohol 90 per cent. ethyl + 10 per cent. methyl alcohols, specific gravity .825, at 62° F. = .8244, at 60° F.	92.75

Artificial liquors.

Bourbon whisky, marked T, W, X, Y, and Z. Rye whisky, marked R. Cognac brandy, marked 8.

The ethyl alcohol used in these experiments would not pass the four principal tests called for by the Pharmacopæia, viz., with sulphuric acid, with caustic potash, with permanganate of potash, and with nitrate of silver, and it is very doubtful if any commercial alcohol would, because unobjectionable and unavoidable organic matter is absorbed from the barrels and the dust of refineries, etc. These tests are complementary and are directed to organic matters that are readily reduced by these re-

On applying these reagents to the middle distillates of the last experiment they were found to compare favorably with some redistilled cologne spirits taken for com-

The best test is undoubtedly that of excessive dilution with water and noting the odor and taste. This simple treatment seems to intensify the odor and taste of the impurity such as methyl or fusel oil.

Washington, September 15, 1888.

The necessary permission to publish having been obtained, the following letter from the Assistant Commissioner of Inland Revenue, of Ottawa, Canada, on the use of methylated alcohol, is herewith submitted for your consideration:

> DEPARTMENT OF INLAND REVENUE, Ottawa, October 25, 1888.

DEAR SIR: I beg to acknowledge the receipt of your communication of the 22d instant, calling my attention to the fact that the statement promised in my letter of the 19th ultimo had not been received. I certainly owe you an apology for the delay, and I now beg to express my regret at not being able to comply with your wishes at an earlier date, but owing to the absence of the Commissioner in British Columbia and the Northwest, my time has been so fully occupied that the matter escaped my notice.

I will now, however, endeavor to give you as much information as possible on the

subject you wrote about, viz., demethylated alcohol.

I will first inform you that this Department permitted, for many years, the manufacture in bond of methylated spirits, the ingredients used being wood naphtha and grain alcohol in the following proportions, viz, 12 gallons of wood naphtha to 100 gallons of grain alcohol, not less than 60. O. P. by Syke's hydrometer. The alcohol was used in bond (free of duty), and the mixing was conducted under the supervision of an officer of this Department, and the methylated spirits produced paid an Excise duty of 15 cents per proof gallon.

The Department was subsequently awakened to the fact that this methylated spirits was capable of being demethylated and rendered potable, thus causing a serious

loss to the revenue of the country.

The Department feeling satisfied, from the fact that alcohol vaporizes at from  $175^\circ$  to  $180^\circ$  F., and wood naphtha at about  $144^\circ$ , that demethylization was possible, repealed the provisions of the law permitting the manufacture of methylated spirits in bond, and undertook to supply the trade with a substitute therefor. This substitute is composed of a methylated spirit consisting of 25 per cent. of wood naphtha and 75 per cent. of grain alcohol, which is supplied only to varnish manufacturers and other persons engaged in the mechanical arts. The persons using this grade of methylated spirits give bonds in the sum of \$2,000 that such spirits shall be used solely for the purposes mentioned, and in the premises described, in their application. An inferior grade, consisting of equal parts of wood naphtha and grain alcohol, is supplied the trade without any restrictions as to its use.

Dr. Squibb, of Brooklyn, informed me in January last that from his own experience it was quite possible to free this methylated spirits from methyl, and make it quite clean and sweet and fit for potable purposes. This could be done, he asserted, by means of distillation, using a column, instead of an ordinary, still. He stated that the cost of demethylating was very trifling. I would suggest that you consult that gentleman, as the opinion of so eminent a chemist is of the greatest value.

I am not aware that Mr. Macfarlane has made any experiments as to demethylating alcohol, but will refer your letter to him in order that he may communicate with you

on the subject.

That the spirits can be demethylated is beyond doubt, and that it has been used for potable purposes in this Country is clearly evident, and further, that in many instances it has been used in the preparation of medical prescriptions, which must be injurious to those using such medicines.

I note your kind offer to send me a report of the results of your experiments on de-

methylating alcohol, and shall be grateful to you for doing so.

Mr. Macfarlane will be home in a week or ten days, when your letter will be handed him.

I remain, dear sir, yours, respectfully,

W. J. GERALD. Assistant Commissioner.

Hon. EDGAR RICHARDS. Microscopist, Office of Internal Revenue. Treasury Department, Washington, D. C.

### SPIRITS LOST BY CASUALTY IN WAREHOUSE DURING THE YEAR.

STATEMENT OF THE QUANTITY OF SPIRITS LOST BY CASUALTY IN DISTILLERY Warehouses during the Year ended June 30, 1888.

	Total	 21, 195

### SPIRITS LOST BY FIRE IN WAREHOUSES FOR LAST SIXTEEN YEARS.

The following statement shows the quantity of spirits lost in distillery warehouses by fire during each of the last sixteen calendar years. As it shows also the stock of spirits in warehouse at the close of each of the fiscal years 1872 to 1887, both inclusive, the percentage of loss on the stock held may be readily computed.

### [Quantities in taxable gallons.]

Years.	In bond June 30. Total loss.		Years.	In bond June 30.	Total loss.	
1872 1873 1874 1875 1876 1877 1878 1879 1880	13, 367, 253 12, 984, 896 13, 258, 794 14, 088, 773	28, 399 9, 901 124, 602 81, 493 99, 102 7, 487 29, 913 2, 465 14, 620	1881 1882 1883 1884 1885 1886 1886 1887 Aggregate	64, 648, 111 80, 862, 645 80, 499, 998 63, 502, 551 54, 724, 916 58, 096, 620 65, 145, 269 619, 594, 723	198, 251 175, 216 396, 299 416, 609 109, 030 181, 198 112, 722 1, 987, 307	

Average loss, .33 of 1 per cent.

The loss during the six months ended June 30, 1888, was only 1,058 gallons, the stock on hand June 30, 1888, being 61,030,236 gallons.

### SPIRITS REMAINING IN WAREHOUSES AT THE CLOSE OF THE YEAR.

The following table shows the quantity of spirits remaining in distillery warehouses at the close of each of the twenty fiscal years during which spirits have been stored in such warehouses.

It will be observed that the quantity in warehouse June 30, 1879, is more than five million gallons greater than that in warehouse June 30, 1878; also that subsequently the quantity increased rapidly from year to year until June 30, 1882, since which date the quantity has been reduced so as to average during the past five years a little more than sixty million gallons. The causes of these fluctuations have been pointed out in previous annual reports of this office, the tendency of legislation since 1871 having been to encourage the deposit of spirits in such warehouses.

The acts of Congress believed to have had such a tendency are the

internal revenue laws passed on the following dates, viz:

June 6, 1872, raising the tax to 70 cents per gallon; March 3, 1875, raising the tax to 90 cents per gallon; March 28, 1878, (joint resolution) extending the bonded period to three years; May 28, 1880, authorizing allowance for loss in warehouse, etc.:

Date.	Quantity.	Date.	Quantity.
Remaining June 30, 1869	11, 671, 886 6, 744, 360 10, 103, 392 14, 650, 148 15, 575, 224 13, 179, 596 12, 595, 850 13, 091, 773	Remaining June 30, 1879	Gallons. 19, 212, 470 31, 363, 869 64, 648, 111 89, 962, 645 80, 499, 993 63, 502, 551 54, 724, 916 58, 096, 620 65, 145, 269 61, 033, 018

# NOTE.

The quantity of spirits, tax or duty paid, held by wholesale dealers and rectifiers October 1, 1888, was 14,828,371 gallons, the quantity so held October 1, 1887, being 14,614,959 gallons. The quantity of domestic and foreign spirits, respectively, and the aggregate held October 1 each year from 1878 to 1888, both inclusive, are as follows:

Year.	Domestic.	Foreign.	Total.
378	Proof gallons. 14, 480, 393		Proof gallons.
379 380	13, 014, 112	593, 506	13, 607, 61 12, 293, 68

Of the 864,704 gallons grape brandy bonded during the fiscal year, 535,583 gallons were produced in the first district of California, 318,616 gallons in the fourth district of California, 10,089 gallons in the tenth district of Ohio, and 416 gallons in the fifth district of New Jersey.

The total product bonded was 191,094 gallons more than in the previous year; the amount removed, tax paid, was 60,735 gallons more, and the loss resulting from regauge under act of May 28, 1880, was 5,813 gallons more than in 1887.

Of the quantity in warehouses June 30, 1888, 535,006 gallons were in the following warehouses in the first district of California:

	Gallons.
No. 1. Bode & Haslett	187, 320
No. 2. Juan Bernard	
No. 3. George C. Carlon	15,052
No. 4. James M. Tieruan	67, 348
No. 5. Snyder, Foss & Co	31, 397

And 310,055 gallons were in the following warehouses in the fourth

district of California:
Gallons.
No. 1. Thomas J. Clunie       65, 390         No. 2. Luther W. Burris       55, 818
No. 3. Frank Pellet
No. 4. John Tivnen       20,411         No. 5. Henry B. Shackelford       81,580
No. 6. Albert E. Hatt, sr
And 106,218 gallons were in the following warehouse in the second district of New York:
Mo. 1. J. D. W. Sherman
And 11,796 gallons were in the following warehouse in the first dis-
Trict of Illinois:  No. 8. Hiram Sibley
No. 8. Hiram Sibley
And 9,797 gallons were in the following warehouse in the tenth district of Ohio:
No. 1. Hugo F. Engels
And 1,458 gallons were in the following warehouse in the fourth district of North Carolina:
Gallons.
No. 1. Benj. R. Taylor
DISTILLED SPIRITS IN THE UNITED STATES OCTOBER 1, 1888.
The quantity of distilled spirits in the United States, except what may be in customs bonded warehouses, on the 1st day of October, 1888, was 93,712,919 gallons, this quantity being distributed as follows:
Gallons.
In distillery and special bonded warehouses 53, 596, 498 In hands of wholesale liquor dealers 14, 828, 371 In hands of retail liquor dealers 25, 288, 050
In distillery and special bonded warehouses       53,596,498         In hands of wholesale liquor dealers       14,828,371         In hands of retail liquor dealers       25,288,050
In distillery and special bonded warehouses 53, 596, 498 In hands of wholesale liquor dealers 14, 828, 371 In hands of retail liquor dealers 25, 288, 050  Total 93,712, 919 In making the above computation the average stock of each retail liquor dealer in the United States is estimated at 150 gallons.

#### OLEOMARGARINE.

The following statements, showing operations under the act of August 2, 1886, defining butter and imposing a tax upon and regulating the manufacture, sale, importation, and exportation of oleomargarine, are the first submitted which cover a full fiscal year.

The statements comprise—

First. A summary of operations at oleomargarine manufactories during the fiscal year ended June 30, 1888; also a summary of such operations by collection districts from November 1, 1886, to June 30, 1888, and by months covering the same period; also a statement of the quantity of oleomargarine in the United States June 30, 1888.

Second. A statement of the receipts from all classes of taxes imposed

by the oleomargarine law for the year ended June 30, 1888.

Third. A statement, by States and Territories and in aggregate, of all persons who paid taxes as manufacturers of and dealers in oleomargarine; also in aggregate of all persons who paid oleomargarine special taxes prior to May 1, 1887.

Fourth. A statement by districts of the number of retail dealers in oleomargarine doing business in April, 1887, and April, 1888, re-

spectively.

Fifth. A statement as to the location of oleomargarine manufactories in April, 1888; also of wholesale dealers in oleomargarine at that time.

Sixth. A statement of production and use of oleo oil during the year ended June 30, 1888.

Seventh. The report of the analytical chemist.

Eighth. The report of the microscopist.

Ninth. A list of laws relating to oleomargarine now in force in European countries.

Tenth. Copies of laws relating to oleomargarine now in force in Eu-

ropean countries.

Eleventh. Copies of letters and reports as to countries having no special laws on the subject of oleomargarine, but having general laws relative to food adulterations.

It appears from the subjoined tables that the average monthly production of oleomargarine during the fiscal year was 2,860,460 pounds, and that the average monthly production for the twenty months during which the law was in operation was 2,801,007 pounds; a slight increase for the year over that for the twenty months, due to the comparatively small quantity per month, 2,711,828 pounds, produced during the eightmonths ended June 30, 1887. It also appears that the average monthly quantity withdrawn from factories upon payment of the tax was as follows:

	Pounds.
During the fiscal year	2,707,430
During the twenty months ended June 30, 1888	2,661,636

The quantity withdrawn monthly for export also appears to have been as follows:

	Pounds.
During the fiscal year	140,516
During the twenty months ended June 30, 1888	120,536

As in the case of the production, there appears to have been a small increase in the average removals upon payment of the tax and for export during the fiscal year as compared with the average for the whole

period. The demand for consumption at home and abroad is increas-

ing.

The month in which the greatest quantity is produced and withdrawn is the month of March, the quantity produced and withdrawn in March, 1887, being in excess of 3,500,000 pounds; the quantity produced in March, 1888, being in excess of 3,900,000 pounds, and the quantity withdrawn tax-paid in March, 1888, being in excess of 3,800,000 pounds.

The quantity produced and withdrawn was the lowest during July, 1887, the quantity then produced being a little more and the quantity

withdrawn being a little less than 1,200,000 pounds.

While there was an increase in the production and distribution of oleomargarine during the fiscal year ended June 30, 1888, there was a falling off in the number of persons engaged in the business.

The number of persons in business during April, 1887, and April,

1888, was as follows:

	April, 1887.	April, 1888.
Manufacturers Wholesale dealers Retail dealers	236	29 154 2, 279
Total	4, 197	3, 462

The falling off in the number of special-tax payers is due in a measure to the fact that manufacturers are dealing more directly with consumers, and this state of affairs is in turn doubtless largely due to prohibitory laws in populous States, which have driven out the manufacturers of and dealers in oleomargarine. But the principal cause of the falling off in the number of dealers, especially of retail dealers, is believed to be the extremely high rates of special taxes imposed by the law. (See page CXXXII of my report for the year ended June 30, 1887.) crease in the number of special-tax payers has, however, been a subject of great solicitude to this office, as it may be partly due to fraud. The statement as to the production and use of oleo oil shows that more than 27,000,000 pounds, out of a product during the year of 69,000,000 pounds of this substance, invented for the sole purpose of being used in the manufacture of a butter substitute, was neither exported nor used, as shown by reports received at this office, in the manufacture of oleomargarine. The question as to what actually becomes of this material will never be satisfactorily answered until the manufacturers thereof are compelled to account for it with the same particularity as they are required to account for the article subject to tax, and I renew the recommendations on this subject made in my last annual It is doubtless used in the manufacture of some food product, such, for instance, as cheese. It can not be economically used as a lubricant, in the face of the fact that its market price is nearly double the price of tallow.

The examination in laboratories of articles sold as butter, but suspected of being oleomargarine, has been found inadequate to meet the demands of a service covering a territory whose area is 3,611,849 square miles. Accordingly efforts have been made to secure reliable tests, which can be used on the spot where the suspected article is found. The simplest chemical test is doubtless to be obtained through the use of an instrument which will determine the specific gravity of the suspected fat; such, for instance, as the instrument described and recom-

mended by the analytical chemist of this Bureau in his report of October 10, 1887, published on pages CXLIV and CXLV of my report for the year ended June 30, 1887, and further described in his report of October 10, 1888, herewith. As it is necessary, however, in applying the specific gravity test to any suspected butter to melt the butter and carefully separate the fat from the other constituents, considerable delay and nice manipulation with the aid of conveniences not ordinarily at hand on the premises of the dealer are involved, and this office has not yet deemed it advisable to use such an instrument outside of the chemical laboratory. No such objection occurs in the use of a microscope with polarizing It is true that in some instances a melted butter may, in attachments. the view of the inexperienced observer, be classed as oleomargarine, but such instances are rare and readily remedied by a chemical analysis. On the other hand the instrument in the hands of an instructed person. of average intelligence will almost infallibly indicate pure unmelted Under the circumstances, therefore, this office has concluded to adopt a cheap and convenient form of microscope with polarizing attachments with which to make examinations of suspected butter in all parts of the country. The details of the plan under which the instrument has already been used in the principal cities of the United States, and the plan proposed for its continued use in the future, are fully set forth in the report of the microscopist of this office submitted It will be observed from this report that during a period of about two months over eleven thousand samples, representing the stock of over six thousand five hundred different dealers, were examined and reported upon. The great success of this undertaking, which is regarded as the greatest practical triumph of a scientific nature that has yet attended the administration of the oleomargarine law, has induced me to provide similar instruments to be used hereafter in all the collection districts of the United States.

In my report for the fiscal year ended June 30, 1887, considerable space was given to the consideration of the oleomargarine law not only as a revenue measure, but also as a measure intended to protect the people from imposition in the matter of an important article of food. Other views of the subject were also presented, and certain laws enacted by European countries were quoted as affording valuable suggestions in case it is proposed to modify the law, so as to render it more effectual either as a revenue measure, a protective measure, a sanitary measure, or as a prohibitory measure.

It was in view of their value in connection with an intelligent consideration of the subject that the copies of the most important of these European laws submitted herewith were procured. These laws and the regulations made pursuant thereto, as well as the reports as to countries not having special laws relating to oleomargarine, were procured through the courtesy of the Department of State, the representatives of the United States at the capitals of said countries, and of the representatives of the Governments themselves.

In their anxiety to supply this office with every statutory and regulatory provision relating to the subject, several representatives of foreign Governments have forwarded laws and regulations for the prevention of the adulteration of food and drugs. It is anticipated that these laws and regulations will prove of great value in the administration of the act of Congress approved by the President October 12, 1888.

I take great pleasure in acknowledging the receipt of these evidences of friendliness to this country, and of interest in matters which greatly concern the physical well-being of the whole human family.

The following table shows the quantity of oleomargarine in pounds, at 2 cents tax, produced at manufactories during the fiscal year ended June 30, 1888, the quantity withdrawn therefrom during the year, and the stock of oleomargarine remaining in factories June 30, 1888:

SUMMARY OF OPERATIONS AT OLEOMARGARINE MANUFACTORIES DURING THE FISCAL YEAR ENDED JUNE 30, 1888.

The marked falling off in the number of samples submitted, in comparison with that of last year, is very probably in a great measure to be attributed to the salutary effect the law and the convictions procured under it have had upon the "butter mixers;" also in part to the fact that the past year had been a very favorable one for dairy products, making the price of pure butter too low to offer sufficient inducements to run the risks of adulteration. Another reason may be that the revenue collectors and agents have not as yet become sufficiently expert with the microscopic instrument adopted by the Bureau for preliminary examinations.

In support of my suggestion in last year's report with regard to Dr. Koenig's specific gravity test, for preliminary examinations, I have translated part of an article on the subject by Professor Sell, of the Berlin University, and a member of the German imperial board of health, and take the liberty to annex it hereto as part of my report.

determining the specific gravity of butter fat at  $100^\circ$  C., after koenig's method, as a basis for regulating and controlling traffic.*

There can hardly be any doubt in the minds of those having directed their attention to the present public discussion relative to the traffic in milk, butter, and its artificial substitutes as to the fact that sooner or later it will become incumbent upon the competent authorities of the different countries within the pale of civilization to require of their experts the formulation of certain regulations, based upon the rules of science, for the guidance of executive officers, supplying the latter with the means of controlling the traffic in question in accordance with late experiences, and to the end of insuring a legitimate and honest basis for the same.

In view of this, the advisability of giving especial attention to Koenig's method for determining the specific gravity of fats at a temperature of 100° C., and regarding its availability for the object in question, will scarcely be disputed by experts desirous of supplanting that which may be good and useful by that which proves to be better, and who are prepared to aid, with the scientific material at hand, in effectively opposing certain undeniable evils of the traffic as now practiced.

^{*} Ueber Kunstbutter, Dr. Eugen Sell, Berlin, 1886.

Seven years have elapsed since this process was first made known by its originator, and during that period it has been repeatedly tested by different parties. The good results obtained through the experiments by many competent chemists of acknowledged authority, and the favorable opinions given by them regarding this process, have been enumerated on page 26 of this book, in the article on artificial butter, etc.

The board of health, acting solely upon its own experience, without hesitancy fully

concurred in these opinions.

The board, immediately upon publication of the process by its originator, took steps for testing the same by making numerous experiments with reference to its value. For the purpose of entering upon these experiments it was primarily necessary to obtain data as to the specific gravity of pure milk, butter, beef fat, and lard; the necessary material for which was partly personally prepared and partly procured from such reliable sources that left no doubt as to its purity.

The results, which were subsequently fully confirmed by a further series of tests, are given in the following (Table I):

TABLE I.

*	Specific gravity at	100° C. of-	
Butter.	Beef fat.	Lard.	Oleomargarine.
0. 867 to 0. 868 0. 863 0. 867 0. 867 0. 867 0. 867 0. 867 0. 866 0. 868 0. 867 0. 866 0. 866	0. 859 0. 859 0. 859 0. 860 0. 860 0. 859 0. 860 0. 859 0. 860 0. 860 0. 860 0. 860	0. 860 to 0. 861 0. 860 0. 861 0. 860 0. 860 to 0. 861 0. 860 to 0. 861	0. 859 0. 859 0. 860 0. 860 0. 859

By these figures it is shown, and they are in accordance with other data in our possession, that the specific gravity of butter fat fluctuates between 0.866 and 0.868, and it may be here incidentally mentioned that the figures 0.865 were not found in the above and other series of tests that were made by the health authorities.

The figures relating to beef fat and hog's lard agree in the main with observations

made by others.

As to the samples of oleomargarine obtained directly from the press, the specific gravity of which at 100° C. no data was found in the current literature on the subject, it will be seen that there is no deviation from that of beef fat.

Mixtures were then made of pure butter with German artificial butter, composed of oleomargarine, milk, and peanut oil, and of butter with beef fat and lard, respect-The component parts were subjected to Koenig's method at 100° C., showing the following results:

The milk butter	0.867 to 0.868
The artificial butter	0.861
The beef fat	0.859
The hog's lard	0.860

The specific gravity of different mixtures at 100° C. was found as compiled in the following table, viz:

LOUIS C. STARKEL. Analytical Chemist, Internal Revenue Bureau.

Hon. JOSEPH S. MILLER, Commissioner of Internal Revenue, Washington, D. C.

## REPORT OF THE MICROSCOPIST.

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE. Washington, July 10, 1888.

Sir: I have the honor to submit my first annual report of the work done in the

Inducatory since July 1, 1887.

During the past year 141 samples have been received and analyzed. Of this number 39 were substances submitted by collectors of internal revenue for your decision under sections 14 and 15 of the act of August 2, 1886; 24 of which proved, on analysis, to be eleomargarine, 1 cleo cil, and the remainder butter. From twelve of the largest cleomargarine factories samples were procured of the different ingredients used, with the exception of salt, milk, cream, and annotto or other coloring matter, and the different grades of oleomargarine made by them. These samples consisted of 9 creamery butters, 12 neutral lards, 12 oleo oils, 4 cotton-seed oils, 3 sesame oils, 16 oleomargarines, 8 dairy butterines, and 6 creamery butterines; also, 5 samples of annotto were sent; a total of 75 samples. In addition, 7 more samples of cotton-seed oil, 2 of cotton-seed stearin, and 6 of an artificial food-product were procured from other parties. A sample of creamery butter and dairy butterine were purchased in the local market, for comparison. Ten miscellaneous samples, consisting of beers, whiskies, etc., were likewise analyzed.

METHODS FOR THE DETERMINATION OF BUTTER AND BUTTER SUBSTITUTES.

The examination of a fat may conveniently be divided into two parts:

(1) For the determination of its physical properties; and(2) For the determination of its chemical properties.

## Physical properties.

The melting point of a fat was at one time considered quite an essential determination to establish the difference between a butter and an oleomargarine, but it did not take the manufacturers of the artificial product long to produce an admixture which would melt at the same temperature as genuine butter. While the differences between the melting points of the various ingredients used for the production of artificial butter and genuine butter are noticeable, these ingredients are not used by themselves for butter. Consequently this method has fallen into disuse.

The microscopical examination of the fresh sample is purely a negative test.

is to say, that a sample of fresh genuine butter, when examined under the microscope with the aid of polarized light, and with or without the employment of a selenite plate to color the field of vision, gives a perfectly homogeneous field.

The difference between a fresh unmelted butter and oleomargarine—which is always made in whole or in part of melted fats—is readily and quickly detected by this means, owing to the bright white particles with which the whole field is illuminated when melted fats are present. It is true that genuine butters are sometimes accidentally melted, so that while the presence of melted fat is not a sure indication that the article is oleomargarine, their entire absence in the article found in the markets removed from the place of manufacture is a very strong indication that it is

Boiled or "ladle-packed" butter, made from old, rancid butter, melted and churned with a small quantity of milk, and very rancid butter, may sometimes be mistaken for oleomargarine, but by having a slide of oleomargarine or butterine ready for comparison, the difference is readily perceived. Such inspection is quickly and easily performed without previous preparation of the sample, and a large number of samples can be examined in a short time. The hard fats, palmitin and stearin, exist in a state of solution in the globules of a fresh sample of butter and in the fats of living animals. Upon being melted and cooled these hard fats separate out in the form of accoular crystals, which polarize light, owing to their being double-refracting bodies. The use of the microscope for the purpose of observing the presence of melted fats in a fresh sample was first brought to the attention of chemists in 1873 in an article "On Butter," by Dr. J. Campbell Brown, republished in the Chemical News, vol. 28, page 1, from the Liverpool and Manchester Medical and Surgical Reports, 1873, wherein he described the appearance of the characteristic globules of fat, the granular masses of curd, and the cubical crystals of salt in genuine butter, the presence of stearic acid, stearin, or palmitin being recognized by single fusiform crystals or star-like aggregations of acicular crystals.

The specific gravity of a body is the weight of that body as compared with the weight of an equal volume of another body assumed as the standard. For solids and liquids this standard is distilled water. All determinations are made at known temperatures, generally either 15° C., or 15.5° C. (60° F.). However, on this point there is no uniformity, and results are stated, water at 4° C.—the point of maximum density—at 15° C., at 15.5° C., at 37.8° C., (100° F.), at 40° C., or at 100° C., the boiling point of water, being taken as unity by different analysts.

The higher temperatures are generally used for substances like fats, which are liquid at these and solid at the lower temperatures. This is apt to cause confusion in the way the results are stated, the "actual density," as it is called, being preferable; here the substance under examination is compared with the weight of an equal volume of water at the temperature at which the determination is made. The result as given in Tables I and II, page CLIII, Annual Report of the Commissioner of Internal Revenue, 1887, and in the tables in this report, of the different specific gravities, are the actual densities at the temperature specified. In Table III, page CLIV (report above cited), the results are stated with water at 15.5° C. and 37.8° C. as unity. For fats the determination should be carefully performed in specific gravity bottles, furnished with a delicate thermometer stopper, as giving the most accurate results. The use of the Westphale balance for this determination, made at the temperature of boiling water, though the temperature of the fats melted in a water bath rarely exceeds 98° C., may also be recommended.

When the specific gravity is expressed at the "actual density" at 40° C. the density of pure butter-fat ranges from .909 to .913, being rarely below .911; butterine, .904 to 908; oleomargarine, 903 to 905; oleo-oil, 902 to 903; neutral lard, 903 to 904; cotton-seed oil, 911 to 914; and sesame oil, 911. Any admixture of cotton-seed or sesame oil tends to increase the density of oleomargarine, but there is, of course, a practical limit to their employment as ingredients of artificial butter. It is evident that the determination of the specific gravity of the melted fat affords a useful indication as to whether it is butter or not, and a means of simply estimating the proportion of foreign fat contained in adulterated samples. The determination of the specific gravity alone is not sufficiently reliable to justify the positive condemnation of a sample as adulterated, or even to prove it to be approximately genuine, but taken in connection with the results of the chemical examination, it helps to clinch the whole

matter together and allows of a positive judgment being pronounced.

## Chemical properties.

The recognition of foreign fats in butter is dependent on the peculiar constitution of genuine butter-fats, and it is therefore necessary to separate the water, salt, curd, etc., from the fatty matter of the sample to obtain it in a fit condition for further For this purpose the sample is heated in a suitable vessel till the fat is melted and the curd and salt have settled to the bottom. The fat is then filtered, and when thus obtained is ready for the chemical determinations.

Numerous methods of examining butter for foreign fats have been devised, but many are worthless for their intended purpose, unless the sophistication has been of the grossest character. The three methods that have received the most support from analysts and yielded the best and most uniform results are those known as Reichert's, Koettstorfer's, and Hehner and Angel's. These are based on the more or less complete quantitative determination, by treatment with a caustic alkali, either of the soluble and insoluble fatty acids together, or of either of the classes separately.

Hehner and Angel were the first, in 1874, to devise a reliable method for analyzing

butter fats. Their original process involved only the estimation of the insoluble fatty acids; and although it is not as capable of giving a sharp distinction between genuine and adulterated butter as some of the latter modifications, yet in cases of gross adulteration, or the almost complete absence of genuine butter-fat, it affords a means of arriving at a perfectly reliable result. It is, however, a lengthy operation, involving much manipulation, and consequently is liable to errors, the tendency being toward loss of the insoluble acids.

It may briefly be described as follows: A certain quantity of the fat is weighed out and saponified by the addition of an alcoholic solution of caustic potash with the aid of heat; the excess of alcohol is driven off by evaporation; the resulting soap is dissolved in water and decomposed by the addition of a dilute mineral acid, and the insoluble fatty acids are collected on a filter and well washed with boiling water until all the soluble (volatile) fatty acids are removed. The very readily soluble butyric acid being first removed, and afterwards the small amount of fatty acids which are soluble with more difficulty, and which, therefore, remain, at first, mixed with the insoluble acids; the soluble acids are then determined in the wash water with a standard solution of caustic alkali; and finally the insoluble acids are dried and weighed. Ordinary fats, consisting of mixtures of stearin, palmitin, and olein yield, on saponification, fully 95 per cent. of fatty acids, of which all but a small quantity are insoluble in water. Butter-fat, owing to the larger proportion of soluble (volatile) fatty acids, which range from 4.5 per cent. to nearly 7 per cent., yields from 86.5 per cent. to 89 per cent. of insoluble fatty acids. A sample ought scarcely to be considered adulterated unless the insoluble acids exceed 89.5 per cent. This method yields trustworthy and concordant results only when the conditions of operations are rigorously the same, and different observers may get somewhat different results with the same sample. The result is to some extent dependent upon the method of washing, and the quantity and temperature of the water employed. It may likewise be influenced by the mode of drying of the washed fatty acids, as by long continued heating their weight is liable to increase owing to oxidation.

For these reasons, as well as the length of time demanded for a determination, this method has generally been abandoned in favor of the more reliable and quicker pro-

cedure of the Reichert process.

Koettstorfer's method (saponification equivalent).—This is based upon the fact that butter-fat contains a larger proportion of the fatty acids that have a low-combining molecular weight than most of the other mixtures of glycerides which may be used for butter substitutes, and consequently requires a greater amount of an alkali to effect saponification. A certain quantity of the filtered fat is weighed out and saponified by the addition of an alcoholic solution of caustic potash with the aid of heat

in a closed bottle.

When completely saponified the contents of the bottle are cooled, an indicator, such as phenol phthalein, added, and the amount of alkali neutralized ascertained The results are expressed in the by the addition of a standard solution of acid. number of milligrams of the fat which would be decomposed by one cubic centimeter of a normal solution of any alkali, and are conveniently designated saponification equivalents of the fat. The expression of the neutralizing power of fats in saponification equivalents has the advantage of being applicable to the results of saponification by any alkali, whilst the percentage of caustic potash required for complete saponification is not directly comparable with the figures obtained when soda is the alkali employed. This process is excellent for the rapid preliminary examination of butter and butter substitutes. Butter may vary from 235 to 269; lard, tallow, and other fats, used for butter substitutes, give from 270 to 290 as the saponification equivalents. Cocoa-nut oil, however, gives results slightly below genuine butter, and it is quite possible to prepare a mixture of this oil and oleomargarine that will give results almost identical with that afforded by pure butter. (Moore in Chemical News, December, 1884.) Its presence would be shown by the other tests, and in all probability this oil is not used for this purpose, certainly not in any of the oleomargarine

factories in this country, as its strong taste and smell would readily be detected. Reicher's method.—In this process advantage is taken of the facts that the quantity of soluble acids in a mixture of fats bears a direct relation to the quantity of genuine butter present, and that if the aqueous solution of a saponified fat is decomposed by an acid and heated to boiling, the greater portion of the soluble acids escapes with

the watery vapors, and can be collected and determined in the distillate.

This process is arbitrary in every detail, as no attempt is made to distill all the fatty acids over, but taking a definite amount of the melted and filtered fat—2.5 grams—every time, saponifying it with the same quantities of caustic potash and alcohol, driving off the alcohol, diluting and acidifying with the same quantities of water and acid, boiling and taking the same quantity of distillate, a sufficient uniformity of results can be obtained on which to base an opinion. Its reliability has been confirmed by those who have had occasion to use it, and it is almost universally adopted as the best single test for distinguishing butter from other fats.

adopted as the best single test for distinguishing butter from other fats.

Reichert concluded from his experiments that 2.5 grams of genuine butter-fat require, on an average, 14 cubic centimeters of decinormal alkali to neutralize the volatile fatty acids, and his results have been substantially verified by very numerous experiments of many different chemists. Investigation has led to the general adoption of 12. cubic centimeters as the minimum for butter made on a large scale.

In this as well as the other two methods, blank determinations containing no fat, but simply the chemicals used, should always be carried on simultaneously with the analysis of the fat under examination and the proper correction made for any acidity developed in the chemicals by the manipulation performed. It is easy to obtain results from known mixtures of butter and oleo-oil, neutral lard, etc., that will agree closely with theory, where the constituents employed have been determined by preliminary experiment, but in the case of an unknown sample, where the separate examination of the constituents is impossible, a slight admixture of foreign fats might be practiced and escape detection by the chemical results. On a commercial scale, however, this admixture of foreign fats would be practiced with larger amounts than 10 per cent. or 15 per cent. to be profitable. The best creamery butterine, put up by one of the largest factories in this country, whose analysis is given in Table II, p. CLIX, is readily distinguishable from genuine butter. In the lower grades of eleomargarine, containing the minimum quantity of milk and cream, the results of the analysis approach more and more to the composition of the predominating constituent.

Mr. A. H. Allen, president of the Society of Public Analysts, in his testimony before the English Select Committee on the Butter Substitutes Bill, stated that a very superior butter would stand a certain admixture with oleomargarine which analysis would not be able to detect. That under favorable conditions from 5 to 8 per cent, of such an admixture could be detected, but there might exist instances where as much as 15 to 20 per cent. of oleomargarine were added to the butter without the analyst being able to definitely state it as a fact with sufficient certainty for a court. That the differences of specific gravity, of the percentages of the soluble and insoluble acids (Hebner and Angel's method), and the difference of the melting points would fail to detect as much as 33 to 40 per cent. of the adulteration, as they do not go far enough, and the two tests on which he would rely to detect small admixtures of foreign fats are those known as Koettstorfer's and Reichert's methods.

In adopting and using two physical and two chemical methods of examination of the samples of butter and oleomargarine received, I have employed the increscopic and specific gravity determinations and followed Koettstorfer's and Reichert's methods as giving the most reliable results, with the least manipulation and consequent source of errors, and in the shortest time. My object being to determine the nature of the substance under examination with as little delay as possible. (For details see Bulletin No. 16, Division of Chemistry, Department Agriculture, 1887, pages 68 to 72. Methods of analysis for dairy products adopted by the Association of Official Agricultural Chemists.) Each sample was analyzed in quadruplicate, by each method, and the necessary blank determination carried on simultaneously.

#### TABLES OF ANALYSES.

The following tables give the analyses of the various samples of butter and oleomargarine received from collectors of internal revenue, together with the different ingredients used by twelve of the largest factories and the various grades of oleomargarine made in them. These latter samples were received directly from the factories, together with a statement of the various proportions in which the manufacturers used the different ingredients to obtain the resulting product. I propose during the coming year to continue this investigation until samples have been received from all the factories. In addition to the chemical analysis a microscopical examination was made of the solid fats used as ingredients, in order to ascertain whether they contained any harmful organisms, but none were found.

Table III shows the range in composition of the various samples of oleomargarine

and of the ingredients used in the twelve factories.

Several samples having been received of an artificial food product, composed principally of the beef stearin left after pressing out the oleo oil in the manufacture of that product and cotton-seed oil, for analysis, I collected from various sources samples of cotton-seed oil, both crude and refined, and some cotton-seed stearin. Through the courtesy of one of the large firms in Chicago, samples of refined oil were blown for some time, and the resulting product together with the original oil was sent here for analysis. The results obtained are given in the following table:

* Not enough for analysis.

The effect of the prolonged oxidation is to raise the specific gravity of the oil and to lower its percentage of insoluble acid, as shown by the saponification equivalent and Reichert's method. These blown oils were thick and had quite an agreeable smell and nutty flavor. It is very questionable whether they could be used in the manufacture of oleomargarine.

#### AMERICAN METHODS OF MANUFACTURING OLEOMARGARINE.

In the following ingredients enter into the manufacture of oleomargarine as pursued in this country: Oleo oil, neutral lard, some liquid vegetable oil, as cottou seed, sesame, or peanut; butter, in the higher grades, cream and milk, together with salt, and annotto or other coloring matter. A brief statement of the general system pursued in the preparation of the ingredients, and of the finished products, may not be uninteresting. Very few of the eleomargarine manufacturers make their own eleo oil or neutral lard, and none of them refine or crush the vegetable oils used in the lower grades of eleomargarine, but buy them in the open market, these materials being now well established commercial products.

The manufacture of olco oil is generally carried on in connection with the large slaughter and packing houses situated in or near the principal cities, where every effort is made to utilize all portions of the cattle slaughtered. The cant and suct fats are removed from the freshly slaughtered beeves and placed in tanks filled with water at 75° to 85° F., where they remain from two to three hours before being transferred to other tanks containing ice water. By this procedure the fats are gradually deprived of their animal heat and the danger of their becoming sour is avoided, as would happen if the mass of fat was suddenly chilled by being placed directly in ice water. The caul, long or slaughter fat, is kept separate from the suct fat, which

yields an inferior grade of oil.

A Texan steer will yield on an average 65 pounds of caul and suet fats, from which are obtained 28 pounds (43 per cent.) oleo oil, 21 pounds (32 per cent.) oleo stearin, and 12 pounds (20 per cent.) high grade tallow. The chilled fats having been thoroughly washed to remove any blood that may be present, are then sent to the rendering tanks. These are generally in a separate building from the slaughter-house. Fat from cattle slaughtered late in the afternoon is generally kept in the ice-water tanks over night before being rendered; thus no fat is more than twelve or fourteen hours on hand, and the great majority less than four hours, before it is rendered. The fat is fed into choppers or hashers, revolving at a high rate of speed, from which it issues through fine sieves directly into the rendering tank. This is a large steamjacketed upright kettle of 2,000 to 5,000 pounds capacity, provided with revolving blades driven by suitable machinery. Steam being turned on in the jacket, the hashed fat is fed continuously into the tank and kept in motion by the stirrer. When the tank is full and the contents thoroughly nelted, the temperature being 1200 to 155° F., the stirrer is removed, and the water and scrap allowed to settle. The clear fat is drawn off from the top, and run into the graining or seeding cars of 400 to 600 pounds capacity, where it is allowed to chill. The temperature of the room in which these cars are stored is maintained at 85° to 95° F. The fat in chilling naturally solidifies gradually; the hardest variety, the stearin, being the first to form a thin crust on top and sides. In from one to three days the whole contents of the car will be in a semi-solid condition. This fat is free from all "greasy" taste. The car containing the semi-solid fat is taken to the press-room, which is maintained at a temperature somewhat below that of the seeding-room, viz., 70° to 80° F., where it is dipped out by ladle and poured on a stout linen cloth, placed in a suitable depression on a wooden revolving table, and after the cloth is properly folded so as to make a rough bag, it is transferred to the metal plate of a screw-press. A dozen of these cloth bags cover the surface of a plate. When one plate is covered, another one is let down and filled.

When the press is filled, pressure is gradually applied by means of an endless chain revolving a screw; the expressed "oil" constitutes the "oleo-oil." This liquid fat is conducted, still hot, from the press into barrels or cars, where it is allowed to cool. The finished product is nearly colorless, tasteless, and at ordinary temperatures is a soft, granular fat, rather than an oil. The hard fat remaining in the filter bags is removed from the press and forms the beef- or oleo-stearin, which is used either for making "refined lard," by the addition of cotton-seed oil, or sold to the soap and can-

dle makers.

The manufacture of "neutral lard" is conducted by essentially the same machinery and at about the same temperature employed in the manufacture of "oleo-oil." Only the leaf fat of freshly-slaughtered hogs is used. A hog yields from 5 to 15 pounds of leaf lard, averaging 9 pounds; 100 pounds of which yield 90 pounds "neutral." The "neutral," however, is not pressed to extract the stearin, but is run directly from the rendering tank into a very strong iced brine, where it remains for about twenty-four hours, when it is removed and placed on shelves to drain. The "neutral" is a white, slightly granular, tasfeless, solid fat. The skimmings and scrap from the lard-rendering kettles are strained, and the fat, about 2 per cent. of the original charge, obtained from them added to the steam-rendered product. Several factories, however, use the ordinary steam and kettle-rendered lards, and not "neutral." Great cleanliness is observed throughout both processes, and there is very little manual handling, machinery being used as much as possible, and the fat carefully guarded from any source of contamination.

The by-products of oleo-oil and neutral, viz: stearin, tallow, and lard, are standard merchantable articles. Only fresh and sweet fats are used, and tanks, etc., are thoroughly cleaned before use, as a small amount of fat, if allowed to adhere to the apparatus, is liable to decompose in such a way as to spoil the succeeding batch of materials worked up.

Though there may be slight differences in the details, the range of temperature, size of tanks, etc., pursued by the different manufacturers, the general procedure is as above described, the object being to obtain a neutral fat, melting at butter tempera-

The regetable oils are prepared by crushing the seeds, etc., and subjecting the crushed mass to hydraulic pressure, or by extracting the oil by carbon bisulphide or other solvent. The crude oil thus obtained is refined to remove the coloring matter by treatment with mineral acids and subsequent neutralization by alkalies, and chilling and pressing, whereby a product is obtained of a light straw-color and bland

The butter used is always selected for its high flavor and taste and is generally obtained direct from the creamery. Owing to the granular character of oleo-oil it becomes necessary to add some softer and smoother fat; and neutral lard and cottonseed or other similar vegetable oil, are added for the purpose of making the nixture more closely approach the consistency of butter. The proportions in which these ingredients are used vary with the seasons of the year, the grade desired, and the formulas of the manufacturers. The charge of milk or cream, however, is the same for all grades manufactured by any particular factory, and varies from 10 to 20 per

cent. The milk or cream is allowed to become slightly sour.

The churn used is steam-jacketed, of 1,200 to 2,500 pounds capacity, and the whole operation of churning is conducted at a temperature of 85° to 105° F., insuring the melting and thorough mixture of the solid fats used, thus differing from ordinary creamery practice. The oleo-oil and neutral lard are melted in separate kettles at a temperature of about 90° F. The charge of milk or cream is first run in and the paddles kept in motion until the butter begins to form. Then the charge of melted eleo-When this is well incorporated the neutral lard is run in, o give the desired butter color. The butter is added either oil is added and stirred. and finally the annotto, to give the desired butter color. directly into the churn, being first melted, or it is worked into the oleomargarine after it is taken from the churn. The temperature is carefully regulated, being about 85° F. at the beginning and gradually increasing to 105° F. at the end, when the whole charge has the appearance of a yellowish, creamy fluid. From twenty to ninety minutes are occupied in the churning. The whole melted charge, after it has been sufficiently churned to thoroughly incorporate all the ingredients, is run either directly into tanks containing chopped ice and constantly stirred, or is met by a stream of ice-water as it issues from the churn. The object is to give the melted mass a fine grain by this sudden cooling. The chilled mass is removed from the tanks and piaced on wooden trays to drain. Here the salt is added and allowed to work itself in, which generally takes from twelve to twenty-four hours. The salted mass is then thoroughly worked by mechanical rollers, to remove the buttermilk and water, following the general practice of creameries in this and subsequent operations of packing, etc.

Oleomargarine is placed on the market either "solid packed" or in prints or rolls. Four grades are generally made, known as "dairy" and "extra dairy olemargarine," "creamery," and "extra creamery butterine," the last two containing from 10 to 25 per cent. of the best creamery butter. In the lower grades, from 25 to 60 per cent. of neutral lard, from 20 to 50 per cent. of oleo-oil, from 5 to 25 per cent. of vegetable oils, and in some cases from 2 to 10 per cent. of butter, with 10 to 20 per cent. of milk or cream, are the proportions used. Some factories employ no vegetable oils in their oleomargarine, preferring to use a larger proportion of neutral lard with a small amount of butter to obtain the desired butter consistency. In the higher grades the proportions of oleo-oil are reduced, the vegetable oils are discarded, and creamery

butter is used to make up the charge.

THE USE OF THE MICROSCOPE AS A PRACTICAL TEST FOR OLEOMARGARINE.

A convenient and cheap form of microscope, which had been in use about ten years, having been fitted with the necessary polarizing attachments, consisting of two Nicols-prisms of Iceland spar, first used in 1828, and having been procured in sufficient numbers, about the middle of April, I was instructed to proceed to Philadelphia and New York and assist the local revenue officers in the examination of samples of butter collected in those cities. This investigation was afterward extended to other cities, in May and June, and samples of all grades of butter handled by retail butter dealers were collected and examined, the object being to ascertain to what extent and by whom oleomargarine was sold without complying with the law. The following whom oleomargarine was sold without complying with the law. cities and towns were visited: New York, Philadelphia, Brooklyn, Jersey City, Newark, Paterson, Elizabeth, Hoboken, Boston, Cincinnati, Indianapolis, Chicago, Mil-

waukee, and in Michigan, Ishpeming, Marquette, Houghton, Hancock, Red Jacket, Escanaba, and Menominee. The principal cities and towns in New York and Pennsylvania, and the cities of Baltimore, Washington, Hartford, and New Haven were visited and the samples examined by the revenue agents connected with those districts. The method of procedure was generally as follows: On a certain day all the division deputy collectors in the city and vicinity in which the examination was to be made were detailed with instructions to visit the stores of all, if possible, retail dealers in butter, except those who had paid the special tax as dealers in oleomargarine, and to obtain a sample of each grade of butter dealt in. For this purpose each deputy was furnished with a wooden box containing a gross of half-ounce specimen tubes, with the necessary number of gum labels and blank forms for noting addresses, etc., of the dealers visited. At the end of the day the samples collected were brought to the office and placed in an ice-chest. From two to three days were devoted to this canvass. The samples were examined as soon as possible after they were received, and any specimen found showing the presence of melted fats was at once thoroughly investigated, and the dealer's store visited, and the goods detained, etc. Most of these cases proved on investigation that the so-called butter had been bought from a regular oleomargarine dealer or received direct from the factory.

The following table shows the number of samples of butter that have been exam-

ined in the different localities and the number found to be oleomargarine:

TABLE V.—SHOWING NUMBER OF SAMPLES OF BUTTER EXAMINED.

Locality.	Number of samples.	Represent- ing stock of dealers.	Number of oleomar- garine.
Philadelphia, Pa. Brooklyn, N. Y. New York, N. Y. Orsey City, N. J. Newark, N. J. Paterson, N. J. Hoboken, N. J. Elizabeth, N. J. Boston, Mass Cowell, Mass Salem, Mass Sincinnati, Ohio Indianapolis, Ind Chicago, Ill. Milwankee, Wis Baltimore, Md Washington, D. C. Four towns in Connecticut.	632 2, 998 234 280 122 84 103 1, 181 59 651 233 719 574 228 149	288 346 1, 862 145 175 64 49 77 595 19 28 424 152 366 362 142 89	2 2 5 5 9 2 1 7 7 7 6 6 6 6 2 2 6 6 6 6 6 6 6 6 6 6 6
Eighteen towns in PennsylvaniaEleven towns in New York	599	456 426	19

From a personal inspection of the large retail dealers in the cities visited, I am convinced that whatever prejudice may have existed, however erroneously, against oleomargarine, when the law first went into effect, has now for the most part disappeared, and the article is demanded and bought on its own merits, by an increasing number of consumers. Some of these stores sell from one-half to one ton per week, even in spring when butter is cheap, in quantities of less than 10 pounds to any one person at one time, put up in packages duly branded with the word "oleomargarine," as required by the law and regulations. Cities like Boston with nearly two hundred and Chicago with four hundred retail dealers in oleomargarine give some idea of how extensively artificial butter is dealt in.

In the lumber and mining regions of the Upper Peninsula of Michigan the large grocery stores deal in oleomargarine to a much greater extent than butter, as their customers prefer it, owing to its keeping in a sweet and palatable condition for a much longer time. The great lumber firms buy it direct from the factories for their camps in winter.

Fully 10 per cent. of the butters examined were unfit for human consumption, be-

ing exceedingly rancid, and in many cases actually putrid.

The use of borax as an antiseptic was common with this class of butters.

#### NEED OF NEW LABORATORY.

The present laboratory is entirely too small and inadequate for the purpose, and is so crowded with the necessary apparatus for proper chemical and microscopical examinations of samples as to leave very little floor room. I therefore would repeat

my former recommendation: "That an appropriation be asked for from Congress sufficient to fit up a proper laboratory, to defray the expense for chemicals and apparatus; and for the purchasing, collecting, and forwarding of samples for analysis; and the salaries of two assistants and one messenger in the laboratory."

Respectfully submitted.

EDGAR RICHARDS, Microscopist.

Hon. Joseph S. Miller, Commissioner of Internal Revenue.

#### LAWS AND REGULATIONS OF SWEDEN.

[Translated from the Swedish and published in the Return of Board of Trade; London, Sept. 1, 1887.]

His Majesty's gracious decree relating to a control on the trade in margarine or artificial butter. (Given at the Palace of Stockholm, October 2, 1885.)

We, Oscar, by the grace of God, King of Sweden, Norway, the Goths and the Vandals, make known that, on the proposal of the Diet and several agricultural societies, and after the administrative committee of the agricultural academy, the board of commerce, and the general administration of customs have been heard on the subject, we have, with regard to a control on the trade in margarine or so-called artificial butter, found it good to ordain as follows:

SECTION 1. By margarine is understood in this enactment artificial butter of every

kind, in the composition of which is included any fat not produced from milk. SEC. 2. (Paragraph 1.) Margarine intended for sale, whether manufactured in this

country or imported from abroad, shall be kept in a vessel on which the word "margarine" is marked in a durable and distinct manner and so as to be easily seen.

Should any vessel arrive from abroad without such a mark, and be reported to contain margarine, the article shall not be delivered from the customs until the vessel has by the care either of the owner of the article or of the official of the Crown been properly marked.

(Paragraph 2.) In any shop where margarine is kept for sale a notice to that effect

shall be posted up in a suitable place.
(Paragraph 3.) When exported margarine shall be kept in vessels marked in the manner as prescribed in paragraph 1, and the article shall also be declared in the shipping and freight documents as margarine.

SEC. 3. (Paragraph 1.) Any person who sells margarine, or keeps it for sale, but not in a vessel marked as prescribed in section 2, paragraph 1, shall be subject to a fine of not less than 50 and not exceeding 500 kronor.

(Paragraph 2.) Any one infringing the regulation enacted in section 2, paragraph 2 shall be liable to a fine not exceeding 50 kronor.

Paragraph 3.) Whoever exports or tries to export from the country margarine not kept in vessels as prescribed in section 2, paragraph 1, or not declared in the shipping and freight documents as margarine, shall be punishable by a fine of not less than 100 ldSdnot exceeding 1,000 kronor.

SEC. 4. Of fines imposed in pursuance of this statute, one-third falls to the Crown ita two-thirds fall to the prosecutor. In case of a special informer he shall be enanted to half the prosecutor's share.

In the case of insufficient assets for the full payment of the fines they shall be sub-

stituted pursuant to the provisions of the common law.

SEC. 5. Offenses against the provisions contained in this enactment shall be prosecuted before a police court, where there is one established; but otherwise, before a police office, or where there is none, before a common court, and with reference tocomplaints against the decisions of a court or police office in these cases, the general provisions relating to appeals in criminal cases shall be observed.

SEC 6. With reference to the punishment of any person selling margarine for natu-

ral butter the provisions of the common criminal law shall be observed.

SEC. 7. (Paragraph 1.) It is the duty of the public prosecutor to prosecute offensesagainst this enactment, and to see that all vessels in which margarine is kept are properly marked, and where the owner omits to do so to attend to the marking

(Paragraph 2.) If there be any reason to suppose that any article arrived from abroad or entered at the custom-house for exportation shall consist of margarine, although the vessel in which it is kept be not marked as prescribed in section  $\mathcal{Z}$ , paragraph I, it will be the duty of the customs immediately to report the fact to the public prosecutor, in order that he may be able to take such measures as may be deemed: necessary.

Sec. 8. (Paragraph 1.) In case any article is suspected of being margarine, although not kept in a vessel as prescribed, the public prosecutor shall be entitled to take a sample of it. Such sample, however, in so far as it refers to any article under the care of the customs, shall not be taken before a permit is granted. The samples shall be taken with proper care so as not unnecessarily to cause any damage either to the

article or the vessel.

(Paragraph 2.) The sample, which ought to weigh about 50 grams, shall be taken in the presence of two witnesses and be sealed with the seal of the prosecutor, upon which, for the sake of ascertaining the quality of the article, it shall be sent to-

a competent analyst.

SEC. 9. (Paragraph 1.) The agricultural institute of the kingdom, and the chemical stations established by the agricultural societies by means of grants from the statefor the benefit of agriculture and industrial pursuits, are competent to make examinations as stated in section 8, and to give certificates accordingly. Any person conversant with the subject, who has been authorized by the provincial government to undertake similar examinations, shall likewise be considered equally competent.

(Paragraph 2.) Directions as to the mode of performing examinations, and forms of certificates, are given by the administrative committee of the agricultural academy. SEC. 10. The fees for examinations and certificates founded on the same shall be

paid at the following rates:

are delivered at the same time, extra.....

Sec. 11. The expense of the examination shall be paid by the person who has demanded the examination, and when it has been performed by virtue of the command of an authority, by the provincial government. Unless the owner of the article, by of an authority, by the provincial government. Unless the owner of the article, by the decision of the court, be ultimately required to pay the expense, an application for the repayment of the amounts paid by the provincial government shall be madeto the civil department (home office) before the end of the month of January every year, and his Majesty will, with regard to any expense paid by a public prosecutor, take into consideration, at the suggestion of the governor of the district, whether the prosecutor, in any particular case, ought to be exempt from the expense, and the same paid out of the public purse.

SEC. 12. For any marking performed by the prosecutor he shall be entitled to charge the owner of the article in account.

This enactment shall come into force on November 1st, 1885.

The which all whom it may concern shall obediently observe. In further verification whereof, we have hereto subscribed our name with our own hand and caused our royal seal to be affixed.

Palace of Stockholm, this 2d day of October, in the year 1885.

(Signed:) OSCAR. (Countersigned:)

[ROYAL SEAL.] E. VON KRUSENSTJERNA.

#### [Translation.]

Public notice issued by the administrative committee of the Agricultural Academy relating to the examination of Margarine, given in Stockholm, 13th of October, 1885.

Since His Majesty, in a gracious decree of 2d October, 1885, relative to the control over the trade in margarine or artificial butter, has ordained that prescriptions as to the mode of ascertaining whether a sample delivered consists of butter or margarine, and that a form of a certificate respecting the quality of the article shall be communicated by the administrative committee of the Royal Agricultural Academy, the committee have prescribed the subjoined rules and form to be in force until further notice.

Stockholm, 13th October, 1885.

On behalf of the administrative committee of the Agricultural Academy.

PEHR EHRENHEIM. CHRISTIAN LOVÉN.

### PRESCRIPTIONS RESPECTING THE MODE OF MAKING THE EXAMINATION.

The method that should be applied at the chemical examination in question, and which is described below, is founded on the fact that volatile fatty acids soluble in water are found in butter to a much greater extent than in margarine, and the object of the examination, therefore, is to determine the exact quantity of these acids contained in the sample which is to be examined, and for that purpose the following mode of procedure is to be adopted:

(1) About 10 grams of the sample delivered for examination are weighed and melted in a small cup at a gentle heat. When the contents have cooled a little, 25 cubic centimeters of pure ether are added, and they are then stirred until all the fat is dissolved. The cup is then covered with a watch glass, and left at rest until all the undissolved substances have sunk to the bottom, when the ethereal solution is to be strained through a dry filter. It is to be observed that the solution, on being poured out from the cup, must not be accompanied by any sediment.

(2) The ether is to be removed from the perfectly clear filtrate by evaporation at so gentle a heat as not to boil, upon which the residue is to be dried for half an hour

in an air-bath at 100° centigrade.

(3) Rather more than 2.5 grams of the fat, which is still warm, and has been cleared from any extraneous admixtures in the above-named manner, are to be poured off along a narrow glass rod into an accurately-tared glass retort with thin sides, capable of containing 200 cubic centimeters. The retort shall be left in the weighing room, which shall be locked up, until the fat has again assumed a solid form, when as much of the weighed fat is to be removed, by means of a glass rod, as will make the retort contain exactly 2.5 grams of fat.

(4) The fat is then to be saponified in the retort by being heated with 5 cubic centi-

meters of alcoholic potash lye, prepared by dissolving 20 grams of pure hydrate of potash in 100 cubic centimeters of pure alcohol of 70 per cent. The retort and its contents shall be heated over a small flame (a wreath-shaped gas flame to be preferred), and the fat will then be perfectly saponified in a minute or two.* Upon that, the retort shall be swung for a brief moment over the flame, when the greater part of the alcohol will evaporate

(5) The last residue of alcohol is then to be removed by connecting the retort with a water air-pump by means of a doubly perforated india-rubber stopper in which are two glass tubes, and sucking a current of air through the retort, which in the mean time is kept in a cup of briskly boiling water until the soap has assumed a solid form and no longer rises when the air in the retort t is rarefied by the closure of one of the

glass tubes while the pump is in operation.

* If the fat saponified is real butyrin, a distinct smell of other of butyric acid will be perceived, which, on the contrary is not the case when common margarine is

saponified.

Butyric soap puffs up considerably on the rarefaction of the air, and may easily fill up the whole retort. Margarine soap, under the same circumstances, rises but little or not at all. The alcohol must be perfectly expelled, for even though but a very little or not at all. The alcohol must be perfectly expelled, for even though but a very small portion remain, volatile ethers will be formed at the following distillation with phosphoric acid, and under the influence of the same. Such ethers are not altered at the titration of the distillate with alkali. If they were, the result would be that the quantity of the volatile fatty acids contained in the distillate would turn out too low.

(6) When the residue, or soap, is thus entirely cleared from alcohol and dissolved in 50 cubic centimeters of water, a few pieces of pumice/stone* of the size of peas shall be put in, and upon that add 20 cubic centimeters of a solution of pure phosphoric acid of 1.124 specific weight, at 15° centigrade, containing 15 per cent. of anhydrous phosphoric acid. The retort is then to be connected by means of a perforated indiarubber stopper with a glass tube, t nearly 1 meter long by 10 millimeters wide, cut off obliquely at both ends, and twice elbowed, the central part of which may be cooled by means of a current of cold water, which is made to flow through a Liebig cooling tube of glass. The retort resting in a sloping position on a metallic gauze, is to be heated over a flame, which shall be so adjusted that only one cubic centimeter shall distill over in a minute. During the distillation the glass tube shall be kept cool by means of a current of cold water. When the distillate, twhich is to be collected in a small graduated cylinder, is exactly 50 cubic centimeters, the distillation is brought to a close.

(7) In order to remove the non-volatile acids insoluble in water which may follow during the distillation, and either fasten in the elbowed glass-tube or flow down in small quantities into the distillate, || the distillate shall be strained in a funnel, through a filter about 60 millimeters in diameter, which has been soaked in water, then the graduated cylinder and filter shall be washed with 50 cubic centimeters of

distilled water.

(8) The solution, which, as plainly appears from the above, will make 100 cubic centimeters, and then contain only the volatile fatty acids soluble in water that were contained in the sample examined, has two drops of a diluted solution of phenolphthalein in alcohol added. It is then to be titrated with one-tenth normal solution-of alkali, prepared from hydrate of alkali as free as possible from carbonic acid, and standarized with one-tenth normal sulphuric acid with the same re-agent as an indicator, until a final re-action appears by the fluid assuming a lasting rose color. number of cubic centimeters of the alkaline solution consumed will be a scale as to the volatile acids contained in the fat examined, and thus it can be determined whether the substance examined is butter or margarine. But it is to be remembered that at least 10 cubic centimeters of the alkaline solution I will be needed for the saturation of the volatile acids in butyrin, whereas a much smaller quantity is required for the saturation of the same acids in margarine.

*The pumice stone will prevent a hard jolting, which otherwise would be unavoidable on the boiling of the fluid.

† The glass tube will answer the purpose best if it be bent at obtuse angles 20 centimeters from one end and 10 centimeters from the other. The 20 centimeters section of the tube is to be joined to the retort and on account of its length it will afford the particles which, during the boiling of the fluid may possibly, by spattering, get into the glass tube, a good opportunity of again flowing into the retort.

‡ If the sample consists of butter the distillate will have a strong smell of butyric acid, but, on the contrary, if it consists of margarine, a tallowish smell will be emitted. After every distillation the tube should, therefore, be rinsed with boiling water,

and it should be occasionally thoroughly cleaned with ether.

|| When butter is tested these fatty acids float in the shape of small drops of fat on the surface of the distillate, and they do not assume a solid form in the temperature of common dwellings. On the testing of margarine these fatty acids settle either high up in the top of the elbowed funnel in the shape of a shaggy or woolly ring, or else on

the surface of the distillate in the shape of white solid groups.

¶ The quantity of volatile acids contained in butyrin is by no means invariable; it varies, on the contrary, very much, and seems to be mainly depending upon a more or less advanced period of lactation with the animal that produces the fat, for the butyrin obtained from cows that have newly calved contains a far greater quantity of volatile acids than does that obtained from animals that have been in milk for a longer period. The smallest quantity of volatile fatty acids is found in butter from cows that have been milked for a long time. The above-named quantity of 2.5 grammes of butyrin may require for the saturation of the volatile acids contained in it as much as 17 cubic centimeters of one-tenth normal alkali-indeed, sometimes still more; 14 cubic centimeters are generally needed, but never less than 10 cubic Any fat, therefore, that, at an examination made as above stated, is found to require less than 10 cubic centimeters of one-tenth normal solution of alkali is not butter, but margarine, more or less mixed with butter. The fine tallow composing the raw material for the preparation of margarine, consumed, at the tests that have been made, only a very small quantity or 0.6 cubic centimeters of normal alkali. But margarine prepared from the same kind of tallow, which always contains some butyrin, in consequence of the manner it is prepared in, consumed a rather larger quantity of normal alkali. For the purpose of showing the number of cubic centimeters that have been consumed at the examinations of some different sorts of margarine prepared in the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of garine, it may be mentioned that the following sample of Dutch margarine consumed. =1.05, b=1.30, c=1.35, d=1.88, e=1.42, f=1.42, g=1.65, h=1.67 cubic centimeters

(9) No re-agents needed for the examination must contain any acids that may volatilize during the distillation and thus cause too great a consumption of alkali at the titration. Only such re-agents as are, in consequence of the manner of preparing them, already free from acids of that kind are, therefore, to be used, and for the same reason a hydrate of potash prepared from sulphate by means of a hydrate of baryta should be selected; and of ether, alcohol, and phosphoric acid, the best products obtainable in the market should be chosen. For safety sake all the re-agents needed for the examination ought moreover to be tested. For that purpose 25 cubic centimeters of the ether and 5 cubic centimeters of the alcoholic potash-lye are to be measured into a retort, and all the ether and alcohol are to be expelled; the residue is to be dissolved, 20 cubic centimeters of the solution of phosphoric acid are then to be added and 50 cubic centimeters to be distilled off. Then a test is to be made as to how much of one-tenth normal alkali will be needed at the titration of the distillate with phenolphthalein as an indicator. If the re-agents are free from volatile acids a lasting rose color will appear when a drop or two of the alkaline solution are added. In the opposite case more will be needed. If it is accurately ascertained by another trial how much of one-tenth normal alkali will be required on account of defective purity of the re-agents, a corresponding correction may be applied at the examinations made with the same re-agents.

#### FORM OF CERTIFICATE AS TO THE QUALITY OF THE ARTICLE.

At the request of * (1) , I have examined a sample of butter suspected of being When delivered to me it was kept in (2) ___, and provided with ption: "___" and seal unopened and marked with the letters , and provided with the following superscription: " cubic centimeters of one-tenth normal alkali were consumed (3), for the saturation of the volatile fatty acids soluble in water which were contained in 2.5 grammes of melted pure fat of the above-named sample; and since at a similar procedure with butter prepared from cow's milk alone, never less than 10 cubic centimeters are used, I hereby declare the above-named sample to be (4)

The chemical examination was made strictly in accordance with the prescriptions issued by the administrative committee of the Agricultural Academy in Appendix No. 60 to "Collection of Swedish Laws," 13th October, 1885, and none but perfectly suitable re-agents, previously tested, were used. Part of the sample delivered, properly melted and marked and provided with my seal, will be kept by me for two months, in the event of a new examination being considered necessary (5)

#### LAW RELATING TO THE TRADE IN ARTIFICIAL BUTTER.

We, Oscar, by the grace of God, King of Norway, Sweden, the Goths, and the Vandals, make known: That the resolution of the 17th of June this year, passed by the regular Storthing now assembled, has been submitted to us, worded as follows:

SECTION 1. In this law margarine stands for butter from any source or of any composition, when fat, not produced from milk, enters into the composition.

SEC. 2. When margarine is kept for sale in this country, or exported to foreign parts, it shall be packed in a vessel (packing-box) provided with a mark determined ' by the King. When margarine is exported to foreign parts it shall also be distinctly indicated as such in the shipping and clearance documents.

SEC. 3. When butter is imported from abroad, the consignee shall distinctly report whether the article be pure or mixed with margarine. In the event of his not being fully informed in that respect, the article shall not be delivered until it has been

Norwegian margarine consumed: i=2.38, k=3.50 cubic centimeters. from Pellerin and Fils' manufactory in Christiania, consequently contained a far greater quantity of butyrine than did the former. If the quantity of one-tenth normal alkali required by pure tallow be deducted from the quantity required by margarine, and if it be assumed at the same time that butyrine generally consumes 14 cubic centimeters, which no doubt will be very near the mark, the above-named samples of margarine may be estimated to have contained about: a=3.0, b d=5.0-5.5,

ef=6!0, g-h=7.5, i=13.0, and k=21.5 per cent. of real butyrine.

*At the above-mentioned figures are inserted: at (1), name occupation, profession, or title and address; at (2), a short description of vessel and packing; at (3), the quantity of one-tenth normal alkali consumed, expressed in cubic centimeters, the whole numbers being indicated with letters and figures, and the first decimal also denoted with a comma and a figure; for instance, "Five or accurately 5,4"; at (4), either "butter" or "margarine"; at (5), address, date and year, and the name, occupation, profession or title of the person who made the chemical examination.

officially examined, in the manner and in accordance with the prescriptions to be observed in the case referred to in section 5, but in any case the examination shall be made at the expense of the consignee. In cases where margarine is imported in vessels not provided with the mark prescribed, the article shall not be delivered until the deficiency be remedied. The expenses in that case shall be defrayed by the consignee.

SEC. 4. Wherever a trade in margarine is carried on, signs shall be put up in suit-

able places indicating the business in a distinct and conspicuous manner.

SEC. 5. Where it is suspected that the prescriptions referring to margarine have not been observed, the police or custom authorities shall cause an examination to be made, and for that purpose they shall be entitled to take samples of the article sus-The examination as to whether the article in question shall be regarded as margarine (section 1) or not, shall be made by the proper Government department in the manner prescribed. The expenses on account of the examination, if it be proved that the suspicion was well founded, shall be borne by the offender, but in the opposite case they shall be paid out of the public funds.

SEC. 6. Infringements of this law shall be punishable by fines from 20 kronor to 1,500 kronor, and shall be prosecuted before the police court.

SEC. 7. This law shall come into operation on the 1st of January, 1887.

Therefore, we have accepted and confirmed, and we hereby accept and confirm this resolution as a law.

Given at Christiania 22d June 1886, under the great seal of the Kingdom.

By order of his most Gracious Majesty.

SEAL.

J. SVERDRUP. (Signed)

## [Translation.]

#### ORDER IN COUNCIL OF THE 14TH OF DECEMBER, 1886.

Pursuant to section 2 of the law of the 22d of June, 1886, relative to the trade in artificial butter, it is provided that-

Instead of the rules contained in the royal mandate of the 20th of November, 1886, which are hereby revoked, from the 1st of January, 1887, the following provisions shall apply with regard to the marking of vessels (packing boxes) in which butter is kept for sale in this country or exported to foreign countries:

Every vessel shall be provided on the outer sides with two marks of the shape and size as shown by the annexed sketch. The marks, which are to be placed diametrically opposite each other, near the upper edge of the vessel, shall, on wooden vessels, be branded, and on vessels of any other material be painted in a lasting black color.

Length of mark = 17.0 centimeters. Height of mark = 7.0 centimeters. Height of letters = 1.7 centimeters.

H. Ex. 2——24

#### [Translation.]

RULES FOR CARRYING OUT THE EXAMINATIONS, ETC., REFERRED TO IN SECTION 5; COMPARE SECTION 3 OF THE LAW OF THE 22D JUNE, 1886, RELATIVE TO THE TRADE IN ARTIFICIAL BUTTER.

### [Drawn up by the Home Department on the 14th of December, 1886.]

1. Of the article that is to be examined a sample of about 70 grams shall be taken in the presence of two witnesses and be put into a clean, dry glass vessel, which shall be provided with the seal of the proper authority, and be marked and sent to a competent chemist. In case the article in any individual butter vat be found heterogeneous, two samples shall be taken, so that either of them shall appear to be of a different kind from the other. The examination, the object of which is to determine the quantity of volatile acids contained in the butter, it being much greater in butyrin than in other fats, is carried out in the following manner:

2. About 15 grams of butter are put in a small glass vessel, in a vapor bath or air bath at 100 degrees centigrade, until the sediment is separated from the melted fat, which then, without being accompanied by any essential portion of the sediment, is strained through a small filter into a dry glass vessel. During the filtration the glass vessel, filter, and funnel ought to remain in the warm bath. The melted fat must be filtered

clear and free from any drops of serum or particles of salt.

3. 2.5 grams of the melted fat are weighed out into a retort holding from 150 to 200 cubic centimeters, which may be conveniently done by measuring off in the dry and weighed retort about 2 cubic centimeters melted fat by means of a pipette. When the fat is perfectly congested the surplus is removed with a glass rod, so that the exact

quantity mentioned remains in the retort.

4. To the fat in the retort is added an alcoholic solution of soda or potash, which is prepared each time by mixing 20 cubic centimeters of pure alcohol (free from any acid) of 87 per cent. by volume (0.84 specific gravity) with two cubic centimeters of a watery solution of the purest hydroxide of sodium or hydroxide of potassium (as free as possible from carbonic acid) in which 100 cubic centimeters contain, respectively, 40 or 50 grams of hydroxide.* The retort is then heated in a sloping position in a water bath, when the saponification will soon take place. When most of the alcohol is evaporated, the heating being continued, and the soap begins to froth, the remainder of the alcohol can be conveniently expelled by closing the retort with a stopper furnished with two glass tubes. The retort is then lowered a little in the water bath, when a current of air, by means of the water air-pump or otherwise, is sucked through the retort until all the alcohol is removed.† At the same time the india-rubber tube which is attached to the glass tube, by means of which the air gets into the retort, ought frequently to be squeezed, so that a rarefaction of the air in it will be produced. Since the admission of carbonic acid may have some influence on the result, the current of air ought to be freed from this substance by passing through a tube filled with soda lime or the like before it enters the retort.

5. Add to the soap exactly 40 cubic centimeters of water and it will then, after a short heating over a water bath (when no noticeable evaporation must take place), dissolve; then add some pieces of heated pumice stone of the size of hemp seeds, and exactly 20 cubic centimeters of diluted sulphuric acid, prepared by mixing 100 cubic centimeters of pure H₂ SO₄ with 1,000 cubic centimeters of water, the retort should be immediately attached to a distilling apparatus, which, for the sake of preventing any loss, ought to consist of a whole tube, not joined, about 10 millimeters in width, bent into the shape of an obtuse angle in two places. The long and straight central part of the tube is surrounded by a Liebig cooling tube. One of its branches, that on which the retort is fixed, ought to be about 20 centimeters long, and the other should be brought down into the receiver. The ends of both the branches ought to be cut off in an oblique direction. As a receiver, one may use either a 50 cubic centimeter glass flask, or a narrow graduated cylinder, which, besides being accurately provided with the 50 cubic centimeter mark, may for convenience' sake be divided

for every 10 cubic centimeters.

The distillation is performed by heating the retort in a slanting position on a metallic gauze by means of a small flame, while cold water is flowing in through the cooling tube, so that, at an even rate, it will be furnished in the course of three-

*This method will be more convenient, especially when frequent examinations occur, than to weigh the hydroxide each time, for in that case it would have to be dissolved directly in alcohol of 80 per cent. by volume. An alcoholic solution that has been kept ready prepared ought not to be used.

† A perfect removal of the alcohol is necessary as otherwise ethers may be formed during the distillation, which at the process of titration will cause a smaller consump-

tion of alkali.

quarters of an hour or one hour. The distillation is stopped when the distillate is exactly 50 cubic centimeters.

6. The distillate, which generally contains solid fatty acids that have been carried along with it, is strained through a small filter into a flat-bottomed retort. ceiver and filter are washed with 50 cubic centimeters of warm water in two or three portions. The filtered fluid is to be titrated with one-tenth normal solution of soda or potash, a few drops of an alcoholic solution of phenolphthalein having previously been added, until the red color produced no longer vanishes, not even after some ďelay.

7. From many experiences it may be assumed that a distillate from 2.5 grams of fat from unmixed natural butter, produced in the manner above mentioned, will consume for its saturation at least 12 cubic centimeters of one-tenth normal solution of alkali, so that a smaller consumption will indicate an admixture of extraneous fats.

8. The re-agents should be tested as to their acid contents, if there be any, which, in that case, may volatilize during the distillation and increase the consumption of alkali. For that purpose the alcohol is evaporated in a retort in a water bath employing the same quantity of alcoholic solution as was used for the saponification, and finally by a thorough suction of air free from carbonic acid, then 40 cubic centimeters of water and 20 cubic centimeters of the diluted sulphuric acid are added, and 50 cubic centimeters are distilled off. The distillate is titrated after being diluted with 50 cubic centimeters of water. For its saturation it ought not to require more, or only a little more, of a solution of alkali than 100 cubic centimeters of the distilled water alone requires.

Consequently it is necessary to pay particular attention to the correctness of the titrated solution of alkali used, especially when the boundary number is approached.

It may be remarked that some soft kinds of glass when used yield perceptible quantities of alkali to distilling fluids, especially in the beginning.

9. The following rates are fixed for the examination and the attestation founded on the same:

	Kr.
For the examination of a single sample	15
For the examination of two samples delivered at the same time	25
For the examination of every sample over and above the first two when several	•
are delivered at the same time, additional	8

## LAWS AND REGULATIONS OF FRANCE.

[Translated from the Journal Officiel de la Républic Française of March 15, 1887.]

LAW CONCERNING THE REPRESSION OF FRAUDS COMMITTED IN THE SALE BUTTERS.

The Senate, etc.

#### TITLE I.—For the repression of frauds in the sale of butter.

ARTICLE 1. It is forbidden to expose, to place on sale or to sell, to import or to export, under the name of butter, any margarine, oleomargarine, and, generally, all substances intended to replace butter, as well as the compounds of margarine, fat, oil, and other substances with butter, whatever may be the quantity these compounds contain of it.

ART. 2. Those shall be punished with an imprisonment of from six days to six months and with a fine of from 50 to 3,000 francs, who knowingly shall have violated

the provisions of article 1.

At all events, those shall be presumed to have known of the adulteration of the merchandise who are not able to indicate the name of the seller or commission mer

ART. 3. The substances or the compounds fraudulently exposed, sold, or placed on sale, imported or exported, remaining in the possession of the delinquent shall be confiscated conformably to article 5 of the law of the 27th of March, 1851.

ART. 4. The courts may always order that any sentences of condemnation pronounced in accordance with the provisions of article 2, shall be, by extracts or literally, published in the journals which they shall designate, or posted in the places or markets where the fraud has been committed, as well as on the doors of the house or warehouses of the delinquent, and also on those of the mayoralty of the domicile of the latter, and this always at the expense of the condemned.

ART. 5. In case of a repetition of the offense within the year following the (first) conviction, the maximum fine shall always be imposed and the sentence always published and posted.

TITLE II.—As to the sale, transportation, and exportation of margarine, of oleomargarine or edible fats.

ART. 6. Every retail dealer in margarine, oleomargarine, or any substances or compounds intended to replace butter, must inform the purchaser that the substance or compound sold by him is not butter, by delivering it in a vessel, flask or wrapper, bearing in plain characters the words: "Margarine, oleomargarine, or edible fats."

ART. 7. Every manufacturer, wholesale dealer, commission merchant, or consignee of margarine, of oleomargarine, or of similar substances, shall be required to place them in wooden packages [futs] or receptacles marked in plain characters, printed

or branded, with the words: "Margarine, oleomargarine, or edible fats."

ART. 8. Manufacturers, dealers, commission merchants, or consignees of margarine, oleomargarine, or of similar substances, shall indicate in their invoices, way-bills, bills of lading, etc., for each invoice of merchandise of this class, that the merchandises thus forwarded are sold as margarine, oleomargarine, edible fat.

Every carrier and every transportation company, by land or water, must repeat

this designation on their books, invoices, and declarations or manifests.

ART. 9. Those who shall have violated the provisions of articles 6, 7, and 8, paragraph 1, as above, shall be punished with an imprisonment of from six days to one month and with a fine of from 25 to 1,000 francs, or with one of these two penalties only.

Carriers or transportation companies, by land or water, who shall have violated the provisions of the second paragraph of article 8, shall be punished with a fine

of from 25 to 500 francs.

ART. 10. In case of a repetition of the offense within the year following the (first) conviction, the maximum fine shall always be imposed.

## General regulations.

ART. 11. A regulation of the public administration shall determine the method and the conditions of the verification to which it may be necessary to proceed chiefly in regard to merchandise in transit by the custom-house officers, or by the collectors of indirect taxes; who shall proceed to this verification without cost and without impediment or delay to the dispatch of the butters.

This regulation of the public administration shall be drawn up within a period of three months, without this delay in any way affecting the execution of the present law, in all cases where the application of the said regulations is not necessary.

ART 12. The provisions of article 463 of the penal code are applicable to the mis-

demeanors forbidden and punished by the present law.

The present law, etc., approved March 14, 1887.

#### DECREE OF THE 8TH OF MAY, 1888.*

[Bearing regulations of the public administration determining the method and the conditions of the verification of butters, to which it may be necessary to proceed, chiefly in regard to merchandises in transit, by custom house officers or by collectors of indirect taxes, etc. Art. 11, law of 14th March, 1887.]

ARTICLE 1. Employes of indirect taxes, of custom-houses, and of tolls, as well as officers charged with the supervision of halls and market places legally commissioned and sworn in, are authorized to obtain samples of butters which are exposed, placed on sale, transported, imported or exported, in order to ascertain their purity.

Carriers, as well as the directors and agents of transportation companies, by land and water, are required to raise no obstacle to the requisitions for taking samples and to exhibit their way-bills, receipts, bills of lading and declarations of which they may

be the bearers.

Each taking of a sample is verified by a special affidavit (proces-verbal special).

ART. 2. When the taking of the sample is done at the establishment of a retail dealer, of a wholesale dealer, of a commission merchant, of a consignee, or in the hands of a carrier, these persons are required to make known the name and residence of the person from whom they obtained the merchandise.

If the dealer, commission merchant, consignee or carrier is not willing or is not able to indicate the name and address of the party from whom he obtained the merchandise, as likewise if he refuses to sign the affidavit (proces-verbal), mention must be

made of it in the said affidavit.

^{*} Journal Officiel, 16th May, 1888.

ART. 3. The samples taken by the officers indicated in article 1 are, in presence of the holders, shut up in the vessels or flasks, hermetically closed and sealed, and immediately transmitted to one of the experts designated in each department by the prefect.

Mention of these circumstances is made in the affidavit.

ART. 4. Pure butters, mixed butters, margarines, oleomargarines, and edible fats forwarded by dispatch should be contained in closed receptacles, and should indicate in

plain characters the production and the nature of the merchandise.

On their arrival at the custom-house bureau, the packages are weighed, corded, and stamped with lead, and they are delivered to the carrier or transportation company, by land or water, charged with their transmittal a certificate to accompany them to the bureau of export.

The certificate shall specify the detention allowed for re-exportation.

ART. 5. The ministers of the interior, of agriculture, and of finances are charged, each one in that which concerns him, with the execution of the present decree.

## LAWS AND REGULATIONS OF RUSSIA.

[ From Return of Board of Trade; London, September 1, 1887.]

The attention of the Russian Government having at last been directed to the increasing production in the Empire of oleomargarine and the sale of that sparious product as genuine butter, the minister of imperial domains, with a view of protecting the legitimate interests of the Russian dairy farmer and agriculturist, drew up in the early part of the present year the following rules, which, in his excellency's opinion, it is desirable to enforce legislatively for the control and regulation of the manufacture and sale of artificial butter in Russia, the rules elaborated being based on a study of the measures adopted in the west of Europe and in the United States for that purpose:

(1) The product obtained from a mixture of fat with butter shall be called marga-

rine fat.

- (2) Its manufacture shall be liable to an excise duty, or to supplementary patent
- (3) The extent of the import shall be determined in concert by the ministers of finances and imperial domains.

(4) Margarine fat shall be dyed some bright color, but in no case shall such color be yellow.

(5) The vessels (cases, firkins) in which margarine is packed at the manufactory

shall be dyed the same color as the margarine.

(6) These vessels shall have clearly marked on them the name of the manufactory, and they shall also bear the inscription, "Margarine fat."

(7) The sale of margarine fat shall not be carried on in the shops where dairy butter

(8) Shops dealing in margarine fat shall exhibit a sign-board bearing an inscription

that margarine fat is sold within.

(9) Hotels, cook-shops, restaurants, bars, and generally all public establishments in which food is prepared, shall exhibit in a conspicuous place a notice, and also state on their bills of fare, that the dishes prepared on the premises are cooked with margarine, if such be used by them in their kitchens.

(10) The importation of margarine fat from foreign countries shall be prohibited. For the non-observance of the above regulations the minister of imperial domains proposed the imposition of fines varying from 100 to 1,000 rubles (£10 to £100), and that the vendors of butterine as genuine butter should be punished by imprisonment

from one to three months.

These proposed regulations, on being submitted to the medical council of the ministry of the interior for their opinion, were generally approved by that body. They, however, suggested that the substance to be employed in dyeing butterine should be the root of the alkanet plant and alkanine, which are not injurious to health, would not affect the taste of the butterine, and of which, moreover, only a small quantity is necessary for coloring purposes. The council further recommend that the police and inspectors of manufactories should, in case of doubtful products, be empowered to take samples of them, with a view of submitting them to chemical analysis, the expense of such test to be paid by the dealer in the article analyzed.

The medical council, moreover, considered that it would be desirable, in order to prevent misunderstandings, to modify the wording of points 1, 4, 5, and 6 in the fol-

lowing manner:

(1) All artificial butter, prepared from grease or tallow, even though it be improved

by being washed with milk or cream, or mixed with real butter, shall be called mar-

(4) Margarine fat shall be dyed red by means of the rind of the alkanet root or with alkanine. If this margarine fat be sold in separate pieces, all these, both great and small, sold in retail shall be of uniform shape (for instance, brick shape)

(5) Each piece shall bear on it, in deeply indented characters, the words "marga-

rine fat," and the brand of the producing firm.

(6) The cases or firking in which the oleomargarine is contained and dispatched shall be colored red, and they shall bear in distinct letters the designation of the producing firm, and of the contents-i. e., margarine. If the cases or firkins have an out-

side packing, this shall also be dyed red, and bear on it the same inscription.

As regards the proposed fines, the medical council considered that they should not exceed 100 rubles (£10), or at the utmost 200 rubles (£20), and that confiscation of butterine should follow the imposition of a fine; also, that the punishment for selling margarine for genuine butter should, on first offense, be visited by a fine, and that imprisonment be only awarded in aggravated cases, or when the offender is not able

to pay a money penalty.

As a further modification in detail, the council suggested that the proposed law be brought into operation after a certain fixed period, in order to allow the manufacturers of oleomargarine to wind up their business; and that at the expiration of the period of notice the manufacture of oleomargarine as a food product should cease entirely, it being shown by competent medical authorities that continued consumption of spurious butter in combination with food not unfrequently produces intestinal catarrh.

On re-assembling for the next winter session, the Council of the Empire will take into consideration the proposed regulations of the minister of Imperial domains on this important subject, together with the suggested amendments of the medical council thereon, with a view to legislative enactment and enforcement.

St. Petersburg, June 7, 1887.

JOHN MICHELL.

#### LAWS AND REGULATIONS OF GERMANY.

[Translated from the German Imperial Law Gazette, p. 375.]

A LAW TO REGULATE THE TRADE IN SUBSTITUTES FOR BUTTER, APPROVED JULY 12, 1887.

We, William, by the Grace of God, etc., decree in the name of the Empire, and

with the consent of the Bundesrath and Reichstag, as follows:

SECTION 1. The business localities and other sale places, including market-stalls, where margarine is professionally sold or offered for sale, must have the inscription "sale of margarine" indelibly marked on them in a conspicuous place. By "margarine" in the sense of this law is to be understood all preparations similar to milkbutter, whose fatty substances are not exclusively derived from milk.

SEC. 2. The admixture of butter with margarine, or other edible fats, for the purpose of trading with such mixtures, and further the professional sale or offering for

sale of the same, are prohibited.

This provision does not apply to the addition of butter fat derived from the employment of milk or cream in the manufacture of margarine, provided that not more than 100 specific parts (Gewichtstheile) of milk, or 10 parts of cream to 100 parts

of fatty substances not derived from milk, are employed.

SEC. 3. The vessels and outer coverings in which margarine is professionally offered for sale or sold must bear in a conspicuous place a clear and indelible inscription, containing the designation "margarine." If margarine is professionally sold or offered for sale in entire barrels or chests, the inscription must, in addition, give the name or firm of the manufacturer. If margarine is professionally sold or offered for sale in separate pieces, these must be in the form of cubes, and have an inscription stamped on them giving their description as "margarine," and the name or firm of the seller, indeed they are provided with a covering such inscription. The fideral unless they are provided with a covering bearing such inscription. The federal council is empowered to issue further detailed enactments to be published in the Imperial "Gesetzblatt," for the due carrying out of the provisions in sections 1, 2, and 3 of this law.

SEC. 4. The provisions of this law do not apply to products of the kind indicated

in section 1 which are not meant for human food.

SEC. 5. Infringements of the provisions of this law or of the enactments to be published by the federal council under section 3 are to be punished by fines up to 150 marks or by arrest.

If the offense is repeated, the sentence shall be a fine not exceeding 600 marks, arrest or imprisonment not exceeding three months. This provision shall not apply in case three years have elapsed since the date on which the penalty for the previous offense was completed or remitted.

In addition to the penalty, judgment may be given to seize the articles sold or offered for sale in violation of the provisions of this law, whether the articles in ques-

tion belong or not to the person sentenced.

If the prosecution or condemnation of a particular person is not practicable judg-

ment to seize the goods may be given independently.

SEC. 6. The provisions of the law relating to the traffic in articles of food and drink and consumption of 14th May, 1879 (Reichsgesetzblatt, page 145), remain unaffected. The provisions in sections 16 and 17 of the same law are equally applicable to infringements of the provisions of the present law.

SEC. 7. The present law comes into force on the 1st October, 1887.

## [Imperial Law Gazette, No. 43, 1887.]

No. 1754.—Publication concerning regulations for the execution of the law on the traffic in substitutes for butter of November 12, 1887.

For the execution of the regulations contained in section 3, clause 1 to 3, of the law concerning the traffic in substitutes for butter, of July 12, 1887 (Imperial Law Gazette, page 375), the Federal Council, in accordance with section 3, clause 4, of this law, has concluded to supplement the regulation under No. 1 of the publication of July 26, 1887 (Imperial Law Gazette, page 363), by the following additional regulation:

In round or elliptical vessels, the cover of which has a greatest diameter of less than

35 centimeters, the length of the framing surrounding the inscription "Margarine"

may be diminished to 15 centimeters.

Berlin, November 12, 1887. For the Imperial Chancellor.

VON BOETTICHER.

## LAW AND REGULATIONS OF GREAT BRITAIN.

[From an official copy.]

50 and 51 Vict. ]

margarine act, 1887.

[Ch. 29.

CHAPTER 29.—An Act for the better Prevention of the Fraudulent Sale of Margarine (23d August, 1887).

Whereas it is expedient that further provision should be made for protecting the public against the sale as butter of substances made in imitation of butter, as well as of butter mixed with any such substances:

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this pres-

ent Parliament assembled, and by the authority of the same, as follows:

This Act may be cited as the Margarine Act, 1887.

This Act shall come into operation on the 1st day of January, 1888.

3. The word "butter" shall mean the substance usually known as butter, made exclusively from milk or cream, or both, with or without salt or other preservative, and with or without the addition of coloring matter.

The word "margarine" shall mean all substances, whether compounds or otherwise, prepared in imitation of butter, and whether mixed with butter or not, and no such substance shall be lawfully sold, except under the name of margarine, and under

the conditions set forth in this Act.

4. Every person dealing in margarine, whether wholesale or retail, whether a manufacturer, importer, or as consignor or consignee, or as commission agent or otherwise, who is found guilty of an offense under this Act, shall be liable on summary conviction for the first offense to a fine not exceeding £20, and for the second offense to a fine not exceeding £50, and for the third or any subsequent offense to a fine not

exceeding £100.

5. Where an employer is charged with an offense against this Act he shall be entitled, upon information duly laid by him, to have any other person whom he charges as the actual offender brought before the Court at the time appointed for hearing the charge, and if, after the commission of the offense has been proved, the employer proves to the satisfaction of the Court that he had used due diligence to enforce the execution of this Act, and that the said other person had committed the offense in question without his knowledge, consent, or connivance, the said other person shall be summarily convicted of such offense, and the employer shall be exempt from any penalty.

6. Every person dealing in margarine in the manner described in the preceding section shall conform to the following regulations:

Every package, whether opened or closed, and containing margarine, shall be branded or durably marked "Margarine" on the top, bottom, and sides, in printed capital letters, not less than three-quarters of an inch square; and if such margarine be exposed for sale, by retail, there shall be attached to each parcel thereof so exposed, and in such manner as to be clearly visible to the purchaser, a label marked in printed capital letters not less than 1½ inches square, "Margarine"; and every person selling margarine by retail, save in a package duly branded or durably marked as aforesaid, shall in every case deliver the same to the purchaser in or with a paper wrapper, on which shall be printed in capital letters, not less than a quarter of an inch square, "Margarine."

Every person dealing with, selling, or exposing, or offering for sale, or having in his possession for the purpose of sale, any quantity of margarine contrary to the provisions of this Act, shall be liable to conviction for an offense against this Act, unless he shows to the satisfaction of the court before whom he is charged that he purchased the article in question as butter, and with a written warranty or invoice to that effect, that he had no reason to believe at the time when he sold it that the article was other than butter, and that he sold it in the same state as when he purchased it, and in such case he shall be discharged from the prosecution, but shall be liable to pay the costs incurred by the prosecutor unless he shall have given due

notice to him that he will rely upon the above defense.

8. All margarine imported into the United Kingdom of Great Britain and Ireland, and all margarine whether imported or manufactured within the United Kingdom of Great Britain and Ireland, shall, whenever forwarded by any public conveyance, be duly consigned as margarine; and it shall be lawful for any officer of Her Majesty's Customs or Inland Revenue, or any medical officer of health, inspector of nuisances, or police constable, authorized under section 13 of the Sale of Food and Drugs Act, 1875, to procure samples for analysis if he shall have reason to believe that the provisions of this Act are infringed on this behalf, to examine and take samples from any package, and ascertain, if necessary, by submitting the same to be analyzed, whether an offense against this Act has been committed.

Every manufactory of margarine within the United Kingdom of Great Britain and Ireland shall be registered by the owner or occupier thereof with the local authority from time to time in such manner as the Local Government Boards of England and Ireland and the Secretary for Scotland respectively may direct, and every such owner or occupier carrying on such manufacture in a manufactory not duly registered shall

be guilty of an offense under this Act.

 Any officer authorized to take samples under the Sale of Food and Drugs Act, 1875, may, without going through the form of purchase provided by that Act, but otherwise acting in all respects in accordance with the provisions of the said Act as to dealing with samples, take for the purpose of analysis samples of any butter, or substances purporting to be butter, which are exposed for sale, and are not marked Margarine, as provided by this Act; and any such substance not being so marked shall be presumed to be exposed for sale as butter.

11. Any part of any penalty recovered under this Act may, if the Court shall so direct, be paid to the person who proceeds for the same, to re-imburse him for the legal costs of obtaining the analysis, and any other reasonable expenses to which the

Court shall consider him entitled.

12. All proceedings under this Act shall, save as expressly varied by this Act, be the same as prescribed by sections 12 to 28 inclusive of the Sale of Food and Drugs Act, 1875, and all officers employed under that Act are hereby empowered and required to carry out the provisions of this Act.

13. The expression "local authority" shall mean any local authority authorized to

appoint a public analyst under the Sale of Food and Drugs Act, 1875.

22,450.]

MARGARINE ACT, 1887.

[22d December, 1887.

Registration of Manufactories.

To the Gwners and Occupiers for the time being of Manufactories of Margarine in England and Wales to which the Margarine Act, 1887, applies; to the several Local Authorities under the said Act for the time being in England and Wales; and to all others whom it may concern.

Whereas by Section 9 of the Margarine Act, 1887 (which will come into operation on the 1st day of January, 1888), provision is made for the Registration with the Local Authority of every Manufactory of Margarine (as defined by the said Act) in England and Wales from time to time in such manner as We, the Local Government Board, may

And whereas by Section 13 of the said Act the expression "local authority" is defined as meaning "any local authority authorized to appoint a public analyst under the Sale of Food and Drugs Act, 1875," and the local authorities authorized to appoint a public analyst under the last-named Act are as follows, namely: In the City of London and the Liberties thereof the Commissioners of Sewers of the City of London and the Liberties thereof, and in all other parts of the Metropolis the Vestries and District Boards acting in execution of the Act for the better local management of the Metropolis; the Court of Quarter Sessions for every County; and the Town Council of every Borough having a separate Court of Quarter Sessions, or having under any General or Local Act of Parliament, or otherwise, a separate Police Establishment:

Now, Therefore, We, the Local Government Board, hereby Order and Direct as fol-

lows:

ARTICLE 1.—Every owner or occupier of a Manufactory of Margarine in England and Wales who shall make application to the proper local authority for a Certificate of Registration under the said Margarine Act, 1887, shall, in his application, state the following particulars:

(a) The name and address of the owner or occupier making the application.
(b) The situation of the manufactory.

(c) The name and address, or names and addresses, of the owner or owners, or occupier or occupiers carrying on the manufacture.

Every such application shall be signed by the person making the same, or by some

one acting on his behalf.

ART. 2. If the application is in due form, the local authority shall cause the Manufactory to be registered by entering in a book the particulars of the application for registration; and thereupon a Certificate, in the Form A, set forth in the Schedule hereto, shall be issued by the local authority to the person applying for the same.

ART. 3. Where any change occurs in the persons carrying on the manufacture, written notice thereof shall be given by the owner or occupier of the Manufactory to the local authority, and the Register shall thereupon be amended by making therein the requisite alteration, and an indorsement shall be made by the local authority on the certificate in accordance with the Form B set forth in the said Schedule.

ART. 4. This Order shall come into operation on the 1st day of January, 1888, and

shall remain in force until We shall otherwise direct.

General Order 1488.

CUSTOM-HOUSE, London, 7th January, 1888.

SIR: With reference to the provisions of the Margarine Act, 50 & 51 Vic., C. 29, copies of which were forwarded in G. O.  $\frac{78}{18}$ ; the only directions which the board deem it necessary at present to issue for the guidance of their officers are the follow-

If, on information, any reasonable ground is entertained for the belief that an importation of Butter is other than it purports to be, the Surveyors in London, or Collectors at Outports, will not detain the goods if properly entered but report the facts to the Board, together with the name and address of the consignee of the goods. Beyond this no notice is to be taken, under the Margarine Act, of the way in which Packages, entered as containing Margarine, are marked on importation. No Samples are to be taken at importation until further orders.

I am, sir, your obedient Servant,

E. GOODWYN.

To the COLLECTOR.

# LAWS AND REGULATIONS OF DENMARK.

A LAW REGULATING THE MANUFACTURING AND SELLING OF MARGARINE, ETC.

[Translated from the Danish; U.S. Legation, Copenhagen.]

§ 1. The word "Margarine" is used in this law to designate all articles resembling butter, whatever be their origin, mixture or compound, provided any fat has been

added which was not produced from milk.

§ 2. Any person intending to manufacture margarine shall file his purpose with the chief of police in his district, and at the expense of the manufacturer the chief of police shall publish an announcement thereof in "Berlingske Tidende" in Copenhagen, and also in the papers most widely circulated in the jurisdiction of the manufacturer. The manufacturer shall keep a book showing his products and sales, and the margarine shall be packed by the manufacturer in firkins or tubs of a shape distinctly different from the usual butter firkins, and marked with the word "Margarine," both firkin and mark being subject to the regulations of the minister of the interior. Margarine shall not be manufactured under any other name.

It shall be unlawful for any producer of butter to manufacture margarine or to make any compound thereof with butter or to permit any one else to engage in this business on his premises. Compounds for private use not made on the premises of the dairies are not included in this prohibition and are not within the purview of this

law.

§ 3. Dealers—both wholesale and retail—in margarine shall keep the article in margarine firkins or tubs (§ 2). For smaller quantities, to be kept in shops as samples or for sale at retail, the minister of the interior will prescribe small packages, marked in a manner to be easily seen by the purchaser with the word "Margarine." garine must not be offered for sale under any other name. When margarine is not delivered to the buyer in a firkin or tub of the kind above described, then the package (jar, box, paper, etc.) wherein the goods are delivered shall be made and marked in accordance with directions to be given by the minister of the interior. If the buyer fetches the article in his own firkin or tub, the dealer shall place on the top of the margarine a piece of paper prescribed by the minister of the interior and marked with the word "Margarine." In every shop in which margarine is kept for sale there shall, in accordance with instructions to be given by the minister of the interior, be put up in a conspicuous place a notice with letters at least 3 inches size: "Margarine for sale here."

The selling of margarine on the market places and in ships is prohibited. Mar-

garine shall be shipped only in margarine firkins or tubs.

 $\S$  4. The manufacturing, importing, exporting, or selling of margarine containing more than 50 per cent. of butter shall be unlawful, and the offender will be punished

in accordance with § 14, section 1 of this act.

The outside of every margarine package (§ 2) shall be marked with the name of the manufacturer, and with the percentage of butter in the article contained in the package, in the manner to be described by the minister of the interior, and any violation of this regulation will be punished with a fine. Retail dealers in margarine must sell only from packages on which the percentage of butter and the name of the manufacturer are stamped.

When the margarine contains less than the above percentage of butter the offender

will be punished according to § 14, section 2 of this act.

§ 5. It shall be unlawful to manufacture, import, export, or deal in margarine which has a darker yellow color than No. 9 in the six scaled color plates A-F, presented by the minister of the interior. The necessary regulations in this respect will be published by the minister of the interior.

The coloring of margarine for private use is not prohibited by this law.

§ 6. The minister of the interior may, if he finds it necessary, prohibit all export of margarine from Denmark.

The violation of this paragraph will be punished according to § 14, section 2 of

§ 7. It shall be unlawful to export, or import, or ship margarine in any other than

margarine firkins, tubs, or packages.

Any person engaged in exporting or importing butter or margarine, or in the packing of butter or margarine, shall file notice thereof with the police, who shall keep a record of the notices filed. Books shall be kept showing the amount of import, and the amount of margarine sold in the whole firkins, according to regulations to be prescribed by the minister of the interior.

§ 8. Contracts, invoices, bills of lading, and similar documents that relate to margarine, shall be stamped or headed "Margarine."

Any person neglecting to do this shall be punished with a fine; and if the document in question is made out for a foreign country said fine shall not be less than 100 kroner, the fine to be paid by the author of the document if he be subject to Danish laws, or by the receiver if he does not report the fact to the police at once after receiving the goods.

§ 9. In Denmark, eleomargarine must be sold only in packages, the form of which, prescribed by the minister of the interior, will differ from that of butter or margarine packages, and which are to be marked with the word "Oleomargarine" and the name of the manufacturer. Any person manufacturing or dealing in oleomargarine must, in accordance with prescriptions to be issued by the minister of the interior, keep a book showing what has been produced, or bought, or sold.

Violations of this paragraph will be punished with fines.

§ 10. The business referred to by this law shall be under the surveillance and control of three officers appointed by the minister of the interior, one for Copenhagen and two for the rest of Denmark. Their salaries and contingent expenses for travel, for assistance, for chemical analysis, and for procuring samples are to be fixed in the Said officers will receive full instructions in regard to their duties annual budget. from the minister of the interior, and shall be required to make an annual report to

the minister of the interior. § 11. The officers of control shall have access to every manufactory of margarine or oleomargarine, to every dairy, to every store or stock of butter or margarine, and to every shop where butter or margarine is offered for sale, and shall have the right to take samples at the current price and to examine the books mentioned in §§ 2, 7, and 9. Such samples are from time to time at regular intervals to be submitted to chemical analysis even when there is no suspicion of crime committed or intended. Appropriations for this purpose are to be made in the annual budget. An unjustified refusal to deliver samples shall be punished with a fine of not less than 10 and not more than 500 kroner.

§ 12. This act and paragraph 47 and § 278, section 1, and the penal clause in § 277 of the Penal Code shall by regulation of the minister of the interior in clear print be posted in places that are conspicuous and easy of access in every manufactory and shop embraced in this law and in every dairy where hired help is employed.

tions of this paragraph shall be punished with fines.

§ 13. The chemical and microscopic analysis found necessary by the officers of control shall be made as far as practicable at the government laboratories. The necessary funds for such analysis will be appropriated in the annual budgets.

§ 14. Any person adulterating butter or passing margarine as butter will be punished according to § 278, section 1, of the Penal Code, omitting section 2 of said para-

Violations of the provisions in §§ 2 and 5 will be punished with imprisonment (Penal Code, § 25), or when fraudulent intent can be established, with fines of not less than 200 and not more than 4,000 kroner. When the offense has been committed three or more times the offender will be punished with imprisonment and fines as A violation of the provisions of §§ 3 and 7 are punished in the same manner, except that the fines may be as low as 100 kroner, and that the importer of margarine in other than margarine packages may clear himself of responsibility if he within twenty-four hours after receiving the goods reports the matter to the police and delivers the imported articles.

The unlawful goods are then to be confiscated and the proceeds from the sale thereof are to be paid one-third to the informer—officers of control here excepted and in Copenhagen two-thirds to the city treasury, while outside of Copenhagen the

two-thirds go to the poor fund.

§ 15. Decisions according to §§ 4 and 14 of this act involving imprisonment or a higher grade of punishment, or, if the offender has previously been fined for violathe nature of his offense will be stated. The judge will state in the rendering of his decision that such publication is to be made. In Copenhagen these facts will be published in the "Berlingske Tidende," and outside of Copenhagen in the papers most widely circulated within the jurisdiction. The expenses of the publication will be considered as a part of the costs of the trial.

§ 16. Violations of §§ 4 (section 2), 8, 9, 11, and 12 will be tried in the police courts; but violations of §§ 8 and 9 must always be followed by a sentence and can

not be dismissed with a warning or with a voluntary payment of fine.
§ 17. This act shall go into effect on the first day of May, 1888, and shall remain in force for two years from that date. On the Fareys (Faroe Island) this law shall not go into effect before it has been there proclaimed by royal mandate and with the modifications required by the peculiar situation of these islands.

Approved, April 5, 1888.

NOTE BY TRANSLATOR.—An inconsistency will be found in § 4 of this act. I have consulted the minister of the interior in regard to it, and he informs me that the last three lines of the paragraph were added by mistake and will, in his opinion, be disregarded by the courts. As the minister of the interior understands the act, margarine may contain less than 50 per cent. of butter, but not more. As the law now stands margarine must contain neither more nor less than 50 per cent. of butter.

[Translated from the Danish.]

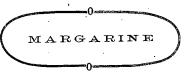

R. B. Anderson.

OFFICIAL NOTICE IN REGARD TO THE FORM, MARKING, ETC., OF MARGARINE PACK-AGES.

In accordance with the act of April 5, 1888, in regard to the manufacturing of and dealing in margarine, etc., the following regulations are to be observed:

1. The margarine tubs (§ 2, etc., of the act) are to be oval in form, so that the circumference of any part parallel with the bottom describes an ellipsis whose length is 1½ times that of the width. Externally, both on the cover and on the bottom and on the sides, the margarine tubs are to be furnished with the following mark:

[Length of mark = 6 inches; height of mark =  $2\frac{7\pi}{4}$  inches; height of letters =  $\frac{1}{16}$  inch.]

in black, put on in full size and in a conspicuous manner. Below each mark shall be stated the percentage of butter in the margarine, in the following manner: "Amount of butter, — per cent."; for which words the same kind of letters are to be used as those in the above mark, but of half the size. The figures put in the blank spaces must correspond in size and distinctness to the letters. Below this stamp shall be given, in letters of the same character and size, the name or firm of the manufacturer.

2. Packages in which smaller quantities are kept in shops as samples or to be sold

in retail, jars, paper packages, and the like, wherein margarine is delivered to the customers, shall have the same oval form as the margarine tubs (No. 1), and externally, on the sides parallel with the bottom, they are to be marked with the word "Margarine," in letters of the same character and size as those prescribed in No. 1, and underneath the percentage of butter contained in the margarine, and the name or firm of the manufacturer are to be given in the same manuer.

The same marks are to be put in a conspicuous manner on paper or similar material used in packing the margarine, or for putting over the margarine when the purchaser

fetches it in his own tub.

3. For the posters "Margarine for sale here", to be put up in shops dealing in margarine, the letters must be of the same kind as those prescribed for the margarine tubs and they must be at least 3 inches in height. The words are to be in black on a white back-ground, and are to be written on two lines, the first line containing "Margarine" and the second "for sale here," leaving a space of 2 inches between

4. The oleomargarine tubs shall have the form of a frustum of a cone, the height of which shall be at least one and one-eighth times that of the greatest diameter of the bottom, and on the sides shall be found the word "Oleomargarine" in letters of the same size and character as those prescribed for the mark of the margarine tubs.

5. The books to be kept in accordance with §§ 2, 7, and 9 are to be arranged by schedules fixed by the ministry of the interior, and must not be taken into use before they have been properly authorized in Copenhagen and in the cities by the magistrate and in the rural districts by a subordinate officer of the Government.

Printed copies of the above schedules and printed copies of the margarine act, etc., to be hung in accordance with § 12 of the act may, until May 1, 1888, be had without pay in Copenhagen, at Schultz's office, and outside of Copenhagen from the chiefs of police.

6. The regulations herewith published shall be in force from May 1, 1888, when the act of the 5th instant, in regard to the manufacturing and sale of margarine, goes into On that date will become null and void the notice of the ministry of the interior dated April 11, 1885, concerning firkins for artificial butter. THE MINISTRY OF THE INTERIOR.

APRIL 12, 1888.

OFFICIAL NOTICE CONCERNING THE COLOR OF MARGARINE.

#### [Translated from the Danish.]

The color referred to in § 5 of the act of May 5, 1888, in regard to the manufacturing and sale of margarine, will be found represented as No. 9 in the six tables herewith inclosed, and marked with the letters A-F.

MINISTRY OF THE INTERIOR.

MAY 17, 1888.

COLOR PLATES PERTAINING TO THE OFFICIAL NOTICE OF THE MINISTRY OF THE INTERIOR DATED MAY 17, 1888, IN REGARD TO THE COLOR OF BUTTER.

#### Instructions for the use of the color tables.

The determination of the color of a sample of margarine should be made by day-

light and in the following manner:

From a sample taken out by the butter tester is cut with a knife a small piece, oneeighth of an inch in diameter, and in such a manner as to leave a plain surface where The examiner stands with his back to the window and holds the plates perpendicularly before him and in such a manner that he does not himself cast a shadow on them, and so that the sun does not shine on the plates.

The color is then selected in the plates which most resemble the margarine sample, beginning the comparison with Table D. If the sample is found to be more reddish than the colors found in D, it is to be compared with Table C, and if still more reddish, with B, and finally with A. If on the other hand it is found to be more yellowish than the colors in D, it is to be compared with E, and if not found in E, with F. The table having thus been found which contains the same color as the margarine sample, the strength of the color may be determined by moving the sample up and down along the plate. That part of the plate which is neither lighter nor darker than the margarine sample will then determine the color of the margarine, which is thereupon indicated by first giving the letters of the table, and then the number on the table opposite the color found, for example, D 9, D 7, etc.

NOTE.—These plates are not reproduced in this report.

# REPLIES TO INQUIRIES AS TO LAWS IN FORCE IN AUSTRIA-HUNGARY.

No. 81.]

United States Legation. Vienna, August 20; 1888.

SIR: I have the honor to inclose two copies of translation of a note received from the ministry of foreign affairs in reply to inquiries made as to the laws in force in the Austro-Hungarian Empire relating to artificial butter. These inquiries were made by this legation in accordance with instructions contained in Department circular under date of July 10, 1888, and from the inclosed reply it would appear that there are at present no special laws in regard to the manufacture and sale of artificial butter in the Austrian Empire, though some legislation on the subject is in preparation

I have the honor to be, sir, your obedient servant,

A. R. LAWTON. .

Hon. THOMAS F. BAYARD, Secretary of State, Washington, D. C.

#### [Translation.]

In reply to the esteemed note of July 27, No. 30, the imperial and royal ministry of foreign affairs has the honor to inform the honorable legation that intelligence has been received from the ministry of the interior showing that there are no special sanitary laws in this part of the empire relative to the manufacture and sale of artificial butter. Its sale, however, is under the supervision of the market-police, who have to guard against any attempts to sell adulterations made of doubtful ingredients and to pass them off for butter made from milk. Also to see that no butter be brought to market and offered for sale in a state endangering the public health.

Nor do the laws of Hungary contain any special paragraphs regulating the question. The general regulations in force, however, relative to adulteration of provisions, are

also applied to butter.

A law limiting the manufacture and sale of artificial butter, however, is being prepared.

Vienna, August 16, 1888.

For the minister of foreign affairs.

M. PASETTÉ.

To the honorable LEGATION OF THE UNITED STATES.

# REPLIES TO INQUIRIES AS TO LAWS OF BELGIUM.

No. 393.7

LEGATION OF THE UNITED STATES, Brussels, October 4, 1888.

SIR: Referring to your circular of July 10, 1888, asking for copies of all laws and regulations in force in Belgium relating to artificial butter, I have the honor to transmit herewith a note I have received from the Belgian minister of foreign affairs on this subject, in reply to my request for copies of such laws and regulations.

I have, etc.,

LAMBERT TREE.

Hon. THOMAS F. BAYARD.

# The Minister of Foreign Affairs to Lambert Tree.

#### [Translation.]

MINISTRY OF FOREIGN AFFAIRS, Brussels, September 29, 1888.

Mr. MINISTER: By your note dated July 25 last, your excellency has kindly asked on the part of your Government for two copies of all laws and regulations in force in Belgium concerning artificial butter.

I have the honor to inform your excellency that in our country the surveillance of the wholesomeness of provisions and drinks is confided to the communal administrations. These make police regulations on this matter or they may abstain from doing so.

The Government can only intervene by way of counsels and circulars. The penal code contains, it is true, a certain number of provisions punishing adulterations with severe penalties, but the minister of the interior and of public instruction, esteeming that the search for and the ascertaining of these frauds are not sufficiently organized, recognizes that there exists incontestably a grave hiatus which it belongs to the Government to fill.

Hence the intention of Mr. De Volder is to submit shortly to Parliament a project of law authorizing the Government to take itself, by general administration regulations, the measures of inspection and surveillance necessary to assure the repression of adulterations of provisions and drinks destined for consumption.

I will take care, Mr. Minister, to transmit to you, when they shall be published, the text of the project of law in question, and the parliamentary documents relative

thereto.

I seize this occasion, Mr. Minister, to renew, etc.

For the Minister.

Bon Lambermont, Secretary-General.

Mr. LAMBERT TREE,
Brussels.

# REPLY TO INQUIRY AS TO LAWS OF ITALY.

No. 225.]

LEGATION OF THE UNITED STATES, Rome, August 13, 1888.

SIR: In answer to the inquiries contained in your circular letter of July 10, 1888, respecting the laws and regulations now in force in the Kingdom of Italy relating to artificial butter, I have the honor to report that thus far the Italian Government has not attempted, either by law or by royal decree, to regulate the manufacture or sale of artificial butter. The minister of agriculture, commerce, and industry has recently submitted the matter to the council of agriculture, and this has charged one of the Government chemists with the duty of reporting on the best and simplest methods to distinguish genuine from artificial or adulterated butter. It is not intended, as I understand, to prohibit or interfere with the production or sale of elecmargarine or other forms of artificial butter, but simply as far as possible to protect the public against fraud and imposition.

I have the honor to be, sir, your obedient servant,

J. B. STALLO.

The Hon. T. F. BAYARD, Secretary of State.

# REPLY TO INQUIRY AS TO LAWS OF THE NETHERLANDS.

No. 12.]

UNITED STATES LEGATION, The Hague, August 24, 1888.

DEAR SIR: I have received a reply from the Government of The Netherlands informing me that no laws have been passed in this country bearing directly upon the fabrication of butter, but that the sale of oleomargarine or any artificial imitation of any other food product, under false representations and with the knowledge that it was not what the purchaser supposed he was buying, would constitute a crime under the penal code, and would be punishable by imprisonment.

I am, dear sir, your obedient servant,

R. B. ROOSEVELT.

Hon. THOMAS F. BAYARD, Secretary of State.

# REPLY TO INQUIRY AS TO LAWS OF SWITZERLAND.

No. 229.7

LEGATION OF THE UNITED STATES, Berne, August 15, 1888.

SIR: Referring to your circular letter of July 10, 1888, instructing this legation to furnish the Department with copies of all laws and regulations now in force in Switzerland relating to artificial butter, I have the honor to report that there is no federal law regulating the manufacture or sale of artificial butter. Only in a few cantons does there exist either cantonal or municipal laws appertaining to the same, although as a rule there prevails throughout Switzerland general cantonal laws and local police regulations touching the falsification or adulteration of provisions, without any specific mentioning of artificial butter. The only specific laws relating to butter, so far as I have been able to ascertain, are as follows:

In the canton of Berne it is provided that sellers of victuals or articles of consumption, which have in them artificial products (artificial wine, artificial butter, etc.,) even if they are claimed only for their own use, must be made known through bills posted up at the business house, and a failure to do so is subject to a fine of 5 to 100

francs.

In the canton of Zurich artificially prepared articles of food shall never be offered for sale or brought into traffic under the names and marks belonging only to genuine natural wares.

Preparations resembling milk butter, the fatty constituents of which do not come exclusively from milk, shall be marked "Artificial butter." Other grease intended for

use shall be marked according to its origin.

The preparation as well as sale of such article of food is subject to the immediate

control of the local sanitary authorities.

Contraventions of the provisions of this ordinance, where no mistake has occurred, shall be punished by a police fine not to exceed 1,000 francs.

Canton of St. Galle.—Fats (Fettwaaren) which are used in trade as a means of nourishment, and qualified as necessities of life shall be marked so that the purchaser and consumer may be sufficiently culightened in regard to their origin and composition.

As butter, there must be marked only on that made from milk, without the addi-

tion of any foreign ingredient, pure butter.

As artificial butter, every preparation resembling milk butter, the fat property of which is not exclusively produced from milk; but such compositions must contain at least 25 per cent. of pure butter.

Certain other fats used in consumption, which contain less than 25 per cent. of milk butter, or none at all, as hog, beef, and mutton fats, etc., or mixtures of the same, dare not be identified with artificial butter, but must be marked conformably to their origin.

These marks alone are binding as well for the wholesale as for the retail trade, and must also be applied to bills and invoices.

In order not to deceive consumers and assayers at the places of sale the vessels must bear the marks of their contents in a clearly distinct manner, "Butter," "Artificial butter," or the above-named kinds of fat. In the same way those fats offered for sale in these places must be made known to the public by placards.

The control of all fats (Fettwaaren) exercised by the proper authorities extends not only over products intended for sale, but also over their preparation and the places

and tools used therefor.

Violations of these rules will be punished by the municipal authority, through its

police department, with a fine not exceeding 150 francs.

In case of repetition the matter will be brought before the court commissioners, who shall extend the fine as high as 300 francs, besides a confiscation of the goods.

I am, sir, your obedient servant,

BOYD WINCHESTER.

Hon. T. F. BAYARD, Secretary of State, Washington, D. C.

# ADULTERATION OF FOOD AND DRUGS.

THE ACT TO PREVENT THE MANUFACTURE OR SALE OF ADULTERATED FOOD OR DRUGS IN THE DISTRICT OF COLUMBIA.

Under the provisions of sections 11 and 12 of an act to prevent the manufacture or sale of adulterated food or drugs in the District of Columbia, approved October 12, 1888, any health officer, inspector of nuisances, or food inspector of the District may submit samples of food or drugs to this office for analysis, and purchasers of food or drugs are also entitled to so submit the articles purchased. The Commissioner of Internal Revenue is required to cause such analysis to be made under such rules and regulations as may be prescribed by the Secretary of the Treasury. This office is also authorized by section 16 of said act to declare from time to time certain articles or preparations to be exempt from the provisions of the act.

In view of the additional duties imposed upon me as above stated, I have procured a report from the microscopist of this office on the subject of food adulterations, which is herewith submitted. European laws on the subject, and a list of publications relating to the adulteration of food and drugs and allied subjects prepared by him, are

likewise submitted.

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE, Washington, October 16, 1888.

SIR: I have the honor to submit the following report on adulterations of foods. The adulteration of alimentary substances has been practiced from the most ancient times, and numerous laws and regulations have been adopted in various coun-

tries to check and prohibit such sophistications.

France has taken the lead in protecting consumers of food from adulterations, and in 1802 the Conseil de Salubrité was established in Paris. In England as well as in France, Germany, and other Continental countries laws against the adulteration of individual articles, such as tea, coffee, beer, and wine have been passed since the Middle Ages. The first general Act was not passed in England till 1860, and this was amended in 1872. However, they were found unsatisfactory, and the Sale of Food and Drugs Act was passed in 1875, and further amended in 1879 in the endeavor to

obtain a workable law. This latter law is now in force, though the third and fourth sections of the act relating to the mixing, coloring, staining, or powdering of any article of food so as to injure health, or in the case of drugs so as to injure their quality, are practically of no value and unenforced because the fifth section provides that guilty knowledge is essential to the proof of the offense, and no prosecution, unless supported by very exceptional circumstances, would be successful under these sections. Sections six to nine are the ones that are found workable, and provide that no person shall sell foods or drugs, with certain exceptions, to the prejuduce of the purchaser; shall not abstract any constituents of food, and that compound foods or drugs must be in accordance with the demands of purchase, though with these sections again a large loop-hole for the escape of offenders is provided in section eight, which states that a legible descriptive notice that the article sold is a mixture exonerates the seller.

In this country in 1877 several of the State boards of health united, viz: Those of New York, New Jersey, Massachusetts, and Michigan, and at their instance laws formulated on the English law were passed, and annual reports are now made by these boards on the results of the examinations of their chemists on the adulterations of

foods and drugs practiced in their several States.

On June 26, 1848, an act was passed by Congress to secure the purity of imported drugs, and is still in force. Its efficacy is directed principally towards Peruvian bark and opium.

The tea adulteration law was passed by Congress March 2, 1883, and on August 2, 1886, the oleomargarine law was passed, defining butter and butter substitutes.

The following list of the most common adulterants met with in the principal food products is compiled from the reports of the State Boards of Health, the returns of the English Inland Revenue Department, and of the Report of the Municipal Laboratory of Paris.

FOOD PRODUCTS AND THEIR CHIEF ADULTERANTS.

Food products.	Adulterants.
Milk	Water, removal of cream, addition of cotton-seed or oleo oil to skim milk.
Butter	
Cheese	Lard, oleo oil, cotton seed oil.
Flour, bread	
Baker's chemicals	
Canned foods	
Tea	Exhausted tea leaves, foreign leaves, tannin, indigo, Prussian blue, turmeric, gypsum, soapstone, sand.
Coffee	Chicory, peas, beans, rye, corn, wheat, coloring matter.
Cocoa and chocolate.	Sugar, starch, flour.
Beer	Artificial glucose, malt and hop substitutes, sodium bicarbonate, salt, anti- septics.
Wines, liquors	
Sirup	Glucose.
Honey	Glucose-sirup, cane sugar.
Confectionery	Glucose, starch, artificial essences, poisonous pigments, terra alba, gypsum.
Olive oil	Cotton-seed and other vegetable oils.
Vinegar	Water, sulphuric acid.
Pickles	Salts of copper.
Spices	Flour, starches of various kinds, turmeric.

An inspection of this list shows that the great majority of substances used for adulterants are not injurious to health; the public is cheated but not poisoned. They consist for the most part in the willful and fraudulent addition of substances which do not exist in the normal product, or are only found there in an appreciably lower proportion. Another large class consists of simple alterations by the willful and fraudulent subtraction of some substance that is normally present in the product, and which is not found in the abnormal product, or only in an appreciably lower proportion.

The number of substances used that are positively injurious to health is small, and they generally make their presence felt by the prompt manner in which dangerous symptoms manifest themselves in the consumer. Such are the arsenic, copper, lead, and other metallic poisonous salts that are sometimes used for artificial colors in can-

dies, pickles, etc.

The use of antiseptics, such as salicylic acid, sulphite of soda, borax, etc., for the prevention of fermentation in improperly prepared foods, is daily becoming more frequent. These deserve mention as being additions to foods of a class of substances used to cloak carelessness in manufacture, and producing, in many cases, deleterious effects on the human economy. The addition of such antiseptics as salicylic acid to food products is prohibited in France and Germany, though in the latter country such

use is allowed when the food product is exported to countries where such addition is not prohibited.

It seems to be a popular impression that any substance used as an adulterant of, or a substitute for, a food product is to be avoided as itself being injurious to health. Such impression is erroneous in nearly every case. Oleomargarine, for instance, is a mixture of milk, cream, butter, suet fat, lard, cotton-seed oil in the lower grades, and salt, with a very small proportion of the coloring matter, annatto, used by farmers to produce the rich golden tint in their butters. The greatest cleanliness is observed throughout its manufacture, and the finished product, as well as all its ingredients, are perfectly pure and wholesome articles of food.

Food adulteration is carried on by manufacturers in the interest of pecuniary profit and gain, and they take pains to keep themselves well posted on the subject of cheap and harmless substitutes. This is well illustrated in the most recent form of milk adulteration. The whole milk is placed in centrifugal machines and nearly all the cream, fat, removed. The machines are then stopped, another drum called the emulsifier put in, or sometimes the same machine is used, the machines restarted, and a charge of cotton-seed oil or melted "oleo-oil" is then, together with the warmed skim milk, run in sufficiently to bring up the fat contents and specific gravity to those of ordinary milk. A description of such machines will be found in Engineering, vol. 44, 1887, p. 478. The manufacturers of these machines also describe such emulsifiers in their catalogues.

It would be an impossible, not to say a ridiculous attempt to convince any court or jury that ordinary potable water was either externally or internally "injurious to health," yet it is probably the most common adulterant used. The watering of milk is everywhere recognized as not only a fraud but also a very grave misdemeanor, if not actually a crime. This is the food on which the whole population under one year old is fed; and where the mother can not supply the proper nourishment for the child she must depend for its bringing up on cow's or other milk. It is self-evident that a pint of watered milk does not contain the same amount of nourishment as the same volume of whole milk, so that a child or invalid might be actually starved to death if compelled to rely on the former for its sole nourishment.

Many drugs are used both in the arts and in medicine, different degrees of purity being demanded for these different uses. We have such substances as the mineral acids and alkalies, salts of arsenic, antimony, copper, lead, mercury, etc.; alkaloids, as aconite, cocaine, morphine, strychnine, etc.; some organic acids and salts, that are found on the markets chemically pure, but which are universally conceded to be very "injurious to health," without any adulterations whatever. Whilst most medicines are drugs, some are not drugs, and again many drugs are not medicines. So that the definition of a medicine should be clearly stated in any law on the subject.

The last full returns of the number of samples examined by the public analysts of England, including London and fifty-four counties, under the Sale of Food and Drugs Acts, to which I have access, is for the year 1886, and the totals and percentages are set forth in the following table:

Table showing the total number of samples submitted, under the Sale of Food and Drugs acts in the year 1886, to the public analysts of England, and the number and proportion adulterated.

Articles.	Exam- ined.	Adul- terated.	Per cent.	Articles.	Exam- ined.	Adul- terated.	Per cent.
Milk Bread Flour Butter Coffee Sugar Mustard Pickles Jam	9, 819 991 .398 2, 322 1, 596 222 817 43 92	1, 275 32 2 401 241 104	13. 0 3. 2 0. 5 17. 3 15. 0	Confectionery Wines Beers Spirits Drugs Other articles Total	44 602 2, 297	1 3 17 410 47 280 2,813	0. 7 0. 7 2. 8 17. 8 10. 8 7. 4

This table is interesting as showing the extent of adulterations practiced in the samples submitted for examination in the whole of England.

Any general law on food adulteration should clearly define the terms "adulteration," "alteration," "imitation," and "substitution." It should also consider the use of antiseptics, of harmful coloring matters, and of the products of diseased animals. A clear and concise definition of the different food products as well as an accurate statement of what shall be the minimum composition of the principal ingredients of the chief food products would also be very desirable.

In this latter regard we have such standards as are derived from the average composition of a large number of analyses of genuine samples of the special food product ander consideration; for instance, the standards adopted by the English Society of Public Analysts for pure milk are as follows:

Specific gravity	1.030
Ashper cent.	0.70
Solids, not fatdo	
Fatdo	
Total solidsdo	11, 50
Waterdo	88.50

Those adopted by the Municipal Laboratory of Paris as the minimum limits for condemnation are:

	Per cent.
Fat	. 2.70
Milk-sugar	. 4.50
Caseine, albumen, and ash	. 4.30
Total solids	. 11.50
Water	. 88.50

In New York and New Jersey the legal standards are: Minimum amount of total solids, 12 per cent; maximum amount of water 83 per cent.; and 3 per cent. fat. In Massachusetts the milk must not contain more than 87 per cent. of water, nor less than 13 per cent. of milk solids.

The Union of Swiss Analysts have adopted the following for milk: Specific gravity

between 1.030 and 1.033; fat 3 per cent.

The law should be so worded and the penalties imposed for violations so severe that it will deter persons from engaging in the practice of adulteration of food products; in other words the risks incurred will not pay for any profit that might result from non-compliance with the law.

Possession or ownership of an adulterated article of food should be considered sufficient ground for conviction in a civil action without knowledge in the possession of the dealer that the same was adulterated, being demanded from the prosecution.

Many food products spoil in transportation, and penalties ranging from a nominal fine to imprisonment for a term of years should be provided, if, on account of dealing in and consumption of articles so spoiled, or in those injurious to health, a death or even a severe sickness is caused by the same.

The inspection of meat, fish, vegetables, fruit, and especially milk, should be done daily in any large city, and properly belongs to the health department of such city.

Provision should be made for the character of the packing and quality of the vessel, either metal or glass, in which food products are put up. Acid foods will attack and dissolve the solder with which tin packages are closed, and such foods should be put up in glass or acid-proof vessels. The drawing of liquids like beer, vinegar, etc., intended for food through lead or copper pipes should be prohibited, and iron or block-

tin pipes only allowed.

Where samples of food products are received from the public at large they should

Where samples of food products are received from the public at large they should the fortified the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot of the foot be accompanied with an affidavit stating the facts in the case and a small fee for the

analysis of the same should be paid in advance.

The law should provide for the procuring, by purchase or otherwise, of a sufficient sample and of properly identifying the same. Also for the proper chemical or physical examination by competent analysts, including the salaries of the force employed, the fitting up and maintaining a properly equipped laboratory, including chemicals, apparatus, and the purchase of samples by duly authorized agents.

All adulterated goods, when sold as such, should be so branded with the word "Adulterated," or the words "This is a mixture," in letters printed in broad-faced type at least one inch long and affixed in a secure and conspicuous place either by a label to the vessel containing the goods or on the goods themselves, and likewise such goods should be wrapped in paper or other covering with said words printed on both sides of the wrapper.

Respectfully submitted.

EDGAR RICHARDS. Microscopist.

Hon. Joseph S. Miller, Commissioner of Internal Revenue. FOREIGN LAWS, DECREES, AND REGULATIONS CONCERNING THE RE-PRESSION OF ADULTERATIONS PRACTICED ON ARTICLES OF FOOD AND OF DRINK.

#### AUSTRIA.

[Translated from the Revue Internationale des Falsifications des Denrées Alimentaires, Vol. I.]

In Cislithania, in accordance with a law contained in the Bulletin of Laws, No. 68, of the year 1870, it appertains to the municipalities to take the necessary police measures as to the subject of the trade in commodities for food.

Numerous ordinances are in existence, promulgated by the governors of provincesor by the minister of the interior, regulating both the traffic in wines in general, as well as the sale of eatables and beverages injurious to health. Special ordinances forbid the adulteration of commodities for food, such as wheat, flour, bread, various-pastries, milk, cream, cheese, oils, spices, wine, brandy, liquors, vinegar, etc.

The decree of the minister of state, dated May 1, 1886, contained in Bulletin No. 54, prohibits the use, in the manufacture of various articles, such as toys, clothing material, artificial flowers, of ingredients injurious to health, or the employment of sub-

stances of such nature in the preparation of eatables.

The Austrian penal code of 1852 (§§ 399 to 408) punishes the sale of commodities. for food dangerous to health, the unwholesome manufacture or preservation of eatables, as well as the adulteration of liquids or the use of unwholesome utensils.

The manufacture and trade in artificial wines are regulated by the law of the 21st

June, 1880, published in the Bulletin of Laws, No. 120.

As to the use of salicylic acid for the preservation of commodities, it is generally allowed. It is not, according to the penal code, a violation of the decree above mentioned except in case of exaggerated use. An infringement of this sort falls under the action of section 407 of the penal code.

law of the 21st of june, 1880, relative to the manufacture and sale of BEVERAGES SIMILAR TO WINE.

1. The manufacture of beverages similar to wine (commonly called artificial wines), as well as the manufacture of beverages with grape juice, added to and mixed with foreign substances, not with the object exclusively of improving the quality of the wine and for its better preservation, but serving to increase its alcoholic strength, should only be permitted for wholesale and retail sale, as being considered industrial products and subject to tax. These substances are then within the scope of the industrial laws.

Exception must be made for wine from the residuum of grapes, "vin de marc" (piquette), piccolo (vinetto), and for similar beverages made by the proprietors them-

selves, from their own crop, at their own house, for their own use.

2. Substances of the kind designated in the first paragraph of section 1 are subject, as before stated, to the tax on the consumption of wine.

3. The use of starch-sugar (glucose) in the manufacture of the beverages designated in section 1 is prohibited.

4. Beverages manufactured with the different substances mentioned in section 1

must not be labeled, placed on sale, nor sold at wholesale and retail as wine.

5. A violation of the provisions of sections 3 and 4 of this law, if it should not fall within the action of the common penal code, shall be punished by the commercial. authorities (l'autorité commerciale supérieure) with a fine of from 25 to 500 florins, and in case of non-payment by an imprisonment of one day for each 5 florins of fine.

The industrial authorities (Vautorité supérieure industrielle) should cause the destruction, at the expense of the condemned, of the beverages in question, when they

shall have been found injurious to health.

In case of a repetition of the offense, in addition to the fine and imprisonment, confiscation also of the beverage in question shall be imposed for the benefit of the poorfund of the district in which the misdemeanor has been committed.

And the condemnatory sentence shall be published in the local journals and in the customary places and manner at the expense of the condemned.

BULLETIN OF LAWS OF THE AUSTRIAN EMPIRE, YEAR 1866, PART XVIII, PUBLISHED AND PROMULGATED THE 12TH OF MAY, 1866.

Decree of the minister of state, conjointly with the minister of commerce, of justice, and of the police, of the 1st of May, 1866, relative to the use of poisonous coloring-matter, of preparations injurious to health in the manufacture of different articles of common use, and to their sale, in force in Bohemia, Lombardy-Venetia, Dalmatia, Galicia, Cracow, Austria, below and above the Ems, Salzbourg, Styria, Carinthia, Carinola, Moravia, Bukowina, Silesia, Tyrol, Vorarlberg, Geriz, and Gradiska, Istria, Trieste, and their environs.

 The use of coloring-matter containing the metals (iron excepted), gamboge, picric acid, and aniline is prohibited for articles of consumption of every sort (food or beverages), including devices and figures made of gum adraganth, starch, or sugar.

2. For coloring or painting children's toys no one shall use preparations or colorsing-matters containing arsenic, antimony, lead, cadmium, copper, cobalt, nickel, mercury (excepting pure cinnabar), zinc, or gamboge.

The use of other metallic coloring matters is tolerated, it is true, but in all cases the coloring matter must be entirely covered by a varnish which resists the action of

· moisture and is not easily rubbed off.

3. No one shall use substances the employment of which has been prohibited by section 2, or simply tolerated conditionally, for the manufacture of earthenware vessels which are intended to contain food, unless these coloring matters shall have been

4. The coloring with preparations of arsenic, of artificial flowers, or portions of natural plants plunged in a colored glaze, shall not be permitted unless a glazed varnish completely prevents the coloring matter from separating itself in powder.

This also applies to tapestries or wall-hangings containing arsenical colors, which may not be manufactured unless a glaze or varnish covers these tapestries and colored

articles.

5. It is forbidden to use coloring matters containing arsenic for painting the walls

of apartments and other places where people live and assemble.

6. For the preparation of articles of common use, of table and kitchen utensils, clothing, and all toilet articles, it is forbidden to use substances which, in the manner or form in which they are employed, may be dangerous to health.

7. The manufacture, as well as the sale, at wholesale or retail, of articles specified in the preceding paragraphs, which shall not fulfill the conditions above enunciated,

is forbidden.

8. Every violation of this decree, which does not come under the common law, shall be punished by virtue of the ministerial decree of September 30, 1857 (Bulletin of the "Laws, No. 198).

Decree of the ministers of agriculture, of commerce, of the interior, and of finance, of the 16th of September, 1880, relative to the law of June 21, 1880, as to the manufacture and the sale of beverages similar to wine.

1. In the spirit of the law of June 21, 1880, it is necessary to distinguish, apart from pure wine (that is to say, that which results from the alcoholic fermentation of grapejuice, wines which have been treated only for the purpose of improving their quality or to render their preservation more easy), the following products:

(1) Products resembling wine. Artificial wines, which are made without pressed grapes (marc de raisin), with a mixture imitating wine, of different substances, such

as water, brandy, glycerine, sugar, tartaric acid, cenanthic ether, etc.
(2) Products containing wine. Demi-wine, resulting from the addition to must or pure wine of water and other substances intended to reproduce the taste of wine in these diluted and attenuated liquids (glycerine, sugar, alcohol) or manufactured in the same manner from grape-residue (marc de raisin) which has already been used in the preparation of must.

With these last are included the products manufactured by the Gall process (the must is diluted with water, to which are added alcohol and sugar) and by the process of Petiot (the addition of sweetened water and the fermentation of the residue of grapes (debris de raisin) after the must is drawn off, or the thorough dilution and

washing of this residue with diluted alcohol.)

2. When these artificial wines (demi-wines) are placed on sale, either at wholesale or retail, they must be advertised as manufactured products and are subject to the prescriptions of the industrial decree (décret industrielle).

According to section 3 of the industrial decree, industries for the manufacturing of artificial wine and demi-wine are declared licensed industries (requiring to be

authorized).

It is required (§ 18) of the applicant to set forth the process he intends to use It is necessary that this should have been found harmless to the ...his manufacture. public health by the commercial authorities (l'autorité supérieure commerciale).

3. In accordance with the law (§2), an exception is made in favor of the manufacture of piquette and piccolo wine. The manufacture of these demi-wines does not scome within the scope of the industrial decree, and, according to Article V upon licensed importation, they must be considered as free agricultural products (in contradistinction to manufactured products), whether they be intended for sale or not, provided they have been manufactured by the proprietor himself, on his own premises, with the product of his own crop.

But when this condition is not fulfilled—when a person uses not only his own fruitresidue (marc), but that of others, the exception is no longer effective. The preceding § 2 then is applicable, and the manufacturer must take steps to obtain the

license for his business.

4. According to § 2 of the law, it is unnecessary to make further distinction in future between artificial wines and demi-wines in the collection of the tax on con-sumption. The tax must be paid on artificial and demi-wines under the same conditions and in the same proportions as for that commonly imposed on wine.

5. According to § 3 of the law, no person shall employ in the manufacture of artificial wines and demi-wines, any starch-sugar, or sugar or sirup prepared from the starch derived from fruits, grains, or potatoes, also called grape-sugar, potato-

This prohibition applies to the examination of the processes of manufacture, which

it is necessary to make with particular care in this respect.

6. According to the law, § 4, artificial wines and demi-wines must not be advertised under a title confounding them with wine; neither offered for sale, nor sold as

such, either at wholesale or retail.

Every designation shall be considered fraudulent which is calculated to deceive, as table wine, wine of such a year, of such a country, of such a mountain, red wine, sparkling wine, dessert wine, etc., and which consists in adding a qualification to the word wine, without explaining at the same time that this beverage is an artificial or

7. The industrial authorities (les autorités supérieures industrielles), according to

the law, should punish:

(1) the violation of § 1, relative to the enforcement of the industrial decree therein The establishing of a factory for the manufacture of artificial wine referred to. without having obtained a license is to be treated with especial severity.

(2) The violation of § 3 and § 4 of the law, by virtue of § 5 of said law. Under the same section punishment shall be enforced when there is at the same time manufacture without license and violation of §§ 3 and 4 of the special law.

8. When, in the course of inspection, it is desirable to have an exact analysis of the beverages in question (for want of a statement by the manufacturer or retailer, or lacking a sufficiently precise knowledge of the processes and ingredients which are: used in the manufacture), the commercial authorities shall have recourse to a competent expert for the chemical analysis of the wine, and may require his testimony. Until this testimony has been received from him, it is necessary in all cases to take a sample of a half-liter of the beverage and send it, securely fastened and officially sealed, to the minister of agriculture for examination.

9. The commercial authorities, the health officers, and the market police should seeto the execution of the provisions of the present law. These officers can for this purpose, at the places under their surveillance, take a sample of these beverages, giving: payment for it, and should in the presence of the merchant or his representative, seal

it and send it with a report to the higher authority (l'autorité supérieure).

10. Until a new regulation, the competent industrial authorities (l'autorité industrielle) shall describe severally, all the licenses given for the manufacture of artificial and demi-wine.

They will transmit every six months to the political authorities of the province (l'autorité supérieure politique) the list of the different punishments and their effect,. that it may thence be transmitted to the minister of agriculture.

False statements must not be rendered.

# HUNGARY.

#### LAW XIV OF THE YEAR 1876, RELATIVE TO THE ORGANIZATION OF PUBLIC HYGIENE...

ART. 8. Food, beverages, and vessels injurious to health, as well as substances, materials, and products dangerous and prohibited, unless specially authorized, may, in addition to the penalties imposed in the preceding paragraph, be confiscated by the police and destroyed.

[The penalties prescribed by article 7 are a maximum fine of 300 florins, or, in case of insolvency, sixty days in prison. The fines are turned over to the funds of thedistrict where the violation of law has been committed and applied to the expenses

of the public hygiene.]

ART. 14. The sale is forbidden of unwholesome fruit, of suspected mushrooms, of foods spoiled and deteriorated by the mixture with injurious materials, of adulterated beverages; also the manufacture and the use of utensils and vessels employed in the manufacture and the preservation of the above-mentioned substances.

ART. 107. The bottling and preservation of mineral waters and the sale of artificials

mineral waters shall be regulated by direction of law.

ART. 108. Artificial mineral waters shall only be manufactured by the permission. of the authorities, under the supervision and direction of a graduated apothecary or

In cases of repeated violations the permission may be withdrawn.

[Translated from Revue Internationale des Falsifications des Deurées Alimentaires, Vol. I.]

#### LAW OF THE 19TH OF MAY, 1829.

ARTICLE 1. Whoever shall mix, or cause to be mixed, sulphate of copper (blue vitriol), or sulphate of zinc (white vitriol), or any other poisonous material in bread or other eatables, or in the ingredients which enter into the manufacture of bread or other eatables, the one or the other being intended to be sold or distributed, shall be punished with an imprisonment of from two to five years and a fine of from 200 to 500 francs; the license of the offender shall at the same time be withdrawn, and he shall be deprived of the right of obtaining a like license during the term of his im-

ART. 2. The person shall suffer the like penalties who shall have mixed, or cause to be mixed, poisonous materials, such as those named in the above article, with beverages or with the ingredients which enter into their manufacture, the one or the other

being intended to be sold or distributed.

ART. 3. The penalties imposed by the preceding articles are equally applicable to every person who, knowing that some poisonous materials, such as those named in these articles, have been mixed with bread, with other eatables, with beverages, or with the ingredients which are destined to enter into the manufacture of bread, other eatables, or beverages, shall have sold, retailed, or distributed, or who shall have attempted to sell, retail, or distribute, or cause to be distributed such bread, eatables, or beverages; also, whoseever shall have sold or bought the poisonous material, knowing that it might be employed to commit a misdemeanor.

ART. 4. By amplification and modification of article 318 of the penal code now in force (§ 1), the penalties prescribed by said article 318 are declared applicable to whosoever shall mix, or cause to be mixed, materials injurious to health with bread or other eatables or with beverages, or with the ingredients entering into the manufacture of bread, other eatables, or beverages, the one or the other intended to be sold or distributed, as well as every person who, knowing that injurious materials have been mixed with such eatables, beverages, or their ingredients, shall have sold, retailed, or attempted to sell, retail, distribute, or cause to be distributed, the same.

ART. 5. In case of the repetition of the misdemeanors provided for by the preced-

ing articles, the provisions of article 58 of the penal code now in force shall be appli-

ART. 6. In addition to the penalties above mentioned in articles 1, 2, 3, and 5, the judge may direct that the sentence shall be posted and published at the expense of

the condemned.

ART. 7. Beside the enforcement of the penalties prescribed by these laws, the bread, eatables, or the ingredients which are destined to enter into the manufacture of the bread, eatables, or beverages, with which poisonous or injurious materials shall have been mixed, shall in every case be confiscated and destroyed.

ART. 8. This present law does not derogate in any manner from the provisions contained in article 302 of the penal code now in force, concerning those persons who are guilty of the crime of poisoning, as this crime is defined in article 301 of the

same code.

LAW OF MARCH 17, 1856, FOR THE REPRESSION OF THE ADULTERATION OF COM-MODITIES FOR FOOD.

ARTICLE 1. Those who shall have adulterated, or caused to be adulterated, any eatables or beverages, any commodities or materials for food whatsoever, intended to be sold or retailed, shall be punished with an imprisonment of from eight days to one year and with a fine of from 50 to 1,000 francs, or one of these two penalties only.

ART: 2. The penalties imposed by the preceding articles shall be inflicted upon-(1) Whoever shall sell, retail, or expose for sale, knowing them to be adulterated,

any eatables, beverages, commodities, or substances for food whatsoever;

(2) Whoever, either by placards affixed, or by notices printed, or otherwise, published, sold, or distributed, shall have maliciously given instructions necessary to facilitate or to disseminate the processes of adulteration of the said eatables or beverages, commodities, or articles for food.

ART. 3. Those shall be punished with imprisonment of from eight days to six months and with a fine of from 26 to 50 francs, or with one of these two penalties only who shall have in their warehouses, shops, or in any other place, eatables, beverages, commodities, or articles for food intended to be sold or retailed, knowing that

they are adulterated.

ART. 4. In the cases provided for by articles 1 and 2 of the present law, 318 of the penal code, § 1, and § 4 of the law of May 19, 1829, when the offender shall be condemned to an imprisonment of more than six months, his license shall at the same time be withdrawn and he shall not have the right to obtain another during the term of his imprisonment. The court may always order that the sentence be posted in such places as it shall designate, and be inserted, entire or by extracts, in the journals which it shall indicate, all at the expense of the condemned.

ART. 5. The preceding provisions shall be applied without prejudice to the heavier

penalties provided by the penal code or by special laws.

ART 6. Those who, without the criminal intent provided for in article 2, shall have sold, retailed, or exposed for sale adulterated eatables, beverages, or commodities for food, shall be punished in conformity with articles 475 and 476 of the penal code. case of a repetition of the offense, the penalty of imprisonment, not exceeding five

days, may be imposed.

ÄRT. 7. In sentencing to a fine, the courts and tribunals shall order that in default of payment within two months from the rendering of the judgment-if upon a hearing of the adverse parties being had and with legal notice thereof it is entered by default—this fine may be changed to correctional imprisonment (i. e., for misdemeanors punishable either with fine or imprisonment) which must not exceed the term of one year, in cases provided for by articles 1, 2, 3, and 10, or by an imprisonment by the police court, which must not exceed the term of seven days, in the cases mentioned by the preceding article. The condemned may always be liberated from the imprison-

ment upon the payment of the fine.

ART. 8. In that which concerns the sentencing of costs, accruing to the profit of the State, the duration of arrest for debt shall be determined by the judgment or sentence, provided it shall not be for less than eight days, nor more than one year or one month, according as the infraction shall be a misdemeanor or a mere violation of police regulation. Nevertheless, condemned persons who shall prove their insolvency according to the manner prescribed by the criminal code of instruction, shall be set at liberty, after having submitted to seven days of arrest, when the costs shall not exceed 25 francs. Arrest for debt is neither exercised nor maintained against convicted persons over seventy years of age.

ART. 9. Adulterated eatables, beverages, commodities, or substances for food, which

are found in possession of the offenders, shall be seized and confiscated. If they can be used as food, they shall be placed at the disposal of the bureau of charities of the district where the misdemeanor has been committed, unless their destruction or

diffusion shall be ordered.

ART. 10. In the cases provided for in article 318 of the penal code, and § 4 of the law of 19th May, 1829, the penalty of imprisonment shall be for from eight days to two years, and the fine from 50 to 1,000 francs. These penalties may be applied cumula-

tively or separately.

ART. 11. When extenuating circumstances exist in favor of the accused, the penalties of imprisonment and fine prescribed by articles 1, 2, 3, and 10 of the present law may be reduced to less than eight days and 26 francs respectively, provided they shall not in any case be less than those of the police court.

# PENAL CODE OF THE 8TH JUNE, 1867.

#### [Translated from an official copy.]

ART. 454. Any one who shall have mixed or caused to be mixed, whether with eatables, or beverages, or with articles or commodities for food whatsoever, intended to be sold or retailed, materials which are of a nature to cause the death or serious illness of a person, shall be punished with an imprisonment of from six months to five years and with a fine of from 2 to 2,000 francs.

ART. 455. Those shall be punished with the penalties prescribed by the preceding

article:

Who sell, retail or expose for sale any eatable, beverage, article or commodity for food whatsoever, knowing that it contains materials of a nature to cause the death or serious illness of a person;

Who shall have sold or purchased these materials, knowing that they might be used to adulterate the articles or commodities for food.

ART. 456. Those shall be punished with an imprisonment of from three months to

three years and with a fine of from 100 to 1,000 francs:

Who shall have in their warehouses, shops, or in any other place, eatables, beverages, commodities or articles of food, intended to be sold or retailed, knowing that they contain materials of a nature to cause the death or serious illness of a person.

ART. 457. Adulterated eatables, beverages, commodities or articles of food shall be

seized, confiscated and rendered unfit for use.

The license of the offender shall be taken from him; and he shall not be able to obtain another during the term of his imprisonment.

He may be in addition condemned to the prohibition in conformity with article 33.* The tribunal may prescribe that the sentence shall be posted in the places it shall designate and inserted entire or by extracts in the journals which it shall indicate

all at the expense of the condemned.

ART. 498. Those shall be punished with an imprisonment of from one month to one year and with a fine of from 50 to 1,000 francs, or by one of these penalties only,

who shall have deceived the purchaser:

As to the identity of the goods sold, in fraudulently delivering an article other than

the specified one as to which the transaction was conducted;

As to the nature or origin of the goods sold in selling or delivering to the purchaser an article differing but resembling in appearance that which he bought or thought to buy.

ART. 499. Those shall be condemned to an imprisonment of from eight days to one year and to a fine of from 26 to 1,000 francs, or to one of these penalties only, who, by fraudulent manipulations, shall have deceived the purchaser as to the quantity of

the article sold.

ART. 500. Those shall be punished with an imprisonment of from eight days to one year and with a fine of from 50 to 1,000 francs, or with one of these two penalties only:

Who shall have adulterated or caused to be adulterated commodities or beverages suitable for food, and intended to be sold or retailed;

Who shall have sold, retailed or exposed for sale these articles, knowing that they were adulterated:

Who, by label or notice, printed or not, shall have maliciously or fraudulently set forth or revealed methods for the adulteration of the same.

ART. 501. Those shall be punished with an imprisonment of from eight days to six months and with a fine of from 26 to 500 francs, or with one of these penalties only, with whom shall be found commodities or beverages suitable for food and intended to be sold or retailed, and who knew that they were adulterated.

ART. 502. In the cases provided for in the two preceding articles, the tribunal may order that the sentence shall be posted in the places it shall designate and inserted, entire or by extracts, in the journals which it shall indicate; all at the expense of

the condemned.

If the offender is condemned to an imprisonment exceeding six months, the license shall be taken away from him and he shall not be able to obtain another during the term of his sentence.

ART. 503. Adulterated commodities for food or beverages found in the possession of

the offender shall be seized and confiscated.

If they may be fit for food, they shall be placed at the disposition of the authorities where the misdemeanor has been committed, charged with their distribution to the hospitals or bureau of charity, according to the needs of these establishments; in the contrary case, the seized articles shall be rendered unfit for use.

ART. 504. The provisions of article 462† shall be applicable to the misdemeanors

provided in articles 496, 498, and 499.

ART. 561. Those shall be punished with a fine of from 10 to 20 francs and with an imprisonment of from one to five days, or with one of these penalties only:

(2) Who shall have sold, or retailed or exposed for sale eatables, beverages, commodities or articles for food spoiled or decomposed;

*ART. 33. The courts and tribunals may, in the cases provided for by the law, forbid. totally or partly, to the condemned guilty of misdemeanors (correctionnels), the rights enumerated in article 31, for a term of from five to ten years.

ART. 31. All sentences of condemnation to the penalty of death or hard labor shall

propounce, against the condemned, the perpetual interdiction of the right:

(1) To again fill any public functions, employments, or offices;

(2) To vote, for election, or for eligibility;
(3) To wear any decoration, any title of nobility;

(4) To be sworn as expert, witness to an instrument or voucher to deeds; to give evidence for the sake of justice otherwise than for simple information (simple renseignement);

(5) To take part in family councils, to be appointed to the position of guardian, legal guardian (subrogé) or trustee, if it be not to the interest of their children and upon the judgment formed by the family council; as well as to again fill the function

of judicial councilor or provisional administrator;

(6) To carry arms, to enlist in the militia (garde civique) or to serve in the army. † ART. 462. Damages shall only be imposed for theft committed by married people to the prejudice of their consorts; by a widower or widow, as to those goods which have belonged to their deceased spouse; by descendants, to the prejudice of their progenitors, by progenitors to the prejudice of their descendants, or by relatives of the same degree.

All other persons who shall have participated in these thefts or concealed all or part of the articles stolen shall be punished as if the preceding provisions did not exist.

(3) Who, without the fraudulent intention contemplated by article 500 (1), shall have sold, retailed or exposed for sale adulterated eatables, beverages, commodities or articles for food.

Eatables, beverages, commodities or articles for food spoiled, decomposed, or adulterated, which shall be found in possession of the offender, shall be seized and confiscated.

If they may serve as food, they shall be placed at the disposal of the authorities where the deed shall have been committed, charged with their distribution to the hospitals or bureau of charity, according to the needs of these establishments; in the

contrary case, the seized articles shall be rendered unfit for use.

ART. 562. * * * Concerning the infractions provided for by the preceding article, the judge may, in case of a repetition of the offense, impose, in addition, the penalty

of imprisonment not exceeding nine days.

ART. 565. It shall be a repetition of the offense, in the cases provided for by the four preceding articles (561 et seq.), when the transgressor has already been condemned, in the twelve months preceding, for the same infraction and by the same tribunal.

ART. 566. When, in the cases provided for by the four preceding articles (561 et seq.). extenuating circumstances exist, the fine may be reduced to 5 francs, but it shall not be, in any case, less than 1 franc.

36. Title of the Act. Schedule.

CHAPTER 63.—An Act to repeal the Adulteration of Food Acts, and to make better provision for the Sale of Food and Drugs in a pure state. (11th August, 1875.)

Whereas it is desirable that the Acts now in force relating to the adulteration of food should be repealed, and that the law regarding the sale of food and drugs in a pure and genuine condition should be amended:

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the

advice and consent of the Lords Spiritual and Temporal, and Commons, in this present

Parliament assembled, and by the authority of the same, as follows:

1. From the commencement of this Act the statutes of the twenty-third and twenty-fourth of Victoria, chapter 84; of the thirty-first and thirty-second of Victoria, chapter 121, section 24; of the thirty-third and thirty-fourth of Victoria, chapter 26 section 3, and of the thirty fifth and thirty-sixth of Victoria, chapter 74, shall be repealed except in regard to any appointment made under them and not then determined, and in regard to any offence committed against them or any prosecution or other act commenced and not concluded or completed, and any payment of money then due in respect of any provision thereof.

2. The term "food" shall include every article used for food or drink by man,

other than drugs or water:

The term "drug" shall include medicine for internal or external use:

The term "county" shall include every county, riding, and division, as well as every county of a city or town not being a borough:

The term "justices" shall include any police and stipendiary magistrate invested. with the powers of a justice of the peace in England, and any divisional justices in Ireland.

Description of Offenses.

3. No person shall mix, color, stain, or powder, or order or permit any other person to mix, color, stain, or powder, any article of food with any ingredient or material so as to render the article injurious to health, with intent that the same may be sold in that state, and no person shall sell any such article so mixed, colored, stained, or powdered, under a penalty in each case not exceeding £50 for the first offense; every offense, after a conviction for a first offense, shall be a misdemeanor, for which the person, on conviction, shall be imprisoned for a period not exceeding six months with hard labor.

4. No person shall, except for the purpose of compounding as herein-after described, mix, color, stain, or powder, or order or permit any other person to mix, color, stain, or powder, any drug with any ingredient or material so as to affect injuriously the quality or potency of such drug, with intent that the same may be sold in that state, and no person shall sell any such drug so mixed, colored, stained, or powdered, under the same penalty in each case respectively as in the preceding section for a first and

subsequent offense.

5. Provided that no person shall be liable to be convicted under either of the two last foregoing sections of this Act in respect of the sale of any article of food, or of any drug, if he shows to the satisfaction of the justice or court before whom he is charged that he did not know of the article of food or drug sold by him being somixed, colored, stained, or powdered as in either of those sections mentioned, and that he could not with reasonable diligence have obtained that knowledge.

6. No person shall sell, to the prejudice of the purchaser any article of food or any drug which is not of the nature, substance, and quality of the article demanded by such purchaser, under a penalty not exceeding £20; provided that an offense shall not be deemed to be committed under this section in the following cases; that is to say,

(1) Where any matter or ingredient not injurious to health has been added to the food or drug because the same is required for the production or preparation thereof as an article of commerce, in a state fit for carriage or consumption and not fraudulently to increase the bulk, weight, or measure of the food or drug, or conceal the inferior quality thereof;

(2) Where the drug or food is a proprietary medicine, or is the subject of a patent in force, and is supplied in the state required by the specification of the patent;
(3) Where the food or drug is compounded as in this act mentioned;
(4) Where the food or drug is unavoidably mixed with some extraneous matter in

the process of collection or preparation.

7. No person shall sell any compound article of food or compounded drug which as not composed of ingredients in accordance with the demand of the purchaser, under

penalty of not exceeding £20.

8. Provided that no person shall be guilty of any such offense as aforesaid in respect of the sale of an article of food or a drug mixed with any matter or ingredient not injurious to health, and not intended fraudulently to increase its bulk, weight, or measure, or conceal its inferior quality, if at the time of delivering such article or drug he shall supply to the person receiving the same a notice, by a label distinctly and legibly written or printed on or with the article or drug, to the effect that the same is mixed.

9. No person shall, with the intent that the same may be sold in its altered state without notice, abstract from an article of food any part of it so as to affect injuriously its quality, substance, or nature, and no person shall sell any article so altered without making disclosure of the alteration, under a penalty in each case not ex-

ceeding £20.

Appointment and Duties of Analysts, and Proceedings to obtain Analysis.

In the city of London and the liberties thereof the Commissioners of Sewers of the city of London and the liberties thereof, and in all other parts of the metropolis the vestries and district boards acting in execution of the Act for the better local management of the metropolis, the court of quarter sessions of every county, and the town council of every borough having a separate court of quarter sessions, or having under any general or local Act of Parliament or otherwise a separate police establishment, may, as soon as convenient after the passing of this Act, where no appointment has been hitherto made, and in all cases as and when vacancies in the office occur, or when required so to do by the Local Government Board, shall, for their respective city, districts, counties, or boroughs, appoint one or more persons possessing competent knowledge, skill, and experience, as analysts of all articles of food and drugs sold within the said city, metropolitan districts, counties, or boroughs, and shall pay to such analysts such remuneration as shall be mutually agreed upon, and may remove him or them as they shall deem proper; but such appointments and removals shall at all times be subject to the approval of the Local Government Board, who may require satisfactory proof of competency to be supplied to them, and may give their approval absolutely or with modifications as to the period of the appointment and removal, or otherwise: Provided, That no person shall hereafter be appointed an analyst for any place under this section who shall be engaged directly or indirectly in any trade or business connected with the sale of food, or drugs in such place.

In Scotland the like powers shall be conferred and the like duties shall be imposed apon the commissioners of supply at their ordinary meetings for counties, and the commissioners or boards of police, or where there are no such commissioners or boards, upon the town councils for boroughs within their several jurisdictions; provided that one of Her Majesty's Principal Secretaries of State in Scotland shall be substituted for

the Local Government Board of England.

In Ireland the like powers and duties shall be conferred and imposed respectively upon the grand jury of every county and town council of every borough; provided that the Local Government Board of Ireland shall be substituted for the Local Government.

ment Board of England.

11. The town council of any borough may agree that the analyst appointed by any neighboring borough or for the county in which the borough is situated, shall act for their borough during such time as the said council shall think proper, and shall make due provision for the payment of his remuneration, and if such analyst shall consent, he shall during such time be the analyst for such borough for the purposes of this Act.

12. Any purchaser of an article of food or of a drug in any place being a district; county, city, or borough where there is any analyst appointed under this or any Act hereby repealed shall be entitled, on payment to such analyst of a sum not exceeding 10s. 6d., or if there be no such analyst then acting for such place, to the analyst of another place, of such sum as may be agreed upon between such person and the analyst, to have such article analyzed by such analyst, and to receive from him a certificate of the result of his analysis.

13. Any medical officer of health, inspector of nuisances, or inspector of weights and measures, or any inspector of a market or any police constable under the direction and at the cost of the local authority appointing such officer, inspector, or constable, or charged with the execution of this Act, may procure any sample of food or drugs, and if he suspect the same to have been sold to him contrary to any provision of this Act,

shall submit the same to be analyzed by the analyst of the district or place for which he acts, or if there be no such analyst then acting for such place, to the analyst of another place, and such analyst shall, upon receiving payment as is provided in the last section, with all convenient speed analyze the same and give a certificate to such

officer, wherein he shall specify the result of the analysis.

14. The person purchasing any article with the intention of submitting the same to analysis shall, after the purchase shall have been completed, forthwith notify to the seller or his agent selling the article his intention to have the same analyzed by the public analyst, and shall offer to divide the article into three parts to be then and there separated, and each part to be marked and sealed or fastened up in such manner as its nature will permit, and shall, if required to do so, proceed accordingly, and shall deliver one of the parts to the seller or his agent.

He shall afterwards retain one of the said parts for future comparison, and submit the third part, if he deems it right to have the article analyzed, to the analyst.

15. If the seller or his agent do not accept the offer of the purchaser to divide the article purchased in his presence, the analyst receiving the article for analysis shall divide the same into two parts, and shall seal or fasten up one of those parts, and shall cause it to be delivered, either upon receipt of the sample or when he supplies his certificate to the purchaser, who shall retain the same for production in case proceedings shall afterwards be taken in the matter.

16. If the analyst do not reside within 2 miles of the residence of the person requiring the article to be analyzed, such article may be forwarded to the analyst through the post office as a registered letter, subject to any regulations which the Postmaster-General may make in reference to the carrying and delivery of such article,

and the charge for the postage of such article shall be deemed one of the charges of this Act or of the prosecution, as the case may be.

17. If any such officer, inspector, or constable, as above described, shall apply to purchase any article of food or any drug exposed to sale, or on sale by retail on any premises or in any shop or stores, and shall tender the price for the quantity which he shall require for the purpose of analysis, not being more than shall be reasonably requisite, and the person exposing the same for sale shall refuse to sell the same tosuch officer, inspector, or constable, such person shall be liable to a penalty not exceeding £10.

18. The certificate of the analysis shall be in the form set forth in the schedule

hereto, or to the like effect.

19. Every analyst appointed under any Act hereby repealed or this Act shall report quarterly to the authority appointing him the number of articles analyzed by him under this Act during the foregoing quarter, and shall specify the result of each analysis and the sum paid to him in respect thereof, and such report shall be presented at the next meeting of the authority appointing such analyst, and every such authority shall annually transmit to the Local Government Board, at such time and insuch form as the Board shall direct, a certified copy of such quarterly report.

## Proceedings against Offenders.

20. When the analyst, having analyzed any article shall have given his certificate of the result, from which it may appear that an offense against some one of the provisions of this Act has been committed, the person causing the analysis to be mademay take proceedings for the recovery of the penalty herein imposed for such offense, before any justices in petty sessions assembled having jurisdiction in the place wherethe article or drug sold was actually delivered to the purchaser, in a summary manner.

Every penalty imposed by this act shall be recovered in England in the manner prescribed by the eleventh and twelfth of Victoria, chapter 43. In Ireland such penalties and proceedings shall be recoverable, and may be taken with respect to the police district of Dublin metropolis, subject and according to the provisions of any Act regulating the powers and duties of justices of the peace for such district, or of the police of such district; and with respect to other parts of Ireland, before a justice or justices of the peace sitting in petty sessions, subject and according to the provisions of "The-Petty Sessions (Ireland) Act, 1851," and any Act amending the same.

Every penalty herein imposed may be reduced or mitigated according to the judg-

ment of the justices.

21. At the hearing of the information in such proceeding the production of the certificate of the analyst shall be sufficient evidence of the facts therein stated, unless the defendant shall require that the analyst shall be called as a witness, and the parts-of the articles retained by the person who purchased the article shall be produced, and the defendant may, if he think fit, tender himself and his wife to be examined on his behalf, and he or she shall, if he so desire, be examined accordingly.

22. The justices before whom any complaint may be made, or the court before whom any appeal may be heard, under this Act may, upon the request of either party, in their discretion cause any article of food or drug to be sent to the Commissioners of Inland Revenue, who shall thereupon direct the chemical officers of their department at Somerset House to make the analysis, and give a certificate to such justices of the result of the analysis; and the expense of such analysis shall be paid by the com-

plainant or the defendant as the justices may by order direct.

23. Any person who has been convicted of any offense punishable by any Act hereby repealed or by this Act by any justices may appeal in England to the next general or quarter sessions of the peace which shall be held for the city, county, or town or place wherein such conviction shall have been made, provided that such person enter into a recognizance within three days next after such conviction, with two sufficient sureties, conditioned to try such appeal, and to be forthcoming to abide the judgment and determination of the court at such general or quarter sessions, and to pay such costs as shall be by such court awarded; and the justices before whom such conviction shall be had are hereby empowered and required to take such recognizance; and the court at such general or quarter sessions are hereby required to hear and determine the matter of such appeal, and may award such costs to the party appealing or appealed against as they or he shall think proper.

In Ireland any person who has been convicted of any offense punishable by this act may appeal to the next court of quarter sessions to be held in the same division of the county where the conviction shall be made by any justice or justices in any petty sessions district, or to the recorder at his next sessions where the conviction shall be made by the divisional justices in the police district of Dublin metropolis, or to the recorder of any corporate or borough town when the conviction shall be made by any justice or justices in such corporate or borough town (unless when any such sessions shall commence within ten days from the date of any such conviction, in which case, if the appellant sees fit, the appeal may be made to the next succeeding sessions to be held for such division or town), and it shall be lawful for such court of quarter sessions or recorder (as the case may be) to decide such appeal, if made in such form and manner and with such notices as are required by the said Petty Sessions Acts respectively hereinbefore mentioned as to appeals against orders made by justices at petty sessions, and all the provisions of the said Petty Sessions Acts respectively as to making appeals and as to executing the orders made on appeal, or the original orders where the appeals shall not be duly prosecuted, shall also apply to any appeal made under this Act.

24. In any prosecution under this Act, where the fact of an article having been sold in a mixed state has been proved, if the defendant shall desire to rely upon any exception or provision contained in this Act, it shall be incumbent upon him to prove

the same.

25. If the defendant in any prosecution under this Act prove to the satisfaction of the justices or court that he had purchased the article in question as the same in nature, substance, and quality as that demanded of him by the prosecutor, and with a written warranty to that effect, that he had no reason to believe at the time when he sold it that the article was otherwise, and that he sold it in the same state as when he purchased it, he shall be discharged from the prosecution, but shall be liable to pay the costs incurred by the prosecutor, unless he shall have given due notice to him that he

will rely on the above defense.

Every penalty imposed and recovered under this Act shall be paid in the case of a prosecution by any officer, inspector, or constable of the authority who shall have appointed an analyst or agreed to the acting of an analyst within their district, to such officer, inspector, or constable, and shall be by him paid to the authority for whom he acts, and be applied towards the expenses of executing this Act, any Statute to the contrary notwithstanding; but in the case of any other prosecution the same shall be paid and applied in England according to the law regulating the application of penalties for offenses punishable in a summary manner, and in Ireland in the manner directed by the Fines Act, Ireland, 1851, and the Acts amending the same.

27. Any person who shall forge, or shall utter, knowing it to be forged for the purposes of this Act, any certificate or any writing purporting to contain a warranty, shall be guilty of a misdemeanor and be punishable on conviction by imprisonment

for a term of not exceeding two years with hard labor;
Every person who shall willfully apply to an article of food, or a drug, in any proceedings under this Act, a certificate or warranty given in relation to any other article or drug, shall be guilty of an offense under this Act, and be liable to a penalty not exceeding £20;

Every person who shall give a false warranty in writing to any purchaser in respect of an article of food or a drug sold by him as principal or agent, shall be guilty of an

offense under this Act, and be liable to a penalty not exceeding £20;
And every person who shall willfully give a label with any article sold by him which shall falsely describe the article sold, shall be guilty of an offense under this

Act, and be liable to a penalty not exceeding £20.

28. Nothing in this Act contained shall affect the power of proceeding by indictment, or take away any other remedy against any offender under this Act, or in any way interfere with contracts and bargains between individuals, and the rights and remedies belonging thereto.

Provided that in any action brought by any person for a breach of contract on the sale of any article of food or of any drug, such person may recover alone or in addition to any other damages recoverable by him the amount of any penalty in which he may have been convicted under this Act, together with the costs paid by him upon such conviction and those incurred by him in and about his defense thereto, if he prove that the article or drug the subject of such conviction was sold to him as and for an article or drug of the same nature, substance, and quality as that which was demanded of him, and that he purchased it not knowing it to be otherwise, and afterwards sold it in the same state in which he purchased it; the defendant in such action being nevertheless at liberty to prove that the conviction was wrongful, or that the amount of costs awarded or claimed was unreasonable.

## Expenses of executing the Act.

29. The expenses of executing this Act shall be borne, in the city of London and the liberties thereof, by the consolidated rates raised by the Commissioners of Sewers of the city of London and the liberties thereof, and in the rest of the metropolis by any rates or funds applicable to the purposes of the Act for the better local management of the metropolis, and otherwise as regards England, in counties by the county rate, and in boroughs by the borough fund or rate;

And as regards Ireland, in counties by the grand jury cess, and in boroughs by the borough fund or rate; all such expenses payable in any county out of grand jury cess

shall be paid by the treasurer of such county; and

The grand jury of any such county shall, at any assizes at which it is proved that any such expenses have been incurred or paid without previous application to presentment sessions, present to be raised off and paid by such county the moneys required to defray the same.

## Special Provision as to Tea.

30. From and after the 1st day of January, 1876, all tea imported as merchandise into and landed at any port in Great Britain or Ireland shall be subject to examination by persons to be appointed by the Commissioners of Customs, subject to the approval of the Treasury, for the inspection and analysis thereof, for which purpose samples may, when deemed necessary by such inspectors, be taken and with all convenient speed be examined by the analysts to be so appointed; and if upon such analysis the same shall be found to be mixed with other substances or exhausted tea, the same shall not be delivered unless with the sanction of the said commissioners, and on such terms and conditions as they shall see fit to direct, either for home consumption or for use as ships' stores or for exportation; but if on such inspection and analysis it shall appear that such tea is, in the opinion of the analyst, unfit for human food, the same shall be forfeited and destroyed or otherwise disposed of in

such manner as the said commissioners may direct.

31. Tea to which the term "exhausted" is applied in this Act shall mean and include any tea which has been deprived of its proper quality, strength, or virtue by

steeping, infusion, decoction, or other means.

32. For the purposes of this Act every liberty of a cinque port not comprised within the jurisdiction of a borough shall be part of the county in which it is situated, and subject to the jurisdiction of the justices of such county.

33. In the application of this Act to Scotland the following provisions shall have

(1) The term "misdemeanor" shall mean "a crime or offense:"
(2) The term "defendant" shall mean "defender" and include "respondent:"
(3) The term "information" shall include "complaint:"

(4) This Act shall be read and construed as if for the term "justices," wherever it occurs therein, the term "sheriff" were substituted:

(5) The term "sheriff" shall include "sheriff substitute:"
(6) The term "borough" shall mean any royal burgh and any burgh returning or contributing to return a member to Parliament:

(7) The expenses of executing this Act shall be borne in Scotland, in counties, by

the county general assessment, and in burghs by the police assessment:

(8) This Act shall be read and construed as if for the expression "the Local Government Board," wherever it occurs therein, the expression "one of Her Majesty's Principal Secretaries of State" were substituted:

(9) All penalties provided by this Act to be recovered in a summary manner shall be recovered before the sheriff of the county in the sheriff court, or at the option of the person seeking to recover the same in the police court, in any place where a sheriff officiates as a police magistrate under the provisions of "The Summary Procedure Act, 1864," or of the Police Act in force for the time in any place in which a sheriff officiates as aforesaid, and all the jurisdiction, powers, and authorities necessary for this purpose are hereby conferred on sheriffs:

Every such penalty may be recovered at the instance of the procurator fiscal of the jurisdiction, or of the person who caused the analysis to be made from which it appeared that an offense had been committed against some one of the provisions of

Every penalty imposed and recovered under this Act shall be paid to the clerk of court, and by him shall be accounted for and paid to the treasurer of the county general assessment, or the police assessment of the burgh, as the sheriff shall direct:

(10) Every penalty imposed by this Act may be reduced or mitigated according to

the judgment of the sheriff:

(11) It shall be competent to any person aggrieved by any conviction by a sheriff in any summary proceeding under this Act to appeal against the same to the next circuit court, or where there are no circuit courts to the High Court of Justiciary at Edinburgh, in the manner prescribed by such of the provisions of the Act of the twentieth year of the reign of King George the Second, chapter 43, and any Acts amending the same, as relate to appeals in matters criminal, and by and under the

Tules, limitations, conditions, and restrictions contained in the said provisions.

34. In the application of this Act to Ireland,
The term "borough" shall mean any borough subject to the Act of the session of the third and fourth years of the reign of Her present Majesty, chapter 108, intituled "An Act for the regulation of Municipal Corporations in Ireland:"

The term "county" shall include a county of a city and a county of a town not being

a borough:

The term "assizes" shall, with respect to the county of Dublin, mean "presenting

term:"

The term "treasurer of the county" shall include any person or persons or bank inany county performing duties analogous to those of the treasurer of the county in counties, and, with respect to the county of Dublin it shall mean the finance committee:

The term "police constable" shall mean, with respect to the police district of Dublin metropolis, constable of the Dublin Metropolitan Police, and with respect to any other part of Ireland, constable of the Royal Irish Constabulary.

35. This Act shall commence on the 1st day of October, 1875.

36. This Act may be cited as "The Sale of Food and Drugs Act, 1875."

#### SCHEDULE.

SALE OF FOOD AND DRUGS ACT AMENDMENT ACT, 1879.

[From an official copy.]

[42 and 43 Vict., chap. 30.]

CHAPTER 30.—An Act to amend the Sale of Food and Drugs Act, 1875 (21st July, 1879).

Whereas conflicting decisions have been given in England and in Scotland in regard to the meaning and effect of section 6 of the Sale of Food and Drugs Act, 1875, in this Act referred to as the principal Act, and it is expedient in this respect and other-

* Here insert the name of the person submitting the article for analysis. Here insert the name of the person delivering the sample.

# When the article cannot be conveniently weighed, this passage may be erased, or

the blank may be left unfilled.

§ Here the analyst may insert at his discretion his opinion as to whether the mixture (if any) was for the purpose of rendering the article portable or palatable, or of preserving it, or of improving the appearance, or was unavoidable, and may state whether in excess of what is ordinary, or otherwise, and whether the ingredients or materials mixed are or are not injurious to health.

In the case of a certificate regarding milk, butter, or any article liable to decomposition, the analyst shall specially report whether any change had taken place in the

constitution of the article that would interfere with the analysis.

wise, to amend the said Act: Be it enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

1. This Act may be cited for all purposes as the Sale of Food and Drugs Act Amend-

ment Act, 1879.

2. In any prosecution under the provisions of the principal Act for selling to the prejudice of the purchaser any article of food or any drug which is not of the nature, substance, and quality of the article demanded by such purchaser, it shall be no defense to any such prosecution to allege that the purchaser, having bought only for analysis, was not prejudiced by such sale. Neither shall it be a good defense to prove that the article of food or drug in question, though defective in nature or in sub-

stance or in quality, was not defective in all three respects.

3. Any medical officer of health, inspector of nuisances, or inspector of weights and measures, or any inspector of a market, or any police constable under the direction and at the cost of the local authority appointing such officer, inspector, or constable, or charged with the execution of this Act, may procure at the place of delivery any sample of any milk in course of delivery to the purchaser or consignee in pursuance of any contract for the sale to such purchaser or consignee of such milk; and such officer, inspector, or constable, if he suspect the same to have been sold contrary to any of the provisions of the principal Act, shall submit the same to be analyzed, and the same shall be analyzed, and proceedings shall be taken, and penalties on conviction be enforced in like manner in all respects as if such officer, inspector, or constable had purchased the same from the seller or consignee under section 13 of the principal

4. The seller or consignor or any person or persons entrusted by him for the time being with the charge of such milk, if he shall refuse to allow such officer, inspector, or constable to take the quantity which such officer, inspector, or constable shall require for the purpose of analysis, shall be liable to a penalty not exceeding £10.

5. Any street or open place of public resort shall be held to come within the mean-

6. In determining whether an offense has been committed under section 6 of the said Act, by selling, to the prejudice of the purchaser, spirits not adulterated otherwise than by the admixture of water, it shall be a good defense to prove that such admixture has not reduced the spirit more than 25 degrees under proof for brandy, whisky, or rum, or 35 degrees under proof for gin.

7. Every liberty having a separate court of quarter sessions, except a liberty of a given every which have december within the head-ing and the spirit means the second and the spirit means the second and the spirit means the second and the spirit means the second and the spirit means the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and the second and

cinque-port, shall be deemed a county within the meaning of the said Act.
8. The town council of any borough having a separate court of quarter sessions shall be exempt from contributing towards the expenses incurred in the execution or the principal Act in respect of the county within which such borough is situate, and the treasurer of the county shall exclude the expenses so incurred from the account required by section 117 of the Municipal Corporation Act, 1835, to be sent by him to such town council.

9. The town council of any borough having under any general or local Act of Parliament, or otherwise, a separate police establishment, and being liable to be assessed to the county rate of the county within which the borough is situate, shall be paid by the justices of such county the proportionate amount contributed towards the expenses incurred by the county in the execution of the principal Act by the several parishes and parts of parishes within such borough in respect of the ratable value of the property assessable therein as ascertained by the valuation lists for the time-

being in force.

10. In all prosecutions under the principal Act, and notwithstanding the provisions of section 20 of the said Act, the summons to appear before the magistrates shall be served upon the person charged with violating the provisions of the said Act within a reasonable time, and in the case of a perishable article not exceeding twenty-eight days from the time of the purchase from such person for test purposes of the food or drug, for the sale of which in contravention to the terms of the principal Act the seller is rendered liable to prosecution, and particulars of the offense or offenses against the said Act of which the seller is accused, and also the name of the prosecutor, shall be stated on the summons, and the summons shall not be made returnable in a less time than seven days from the day it is served upon the person summoned.

## FRANCE.

[Translated from the Second Report of the Paris Municipal Laboratory.]

The supervision of the wholesomeness of commodities for food, of beverages, and medicines belongs in a general way to the mayors, by virtue of the law of the 16-24 August, 1790 (Title XI, articles 3 and 4), which has been subsequently confirmed by the laws of July 19-22, 1791, Title I, articles 9 and 13; of July 18, 1837, articles 10 and 11; and of April 5, 1884, relative to municipal organization. It is, then, the mayors of the departments and the prefect of police in Paris who take, in this connection, measures which appear to them necessary for the interest of the public health.

Concerning frauds in this regard, they have been repressed in a very imperfect manner by the penal code, and it was to modify this state of affairs that the law of March 27, 1851, was passed, which now governs this matter and the provisions of

which have been made applicable to beverages by a law of May 5, 1855.

LAW OF 27TH MARCH, 1851, TENDING TOWARDS THE MORE EFFICACIOUS REPRESSION OF CERTAIN FRAUDS IN THE SALE OF MERCHANDISE.

ARTICLE 1. Those are punished with the penalties stated in article 423 of the penal code-

(1) Who shall adulterate substances or commodities for food or medicines intended for sale

(2) Who shall sell or offer for sale substances or commodities for food or medi-

cines which they know to be adulterated or decomposed;
(3) Who shall have deceived or attempted to deceive, regarding the quantity of articles delivered, the persons to whom they sell or from whom they buy, either by the use of false weights or measures, or instruments not exact used in weighing or in measuring, whether by adroit act or method tending to pervert the operation of weighing or measuring, or to fraudulently increase the weight or volume of the merchandise, even before this operation; or, finally, by fraudulent indications giving rise to the belief that the weighing is straightforward and exact.

ART. 2. If, in the cases provided for by article 423 of the penal code or by article 1 of this law, there is question of a merchandise containing mixtures injurious to health, the fine shall be from 50 to 500 francs, unless the fourth of the restitutions and damages exceeds this last-named amount; and the term of imprisonment shall be from

three months to two years.

This present article shall be applicable even in the case where the injurious adulter-

ation shall have been known to the purchaser or consumer.

ART. 3. Those shall be punished with a fine of from 16 to 25 francs and with imprisonment for from six to ten days, or one of these penalties only, according to the circumstances, who, with unlawful intent, shall have in their warehouses, shops, workshops, mercantile establishments, or in market-houses, fairs or trades places, whether it be false weights or measures, or other inexact apparatus used for weighing or measuring, whether it be substances for food or medicines which they know to be adulterated or decomposed.

If the adulterated substance is injurious to health, the fine may be raised to 50 francs

and the imprisonment to fifteen days.

ART. 4. When the accused, convicted of infringement of this present law or of article 423 of the penal code, shall have, in the five years which have preceded the misdemeanor, been sentenced for infraction of this law or of article 423, the penalty may be increased to double the maximum; the fine imposed by article 423 and by articles 1 and 2 of this law may at the same time be raised even to 1,000 francs, if the half of the costs of the restitutions and damages imposed does not exceed this sum; all without prejudice to the application, if expedient, of articles 57 and 58 of the penal code.

ART. 5. Commodities, the sale, use or possession of which constitutes the misdemeanor, shall be confiscated, conformably to article 423 and to articles 477 and 481

of the penal code.

If they are fit for use as food or medicine, the court may place them at the disposal

of the Government to be given to the charitable institutions.

If they are unfit for this use or injurious, these commodities shall be destroyed or poured out, at the expense of the condemned. The court may order that the destruction or pouring out shall take place in front of the establishment or dwelling of the condemned.

ART. 6. The court may order the posting of the sentence in the places which it shall designate, and its insertion, entire or by extracts, in all the journals which it shall name, all at the expense of the condemned.

ART. 7. Article 463 of the penal code shall be applicable to the misdemeanors pro-

vided for by this present law. ART. 8. Two-thirds of the total amount of the fines are assigned to the communities

in which the misdemeanors shall have been proved. ART. 9. Articles 475, No. 14, and 479, No. 5, of the penal code are repealed. LAW OF THE 5TH OF MAY, 1855, WHICH DECLARES THE LAW OF THE 27TH OF MARCH, 1851, APPLICABLE TO BEVERAGES.

ARTICLE 1. The provisions of the law of the 27th of March, 1851, are applicable to

ART. 2. Article 318 and No. 6 of article 475 of the penal code are and remain repealed.

#### Penal code.

ART. 57 (modified by the law of March 13, 1863). Whosoever, having been condemned for a crime to a penalty greater than one year of imprisonment, shall have committed a misdemeanor or crime which is punishable with correctional penalties (peines correctionelles) only [i. e. punishable by fine or imprisonment], shall be sentenced to the maximum penalty provided by the law and this penalty may be increased until it is doubled. The condemned, moreover, may be placed under the special espionage of the police for five years at least and ten years at most.

ART. 58 (modified by the law of May 13, 1863). Offenders sentenced for misdemeanors

to an imprisonment of more than one year shall also, in case of a new misdemeanor or a crime punishable only by fine or imprisonment (peines correctionelles), be sentenced to the maximum penalty provided by the law and this penalty may be increased until it is doubled; they shall, in addition, be placed under special surveillance by the Government for five years at least and ten years at most.

ART. 387 (modified by the law of May 13, 1863). Carriers, boatmen or their agents who shall have altered or attempted to alter wines or any other kind of merchandise, the transportation of which has been confided to them, and who shall have effected or attempted to effect this alteration by the mixture of harmful substances, shall be punished with imprisonment from two to five years and with a fine of 25 to 500 francs. They may, in addition, be deprived of the rights mentioned in article 42 of this present code, during five years at least, and ten years at most; they may also, by sentence or judgment, be placed under the surveillance of the police during the same number of years.

If the mixture has been of substances not harmful, the penalty shall be imprison-

ment for from one month to one year and a fine of 16 to 100 francs.

ART. 423. Whosoever shall have deceived the purchaser as to the standard of gold and silver articles, as to the quality of an imitation gen sold for a precious stone; as to the nature of all kinds of merchandise; whosoever, by false weights or false measures, shall have deceived as to the quantity of goods sold, shall be punished with imprisonment for three months at least, one year at most, and with a fine which may not exceed the fourth of the cost of the restitutions and damages, nor be less than 50 francs.

The adulterated commodities, or their value, if still in the possession of the vender, shall be confiscated; the false weights and false measures shall be confiscated, and, in

addition, be destroyed.

The court may order the posting of the sentence in the places which it shall designate and its insertion, entire or in part, in all the journals it shall designate, all at the expense of the condemned.

This last paragraph was added by the law of May 13, 1863).

ART. 471. Those persons shall be punished with a fine of from 1 franc to 5 francs, inclusive:

(15) Who shall have violated the regulation lawfully made by the administrative authority and those who have not conformed to the regulations or public decrees issued by the municipal authority by virtue of articles 3 and 4, Title XI, of the law of the 16-24 August, 1790, and of article 46, Title I, of the law of 19-22 July, 1791.

ART. 474. The penalty of imprisonment against all persons mentioned in article 471,

shall always last, in case of a repetition of the offence, for three days at most.

ART. 477. These shall be seized and confiscated:

- (2) Adulterated beverages found in possession of the seller or retailer; these beverages shall be poured out for destruction;
  - (4) Eatables spoiled, decomposed or injurious; these eatables shall be destroyed.

#### Military code of June 9, 1857.

ART. 265. Every soldier, commissary or military purveyor who adulterates or causes to be adulterated substances, materials, commodities or liquids confided to his charge or placed under his supervision, or who, knowingly, distributes or causes to be distributed the said adulterated substances, materials, commodities or liquids, is punished by solitary confinement.

The penalty of solitary confinement is also pronounced against every soldier, commissary or military purveyor, who, with guilty intent, distributes or causes to be distributed meats derived from animals infected with contagious diseases, or materials, substances, commodities or liquids spoiled or decomposed. If extenuating circumstances exist, the penalty of solitary confinement shall be reduced to that of imprisonment for from one year to five years, with deprivation of his commission, if the offender is an officer.

# Code of maritime law of June 4, 1858.

It provides regulations similar to the preceding.

For further reference, see—

#### GERMANY.

## [Translated from an official copy.]

LAW OF THE 14TH OF MAY, 1879, RELATING TO THE TRADE IN ARTICLES OF FOOD AND FOR CONSUMPTION AND ARTICLES IN COMMON USE (BULLETIN OF LAWS OF THE EMPIRE, P. 145.)

§ 1. The trade in articles for food and for consumption, of toys, wall-papers, coloring matters, eating, drinking or cooking utensils, as well as petroleum, is subject to surveillance under the provisions of the present law.

§ 2. Officers of the police are authorized to enter places where the articles designated by § 1 are placed on sale, both during business hours or while these places

are accessible to the public.

They are authorized to take, as they see fit, for the purpose of examination, samples, for which a receipt must be given, of articles of the kind designated by § 1, which are found at the above-named places, or which are exposed for sale, sold, or peddled about public places, in the markets, squares, or streets. Upon demand of the dealers, he may be allowed to retain part of the sample, officially sealed. An indemnity shall be paid for the sample taken equal to its market price.

§ 3. During the hours indicated by § 2, the police are authorized to proceed to the houses of persons having been sentenced to a penalty of imprisonment by virtue of §§ 10, 12, and 13, of the present law, for the investigation of the places where articles of the kind named in § 1 are exposed for sale, or which are used as places

of deposit, or for the manufacture of such articles.

This authority begins at the time when the sentence takes effect, and ceases after the expiration of three years, counting from the day on which the term of imprisonment has ceased, expired, or has been remitted.

§ 4. The full authority of the officers appointed to enforce the measures provided in §§ 2 and 3, is regulated by the provisions governing the matter in each particular

All regulations of a state giving to the police powers more extended than those described by §§ 2 and 3 remain in force.

§ 5. By Imperial decree, given with consent of the Federal Council, special laws can be decreed for the Empire, in the interest of the public health, and which forbid—

(1) Certain methods of manufacture, and of the preservation and packing of arti-

cles of food and for consumption, intended for sale (2) The selling and offering for sale of articles of food and for consumption of a

certain nature or under a name not agreeing with their true character;

(3) The sale and offering for sale of animals infected with certain diseases for the purpose of slaughtering, as well as the sale and offering for sale of meats from diseased animals;

(4) The use of certain material and coloring matter in the manufacture of clothing, toys, wall-papers, eating, drinking or cooking utensils, as well as the sale and offering for sale of articles manufactured contrary to this prohibition;

(5) The selling and offering for sale of petroleum of a certain quality.

§ 6. By Imperial decree, given with the consent of the Federal Council, the manufacture, trade in, and offering for sale of substances intended for the adulteration of articles of food and for consumption may be forbidden or restricted throughout the

§ 7. The Imperial decrees, given in conformity with §§ 5 and 6, shall be immediately submitted to the Reichstag, in the event of its being in session; in the contrary case, at the next session. If the Reichstag so require, they will be repealed.

§ 8. Infringements upon the regulations made in accordance with §§ 5 and 6 are

punishable by a fine of 150 marks or by arrest.

The States of the Empire are forbidden to promulgate laws imposing a greater pen-

§ 9. Whoever shall refuse, in defiance of §§ 2 to 4, to allow entrance to their places, the taking of samples, or investigation, is punished by a fine of from 50 to 150 marks or by arrest.

 $\S$  10. Any person shall be punished by imprisonment for six months and a fine of 1,500 marks, or by either of these penalties:

(1) Who, for the purpose of misleading in trade, imitates or adulterates articles for

food or for consumption;

(2) Who knowingly sells, under concealment of the facts, any articles of food or for consumption which are spoiled, counterfeited, or adulterated, or who offers them for sale under a name intended to deceive.

§ 11. If the act provided for by § 10, No. 2, is committed through negligence the penalty shall consist of a fine of 150 marks or arrest.

§ 12. With imprisonment, which may also be accompanied by deprivation of the

civil rights, is punished:

(1) Any one who shall have designedly manufactured substances intended for food or for consumption in such manner that the use of these substances shall be prejudicial to the health of man; also, who knowingly sells, offers for sale, or otherwise puts upon the market articles as food or for consumption the use of which is apt to injure human health;

(2) Who designedly shall have manufactured wearing apparel, toys, wall-papers, eating, drinking, and cooking utensils, or petroleum, in such manner that the natural or possible use of these articles might be prejudicial to health; also, one who know-

ingly sells, offers for sale, or puts in circulation articles of such kind.

The attempt is punishable in a case where the offense shall have occasioned serious injury or the death of a person; the penalty shall be imprisonment for five years.

§ 13. If, in cases under § 12, the enjoyment or use of the article could have the effect of destroying the health of a person, and if the delinquent has had knowledge of this fact, the penalty shall be that of imprisonment for ten years, and in case the crime shall have occasioned the death of a person, the penalty shall be imprisonment for not less than ten years, or imprisonment for life. In addition to the penalty the offender may be placed under the surveillance of the police.

§ 14. If one of the offenses contemplated by §§ 12 and 13 has been committed through negligence the penalty shall be a fine of 1,000 marks or imprisonment for six months, and if the offense has caused injury to the health of any person the term of imprisonment shall be for one year, but in case the death of a person has been occasioned thereby, the penalty shall be imprisonment for from one month to three

years.

§ 15. In cases provided for by §§ 12 to 14 there shall be, over and above the penalty, the right to confiscate the articles manufactured, sold, or offered for sale, or put in circulation, in violation of the prohibitions above indicated, whether they shall or shall not belong to the offender. In cases coming under §§ 8, 10, and 11, confiscation may be ordered.

In cases provided for by §§ 12 to 14 when it is impossible to prosecute or convict any

particular person, forfeiture can be enforced.

§ 16. The judgment or penal decree may order that the sentence shall be published

at the expense of the guilty party.

Upon demand of a person accused who shall have been acquitted, the court shall order the publication of the acquittal, the expense thereof to be borne by the state, unless it have been charged to the accuser.

The order shall specify the manner of publication. § 17. If there exist, in the locality of the misdemeanor, a public laboratory for the technical examination of articles for food and for consumption, the fines imposed by virtue of the present law, as far as they are in favor of the state, shall be turned over to the treasury which sustains the laboratory, and not to the state.

DECREE OF THE 1ST OF MAY, 1882, RELATIVE TO THE USE OF POISONOUS COLORING MATTERS.

ARTICLE 1. The use of poisonous coloring matter is prohibited in the manufacture of commodities for food or of articles for consumption intended for sale. Coloring matters are considered poisonous, in the meaning of this decree, which contain the following materials or compounds: Antimony (oxide of antimony), arsenic, barium (excepting the sulphate of barium), lead, chromium (except pure oxide of chromium), cadmium, copper, mercury (except cinnabar), zinc, tin, gamboge, picric acid.

ART. 2. The preservation or the packing of commodities for food or articles for consumption, intended for sale, in wrappers colored with the poisonous coloring matters above designated, or in barrels in the construction of which the poisonous coloring matter is used in such a way that it can pass into the contents of the barrels,

is forbidden.

ART. 3. The use of the poisonous coloring matters enumerated in section 1 is forbidden in the manufacture of toys, with the exception of varnishes and oil colors of

zinc-white and chrome-yellow (chromate of lead).

ART. 4. The use of coloring matter prepared with arsenic in the manufacture of wall-hangings is forbidden; also coloring matters of copper with arsenic, and materials containing the like coloring matters in the manufacture of wearing apparel. ART. 5. The placing on sale and the selling at wholesale or retail commodities for

ART. 5. The placing on sale and the selling at wholesale or retail commodities for food and articles for consumption, manufactured, preserved, or packed contrary to the prescriptions of articles 1 and 2, is forbidden: also toys, wall-hangings, and wearing apparel manufactured contrary to the prescriptions of articles 3 and 4.

#### PRUSSIA.

[Translated from the Revue Internationale des Falsifications des Denrées Alimentaires, Vol. I.]

OFFICIAL DECREE OF THE 28TH OF JANUARY, 1884, REGULATING THE SALE OF MILK.

(The framing of a uniform regulation for the sale of milk applicable to the whole German Empire, or even to Prussia alone appearing to be impracticable, in view of the variations in the composition of this liquid depending on the feed of the cows, and their breed, the official decree, leaving the care of this regulation to the municipal police, contents itself with establishing certain principles which may serve for the guidance of the authorities.)

(a) Treatment of milk at the producers' and the retailers' establishment.—The milk should be submitted to a refrigeration to prevent its souring. The use of vessels of copper, brass, zinc, pottery, poorly glazed or made with lead enamel, must be avoided.

Persons coming in contact with invalids suffering from contagious diseases, should

abstain from the handling of milk.

Places for storing or retailing milk should be clean, airy, and located at a distance from sleeping or sick rooms. All cans must be kept tightly covered by the retailer.

The vessels should be scalded and then dried with a towel.

(b) Supervision by the police.—(The decree describes the course to be followed and the precautions to be taken in the determination of the density of milk.) In whole milk containing all the cream, the density varies between 1.029 and 1.034. n mixed or half-skimmed milk, resulting from the mingling of the skimmed milk with the morning's whole milk, the density varies between 1.031 and 1.036. Finally, in milk entirely without cream, or skimmed milk, it varies between 1.032 and 1.037, with an average of 1.0345.

But the density of milk does not always constitute a sufficient test of its composition. It is necessary, then, to determine the proportion of cream, an operation which must be confided to the care of experts, and which is effected with the Chevallier cremometer. (The circular shows the manner of using this instrument and the

information deduced by means of it.)

Milk thoroughly skimmed is simply unfit for the proper nourishment of children; it can not be absolutely excluded from the market. To avoid all mistakes, milkmen are required to mark upon their cans, in an indelible manner, which of these three

kinds of milk they contain.

The following should be considered as dangerous to health: bitter milk, mucilaginous milk, milk that is blue or red, milk from cows infected with aphthous fevers, consumption, variola, jaundice, authrax, mammitis, septic metritis, dysentery, pyœmia, septicemia, delirium, malignant pustule, or rabies, and also the milk of all animals under medical treatment, and colostrum, before and after calving.

The use of carbonate of soda, salicylic and boric acids, or their salts, as preservative agents of milk, is prohibited.

(c) Analytical examination.—This is effected in a chemical laboratory. In doubtful cases, the expertshould first commence with the examination of the milk undertaken

at the retailer's (density).

After being assured of the result, he will determine the proportions of fat and dry residue (total solids). In whole milk, the fat averages 3.30 per cent., the minimum limit being fixed at 2:4 per cent. Milk half-skimmed contains one-half less of fatless than 1.5 per cent. is generally found. In skimmed milk, if the cream has been obtained by simply standing, the average of fat is 0.7 per cent., while it is only 0.3 per cent. if the cream has been removed by the aid of the centrifugal machine. In whole milk, the dry residue averages 12,25 per cent., varying from 11 to 14 per cent.; less than 10.9 per cent. should never be accepted. In milk half-skimmed, the dry residue is diminished from 11 to 2 per cent.

(d) The stable test.—By this is meant the examination of the liquid obtained by the mixtures of all the milkings of the cow, or cows, which have furnished the milk of suspicious composition. This test, which takes place on the premises, should be made within three days at the latest, making sure that the feed of the cattle has not

been surreptitiously changed, in order to lower the quality of the milk.

The stable test is indispensable in case of a claim by the dealer. It is only favorable to him when the difference in the two samples of milk—the one under suspicion and the other taken at the stable-does not exceed 2 degrees in the density, 0.3 per cent. in the proportion of fat, and 1 per cent. in the dry residue.

#### BAVARIA.

[Translated from the Revue Internationale des Falsifications des Denrées Alimentaires, Vol. I.]

The subject-matter under consideration is governed principally in Bavaria by the law of the German Empire of the 14th of May, 1879, relative to the trade in commodities for food, beverages, and condiments inserted in No. 14 of the bulletin of laws of the German Empire (p. 205, which see). By the terms of paragraph 10 of this law, the offender is punished with imprison-

ment not exceeding six months, and a fine of 1,500 marks, or by either of these

penalties:

(1.) Who, with fraudulent intent, has imitated or adulterated, for trade and cir-

culation, commodities for food, beverages, and the like;
(2.) Who, knowingly and with intent to deceive, sells deteriorated, counterfeited, or adulterated commodities, as well as any one who places them on sale under a designation intended to mislead the public.

In accordance with paragraph 11, any one who shall have committed the misdemeanor provided for in paragraph 10, No. 2 of said law, may be sentenced to a fine

not exceeding 50 marks, or the penalty of arrest not exceeding six weeks.

Under paragraph 12, whosoever has knowingly put in circulation any commodity the consumption of which might prove injurious to health, as well as any one who has sold the same, is to be punished with imprisonment not exceeding the term of five years. If the serious illness or death of a person has followed as a consequence of such sales, the penalty shall be changed to that of solitary confinement not exceed-If the consumption of any such commodity should be of a nature to infect the public health, and if this circumstance was known to the offender, the penalty, under paragraph 13, shall be solitary confinement not exceeding ten years. In the case where the death of a person has been caused, the penalty shall be solitary confinement for not less than ten years, and may be for life.

If one of the misdemeanors provided for in paragraphs 12 and 13 has been unintentionally committed, a fine of 1,000 marks, or an imprisonment of six months may be imposed, as is provided for in paragraph 14. In the case where this misdemeanor shall have occasioned a serious illness, or shall have caused the death of a person, the penalty imposed may be, in the first case, imprisonment not exceeding one year, and in

the second case, the imprisonment may vary from one month to three years.

Finally, paragraphs 15 and 16 relate to the confiscation of the illicit goods and the

publication of the sentences imposed.

Every imitation of any commodity for food, beverage, condiment, or medicine, produced artificially with foreign substances and composed of materials other than the ingredients essential to its composition, is regarded as counterfeit.

Every commodity for food, etc., deteriorated by the use or by the addition of foreign substances, and not being of the kind it is claimed to be, is regarded as adulter-

ated.

Beside the above-mentioned regulations of the law relative to commodities for food, etc., paragraph 367, clause 1, No. 7, of the penal code of the German Empire relative to the retailing and vending of beverages and commodities for food adulterated or decomposed, is always applicable when the conditions of paragraph 10, No. 2, and paragraph 11 of the law of May 14, 1879, fail to meet the case.

Furthermore, the person who adulterates, or the vender of the commodities adul-

Furthermore, the person who adulterates, or the vender of the commodities adulterated, may be subjected to a heavier penalty when by the act he shall have committed a deliberate fraud. (Paragraphs 213 and 264 of the penal code of the Empire.

## Manufacture of beer.

The manufacture of beer in Bavaria is regulated separately from the law of May 14, 1879, by articles 7 and 71 of the Bavarian law of May 16, 1868, concerning the tax on malt, revised August 23, 1879, and published in No. 50 of the Bulletin of Laws of that year.

Under these regulations, it is absolutely forbidden to employ, in the manufacture of beer, substances other than water, yeast, malt, and hops, whether the beer is in-

tended for home consumption or exportation.

In particular, the use of salicylic acid, even in small quantity, is forbidden during or after brewing. Every transgressor of the law concerning the tax on malt incurs, under article 71, a fine of from 180 to 540 marks, unless the severer penalties of the law relative to the trade in commodities for food should be applicable.

The German Federal Council has now before it a draft of a bill relative to the sale of wine, the first article of which gives the following enumeration of the chemical substances that should be prohibited as injurious to health:

Salts of barium.—Employed for déplâtrage.

Salts of lead.—Employed for déplâtrage, as well as to prevent the wine from becoming sour.

Glycerine.—Forbidden, because, as sold, it is rarely pure, and for the reason that the smooth quality of the wine thus obtained gives opportunity for frauds.

Cochineal bugs.—The scarlet bugs are used in France, Italy, Portugal, Wurtemberg,

and Alsace to color wines. These bugs are injurious to health.

Salts of magnesium.—The soluble salts of magnesium have a very decided purgative

effect, and their use is prohibited for that reason.

Salicylic acid.—This substance, as a means for the preservation of wine, has, of late, been greatly abused, and the scientific commission for medical affairs in Prussia has decided against the use of salicylic acid for the preservation of wine. The draft of the law adopts this view of the matter. It is very requisite to exclude any preservative agent in the least doubtful and the addition of which is unnecessary, where the healthful qualities of wine are in question.

Impure alcohol.—Impure alcohol should be prohibited in order to prevent the use of dephlegmated alcohol. The prohibition does not apply to the said liquor in the

proportions employed in the manufacture of sparkling wines

Glucose.—Non-crystallized glucose is excluded from use for the reason that it al-

ways contains impurities.

Aniline.—As to the use of aniline dyes, which should equally be forbidden—their number is very large, and new ones are continually being discovered. These substances, the effect of which upon the organism, as well as the physiological qualities, are unknown, come into competition with the vegetable colors, the harmlessness of which is established.

Hon. CHARLES S. FAIRCHILD, Secretary of the Treasury

### REPORT OF THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE CURRENCY,
Washington, December 1, 1888.

SIR: In obedience to law, I have the honor to submit a report for the

year ending October 31, 1888, exhibiting-

First. A summary of the state and condition of every association from which reports have been received the preceding year, at the several dates to which such reports refer, with an abstract of the whole amount of banking capital returned by them, of the whole amount of their debts and liabilities, the amount of circulating notes outstanding, and the total amount of means and resources, specifying the amount of lawful money held by them at the times of their several returns.

Second. A statement of the associations whose business has been closed during the year, with the amount of their circulation redeemed

and the amount outstanding.

Third. Suggestions as to amendments to the laws relative to banking,

by which it is thought the system may be improved.

Fourth. A statement exhibiting, under appropriate heads, the resources and liabilities and condition of the banks, banking companies, and savings banks organized under the laws of the several States and Territories, such information being obtained by the Comptroller from the reports made by such banks, banking companies, and savings banks to the legislatures or officers of the different States and Territories, and where such reports could not be obtained the deficiency has been supplied from such other authentic sources as were available.

Fifth. The names and compensation of the clerks employed in the office of the Comptroller of the Currency, and the whole amount of the

expenses of the banking department during the year.

This is the twenty-sixth annual report of the Comptroller of the Currency.

FIRST.

Summary of the State and Condition of Every National Bank Reporting during the Year ending October 31, 1888.

Of the above banks thirty-four went into voluntary liquidation and eight failed.

#### THIRD.

SUGGESTIONS AS TO AMENDMENTS TO THE LAWS RELATING TO BANK-ING BY WHICH THE SYSTEM MAY BE IMPROVED AND THE SECURITY OF THE HOLDERS OF ITS NOTES AND OTHER CREDITORS MAY BE INCREASED.

I have the honor to renew the recommendations made in the Report of 1887 and to ask for them attention at this session. After carefully considering all the suggestions that have been made from time to time toward providing an adequate and acceptable basis for national bank circulation to take the place of the bonds now become too scarce and too dear for the purpose, I feel it my duty to submit for the consideration of Congress the following view of the whole subject of national-bank circulation:

Continued contraction in the volume of circulation has been the most prominent feature in the history of the national banks during the last ten years.

The statements in this report, under the proper head, exhibit the persistency of the influences heretofore operative to reduce the volume of national-bank circulation; they also indicate the advent of new influences which are accelerating this reduction, not only by curtailing the circulation of banks already in existence, but by repressing the normal increase of circulation incident to the formation of new banks.

Year by year the Comptroller's reports have called attention to the rising scale of reduction of circulation among existing banks and to the declining ratio in which new banks take out circulation in excess of the amount issued upon the minimum requirement of bond deposits; during the past year there has been practically no such excess, and the effect of the bond situation has extended beyond circulation. It is now checking the formation of new banks, which is like arresting a stream at its source.

During the past year only \$2,375,550 was added to circulation by the new banks and banks increasing capital, while during the previous year \$4,592,000 was added in the same way.

Besides the falling off in the formation of new banks this year, as compared with the two years preceding it, and with the average of the five years from 1883 to 1887, inclusive, 127 national banks have during the past twelve months reduced their bond holdings to the minimum,

and this alone caused the withdrawal of bonds to the amount of

\$14,014,400, reducing circulation by \$12,600,000.
On October 31, there were only 1,180 banks that held bonds in ex-The amount of bonds so held was \$77,255,863, cess of the minimum. and the circulation secured by these bonds amounted to \$69,953,277. At the present rate of reduction the excess may disappear in two years, and is sure to do so when the 4½ per cent. bonds mature in October, 1891.

On page 60 is a table showing the net decrease of circulation during each of the last five years. The exceptionally large decrease during 1885 and 1886 is attributable to the redemption of the 3 per cent. bonds.

The limit of \$3,000,000 a month imposed by section 9, act July 12, 1882, upon reduction of national-bank circulation does not apply to such reduction when it is a result of the payment of matured bonds; hence banks holding the 3 per cent. bonds in excess of the minimum requirement generally surrendered the circulation secured by those bonds as fast as these were called for payment, a conclusive proof that circulation was no longer profitable.

During the recent purchases of bonds by the Treasury the restriction of the above section has repeatedly operated to retard and in some cases to prevent sales of bonds held by the Treasurer as security for nationalbank circulation; hence the reduction of circulation has not been as large this year as it would have been had there been no hindrance in

the law.

The limit of \$3,000,000 a month which restricts the voluntary reduction of circulation to \$36,000,000 a year does not apply to the circulation of banks that fail or of those that go into voluntary liquidation, hence whatever addition to circulation may result from the formation of new banks, and from the smaller banks increasing their capital, is liable to be offset by the retirement of notes of failed and liquidating banks, so that the net decrease may amount to fully \$36,000,000 in a year, and may even exceed that amount if the forces now repressing the growth of the system should reach an intensity sufficient to drive banks out of it.

Whether there is or is not at present any danger of the nationalbank system being actually forced into a decline in consequence of the growing scarcity and high prices of United States bonds, there is enough warning in the facts of its recent history and present condition to demand prompt and effectual relief.

Our national banks are too valuable, too deeply rooted in the confidence of the public, too intimately interlaced with the industrial interests and employments of our people, to be left to the risks of neglect or

even of inattention.

Apart from whatever danger to the system there may be in neglecting at an early day to provide adequate relief against the influences now operating adversely to its growth, the national-bank circulation taken by itself, merits earnest consideration and will be found well worthy

of preservation.

For many years after the inception of the national bank system the circulation was its most important feature; important to the banks, still more important to the public; for, besides performing a service of incalculable value in the promotion of internal trade through the regulation of domestic exchanges, it constituted up to 1879 an important check upon the gold premium, and thus assisted in the preservation and extension of our valuable foreign commerce on a secure basis.

Resumption would hardly have been attempted in 1879 unless the composition of the currency had been such as to engage the banks to

co-operate in the movement, and without such co-operation resumption could not have been accomplished. On November 1, 1878, the outstanding legal tenders were estimated at \$346,681,016; fractional currency at \$16,000,000; the national-bank circulation outstanding against bonds was \$319,652,121, and against lawful money deposited in the Treasury, about \$2,500,000 more, making in all \$685,000,000 of paper against which the Treasury held only \$126,000,000 in gold coin and bullion and the banks less than \$31,000,000.

Grave apprehensions were entertained as to the prudence of undertaking resumption with only \$157,000,000 of gold to meet possible demands amounting to \$685,000,000. There was a vast amount of discussion through the medium of the press and in Congress, while the records of Congressional inquiry on this subject, as late as December, 1878, make quite a volume and show with what misgivings the project

was regarded.

The real strength of the situation, however, consisted in the fact that the national banks were holding in legal-tender notes and certificates \$97,000,000, which, with the \$15,000,000 in the 5 per cent. redemption fund, represented \$112,000,000 of demands upon the Treasury that would not be presented for redemption, and thus the Government was set free to use its \$126,000,000 of coin in preserving the convertibility of only \$234,000,000 legal tenders, scattered all over the country.

The banks had the physical power, of course, to demand coin for their \$112,000,000 on January 1, 1879, but to have exercised that power would have been to ruin themselves, because a run upon the Treasury would have induced a run upon the banks, and they owed the public \$319,000,000 on their circulating notes and \$620,000,000 in deposits, while their entire holdings of lawful money on October 1, 1878, were only \$143,000,000, consisting of—specie, \$30,686,866, legal-tender notes, \$64,428,600, United States certificates of deposit, \$32,690,000, five per cent. redemption fund, \$15,205,541.

It is evident, therefore, that the resumption of specie payments by the Treasury on January 1, 1879, was made possible only by the relations which the law established between the national banks and the Government, because it was the coercion of the law in respect to reserve that accumulated in the banks so large a percentage of the legal tender notes and thus brought them into hands where the highest conception of public obligation, as well as the most intelligent appreciation of self-interest, came into play to assist in the success of the Treasury policy.

The national banks, therefore, which had at the supreme crisis of 1863 saved the finances of the Government, rendered in 1879, a service only second in importance to that, in enabling the reunited industrial interests of the country to regain the firm footing of definite and stable

values.

As soon as resumption was effected, however, the national-bank circulation came under the influences which have since been steadily reducing its volume. The maximum of circulation had been reached in December, 1873, when 1,976 banks, with an aggregate capital of \$490,000,000, had outstanding \$341,000,000 in circulating notes. The long depression following the panic of 1873 arrested the growth of the system so that in June, 1877, 2,078 banks had an aggregate capital of \$477,000,000 and \$299,000,000 circulation.

During three and a half years, therefore, the number of banks increased only 102, while there was a shrinkage in capital of \$13,000,000,

and in circulation of \$42,000,000.

At that point of time the refunding operations of the Treasury and

the preparations for resumption began to exercise upon the banks influences tending to reduce their number and capital, but even then their circulation increased slightly. In April, 1879, there were only 2,048 banks in existence, 30 less than in June, 1877, and in October, 1879, there were 2,052 banks, which had barely \$454,500,000 capital, a falling off of \$22,500,000 in two years and four months, while the total circulation had risen to \$322,000,000 from \$299,000,000, thus making up for the reduction of capital.

After this date new influences arose, the banks began to increase in number and to enlarge their capital, while the rapid increase of deposits, due undoubtedly to the confidence inspired by the success of resumption, enabled them to expand their accommodations to the public.

Individual deposits in national banks amounted in October, 1865, to \$500,000,000, but in April, 1879, they were less than \$600,000,000, although the banks had increased in number from 1,513 to 2,048; their capital, surplus, and undivided profits had gone up from \$464,000,000 to \$610,000,000, and their circulation had grown from \$171,000,000 to \$304,000,000.

During the thirteen and a half years between these dates the average amount of individual deposits, as shown by all the reports of condition, was a trifle under \$600,000,000, while the maximum was only \$683,000,000, but immediately after resumption was recognized as a fact established, deposits began to increase; in December, 1880, the aggregate exceeded \$1,000,000,000; it rose in 1881 above \$1,100,000,000, and has steadily increased since; the average of 1888 is \$1,301,088,048, and the highest point was reached on October 4, 1883, when the amount was \$1,350,320,861.

Year by year, with increasing capital and deposits, loans and discounts expanded. In December, 1873, they were less than \$857,000,000, and in April, 1879, they were only \$835,000,000, but in 1888 they have averaged \$1,617,636,312, and have been as high as \$1,674,886,285.

According to all natural laws the circulation of these banks should have kept pace with augmenting resources and with increasing depos-

its and expanding business, but it has not been so.

Since December, 1879, the national banks have increased in number from 2,052 to 3,151, which is over 53 per cent. Their capital, surplus, and undivided profits were then \$617,501,367.68; they are now (October 4,1888), \$855,576,646.95, an increase of 38.55 per cent. Loans and discounts have gone up from \$933,000,000 to \$1,674,886,285.29, an increase of 79½ per cent.; but the circulation has declined from \$322,000,000 to \$151,702,809, a decrease of nearly 53 per cent.

If we deduct from circulation at each of these periods the amount represented by the obligatory deposits of bonds, the remainders will represent the circulation voluntarily maintained. In December, 1879, this voluntary circulation was \$233,179,965; on October 31, 1888, it was

only \$68,956,627, a reduction of  $70\frac{1}{2}$  per cent.

The constant shrinkage of national bank circulation is attributable largely to the growing scarcity and rising price of United States bonds, but there is also another influence at work of which the importance is not generally recognized, namely, the displacement of national bank

notes by other forms of money.

At the end of 1878 the paper money of the country amounted, as has been stated, to \$685,000,000, which supplied all the needs of Treasury disbursements and of currency circulation, except those arising out of transactions in foreign exchange, the payment of gold interest, and the collection of duties on imports.

These latter needs were supplied by a stock of coin and of coin certificates held in the principal Eastern sea-ports, estimated at \$35,000,000, which, with \$40,000,000 coin said to have been in circulation in Texas and on the Pacific slope, and the \$685,000,000 of paper, made the total circulation at the end of 1878 about \$760,000,000. The Treasury held in United States and national bank notes \$82,600,000, against which there were outstanding certificates of deposit to the amount of \$39,000,000, leaving the balance, viz, \$43,000,000, to be deducted from the total of \$760,000,000 in order to ascertain the amount of currency actually employed. Upon this computation it would appear that the effective circulation just before resumption was less than \$720,000,000.

The resumption of specie payments went into effect on January 1, 1879, and as soon as the public became satisfied that it was permanent, the heretofore hoarded specie began to enter into general circulation. The effect, of course, was an expansion of the currency; not suddenly, because the habit of hoarding is never suddenly discontinued, but gradually, as confidence in the situation made its way among

the people.

The amount thus added to the circulating medium has been estimated at \$140,000,000, which includes subsidiary and minor silver coin,

\$70,000,000.

Another influence under which the volume of the circulating medium has constantly been expanded is that of the silver dollar coinage law of 1878. Under that law the number of standard silver dollars coined up to October 31, 1888, is \$309,780,790, and every month hereafter, as long as the law exists, at least \$2,000,000 more must be coined and sent to

the Treasury to be put into circulation.

The standard silver dollars, as coins, have never entered into circulation in numbers at all proportioned to the number coined, nor did the silver certificates issued under the act of February 28, 1878, fare any better, but the silver certificates authorized by the act of August 4, 1886, have been very largely absorbed by the public, not apparently because any attention is paid to the basis of their issue, but because they constitute the only supply of notes of small denominations.

As a result of all the influences that have come into play since 1879, the total volume of money in the United States has so increased that it is now estimated to amount to \$1,700,000,000, against less than \$1,040,000,000 on January 1, 1879, an increase of \$660,000,000 in total volume, while the national bank circulation in the same time has de-

creased by nearly \$83,500,000.

The fact that for a long time past large sums have been accumulated in the Treasury without disturbance to business affords very strong grounds for believing that the volume of currency is excessive, and this inference is strengthened by two facts of recent occurrence—first, the fact that when the Treasury accumulations rose, as they did, during September, 1887, from \$259,546,540 to \$275,307,883.25, the effect upon business was immediate and serious, and, secondly, the fact that the transfer from the Treasury to depository banks of about \$40,000,000 between October, 1887, and January, 1888, relieved the stringency, although a large part of this sum was offset by excessive revenues during that period, and although also the Treasury still contained a great deal of idle money.

While this is being written another fact of still greater significance is added to those already cited, namely, the export of gold. To any one who considers the component elements of our currency it must be obvious that gold is the only one that can be both increased and dimin-

ished in volume in response to the changing volume of the need or more properly of the use, for currency; and its export, except when assignable to other causes, is a sure indication that the total volume of currency is for the moment in excess of the amount that can be profitably

employed.

The silver element is by statute constantly augmenting in volume, but the export of our silver coins is prevented because they have, in the United States, a value as compared with the same weight and fineness of silver uncoined as 100 is to 73, while everywhere else they have only their bullion value. For a like reason silver coins are not used in the arts as gold coins are; because to workers in silver, bars are far cheaper than dollars. Hence the silver coinage is an element constantly increasing in volume.

The legal tenders are fixed by statute at \$346,681,016, so that their

volume is subject to neither increase nor decrease.

The national bank notes are theoretically subject to increase and decrease of volume, but apart from the influences which have for a long time produced a steady decrease, the law itself interposes an obstacle to flexibility. Section 9, act July 12, 1882, limits the voluntary decrease of national bank circulation to \$3,000,000 a month and forbids any increase of circulation to be issued to a bank within six months after it has made a deposit of lawful money for the purpose of reducing circulation.

The gold element of the currency is alone and peculiar in this, that its volume and distribution are determined not by statute, but by the natural laws of finance.

During the years subsequent to 1878, when business, restored to the solid basis of gold values, was constantly expanding and therefore constantly needing increased supplies of circulating medium, we not only retained for home use our large annual production of gold, but whatever additional amounts our business required flowed into the country from foreign nations, and that in spite of some very distinct efforts on their part to prevent it.

On the other hand, when from time to time there occurred a subsidence in the tide of national prosperity or a depression in any of our greater industries, so that for the moment the amount of money in circulation exceeded the use for it, gold exports relieved the situation.

Of late years, however, the gold movement across the Atlantic has become much more sluggish because something has been found to take its place, and, to some extent at least, to serve the purpose of regulating exchanges and transferring capital. Certain securities on the New York stock-list have come to be largely and constantly dealt in at the European monetary centers, and as, by means of cable communication and through the close competition of dealers, their values are generally nearly at a level in all markets, they supply a cheaper medium of settlement than gold and a more convenient basis for exchange operations.

This "arbitrage" business, as it is called, has already exercised an important influence upon the preservation and distribution of our stock of gold, and has probably contributed to crowding national bank notes out of circulation by impeding the export of gold at times and under conditions which would at former periods have produced an outflow. To explain: Before this new business came in the dealers in foreign exchange, being dependent wholly upon gold to settle their balances, or to serve as a basis for drafts or credit whenever the supply of commercial bills proved insufficient, were compelled to carry a stock of coin or bullion, and this constituted a fund apart from the general monetary

stock of the country; its transfer back or forth across the Atlantic followed the fluctuations in foreign-exchange premium, and only when it became exhausted, or threatened to become exhausted, was there any drain upon the general stock of gold currency. The publicity attending gold shipments enabled the whole business world to perceive the drift of the metal one way or the other, and bankers and merchants alike could prepare in advance for the moment when the stock of current coin should be drawn upon to supply the foreign demand.

It is not so with the securities in question; they have become the stock in trade of dealers in foreign exchange; they are shipped back and forth according as exchange quotations fluctuate; indeed, in many cases they are not even shipped; the ownership of them is transferred by a cablegram, and this transfer supplies a basis for bills or credits. Whether they are shipped or otherwise dealt with, however, the transactions in these securities, or in respect to them, are completely cloaked from public observation, and, therefore, neither bankers nor merchants can now obtain any warning of the approach of a state of foreign exchanges which may necessitate the export of gold, nor can they by any means perceive, nor by the exercise of any sagacity securely estimate, the extent to which such shipments may be made or the length of time they may continue.

The old computations as to what was called "the balance of trade" supplied some sort of basis for an estimate of probable gold movements, but now the utility of such computations has been destroyed because the values transferred through the medium of securities are very great

and are utterly beyond determination.

Another feature of the present foreign exchange business should not be overlooked in tracing the relations between that business and our monetary system, namely, the existence of banking houses with partners or agents on both sides of the Atlantic, and employing a great money

capital.

Formerly capital was seldom transferred from one country to another for long periods of time without either a change in its ownership or a change of domicile on the part of its owner, whereas now there are masses of capital that really belong to no particular country, but are always "on the road" in the form of bills of exchange. This capital, supplemented by the almost unlimited credit of the bankers who direct its employment, substantially controls the course of international exchanges, but its movements are as noiseless as those of the electric current by which they are guided, and as secret as the cipher language in which alone they are recorded.

It is impossible that there should be no danger in all this to a monetary system like ours. While the arbitrage business has set free some gold for other employment, it creates by that very effect a danger of considerable importance, namely, the danger of a general disturbance of industry whenever the balances to be settled or the movements of capital exceed the available supply of securities, and resort must again be had to gold shipments, producing not only a contraction of the currency, which, under existing circumstances, is no great matter, but also, what is far more disturbing, causing a visible depletion of reserves at the main center of our entire mouetary system.

It must be remembered that gold has only been relegated to the second place in our foreign exchange dealings; it is not banished nor disqualified. It has not, like silver, become functus officio in international trade; it is still the measurer of commercial values, still the only medium of liquidation that is equally effective everywhere, and the danger

now is that, instead of moving in small amounts promptly in sensitive response, as formerly, to fluctuations in exchange, it may some day slide away from us in masses under some sudden escape of influences heretofore concealed from observation, and also perhaps held in check, by the arbitrage system. If we are really exposed to such a danger, we can not begin too soon to prepare for it, and prudence counsels that the first step should be to protect the Treasury against any possible embarrassment.

The \$346,000,000 of greenbacks are the weak point in our currency system. The gold coins and certificates stand first, the national bank notes next, the silver coins and certificates third, and the greenbacks last in the order of assured value, and it would be a great benefit to the whole mass of the currency if this, its frailest element, could be elimi-

nated from it.

The present state of things seems favorable to the substitution of national-bank notes for greenbacks, and to that end I venture to submit for the consideration of Congress the following measures:

1. Funding in bonds the greenback debt of \$346,681,016, or so much of it as may be presented at the Treasury within a limited period of

time, say three years.

2. The bonds to be issued only to national banks presenting green-backs for that purpose; to bear a low rate of interest, not exceeding 2½ per cent., and to mature only upon the failure of the bank or upon its dissolution, whether voluntary or upon expiration of its corporate existence.

3. The bonds so issued to be available only as a deposit to secure national-bank circulation and to entitle the banks depositing them to

receive circulating notes to the amount of their face.

4. Existing banks to be required, for a time at least, to retain on deposit the bonds they now have to the minimum amount required by existing laws and to use the new bonds only for procuring additional circulation, or in substitution for whatever bonds they may now have on deposit in excess of the minimum, but the new bonds to be available for all purposes by banks organized after the passage of the act.

5. The National Bank Redemption Agency at Washington to be transferred to New York, and a sub-agency to be established at each central reserve city, the notes of all banks wherever situated to be re-

deemed at whichever agency they may be presented.

In support of these measures it may be said-

1st. That they provide for the retirement of the greenback circulation without even a temporary contraction of the currency, because arrangements can and should be made to issue the national bank notes immediately upon the presentation of the greenbacks for the purpose of being funded.

2d. That upon the retirement of these obligations the \$100,000,000 of gold held in the Treasury as a special fund for their redemption will become an available asset and may be paid out, adding just that much

to the active circulation.

3d. With the greenbacks taken out of the category of demand obligations of the Government, the Treasury will be in a better position than now to maintain the silver coinage at par with gold; and, on the other hand, specie and specie certificates will be held much more largely by the banks than they are now, and this will tend to relieve the strain upon the Treasury.

4th. As the greenbacks will not be extinguished, but held in a state of suspended monetary vitality until the failure or liquidation of a bank

requires their use in the redemption of its notes, they will constitute a reserve fund lying in the Treasury ready for use, at any moment of emergency, in the redemption of any portion of the national-bank cur-

rency that may become discredited.

5th. Assuming that \$300,000,000 of greenbacks will be eventually funded in this way; assuming that the bonds bear interest at the rate of 2½ per cent. per annum, payable semi-annually, and assuming that the present tax on circulation is maintained at the rate of one-half per cent. every six months, the annual charge to the Government will be about \$4,500,000, and against this it gets the use of \$100,000,000 for paying off that much bonded debt bearing 4½ per cent. per annum interest, and escapes the expense of redeeming and renewing the legal-tender notes.

6th. Even if the entire \$4,500,000 per annum should be added to the permanent expenses of the Government it would be but a small price to pay for the service which the banks will render both to the Government and to the public through the instrumentality of such a circulation

as theirs will then be.

7th. The moderate profit of 1½ per cen't. per annum will be materially reduced by the expenses of redemption and supervision, including loss of interest on the redemption fund, so that the banks will not realize quite as much as the Government pays, but still it will probably constitute a sufficient incentive to banks to fund all the greenbacks they can, and when the whole issue is funded whatever amounts are from time to time paid out in redemption of the notes of failed banks will probably be collected and presented afresh in order that circulation may be obtained for them.

8th. The public will be benefited by having a bank note circulation amply secured and of which every note is redeemable in coin or in a certificate representing coin actually on deposit in the Treasury, and redeemable, too, not only at the bank which issued it, but at any central reserve city; a circulation large enough in volume to admit of easy and prompt adjustment to the varying needs of different localities, its flexibility secured by the constant pressure of the Government tax on the one side and the constant inducement of the bond interest on the other, while the numerous points of issue and their wide distribution over the country afford ample protection against combinations or other devices for artificially expanding and contracting the circulation.

9th. With such a resource at hand we may view with indifference the transfer abroad of a large part of our burdensome and unprofitable stock of gold, where it will be more useful to us in expanding the markets for our exports of agricultural products than it can be here

locked in the Treasury.

10th. The national bank system will be restored to healthy activity and stimulated to fresh growth especially in those parts of the country where such banks are most needed and are now found in least numbers.

### LAWS REGULATING INTERSTATE COMMERCE.

Occasion was taken last year to call attention to the divergent, and even contradictory, character of the laws prevailing and of the decisions which have been rendered, in different States in respect to substantially the same points of general commercial practice. A more extended observation of interstate commercial relations, particularly in connection with so much of the business of the national banks as consists of operations in exchange arising out of transactions between citizens of different States, confirms the views intimated in the Report of 1887 as

to the importance of national legislation for removing the confusion and friction caused by the differences of local laws and judicial construction.

The establishment and extension of the national banking system and the regulation by Congress of interstate transportation constitute successive steps in the direction of that regulation of trade between the States which the Constitution authorizes if it does not enjoin upon

Congress.

The next step to these, in logical sequence, would appear to be the enactment of a commercial code applicable to transactions between citizens of different States, and as such a code would naturally tend to the extension of the benefits now derived by the public from the national banking system, it seems proper to include this subject among those which the Comptroller of the Currency is privileged to bring to the attention of Congress.

The proposition to establish an interstate commercial code rests, of course, upon the assumption that constitutional authority to do so is

included in the power to regulate commerce between the States.

Without venturing to discuss the constitutional question, it may be said in support of the assumption, that the complete regulation of commerce would seem necessarily to involve the enactment, or at least the sanction, of some body of laws defining the obligations and securing the rights of persons engaged in such commerce. The identity in origin of our State systems of law and jurisprudence, and the similarity of the local conditions affecting their development, preserved among them for a long time sufficient uniformity to make them practically a common law, but of late years there has arisen more and more divergence, especially in court decisions, and now the commercial dealings between citizens of different States have become materially embarrassed by the variety and even the contrariety of law and practice prevailing in different parts of the Union with respect to negotiable instruments, partnership accounts, and contracts.

While the banks seem to have the chief interest in this matter, because the laws and decisions in question affect directly that in which they deal, yet this interest is representative only, because behind each check, draft, bill of lading, or promissory note held by a bank there is dependent upon the paper a commercial transaction in which the bank

has no part and from which it can derive no profit.

The purchase and sale of merchandise is only the initial point of a commercial transaction; to render it complete the goods must be deliv-

ered by the seller and they must also be paid for by the buyer.

From the initial bargain to the final settlement each step is taken only upon the assurance that all the others will follow in due succession; hence an obstruction at any point, either to the delivery of commodities or to payment for them, arrests the whole current of dealings running toward consummation at that point, producing stagnation at the sources of its supply and the paralysis of every organ through which the demand should be transmitted.

Practical experience of the importance of preventing obstruction in the channels of transportation, produced and sustains the law regulating interstate commerce by railroad and river, and now the public is beginning to realize the importance also of preventing obstruction in the channels through which instruments of exchange must pass pari passu with the parallel passage of the goods they represent.

The free movement of interstate exchanges is as essential to the marketing of crops and to the distribution of industrial products as are

railroads and steamboats. The latter never move a ton of anything until the exchange drawn against it is negotiated, and assurance is thus secured that the article shipped will be paid for. Producers have suffered a loss of markets from financial disorder much more frequently than from transportation derangement; hence, in facilitating financial transactions and relations between citizens of different States, Congress will promote the great industrial interests of the country quite as effectually as by facilitating the physical transportation of the products of those industries.

Without attempting to cite specific instances or to designate the States concerned, it is sufficient to say that in respect to commercial paper the conflict of law in different States extends to every branch of the subject; and it is not confined to cases of rare occurrence, or to those in which the circumstances are unusual or peculiar, but exists in respect to many matters which are elementary and fundamental, as, for example, the legal force of such instruments as bills of lading, promissory notes, bills of exchange, etc., the obligations of the parties thereto, the steps necessary to charge the different parties with liability, and the extent to which the instruments constitute a charge or lien upon the property in respect to which they are made. In many instances the force of the instruments has to be determined by the laws of a State in which the statutes or the leading decisions differ from those prevailing at the place of negotiation; and as bank officers can not be familiar with the laws of every State and Territory, and also with all the decisions throughout the country, they must often be thrown into perplexity about what might be a very simple business, except for this conflict of laws. In all such cases increased expense affords the only practicable solution, and such increase falls upon the producer in the form of premium or discount.

The laws of the various States differ most widely in respect to bills of lading. In some States a bill of lading is by statute a negotiable instrument, while in other States it retains its common law characteristics. Even the statutes making it negotiable are much broader in some States than in others. For example, the statutes of Pennsylvania and Missouri prescribe simply the manner of negotiation, i. e., by indorsement and delivery; but do not define the effect of such negotiation, nor place such instruments on the footing of instruments which are the representatives of money, so as to charge them with all the consequences which usually attend or follow the negotiation of bills and notes (Shaw v. Railroad Company 101, U. S., 557); whereas, on the other hand, the Maryland statute expressly declares them to be negotiable instruments in the same sense as bills of exchange and promissory notes (Tiedman v. Knox, 53 Md., 612).

Again, the laws vary in the different States as to the liability of the carrier for the representations made in the instrument. In New York, for instance, it is the rule that the carrier is bound by the representations of its agent that the goods were received, and though, in fact there were no goods received, it is estopped to set up such defense (Armour v. Mich. Cent. R.R. Co., 65 N. Y., 111); but in the Supreme Court of the United States, and in other jurisdictions, the English rule prevails, that the carrier is not liable if its agent issued the bill of lading without any actual receipt of the goods (Vinton v. Pollard, 105 U. S., 7). By the laws of some States, therefore, the banker need not look beyond the bill of lading, whereas by the laws of other States he must make further inquiries, if he would be sure of the security. To ascertain, then, how far he may rely upon the bill of lading, he must refer to the laws of the State by which the instrument is governed, which will often be a State

different from his own. Nor can he always determine with certainty what laws apply to it; for it is frequently a very nice and difficult question to decide whether these are the laws prevailing at the place of ship-

ment or those obtaining at the place of delivery.

As to the rules which may govern a draft, or bill of exchange, the conflict is equally great. In the first place, provisions which, by the laws of some States, may be properly inserted, would, by the laws of other States, destroy the negotiable qualities of the instrument, as might likewise the omission of certain provisions; and while the instrument might be negotiable according to the laws of the State where drawn, it might not be such according to the laws of the State in which it is made payable. Again, the rules as to the time of payment are different in the different States, and the banker (with whom it is often important to know the precise time he may expect payment of his bills receivable) may frequently be at a loss to know with respect to an important collection, whether it is payable immediately or is entitled to days of grace. Still again, the contracts of the indorsers may, by some decisions, be governed by laws different from those by which the contract of the drawer is determined. Numerous other questions of this kind will suggest themselves as likely to arise in respect both to the bill of lading and the draft; but it is needless to multiply illustrations.

It has been suggested that uniformity of laws on this subject might be secured by appropriate legislation by the various States. But such uniformity has as yet been unattainable in respect to other matters for which it has been desired. The subject of a uniform system of legal procedure has been agitated for many years, and some very strong efforts have been made in that direction, but as yet little has been accomplished. But were it possible to procure similar legislation by any considerable number of States, or even by all, we should be merely back again where we were under the common law, and as the different provisions of the statutory law would have to be construed by the various State courts, it is not unlikely that these courts would often reach dissimilar conclusions as to the meaning and force of the same provision in the different statutes, just as they have diverged in their application of identical common law principles. We have an additional illustration of this tendency in the diversity of exposition given to the same or similar provisions in the various codes of procedure, and in the dissimilitude of the decisions in the different States as to the extent to which these provisions change or modify the old rules of pleading and practice. It is true that a system of commercial law adopted by Congress would likewise be subject to judicial construction, but being a statute of the United States, the duty of construing it would properly belong to the Federal courts, and the rules of interpreting it prescribed by the United States Supreme Court would be binding upon every other court; so that, in the main, and certainly in process of time, it would receive the same construction in all courts and in all parts of the country.

The objection to putting general rules of law into the form of statutes would have no application to a code of the kind proposed, for the purpose is not to change the form of expressing the law, by substituting statutory rules for judicial precedents, but to render certain and uniform those rules of commercial law which are now uncertain or different in different localities, a purpose which can not be accomplished by any number of judicial determinations, since the decisions in one State are not binding as precedents in any other States, nor are the Federal courts bound by the adjudications of State courts, or the State courts by Federal decisions.

#### FOURTH.

STATE, SAVINGS, AND PRIVATE BANKS, AND LOAN AND TRUST COM-PANIES.

In order to comply with the fourth requirement of section 333 of the Revised Statutes of the United States, the Comptroller has obtained, through the courtesy of the authorities of twenty-four States which exact returns of this nature, all the information received by them. This information, transmitted sometimes in detail and sometimes compiled by the State officers, embraces the affairs of 2,008 incorporated institutions and 212 private banking concerns, making 2,220 in all.

The returns of the 2,008 corporations obtained from the State authorities comprise statements of condition of 1,209 banks operated under State charters, aggregate capital, \$136,288,327, surplus and undivided profits, \$51,575,928, deposits, \$387,017,523, of 56 loan and trust companies, capital, \$26,913,200, surplus and undivided profits, \$23,411,982, deposits, \$208,739,626; and of 743 savings banks, of which 598 report no capital, and 145 report capital aggregating \$13,122,434. The aggregate surplus and undivided profits of the 743 savings banks is \$123,352,662, and their aggregate deposits amount to \$1,248,072,843. Two hundred and twelve private banks report capital to the amount of \$6,712,636, surplus and undivided profits of \$2,212,158, and deposits of \$20,353,852.

Even among the States which exact returns from banks there are but few that provide adequately for the scrutiny and compilation of the returns by any State officer, and of course no such provision exists where returns are not required. Without some such provision, however, there can be no certainty that there are not errors and omissions in the In one State, in response to the request for a summary of reports of banks reporting, the chief of the department in charge of the returns wrote: "We have no printed report of the condition of banking institutions in this State. We can have an abstract if you wish it. It will cost you \$25, as we will have to get some outside party to come in and make it." In reply that officer was advised that "while Congress requires the Comptroller to get that information (that is, all available information relative to the condition of banks other than national), no appropriation has ever been made to meet any expense attending it, nor are there funds available for defraying the cost of summarizing the reports filed in your office. In a number of States the condition is the same as exists in yours, but without an exception the reports have been intrusted to this office, a copy of the abstract being returned with the The communication concluded with the request that the reports be forwarded at the expense of this office, and with the offer to return, with the papers, a copy of the abstract. Neither the papers nor a reply was received. In another State, banks report only such items as are required to enable the tax department to make the assessment.

In order to obviate error, and as far as possible to obtain complete information, the names and addresses of over 5,700 banks and bankers were secured, and to each was mailed a circular letter, inclosing a blank form, requesting a report of condition of date, June 30, 1888. The request was complied with by over 2,000 banking associations and bankers. Later in the season about one-third of the banks so responding were found to be included in those reported officially by State officers, so that the number, from which returns are classified as unofficial, is 1,307, namely, private banks 991, and incorporated institutions 316.

These 1,307 concerns are in States and Territories in which reports

are not required to be made to local authorities, and they consist of 194 State banks having an aggregate capital of \$18,643,541, surplus and undivided profits of \$5,309,160, and deposits of \$23,030,319; 64 loan and trust companies, with capital of \$26,330,310, surplus and undivided profits of \$12,539,705, and deposits of \$49,138,488; 58 savings banks, of which 28 report capital amounting to \$3,227,887. The aggregate surplus and undivided profits of the 58 savings banks is \$9,343,620, and their aggregate deposits amount to \$116,123,707. Nine hundred and ninety-one private banks report capital to the amount of \$34,129,438, surplus and undivided profits of \$12,665,828, and deposits of \$74,524,990.

A comparison of these returns with those of last year will show an increase of 418 institutions reporting officially, a decrease of 47 report-

ing unofficially, a net increase of 371.

The returns indicate an increase in number of institutions of about 10 per cent., and of assets of about 9 per cent. Banks to the number of 341 have organized since the last report, the capital of which slightly

exceeds \$16,000,000.

As much interest attaches to the operations of the savings banks of the country, a special effort has been made to collect and tabulate all obtainable information relative thereto. The abstract shows returns, official and unofficial, from mutual and stock savings banks, separated and aggregated, and the average amount due each depositor in each class by States, the average of all by classes, and the average of all banks combined.

In 1887 reports were received from 684 savings banks, of which 600 were mutual institutions; this year 801 reported, of which 628 are mutual. Of the latter number all but 22 are located in the New England States and in New York, New Jersey, Pennsylvania, Delaware, and Maryland; in all of which, except the three latter States, statistics are at hand giving the average dividends paid; in one the rate is  $2\frac{3}{4}$  per cent., in three over  $3\frac{1}{4}$  per cent. and less than 4 per cent., and in three over 4 per cent. and less than  $4\frac{1}{2}$  per cent.

It would be interesting to compare the earnings of the mutual savings banks with those of savings banks having capital stock, but it has been impossible to ascertain the earnings of the latter, owing to the fact that none but the California institutions report dividends and in-

terest allowed depositors.

In California 23 such banks reported to the commissioners on January 1, 1888, of which 18 paid dividends on capital stock of from 4 to 13 per cent., making an average of 7.2 per cent., nearly; 21, namely, the 18 above mentioned and three others (two of the three having a reserve fund but no capital) paid interest to depositors to the aggregate amount of \$2,551,043.31, the rate varying from 3 to 6 per cent., while two report the payment of neither dividends nor interest. As eleven of the 21 banks pay interest at two or more rates, the amounts on which each rate is paid not being given, it is impossible to show the average, though it appears to be about  $4\frac{1}{2}$  per cent. This would indicate that so far as the returns to depositors are concerned, the public benefit of the two classes of savings banks—the stock and the purely mutual—is nearly identical.

All stock savings banks in California are stated by the California bank commissioners, in their report for 1888, to be "business enterprises of private individuals with incidental benefit to the public, in nowise differing in this regard from commercial banks."

Such institutions are regarded on the Pacific coast as an improve-

ment on the purely mutual system. The funds of the stockholders are a guaranty for the safety of those of the depositors, the stockholders being liable for all obligations of the institution to an amount equal to the value of their stock. In addition, the directors or trustees are jointly and severally liable to the creditors and stockholders for all moneys embezzled or misappropriated by the officers.

With a view of throwing some light upon the distribution of the circulating medium of the country, every effort was made to obtain from State banks, Private banks, and Savings institutions the details of

their cash holdings. The result will be found on page 446.

In the appendix tables will be found showing by States and Territories the condition of these banks as obtained from official sources and from banks direct (classified as unofficial returns); aggregate resources and liabilities of each class and from both sources; comparative statements of condition of State banks, 1872-'88; loan and trust companies, 1883-'84 to 1887-'88; savings banks, 1883-'84 to 1887-'88; growth of savings banks as shown by deposits, by States, 1830, 1840, and 1850 to 1888; and deposits in savings banks, number of depositors, and average amount due each, by States, in 1886-'87 and 1887-'88.

The following tables present summaries of this information:

Aggregate Resources, Liabilities, and Condition of State Banks, Loan and Trust Companies, and Savings and Private Banks, organized under State and Territorial Laws. (From official sources.)

A table in the appendix,* page 139, shows, by States and Territories, the estimated population of each on June 1, 1888, and the aggregate capital, surplus, undivided profits, and individual deposits of national and State banks, loan and trust companies, and savings and private banks in the United States on June 30, 1888; the average of these per capita of population, and the per-capita averages of such resources in each class of banks, from which it appears that the estimated population of the United States is 61,394,000; total banking funds amount to \$4,766,909,263, which is an average of \$77.64. The per-capita averages of such resources in each class of banks are: National banks, \$34.76; State banks, \$10.13; loan and trust companies, \$5.65; savings banks, \$24.64, and private banks, \$2.46.

The total "cash in bank" held by the 3,527 institutions reporting officially and unofficially is \$161,495,733, of which \$44,288,254 is taken as gold (that amount includes \$5,587,144 in coin, \$591,385 in gold certificates, \$18,445,351 specie, and \$19,664,374, the amount in the California banks), \$1,358,513 silver coin, \$553,507 silver certificates, \$28,954,575 legal tenders and national-bank notes, and \$86,340,884 not classified.

For purposes of comparison, the following table is appended:

STATEMENT SHOWING THE AMOUNT OF GOLD, SILVER, ETC., HELD 'BY NATIONAL BANKS AND OTHER BANKING ASSOCIATIONS, JUNE 30, 1888.

#### FIFTH.

Names and Compensation of Officers and Clerks in the Office of the Comptroller of the Currency, October 31, 1888.

NOTE.—Names and compensation of officers and clerks are omitted, but they will be found in the separate editions of the Comptroller's report.

EXPENSES OF THE OFFICE OF THE COMPTROLLER OF THE CURRENCY FOR THE YEAR ENDING JUNE 30, 1888.

For special dies, plates, printing, etc	\$57, 113, 26
For salaries	101, 878, 04
For salaries, reimbursable by national banks	16, 550, 39

The contingent expenses of the office are not paid by the Comptroller, but from the general appropriation for contingent expenses of the Treasury Department; no separate account of them is kept.

### ORGANIZATION AND EXPENSES OF THE BUREAU OF THE CURRENCY.

It is unnecessary to reiterate what was said in the last Annual Report upon this subject, and what will be found on one point or another in every Report of the Comptroller of the Currency since 1876, as to the inadequacy of the clerical force or means at the disposal of the Comptroller.

I respectfully repeat, however, the specific recommendations submitted last year, as, "in order that the present work of the Bureau may be properly performed, the following changes are essential:

"1. The Deputy Comptroller should have a salary of \$3,500. No less sum can be depended upon to secure or to permanently retain any

one entirely qualified for the position.

"2. There should be provided for the Bureau a responsible legal adviser, with such clerks and books as may be necessary to the proper examination of the questions that are daily presented in almost every branch of commercial law.

"3. There should be added to the four divisions now existing a divis-

ion of archives and statistics.

"Provision should be made by appropriation for an annual conference in Washington of all examiners of national banks, for the employment of supervising examiners, as recommended elsewhere, for such traveling expenses as may be incurred by the Comptroller or Deputy Comptroller in visiting different sections of the country in connection with the banks and banking interests there, and for the accumulation of a library of standard books of reference on subjects relating to banking and financial legislation and administration."

### INFORMATION.

Section 333 of the Revised Statutes of the United States, in prescribing the scope of the annual report to be made by the Comptroller of the Currency, imposes upon that officer the further duty of submitting to Congress such other information in relation to the banks as in his judgment may be useful. The following information is accordingly submitted.

### THE ORGANIZATION OF NATIONAL BANKS.

During the year under review there has been no change in the laws governing the organization of national banking associations, nor in those which provide for the conversion into such an association of any banking corporation having a State or Territorial charter; hence what was said on this subject in the last Report still applies.

The four following tables give for each State and Territory the number, aggregate capital, bonds, and circulation of national banks existing October 31, 1887, and of banks organized during the year ending October 31, 1888, and show the net increase or decrease in capital, bonds, and circulation for each class of banks during the past year, including

failed and liquidating banks.

It will be observed that in the first table the figures showing circulation do not bear in all cases to the figures showing the amount of bonds the relative proportion to be expected from the provision of law which is intended to keep the circulation at 90 per cent. of the par value of bonds. Where discrepancies exist they are attributable to two causes: (1) The occasional surrender of circulation prior to the actual withdrawal of the bonds. (2) The redemption of the notes of failed banks for which deposits have been made with the Treasurer out of collections by receivers in cases where the state of the trust allowed of the retention of bonds for the sake of the interest accruing upon them which would otherwise have been lost if the redemption fund had been provided for by their sale.

Banks newly organized are required to pay in the subscribed capital as follows: At date of authority to commence business, 50 per cent., each month thereafter 10 per cent.; bonds may be deposited in proportion to capital paid in; circulation is issued only upon bonds actually

deposited.

With a net increase during the year of 90 in the number of banks, and of \$13,726,300 in national-bank capital, there has been a net decrease in circulation of \$16,545,740.

By reference to the table on page 483, showing the details of bond deposits by banks organized within the year, it will be seen that these banks deposited only the minimum required by law, and the same is true

of banks increasing their capital.

The table on page 449, exhibiting the elements of increase and decrease during the year, shows that of the \$3,720,695 added to national-bank circulation since November 1, 1887, \$2,375,550 has been issued upon bonds deposited, not for the sake of circulation, but to secure the other advantages afforded by the national bank system; while on the other hand, with the exception of \$1,041,165 in notes of failed and liquidating banks, the whole reduction in national bank currency represents the voluntary surrender of circulation by banks which have heretofore held bonds in excess of the minimum requirement.

The circulation surrendered by such banks is \$19,225,370, which is about 20 per cent. of the circulation outstanding a year ago on the bonds representing the excess above the minimum required by law and

which may be called the voluntary circulation.

Two new influences have come into play during the past thirteen months, accelerating the retirement of national-bank circulation, viz, (1) the transfer to national-bank depositaries of a part of the redundant revenues of the Government, and (2) the large purchases of bonds by the Treasury Department.

### NATIONAL BANK DEPOSITARIES.

In October, 1887, with a view to averting a threatened monetary stringency arising from the abnormal accumulation of cash in the Treasury, the Secretary resolved to increase the amounts in national bank depositaries under section 5153, Revised Statutes. The depositaries have always been required to give United States bonds as security for the public moneys intrusted to them, but owing to the high price, of the bonds and the requirement of section 5191, Revised Statutes as to the reserve to be held against all deposits, the banks were unwilling to receive additional amounts at the old rate of 90 per cent. on 42 per cent. bonds and par on the 4 per cent., so that it was determined that banks depositing \$1,000,000 in 4½ per cent. bonds might carry not exceeding \$1,000,000 of public moneys, and those depositing \$1,000,000 in 4 per cent. bonds might carry \$1,100,000. Subsequently banks were allowed to deposit less than \$1,000,000 in bonds and to carry balances in the above proportions. Since the bonds of both classes held as security for circulation entitled the banks to only 90 per cent. of their face in circulating notes, against which beside they had to keep up a redemption fund of 5 per cent., the opportunity of obtaining Government deposits on the above terms operated as an inducement to the surrender of voluntary circulation, in order that the bonds thereby released might be transferred to the Secretary to be held as security for public moneys.

The precise extent to which this influence was effective in reducing circulation can not be shown because the transfers were not always made directly. In some cases banks intending to withdraw 4½ per cent. bonds and to surrender the circulation outstanding against them, deposited lawful money to effect the withdrawal and afterward sent on 4 per cent.

bonds as security for the public moneys, and in other cases the deposit of 4 per cent. bonds was made first and the withdrawal of 4½ percents effected afterward, but in both cases it was the terms on which Government funds could be obtained that operated to reduce national bank circulation.

The subjoined table, showing the transfers directly made from circulation account to public moneys account in each month for the past two years, exhibits in a striking manner the effect of this influence.

STATEMENT BY MONTHS, SHOWING THE AMOUNT OF UNITED STATES BONDS TRANSFERRED FROM THE SECURITIES HELD IN TRUST BY THE TREASURER OF THE UNITED STATES FOR NATIONAL-BANK CIRCULATION TO THE SECURITIES SO HELD FOR PUBLIC DEPOSITS DURING THE TWO YEARS ENDING OCTOBER 31, 1887–'88, AND THE METHODS BY WHICH SUCH TRANSFER WAS MADE.

Date.	Total.	Exchanged.	Substi- tuted.	Trans- ferred by re- tirement of circulation.
1886. November December	\$70,000 200,000	\$100,000		\$70,00 <del>0</del> 100,000
January . February . March . April . May . June . July . August . September . Total for eleven months . October . November . December .	530, 000 220, 000 145, 000 40, 000 155, 000 60, 000 30, 000 202, 500 1, 782, 500 715, 000 2, 018, 000 2, 804, 000		\$50,000	530,000 220,000 145,000 40,000 60,000 80,000 62,500 1,462,500 1,718,000 2,504,000
January	2, 479, 000 8, 016, 000	100, 000 265, 000 1, 000, 000	870, 000 1, 520, 000	
Total for hine months	1, 275, 000 11, 073, 500	1,000,000	1, 570, 000	275, 0 <b>00</b> 7, 968, 50 <b>0</b>

The total transfers during eleven months ending September 30, 1887, amounted to \$1,782,500, an average of \$171,127 per month, while during the next four months the transfers amounted to \$8,016,000, an average of over \$2,000,000 a month, which four months embrace the period in which the Government funds in national-bank depositaries were being increased, for no new depositaries were designated and no increase of deposits was made after January. During the nine months since January last the transfers amount to only \$1,275,000, of which a million dollars represents merely an exchange or cross transfer between the two accounts, and should not, therefore, be considered at all in this connection.

The effect upon circulation is shown by the fourth column of the table, i. e., during the first eleven months of the period the amount of bonds withdrawn from circulation account without being replaced was \$1,462,500; during the next four months this amount was \$6,231,000, while during the remaining nine months it was only \$275,000, viz: \$75,000 in February and \$200,000 in August, 1888.

### BOND PURCHASES BY THE TREASURY.

As has been shown, there was almost a cessation in bond withdrawals from security for circulation as soon as the designation of new depositaries was discontinued.

On April 17 a circular was issued inviting proposals for the sale of bonds to the Government, which resulted in purchases as follows:

Month.	4 per cent. bonds.	4½ per cent. bonds.	Total.
April May June July August September October Total	5, 094, 900 444, 550 4, 373, 050 15, 800, 250	\$2, 490, 000 5, 027, 450 820, 100 564, 700 1, 628, 000 7, 674, 350 15, 038, 000 33, 242, 600	\$3, 565, 000 17, 139, 650 5, 915, 000 1, 009, 250 6, 001, 050 23, 474, 600 26, 540, 700 83, 645, 250

The subjoined table shows the bond withdrawals from circulation account during the year ending October 31, 1888, divided into two periods of six months each, namely, from November 1, 1887, to April 30, 1888, and from the latter date to October 31, 1888.

STATEMENT SHOWING TOTAL WITHDRAWAL OF BONDS HELD AS SECURITY FOR NATIONAL-BANK CIRCULATION BETWEEN OCTOBER 31, 1887, AND OCTOBER 31, 1888, IN PERIODS OF SIX MONTHS EACH, AND THE REDUCTION OF CIRCULATION CONSEQUENT THEREON.

Period.	Bonds withdrawn.	Circulation reduced.
From October 31, 1887, to April 30, 1888	\$8, 672, 500 13, 470, 372	\$7, 805, 250 12, 123, 335
Total	22, 142, 872	19, 928, 585

During the first period the withdrawals amounted to \$8,672,500, rom which should be deducted the withdrawals for transfer directly to public moneys security account, as shown in a previous table, viz, \$5,731,000, which leaves a balance of \$2,941,500 withdrawn otherwise.

During the second period the total withdrawals were \$13,470,372, and of this amount, the bonds withdrawn for delivery directly to the Secretary for purchase amounted to \$5,066,950, as is shown by the following statement:

Bonds withdrawn from Deposit against Circulation and Transferred, to the Secretary of the Treasury for Purchase under Treasury Circular of April 17, 1888, showing amounts of each class of Bonds and the effect of such Withdrawals upon Circulation.

	. 1	Withdrawi	ı. ·		Subst	ituted.		Total with-
Date.	4 per cent.	4½ per cent.	Total.	4 per cent.	4½ per cent.	P. R. R. 6 per cent.	Total,	deposit of lawful money.
•	\$637, 500 180, 000 299, 500 90, 000 992, 500 1, 877, 650 4, 077, 150	\$196, 000 210, 000 171, 000 75, 000 65, 000 748, 800 1, 465, 800	\$833, 500 390, 000 470, 500 165, 000 1, 057, 500 2, 626, 450 5, 542, 950	\$16, 000 390, 000 406, 000	\$20, 000	\$50,000	\$16, 000 20, 000 50, 000 390, 000 476, 000	\$817, 500 370, 000 470, 500 165, 000 1, 007, 500 2, 236, 450 5, 066, 950

Note.—Total of bonds withdrawn, \$5,542,950; total of bonds deposited in substitution, \$476,000; net withdrawal of bonds, \$5,066,950; which is made up of reductions in bonds deposited as follows: 4 percents, \$3,671,150; 4½ percents, \$1,445,800, and an increase of 6 per cent. bonds of \$50,000.

It is not as easy to trace bonds withdrawn for sale as to follow those transferred from one account to another in the Treasury, hence the records of this office do not show the displacement of circulation by bond-purchases quite as fully as they show the displacement by Government deposits, but there can be little doubt that the absorption of so large an amount of bonds in so short a time must have produced a strong influence tending to the reduction of the voluntary circulation of banks, and in the absence of any other known influence of the same tendency this must be considered as accounting for the pressure to withdraw bonds which has for three months in succession carried the deposits of lawful money up to the limit of \$3,000,000 imposed by section 9, act July 12, 1882.

In some cases banks have withdrawn their bonds and sold them on the general market, but in time these bonds, or others which they replaced, have come into the Treasury purchases. The influence of high prices for bonds in reducing voluntary circulation is more a matter of inference than of demonstration, but the following table of prices of bonds during the year will be of interest in this connection:

OPENING, HIGHEST, AND LOWEST PRICES OF UNITED STATES REGISTERED 4 PER CENT. AND 4½ PER CENT. BONDS IN NEW YORK FOR EACH WEEK FROM NOVEMBER 4, 1887, TO NOVEMBER 2, 1888.

The quotations given in the above table are not higher than some quotations in previous years, but as the bonds approach maturity their investment value declines, and this is to be considered in comparing present prices with those prevailing at past periods of time.

### The following table will serve to illustrate this:

Comparative Investment-Value of United States Bonds, as Determined by Monthly Averages taken at Intervals of Three Months during the Years 1885, 1886, 1887, and 1888.

[Compiled from the records of the office of the Actuary of the Treasury.]

### INCREASE AND REDUCTION OF CAPITAL BY NATIONAL BANKS.

The laws relating to changes in the capital stock of national banks nave undergone several modifications, and still need amendment in important particulars as pointed out in Annual Report for 1887. The changes recommended are embodied in the draught of a national bank code submitted with that report. The latest enactment on the subject is the act of May 1, 1886, and the tables which follow are designed to show the changes which have occurred since that date.

Table Showing Number of Banks Increasing Capital under the Act of May 1, 1886, showing Changes in each State during each year since the passage of the act, Amount of Increase and Percentage of Increase in Proportion to Capital.

# CONVERTED AND ORIGINAL BANKS.

National banks are of two classes, viz, institutions already organized under State laws, converted to national banks under section 5154, Revised Statutes of the United States, and national banking associations primarily organized as such under various acts of Congress.

The following tables show the history of these two classes:

WHOLE NUMBER OF STATE BANKS CONVERTED TO NATIONAL BANKING ASSOCIATIONS, THEIR CAPITAL AT DATE OF CONVERSION, PRESENT CAPITAL AND SURPLUS, SPECIFYING SUCH AS HAVE SINCE GONE INTO VOLUNTARY LIQUIDATION, AND SUCH AS HAVE BECOME INSOLVENT.

# EXTENSION OF THE CORPORATE EXISTENCE OF NATIONAL BANKS.

During the past year seven associations have availed themselves of the provision made by the act of July 12, 1882, for the extension of the corporate existence of national banks. Annexed is a table brought down to October 31, 1888, showing the capital of these extended banks and their geographical distribution.

Table Showing, by States, the Number and Capital of National Banks, the Corporate Existence of which was Extended prior to November 1, 1888.

Total number in operation October 31, 1888	3, 151		306		1,740		1, 10

^{*} Twenty-four banks were in this category, but one was restored to solvency and resumed business.

From the foregoing table it will be found that all of the banks organized under the national currency act of 1863 have either ceased to exist or have had their corporate existence extended, while of those organized prior to July 12, 1882, under the national bank act of 1864, 1,740 are still in operation under their original certificates of organization.

The following table shows how many of these banks will reach the expiration of their corporate existence during each year from 1889 to 1902, inclusive, with their capital and circulation:

Years.	No. of banks.	Çapital.	Circula- tion.	Years.	No. of banks.	Capital.	Circula- tion.
1889	61 97 100	\$600, 000 9, 560, 500 12, 358, 900 13, 815, 100 4, 701, 000 7, 628, 000 11, 259, 000 2, 173, 800	\$184, 500 364, 000 4, 040, 685 4, 562, 760 1, 982, 925 2, 812, 720 4, 431, 610 2 986, 650	1897	24 25 39 50 108 132	\$3, 419, 000 2, 679, 000 4, 995, 000 7, 807, 100 14, 669, 150 21, 177, 300	\$1, 171, 295 1, 198, 350 2, 270, 700 2, 153, 330 3, 702, 350 5, 352, 350

The number, capital, and circulation of the national banks of which the periods of succession terminated between October 31, 1887, and October 31, 1888, are shown by the following table, which also indicates the number of which the corporate existence has been extended:

Date.	No. of banks that have expired.	Capital.	Circulation.	No. of banks that have extended.	Capital.	Circulation.
1887. November	1	\$250,000	\$45,000	. 1	\$250, 000	\$45, 00 <b>0</b>
January January March May	$\begin{array}{c}1\\2\\1\\1\end{array}$	100, 000 200, 000 100, 000 75, 000	22, 500 67, 500 22, 500 18, 000	Liquidation.	100, 000 100, 000 75, 000	22, 500 22, 500 18, 000
June. August September. October.	1 1 1 1	100, 000 125, 000 50, 000 50, 000	22, 500 28, 800 45, 000 11, 250	Failed	125, 000 50, 000 50, 000	28, 800 45, 000 11, 250
Total	10	1, 050, 000	283, 050	7	750, 000	193, 050

The corporate existence of one national bank, with a capital of \$50,000, will expire in November of this year, and that of three national banks, with an aggregate capital of \$600,000, will expire during the year 1889, as shown in the following table:

NATIONAL BANKS OF WHICH THE CORPORATE EXISTENCE WILL EXPIRE DURING THE YEAR 1889, WITH THE DATE OF THE EXPIRATION, THE AMOUNT OF CAPITAL STOCK OF EACH BANK, THE UNITED STATES BONDS ON DEPOSIT WITH THE TREASURER, AND THE AMOUNT OF CIRCULATION ISSUED THEREON.

Charter number.	Title of bank.	State.	Expiration of corporate existence.	Capital stock.	U. S. bonds.	Circula- tion.
1689	The Ohio National Bank of Cleveland	Ohio	Jan. 1, 1889	\$400,000	\$56, 00C	\$50, 400
1692	The First National Bank of Murfreesborough The National Bank of Leb-	Tennessee.	Feb. 27, 1889	100, 000	100, 000	90, 000
1694	anon anon	Kentucky.	April 7, 1889	100,000	50, 000	45, 000

### SHAREHOLDERS IN BANKS.

The table subjoined hereto exhibits the distribution of national-bank stock as reported by the banks on the first Monday in July, 1888.

Note.—The difference in the amount of capital stock, as shown by this table and by the reports of condition on October 4, is accounted for by the fact that twenty-two banks were organized during the three months just preceding that date, and other banks increased their capital stock.

### DISSOLUTION.

The total number of national banks organized since February 25, 1863, is 3,937, of which there are now in operation, as shown elsewhere, 3,151; passed out of the system 786, accounted for thus:

Passed into voluntary liquidation to wind up their affairs	512 9
	503
Passed into liquidation for purpose of reorganization	79° *77° 128
Less restored to solvency and resumed business	787 1
Total passed out of system	786-

^{*} Thirty-eight of these have been reorganized.

The corporate existence of ten national banks expired during the year ending October 31, 1888; of these, seven obtained an extension in accordance with the provisions of the act of July 12, 1882, two suffered dissolution, and one failed.

### FAILED BANKS.

Eight national banks, with an aggregate capital of \$1,900,000, failed and were placed in the hands of receivers during the year, as is shown in the following tabulated statement, to which is appended an account of the chief cause of failure in each case. In one case the creditors have been paid in full, principal and interest; in two others they have received 80 per cent., and in the remaining cases 40, 25, and 20 per cent., respectively, on account of the claims proved:

^{*} Total, as per report, except capital, surplus, circulation, undivided profits, and unpaid dividends. † Extended.

The Fifth National Bank of Saint Louis, Mo. closed its doors November 7, 1887, and on November 9 its cashier was arrested on a warrant charging fraud and falsification of entries, and placed under bond. The case has not yet been reached in the courts, and the cashier is still at

large.

The failure may be traced to the fact that the bank, originally a savings institution, was carrying, when it became a national bank, a considerable amount of doubtful and worthless paper, which was allowed to remain among the assets. Then the officers and some of the directors of the new organization were interested in various businesses carried on with the funds of the bank, and dependent wholly upon that support. The general administration was weak and in some respects vicious. Overdrafts were permitted in large amounts, and bad accounts were disguised by passing fictitious drafts through the bank. The statutes were violated with respect to overloans, false entries were made upon the books to deceive the national-bank examiner and the Comptroller, and these were concealed by the use of notes in several names for money borrowed by one and the same party.

The directors claimed to be unaware of these transactions, and sought to excuse themselves by saying that the bank was managed wholly by the president and cashier to whom alone the facts were known, and on

whose statement the directors relied.

In December, 1886, at a meeting of the shareholders it had been resolved to increase the capital stock from \$300,000 to \$500,000, and subsequent publication was made in the Saint Louis newspapers that the stock of the bank was \$500,000.

After the failure it transpired that the paymet on account of the new shares amounted to only a little over \$126,000, and the subscribers to the increased capital now insist upon being treated as depositors to the extent of the amount paid in on the subscriptions. The receiver claims that these subscriptions are binding, and the question is now pending in the courts.

As preliminary to an action against the directors of the bank to establish their individual liability under the provisions of section 5239, Revised Statutes, proceedings were taken by the Comptroller for the forfeiture of all the rights, privileges, and franchises of the association, and in April last the United States circuit court adjudged the forfeiture.

A dividend of 50 per cent, was paid to the creditors about three months after date of failure, and, as will be seen elsewhere, 30 per cent, more has been paid since, making 80 per cent, within the first twelve

months of the receivership.

The First National Bank of Auburn, N. Y., closed its doors on the morning of January 23, the cashier and one of the book-keepers having previously absconded to Canada, taking with them a considerable amount of money belonging to the bank. The association was found to be hopelessly insolvent; past-due paper in large amounts had been accumulating for some years, and leaves which had been cut out of the ledgers and hidden, showed when discovered, that overdrafts had been carried to an amount greatly exceeding the capital stock of the bank. The records had been negligently kept, and in many cases entries were altered and false entries were made, so that the ascertainment of the condition of the association has been slow and difficult, while transactions to considerable amounts are still involved in obscurity. In one case, however, funds of the bank have been traced into a local "bucket shop." The bank was sustaining outside business firms with large loans and overdrafts, having little or no security.

The case of this bank furnishes still another instance of an officer enjoying unlimited confidence, mismanaging its affairs, squandering its resources, and finally stealing its cash under the eyes of directors and stockholders. It also adds another to the numerous illustrations of the temptation to dishonesty which is the direct effect of the facility of escape to Canada and the immunity from extradition enjoyed by such fugitives.

A dividend of 25 per cent. has been paid during the year, but there

seems little doubt that the loss to depositors will be heavy.

The Metropolitan National Bank of Cincinnati was reported by the national bank examiner, in January, as being in a perilously weak condition. The officers and directors were large borrowers, and the management of the bank was found to be inefficient and unbusinesslike. Irregular means had been resorted to in order to cover up large loans, and evidences of the publication of false reports and of violations of the provisions of section 5209 of the Revised Statutes were discovered.

The examination showed, however, that the assets were undoubtedly sufficient to pay creditors in full, and the examiner united with the directors in an effort to tide over the exigency. Considerable collections were made from the directors and large stockholders who were debtors to the bank, and from those who were unable to pay, the examiner succeeded in obtaining available securities to a considerable amount. The directors on their part fortified their cash resources by obtaining loans from other banks, and for a time there seemed to be a fair prospect that the bank could be saved from suspension. It proved impracticable, however, to make headway against the growing distrust among depositors, and the board of directors resolved, on February 6, to close the doors. A receiver was appointed, and the president and vice president are now under indictment.

Every effort was made by the receiver to expedite the liquidation, and there was no litigation of any consequence, so that within six weeks from the date of failure the creditors were paid in full, principal and interest, and assets to the nominal value of upward of \$1,300,000 were turned over to the agent of the stockholders in accordance with the

provisions of the act approved June 30, 1876.

The Commercial National Bank of Dubuque, Iowa, failed March 20. The bank was wrecked by the diversion of funds to sustain outside business interests of the president and those of his immediate family connections. An amount not less than four times the capital stock of the bank was borrowed by members of the family and persons connected with them in support of enterprises which depended upon the bank for their existence, and the immediate cause of failure was the inability of these borrowers to liquidate their indebtedness.

The violation of the statute, which the excessive and illegal loans involved, was concealed by making use of the names of irresponsible persons, and the security upon which the directors affected to rely has

proved to be insufficient or worthless.

Dividends amounting to 40 per cent. have been paid, and an assessment to the full extent authorized by law has been levied upon the stockholders.

The State National Bank of Raleigh, N. C., closed its doors March 27, the president and cashier having absconded to Canada, taking with them about \$25,060. An examination disclosed the fact that the bank had been completely weeked, and that preparations for defalcation had been in progress for a long time.

The rogues in this instance had resorted even to forgery, and thereby became amenable to extradition. So swift was the pursuit and arrest that most of the stolen money was found still concealed in the clothing of the prisoners and in the original packages.

The offense being one against the State statutes, subsequent proceedings are beyond the official cognizance of the Comptroller of the

Currency.

The history of this association is instructive.

A private banker in Raleigh organized the bank, took shares for the assets he turned over to it, and upon the credit thus created he obtained deposits enough to carry on business. His assets, taken as capital, were really worth very little, if anything. His management of the bank was no better than that of his private business. He went on making bad debts and unprofitable investments, and when he died, in 1883, his successors continued to do likewise. His estate and family owned most of the stock, and were also debtors to nearly the par value of their shares. His wife assumed the presidency of the bank, and her brother, the cashier, succeeded to the actual management. Always weak he rapidly became dishonest, and finally ended his career by entering into collusion with the new president, a son in law of the deceased founder of the bank, to seize all the plunder they could and decamp.

A dividend of 20 per cent. was declared and distributed June 8.

The Second National Bank of Xenia, Ohio, closed its doors May 2, having been reduced to insolvency by the negligence of the directors and the incompetency of its officers. The cashier was utterly unfit for his position, and nobody else looked after matters. Bad debts and large overdrafts were allowed to accumulate, and the bank's funds were locked up in all sorts of investments that should never have been even entertained.

The directors, active business men, supposed to be in good financial condition, were large borrowers, and allowed their over-due obligations

to lie unpaid.

The receiver has collected about \$190,000 from the assets, and the directors have contributed \$42,000 more in order to facilitate a speedy liquidation. There has been but little litigation attending the administration of this trust.

Dividends amounting to 80 per cent. have been paid since the failure. The Madison National Bank of Madison, Dak., was organized in December, 1886, having been converted from a State bank. The officers, directors, and stockholders were composed of the president, cashier, their wives, and one other person, the first two holding 470 of the 500 shares into which the capital stock was divided. From the first the management of the bank was so conducted as to call for repeated notices from the Comptroller to the directors to correct irregularities, such as shortage in reserve, dealings with a mortgage and investment company, of which the president and cashier were trustees, excessive loans, overdue paper, etc. Plausible explanations were made by the directors, who alleged inexperience in national bank methods and misunderstanding of the law. They professed both the intention and the desire to do right, and repeatedly made statements which appeared to show amendment of administration. In May last, however, transactions were discovered which were not only in violation of the national bank law, but which also involved criminal misconduct of the officers.

The case was so obviously one of premeditated plunder that the examiner was directed to act in concert with the district attorney; and accordingly on a day agreed upon these officers met at Madison, the

examiner took charge of the bank, and the president and cashier were arrested.

A receiver was duly appointed, and every effort has been made by attachment and otherwise to save something for the creditors, but these efforts have not received the local support necessary to their success. The accused officers readily obtained bail, and seem to have access to sufficient means to thwart and embarrass the receiver.

After the alleged capital of the bank had been withdrawn in loans to the officers, and its deposits had been absorbed by these officers through the transfer of worthless paper, they set about selling their stock, offering it generally at distant points, and succeeded in making considerable sales, mostly in New England.

The Lowell National Bank of Lowell, Mich., failed September 11, principally on account of the bad management of its president, who seemed to have been uncontrolled by the directors.

Among the nominal assets the receiver has found a large amount of worthless paper, most of it connected with a manufacturing company which was obviously insolvent during the whole time that it was absorbing the resources of the bank. The methods resorted to by the officers of this company with the connivance of the bank were simply scandalous.

Besides the losses incurred in this way the bank's valid resources had become gradually locked up in unproductive real estate and in other inconvertible investments.

As stated in the last Report indictments were found against several persons connected with the Fidelity National Bank of Cincinnati, Ohio, and suits were brought against the directors implicated in violations of law. These suits have not yet been decided.

Upon trial, the vice president and assistant cashier were found guilty, and sentenced to serve a term in the penitentiary, the former for ten

years. The cashier died before the trials came up.

A table, appendix, p. 172, has been prepared with great care and minute particularity, showing under appropriate heads all collections made from the assets of each of the 128 national banks which have become insolvent, how and for what purpose disbursements were made, and accounting for all moneys and every asset of whatever description which passed through the hands of the receiver or the Comptroller. The labor involved in the preparation of this table has been very great, but as the accounts of receivers are now kept upon the principle applied in the table, and their quarterly reports conform to the same arrangement, there will be no difficulty hereafter in carrying forward the results from year to year.

^{*} Exclusive of banks in voluntary liquidation.

Out of 3,937 national banks organized since February, 1863, only 128, or about 3½ per cent., have been placed in the hands of receivers; this includes 9 which had been previously placed in liquidation by their stockholders, but upon their failing to pay their depositors the Comptroller appointed receivers to wind up their affairs. Out of the above total of 128 failed banks, 45 have paid their creditors in full, while 33 have besides paid interest, 27 in full and 6 in part. The affairs of 90 banks of the 128 have been finally closed, leaving 38 in process of settlement, of which, as has been seen, 8 are virtually closed, with the exception of pending litigation, leaving 30 receiverships only in active operation.

The total amount so far paid to creditors of insolvent national banks has been \$33,027,451 upon proved claims amounting to \$51,924,977. The amount paid during the year has been \$3,523,955.82, besides \$68,510 paid for dividends declared prior to November 1, 1887, on claims proved since that date. Assessments amounting to \$12,555,350 have been made upon stockholders of insolvent national banks under section 5151 of the Revised Statutes of the United States. From this source the gross collections amount to \$5,346,171, of which there has been received during the past year \$308,591. Suits are pending in some cases.

Each year's experience confirms the opinion that it would be wise to so amend the laws as to allow banks to commute the liability of their

shareholders into a special reserve fund, as recommended in the Re-

ports of 1886 and 1887.

Upon a general view of the data relating to insolvent national banks, it appears that while the number of failed banks is about  $3\frac{1}{4}$  per cent. of the total number of banks organized, the percentages of their capital and other liabilities, taken at time of failure, are less.

To make the comparison complete, however, there should be added to the capital, surplus, and undivided profits, as given for the year 1888, viz, \$883,964,263, the capital, surplus, and undivided profits of all banks that have gone into voluntary liquidation, and of all that have been wound up at the end of their corporate existence, because in these cases shareholders have recovered all they put in and kept in. The amount is \$125,894,506, and with the aggregate in the table makes \$1,009,858,769, for which the system has been accountable to its pro-Against this vast sum should then be set the capital, surplus, and undivided profits of failed banks, viz, \$28,387,616, increased by amounts collected by assessment from shareholders, \$5,346,171, diminished by the amount, as nearly as can be ascertained, repaid to shareholders out of assets, viz, \$3,535,545. The net loss will then be seen to be only \$30,198,242, which is not quite 3 per cent. of total investments. Against this loss a superabundant offset is afforded by the dividends paid out of profits amounting in many cases to very large percentages.

Again, from the total "other liabilities" of failed banks, viz. \$63,945,321, should be deducted, amount of circulation \$15,432,360, and total dividends paid to creditors \$33,027,451, aggregate \$48,459,811, net loss \$15,485,510, which is 0.83 per cent. upon the \$1,872,417,724

of such liabilities resting upon the system at large.

The affairs of five failed banks have been closed during the past year, and final dividends have been paid to their creditors. These banks, with the total dividends paid in each case, are given below:

Name and location of bank.	Date of appointment of receiver.	Total dividends on principal.

### INACTIVE RECEIVERSHIPS.

These were fully described in the last Annual Report.

The following table shows the receiverships that are now in this condition:

Name and location of bank.	Date of appointment of receiver.	Dividends paid.
First National Bank, Albion, N. Y First National Bank, Anderson, Ind Third National Bank, Chicago, Ill Central National Bank, Chicago, Ill People's National Bank, Helena, Mont Hot Springs National Bank, Hot Springs, Ark First National Bank of Union Mills, Union City, Pa German-American National Bank, Washington, D. C	Aug. 26, 1884 Nov. 23, 1873 Nov. 24, 1877 Dec. 1, 1877 Sept. 13, 1878 June 2, 1884 Mar. 24, 1883	39 *100 60 40 100

*And interest.

During the past year the following trusts have passed into this cate gory, viz, the First National Bank of Albion, N. Y., and the Hot Springs

National Bank of Hot Springs, Ark.

By reference to the Report of 1887 it will be seen that the National Bank of the State of Missouri, Saint Louis, has disappeared from the inactive receiverships. At the date of that report the receivership had not terminated because of the failure of the agent elected by the shareholders in June, 1887, to qualify by giving the bond required by law. During the present year the receivership was closed, and cash assets were turned over to the agent amounting to \$26,720, and nominal assets amounting to \$36,957. Among the nominal assets was real property which has enormously increased in value, and it is not unlikely that enough may be realized by the agent to reimburse the shareholders for the amount paid under assessment upon stock.

The First National Bank of Albion, N. Y., which was wrecked by its president, who squandered the funds of the bank in speculation, has been placed on the inactive list. The assets of the bank were almost entirely worthless, and a sufficient sum has not been realized to pay a

dividend.

An assessment of 100 per cent. was levied upon the stock, nearly all of which was owned by an estate, and a judgment obtained by the receiver, but the demand of the trust was met by counter claims of the

estate, which have not yet been judicially determined.

The receiver brought suit against the brokers through whom the president carried on his speculations, and, as will be seen by reference to page 89, obtained judgment for a considerable sum, but the defendants have appealed.

### CIRCULATING NOTES.

Under present laws the minimum deposit of bonds required to be made by the 3,140 national banks in operation in the United States on

October 4, 1888, amounts to \$91,988,805.

A table in the appendix, p. 149, shows by States and geographical divisions the national banks in operation on October 4, 1888, separated into two classes, namely, banks of which the capital does not exceed \$150,000 and banks of which the capital exceeds \$150,000. The first class contains 2,229 banks, with an aggregate capital of \$185,551,921;

the second, 911 banks, with an aggregate capital of \$407,069,735. The minimum of bonds required to be kept on deposit by the entire body of banks in the first class is \$46,387,980; the minimum for the 911 banks of the second class is \$45,550,000. If all banks held only the minimum of bonds, the total national bank circulation could not exceed \$82,744,025, while the possible maximum of circulation, namely, 90 per cent. of the aggregate of the national bank capital, would be \$533,359,491.

The actual circulation on October 4, 1888, was \$151,700,809, which is exclusive of \$88,521,813 still outstanding, but which, having been surrendered by the banks that issued it, is no longer represented by bonds, but by that amount of lawful money deposited with the Treasurer of

the United States to redeem the notes as they are presented.

The \$151,700,809 of circulation for which the banks are responsible consists of \$68,410,823 secured by the bonds deposited by the 2,229 banks having \$150,000 capital and less, and \$83,289,986, secured by the bonds belonging to the 911 banks of which the capital exceeds \$150,000. The first class of banks have, therefore, \$26,661,641 more than their minimum, and \$98,585,906 less than their possible maximum circulation, while the larger banks have \$42,294,986 more than their minimum and \$283,072,776 less than their maximum.

The following table shows the number of banks organized from July 1, 1882, to July 1, 1888, their capital stock, amount of bonds deposited,

and the circulation issued thereon:

Year.	No. Capital.	Minimum bonds required.	Bonds actually deposited.	Percent. of excess	Circulation issued.
July 1, 1882, to July 1, 1883	251 \$26, 552, 300	\$5, 155, 500	\$7, 116, 400	28	\$6, 404, 760
July 1, 1883, to July 1, 1884	218 19, 944, 000	4, 016, 000	4, 676, 100	14	4, 208, 490
July 1, 1884, to July 1, 1885	142 15, 205, 000	3, 061, 250	3, 332, 800	8	2, 999, 520
July 1, 1885, to July 1, 1886	163 17, 553, 000	3, 404, 500	3, 715, 500	8	3, 343, 950
July 1, 1886, to July 1, 1887	217 31, 444, 000	4, 986, 000	5, 051, 300	1	4, 546, 170
July 1, 1887, to July 1, 1888	164 16, 734, 000	3, 308, 500	3, 324, 750	0.5	2, 992, 275

From the foregoing table it appears that 1,155 banks have been organized between the dates given, with a capital of \$127,432,300; that they have received circulation to the amount of \$24,495,165 on bonds deposited to the amount of \$27,216,850, and that the minimum deposit of bonds required by law for these banks is \$23,931,750.

The actual deposit of bonds during the whole period exceeds the minimum by about 12 per cent. only, and taken year by year the percentage of excess has decreased from 28 per cent. in 1882-183 to one-

half of 1 per cent. in 1887–'88.

Of the 164 national banks organized during the past fiscal year, 93 have a capital of \$50,000 each, amounting to \$4,650,000; 55 have a capital of over \$50,000 and not exceeding \$150,000, amounting to \$5,384,000; and 16 have a capital of \$6,700,000. The 16 largest banks deposited the exact amount of bonds required by law, with one exception, and out of 148 banks, of which the capital does not exceed \$150,000, only 4 have deposited bonds in excess of the requirement.

Tables will be found in the Appendix,* p. 147, etc., showing, for the national banks in each State, Territory, and reserve city, the minimum amount of bonds required by law, the bonds actually held, and the circulation thereon outstanding October 4, 1888; also all other informa-

tion deemed useful as to circulation.

^{*}This Appendix, which is omitted for want of space, will be found in the bound volume of the Comptroller's report.

INTEREST-BEARING FUNDED DEBT OF THE UNITED STATES, AND THE AMOUNT HELD BY NATIONAL BANKS.

The connection between the banks and the distribution of the funded debt of the United States renders the following statement appropriate:

The public debt at its maximum, on August 31, 1865, amounted to \$2,844,649,626, of which obligations not bearing interest amounted to \$461,616,311, leaving interest bearing debt \$2,383,033,315. On October 31, 1888, the interest bearing debt amounted to \$958,123,282.

The following table shows the class of bonds, authorizing act, date

of maturity, rate of interest, and intermediate changes:

### BONDED DEBT AT DATES NAMED.

*Funded loan 1891; authorizing act, July 14, 1870, and January 20, 1871; date of maturity, 1891. †Funded loan 1907; authorizing act, July 14, 1870, and January 20, 1871; date of maturity, 1907. †Pacific railroad bonds; authorizing act, July 1, 1862, and July 2, 1864; date of maturity, 1895 to 1899. The Navy pension fund, amounting to \$14.000,000 in 3 percents, the interest upon which is applied to the payment of naval pensions exclusively, and \$129,620 of refunding certificates are not included in the table.

During the year ending October 31, 1883, \$50,412,650 of 4 percents and \$33,242,600 of 4½ percents were purchased for sinking fund purposes, making a total of \$83,655,250. Of this amount \$4,077,150 of 4 percents and \$1,465,800 of 4½ percents were withdrawn by the national banks from deposit to secure circulation, making total withdrawals from this cause \$5,542,950, while the replacement by deposits of 4 percents amounted to only \$406,000.

Changes in the debt have induced corresponding changes in the bonds held by the national banks. In January, 1866, 1,582 banks, with capital, surplus, and undivided profits of \$475,330,204, held \$440,380,350 of United States bonds. On October 4, 1888, 3,140 banks, with capital, surplus, and undivided profits of \$855,576,646, held only \$232,582,250 of bonds. The total bank circulation on January 1, 1866, was \$213,239,530, and on October 4, 1888, that which was secured by bonds was \$151,702,809.

The amount and classes of United States bonds owned by the banks, including those pledged as security for circulation and for public deposits, on June 30 in each year since 1865 are exhibited in the following table:

	Unite	d States bonds	held as securi	ty for circula	tion.	United States

#### SECURITY FOR CIRCULATING NOTES.

The following table shows the amount of bonds held by the Treasurer as security for the circulating notes of the national banks on October 31 of each year from 1882 to 1888, inclusive, the amount held by the banks for all other purposes, and the total of these two:

	<b>3</b> T	United	States bonds	s held as secu	rity for cir	culation.	United States

^{*} Three and one-half per cent.

The foregoing tables show how the banks have shifted their investments from one class of bonds to another, and the following table exhibits especially the steady decrease in the amount of bonds held for circulation.

It is worthy of note in this connection that the recent increase in bonds held otherwise than as security for circulation is directly attributable to the requirement of these as security for deposits of public money. It is matter of general knowledge that a considerable percentage of bonds deposited as security for public moneys are not owned by the banks making the deposit, but that they have been borrowed for the purpose.

Table Showing the Decrease of National-Bank Circulation during Each of the Years Ending October 31, from 1884 to 1888, Inclusive, and the Amount of Lawful Money on Deposit at the End of Each Year.

		<del></del>

The following table extended from the last Report shows the diminishing scale on which banks organized during each of the past six years have availed themselves of the privilege of issuing circulation upon bonds in excess of the minimum which the law obliges them to keep on hand.

For the sake of conciseness in the table the circulation is omitted, but as every bank has received circulation to the amount of 90 per cent. of the bonds deposited, the proportions of the table reflect faithfully the features of the circulation.

Number and Capital of National Banks Organized in each geographical division of the United States from October 31, 1882, to October 31, 1888, showing the amount of bonds deposited to secure their circulation, the minimum amount of bonds required by the act of July 12, 1882, and the excess deposited over requirements both in amount and percentage.

The following table exhibits in detail the changes which have occurred during the past year in the amount of national-bank circulation, so arranged as to illustrate the process by which the circulation steadily decreases concurrently with the accession of new banks and an increase in the aggregate national-bank capital:

CAPITAL AND CIRCULATION.

Notes of gold banks are not included in this table.

Distinct accounts are kept for the incomplete currency issued to banks in replacement of notes redeemed and destroyed under the provisions of the act of June 20, 1874, to banks taking out new circulation upon an extension of their corporate existence under the act of July 12, 1882, and to old and new banks increasing the volume of their circulation by adding to the amount of bonds deposited.

Table Showing by States the Amount of "Additional Circulation" Issued and Retired during the year ending October 31, 1888, and total Amount Issued and Retired since June 20, 1874.

Balance in vaults	44, 169, 170

REDEMPTION.

The provisions of law relating to the redemption of the circulating notes of national banks were fully described in the Report of 1887, and need not be here repeated. Two principles have been adhered to in all legislation on this subject.

These are, first, that every bank must redeem on demand at its place of business any of its circulating notes presented there for redemption during business hours; and, second, that the medium of redemption

must be "lawful money of the United States."

The act of June 3, 1864, established redemption cities, but the act of June 20, 1874, establishing the National-Bank Redemption Agency of the Treasury at Washington, repealed all requirements as to redemption agents elsewhere, and obliged every bank to keep up a redemption fund in the hands of the Treasurer of the United States equal to 5 per cent. of its outstanding circulation.

The following table, compiled from the Treasurer's reports, shows the practical working of the law as to the 5 per cent. redemption fund:

Table showing Mode of Reimbursement of Five Per Cent. Redemption Fund by National Banks, by Fiscal Years, from 1875 to 1888, inclusive.

The following tables, compiled from the Treasurer's reports, show, for the fiscal years 1874-75 to 1887-88:

1. The amounts of national-bank currency received annually at the Redemption Agency, and the disposition made of it.

2. The points from which this currency was forwarded and the percentage of the whole received from each point.

3. The total amount of notes redeemed, and the mode of redemption.

4. The cost of redemption.

Table showing Receipts and Deliveries of Moneys by the National-Bank Redemption Agency (United States Treasurer's Office) for each Fiscal Year from 1875 to 1888, inclusive.

						-	
Year ending June 30—	Cash balance on hand at close of previous year.	To national-bank notes received for redemption.	To "overs" reported in national-bank notes received for redemption.	Aggregates.	By national-bank notes fit for circulation, de- posited in the Treasury, and forwarded to na- tional banks by express.	By national bank notes, unfit for cir- culation, delivered to the Comptroller of the Currency.	By notes of failed and liquidating national banks, de- posited in United States Treasury.

REDEMPTION OF CIRCULATION OF BANKS IN THE HANDS OF RECEIVERS, OF THOSE IN VOLUNTARY LIQUIDATION, AND OF THOSE REDUCING CIRCULATION UNDER THE ACT OF JUNE 20, 1874

The redemption of circulating notes of failed banks at the United States Treasury was provided for originally as it is now, by giving the Comptroller power to cancel or to sell the bonds of the banks, and in case of deficiency in the proceeds to make it good out of the assets of the corporation; but before the act of 1874 went into effect the notes of such banks were called in by public advertisement, whereas now they are left in circulation until they are brought by the ordinary currents of redemption into the office of the Treasurer or of one of the assistant treasurers, or into the hands of a designated depositary of public moneys, or one of the national bank depositaries.

Section 8 of the act of June 20, 1874, requires the Treasurer, assistant treasurers, designated depositaries, and national bank depositaries to assort and return to the Treasurer for redemption the notes of such national banks as have failed, or have gone into voluntary liquidation, and of all such as shall thereafter fail or go into such liquidation.

The following table, compiled from the records of the Bureau of the Currency, shows the course of redemption of the notes of failed banks. Total circulation of all failed banks, \$15,432,360; amount redeemed, \$13,911,335; balance outstanding or lost, \$1,521,025.

Table showing, by Years, from October 1, 1865, to November 1, 1888, the [†]Total Circulation of Banks Failed, the Amount Redeemed, and the Balance Outstanding at close of each Year. (Compiled from Reports of Comptroller of the Currency.)

Before the act of June 20, 1874, banks reducing their circulation could withdraw their bonds from the Treasury only upon surrendering there, for cancellation, an amount of their circulating notes proportioned to the amount of bonds to be withdrawn, and up to July 14, 1870, banks

for one year after going into voluntary liquidation had to resort to the same means in order to withdraw their bonds; but after the expiration of the year such banks might deposit lawful money for the difference between the whole amount of circulation issued to them and the amount surrendered, and thereupon get back the rest of their bonds. The amount of such deposits and the time at which they should be made were left to the choice of the bank. The act of July 14, 1870, made the deposit of lawful money obligatory upon liquidating banks, and the act of June 20, 1874, fixed six months after notice of liquidation as the limit of time allowed for making such deposits.

The act of June 20, 1874, provided also that any national banking association might withdraw its circulating notes upon the deposit of lawful money with the Treasurer of the United States in sums of not less than \$9,000. Under this act, and on account of liquidating and insolvent banks, and under section 6 of the act of July 12, 1882, which provides for a deposit of lawful money to retire the old circulation of national banks whose corporate existence has been extended, \$409,664,244 of lawful money has been deposited with the Treasurer. This includes \$2,663,720 for redemption of the notes of national gold banks and \$96,958,887 for the redemption of national bank notes under

section 6 of the act of July 12, 1882.

During the year-ending October 31, 1888, lawful money to the amount of \$37,781,464 was deposited with the Treasurer to retire circulation, of which \$2,107,978 was deposited by banks in liquidation, \$14,520,956 by banks reducing circulation under the act of June 20, 1874, and \$21,152,530 by banks retiring old circulation under the act of July 12, 1882. The amount previously deposited under the acts of June 20, 1874, and July 12, 1882, was \$320,681,226, by banks in liquidation, \$65,446,364, making a total of \$423,909,054. Deducting from the total the amount of circulating notes redeemed and destroyed without reissue, which was \$336,890,145, there remained in the hands of the Treasurer on October 31, 1888, \$87,018,909 of lawful money for the redemption and retirement of national-bank circulation, including \$188,987 for the redemption of the circulating notes of national gold banks.

Prior to June 20, 1874, there were redeemed and destroyed \$10,431,135, and since that date \$326,459,009 of bank notes have been redeemed, destroyed, and retired. This latter amount includes \$2,474,733 of the notes of national gold banks, and \$50,226,314 of the notes of national banks whose corporate existence has been extended under the act of

July 12, 1882.

There are at present no national gold banks in existence. Of those which have been organized, three went into voluntary liquidation and the others became currency banks, under the provisions of the act approved February 14, 1880.

Under all the laws now in operation the Treasurer has received for redemption up to November 1, 1888, national bank notes aggregating

in amount \$1,899,039,275.

During the past year the receipts at the Treasury amounted to \$103,945,471, of which amount \$46,849,990, or 45 per cent., was received from the banks in the city of New York, and \$14,327,098, or 14 per cent., from banks in the city of Boston. The amount received from Philadelphia was \$6,259,673; from Chicago, \$5,694,050; from Cincinnati, \$2,337,754; from Saint Louis, \$2,501,100; from Baltimore, \$3,086,055; from New Orleans, \$1,444,067; from Providence, \$902,677, and from Pittsburgh, \$666,786.

The following table exhibits the amount of national-bank notes received monthly for redemption by the Comptroller of the Currency during the year ending October 31, 1888, and the amount received during the same period at the Redemption Agency of the Treasury, together with the total amount received since the passage of the act of June 20, 1874:

SUPERVISION.

Supervision over the national banks is maintained through a corps of examiners, but it embraces also the scrutiny of the five reports of condition required of every bank each year, and of the reports of earnings and dividends which are made twice a year by all banks, and oftener by those by which dividends are oftener declared.

The Comptroller may call upon any bank, at his discretion, for such special reports as he thinks proper, and an extensive correspondence is kept up with officers and directors in regard to matters contained in the examiners' reports and in the various reports received directly from

the banks.

Since directors are responsible in their individual capacity for all violations of law which they knowingly commit or permit (sec. 5239 R. S.), the rule has been adopted of addressing to the board of directors of each bank such correspondence with it as relates to violations of law, and when the matter is serious a separate note is sent to each director informing him of the letter addressed to the board.

Letters relating to the internal administration of the bank are ad-

dressed to its president, all others to the cashier.

From a review of the correspondence, as thus classified, it appears that the matters requiring most frequent attention are as follows:

VIOLATIONS OF LAW.

1. EXCESSIVE LOANS.

Section 5200, Revised Statutes, forbids loans to any person, firm, company, or corporation exceeding 10 per cent. upon the capital of the bank.

This restriction is too general in its terms, and is necessarily exceeded by banks in large cities, where the magnitude of deposits and of transactions make conformity with the law impracticable. On the other hand, it is a most salutary restraint upon banks in small communities, preventing the accommodation they afford from being monopolized by a few favored individuals, usually the directors and their friends or relations.

The enforcement of the law in these latter cases is, however, seriously impeded by the notorious disregard of it in the former, and I therefore earnestly repeat the recommendation made last year for new legislation on this subject.

2. Loans upon the security of real estate.

Section 5137, Revised Statutes, prohibits national banks from holding real estate by title or under mortgage, except in certain specified cases, and the courts have construed this as forbidding, also, loans upon the

security of real estate.

The language of the statute is not explicit, and it has been variously construed by different courts, nor has the restriction that popular support which is almost necessary to the official enforcement of any law. On the contrary, there is a widespread feeling that the national bank law discriminates against real estate unjustly, and in agricultural communities this feeling is so strong that in many cases it is resentful, and is made the ground of popular opposition to the whole national-bank system. Even among experienced and conservative bankers in certain

sections there appears to be a feeling that the restraint in this respect is unreasonable.

Among the amendments to the national bank law which were submitted with my last Annual Report will be found certain modifications of the provisions bearing upon real-estate security, and I respectfully repeat the recommendation for their speedy enactment.

3. Investments in bonds, stocks, and other securities.

The Supreme Court (First National Bank v. National Exchange Bank, 92 U. S., 122) has pronounced the dictum that a national banking association can not deal in stocks. Two State courts (Pennsylvania and Maryland) have decided that such associations are not authorized to act as brokers or agents in the purchase and sale of such securities.

Like other restrictions upon the national banks, this one, which in the main is wholesome and in most cases necessary, in view of the public uses to which the capital and resources of national banks are dedicated, has been found in some peculiar cases to be inconvenient. In some sections, especially in New England, the number of banks and the amount of floating capital are in excess of the business needs of the locality. The more active and enterprising among these banks secure the commercial paper, and the others have either to lend out their money at distant points, or invest it in securities. The latter is undoubtedly the safer, and therefore the better course, and the officers and directors who resort to it are naturally disposed to dispute any interpretation of the law which is adverse to such investments.

The more I learn about the banking business of the country, however, and in this position the opportunities for learning are incessant and excellent, the more satisfied I am that banks of deposit should never invest in anything but bills of exchange or short date commercial paper. If capitalists desire to combine for the purpose of holding securities, or dealing in stocks and bonds, they have abundant facilities for doing so outside of the national-bank system. There can be no 'question of the right of all citizens to invest their own means as they please, but the national banks, under the operation of the laws made for their government, have become the principal depositaries of the floating capital of the country, hence the managers of these banks are bound by duty to their depositors to regard strictly the limitations upon investments imposed by the law, and this obligation becomes strengthened when, as in this case, the law is in harmony with sound banking principles.

Those who are charged with the enforcement of the national-banking law can not be too persistent in keeping the system as clear as possible of every variety of what may be called incrustations of capital.

4. DEFICIENT RESERVE.

There has been a marked improvement all over the country during the last few years in the observance of the law as to reserves and in the conscientiousness and accuracy with which reports are made.

The modifications suggested in the law would be very acceptable to the banks, and would tend to the improvement of the system.

5. EXCESSIVE AND UNLAWFUL DIVIDENDS.

The provisions of law relating to dividends are substantially as follows:

1. The authority to declare dividends and to pay them is vested in the board of directors.

- 2. A dividend may be declared only when the net profits actually realized and on hand equal or exceed the total amount to be paid to stockholders.
- 3. Net profits are to be ascertained by deducting from gross earnings and profits: first, all expenses and losses incurred up to the date on which the books are closed; and second, all bad debts, which are thus defined:

All debts due to any associations, on which interest is past due and unpaid for a period of six months, unless the same are well secured, and in process of collection, shall be considered bad debts within the meaning of this section.

4. Until the surplus fund amounts to twenty per cent. of the capital, ten per cent. of net profits must be added to that fund every time a dividend is declared, so that in such cases the fund available for dividend is only ninety per cent. of net profits.

6. IMPROPER REDUCTION OF SURPLUS.

In many cases banks have passed to surplus account more than 10 per cent. of net profits, and subsequently before the surplus was full some of these have claimed that such excess might be withdrawn in dividends. Such a claim does not appear to be consistent either with the language of the law or with its manifest purpose. In construing the language of the law, it is to be observed that the act of 1863 required and that of 1864 authorized dividends exery six months out of undivided net profits actually on hand, while the latter act prescribed that every six month each bank should make to the Comptroller a report of its profits, expenses, and losses, whether or not any dividend should be then declared. The provision for a tithe to the surplus was from the first implicated with the regulations as to dividends and the charging off of losses, expenses, and bad debts, hence it seems clear that according to the view of the framers of the law a sum already carried to surplus is no longer a part of the undivided profits. surplus account is by the statute co-ordinated with shareholders as a beneficiary in the dividend fund, and if an amount in excess of the obligatory tithe is once added to the surplus, that amount ceases to be a part of the undivided profits out of which alone dividends may be declared.

As long as the surplus is below 20 per cent. of capital, it can not be

reduced except by losses in excess of undivided profits.

The intention of the law in providing for a surplus fund seems to be to afford to shareholders a protection against assessments. Such protection is valuable to all shareholders who are not capitalists, and who, therefore, presumably are not prepared to respond to assessments upon their shares, but it is of vital importance to small investors and to the beneficiaries of trust and estate funds invested in national bank stock.

The surplus fund stands between such shareholders and their wealthy partners as a safe guard against the process commonly known as "freezing out." Without this protection improvident or designing directors would be constantly exposing their shareholders to assessments, and on every such occasion the weak and helpless would be sacrificed, while their stock would pass into the hands of the designing or the grasping.

REPORTS.

During the past year 15,505 reports of condition, about 6,137 reports of dividends and earnings, and 3,166 reports from examiners have been received at the office of the Comptroller of the Currency, and fully 17,000

letters and circulars have been sent out in connection with them. The reports received are all carefully examined, compared with one another, and abstracts are made from them.

From these various reports, after examination and verification, the subjoined tables have been compiled, and other tables compiled from the same sources will be found in the Appendix, pp. 180 to 215, showing the condition of the reserve of national banks, their loans and discounts, abstract of reports of dividends and earnings, ratios to capital and to capital and surplus, and other valuable information as to the condition of the national banks on the date of the last report.

A large table on folded sheet, appended hereto, exhibits for October, 1888, in aggregate, every detail embraced in the tabulated reports required of the banks. Similar tables are made up for the information of the Comptroller from the reports gathered from all banks five times each year. The amounts are given separately for each State, reserve city,

and Territory.

DIAGRAM.

With the Report of 1886 a diagram was submitted grouping graphically the main features of the national banking system, and showing by continuous lines the variations occurring between January 1, 1866, and October 7, 1886. It has not been considered necessary to reproduce this diagram, because any one interested in the subject can extend the lines by means of the figures contained in the summary of the condition of the banks, given on page 2 of this Report.

The following table groups in a compendious form the most important facts shown in the diagram, extended to October 4, 1888. The exact figures in each case are given in the table; in the diagram they had to

be abridged into round millions.

			•	Highest 1	oint i	ouched.	Lowest po	int touched.

National-bank notes 20 Legal-tender	, 406, 442	21,600	818	28, 809, 6	99 De	e. 31, 1883	11, 841, 104	Oct. 7, 1867
	, 846, 548	81, 099	461	205793. 5	79 Oc	t. 1.1866	52, 156, 439	Mar. 11, 1881
	, 909, 363					ne 30, 1888		Oct. 1, 1875

An examination of this table shows that the aggregate capital, surplus, undivided profits, circulation, and deposits have increased from \$1,208,781,908 in January, 1866, to \$2,357,600,316 in October, 1888, which is less than double, while the loans and discounts have gone up from \$500,650,109 to \$1,674,886,285, which is more than treble, showing how much more widely the banks are now identified with the general business of the country than they were twenty-three years ago.

The investments in bonds have taken an opposite course. Amounting to \$440,380,350 in 1866, increasing to \$712,437,900 in April, 1879,

they amounted on October 4 last to \$232,582,250. Of this amount \$60,458,450 were held by the banks for public deposits and other purposes than circulation.

The specie, which at the beginning of the period was but \$16,909,363, had got down in October, 1875, to \$8,050,330, is now \$178,097,816, and on June 30, 1888, was \$181,292,276, the highest point yet reached. In October, 1887, the specie amounted to \$165,085,454.

It is interesting to see how these changes appear when reduced to

percentages.

The capital, surplus, undivided profits, circulation, and deposits con-

stitute together the fund upon which a bank does its business.

Loans and discounts, United States bonds, specie, etc., are different forms in which this fund is invested. Taking the fund at \$1,208,781,908 in 1866, at \$2,240,587,843 in 1887, and at \$2,357,600,316 in 1888, these investments represent the following proportions of those amounts, viz:

1		1866.	1887.	1888.
Loans and discounts		 Per ct. 41.32	Per ct. 70, 52	Per ct. 71. 04
United States bonds	 	 36. 36 1. 57	9.98 7.37	9. 87 11. 90
Total	 	 79. 25	87. 87	92. 81

Another striking fact is that in 1866 the circulation was \$213,239,530, and on October 4, 1888, it is only \$151,702,809. At the former period, therefore, the circulation was nearly 45 per cent. of the capital, surplus, and undivided profits, while now it is only about 18 per cent.

LOANS.

The following table gives a classification of the loans of the national banks in each of the central reserve cities of New York, Chicago, and Saint Louis, in other reserve cities classified in groups of four each, and in the rest of the country at nearly the same dates in each of the last three years:

OCTOBER 7, 1886.

The subjoined tables bring forward to the latest date the usual summary of information as to the course of deposits and reserves since the act of June 20, 1874, went into effect. They show the amount of deposits and the state of the reserve at about October 1 of each year, in each central reserve city, in all the reserve cities, and in the States and Territories, and conclude with a general summary embracing all banks.

^{*} Reserve 15 per cent., two-fifths in cash in bank.

In the above tables the specie held represents the aggregate of the gold and silver coin and Treasurer's certificates and clearing house gold certificates. In the appendix, page 198, will be found a table giving the amount of each kind of coin and certificate held by the banks in each one of the States and reserve cities in October, 1887, and October, 1888, conveniently arranged for purposes of comparison.

TRANSACTIONS OF THE NEW YORK CLEARING-HOUSE.

The New York Clearing-House Association is composed of 64 members, of which 44 are national banks, 19 are State banks, and the other member is the assistant treasurer of the United States at New York. Two national banks and 23 State banks in the city do not belong to the association, but clear through associate members. Mr. W. A. Camp, the manager of the Clearing-House, has kindly supplied the data for the following tables, showing the transactions during the year ending October 1, 1888:

Comparative Statement for Two Years of the Transactions of the New York Clearing-House, showing Aggregate Amount of Clearings, Aggregate Balances, and the Kinds and Amounts of Money Passing in Settlement of these Balances.

1			Kinds of money and amount of each kind.							
	A	A mana mata	,		Treasury certifi-	Tamel	Percer	ntages.		
Year ending—	Aggregate clearings.	Aggregate balances.	U. S. goldcertifi- cates.	gord cerum.	cates for legal tenders, sec. 5193, U. S. Re- vised Statutes.	Legal tenders and minor coin.	Gold certifi- cates.	Legal tenders.		
Oct. 1, 1887 Oct. 1, 1888	Dollars. 34, 872, 848, 785 30, 863, 686, 609							1- 16.81+		
Decrease Increase			76, 966, 000	93, 376, 000	16, 785, 000	197, 202				

^{*}When the Government ceased issuing gold certificates December 1, 1878, the New York banks agreed to have a common depositary for their gold coin. The Bank of America performed this function. None of its certificates are now outstanding, the last having been canceled in July of the present year.

Following is a comparative statement of transactions of the New York Clearing-House for thirty-five years, showing for each year the number of banks, aggregate capital, clearings, and balances, average of the daily clearings and balances, and the percentage of balances and clearings:

Years.	No. of banks.	Capital.*	Clearings.	Balances paid in money.	Average daily clearings.	Average daily bal- ances paid in money.	Ratios.

From the foregoing tables it will be seen that the exchanges in New York City during the past year amounted to 63.4 per cent. of the whole sum, and the balances in that city were 42.1 per cent. of the total balances.

The following table, compiled from returns made to the Clearing-House by the national banks in New York City, exhibits the movement of their reserve, weekly, during October; for the last twelve years:

DUTIES, ASSESSMENTS, AND REDEMPTION CHARGES.

National banks are subjected to a semi-annual duty of one half of 1 per cent. upon the average amount of their notes in circulation during the preceding six months. They are also required by the act of June 20, 1874, to pay the cost of the redemption of their notes at the office of the Treasurer of the United States at Washington and the cost of the plates from which their notes are printed. Banks extending their corporate existence have to pay for new plates. Previously to the act of June 20, 1874, the expense of the plates had been paid out of the tax

on the banks, which at that time attached to capital and deposits as well as to circulation.

The banks are further required to pay the fees of the examiners employed to ascertain their condition, under section 5240, Revised Statutes of the United States.

The taxes and assessments collected during the past year are as follows:

Semi-annual duty on circulation	\$1,616,127.53
Cost of redemption of notes by United States Treasurer	141, 141, 48
Assessment for cost of plates, new banks	
Assessment for cost of plates, extended banks	
Assessment for examiners' fees, sec. 5240, R. S	121,777.86

The following table is a comparative statement of taxes assessed as semi-annual duty on circulation, cost of redemption of notes, cost of plates, and examiners' fees for the past six years:

Years.	Semi-annual duty on circu- lation.	Cost of redemption of notes by United States Treasurer.	Assessments for cost of plates, new banks.	Assessment for cost of plates, extended banks.	Assessment for examiners' fees (sec. 5240 R. S.).	Total.

The total tax collected on circulation up to July 1, 1888, amounted to \$67,457,848.83.

LEGAL DECISIONS.

CONSTRUCTION OF STATUTES RELATING TO NATIONAL BANKS.

The "Digest of National-Bank Cases" presented in the Report of 1887 is reproduced in the appendix, page 101, enlarged by the incorporation of decisions announced during the last twelve months. The most important of these new decisions are as follows:

(1) An opinion rendered by the Supreme Court of the United States, February 20, 1888, in what is commonly called "The Pacific National-Bank Cases," holding that attachment of assets of national banks, whether insolvent or not, is invalid and that United States statute takes away the power of the courts to issue injunctions against national banks.

The opinion is as follows:

All of these cases involve the same general question, and they may properly be considered and decided together. From the records it appears that the Pacific National Bank of Boston was an association for carrying on the business of banking, organized under the national-bank act. On the 20th of November, 1881, it became embarrassed, and was placed in charge of a bank examiner, in whose control it remained until March 18, 1882, when its doors were opened for business with the consent of the Comptroller of the Currency.

By statute, in Massachusetts, civil actions are begun by original writ, which "may be framed either to attach the goods or estate of the defendant, and, for want thereof, to take his body; or it may be by original summons, with or without an order to attach the goods or estate." (Pub. Stat. of Mass., 1882, chap. 161, secs. 13, 14.) "All

real and personal estate liable to be taken on execution * * * may be attached upon the original writ in any action in which debt or damages are recoverable, and may be held as security to satisfy such judgment as the plaintiff may recover." (Sec. 38.) "A person or corporation whose goods or estate are attached on mesne process in a civil action may, at any time before final judgment, dissolve such attachment by giving bond with sufficient sureties, * * * with condition to pay to the plaintiff the amount, if any, that he may recover within thirty days after the final judgment in such action." (Sec. 122.)

At the time the bank resumed business it was indebted to George Mixter in the sum of \$15,000; to Henry M. Whitney also in the sum of \$15,000; to Daniel L. Dem-

mon in the sum of \$25,000; and to Calvin B. Prescott in the sum of \$5,000.

On the 24th of March, 1881, Mixter and Prescott each began a suit against the bank in the circuit court of the United States for the district of Massachusetts, by writ directing an attachment, to recover the amounts due them respectively. Demmon also began a suit in the same court and in the same way on the 28th of March, to recover the amount due him, and Whitney another on the 28th of April, upon the claim in his favor. At the time these suits were begun the bank had money on deposit to its credit in the Maverick National Bank and in the Howard National Bank, and the necessary steps were taken to subject these deposits to the attachments which were issued in the several suits.

The bank arranged with Lewis Coleman and John Shepard to become its sureties upon bonds to dissolve attachments in any actions that might be brought against it, and placed in their hands a certificate of deposit in the Maverick National Bank for \$100,000, to be held as their protection against all liabilities which should be thus incurred. This certificate was afterwards exchanged for \$121,000 of the bonds of the Nantasket Company, \$20,000 of the bonds of the Toledo, Delphos and Burlington Railroad Company, and \$15,000 of the bonds of the Lebanon Springs Railroad Com-

pany.

Immediately after each of the attachments in the above actions had been made, the bank executed a bond to the plaintiff in a penal sum suited to the amount of the claim, with Coleman and Shepard as its sureties, reciting the attachment, and that the bank "desires to dissolve said attachment according to law," and conditioned to be void "if the Pacific National Bank of Boston shall, within thirty days after the final judgment in the aforesaid action, pay to the plaintiff therein named the amount, if any, which he shall recover in such action." Upon the execution of the bond in each case, the attachment was dissolved.

After this the bank closed its doors a second time, and on the 22d of May, 1882, a receiver was appointed by the Comptroller of the Currency in accordance with the provisions of section 5234 of the Revised Statutes, and at once took possession of its

assets and proceeded to wind up its affairs.

When the receiver was appointed he found the several suits which had been commenced still pending. In the cases of Mixter, Whitney, and Demmon he appeared, answered for the bank, filed motions to discharge the attachments, and motions to dismiss the suits. His motions were all overruled, and, his defenses not being sustained, judgments were rendered against the bank in each of the cases for the amounts found to be due the several plaintiffs, respectively. For the review of the action of the court in these cases the writs of error which are now under consideration were brought.

The suit of Prescott still remains undisposed of in the circuit court.

-Failing in his motions and in his defenses at law, the receiver filed a bill in equity in the circuit court against the several attaching creditors and the sureties on the bonds given to dissolve the attachments, the object of which was to reduce to his possession the securities which were held by the sureties for their protection against liability, and to restrain the several attaching creditors from enforcing the attachment bonds on the ground, among others, "that the attachments made in said actions were unauthorized, illegal, and void." This bill was dismissed by the circuit court (22 Fed. Rep., 694), and from that decree the appeal, which is now one of the subjects of consideration, was taken.

In the view we take of the case, the most important question to be considered is whether an attachment can issue against a national bank before judgment in a suit begun in the circuit court of the United States. Section 5242 of the Revised Statutes of the United States contains this provision: "No attachment, injunction, or execution shall be issued against such association or its property before final judgment in any suit, action, or proceeding, in any State, county, or municipal court." The original national-bank act contained nothing of this kind, but the prohibition first appeared in the act of March 3, 1873 (chap. 269, sec. 2, 17 Stat., 603), as a new proviso added to section 57 of the act of June 3, 1864 (chap. 106, Sec. 2, 13 Stat., 116). That section was originally as follows:

"That suits, actions, and proceedings against any association under this act may be had in any circuit, district, or Territorial court of the United States held within the district in which such association may be established, or in any State, county, or municipal court in the county or city in which said association is located, having jurisdiction in similar cases: Provided, however, That all proceedings to enjoin the Comptroller under this act shall be had in a circuit, district, or territorial court of the United States, held in the district in which the association is located."

The amending act was as follows:

"That section fifty-seven be amended by adding thereto the following: 'And provided further, That no attachment, injunction, or execution shall be issued against such association, or its property, before final judgment in any such suit, action, or proceeding in any State, county, or municipal court."

Section 52 of the original national-bank act was as follows:

"That all transfers of the notes, bonds, bills of exchange, and other evidences of debt owing to any association, or of any deposits to its credit; all assignments of mortgages, sureties on real estate, or of judgments or decrees in its favor; all deposits of money, bullion, or other valuable thing for its use, or for the use of any of its shareholders or creditors; and all payments of money to either, made after the commission of an act of insolvency, or in contemplation thereof, with a view to prevent the application of its assets in the manner prescribed by this act, or with a view to the preference of one creditor to another, except the payment of its circulating notes, shall be (13 Stat., 115.)

This was evidently intended to preserve to the United States that "first and paramount lien upon all the assets of such association" which was given by section 47 as security for the repayment of any amount expended by them to redeem the circulating notes, over and above the proceeds of the bonds pledged for that purpose, and to place all the other creditors on that equality in the distribution of the assets of an insolvent bank which was clearly provided for in section 50, where the Comptroller of the Currency is required to make ratable dividends of the proceeds of the assets of the association realized by the receiver "on all such claims as may have been proved to his satisfaction, or adjudicated in a court of competent jurisdiction." Bank vs. Colby, 21 Wall., 609, 613.)

In the revision of the statutes, section 52 of the original act, and the amendment of section 57 adopted in 1873, relating to attachments and injunctions in State courts, were re-enacted as section 5242, the amendment of section 57 being put in the revision at the end of what had been the original section 52. As the Revised Statutes were first adopted, the proviso of section 57, which related specially to proceedings to en-join the Comptroller, was re-enacted as section 736, but all the rest of the original section was left out. That omission was, however, supplied by the act of February 18, 1875 (chap. 80, 18 Stat., 316, 320), which re-enacted it as part of section 5198, putting it at

the end of that section as it originally stood in the revision.

The fact that the amendment of 1873 in relation to attachments and injunctions in State courts was made a part of section 5242 shows the opinion of the revisers and of Congress that it was germane to the other provision incorporated in that section, and was intended as an aid to the enforcement of the principle of equality among the creditors of an insolvent bank. But, however that may be, it is clear to our minds that, as it stood originally as part of section 52 after 1873, and as it stands now in the Revised Statutes, it operates as a prohibition upon all attachments against national banks under the authority of the State courts. That was evidently its purpose when first enacted, for then it was part of a section which, while providing for suits in the courts of the United States or of the State, as the plaintiff might elect, declared in express terms that if the suit was begun in a State court no attachment should issue until after judgment. The form of its re-enactment in the Revised Statutes does not change its meaning in this particular. It stands now, as it did originally, as the paramount law of the land that attachments shall not issue from State courts against national banks, and writes into all State attachment laws an exception in favor of national banks. Since the act of 1873 all the attachment laws of the State must be read as if they contained a provision in express terms that they were not to apply to suits against a national bank.

The prohibition does not in express terms refer to attachments in suits begun in the circuit courts of the United States, but as by section 915 of the Revised Statutes those courts are not authorized to issue attachments in common-law causes against the property of a defendant, except as "provided by the laws of the State in which such court is held for the courts thereof," it follows that, as by the amendatory act of 1873, now part of section 5242 of the Revised Statutes, all power of issuing attachments against national banks before judgment has been eliminated from State statutes, there can not be any laws of the State providing for such a remedy on which the circuit courts may act. The law in this respect stands precisely as it would if there were no State law providing for such a remedy in any case. It was suggested in argument that the prohibition extended only to the use of the remedy by State courts, and that the remedy itself still remained to be resorted to in the courts of the United States. do not so understand the law. In our opinion the effect of the act of Congress is to deny the State remedy altogether so far as suits against national banks are concerned, and in this way it operates as well on the courts of the United States as on those of the States. Although the provision was evidently made to secure equality among the general creditors in the division of the proceeds of the property of an insolvent bank, its operation is by no means confined to cases of actual or contemplated insolvency. The remedy is taken away altogether and can not be used under any circumstances.

It was further said that if the power of issuing attachments has been taken away from the State courts, so also is the power of issuing injunctions. That is true. While the law as it stood previous to the act of July 12, 1832 (chap. 290, sec. 4, 22 Stat., 163), gave the proper State and Federal courts concurrent jurisdiction in all ordinary suits against national banks, it was careful to provide that the jurisdiction of the Federal courts should be exclusive when relief by attachment or injunction before judgment was sought. Until the act of 1882 the Federal courts had ample authority to grant injunctions in proper cases, and all a person need do to invoke that authority was to bring his suit in one of those courts. Whether since the act of 1882 this remains so is a question for the consideration of Congress. Some amendment to existing legislation may be necessary, but this does not shed any light on the interpretation of the old law. The difficulty arises from the change that has been made, not from the law as it stood originally.

We are, therefore, of opinion that the attachments in all the suits were illegal and void, because issued without any authority of law. But it is insisted that notwith-

standing this the bonds are valid and may be enforced

It is undoubtedly true that the sureties on a bond of this kind are estopped from setting up, as a defense to an action for a breach of its condition, any irregularities in the form of proceeding to obtain an attachment authorized by law which would warrant its discharge upon a proper application made therefor. As the purpose of the bond is to dissolve an attachment, its due execution implies a waiver both by the defendant and his sureties of all mere irregularities. So, too, it is no defense that the property attached did not belong to the defendant, or that it was exempt, or that the defendant has become bankrupt or is dead. In all such cases, where there was lawful authority for the attachment, the simple question is, whether the condition of the bond has been broken; that is to say, whether there has been a judgment in the action against the defendant for the payment of money which he has neglected for

In the present case, however, the question is whether the bond creates a liability when the attachment on which it is predicated was actually prohibited by law. In other words, whether an illegal and therefore a void attachment is sufficient to lay the foundation for a valid bond to secure its formal dissolution. The bond is a substitute for the attachment, although not affected by all the contingencies which might have discharged the attachment itself. (Carpenter vs. Turrell, 100 Mass., 450, 452; Tapley vs. Goodsell, 122 Mass., 176, 182.) Such being the case, it necessarily follows that if there was no authority in law for the attachment, there could be none for taking the bond. If the attachment itself is illegal and therefore void, so also must be the bond which takes its place. Objections can be made to an attachment issued on proper legal authority; which can not be used as a defense to a bond taken under the statute for its dissolution; but if there can be no lawful attachment, there can be no valid bond for its dissolution. The case is to be considered as though there was no law whatever for the seizure of property by attachment before judgment in any case. As the taking of the property under such circumstances would be unlawful, so also would be the act of the magistrate in accepting the bond.

Neither is the bond binding as a common-law bond. If the attachment had been

Neither is the bond binding as a common-law bond. If the attachment had been valid, and the bond taken had not been in all respects such as the statute had required, it could nevertheless have been enforced as a common law bond, because it was executed for a good consideration, and the object for which it was given had been accomplished. But here the difficulty is that there was no lawful attachment, and therefore no lawful authority for taking any bond whatever. The bond is consequently neither good under the statute nor at common law, because there is no suffi-

cient foundation to support it.

Objection is made to the relief which is sought in equity, because if the attachment bonds are void there is an adequate remedy at law in the suits that may be brought for their enforcement. If the suit in equity had been brought by the sureties to get rid of their obligation, this objection might be good; but such is not its character. The sureties have in their hands assets of the bank which the receiver seeks to reduce to his possession, and which they claim the right to hold until they have been fully indemnified against or discharged from liability on the bonds. The receiver says there is no liability, because the bonds are invalid; and to have that question settled once for all he has brought the persons interested, creditors as well as sureties, before the court in order that it may be conclusively adjudicated between them. Such a suit is clearly cognizable in equity. The sureties are in a sense stake-holders.

They do not claim the securities unless they are liable on the bonds, and the suit, although not brought by them, is in the nature of an interpleader to save them "from the vexation of two proceedings on a matter which may be settled in a single suit."
The decree will bind all alike, and if the sureties are held not to be liable it will conclude the creditors from all further proceedings against them on the bonds, and leave them free to surrender the securities to the receiver. This will not affect the judgments that the creditors have recovered any further than to limit their operation, so far as the receiver and the sureties on the attachment bonds are concerned, to the adjudication of the debts as claims entitled to dividends from the proceeds of the assets of the bank. To that extent, certainly, the court had jurisdiction in each of the suits after the insolvency; but as the attachments were void the judgments are inoperative as a basis of recovery upon the bonds.

The judgment in each of the suits at law is affirmed, but the decree in the suit in equity is reversed, and the cause remanded with instructions to enter a decree setting aside and annulling the bonds which were given to dissolve the attachments, and enjoining each and all of the creditors, and those claiming under them, from proceeding in any manner to enforce the same against the sureties, and directing the sureties to surrender to the receiver the securities they hold for their indemnity.

(2) An opinion rendered by the United States circuit court, southern district of New York, in an action of trover to recover moneys of a national bank (afterward insolvent) alleged to have been wrongfully appropriated by certain brokers and used in stock speculations.

The opinion is as follows:

This action is in substance one of trover to recover moneys of the First National Bank of Albion, alleged to have been wrongfully appropriated by the defendants during the years 1880 and 1881. The case was tried with a jury, and the jury found a verdict for the plaintiff for \$103,000 principal, with \$44,759 interest. The case is

now here upon a motion by the defendants for a new trial.

It appeared by the evidence that in 1880 one Warner was the cashier of the Albion bank, and for some time had been intrusted with the almost exclusive management of its affairs. In November, 1881, he became its president. In August, 1884, the bank failed, Warner absconded, and the plaintiff, who was appointed its receiver, took possession of the assets. An examination of its affairs showed that Warner had misappropriated moneys and securities of the bank to the amount of over \$300,000 and was otherwise indebted to the bank in a considerable sum. It was further shown that Warner had been carrying on stock speculations through the agency of the defendants, who were stock brokers and bankers of New York city; that he opened a customer's account with them May 11, 1880, and continued to buy and sell stocks and securities upon margins through them, and to deposit with and draw upon them as bankers, during that year and the next; and that from time to time the defendants received large sums of money from him by checks of the Albion bank, payable to their order, drawn by Warner, as cashier, upon the Third National Bank of New York city. The defendants collected these checks, and placed the proceeds to Warner's credit in his account with them.

It was also proved that for many years the Albion bank had kept a banking account with the Third National Bank of New York, and had been accustomed to draw upon it at sight, and send it collections and remittances; that after Warner became the cashier of the Albion bank he took personal charge of the correspondence between that bank and the New York bank, and intercepted the letters of advice and monthly statements sent by the New York bank to the Albion bank, and adopted other methods to conceal from the other persons associated with him in conducting the Albion bank the true state of the account between the two banks; that from time to time he deposited with the New York bank, in the name of the Albion bank, funds in his possession, and from time to time drew checks and drafts in the name of the Albion bank, as cashier, upon the New York bank, for his own transactions and speculations; and that the checks and drafts thus drawn by Warner for his own use were not credited to the New York bank on the books of the Albion bank, nor were the deposits made in the name of the Albion bank by Warner personally charged to the New York bank on the books of the Albion bank, although they were credited to the Albion bank by the New York bank; and neither the checks nor drafts, nor the credit items appeared in any way upon the books of the Albion bank.

The evidence was sufficient to justify the jury in finding that Warner used the account of the Albion bank with the New York bank as the means of appropriating, without the knowledge of the directors or other officers of the Albion bank, and clandestinely, the funds and credit of that bank for his own benefit. It appeared by the books of the two banks that the checks and drafts upon the New York bank and charged to the Albion bank, but not credited by the Albion bank to the New York bank, during the period of Warner's defalcations amounted to \$267,000, and the deposits credited by the New York bank to the Albion bank, but not charged by the

Albion bank to the New York bank, during the same period amounted to \$281,000.

The checks received by the defendants between May 11, 1880, and August 26, 1881, and including those dates, aggregated the amount of \$103,000. During the same period they received from Warner from other sources \$107,703. The defendants bought and sold stock for Warner on a margin of 10 per cent., and many of the checks in question were received by them pursuant to their request to remit for margins. The first and last checks were for \$10,000 each; one was for \$15,000. In January, 1881, they received checks for margins aggregating the sum of \$50,000. was given for the plaintiff tending to show that Warner was rated, where he resided, as worth from \$15,000 to \$20,000; and testimony was given for the defendants tending to show that they supposed that other persons were interested with Warner in his stock transactions, and did not suspect that he was using the funds of the bank illegitimately. It also appeared that from time to time Warner drew on the defendants, and that during the period covered by the checks in controversy they paid on his drafts, into the Third National Bank, to the credit of the Albion bank, at various times, sums aggregating \$89,202, and that this amount was credited to the Albion bank on the books of the New York bank, and \$25,850 thereof was charged on the books of the Albion bank to the New York bank, but the rest did not appear in the books of the Albion bank.

Upon the trial, the court excluded the testimony offered by the defendants to show that it was customary with bankers and brokers of New York City to receive cashiers' checks aud drafts drawn in favor of their own banks upon New York banks as cash, upon transactions with the cashier individually. At the close of the testimony, the defendants requested the court to instruct the jury to find a verdict for the defendants. Defendants also requested the court to instruct the jury that the defendants were not liable for any sum in excess of the difference between the sums received by them from Warner upon the checksof the Albion bank and the sums paid by them on Warner's drafts to the New York bank to the credit of the Albion bank. court refused such instructions. The court instructed the jury, in substance, that it was incumbent upon the plaintiff to establish that the moneys represented by the checks received by the defendants were moneys of the bank which had been misappropriated by Warner; and that, when the defendants received the checks, they took them with guilty knowledge that Warner in using them was misappropriating the funds of the bank; and that, unless they found both these propositions established by the evidence, their verdict should be for the defendants. They were further instructed that they might find upon the evidence that Warner was permitted by the directors of the bank to draw such checks for his own use, or to use the money of the bank for his own purposes, or they might find that the directors of the bank were in collusion with Warner and cognizant of his transactions; that if they found that those who represented the stockholders of the bank as its directors or managers that those who represented the stockholders of the bank as its directors or managers permitted Warner to draw such checks or use the moneys of the bank for his own purposes, not as co-conspirators or collusively, but trusting in his integrity or believing that the bank would not be injured, or through loose management on their part, the plaintiff could not recover; but if they did this collusively their consent could not shelter the defendants, because they had no power by virtue of their position to consent to a fraud upon the stockholders. The jury were further instructed that upon the issue whether the defendants received the checks with guilty knowledge, the question was not whether they were negligent in receiving them or in allowing Warner to deal with them as they did, but the question was whether they were guilty of bad faith; that defendants were bound to know that a cashier has no authority as such to loan the money of the bank or use its checks for his personal use: that the jury were to infer that the defendants knew this when they resonal use; that the jury were to infer that the defendants knew this when they received the checks, and therefore the question was whether the defendants believed that by some special arrangement or confidence Warner was permitted by those who were associated with him in the management of the bank to use its checks and moneys as he did; and if the jury found that the defendants so believed, the defendants were not guilty of mala fides. The defendants insist upon this motion that the court erred in excluding the testimony of custom, in refusing to instruct the jury as requested, in the instructions given to the jury, and urge other grounds for a new trial.

In some aspects this is a hard case for the defendants. If the verdict stands, they are made responsible to pay over a very large sum of money which came to their hands to be invested and handled for another person in consideration of a small commission to be received by them, and which they have paid back to the person from whom they received it; and there is no reason to suppose that they had any active or defined purpose when they received the money, or at any time, of assisting the person from whom they received it to defraud others, or to injure others in any way. It is altogether likely that they could have shown, if they had been permitted to do so, by the testimony of any number of respectable bankers and brokers, that it is every-day practice in Wall street, for those in their line of business to buy and sell

stocks for bank presidents and cashiers who are speculating there, and to accept drafts and negotiable paper of the corporations of these officers, made by them officially, in payment of the margins or purchase-money, and that such transactions are so frequent and common in Wall street that they do not attract special notice, and do not usually excite a passing suspicion that they are irregular or improper.

But no usage, however common and well recognized, can be invoked to justify a banker, or any one else, in taking money or negotiable paper in payment of an agent's debt, known to belong to his principal, or known to belong to a trust-estate, to satisfy the trustee's personal debt, or to shield the banker from accountability who wilfully closes his eyes and stops his ears to facts and circumstances which import notice that the agent or trustee is misappropriating, the money or property intrusted to him. Therefore, if there is any significance in the fact that a bank president or cashier offers negotiable paper of his corporation, made by him in his official character, in payment of his personal debt, or to raise money for his personal use, it matters not that bankers generally do not appreciate it. If they regard the transaction as equivalent to one in which the individual comes with money in hand, they ignore its real character, because in that case he comes with what purports to be his own, having the possession which implies title and ownership, and the right to use it as he sees fit. When he comes with the money-obligation of a corporation, which is the contract of a corporation only because he has made it, and which is not its contract if he has made it without authority, the transaction is a very different one. Every person who takes such an obligation must ascertain at his peril that the agent who has made it was authorized to do so; and the moment that it appears that the contract has been made for the agent's own use and benefit, that moment his authority is impugued and impeached.

No principle of the law of agency is better settled than that no person can act as the agent for another in making a contract for himself. Therefore it is that a bank president or cashier has no implied authority to bind his corporation to negotiable paper made for his own use; and if it appears upon the face of the paper that it is payable to the individual who has made it in an official capacity, the obligation is

nugatory, and no purchaser can enforce it.

Upon this principle it was held in Claffin v. The Farmers and Citizens' Bank (25 N. Y., 293) that a general authority to the president of a bank to certify checks drawn upon it does not extend to checks drawn by himself; and if the face of the check shows the president's attempt to use his official character for his private benefit, every one to whom it comes is put upon inquiry, and if the certificate is false no one can recover against the bank as a bona fide holder. So, too, it was held in West Saint Louis Savings Bank v. Shawnee County Bank (95 U. S., 557), where a bank cashier made his individual note payable to the order of his bank, and indorsed it officially, that a purchaser of the note was charged with notice that the indorsement was not within the implied authority of the cashier, and must prove actual authority in order to recover of the bank as indorser.

It can make no difference whether the agent or officer appears to be the party to whom the paper is payable upon the face of the instrument, or whether it appears by extrinsic facts that he is the real party for whose benefit it was made; consequently, whenever he offers the instrument under circumstances which show that he has made it officially for his private use, the party dealing with him must take notice of his want of authority, and can not treat it as the obligation of the principal, unless he can prove the existence of some special and extraordinary authority on the part of the agent. For these reasons the testimony offered by the defendants to show that cashiers' checks, when used in the private transactions of bank cashiers, are by usage regarded as cash, was properly excluded. If the tendency of the testimony was to establish a usage to the effect that such payments are regarded by bankers as ordinary payments of cash made by individuals for their own account, the usage would contravene well-settled legal principles. In any other aspect the testimony was immaterial.

The views thus expressed are pertinent in considering whether the instructions given to the jury were correct respecting the title acquired by the defendants to the checks and moneys the checks represented. If the instructions did not accurately present to the jury the legal principles by which, upon the evidence, the rights of the parties were to be determined, they certainly did no injustice to the defendants. The case was put to the jury upon the theory that the defendants, in taking the checks, occupied the position of purchasers of commercial paper, and as though their liability was to be tested by the rule applicable to actions for the wrongful conversion of such paper. If they acquired title to the checks as against the bank, of course they acquired title to the proceeds, and, if they were bona fide purchasers, their title was perfect; otherwise they became liable for the proceeds as for a conversion. (Comstock v. Hier, 73 N. Y., 269). The defendants were given the full benefit of the distinction between negligence and mala fides in the purchase of negotiable paper, and the jury were instructed that mere suspicion on the part of the defendants was not suffi-

cient to charge them with notice that Warner was using the checks without authority. The doctrine of Goodman v. Simonds (20 How., 343) was adopted as applicable to the

The facts in evidence certainly justified the submission of the question to the jury whether the defendants did not have notice that Warner was availing himself of fiduciary powers to use the funds of the corporation for unauthorized purposes. As the checks were made payable to the order of the defendants for Warner's individual use, in legal effect they were made payable to Warner's own order. The defendants knew that he was not acting within the scope of any ordinary agency when he made checks officially for use in his private transactions. The authority of a cashier to represent officially for use in his private transactions. ometally for use in his private transactions. The authority of a casher to represent the bank does not extend to a contract involving the payment of money not loaned by the bank in the ordinary way. (United States Bank v. Dunn, 6 Pet., 51; United States v. City Bank of Columbus, 21 How., 356; Merchants' Bank v. State Bank, 10. Wall., 604.) As the executive officer of the bank, he transacts its business under the orders and supervision of the board of directors. Authority to use its credit, or transfer its funds for his private use, can not be implied from the fact that his official position puts it within his power to act dishonestly in this behalf

Although the defendants were bound to know when they took the checks that the paper could not be treated as the paper of the bank unless the managers of the bank had loaned himthe money represented by it, there was evidence which, unexplained, tended to show that such a loan had been in fact made. The evidence consisted in the circumstances that the checks were drawn upon the regular correspondent of the bank, were drawn frequently, were for large amounts, and the transactions extended over a considerable period of time. These circumstances indicated the improbability that the cashier was acting clandestinely or criminally, and suggested that he was acting with the acquiescence of the directors or that the directors were grossly inattentive to their duties. If the circumstances were sufficiently notorious and peremptory to preclude any other theory than that the directors were aware of what was being done, and were not such as to imply that the directors were willfully ignoring their duties, and acting collusively with Warner, they would afford sufficient evidence of Warner's authority to use the funds of the bank as he did, and would have ustified the defendants in relying upon the ostensible authority evinced by the acquiescence and recognition of the directors. As was said by the court in Martin v.

Webb (110 U. S., 14., 3 Sup. Ct. Rep., 428):

"It is clear that a banking corporation may be represented by its cashier—at least where its charter does not otherwise provide—in transactions outside of his ordinary duties without his authority to do so being in writing, or appearing upon the record of the proceedings of the directors. His authority may be by parol and collected from circumstances. It may be inferred from the general manner in which, for a period sufficiently long to establish a settled course of business, he has been allowed without interference to conduct the affairs of the bank. It may be implied from the conduct or acquiescence of the corporation, as represented by the board of directors. When, during a series of years, or in numerous business transactions, he has been permitted, without objection, and in his official capacity, to pursue a particular course of conduct, it may be presumed, as between the bank and those who in good faith deal with it upon the basis of his authority to represent the corporation, that he has acted in conformity with instructions received from those who have the right to control its operations. Directors can not, in justice to those who deal with the bank, shut their eyes to what is going on around them. It is their duty to use ordinary diligence in ascertaining the condition of its business, and to exercise reasonable control and supervision of its officers. * * * That which they ought by proper diligence to have known as to the general course of business in the bank, they may be presumed to have known in any contest between the corporation and those who are justified by circumstances in dealing with its officers upon the basis of that course of business."

The defendants could rightfully assume that the directors of the Albion bank did use reasonable diligence in acquainting themselves with the state of its account with its principal agent, the New York bank, and did exercise proper control and supervision generally in the management of its affairs; and the fact that Warner was nevertheless able to use the funds of the bank in such large amounts, for so long a period of time, and through the medium of the regular correspondent of the bank, was inexplicable, except upon the theory of the acquiescence of the directors, or of their part in the conduct of the affairs of the bank. The defendants, however, chose to rely upon appearances, instead of seeking authentic information. They were not to rely upon appearances, instead of seeking authentic information. They were not certain, and could not be from the nature of the case, whether, notwithstanding appearances, the directors were not being deceived by Warner, and were not in fact ignorant that he had ever made any of the checks in question. It was incumbent upon the defendants to show that the directors knew and acquiesced in what was being done by Warner, before they could rely upon his official signature. The evidence raised a

presumption of such knowledge and acquiescence on the part of the directors, but did not show it conclusively; it presented a question of fact for the consideration of the jury; and the jury found, as the evidence fully warranted them in doing, that the directors were ignorant of Warner's acts.

As is stated in Wharton on Agency (sec. 139): "The pretension by an agent to extraordinary or peculiar powers is by itself sufficient to arouse suspicion." When the transaction is such as should arouse suspicion of the agent's authority to represent his principal, it is the duty of those who deal with him in a representative character to apply to his principal for information. The defendants did not choose to take the safer course; they preferred to rely upon the evidence of Warner's authority evinced by the facts and circumstances which tended to show that the directors must. have known of and consented to his use of the funds of the bank. The jury found not only that the directors did not know this, but also found that the defendants did not believe, when they took the checks, that Warner was authorized to make them by his co managers of the bank. The doctrine that a purchaser of negotiable paper acquires a good title if he acquires it for value, and honestly, notwithstanding he may have been grossly negligent in failing to make proper inquiries, has no application to a case like the present. A purchaser of commercial paper, made by an agent, can not acquire any title to it as against the principal, unless he is able to show that it is the paper of the principal, made by the agent, by due authorization. When he has information that the agent who has made the paper has made it in the name of the principal, for his own use, he must be prepared to show that special authority in that behalf has been delegated by the principal, and can not rely upon the implied authority of the agent to make such paper in the ordinary business of the principal. accordance with these views, the defendants were not entitled to the instruction that they were only liable if the jury found they took the checks with guilty knowledge that Warner had no authority to use them; and it would have been proper to instruct the jury that the plaintiff was entitled to a verdict if they found that Warner had no authority, actual or ostensible, to use them.

It is insisted for the defendants that, inasmuch as the checks were paid by the New York bank out of funds in part contributed by Warner himself, the Albion bank was not a loser of the face amount of the checks and the plaintiff ought not to recover beyond the extert that the checks were paid out of the moneys of the Albion bank. The evidence did not indicate that the New York bank had any notice that the checks were not put out by Warner in the course of the ordinary business of the bank; consequently, when they were presented to and collected of the New York bank, the latter became a bona fide holder for value, and the Albion bank became liable to it for the face amount of the checks. Several of the adjudications which decide that the maker of commercial paper can maintain an action for conversion against the person who, with notice that it has been put fraudulently into circulation, negotiates it to a bona fide holder for value, also decide that he can recover the amount of the paper without averring or proving that he has paid it to the holder, and that it is enough, prima facie that he has become liable to pay it, to entitle him to recover the face amount (Decker v. Mathews, 12 N. Y., 313; Evans v. Kymer. 1 Barn. & Adol. 528; Payne v. Pritchard, 2 Car. & P., 558). It has been held that the defendant may prove the insolvency of the maker, and thereby lessen the damages; but, in the absence of evidence of any want of ability of the maker to pay, the presumption is that he is able to pay the paper, and will be obliged to do so (Potter v. Merchants' Bank, 28 N. Y., 641). It is enough for him to show that he has incurred a liability to pay the amount by the wrongful act of the defendant; but, if the facts are such that this liability will not result in actual loss, he will only be entitled to recover nominal damages. The law presumes that loss will follow liability; consequently, it is for the defendant to overcome the presumption by evidence which will take the case out of

the ordinary category.

A check is not only a bill of exchange upon which an action can be maintained against the drawer by the drawee who has paid it, but is a bill which is presumed to be drawn on actual funds, and appropriates the funds to the drawee upon payment. Undoubtedly, in an action for the wrongful conversion of such paper, if the defendant proves that payment of the check was refused by the drawee, that it has never reached the hands of a bona fide holder, and that he is ready to surrender it to the maker upon the trial, these facts would go in mitigation of damages, and the recovery of the plaintiff would be limited to his actual loss. If, in the present case, the action was merely for the conversion of the clecks, the plaintiff would be entitled to recover their face upon proof that they were paid by the New York bank, without more; but the action is for the money of the Albion bank, obtained upon its checks "paid by the New York bank out of and from the moneys and accounts of the Albion If the evidence established that the checks were not paid by the New York bank out of the moneys or funds of the Albion bank, but were paid out of moneys provided for that purpose by Warner the jury should have been instructed that their

verdict could be only for nominal damages. But the payment of the checks by the New York bank was none the less a payment by the Albion bank, or a payment out of its funds, because the latter was put in funds without the knowledge of its officers, and its correspondent paid the checks without their knowledge. If Warner had made deposits in his own name with the New York bank, and that bank, pursuant to his instructions, had charged the checks, when it paid them, against his account, the defendants might well insist that the checks were not paid by the Albion bank, or out of its funds. Under such circumstances, the plaintiff would certainly be required to prove that the deposits made by Warner were funds of the Albion bank. But when Warner caused deposits to be made with the New York bank in the name of the Albion bank, the title to the fund created by the deposits vested in the latter as against Warner. When the New York bank credited the Albion bank with these deposits it assumed the relation of a debtor, not to Warner, but to the Albion bank for the amount; and when it paid checks drawn against the fund and charged them to the Albion bank, it paid them out of the funds of the Albion bank as between itself and the Albion bank and as between the latter and Warner. It may be that third persons, whose moneys were misappropriated by Warner and deposited with the New York bank to the credit of the Albion bank, can reclaim the amount of the Albion bank; but Warner himself could not, because he relinquished his title by his own act. Whether the deposits made by him are to be regarded as the property of the Albion bank because made by a fiduciary who has willfully commingled his own funds with the trust funds in such a manner that the line of distinction between them can not be traced, or as voluntary payments which he can not reclaim because they were voluntary, need not be considered. He doubtless made them to conceal his use of the funds of the bank, knowing that he could not overdraw the account of his bank with t

The defendants have no interest in the question whether the Albion bank paid the checks out of the moneys for which it is accountable to third persons, or even out of the money for which it may be accountable to Warner. It suffices that the checks were paid out of funds to which it had the legal title. Nor is it material that the defendants paid to Warner various sums of money which were ultimately received by the Bank of Albion. It was open to the defendants to show upon the trial that the Albion bank did not eventually sustain any loss by Warner's misappropriations of its checks or moneys, and thus reduce the plaintiff's recovery to nominal damages. This they did not attempt otherwise than by showing that Warner deposited various sums of money to the credit of the Albion bank, which were not charged by that bank to the New York bank. The presumption is as cogent that these deposits secretly made by Warner represented the moneys which he knew belonged to the Albien bank as that they were his own money. The case for the plaintiff was complete when it appeared that the checks which were wrongfully received and collected by the defendants had been paid by the New York bank out of funds standing to the credit of the Albion bank. He was then entitled to recover the full amount. It was unnecessary for him to assume the affirmative, and show that the deposits made by Warner in the New York bank were not the funds of Warner, but consisted of misapplied funds of the bank, or the proceeds of securities belonging to it, or for which it was responsible to others; but it was for the defendants to prove that, notwithstanding their wrongful participation with Warner in misappropriating the funds of the bank, the bank did not suffer loss. If they had shown that all his misappropriations had been made good by the return of what he had misapplied, it is not entirely clear that they would have been liable only for nominal damages. (Hanmer v. Wilsey, 17 Wend., 91; Otis v. Jones, 21 Wend., 394; The People v. Bank of North America, 75 N.Y., 547.). These cases hold that the defendant in an action for conversion of property can only claim a mitigation of damages because of a return of the property, where the owner has accepted its return, or has resumed dominion over it as owner; and that it is not enough that the property, without his consent, has been applied to the satisfaction of his debts. It is not necessary to consider whether this doctrine should be applied to a case for the conversion of money which has been returned to the owner, and used by him without knowledge of the conversion or restitution. Here all the money returned by Warner was insufficient to replace his defalcations by an amount much larger than the sum sought to be recovered of the defendants, and the bank had no knowledge that he had returned anything to replace what he had misapplied until he had again misappropriated it. It is not unjust or unreasonable to compel the defendants to restore such of the funds of the bank as they received when they are unable to prove that the bank was not directly or ultimately a loser in consequence of their acts. It may be that Warner would have misappropriated the money of the bank in other ways, if they had refused to receive the checks, but certainly one temptation would not have been in his path if he had found that he could not use the paper of the bank for his speculations with the same facility as though it were his own money.

Several points discussed upon the motion for a new trial, among them the point that the jury should have been instructed not to include interest in their verdict accruing before the commencement of the suit, do not seem to merit consideration. The views expressed cover all the controlling questions in the case, and lead to a denial of the motion.

(3) An opinion rendered by the Supreme Court of the United States November 12, 1888, with respect to the liability of a married woman holding stock of an insolvent national bank to an assessment upon such stock levied by the Comptroller of the Currency where the assets of the bank were not sufficient to pay creditors in full.

On the 4th of February, 1885, Martin L. Bundy, receiver of the Hot Springs National Bank, of Hot Springs, in the State of Arkansas, filed his bill of complaint in the circuit court of the United States for the district of Kentucky against William M. Cocke and Amanda M. Cocke, his wife, and James Flanagan and Sue Flanagan, his wife, all of the defendants being alleged in the bill to be citizens of Kentucky.

The bill alleges that, on the 1st of March, 1884, the bank was a corporation created and organized under the national banking statutes, with a capital stock of \$50,000, divided into 500 shares of \$100 each at their par value; that it had its office of discount and deposit in the city of Hot Springs, in the State of Arkansas; that it suspended the business of banking on the 27th of May, 1884; that the plaintiff was duly appointed receiver of the bank on the 2d of June, 1884; and that, on the 25th of July, 1884, the Comptroller of the Currency determined that it was necessary to enforce the individual liability of the shareholders in the bank, to the amount of 50 per centum of the par value of its capital stock, "and did make an order and requisition on the stockholders and each and every one of them, equally and ratably, as the shares were held and owned by them respectively at the time said bank suspended and ceased to do business," and directed the plaintiff "as such receiver" to take the necessary legal proceedings to enforce such assessment against the shareholders in said bank, and each and every one of them.

The bill then contains the following allegation:

"And your orator would further state that, on the 27th day of May, A. D. 1884, when said bank suspended and ceased to do business, Amanda M. Cocke, wife of William M. Cocke (both of whom are made defendants hereto), was the owner of one hundred shares of the capital stock thereof, of the par value of ten thousand dollars, and the same still stands in her name on the books of the said association, on which the equal and ratable assessment and requisition made by the Comptroller as aforesaid is five thousand dollars, with interest thereon from the said 25th day of July, 1884; that said defendant Amanda is possessed of property in her own right amply sufficient to pay said assessment, but utterly refuses to do so."

Then follows a like allegation as to Mrs. Flanagan, as the owner of twelve shares

of the stock.

The prayer of the bill is, that an account be taken of the shares of stock held by each of the married women defendants, respectively, at the date of such suspension and the assessment and requisition made by the Comptroller of the Currency thereon, and that a decree be made for the payment thereof out of the separate property held by the married women defendants in their own right, as each may be found indebted, with interest.

Mr. and Mrs. Cocke filed a demurrer to the bill for want of equity and also for multifariousness. The plaintiff then amended the bill by striking out the names of Flanagan and his wife as defendants; and in July, 1885, he filed a bill of revivor, based on the fact of the death of Mrs. Cocke in March, 1885.

The bill of revivor alleges that, when Mrs. Cocke died, she was a citizen of Kentucky, and was domiciled and resident therein; that she left a will whereby her husband was appointed her sole executor and her sole residuary legatee and divisee; that the will had been duly proved and recorded in the proper court in Kentucky; and that Mr. Cocke had accepted the terms of the will and taken upon himself the office of such executor. The bill prays for the revival of the suit against Mr. Cocke as devisee and legatee of his wife and as sole executor of her will, and for relief against him out of all assets received or held by him as devisee or legatee of his wife, or as. executor of her will.

Mr. Cocke appeared and filed a demurrer to the bill of revivor, for want of equity. The cause was heard on the demurrer to the bill and the demurrer to the bill of revivor. The court sustained both of the demurrers, giving to the plaintiff time to amend his bill, and, he declining to do so, a decree was entered dismissing it. From that decree

the plaintiff has appealed.

From the opinion of the court, accompanying the record, the ground of the dismissal appears to have been, that the bill was defective in not alleging that, at the time Mrs. Cocke became a stockholder, she had the capacity to become a stockholder.

But we think the bill is not open to this objection. It alleges that, at the time the bank suspended, Mrs. Cocke "was the owner" of the 100 shares. This is an allegation that she was then the lawful owner of those shares, and had lawfully become such owner, with the capacity to become such owner at the time she became such owner. It is consistent with this allegation, that she may have owned the shares before she married Mr. Cocke, or that, when she became such owner, if she was then the wife of Mr. Cocke, she had the right to become such owner by virtue of the laws of the State of Arkansas, where the bank was located, in connection with the provisions of the statutes of the United States in regard to national banks.

Section 4194 of the Digest of the Statutes of Arkansas, published in 1874 (chap. 93,

p. 756), provides as follows:
"Sec. 4194. A married woman may bargain, sell, assign, and transfer her separate personal property, and carry on any trade or business, and perform any labor or services on her sole and separate account; and the earnings of any married woman from her trade, business, labor, or services shall be her sole and separate property, and may be used or invested by her in her own name; and she may alone sue or be sued in the courts of this State on account of the said property, business, or services."

Under this provision, if it was in force at the time of the transaction, it would seem

that Mrs. Cocke, when a married woman, might lawfully have either subscribed for or taken an assignment of the shares, they being shares of a national bank in Arkansas, and the transaction being, therefore, governed by the statutes of Arkansas, unless, under special circumstances, a different rule ought to govern. (Milliken v. Pratt,

125 Mass., 374.)

As the bill alleges that Mrs. Cocke is possessed of property in her own right amply sufficient to pay the assessment, and as the prayer of the bill is for a decree for the payment of the amount of the assessment out of the separate property held by her in her own right, and as the bill of revivor prays for relief against Mr. Cocke out of the assets received by him as the legatee or devisee of his wife, or as executor of her will, the case is clearly one of equitable cognizance, because it does not appear that she could be sued at law, to reach her separate property. (3 Pomeroy's Eq. Juris., § 1099.)

The original bill and bill of revivor are sufficient on their faces to call upon Mr. Cocke to answer them, and, when all the facts bearing upon the case are fully developed the rights of the parties can be properly adjudicated. For that reason we

refrain from considering any of the other questions discussed at the bar.

The decree of the circuit court is reversed, and the case is remanded to that court, with a direction to overrule the demurrer to the original bill and the demurrer to the bill of revivor, and to take such further proceedings as may be proper and not inconsistent with this opinion.

CONCLUSION.

In presenting this report I gladly take occasion to bear testimony to the excellent spirit prevailing among the officers and directors of national banks all over the country, and to the intelligence and conscientiousness which they habitually display in the conduct of business.

Although the requirements of the national bank laws are often rendered onerous by local conditions, and many of its restraints are not only irksome but sometimes in particular cases seem to be unreasonable, there exists everywhere as a rule a spirit of sincere and ready acquiescence. In the comparatively few cases where this spirit is wanting the power of the Comptroller to enforce compliance with law has been found to be ample, and its exercise has but in one case had to transcend the limits of a courteous but firm admonition. In that case the bank was closed and placed in the hands of a receiver, the president and cashier were arrested and indicted, and the property of the directors

For several years past, under the influence of the act of July 12, 1882, the national bank system has been growing vigorously, and its benefits have been thus brought within reach of a constantly increasing number of people, and have been extended into communities where they were not previously enjoyed.

At present this healthy and desirable growth is checked and is in danger of being arrested by the scarcity and dearness of bonds.

the proper place in this report I have called especial attention to the value and capabilities of the bank-note feature of the system and have ventured to submit a plan for its preservation and extension into full utility. The subject is one of national importance, and yet it is also of definite pecuniary interest to each and every industrial worker in the country, however obscure his employment may seem or however secluded his location.

The functions performed by banks are essential to the free and full play of industrial activities, whether these are agricultural, mechanical, or professional. The products of all industries must be marketed in order that the workers may enjoy the fruits of their toil or the rewards of their skill, and without banks the marketing of the vast masses of the products of American industry would be simply impossible.

The banks as a body establish and maintain, ready for use at all times and to any extent required, a line of communication between the world's consumers and the remotest farmer on the Western plains or among the Southern forests. Break this line of communication and the abundance of the farm becomes a rotting incubus. Interrupt it, burden it with tolls or taxes, and the farmer loses in the price of his products or pays in the cost of what he buys more than the toll-gatherer or the tax-collector receives.

A great prejudice has been excited in agricultural sections against the national banks, because they are forbidden to lend money on realestate securities. Never was there any prejudice more unreasonable and more harmful to those who entertain it than this prejudice.

In the first place, if national banks absorbed all the capital of the country or directed its employment and investment, not only their interests, but even their very existence would necessitate the setting aside of a large part of that capital for investment exclusively in real estate or in real-estate securities, because such investments are essential to the progress of every community.

But the national banks do not by any means occupy that position. Private capitalists, corporations, such as savings banks, insurance companies, loan and trust companies, farm and mortgage investment companies, abound; they possess and control more capital than the national banks, and for all these there can be no investment safer, more attractive, and more appropriate than real estate or its representative instruments.

The national banks, on the other hand, constitute a body of bankers exclusively devoted to the collection, the safe-keeping, and the employment in temporary loans of the floating capital of the country. If in any community the national bank capital and deposits exceed what can be safely and profitably employed there in that way, the floating capital of that community is excessive and a part of it may with advantage be converted into fixed forms, but it should first be withdrawn from the national banks. These institutions are too expensive to be used as mere agencies for keeping bonds and stocks, and collecting interest quarterly or half yearly. Such misuse of a national bank is bad economy; it is as if a farmer should buy wagons and carriages for storing his crop instead of building a barn.

Again, to entertain a prejudice against national banks and to oppose the improvement and healthy extension of the system is unwise because we must have banks, and these are the best that have ever existed in this country or in any other. It is especially unwise on the part of farmers to entertain such prejudice because they are more dependent upon other people's floating capital than any other industrial class.

Miners, manufacturers, transportation companies, and other large employers keep a part of their capital in money, and depend upon the banks for only a moderate proportion of the cash funds needed to liquidate their transactions, but farmers can not afford to keep any amount of money idle while their crops are growing or their cattle are taking on flesh or their sheep and hogs are multiplying. It is more profitable for them to use all their own money in enlarging the scale of their operations; and, therefore, when their crops come to be harvested or their stock is ready to be driven to market, it is of supreme importance to them to be able to get the ready money for the purpose, either directly or through the medium of dealers in their products. Whether obtained directly or through merchants or drovers, the money essential to the marketing of the farm produce is supplied by the banks, and could not be supplied by them at that moment of supreme need if it had previously been lent to the farmers upon the security of their lands.

The banks that serve the farmers best are those that move their crops with least delay. A bank in an agricultural section that gets its funds tied up in long loans to farmers mistakes its office and vocation, and is as great an obstruction to local prosperity as a railroad would be that should hire all its freight cars out during the dull season for an employment that keeps them out of its reach and control beyond the season during which the community depends upon it to take away the produce of its year's labor, and to bring back the commodities essential to its winter's comfort and maintenance.

Very respectfully,

W. L. TRENHOLM. Comptroller of the Currency.

Hon. John G. Carlisle, Speaker of the House of Representatives.

REPORT OF THE CHIEF OF THE BUREAU OF ENGRAVING AND PRINTING.

TREASURY DEPARTMENT,
BUREAU OF ENGRAVING AND PRINTING,
October 27, 1888.

SIR: I have the honor to submit a report on the operations of the Bureau of Engraving and Printing for the fiscal year 1888.

WORK ACCOMPLISHED:

The production of securities during the year exceeded that of any preceding year in the history of the Bureau. There were printed and delivered to the various departments of the Government 38,040,984 sheets of securities. The number of sheets printed was 5,388,777 greater Of United States notes, gold and silver certificates, bonds, than in 1887. and national bank notes, there were delivered 10,649,548 sheets, representing a face value of \$461,495,280, a quantity far in excess of any preceding year's production; the largest quantity of these securities printed in any prior year was in 1883, when the deliveries amounted to 9,232,005 sheets. There were printed and delivered 25,950,988 sheets of internal revenue stamps, containing 689,836,422 separate stamps, an increase of 1,584,288 sheets over the production of 1887, which in its turn exceeded that of any previous year; of customs stamps there were produced 420,200 sheets, an increase of 105,500 over 1887, and of miscellaneous securities 1,020,248 sheets, exceeding the production of 1887 by 234,307 sheets. There were turned out during the year 72,077 volumes of internal revenue stamps, drafts, checks, and similar securities.

The estimated production on which the regular appropriations for the support of the Bureau for the year were based was 34,992,794 sheets of securities. By the deficiency act of February 1, 1888, a further appropriation of \$46,000 was made for printing additional silver certificates and United States notes of the denominations of one dollar and two dollars. It was estimated that under this appropriation there would be printed 1,875,000 additional sheets of notes and securities, thus increasing the estimated production for the year to 36,867,794 sheets. The actual production exceeded this estimate by 1,173,190 sheets, while more than \$15,000 of the appropriation was returned to the Treasury unexpended.

There were delivered to the Treasurer of the United States during the year, in notes and certificates of the denominations of twenty dollars and under, \$160,960,000, of which \$109,060,000 consisted of silver certificates. Included in this amount were \$14,308,000 in one-dollar certificates and \$10,552,000 in two-dollar certificates. To October 1, 1888, there had been delivered \$29,764,000 in one-dollar certificates, and \$19,848,000 in two-dollar certificates. To the same date there had been presented to the Treasurer for redemption \$2,590,795 in one-dollar certificates, and \$1,302,659 in two-dollar certificates. The issue of these

certificates began two years ago and has continued steadily ever since. At that time the issue of one-dollar and two-dollar legal-tender notes had been suspended for more than a year, making a great void in the circulation of small notes. The new certificates went at once into very active circulation. Considering these facts, and the great quantity of the certificates in circulation, the amount redeemed is very small. The rate of redemption is much less than that of any former issue of small notes during a like period, and proves that the new certificates have withstood the wear and tear of circulation remarkably well.

EXPENDITURES.

The expenditures of the Bureau for the fiscal year were:

For salaries of officers and clerks and wages of employés other the	
For plate printing at piece rates, including the wages of plate-printe assistants, and for improved plate-printing machines and royalty. For materials and miscellaneous expenses	407, 912. 26

The appropriations for the support of the Bureau, including the additional appropriation of February 1, 1888, were \$964,030. Of this amount \$15,034.17 was not expended, but was returned to the Treasury. There were also large unexpended balances at the close of the fiscal years 1885 and 1886. The amount unused of the appropriation for the former year was \$73,021.30, and of that for the latter year \$182,785.37, making the total amount saved out of the appropriations for the last four years \$270,840.84.

The following statements show in a summary form the comparative production and expenditures of the Bureau for the three years ending June 30, 1885, and for the three years ending June 30, 1888:

THREE YEARS ENDING JUNE 30, 1885.

Fiscal year.	Number of sheets produced.	Expenditures.	Average cost per 1,000 sheets.	Average number of employés.	Average number of sheets per employé.
1883	33, 330, 746 30, 205, 899 28, 217, 706	\$1, 104, 986, 43 977, 301, 85 965, 195, 47	\$33. 15 32. 35 34. 21	1, 173 1, 193 1, 133	28, 415 25, 319 24, 905
Total	91, 754, 351	3,,047, 483. 75	33. 21	1, 166	26, 223
THREE	YEARS EN	oing June 3	0, 1888.		
1996	96 655 406	10769 907 94	mao 62	000	20.005

1886 1887 1888	32, 652, 207	`\$763, 207. 84 794, 477. 90 948, 995. 83	24, 33	886 840 895	30, 085 38, 872 42, 504
Total	97, 348, 687	2, 506, 681. 57	25, 75	874	37, 127

During the three years ending June 30, 1885, there were printed 91,754,351 sheets of securities, at a cost \$3,047,483.75. During the three years ending June 30, 1888, 97,348,687 sheets were produced, at a cost of \$2,506,681.57. There was, therefore, an increase in production of 5,594,336 sheets of securities, coupled with a decrease in expense of \$540,802.18. The average cost of each 1,000 sheets ran down from \$33.21 to \$25.75, and the average number of employes was reduced from 1,166 to 874. In 1883 the work turned out reached the highest

point attained in any year before the last. In that year 33,330,746 sheets of securities cost \$1,104,986.43. In 1888, 38,040,984 sheets cost \$948,995.83, an increase in production of 4,710,238 sheets and a decrease in cost of \$155,990.60. The expenses of the Bureau in 1888 were increased at least \$30,000 by the operation of the provision granting fifteen days' annual leave with pay to its employés, and the quantity of the more ex-

pensive securities printed was much greater than in 1883.

These results have been accomplished, not by any parsimony in the management of the Bureau, but by the adoption of simpler methods of doing business, the discharge of superfluous employés, the abolition of unnecessary places, and the exaction of greater diligence in the discharge of duty, and of a higher standard of qualification. At the same time the quality of the work has been improved; better provision has been made for the health and comfort of the employes; new and improved machinery has been introduced, and the quality of the materials maintained at the highest standard. The dressing rooms for the plateprinters and their assistants, which were formerly unfit for human occupancy, have been remodeled. They have been fitted up with separate lockers for the clothing of each employé and provided with ample lavatories, and the lighting and ventilation have been greatly improved, so that, instead of being the worst, they are now the best rooms for the purpose in the building. The incandescent electric lighting system has been introduced into the building and one thousand lamps so placed that every desk, machine, and press is abundantly lighted. There have also been purchased new machines for washing the inked rags and the blankets from the printers' presses, new and improved mills for grinding the dry colors used in making ink, and much other new and costly machinery.

During the same period, a just and orderly system of promotion has been adopted, and the employés as a rule have had more constant employment and better wages than ever before, while they have been free from the terror of arbitrary dismissal. The records show that 676 employés of the bureau, who served during the calendar year 1884, served also during the entire year 1887. Of these, 547, or 80.9 per cent. of the whole number, received a larger amount in wages in 1887 than in 1884, while there are only 36 whose compensation is now less than in that year. The aggregate earnings of these 676 employés increased from \$491,531.25 in 1884, to \$580,334.50 in 1885, the net increase being

\$88.803.25, or 18 per cent.

The method in which a large part of the economies in the management of the Bureau has been brought about is shown by a comparison of the amounts now paid for plate-printing and for other services with those paid for these two classes of services in former years. printing being paid for by the piece, its cost is the measure of the work The larger the proportion which the cost of plate printing bears to the cost of other services, the greater the economy of management. During the last fiscal year the amount spent for the wages of plateprinters and their assistants was \$380,599.53, and for salaries and wages of other employes \$369,189.50, the cost of the plate-printing exceeding that of the other services \$11,410.03. In 1885 the amount paid for other services was \$471,757.20, while the amount paid for plate-printing was only \$330,764.22, or \$140,992.98 less for plate printing than for other Comparing the two years, the amount paid for plate-printing has increased nearly \$50,000, while the amount paid for other services has been reduced more than \$102,000. This result has been brought about in the face of a lessening of the cost of plate printing by a reduction of the rates paid the printers and by the introduction of additional steam-power plate-printing presses.

APPROPRIATIONS AND ESTIMATES.

The appropriations for the support of the Bureau for the fiscal year 1889 were made in accordance with the revised estimates submitted to Congress. They amount to \$974,450, distributed under the various heads of appropriations, thus:

Salaries	\$17 A50
Salaries	370,000
Plate-printing	398,000
Materials and miscellaneous expenses	189,000
m + 3.1	054 450

In submitting the estimates for the fiscal year 1890, the same figures were adopted. The estimates of the number of sheets of securities to be printed in 1889 and 1890 compare as follows with the actual production in 1888:

Class of security.	Actual pro- duction in 1888.	Estimated production in 1889.	Estimated production in 1890.
United States notes, bonds, and certificates. National-bank notes Internal-revenue stamps Customs stamps Miscellaneous	1, 307, 547 25, 950, 988 420, 200	10, 518, 200 1, 000, 000 26, 017, 080 390, 000 1, 100, 950	7, 519, 700 1, 375, 000 32, 287, 000 395, 000 1, 145, 450
Total	38, 040, 984	39, 026, 230	42, 722, 150

The appropriations for 1889 and the estimates for 1890 are only \$10,420 greater than the appropriations for 1888, although the estimated increase in production over the actual production in 1888 is 985,246 sheets for 1889 and 4,681,166 sheets for 1890. It will be possible to print the larger number of sheets in 1890 with this slight increase in the appropriation, for the reason that there is a large decrease in the notes and certificates which have two plate printings, while the increase is mainly in the internal revenue stamps, which have but one plate printing. The estimated number of plate printings to be done in 1889 is 54,220,719, and in 1890 55,428,187.

The steam-power plate-printing presses have continued in successful operation during the year. The quality of their work has steadily improved, and it can now be said without qualification that all of it is equal to that done on the hand-presses. All the backs of the new silver certificates of the denominations of \$1, \$2, \$5, and \$10 have for many months been printed on them. For evidence of the quality of their work it is only necessary to inspect the backs of these certificates. In clearness, sharpness, and uniformity of impression and all the qualities which tend to prevent successful counterfeiting, they are up to the highest standard.

The steam-presses are now printing much more than one third of the work of the Bureau with a great economy of room, labor, and expense. The cost of the printing done by them is less than \$80,000. To print the same work by hand would cost \$180,000, or \$100,000 a year more. There has also been in use for many years a number of steam-power typographic presses, on which are printed, from steel dies, the tints on many varieties of internal-revenue stamps and the seals on United States notes, silver

certificates, and national bank notes. To replace all the steam-power printing-presses with hand-roller plate-printing presses would add nearly \$300,000 to the annual expenses of the Bureau, and would make it necessary to enlarge the building occupied by the Bureau in order to provide room in which to do the work.

THE FORCE EMPLOYED.

The great increase in work during the last year made necessary some increase in the force. The number of employés on the rolls on June 30, 1887, was 841. The number employed on June 30, 1888, was 917—a net increase during the year of 76. One hundred persons left the service during the year. Of these, 6 died, 25 were discharged for misconduct, inefficiency, or protracted absence, and 69 voluntarily resigned. One hundred and seventy-six persons were taken into the service, of whom 21 were former employés recalled to the service and 19 were employed in the place of relatives, most of whom had resigned on account of ill health.

By the Executive order of June 29, 1888, extending the civil-service classification, all of the employés of the Bureau except the charwomen, the watchmen, and the lowest grade of male laborers were brought within the classified civil service. By a subsequent order engravers and plate-printers were exempted from examination, though remaining in the classified service. With these exceptions the entire force of the Bureau is now under the civil-service rules and vacancies in it can be filled only by the persons standing highest in competitive examinations and certified for appointment by the Civil Service Commission. It has not yet been necessary to hold any examination of candidates for appointment in this Bureau, but it is not doubted that a simple examination can be devised which will test both the mental and the physical qualifications required. The first and most striking effect of the order was to put a stop to the importunity for employment, which had become an intolerable annoyance and a serious hindrance to the proper performance of the public business.

I have the honor to be, with great respect, your obedient servant, EDWARD O. GRAVES,

Chief of Bureau.

Hon. CHARLES S. FAIRCHILD, Secretary of the Treasury. APPENDIX.

MISCELLANEOUS WORK.
Official letters written
Letters received, briefed, and referred
Bonds, contracts, and powers of attorney examined, approved, registered, and filed
Certificates of deposit examined, indorsed, and referred
Internal-revenue stamp-books counted and certified
Internal-revenue tax-list receipts registered, scheduled, and referred
Internal revenue collectors' special allowances examined, recorded, and referred
Copies of reports on accounts made and transmitted
Bonds of indemnity examined and approved
Accounts received and registered
Accounts indexed 30, 88
Warrants examined and checked on registers of accounts

The foregoing statement omits mention of a very large amount of official work entirely of a legal nature, and more especially requiring the personal consideration of the Comptroller, which does not admit of systematic classification and detailed report, and yet has occupied much time and care, such as, e.g., the investigation of and decision upon legal points arising in the adjustment of accounts; the examination of and decision upon applications for the issuing of duplicates in lieu of bonds and other securities lost or destroyed, and also for the transfer of the same; the examination of powers of attorney for the collection of money due to creditors of the United States; decisions upon the rights of persons claiming to be executors, administrators, or heirs of deceased claimants, to receive money due from the United States; the examination of official bonds; answering calls for information made by Congress, the Departments, and private persons; receiving and examining emolument returns, and other work of a miscellaneous character.

COMPENSATION OF COMMISSIONERS OF CIRCUIT COURTS, DISTRICT ATTORNEYS, MARSHALS, AND CLERKS.

I call your attention 'again to the compensation of commissioners of

circuit courts, district attorneys, marshals, and clerks.

From what I have observed in the examination of the accounts of commissioners I am satisfied that their compensation is out of proportion to the amount of service which they render. They are simply examining, bailing, and committing magistrates; and I find that in some cases their fees are as much as or more than \$5,000 a year. This arises from the practice in which they indulge of requiring all warrants which they issue for the arrest of supposed violators of law to be returnable before them, by which they make very large fees, and the Government is put to great additional expense in the transportation of the accused parties for long distances, as well as the mileage of witnesses who may be summoned to testify against them, that the trial may take place before them—while there may be a commissioner living in the immediate neighborhood of the parties arrested. I have recommended that a law be passed, requiring all commissioners when issuing warrants to make them returnable before themselves or before some other commissioner, and that the marshal should be required to return said warrant before

the commissioner living nearest to where the party may be arrested, and where it would be most convenient for the witnesses to attend. I am glad to state that Congress has taken hold of this matter, and that in the sundry civil bill, which has been virtually passed, it has been provided for, for the present year, and that Congress has even gone further, and enacted what will lessen, in my opinion, the number of frivolous cases instituted by commissioners and others, that no warrant shall be issued by a commissioner unless upon the affidavit of some person having personal knowledge of the particular charge made against the person named therein. This should be enacted into a general law.

I have discovered, also, in the settlement of the accounts of district attorneys, marshals, and clerks, who are paid by fees, with the exception of a small amount paid to district attorneys as salary, a great disposition on the part of many of them to charge illegal fees in order to obtain the maximum allowed by law, and to resort to very questionable practices for that purpose; but I am of the opinion that the whole fee system should be abolished, and fair and reasonable salaries given to such officers as are now paid by fees, with the exception of commissioners, and that there should be a limit to the amount of fees which these last named officers are permitted to retain for their services.

I have observed that, in the last two or three Congresses, bills have been introduced into the House providing for the payment of fixed salaries rather than fees, but up to the present time none has been passed. I consider that the interests of the public service would be greatly subserved by the passage of such a bill, abolishing the fee system and giving fair and reasonable compensation for the services rendered. I hope you will adopt the above suggestions and recommend the same favorably to Congress.

STATUTES OF LIMITATIONS AS TO CLAIMS FOR AND AGAINST THE GOVERNMENT.

I am very glad to see that Congress has lately passed an act with the following title:

An act requiring notice of deficiency in accounts of principals to be given to sureties upon bonds of United States officials, and fixing a limitation of time within which suits shall be brought against said parties upon said bonds.

The purport of said act is, that, after the settlement by the accounting officers of the Treasury of an account of an official of the United States, or an officer disbursing and chargeable with public moneys, if it shall thereby appear that he is indebted to the United States, suit shall be instituted upon the bond within five years or the sureties of said

party shall not be liable thereon.

This is certainly a wise and wholesome provision, as well as just towards sureties upon official bonds; but it is my judgment that this should be supplemented by a general statute of limitations embracing claims that may be presented against the United States, reserving the rights of persons who may be under some legal disability. I have, in my former reports, called attention to this subject, showing the propriety of having a general statute of limitations against old and stale claims against the Government, because, by reason of the lapse of time and the difficulty of obtaining evidence upon which to base any decision, the Government would be at a disadvantage and liable to suffer loss. It is true that there are certain special statutes of limitations, but there are none of a general character.

Should such a statute be passed by Congress, it should take effect some time in the future. The wisdom of such a Federal statute is evidenced by the fact that, in every State in the Union, there is a general statute law limiting the time within which suits may be instituted for and against the respective States.

It gives me great pleasure to say that the officers and employés of this Bureau have discharged their respective duties with promptness and fidelity, by reason of which the back work which had accumulated some years since has been disposed of, and the current work at the same time done, so that were no new business to be received, what is now in the office could be completed within fifteen days, excepting, perhaps, those cases which would be held up for the purpose of receiving explanations to items which might for some cause be suspended.

I have the honor to be, very respectfully,

M. J. DURHAM, Comptroller.

Hon. C. S. FAIRCHILD, Secretary of the Treasury.

REPORT OF THE SECOND COMPTROLLER.

TREASURY DEPARTMENT, SECOND COMPTROLLER'S OFFICE, Washington, D. C., October 31, 1888.

SIR: In compliance with your request of July 20 last, I have the honor to lay before you a report of the transactions of this office during the past fiscal year and of the present condition of the public business intrusted to my charge.

The Second Comptroller examines and finally settles all accounts and claims reported by the Second, Third, and Fourth Auditors of the

The following is a summary statement of the work performed in the office during the fiscal year ended June 30, 1888, in tabular form, with comparative statement showing the work of like character in the preceding fiscal year:

Total number of accounts, claims, and cases settled.

70	1988.		1887.	
From-	Number.	Amount.	Number.	Amount.
Second Auditor Third Auditor Fourth Auditor Various sources	15, 182 3, 032	\$37, 035, 089 112, 268, 656 18, 579, 631 29, 102	28, 255 14, 765 2, 626 5, 356	\$47, 265, 256 102, 096, 136 18, 079, 911 23, 468
Grand total	51, 467	167, 912, 478	51, 002	167, 464, 773

The average number of Clerks employed during the fiscal year 1887 was 62; during the past fiscal year, 56. The actual number on the rolls each year was 67 in 1887, and 59 in 1888, showing a reduction of 8 in the latter year. The number employed in 1887 was 12 less than in 1886.

The work of the office is distributed among seven divisions, known as the Army Back-Pay and Bounty Division, employing 12 clerks; Army Paymasters' Division, 5 clerks; Army Pension Division, 7 clerks; Quartermasters' Division, 7 clerks; Navy Division, 3 clerks; Indian Division, 4 clerks; Miscellaneous Division, 5 clerks; with a chief in charge of each division. There are, besides, 2 requisition clerks, a register, and a stenographer, and 4 clerks employed on the Soldiers' Home roll, making the total clerical force, including chiefs of division, at the present time, 58. There is one vacancy in the office.

The following is a detailed statement of the accounts and claims revised and settled during the year in each division, with a general statement of their character:

ARMY BACK-PAY AND BOUNTY DIVISION.

Character of the claims.	Number.	Amount allowed.
Soldiers' pay and bounty allowed	7, 437 11, 417	\$882, 202
Total	18, 854	882, 202

On July 1, 1888, there were on hand and unadjusted 1,011 claims, estimated to be twenty-two days' work of the division.

ARMY PAYMASTERS' DIVISION.

Character of the accounts.	Number.	Amount allowed.
Army Paymasters, for pay of the Army. Soldiers' Home accounts. Special Army accounts Duplicate checks approved.	213	310, 863 29, 102
Total	1, 888	27, 737, 127

On July 1, 1888, there remained in this division, unadjusted, 84 Army Paymasters' accounts, 7 Soldiers' Home accounts, and 6 special Army accounts; in all, 97 accounts, or fifteen days' work of the division.

ARMY PENSION DIVISION.

Character of the accounts.	Number.	Amount allowed.
Accounts of Pension Agents for Army pensions Pension re-imbursement claims allowed Pension re-imbursement claims disallowed.	643 2, 284 93	\$77, 046, 281 131, 025
Total	3, 020	77, 177, 306

On July 1, 1888, there were awaiting adjustment 14 Pension Agents' accounts, and 6 re-imbursement claims, comprising about fifty-two days' work of the division. Of these accounts and claims undergoing examination, but seven were filed in the office earlier than June 25, 1888.

QUARTERMASTERS' DIVISION.

Character of the accounts.	Number.	Amount allowed.
Disbursing officers of the Quartermaster's Department, for regular and incidental expenses. Disbursing officers of the Subsistence Department Disbursing officers of the Engineer Department, for military surveys, fortifications, river and harbor improvements, etc Disbursing officers of the Signal Service.	1, 321 830 155 83	\$15, 526, 852 3, 001, 489 10, 097, 149 954, 628
Total	2, 389	29, 580, 118

On July 1, 1888, there remained in this division, awaiting examination, 12 Engineers' accounts, 15 Quartermasters' accounts, 5 subsistence accounts, and 4 Signal Service accounts, estimated to be equivalent to the work of the division for nine days.

NAVY DIVISION.

Character of the accounts.	Number.	Amount allowed.
Paymasters of the Navy at navy yards and Navy agents Disbursing officers of the Marine Corps Navy Pension Agents for Navy and Marine Corps Miscellaneous naval accounts Navy financial agents Officers' and sailors' back-pay, bounty, and prize money allowed Officers' and sailors' back-pay, bounty, and prize money disallowed Total	16 48 1, 254	\$16, 145, 712 700, 293 1, 201, 757 92, 639 22, 236 417, 054

On July 1, 1888, there were in this division, unadjusted, 6 Navy Paymasters' accounts, 1 Navy pension account, 1 Marine Corps account, 1 miscellaneous account, and 44 back-pay and bounty claims, not exceeding eight days' work of the division.

INDIAN DIVISION.

Character of the accounts.	Number.	Amount allowed.
Indian Agents' current and contingent expenses, annuities, and installments Miscellaneous Indian claims		\$1, 561, 191 3, 878, 429
Total	2, 958	5, 439, 620

On July 1, 1888, there were awaiting examination in this division 12 Indian Agents' accounts and 18 miscellaneous Indian claims, estimated to be five days' work of the division.

MISCELLANEOUS DIVISION.

Character of the accounts.	Number.	Amount.
Second Auditor.		
Disbursing officers of the Ordnance Department, for ordnance, ordnance stores, supplies, armories, and arsenals. Recruiting officers, for regular recruiting service. Disbursing officers of the Medical Department, for medical and hospital supplies and services. There is a great deal of work in the Second Comptroller's Office of a complex and onerous character, especially in the Miscellaneous Division, which can not be classified nor set forth in tabular statements.

SUITS BROUGHT.

Transcripts and briefs have been made up, examined, and forwarded to the Solicitor of the Treasury for suit in favor of the United States in 20 cases during the year, as follows:

Army Paymasters	1
Navy	
Miscellaneous	9

Suits were instituted in all of the 20 cases, of which 15 are still pending, and a recovery has been had in 5, resulting in the payment into the Treasury of \$163.22. There was also recovered and paid into the Treasury from suits begun in previous years the additional sum of \$18,628.66.

OFFICE LIBRARY.

Three years ago, the library of the office was re-arranged and re-catalogued. It comprises 1,456 volumes, 455 of which are in the Comptroller's room, and the remainder distributed throughout the rooms of the seven divisions in the office. The law library is, in the main, well selected, and made up of standard elementary works, digests, and Federal reports. The sets of United States circuit and district court reports are very badly broken, and should be filled up.

PUBLIC PROPERTY.

Since my last annual report, inventories of all public property in the office have been made, December 31, 1887, and February 8, 1888, to the Secretary of the Treasury, and filed with the Chief Clerk of the Department. A strict account has been kept of everything received and used in the office.

REDUCTIONS.

With the reduction of eight clerks, as shown in my report for the fiscal year 1887, the work of the office has been kept up, and was in fully as good condition on the 30th of June, 1888, as at the close of the previous fiscal year.

CHANGES IN THE METHODS OF BUSINESS.

During the past year, various changes have been made in the detail and course of work in the office, tending to expedite the conduct of the business and simplify the methods of procedure without jeopardizing

the safety of the Government's interests.

For some time past, Army back-pay and bounty claims have been paid directly by an Army Paymaster, and claims arising in the Navy by a disbursing officer of the Navy, thus avoiding the drawing of a separate requisition in each case upon the Treasury, and the great outlay of time and clerical force consequent thereto. Following this plan, it has been arranged between the War Department and this office that claims for horses lost in the military service be paid direct on the Comptroller's certificate by the Post Quartermaster, and Fourth-of-July claims be paid in like manner by the office of the Commissary-General of Subsistence, instead of by a separate requisition issuing in each case.

It is hoped that this same plan may be adopted by an arrangement with the Interior Department in order that claims in the Indian service and claims for expenses of last sickness and burial in the pension service may be paid by disbursing officers of those respective services upon the certificate of this office without the formality of a separate requisition in each case. In the latter class of cases it would seem perfectly feasible that the claim for expenses of last sickness and burial of the pensioner should be paid upon the certificate of the Second Comptroller by that pension agency which paid the pensioner in his lifetime. In claims coming through the Indian Bureau, however, it might become necessary to create a bonded disbursing officer for this purpose. As now in the case of the Paymaster, Quartermaster, or Commissary of Subsistence, so with the Indian disbursing officer or the Pension Agent,

the certificate upon which payment has been made would be included in his account finally revised by this office. Most undoubtedly much time can be saved by this method of disposing of the payment of thousands of claims.

EXAMINATION OF CONTRACTS.

As soon as they come to this office for file, contracts and bonds are critically examined to discover whether or not they are proper and valid in form. As the same examination must be made when the accounts or claims involving these contracts are finally examined here, it is thought, in justice to contractors, as well as to the officers of the Government making the contracts or disbursing money thereunder, that the form should be passed upon by this office at as early a time as possible.

BOOK-KEEPING.

The books of the office recording the accounts of disbursing officers have been so far simplified as to give the outlines and essential features of the account without reproducing the details. Enough is kept to show the general condition of the account and the final balances, but as the Auditors place upon their books a reproduction of disbursing officers' accounts, it is thought to be unnecessary to have these details entered over again in this office.

CONCENTRATION OF THE ACCOUNTING OFFICES.

There is one change that should be made to really improve and expedite the public business. The work of the Second, Third, and Fourth Auditors is reviewed and finally settled by the Second Comptroller. After an account or claim has been passed upon here, it is returned to the Auditor from whom it was reported, for file and preservation. Thousands of calls are made yearly by the Comptroller upon the Auditors for papers filed with them, and by the Auditors upon the Comptroller. for the temporary return of papers under examination in the Comptroller's Office. Naturally it would seem that these four offices should be in the same immediate neighborhood. While the Third and Fourth Auditors are in the same building (the Treasury) with the Second Comptroller, the Second Auditor is in the Winder Building, a very considerable distance from the Second Comptroller's Office. Every day, in the examination of claims, particularly claims of soldiers for back pay and bounty, in either the Comptroller's or the Second Auditor's Office, frequent requests are made by the one office upon the other for papers The time lost in making and answering these demands for transmission of papers is very great, and the damage done to the original rolls in the transmission can well be appreciated. The time saved and the damage or loss avoided would be most noticeable, if the Second Auditor and Comptroller were in the same building.

I would therefore suggest that you take such steps as will bring the offices of the Second, Third, and Fourth Auditors and the Second Comptroller in the closest proximity, and, if possible, under the same roof. The gains to the public resulting therefrom will more than counterbalance the expense of making the change. Should the offices of the Third and Fourth Auditors and the Second Comptroller be moved to the vicinity of the Second Auditor's office, all four offices would then be close to the War and Navy Departments. The revision of Army and Navy accounts and claims constitute, with the exception of Indian

and pension business, the entire work of this office. Such a plan would be, therefore, of immense convenience, both to those two Departments and to the Accounting Officers, and public business would be expedited to a very appreciable extent. The Sixth Auditor, who settles Post-Office accounts, is across the street from the Post-Office Department. Why should not the offices settling Army and Navy accounts be in the immediate neighborhood of the military departments?

SUITS BROUGHT BY THE GOVERNMENT.

I have given considerable attention to the records of suits brought by the Government against individuals at the suggestion and upon the findings of the Comptroller. The number of the suits apparently pending is so great, and the duration of the pendency of proceedings has been in many instances so prolonged, as to lead me to search further into the subject. When the inquiry is completed, I will make a supplementary report thereon.

STATUTE OF LIMITATIONS.

Again I beg to call your attention to a statute of limitations, to which I referred in my last annual report. I believe that some legislation should be had barring stale claims of individuals, or equally stale counter-claims of the Government. Congress has lately passed a law giving time relief to sureties on bonds: one step toward the relief asked.

OFFICE APPROPRIATIONS.

The appropriations for the salaries of the officers and employés of the office, for the fiscal years ending, respectively, June 30, 1885, 1886, 1887, and 1888, and the amounts remaining unexpended at the close of each of said years, were:

Years.	Appropriated.	Unex- pended.
1885.	\$119, 120	\$1, 257. 23
1886.	118, 100	3, 918. 00
1887.	105, 820	2, 333. 67
1888.	95, 020	2, 318. 35

The appropriations for the current fiscal year (1889) are the same as for last year, \$95,020.

Very respectfully,

SIGOURNEY BUTLER, Comptroller.

Hon. Charles S. Fairchild, Secretary of the Treasury.

REPORT OF THE COMMISSIONER OF CUSTOMS.

TREASURY DEPARTMENT, OFFICE OF COMMISSIONER OF CUSTOMS, Washington City, D. C., October 11, 1888.

SIR: I have the honor to submit herewith for your information a statement of the business of this office for the fiscal year ending June 30, 1888.

Auditor's statements on hand July 1, 1887	183 6, 058	
Auditor's statements examined and passed	6, 047 11	6,058
Auditor's statements on hand June 30, 1888		. 183
Accounts on hand July 1, 1887	15, 206	15, 683
Accounts returned to Auditor	33	15, 239
Accounts on hand June 30, 1888		444
Estimates received and examined Requisitions issued Amount involved in requisitions Letters received Letters written Letters recorded Stubs of receipts for duties and fees returned by collectors Stubs examined and summarized Tonnage stubs received and entered Tonnage stubs examined Auditor's reports registered Auditor's reports recorded Auditor's reports checked by statements Appointments registered Oaths examined and registered Official bonds examined and approved Commissions transmitted Papers filed, noted, or referred Average number of clerks employed. 550		28, 224 10, 871 9, 638 205, 762 13, 226 13, 355 6, 041 6, 111 2, 716 5, 774 2, 581 31

There was paid into the Treasury from sources the accounts relating to which are settled in this office:

Customs (duties)	\$218, 599, 867, 37
Customs (tonnage)	491, 205, 74
Customs (unclaimed merchandise)	100.52
Storage tees etc	697,641.92
Immigrant fund	291, 189. 50
Immigrant fund Fines, penalties, and forfeitures Emolument fees	157, 116.77
Emolument fees	242,689.51
Steam-boat lees	10.00
Marine Hospital fund and relief of sick and disabled seamen	3, 019. 26
Mileage of examiners	4, 997. 79
Rent of public buildings	1,084.62
Deceased passengers	1,070.00
Proceeds of Government property	17, 700. 19
Total	220, 507, 693, 19
(A = 3 t) (3t) - C t) - T	
And there was paid out of the Treasury on the following	
Expenses of collecting the revenue from customs	\$7, 156, 187. 77
Debentures	3, 341, 916. 79
Excess of deposits	4,505,404.83
Construction and maintenance of lights	2, 582, 378, 51
Construction and maintenance of public buildings	
Construction and maintenance of revenue-cutters	
Life-Saving Service	978, 622. 11
Marine Hospital Service	529, 627, 43
Expenses of regulating immigration	159, 836. 10
Salaries, snipping service	54, 370. 14
Compensation in lieu of moieties Protection of sea-otter hunting grounds in Alaska	13, 264, 36
Protection of sea-otter nunting grounds in Alaska	. 20,000.00
Services to American vessels	23, 405. 51
Salaries and expenses of agents at seal fisheries in Alaska	10, 184. 52
Quarantine stations for neat cattle	10, 639. 44
Refunding penalties or charges erroneously exacted	417.47
Extra pay to officers and men who served in the Mexican war	
	20, 133, 17
Detection and prevention of frauds upon the customs revenue	
Expenses of local appraisers at quarterly meetings	2,000.00 122.57
Proceeds of goods seized and sold	100.00
Removal of quarautine station from Ship Island, Miss	12,500.00
Relief of William J. Smith.	2,004.99
Relief of James B. Mitchell	438.00
Refund to Antoni Salazar	132.94
Refund to Thomas Thomas	
Refund to James Hart & Co	
Payment to J. H. Ayres.	
Doduct renounced.	20, 359, 894. 81
Deduct repayments:	
Building revenue steamers \$114.14 Relief of certain employés of the Twelfth light-house dis-	
trict	•
54), 54	439.66
Total	20, 359, 455. 15

The business of this office has been conducted during the last fiscal year with such order and smoothness as to require but little comment. Much of this is owing, undoubtedly, to the long experience, close attention, peculiar aptitude, and regular habits of the Deputy Commissioner, ably assisted as he has been by the two chiefs of division. The clerks have generally been attentive and faithful to their duties. Some of them merit special commendation for their very correct work and regu-

lar attention to duty. These have been found at all times during office hours at their desks and have shown a disposition to improve continually. They have been prompt and courteous in the performance of their ordinary duties or such extra work as may have been required.

The reports from the First Auditor's Office have been transmitted with regularity and have manifested thoroughness of examinations made in that office. Upon careful re-examinations made in this office of the accounts and claims, but few alterations and changes in the balances stated by the First Auditor have been found necessary. The accounts of the collectors of customs have been, in the main, rendered promptly by them, and so well stated that the differences in settlements have been few in comparison with the great number of the accounts, and mostly of very small amounts arising from errors in calculation.

Delays arise at times in the settlements of accounts for claims from the defective manner in which the evidence of them is prepared and forwarded to the Department, and also in accounts of disbursements, by reason of the authority under which the disbursements are made not being clearly stated or apparently insufficient. In such case delays are unavoidably occasioned by requests for further or more formal

evidence or pertinent explanations.

From observation I am of the opinion that the few delays that occur in the settlement of just claims arise mostly from defects in the proofs which accompany the claims. The papers in every case should contain such a statement and evidence, with a memorandum of reference, when necessary, to the special statute or Department order relied upon for payment, as to present the facts clearly, leaving nothing to be determined except the computation and the application of the facts to the law. The case being thus stated, the adjustment of it becomes easier and more expeditious, and the verification of it at any time can be made readily by an inspection of the papers on file.

BACK PAY OF INSPECTORS.

During the last fiscal year many claims for back pay due inspectors of customs for services in former years have been settled and paid from the appropriation made for that purpose. It is believed that the bulk of these claims has now been disposed of. A few of doubtful character, either from defect of evidence or questionable merit, remain for final

adjustment.

These claims originated under a practice of the Department authorizing the employment of inspectors of customs at a less rate than \$3 per day. Many inspectors, subsequent to the date when the Revised Statutes took effect in 1874, were employed at less rates. And although the persons so employed receipted for the lesser amounts in full and tacitly accepted the appointments with the understanding that the compensation was to be at the rates fixed by the Department, yet the Court of Claims, in the test cases of Adams vs. The United States and Bradford vs. The United States (20 Court of Claims Rep., 115), decided that they must be paid the full compensation of \$3 per day, as fixed by the statute.

These claims accrued between the 22d day of June, 1874, when the Revised Statutes took effect, and March 3, 1881, when the act was passed allowing the Secretary of the Treasury to appoint inspectors of customs at a compensation less than \$3 per day.

A FIXED SALARY FOR CUSTOMS OFFICERS.

I refer again to the recommendations and suggestions made in my former reports. Some of them may not be of sufficient consequence to require further consideration, but I beg leave to mention one that seems to me worthy of continued attention. It is the payment of fixed salaries to the officers of the customs in all cases. By paying fixed salaries to these officers, as well as to all other officers of the Government, the general system of the laws for the collection and disbursement of the revenue would be made more perfect without injury to any one, and with manifest benefit to the service.

This office has perhaps a special interest in such amendment of the present laws in force relating to the compensation of officers of the customs, inasmuch as the emolument accounts, which are difficult of adjustment and complicated with other accounts, would by the change sug-

gested be not thereafter required.

SLIGHT INCREASE OF CLERICAL COMPENSATION RECOMMENDED.

The clerical force of this office is not large, but is sufficient, and not more than sufficient, for the work required of it. I think it would add to its efficiency by making another clerk of class four, and reducing by one the number of clerks of class one. This would excite emulation, among the clerks, as the worthiest would have more prospect of promotion, and besides, there appears to be a necessity for an increase of the clerks of the higher grades in this office.

There is only an assistant messenger allowed by law to this office. Itwould seem from the labor and responsibility of the position that this

should be changed to messenger, and I so recommend.

STATEMENTS APPENDED.

In conclusion, I inclose herewith the statements (A) of transactions in bonded goods, as shown by the adjusted accounts; (B) of duties collected on unclaimed merchandise entered and sold.

I am, very respectfully, your obedient servant,

JOHN S. MCCALMONT, Commissioner of Customs.

The SECRETARY OF THE TREASURY.

APPENDIX.

Table A.—Statement of Warehouse Transactions at the Several Districts and Ports in the United States for the fiscal Year ending June 30, 1888.

		*

The foregoing tabulated exhibits reveal the work of this office as

nearly as can be told in figures.

The total amount covering receipts and disbursements reached during the fiscal year \$1,931,906,998.31. But to the labor employed in the settlement of the accounts, representing this great amount of money, and which can not, of course, be tabulated with the total amount representing disbursements and receipts, must be charged the large number of judiciary and emolument returns registered and referred, the thousands of letters written and acknowledged, the great number of requisitions answered, and powers of attorneys examined, entered, and referred, and bond and warehouse accounts audited.

It is by no means the case that the greatest amount of money covered by an account represents the greatest amount of labor in the examination of the same; and I have, with good results, strenuously endeavored to impress upon my subordinates the duty of a thoroughly careful examination of all matters requiring audit at their hands, and in every

case a strict adherence to the law governing in the premises.

In my last report I was enabled to congratulate the office upon the fact "that every desk in the several divisions had been cleared of all delayed work." As then it is now, and nothing is in the way of a prompt and speedy settlement of all current business. At the same time, by comparing the work of the three years immediately preceding and the three years immediately succeeding 1885, it will be seen that an average decrease of the cost of the office on the basis of the work done amounts to nearly 11 per cent.

I have the honor to renew the suggestions in my letter to you of June 14 last, that all the fees of United States attorneys, clerks, and marshals be paid out of the respective annual appropriations for the fees of such officers, so that they may all pass through the same accounting

offices.

That letter was referred by you to the Attorney-General for his opinion as to whether the change suggested could be made by departmental direction. Acting Attorney General Jenks, by his letter to you of date August 14, gave it as his opinion, in substance, that under the existing statutes defining the powers and duties of the several accounting officers, and the contemporaneous and continuous construction given to them by the Departments, it had become so well settled that some of the fees of such officers were not payable out of the appropriations for their fees, but out of specific appropriations for the expense incurred in particular objects, such as collecting the revenue from customs, collecting postal or internal revenue, or erecting public buildings, that it was beyond the power of the Departments to now change the rule.

Accepting this opinion, legislation will be necessary to consolidate these fees into one appropriation. This legislation can be more certainly and speedily effected by incorporating it in the sundry civil appropriation bill, and I suggest that in the appropriation for the next fiscal year and thereafter, annually, the paragraphs relating to the fees

of these officers be amended, respectively, as follows:

After the words "For payment of the fees and expenses of United States marshals and deputies" insert the words "for all services ren-

dered the United States."

After the words "For payment of United States district attorneys, the same being for payment of the regular fees provided by law for official services," insert the words "in all cases in which the United States is a party or interested."

After the words "For payment of district attorneys, the same being for payment of such special compensation as may be fixed by the Attorney-General," insert the words "or Secretary of the Treasury," and insert the word "all" before "services," or add an additional paragraph, "for special compensation allowed by the Secretary of the Treasury."

After the words "For fees of clerks," add the words "for all services

rendered the United States."

The reason, in brief, given in my former letter for these changes are that they will reduce the number of separate accounts now required to be stated and enable the accounting officers to ascertain with exactness the total emoluments received from the United States by these officers, which is now practically impossible, owing to the diffusion of the fees through so many different channels.

If these changes meet your approval, estimates can be made as to the necessary addition and reduction in the various appropriations to be

affected thereby.

As the matter particularly concerns the work of my office I beg leave respectfully to join the honorable the First Comptroller in his request that, in your annual report to Congress, you favor the abolition of the fee system as relates to United States attorneys, marshals, and clerks, and, instead thereof, recommend the adoption of just and reasonable salaries.

This would greatly facilitate and simplify the settlement of the accounts of these officers, and, in the end, redound to their advantage

and that of the Government.

It is with much pleasure I commend to your favorable consideration the Hon. E. P. Baldwin, the Deputy Auditor, and generally the chiefs, clerks, and other employés, who have, with faithful and intelligent labor enabled me to conduct the important business of the office over which I have, with your approval, the honor to preside.

Respectfully submitted.

JAS. Q. CHENOWETH,

Auditor.

Hon. C. S. FAIRCHILD, Secretary of the Treasury.

REPORT OF THE SECOND AUDITOR.

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, Washington, October 20, 1888.

SIR: As required by law and Department instructions, I have the honor to submit the following report showing the work performed by this office during the fiscal year 1888, the condition of business at the close of said year, and the application of moneys appropriated for the Indian service, and for certain branches of the military service, namely: The office of the Commanding General, the Adjutant-General's Department, the Medical Department, the Pay Department, the Ordnance Department, Army contingencies, etc.

BOOK-KEEPERS' DIVISION.

The amounts drawn from the Treasury on requisitions of the Secretary of War and Secretary of the Interior, together with repayments of unexpended balances and the aggregate balances remaining in the Treasury on June 30, 1888, are shown by the subjoined tabular statements:

The service records of 126 officers have been corrected, under the acts of June 18, 1878, and February 24, 1881, and the above mentioned de-

cisions of the Supreme Court.

The record of deposits by enlisted men, under the act of May 15, 1872, shows that 8,042 deposits were made since last report, amounting to \$426,455.13, and that 17,760 deposits, amounting to \$1,009,385.36, have been withdrawn, upon which the depositors received \$84,912.62 interest.

The amount involved in 936 paymasters' accounts, 5 longevity claims, and 115 miscellaneous settlements, was \$25,969,404.90, as follows:

554. 32 62. 50	Amount disbursed by paymasters, as per audited accounts

corded in the permanent register of payments	53,030
Miscellaneous claims disallowed	71
Number of letters written	9,146
Number of payments reported for use of clerks auditing claims of	
officers for arrears of pay, etc	25,227
Number of vouchers in accounts examined	23,814

The foregoing report, as compared with last year's record, shows a decrease of \$421,291.62 in the amount of disbursements allowed, and an increase in each item of work performed.

INDIAN DIVISION.

	Money accounts.	Property accounts.	Claims.
On hand July 1, 1887. Received during year.	262 916	194 667	17 3, 545
Total		861 498	3, 562 3, 492
On hand June 30, 1888	338	363	70

The disbursements allowed in settlement of accounts of Indian agents, inspectors, and other disbursing officers of the Indian service amounted to \$1,685,030.81, and there was certified as due contractors and other claimants for services and supplies the sum of \$3,898,455.33, making the total disbursements \$5,583,486.14.

There have been furnished the Second Comptroller, to be forwarded to the Solicitor of the Treasury for suit, eight transcripts of accounts, involving the sum of \$15,218.13, mostly consisting of items suspended or disallowed in settlement by reason of infractions of law or regulations.

The term "accounts" used in the above tabular statement includes not only the regular quarterly accounts of disbursing officers, but also the sets of explanations made by them in answer to objections raised by the Commissioner of Indian Affairs and the accounting officers. The status of accounts on hand is as follows:

•	Ca	sh.	Property.		
	Quarterly accounts.	Explana- tions.	Quarterly accounts.	Explana- tions.	Total.
Under examination	28	26	25	24	103
Returned to Indian Office	162	121	190	124	59 7
Total	190	′ 148	215	148	701

There are in the Indian service 60 agents, 5 special agents, 5 inspectors, 1 school superintendent, 12 superintendents of schools, and 40 officers of miscellaneous character, including persons temporarily appointed to make disbursements in connection with allotment of lands in severalty, investigating depredation claims, etc., making in all 123 bonded officers, of whom more than 80 render property returns as well as cash accounts.

It will therefore be seen that the accounts and returns not acted upon, exclusive of explanations, average less than 2 of the former and 3 of the latter per capita. Compared with last year's report there has been an increase of 4 in the number of cash accounts audited, and a decrease of 38 in the number of property returns and 333 in the number of claims disposed of; but as the working force was one-fourth less than formerly, and as the labor involved in the adjustment of claims has been largely increased, the exhibit is not altogether unsatisfactory. The number of contracts for Indian goods and supplies, transportation services, etc., filed during the fiscal year 1888 was 475, which is greatly in excess of any previous year. The consequent increase in the number of bills of lading, returns, etc., which have to be recorded and examined in connection with the settlement of claims has already added about 30 per cent. to the labor involved, and necessitated the employment of a larger portion of the force than usual on this kind of work; otherwise the accounts of disbursing officers would have been brought quite up to date.

The seventy claims on hand are thus accounted for:

Waiting additional evidence which has been called for	38
Western Union Telegraph claims awaiting legal decision as to charges for service on lines along the subsidized Pacific railways	23

Total	368	8, 450	7, 895	233	37	653

The amount involved in 7,895 claims, audited and allowed, was \$930,732.03. Number of letters written, 174,488. Number of vouchers examined, 437,761.

The accounts of 12,178 soldiers of the regular Army who deserted between April 13, 1861, and December 31, 1880, have been examined, and the sum of \$205,616.33 found due the Soldiers' Home under section 4818 Revised Statutes.

DIVISION FOR THE INVESTIGATION OF FRAUD.

The number of cases remaining on hand June 30, 1887, was 5,413. Since then 990 new cases have been referred to this division, and 3,106 finally disposed of, leaving 3,297 on hand, June 30, 1888, of the following classes:

White soldiers:	
Settled claims	120
Unsettled claims	58
Colored soldiers:	•
Settled claims	2,433
Unsettled claims	682
Officers' cases	4

Fourteen cases were prepared for the Department of Justice and eleven for the secret-service division of the Treasury Department. Abstracts of testimony were prepared in 190 cases, and 4,266 letters written. The amount recovered in money and judgments was \$2,300.23.

Compared with the report for the fiscal year 1887 the above statement shows an increase of 390 in the number of cases referred to this division for investigation, and of 1,316 in the number finally disposed of.

PROPERTY DIVISION.

Quarterly returns of clothing, camp and garrison equipage on hand July 1, 1887.	
Total	6,256 3,602
On hand June 30, 1888	2,654

The number of vouchers examined in the settlement of returns was 35,026. Certificates of non-indebtedness were issued in favor of 3,412 officers, mostly volunteers, who have filed claims for additional allowances under recent laws and decisions. The sum of \$688.19 was charged to officers for clothing, etc., not accounted for, and collections were made to the amount of \$577.03. Letters received, 4,829; letters written, 2,853; letters recorded, 1,476.

Attention is respectfully invited to the following extract from last year's report:

Prior to 1871 this division was charged with the settlement of property accounts or returns rendered by Army officers responsible for ordnance, ordnance stores, and supplies, but on December 19, 1870, the Secretary of War directed that such returns, after rigid examination by the Chief of Ordnance, should be filed in the Ordnance Office, and not transmitted to the Treasury. As the act of March 3, 1817 (section 277, Revised Statutes) makes it the duty of the Second Auditor to receive and examine all accounts relating to military stores, it may be questioned whether such property accounts as have received only the rigid examination of the Ordnance Office have been adjusted in accordance with law. (See 13 Op., 483.)

DIVISION OF INQUIRIES AND REPLIES.

Officer making inquiry.	On hand July 1, 1887.	Received.	Answered.	On hand June 30, 1888.
Adjutant-General Quartermaster-General Commissary-General Commissioner of Pensions Paymaster-General Third Auditor Fourth Auditor Miscellaneous	182 377 142 8	11, 460 58 997 6, 822 1, 047 1, 565 19	12, 006 69 1, 109 6, 723 15 1, 571 22 865	1, 113 70 476 1, 032 136
Total	2, 379	22, 833	22, 380	2, 832

There has been an increase of 987 in the number of inquiries received, as compared with last year's record, 340 in the number answered and 453 in the number remaining on hand, and the work of the division is from four to six weeks in arrear.

Miscellaneous work.—Muster-rolls and vouchers copied for the Adjutant-General, 478; letters, final statements, affidavits, certificates of disability, special orders, applications, and other papers copied, 1,832; pages of foolscap used in copying, 996; signatures examined for verification, 4,696; letters written, 5,029; descriptive lists of 21,566 soldiers briefed and filed away; final statements of discharged and deceased soldiers arranged and filed for future reference, 15,502. In this connection, a large number of quarterly returns of deceased soldiers, embracing about 25,000 names, have been examined, and reference slips filed in all cases where the registers of claims show that settlements have been made or claims filed. The work of assorting and filing the mass of descriptive lists turned over to this office by the Paymaster General, several years ago, has been completed, and the final statements of all volunteer soldiers have been examined, except those belonging to regiments from California, Illinois, Iowa, Kansas, Minnesota, Missouri, and Wisconsin.

MAIL DIVISION.

The general duties of the mail division are to carefully examine, stamp, assort, and distribute all Departmental and other official mails as soon as received; to answer such letters as do not relate to the accounts

of disbursing officers or to claims on file; to refer or otherwise properly dispose of all letters, claims, etc., erroneously addressed to the Second Auditor, and to revise and examine the outgoing mail for the purpose of detecting and rectifying errors and irregularities. The result of the supervision thus exercised over the official correspondence of the office is very satisfactory. Fewer and less important errors are now discovered than was the case when the division was organized two years ago, which indicates that the clerks are being trained to better business methods and to greater care and discrimination in handling and disposing of official papers and letters.

The number of letters received was 53,814; letters written, 11,189; letters referred to other offices, 816; letters returned uncalled for, 1,811.

ARCHIVES DIVISION.

CONDITION OF PUBLIC BUSINESS.

On July 1, 1887, the total number of accounts and claims of all kinds awaiting adjustment was 46,898; 31,421 were received during the year, making a total of 78,319, of which 4,016 were accounts of disbursing officers, 7,117 were property accounts of Army officers and Indian agents, 3,562 were claims of contractors and others for supplies furnished and services rendered to the Indian department, and 63,624 were claims of officers and enlisted men for arrears of pay and bounty. The number audited and disposed of during the year was 31,122, as follows: Disbursing accounts, 3,199; property accounts, 4,100; Indian claims, 3,492; war claims, 20,331; leaving an aggregate of 47,197 on hand at the close of the fiscal year, viz: Money accounts, 817; property accounts, 3,017; Indian claims, 70; claims for arrears of pay and bounty, 43,293.

The figures show a decrease of 355 in the number of disbursing accounts on hand, and an increase of 57 in the number of property accounts, 53 in the number of Indian claims, and 544 in the number of claims for arrears of pay and bounty, making a net increase of 299 ac-

counts on hand.

On June 30, 1888, the accounts of army paymasters were rendered to this office to include March 31, 1888, and were reported to the Second Comptroller to include December 31, 1887, so that the 130 accounts on hand cover a period of about three months. These accounts are therefore as nearly up to date as it is either practicable or desirable to bring them. The miscellaneous disbursing accounts are also well in hand, while the accounts of Indian agents, although slightly in arrear, are in better condition than they have been for many years, some of them having been formally settled up to March 31, 1888.

CLAIMS FOR ARREARS OF PAY AND BOUNTY.

As already stated there were 43,293 claims for arrears of pay and bounty on hand June 30, 1888; but it does not follow that all these claims have not been acted upon. On the contrary, with few exceptions, they have all been examined so far as to ascertain what evidence is required to complete them. During the year 51,028 cases so examined were suspended for material evidence. Part of these were completed, and are numbered among the 20,331 claims reported as disposed of, and the remainder are still awaiting the evidence called for. As indicating in some degree the amount of work performed in the examination and settlement of claims of this character, it may be noted that 174,488 letters were written, and that it was necessary to refer to 437,761 muster and pay rolls and other vouchers. In many instances the adjustment of a single case involved the examination of fifty vouchers.

It affords me satisfaction to be able to report that all claims for arrears of pay and bounty certified up to and including September 25, 1888, have been provided for. The total amount appropriated during the first session of the Fiftieth Congress was \$2,028,521.55, as follows:

SPECIAL REPORTS.

The preparation of special and other reports called for by Congress caused considerable extra work, and, to the extent of that work, of which no adequate exhibit can be made, interrupted the ordinary business of the office. In answer to a call from the select committee appointed in pursuance of a resolution of the Sentate adopted March 3, 1887, detailed statements were transmitted to the Secretary of the Treasury in July, 1887, showing the amount and character of work performed in each division of the office from July 1, 1884, to March 1, 1887, and the methods of transacting business in each division. In November, 1887, further information was called for as to the condition of business and was duly furnished. These statements occupy 71 pages of the printed report made by the select committee. Eight lists of certified claims were prepared for Congress, and take up 269 pages in the Executive Documents in which they are printed. The statements and lists above mentioned would make an octavo volume of 340 pages.

CLAIMS OF INDIAN SOLDIERS.

In accordance with recommendations made by this office, a commission consisting of a special agent and an experienced clerk was sent to the Indian Territory in October, 1887, to investigate the claims of Indian soldiers who served during the late war, said claims having been presented several years ago but not acted upon for reasons stated in the annual reports for 1884 and 1885. The commission visited Muscogee, Okmulgee, and Tahlequah, in the Creek Nation, and Vinita in the Cherokee Nation, and proceeded with the investigation until recalled in August, 1888, in consequence of there being no funds applicable to the payment of the salary of the special agent and the expenses of the clerk. Congress having, in the sundry civil act approved October 2, 1888, appropriated \$2,000 for continuing the investigation of these claims, the commission will resume operations at once. So far 298 claims have been disposed of, 219 of which are recommended for allowance and the remainder for disallowance. The necessity for the appointment of a commission is shown by facts which have been disclosed by the investigation, among which are:

(1) That Indians draw no distinction between a brother and a cousin, both being considered as within the same degree of relationship. Hence, first and second cousins have filed claims supported by evidence, which would be accepted in ordinary cases, that they are brothers or sisters

of deceased soldiers.

(2) That unscrupulous claim agents, by making Indians believe that they are entitled to further allowances, have induced them to renew

claims already settled and paid in full.

(3) That, as suspected by this office, grave frauds have been attempted upon the Indians and the United States in connection with claims now pending, and have been actually committed in connection with claims settled and allowed years ago.

RE-ARRANGEMENT OF THE OFFICE.

In accordance with the requirements of the act of March 3, 1887 (24 Stat., 618), those bureaus of the War Department which occupied the basement and two floors of the Winder Building, corner of F and Seventeenth streets, were removed to the State, War, and Navy Department Building in March, 1888, and the entire building first mentioned was turned over to the Treasury. The building on the southwest

corner of F and Seventeenth streets, and the two floors of No. 610 Seventeenth street, occupied by a portion of this office, were then relinquished, at a saving of \$3,825 per annum in rent, and the rooms vacated by the War Department were assigned to this office, which is now in possession of the entire Winder Building, except a few rooms in the basement which are used for the storage of some old files belonging to the office of the Register of the Treasury. The addition of fifty rooms to the space formerly occupied enabled me to make a greatly-needed re arrangement of the clerical force and the files, both of which were much crowded. In making this re-arrangement, and in removing the files of settled accounts from the rented buildings, 62,363 boxes, bundles, etc., were handled, consisting of—

BOUNTY UNDER THE ACT OF APRIL 22, 1872.

In last year's report attention was invited to a class of meritorious claimants who had been denied bounty under the above-mentioned act, and legislation for their relief was suggested. Several private bills introduced during the first session of the Fiftieth Congress for the relief of individual soldiers having been referred to this office for report and recommendation, a general bill was prepared with the object of relieving not only individual applicants, but the entire class of claimants who had been injuriously affected by the construction formerly put upon the act of 1872. The bill, of which the following is a copy, became a law July 20, 1888:

AN ACT FOR THE RELIEF OF CERTAIN VOLUNTEER SOLDIERS.

Be it enacted, etc., That the act entitled "An act in relation to bounties" approved April 22, 1872, be amended by striking out the words "before August 6, 1861"; and said act, as hereby amended, shall have full force and effect from April 22, 1872.

SEC. 2. That the proper accounting officers of the Treasury be, and they are hereby, authorized and directed to reconsider the claims of all soldiers and their heirs who may have been denied the bounty of one hundred dollars granted by the act of April 22, 1872, under any construction of said act which has since been modified or rescinded, and such claims shall, if found correct and just, be allowed and paid, provided the soldiers were eurolled or enlisted for three years prior to July 22, 1861, under the proclamation of the President of the United States of May 3, 1861, and the orders of the War Department issued in pursuance thereof, and were actually mustered into the service of the United States and honorably discharged.

RECENT LEGISLATION AND DECISIONS.

The following laws and decisions affecting the adjustment of claims for arrears of pay and bounty have gone into effect since March, 1885:

(1) The act of May 17, 1886, to remove charges of desertion against certain soldiers.
(2) The act of February 3, 1887, amendatory of the act of June 3, 1884, for the muster and pay of certain volunteers.

(3) The act of July 20, 1888, for the relief of certain volunteer soldiers.
(4) The act of August 13, 1888, to extend for five years the time for filing claims under the act of February 3, 1887.

(5) Section 11 of the act of March 3, 1865, directed that the bounty of \$100 granted to heirs of volunteers killed in battle should be extended to the widow if living, or, if she were dead, to the children of any volunteer killed in service, whether he enlisted for two years or for a less period. This law was so construed as to be practically inoperative. It is now held that if the soldier died while in service, of wounds or disease, he was killed in the service within the meaning of the law.

(6) Section 13 of the act of July 28, 1866, granted a bounty of \$50 to soldiers who were honorably discharged after serving two years. In countriing this act it was held by the War Department, and approved by the accounting officers, that if the soldier was promoted to the rank of commissioned officer after having served two years he was discharged by way of favor, and was therefore not entitled to bounty, held that soldiers discharged for promotion after two years' service are entitled to the

bounty granted by the act of 1866.
(7) By General Orders Nos. 191 and 216 of 1863, a "veteran bounty" of \$400 was offered to such able-bodied men who had already served not less than nine months and been honorably discharged as should enlist or re-enlist under the provisions of The War Department and the accounting officers decided that the services must have been continuous and must have been rendered during the war of the It is now held that if the soldier served nine months, either continuously rebellion. or otherwise, and at any time, either in the Army or Marine Corps, he was entitled to be considered a veteran.

(8) It is now held with regard to soldiers who left their commands after the close of the war (and never returned) in the belief that their services were no longer required, and whose records have been corrected and honorable discharges issued to them under the act of July 5, 1884, that the claims of such soldiers for additional bounty under the act of July 28, 1866, are not barred by the statute which limited

the time for presenting claims under said act to July 1, 1880.

Respectfully, yours,

WILLIAM A. DAY, Auditor.

Hon. C. S. FAIRCHILD, Secretary of the Treasury. (No. 11.)

REPORT OF THE THIRD AUDITOR.

TREASURY DEPARTMENT,
THIRD AUDITOR'S OFFICE,
Washington, D. C., November 1, 1888.

SIR: I have the honor to submit herewith the operations of the several divisions of this office for the fiscal year ended June 30, 1888:

Note.—Certain requisitions, amounting to \$1,302.90, now held up by the Secretary of the Treasury, are included in this statement; therefore the actual payments made from the appropriations referred to by * in the report are less by the following amounts, viz:

Incidental expenses 1887, 91 cents; 1888, 2 cents. Army transportation 1886, \$352.81; 1887, \$179.23; 1888, \$633.14. Signal Service transportation 1887, \$78.28; 1888, \$49.45. National cemeteries 1888, 13 cents; headstones for graves of soldiers, \$8.93.

† The sum of \$50 was deposited by the assistant treasurer at New York City, and "covered" into the Treasury, and therefore will not appear as an "advance to agents" in the report of the pension division of this office.

STATE WAR CLAIMS.

The investigation and settlement of State war claims include all claims filed in this office by the several States and Territories under the various acts and resolutions of Congress for the costs, charges, and expenses incurred by them for enrolling, subsisting, clothing, supplying, arming, equipping, paying, and transporting their troops employed in aiding to suppress the late rebellion against the United States, 1861-65, and all claims arising out of Indian hostilities and border invasions.

The tabular statement below shows the operations in these claims for the fiscal year ending June 30, 1888.

•			Claims.	Amount.
On hand June 30, 1887 Received during the y Re-opened during the	earyear		59 2 6	\$4, 971, 977, 45, 1, 905, 257, 73 788, 138, 87
		1-	67	7, 655, 374. 05
Allowed during the year	year		14 19	1, 136, 071, 31 5, 320, 938, 85
Total			- 33	6, 457, 010. 16
On hand June 30, 1888			34	1, 208, 363. 89

During the past year thirty-three claims have been finally disposed of, involving \$6,457,010.16, of which sum \$1,136,071.31 have been found due States, as follows:

Name of State.	Amount.	Name of State.	Amount.
Connecticut Kansas Massachusetts Maryland New York	237. 01 133. 405. 13	Nevada Ohio Texas Total	12, 687. 38- 927, 177. 40-

Letters received, 410; pages manuscript written, 927; letters written, 404; vouchers examined, 11,576; clerks employed, 1.

Very respectfully,

JNO. S. WILLIAMS, Third Auditor.

Hon. CHARLES S. FAIRCHILD, Secretary of the Treasury.

REPORT OF THE FOURTH AUDITOR.

TREASURY DEPARTMENT. FOURTH AUDITOR'S OFFICE, Washington, October 22, 1888.

Sir: I have the honor to submit the annual report of the work of

this Bureau for the fiscal year ending June 30, 1888.

The balances, liabilities, and overpayments, under "Pay" and other appropriations, are shown by the following statements:

BALANCES AND LIABILITIES UNDER PAY OF THE NAVY AND MARINE CORPS.

STATEMENT OF APPROPRIATIONS, PAY OF NAVY AND PAY OF MARINE CORPS, 1888. Pau of the Name 1888

Twy of the Navy, 1888.	
Balance in hands of disbursing officers, June 30, 1888	\$113, 829, 83
Balance in hands of disbursing officers, June 30, 1888	1, 426, 281. 18
Total balance	1, 540, 111, 01
	-,,

The habililes June 30, 1000, were as follows:	
Amount due and unpaid, officers and men	
Amount due Naval Hospital fund	33, 860, 83
Amount due clothing, Navy	127, 956, 93
Amount due small-store fund	37, 394, 07
Amount due provisions, Navy	7, 654, 18
Amount due general account of advances	
	
73. 4. 3. 31. 3. 43. 4	

	-	 . 6			
Deficiency		 			146, 050. 36
•		Pay of the Marine		•	·
		Lau or the marine	JUTTUS. 1000.		

		7 '		
.Balance in the hands of disbursing	officers, June 30.	1888	/*	\$31, 246, 80
Balance in Treasury, as shown by	ledger			98, 915, 32
	-			
Total balance				130, 162, 12
1				,

The liabilities June 30, 1888, were as follows: Amount due and unpaid, officers and men...... Amount due Naval Hospital fund \$62, 165. 63 Amount due general account of advances

103, 268, 89 Total liability 26, 893, 23

OVERPAYM	ENTS	UNDER	OTHER	APPROPRI	ATIONS.	
Title of appropriation.	Year.	Amount appropriated.	Amount expended up to June 30, 1888.	Amount expended since June 30, 1888, on account of liabilities in- curred during the fiscal year 1888.	Total expendi- tures.	Amount expended in excess of appropriations up to date.
Pay, miscellaneous Contingent, Ordnance Transportation and recruiting Equipment and recruiting Transportation and recruiting Marine Corps.	1888 1888	\$205, 000. 00 5, 000. 00 25, 000. 00 9, 000. 00	\$204, 406. 77 6, 274. 74 26, 549. 01 9, 777. 75	\$8, 377. 09 100. 45 597. 53	\$213, 377. 09 6, 375. 19 27, 166. 54 9, 777. 75	\$8, 377. 09 1, 375. 19 2, 166. 54 777. 75

The deficiency in Pay of the Navy is partially caused by the payment out of that fund of claims settled under recent decisions of the Supreme Court for longevity and service on board receiving ships.

The effect of the longevity decision was to put a great many officers on a higher rate of pay than they were receiving at the time it was delivered. The decision in the receiving ship cases had the effect to put all officers on receiving ships on sea-pay instead of other duty pay.

Deficiencies under other appropriations are caused by the expenditure by the Navy Department of more money than is actually available. Vessels on foreign stations have to make expenditures under "Pay Miscellaneous," "Transportation," the "Contingent" of the several Bureaus, and frequently for "Provisions," etc., and as the ships are supplied with money drawn on "General account of advances" that fund has to be reimbursed by adjustments made in this office sometime after the expenditure, and as, in the meantime, the Navy Department has exhausted the appropriations, deficiencies of course arise. To remedy this evil I suggest that hereafter some provision be made by which a percentage of those appropriations used by vessels abroad be set apart to meet such expenditures, not to be subject to requisitions for the payment of indebtedness incurred directly by the Bureaus. This office can, if required, furnish an approximation of the sums that will probably be necessary to cover expenditures on foreign service.

The following table exhibits in detail the appropriations and expend-

itures for the year:

Appropriations and Expenditures of the United States Navy for the fiscal year ending June 30, 1888.

Title of appropriations.	Year.	Appropriations and balances.	Amount drawn out by warrant.	Balance in hand June 30, 1888.	Amount expended as shown by vouchers.	Amount overpaid.	Amount carried to the surplus fund.
Pay of the Navy		\$174, 090, 65	\$174, 078. 07	\$12.58	\$43, 833, 39

\$3,601.50

EXCHANGE.

Bills of exchange were sold by the pay officers of the Navy Department during the year to the amount of \$1,685,533.74. Of this sum \$1,222,158.65 was drawn on the Navy agents at London, and \$463,375.09 on the Secretary of the Navy.

During a large part of the year exchange has been favorable to the

Government, resulting in a net gain of \$4,606.89.

SPECIAL FISCAL AGENTS AT LONDON.

The same contract continues in force with Messrs. Brown, Shipley & Co., special fiscal agents at London, as stated in my last annual report, viz: A commission of one half of one per cent. is paid on disbursements made by them on account of the Navy Department. On the daily balances in their hands they pay to the Government the rate of interest paid by the London joint-stock banks, and on advances they receive the rate charged by the Bank of England. Commissions amounting to \$5,742.56 have been paid to them during the year, and \$7.20 as interest on advances.

They have paid the Government \$5,383.91 as interest on the daily credit balances.

There has been a net gain of \$5,091.13 in the transfer of funds from New York to London.

WORK OF THE OFFICE

The following tables show a summary of the work performed in the different divisions of the office for the fiscal year:

GENERAL CLAIMS DIVISION.

		Cl	aims_	-			Lette	ers	Number of reports on application for—

Claims on hand June 30, 1887. Claims on hand June 30, 1888.

1 256

By reason of several decisions of the Sufreme Court the number of claims has increased very largely during this fiscal year; and while a great many have been settled there yet remains a large number on hand, but which will be settled as rapidly as the force in the office can do so.

During the year an important work has been partially accomplished in the files room; hundreds of accounts—the accumulation of years—have been overhauled and placed in boxes for easy reference and over one thousand pay-rolls repaired and rebound for protection. This division is charged also with the preparation of all reports and tabular statements called for by Congress, the courts, and the Secretary of the Treasury; the preservation and care of the files; keeping a record of the appointments, resignations, removals, and absences; the care and issuing of the stationery used in the office, and the payment of salaries to employés.

The sum of \$2,849.20 was expended under section 4718 of the Revised Statutes, to re-imburse those who bore the expense of last sickness and burial of pensioners. Also the amount of \$195 was paid as fees to examining surgeons for surgical examinations made during the fiscal year ending June 30, 1888.

PROPERTY RETURNS.

I am so strongly impressed with the necessity of auditing the property accounts of the Navy Department that I call your attention again to it.

In previous annual reports and in letters your attention was invited to it, and the Treasury commission, appointed by the Secretary for the purpose of investigating the workings of this department, and to report and recommend such changes as they deemed advisable, have also referred to the necessity for such accounts being audited; and recommended that such action be taken as may be necessary to have it done.

In referring to this question again, I do it to relieve myself of the responsibility attached to the neglect for performing a most urgent work, by which it is thought a great saving to the Government could be effected.

I have the honor to be, sir, your obedient servant,

C. M. SHELLEY,

Hon. C. S. FAIRCHILD, Secretary of the Treasury. Auditor.

REPORT OF THE FIFTH AUDITOR.

TREASURY DEPARTMENT, FIFTH AUDITOR'S OFFICE, Washington, D. C., October 29, 1888.

SIR: In compliance with your request, dated July 30, 1888, to make a report to you of the transactions of this office during the fiscal year ended June 30, 1888, and of the present condition of the public business intrusted to my charge, in season to be transmitted to the Public Printer by the 1st of November proximo, I have the honor to present to you, in the following summary, such transactions as were kept in tabular form during the year:

Accounts adjusted	11, 227
Reports made to the First Comptroller	8,746
Vouchers examined	275, 562
Amount involved in adjustments in footings	140, 874. 55
Reports copied	12, 312
Letters written	4,847
Coupon books of internal-revenue stamps scheduled and counted	38,706
Letters copied by hand	1,770
Comptroller's certificates copied	9,741
Consular certificates to invoices, and debentures posted from returns	
of collectors of customs (sec. 4213 R. S.)	401,829
Consular-fee reports proven	4,090
Pages of consular-fee reports tabulated	20,293
Drafts examined for payment	875

Much labor of various kinds besides that enumerated has been given to the examination of accounts, an adequate idea of which can not well be set forth by figures. The clerks and employes of the Bureau have generally prosecuted their duties with promptness and fidelity, and the present condition of the business is deserving of approbation. But for the large number of claims filed immediately before the close of the fiscal year, for additional sums to be paid on Alabama judgments, the work of the office could have been reported as being up.

The financial results of the adjustments of the accounts are shown in detail in the eleven tables hereto appended and lettered from Δ to I, and in regard to which I beg leave to submit the following observations:

DIPLOMATIC AND CONSULAR DIVISION.

Diplomatic service.—The accounts of ministers and other officers of the diplomatic service, so far as they have been received, have been

adjusted, showing (Table A) expenditures and passport fees for the year, as follows:

Salaries of ministers and charges d'affaires \$279,	
Salaries of charges d'affaires ad interim	
Salaries of secretaries of legations 33,	245.71
Salaries of interpreters of legations 10,	793. 14
Salary of clerk to legation in Spain	158.00
Contingent expenses, foreign missions	515.14
Loss on bills of exchange, diplomatic service	823,82
Total 410,	104 89
Passport fees received and accounted for 4,	

Some difficulty and inconvenience has been experienced in procuring the timely reception at this office of many of the diplomatic accounts. It will be observed that quite a number of quarterly accounts for different legations are noted in the table as not received, and in one case, that of Sweden and Norway, not any returns were received during the year.

Consular service.—Accounts of consular officers have been adjusted, showing expenses for this service and official fees collected, as follows (Tables B, C, D, and E):

Consular fees received for official services	, . 	\$999, 172. 31
Salaries, consular service	\$458 596 09	
Salaries, consular officers not citizens	5,042.08	
	12, 493, 81	
Salaries, consular clerks		
Loss on bills of exchange	3, 935. 12	•
Pay of consular officers for services to American vessels.	14,718.11	,
Compensation from fees (sections 1703, 1730, and 1733		
Revised Statutes	185, 749, 27	·
Office rent and clerk hire (section 1732 Revised Statutes)	1,973,64	
Contingent expenses, United States consulates	151, 994, 29	
Allowance for clerks at consulates	68, 798, 44	
Expenses of prisons for American convicts	5, 323, 09	
Salaries, interpreters to consulates in China, etc	14, 250, 00	
Salaries, marshals for consular courts	8, 027, 09	1 . , .
Expenses of interpreters and guards, etc	3, 304. 00	•
Boat and crew at Hong-Kong and Osaka and Hiogo	848.97	
		934, 983. 93
Excess of receipts over expenditures		64, 188. 38

The cost of the consular service for 1887 was reported at \$918,973.26, which, taken from the fees, \$950,690.64, left an excess of receipts for that year of \$31,717.38. An excess of more than double this sum is shown in the statement above for 1888. There were twenty-four consulates added to the salaried list for 1888 which were before compensated from fees. This had the effect to enhance the expenses, yet the increase in the expenses of the service over those for 1887 is not nearly proportionate to that of the receipts from fees.

A marked improvement on the part of consular officers is already noticeable, in the manner of making their returns, since the receipt by them of the new Consular Regulations for 1888. Some trouble and delay, however, is still occasioned by the failure to observe carefully the instructions contained in Article XXVI, relating wholly to the matter of accounts and returns. The omission of data required by paragraph 517, in connection with absences of principal officers from their posts, is perhaps the more common and vexations.

Consular fees.—The consular fees collected for official services were in kind and amount as follows:

Invoice certificates Landing certificates	
Bills of health	15, 187. 75
Currency certificates	17, 887, 00
Certificates of returned goods, packages, etc	
Other fees	13, 534, 81
	_
Total	999, 172, 31

A steady augmentation of the fees s shown yearly. An addition of \$90,244.36 was reported for 1886 over 1885, and of \$69,120.85 for 1887 over 1886, and the excess for 1888 over 1887 amounts to \$48,481.67. The accession comes mainly, as has been stated in previous reports, from fees collected for consular certificates to certified invoices, indicating a continued increase in the number of invoices of merchandise shipped to this country; and that the enhancement extends also to the aggregate value of the importations is shown by the reports of the Bureau of Statistics of this Department.

Relief of seamen.—As shown in Tables F and G, accounts for relief and wages of seamen were adjusted with the following results:

Boarding and lodging	
Clothing	
Medical aid	6,044.60
Passage to the United States (paid at Treasury)	10, 088. 76
Other expenses	6, 295. 89
Total disbursed for relief of seamen	
Extra and arrears of wages collected	193, 272, 98
Extra and arrears of wages paid to seamen	181, 679. 29

reduced to at least \$5,889.36 by vouchers yet to be received of payments made to seamen. This amount, then, \$5,889.36, will represent the seamen's own money which has been used for their support, and should be deducted from the total amount, \$34,431.82, shown above to have been expended for relief of seamen, in order to arrive at the actual outlay from the appropriation for those who were destitute. This gives \$28,542.46 as the actual expenditure for 1888.

The actual cost to the Government for the relief of destitute seamen for 1887, as shown by the exact figures on final adjustment, was \$23,018.25.

There were 1,042 destitute seamen relieved in 1888 as against 959 in 1887, at an additional cost to the Government of \$5,524.21. One fifth less seamen were brought to the United States in 1888 than in 1887, yet the cost of passage paid at the Treasury was hearly the same, showing a larger proportion of them to have come by steam-vessels, which is the more expensive.

Other expenses of the foreign service.—During the year other accounts relating to the foreign service have been adjusted as follows:

Rescuing shipwrecked American seamen, 1888	
Transporting remains of ministers and consuls to their	homes for inter-
ment .	. \
Publication of consular and other commercial reports,	1898 23.66
Refunding penalties or charges erroncously exacted	⊬4.31

Estate of John Gaffney	63.31

1,466.99

INTERNAL-REVENUE DIVISION.

The total collections of internal revenue during the fiscal year 1888, as shown by the adjustments of collectors' accounts and exhibited in detail in Table H, amounted to \$124.162,528.93. Included in this amount \$151.91 belongs to the collections of previous years.

The accounts of collectors of internal revenue, as adjusted for the fiscal year, aggregate \$3,553,792.24, inclusive of amounts allowed store-keepers and gaugers. These expenses in detail are given in Table I.

Of this total expense, the sum of \$6,351.16 belongs to previous fiscal years, being commissions on tax paid spirit stamps sold.

The following exhibit shows, by States, for what these expenses were incurred:

Miscellaneous expenses.—The following sums embrace payments made by collectors of internal revenue and revenue agents for the detection of frauds upon the revenue; disbursements made by T. J. Hobbs, disbursing clerk, on account of the appropriation for "paper for internalrevenue stamps," and for "expenses under the oleomargarine act," also other expenses incident to the collection of the internal revenue:

*	
Salary	\$23,562.86
Traveling expenses	7,893.50
Expenses (incidental)	15, 496. 94
Stationery	13,661.22
Telegrams	496. 33
Expressage	5, 927. 45
Counsel fees and expenses	2,028.00
Rewards	2, 111. 69
Surveyors of distilleries	2,784.65
Salaries in office of the Commissioner of Internal Revenue	252, 637. 16
Salaries in office of the Commissioner of Internal Revenue (re-imburs-	•
able)	2,500.00
Fees and expenses of gaugers prior to July 1, 1887	105.25
Fees and expenses of gaugers	696, 436. 31
Paper for stamps (Fairchild Paper Company)	34, 958. 54
Indemnity for lost checks issued in payment of services of store-keepers,	
etc	340.00

An adjustment of the account of one stamp agent involved the sum of **\$**370,590.61.

Five hundred and eighty-seven claims for the redemption of stamps amounting to \$29,204.96 were settled during the year, from which

\$512.46 were discounted, leaving \$28,692.50 actually paid.

By the last annual report of this office, for 1887, it appeared the Secretary of the Treasury had on deposit to his credit, on account of "fines, penalties, a d forfeitures" (special deposit account No. 1), \$46,829.54. During the year \$100,143.33 have been deposited, and \$98,687.19 disbursed, leaving a balance to his credit January 1, 1888, of \$48,285.68.

The balance to his credit, January 1, 1887, on account of "offers in compromise" (special deposit account No. 5), was \$15,841.68. During the year \$81,887.89 were deposited and \$78,086.24 disbursed, leaving a balance to his credit January 1, 1888, of \$19,643.33.

Accounts were adjusted for the following sums refunded: Taxes erroneously assessed and collected, \$31,883.86; drawback on merchandise exported, \$60,682.79; and surplus proceeds of lands sold for taxes in the late insurrectionary States, \$6,329.92.

Moneys refunded on lands sold for taxes in the late insurrectionary States amount to \$1,464.26, and moneys erroneously collected under the direct tax laws, \$450.45.

Accounts have been adjusted with the States of South Carolina and

Virginia, and with the commissioners of those States, on account of direct tax imposed by the act of August 5, 1861. The disbursements by George Waterhouse, chairman of the South Carolina free-school-fund commissioners, amounted to \$1,570. Accounts rendered by George W. Evans, disbursing clerk, Department of the Interior, have been adjusted as follows: Preservation of collections, National Museum, 1887, \$4,561.59; 1888, \$105,-\$110,226.91 Scientific Library, Patent Office, 1887, \$9.97; 1888, \$2,997.93..... 3,007.90 77, 907, 96 Photolithographing, Patent Office, 1888 ... REPORT OF THE AUDITOR OF THE TREASURY FOR THE POST-OFFICE DEPARTMENT.

OFFICE OF THE AUDITOR OF THE TREASURY
FOR THE POST-OFFICE DEPARTMENT,
Washington, D. C., November 28, 1888.

SIR: I have the honor to submit herewith the report of the operations

of this Bureau for the fiscal year ended June 30, 1888.

The continued increase in the volume of business, without any increase of the clerical force of this office, has added greatly to the labors of the force employed; but in all the divisions the work is in a satisfactory condition, many of the clerks having worked before and after office hours in order to keep up with the business which naturally came to their desks.

The antiquated, cumbersome plan of keeping the postal accounts of postmasters by accumulating quarterly differences was terminated June The result of this method was, in many instances, the retention by the Government of large balances due postmasters which justice required should be promptly paid them, and in other cases it produced an aggregation of debit balances of successive quarters, to collect which required litigation years after the creation of said balances. contemplated a complete audit of an account only upon the giving of a new bond or the removal of a postmaster by death or otherwise, and no data was recorded from which a complete statement of the business of the Department could be obtained in any ordinary period of Its prolongation of accounts, ignoring the necessity for prompt deposit and speedy settlement, was productive of loss both to the postmasters and the Government, and was entirely at variance with all approved business laws, regulations and methods. Under the new system of accounts, which was commenced July 1, 1887, at the close of the audit of each quarter's account every postmaster who owes the Government is notified of the balance due, and required to deposit the sum at once; or, if any sum is due a postmaster, such postmaster is as speedily apprised of the amount of the same, and allowed to retain such sum from the receipts of his office; or, if said receipts are insufficient to liquidate the debt, he is promptly paid by draft from the Department.

Settlements are thus made every three months where formerly from six to nine months were permitted to elapse before differences were adjusted. A record is now kept of the amount of stamps and stock on hand at the close of each quarter at every post-office in the United States, and the aggregate in each State and Territory, and in the whole Republic, is stated quarterly. Such quarterly statement was not possible under the old method. This inventory, taken in connection with the quarterly statement of receipts, disbursements, and deposits alluded to above, forms a business statement at once so minute in detail, and so comprehensive in general, as to commend itself to every accountant.

The benefit of this system of accounts, which requires the earliest possible payment of all balances, is shown by the fact that of the entire sum of postmasters' postal receipts during the fiscal year ended June 30, 1888, \$51,806,354.99, only \$236,597.04 was due from the postmasters upon the 30th day of September, 1888, the remainder having been accounted for either by deposit or approved disbursements. The continuance of this system will undoubtedly result in a still closer accounting for the receipts and disbursements during the fiscal year 1889.

I respectfully renew the recommendation made in my last report relative to the consolidation of the force of this office into one building, as nearly fire-proof as possible, instead of being scattered in three different buildings as it is at present. The interests of the Government render this desirable for many reasons, not the least of which is that the records of the money-order work, involving millions of dollars and the accounts of many thousands of postmasters, should not be exposed in buildings that do not afford even ordinary protection from fire. The destruction of these records would render it impossible to accurately adjust the accounts of the money-order offices, and would undoubtedly result in a great loss to the Government.

Very respectfully,

D. McConville,

Auditor.

Hon. C. S. FAIRCHILD, Secretary of the Treasury.

APPENDIX.

NOTE.—Much of the summary relating to the duties and work of the different divisions of the office is omitted for want of space, but it can all be found in the pamphlet edition of the Auditor's report.

REPORT OF THE REGISTER.

TREASURY DEPARTMENT.

REGISTER'S OFFICE, Washington, D. C., October 31, 1888.

SIR: I have the honor to submit the following annual report of the operations under direction of this office for the fiscal year ending June 30, 1888.

The Register's Office was created to keep account of all receipts and expenditures of the Government, and its duties have been enlarged and varied by successive statutes. (United States Revised Statutes, sections 235, 243, 313, 314, 315, 3675.)

Its operations during the fiscal year have been subdivided among—

(1) Its administration, with seven persons.

(2) The Division of Receipts and Expenditures, with forty-seven persons.

(3) The Division of Loans, with sixteen persons.

(4) The Division of Notes, Coupons, and Currency, with thirty-four persons.

(5) The Division of Interest and Expenses of the Public Debt, created for a special work, with four persons, making in all one hundred and eight persons.

The classes, salaries, and distribution of these employés, and their

percentage of service, are summarized in the following:

DISTRIBUTION OF FORCE AND SALARIES OF THE OFFICE DURING THE YEAR.

Divisions.	Register, \$4,000.	Assistant Register, \$2,250.	Chiefs of division, \$2,000.	Class 4, \$1,800.	Class 3, \$1,600.	Class 2, \$1,400.	Class 1, \$1,200.	\$1,000.	\$900.	\$840.	\$720.	\$660.	Number in each division.	Salaries.
Register and Assistant Register's Office Receipts and Expenditures Loans Note, Conpon and Currency Interest and Expenses on Loans Details to other Bureaus Total Appropriation	1. 00	1. 00	1. 00 1. 00 1. 00 1. 00	10. 00 4. 00 1. 97 1. 00	10. 00 2. 00 3. 00	5. 98 2. 00 1. 00 1. 00 1. 00	7. 50 2. 90 3. 00	1, 99	5. 96 2. 00 20. 09 0. 91 28. 96	1.00	1. 00 1. 00 1. 00	3. 58 1. 00 1. 99 1. 00 7. 98	47. 01 15. 90 33. 05 4. 00 . 91 107. 28	35, 452, 32 5, 860, 0 0 821, 75 138, 880, 03

The operations in each division are summarized as follows:

DIVISION OF RECEIPTS AND EXPENDITURES.

(Forty-seven employés, cost \$63,643.51.)

This division has—

(1) To keep account of all receipts and expenditures of public moneys and debts due to and from the United States.

(2) To receive from the Commissioner of Customs and First Comptroller of the Treasury the accounts which have been finally adjusted,

with their vouchers, certificates, etc., and to preserve the same.

(3) To record all warrants for receipt of moneys into or payments from the Treasury, and to certify the same thereon, except those drawn by the Postmaster-General, and those drawn by the Secretary of the Treasury upon requisition of the Secretaries of War, the Navy, and the Interior (proper).

(4) To transmit to the accounting officers of the Treasury certificates of balances of adjusted accounts, and certify requisitions for advances

of money to disbursing agents and officers.

(5) To furnish to the proper auditing officers copies of all warrants covering proceeds of Government property, where the same may be necessary in the settlement of accounts, and under the new Treasury rule to furnish copies of all covering-warrants, which will materially enlarge the labor and responsibility of this division.

(6) To stamp the numbers of auditors' reports of settlements of ac-

counts on all of the inclosures appertaining thereto.

The following shows the relative forces employed in this division during the past three years:

Years.	Number of employés.	Amount of pay-roll.
1887-'88	47	\$63,643)51:
1886-'87	41.77	56,829,32
1885-'86	40.81	55,189,20

Details of its principal work appear in the subjoined statements, giving-

(1) The receipts and expenditures of the Government for the fiscal year ending June 30, 1888.

(2) Summary of current work for the fiscal year.

(3) Heads of the principal classes of extra work performed during the

To which should be added the re-arrangement of the files, and the betterments increasing the file space found possible in storing them away.

In addition to the current work this division ha	as perform	ed the fol-
1	<u> </u>	

In addition to the current work this division has performed the following:

SPECIAL WORK.

(1) The general expenditure ledger, counterpart to the general receipt ledger which was finished last year, has been completed. These

two ledgers bring down by years the receipts and expenditures from the beginning of the Government to June 30, 1885, classified under appropriate heads. Heretofore when it became necessary to ascertain the receipts and disbursements running through several years, to answer inquiries and furnish data, examinations had to be made of the receipt and appropriation ledgers for the period of time covered, but now, by reason of consolidating all into one ledger, the labor of research is greatly simplified. Besides, these ledgers show the aggregate receipts from every source, as well as the disbursements of any class of appropriations.

(2). Indexing by names and appropriations of the old ledgers without indices has progressed, several volumes having been completed and

others being under way.

(3) The receipts and expenditures for 1885 and 1886 have been com-

pleted, and that for 1887 far advanced.

(4) Much time and labor have been expended on the important work of examining and correcting old unbalanced accounts, many of which arose from clerical errors, omissions, misdirections indorsed on pay and covering warrants, and failure of directions on others, carelessness of messengers in transmitting papers from one office to another, etc.

(5) Stamping the numbers of reports on their accompanying vouchers and inclosures. Each paper appertaining to an account should have the report number written or stamped on it, so that when borrowed (as is frequently the case), it can be returned to where it properly

belongs.

Detailed information of the receipts from all sources, expenditures by appropriations, the condition of the public debt, and other statements in relation to the financial transactions required to be published by the Register, prepared in this division, will be found in the appendix from pages 49 to 202, inclusive.

DIVISION OF LOANS.

(Sixteen employés; expenditure, \$21,864.11.)

Has charge of the issues, exchanges, transfers, and redemptions of all bonds, and of preparing the schedules for paying the interest on all registered bonds.

Bonds issued.—Statement A, annexed, shows the number and amount of bonds issued during the current fiscal year—in all, 26,598, amounting

to \$114,831,900.

Bonds canceled are shown in detail by Statement B, annexed—72,135, amounting to \$189,656,950.

Spanish indemnity bonds.—Transactions in these appear in Statement

C, annexed.

'Unissued bonds on hand at the beginning of the fiscal year, received during the same, issued, disposed of during the year, and remaining on hand at its close, are exhibited in Statement D, annexed.

Regular work done is shown in detail by Statement E, hereto annexed. Extra work besides the regular business was thrown upon this division by the Department's circular of August 3, 1887, authorizing advanced payments of interest to be made upon certain conditions. The record and certification of such payments to parties concerned, and the corresponding changes in the interest schedules, with the transferring and consolidating of various ledgers; and reconstruction of corresponding portions of the schedule of dividends, have increased the amount of miscellaneous and unclassified work from 590 days in 1887 to 615 in 1888.

It would be reasonable to suppose, from the gradual extinction of the public debt, that the labors of this division would diminish.

A comparison of the volumes of bonds issued and canceled annually

for the last five years shows as follows:

Bonds issued and canceled during the fiscal year ending-

June 30, 1884	 \$426,014,217,50
June 30, 1885	 374, 837, 365, 24
June 30, 1886	 372, 655, 200, 00
June 30, 1888	 304, 488, 850.00

The following table shows among what classes of investors at home and abroad our registered bonds are held:

TABLE SHOWING WHERE OUTSTANDING REGISTERED BONDED DEBT IS HELD, THE AMOUNTS HELD, AND THE TOTAL THEREOF.

	Foreign.	Treasurer United States for national banks.	Domestic.	Total.
4 per cent., July 1 4 per cent., June 1 Pacific Rairoad, July 1	3, 525, 450	\$141, 321, 850 85, 980, 850 4, 182, 000	\$462, 471, 750 101, 435, 550 60, 441, 512	\$610, 824, 300 190; 941, 850 64, 623, 512

Of the \$624,348,812 under heading "domestic"—

Insurance companies hold in round numbers	\$47,016,000
Savings banks, institutions, etc., round numbers	
Individuals, trustees, etc	386, 227, 112
-	·

the entire \$866 389 669 only \$10 556 150 or about 1.22 per cent

Of the entire \$866,389,662, only \$10,556,150, or about 1.22 per cent., is held abroad.

There are about 44,118 individual and trustee holders, representing \$386,227,112, or an average of \$8,754 each. The number of accounts for all holders of United States registered bonds is about 48,523, and for holders of the District of Columbia 3.65 per cent. and 5 per cent. District of Columbia issue of 1879, and on account of Spanish indemnity certificates, about 562. Since the dates furnished for the corresponding table last year the changes have been as follows: There is an interval of one year between the schedules used for comparison on the 4 per cent. and Pacific Railroad issues, and of nine months upon the 4½ per cent. issue.

The amount upon the foreign schedules has decreased \$445,650, varying very slightly from the percentage of the whole registered issue last

year.

The amount held by the Treasurer of the United States in trust for national banks has increased \$19,069,250.

The amount held by insurance companies has decreased \$5,484,000. The amount held by savings banks, institutions, etc., has decreased \$17,894,300.

The amount held by individuals, trustees, etc., has decreased \$19,348,950.

Thus the total reduction in the principal upon the domestic schedules is \$45,727,250, and upon the unmatured loans of the registered portion of the debt \$27,103,650.

The number of individual and trustee holders has decreased about 4,600, but the average amount held by each has increased \$427.

DIVISION OF NOTES, COUPONS, AND CURRENCY.

(33 employés; cost \$35,452.32.)

This division has charge of the redemptions of evidences of public

debt, including notes, coupons, and currency.

Besides current work it was ordered to make an examination of the numerical registers in the office, and to furnish statements to the Division of Interest and Expenses of Loans of all unpaid conpons. To this work were assigned three clerks, who have been engaged for ten months in a critical examination of every entry in 79 large volumes of record, amounting to 1,252,577 entries. In addition to furnishing the information desired, it has also proven of great value by discovering and correcting numerous errors. It will probably require the labor of these clerks for the current year to complete that work.

Statement No. 1 gives the current receipts of gold certificates, act March 3, 1863, currency certificates of deposit, act June 8, 1872, 7.30 Treasury notes, acts July 17, 1861, June 30, 1864, and March 3, 1865,

by report numbers and place of redemption.

Statement No. 2 shows the number on hand July 1, 1887, and current work during the year on interest checks.

Statement No. 3 shows the current work done in redeemed detached

coupons.

Statement No. 3A gives a comparative table of receipts and work on detached coupons for the fiscal year compared with those of the previous fiscal year.

Statement No. 3B shows by loan and at what particular subtreasury

the coupons were redeemed.

Statement No. 4 shows the current work and receipts of coupon bonds during the year by denomination and loan. The decrease of receipts as compared with those of the previous year is 185,781 bonds and

10,521,038 attached coupons, amounting to \$77,104,450.

Statement No. 5 shows the United States notes, gold, silver, refunding certificates, and all other securities redeemed and destroyed during the year by denominations and series. This necessitated the preparation of a ledger, which for the first time was opened on July 1, 1887. Its completion greatly facilitates work, and is a check on the offices of the Secretary and of the Treasurer.

A ledger account was also opened for matter statistically destroyed, supplying a want for which provision had not hitherto been made.

Statement No. 6 shows work performed other than current during

the fiscal year.

Statement No. 7 gives, by denomination and loan, the number and amount of all coupon bonds and attached coupons which have been withdrawn from the files and destroyed by order of the Secretary of the Treasury.

Statement No. 8 gives the amount, denomination, and loan of all

coupon bonds and attached coupons on file to date.

Statement No. 8A gives the number and amount of all coupon bonds and attached coupons redeemed and received up to and including June 30, 1888.

Statement No. 9 gives the total number and amount of redeemed coupons received up to and including June 30, 1888, to wit, 94,226,549 coupons, amounting to \$1,181,914,252.563.

Statement No. 10 shows the current receipts and redemptions to June 30, 1888, of all interest bearing United States notes and certificates, by

denomination and loan, and the number outstanding and amount of each loan to that date.

Statement No. 11 gives the details of statistical destruction of securi-

ties.

Statement No. 12 gives certificates of deposit, temporary loan. These certificates were withdrawn from the files, counted, verified by reports, divided into redemptions by different sub treasuries, scheduled, put into packages of 1,000, labeled, and filed—a work of great care, embracing 81,925 certificates, and amounting to \$702,272,680.25.

DIVISION OF INTEREST AND EXPENSE OF LOANS.

(Four persons; expense, \$5,860.)

During the fiscal year ending June 30, 1888, this division has continued on the special work to which it was assigned by the Secretary's order of January 4, 1886, and marked progress has been made thereon.

The interest accounts for the twenty-six years from July 1, 1859, to June 30, 1885, have been examined, analyzed, compiled, and tabulated so as to show the payments on account of each loan for each year of

the twenty-six.

The number of loans on the consolidated statement is fifty-two, and the aggregate amount of interest payments involved in the accounts is \$2,232,240,026.84 of which \$31,966,790.47 did not get upon the Register's books until 1886, although the money was advanced to disbursing officers and the payments made in 1885.

The interest-bearing debt of the United States on July 31, 1865,

amounted to \$2,397,819,186.85.

The interest payments from July 1, 1865, to June 30, 1885, twenty years, aggregate \$2,101,867,835.55; or 87.5 per cent of the principal.

Accounts involving disbursements for expenses of loans have been carried on the books under two general heads, viz:

(1) Expenses incident to carrying into effect national loans, and

(2) Expenses under the refunding acts of July 14, 1870, and January 20, 1871.

So far as these titles of appropriation embrace expenditures since July 1, 1861, the settlements and vouchers thereto pertaining have been examined, analyzed, and classified under the various heads of expenditure for which the money was used.

The amounts disbursed are as follows:

	•	•	
In all			39 910 192 83

The principal items of expenditure were salaries, commissions, engraving and printing, expressage, and paper, and the percentage of each of these items is as follows:

	Expenses of national loans.	Refunding the public debt.
		3. 67
Commissions Engraving and printing Expressage	 22, 56 18, 24 7, 80	76. 64 6. 97 4. 07
Paper	 3. 89	2. 0

These expenditures have not until now been analyzed and tabulated mor had we the means to report in detail the objects upon which had been expended this nearly forty millions of money entered on the books of the Treasury in lump sums under the forenamed heads of appropria-

On the 31st of July, 1885, the principal of the interest bearing debt of the United States outstanding July 31, 1865, had been reduced 47.42 per cent., or at the rate of 2.371 per cent. per annum. In the three years from July 31, 1885, to July 31, 1888, the decrease was 10.28 per cent., or at the rate of 3.426 per cent. per annum. Hence at the rate of extinction for the last three years there would have been extinguished

68.53 instead of 47.42 of the public debt.

Details of the work of this division, which for the last year has consisted of only four persons, were summarized in the preliminary report sent to the Department on the 16th of August, 1888, to which attention is again invited, on account of the evidence it furnishes of the enorsmous opportunities for plunder afforded previous to 1863, by the meglect to keep a gold account separate from the currency; by the enormous allowances to one or two banking firms, and by the lavish and peculiar character of expenditures, especially those connected with the Bureau of Engraving and Printing-which report, it is believed, for the good of the public service, ought to go to the country.

In closing this annual report, the fourth since I took charge of this office, as evidence of intelligent devotion to its duties and to give weight to recommendations heretofore made, which duty requires me to reiterate. I may be permitted to mention some of the betterments already antroduced into its service, and those heretofore suggested but yet not

introduced:

(1) The regular divisions have been reduced to three.

(2) The number of employés has been reduced from 147 to 108.

(3) A system of personal daily reports of work done by each clerk has been successfully introduced, affording authentic evidence of efficiency. as well as stimulating effort and avoiding injustice in its appreciation,

(4) The Spanish indemnity fund management has been placed with

the Secretary of the Treasury, as required by law.

(5) The annual reports of receipts and expenditures—printed records of the Department's financial operations—five years behind time in their preparation, have been brought up very nearly to date.

(6) A general receipt ledger, never before kept, giving the receipts

from all sources from 1789 to date, and

(7) A general expenditure ledger of like extent, have been prepared and are now kept, which greatly abridges labor and increases accuracy.

(8) Indexing, by names and appropriations, of the old ledgers which

were without indexes, and

(9) Completing and correcting balances not completed in old ledgers,

are worthy of note as improvements in the interest of the service.

(10) Completing examination and specifying the items of the discrepancies in the public debt statement, which gave rise to the investigations of the special Senate committee under Chairman H. G. Davis, and pointing out what is required to reconcile them, have made plain the way to remove this blemish from our book keeping.

(11) Reporting the balances due to and from the United States, as shown on the books of this office, and recommending legislation which will prevent the manifest evils of the present system, have shown the

mecessity of a radical remedy therefor.

(12) In the Division of Notes, Coupons and Currency, from inaccuracies of schedule, count, and from confused storage and lack of file space, the work gave very inadequate facilities and assurance of accuracy. All the file evidences of redeemed public debt can now be

promptly traced and found.

(13) Heretofore, the papers accompanying First Comptroller's Reports, whether one or five thousand in number, were filed with no mark to indicate the report to which they belonged; hence, if displaced, only an expert could tell where such papers did belong. This is provided against by causing the report number to be stamped on each of such accompanying papers.

(14) The lack of any adequate account of the large expenditures (nearly forty millions of dollars) on account of the public loans, the items of which account were mixed with those of interest, premiums, and commissions, and the apparent lack of separate accounts for gold and currency previous to 1863, were called to the Department's attention and gave rise to the organization of the division which, since May,

1886, has been engaged in preparing the required information.

(15) The condition of the files containing reports, final settlements of accounts, canceled bonds, coupons, interest checks, etc., for lack of room and proper means of securing them from destructive agencies, has been urgently and repeatedly reported to the Department. Crowded wherever necessity drove them, into places known only to a few old employes, the best that could be has been done. The rooms or spaces have been designated, their subdivisions marked, and the work of cataloguing their contents so that they may be referred to as books in a library, is progressing.

But the Secretary's effort to procure some little additional space, by allowing the cataloguing and storing in boxes of some of the older and less called for records in nine small rooms on the south side of the basement of Winder's Building, has not been successful for lack of boxes for

the records and laborers to move them to these rooms.

I respectfully and urgently recommend, for reasons set forth in my last and preceding annual reports, that the honorable Secretary of the Treasury in his report call attention to the importance of—

(1) Legislation providing for a division of balances in the register's

office (S. 732);

(2) The closure of the discrepancies in the public debt statements, specifically growing out of erroneous entries hitherto uncorrected, for which a bill is now pending in Congress, viz, "A bill to facilitate the business of the Treasury Department" (S. 10);

(3) Appropriations for properly putting in metal cases the files we

now have, and

(4) Securing additional files space. Respectfully submitted.

W. S. Rosecrans, Register.

Hon. C. S. FAIRCHILD, Secretary of the Treasury.

STATEMENTS.

LOAN DIVISION.

PUBLIC DEBT OF THE UNITED STATES FROM 1791 TO 1836, EMBRACING THE ISSUE AND REDEMPTION OF THE BONDED INDEBTEDNESS OF THE UNITED STATES FOR THE PAYMENT OF THE REVOLUTIONARY DEBT (FOREIGN AND DOMESTIC), MISSISSIPPI STOCK, LOUISIANA PURCHASE, UNITED STATES BANK STOCK, AND SIX PER CENT. NAVY STOCK.

[For detailed statements of the principal of the debt see "Statement of the Public Debt," issued by the Register's Office as Treasury Department Executive Document No. 818, pages 55-70. The public debt, as stated in the table, page 146, Register's Report, 1825, for the 1791 et sequitur, is the unfunded amount of the indebtedness of the Government, and will therefore exhibit large discrepancies, year by year, with this table, which is the funded amount issued and paid of the obligations of the Government. Both statements, however, arrive at the same result in 1826, viz, \$272,793.02, being the amount of the debt then outstanding.]

	Үеаг.	Issue.	Discount.	Total.	Redemptions.	Excess of issues over redemp- tions.	Excess of re- demptions over issues.	Principal of debt at the close of year.

#### REPORT OF THE SUPERVISING SPECIAL AGENT.

#### TREASURY DEPARTMENT,

OFFICE OF THE SECRETARY, Washington, D. C., November 17, 1888.

SIR: I have the honor to report the results of the work of the division of special agents for the fiscal year ended June 30, 1888, as follows:

Amount recovered on account of-

Increased and additional duties Seizures Fines and penalties Suits	24, 665. 85 9, 693. 13
Total paid into the Treasury  Amount involved in suits commenced  Appraised value of seizures  Reduction of expense recommended	24, 665, 85 74, 685, 43 94, 075, 50
Number of suits commenced	309 8
Reports relative to— Smuggling Undervaluation Misconduct of customs officers Seizures Inspections Arrests Suits	28 64 101 8 8
Miscellaneous subjects	<del></del>
Total number of reports	4,556
The sums following include the compensation and traveling of the agents, inspectors, and special employés under the d this division:	
Special agents Special inspectors Special employés Silk experts at the United States consulates of Lyons, Horgen, Zurich and Basle	20, 404, 08

It will be seen from the foregoing that the amount recovered and paid into the Treasury through the direct services of the officers and employés of this division exceeds the total cost of such services by \$227,890.78. This is exclusive of the amount involved in suits commenced and undetermined, of reductions of expenses recommended, and additions (aggregating \$483,311.64) to invoice values of silk goods from France and Switzerland reported by the Department experts in those countries as necessary either to make market value or to equal cost of production.

851

The results thus stated of the arduous, delicate, and difficult labors of the officers of this division, while abundantly attesting their usefulness, reflect to a limited extent only the scope, value, and efficiency of

this branch of the public service.

In the inspection and examination of the several customs ports and districts much has been accomplished in the correction of irregularities, enforcing uniform and correct methods of administration, and securing economy in expenditures. There are 171 ports and 200 subports subject to inspection, and these customs establishments are constantly increasing by Congressional enactment year by year, thus enlarging the customs facilities and at the same time increasing the aggregate cost of collecting the revenue. The constant tendency of the local customs officers is toward an increase of expenses, and the most strenuous efforts are necessary to keep the expenditures from exceeding the limits of the customs appropriation.

#### BONDED WAREHOUSES AND BONDED ROUTES.

An important part of the work of this division is the supervision of the bonded warehouse and transportation system. During the past year there were 80 bonds for warehouses approved and 45 discontinued, leaving in force 463 bonds, covering 507 buildings, 52 yards, and 22 elevators. The number of routes bonded and in force for the transportation of appraised goods is 182, and the number of common carriers bonded for the transportation of unappraised merchandise is 68. The companies thus designated and bonded cover all the principal railway and water transportation routes within the United States, and their supervision involves a large amount of official correspondence.

The act of 1880, which is a substitute for the act of 1870 by which the immediate transportation system was established, dispensed with individual bonds on entry at the port of first arrival of merchandise intended for immediate transportation to interior ports, and provided that the common carriers should be responsible under their bonds for the safe delivery of the merchandise to the collector at the port of destination, and in default thereof for the payment of the duties on such mer-

chandise.

This system has been thoroughly tested and has worked well. loss to the Government has resulted from the change, which has proved a great convenience to the public in the relief it has afforded from the execution of unnecessary bonds. Similar relief ought to be given with respect to individual bonds upon entry of goods for warehouse. such entry under the present law the importer gives a bond in double the amount of estimated duties conditioned for the withdrawal of the merchandise within the time prescribed by law on payment of the lawful duties and charges thereon or the withdrawal thereof for export. At the same time the Government retains the custody of the merchandise and makes no delivery thereof without payment of duty. the goods are stored in a private warehouse, as is usually the case, the proprietor thereof must give a bond conditioned that he shall comply in all respects with the warehousing laws and Treasury regulations in connection therewith, and shall not remove or suffer to be removed any goods from said warehouse without lawful permit and without the presence of the customs officer in charge.

Thus, under the present system, the Government protects itself, (1) by retaining the goods until the duties are paid; (2) by taking a bond from the importer upon entry in double the estimated duties; (3) by

taking a general bond from the proprietor of the warehouse.

Many thousands of warehouse bonds are taken annually in the custom houses at the principal ports involving a large amount of clerical labor and putting merchants to great inconvenience. At the port of New York the practice has existed for many years of accepting custom-house brokers as sureties on these bonds without any inquiry as to the financial standing of such brokers, many of whom are known to be unable to respond to the obligations they have thus assumed. In such cases (and they constitute the greater number of warehouse bonds) they furnish no additional security to the Government and might just as well be dispensed with, leaving the Government amply protected in the possession of the goods and the bond of the warehouse proprietor.

Table C, herewith submitted, shows that the value of merchandise transported without appraisement increased in the fiscal year from \$37,017,385 in 1887 to \$38,929,395 in 1888. The value of such merchandise so transported in 1880 was \$13,125,758, showing an increase

of \$25,803,637 in the last fiscal year over 1880.

#### EVASION OF DUTIES.

Much of the attention of the working force of the division continues to be given to investigations pertaining to undervaluation of merchandise subject to ad valorem duties, to attempts to evade duties by false classification, and to secure advantage by excessive allowances for damage, refunds by way of drawbacks, and improper deductions for coverings, packing charges, etc. While the chief officers of the customs at the principal ports have generally co-operated heartily with the Department in its efforts to enforce the laws and regulations in these regards, the abuses mentioned continue; the unscrupulous still prosper at the expense of the public revenue and of honest importers, and it is manifest that justice and equality at the custom houses can not be secured to all interested without a radical revision of the customs revenue laws and a reformation of existing administrative methods and machinery.

All experience has shown that high ad valorem rates can not be collected with fairness and uniformity under any system of administrative laws and regulations hitherto devised, much less under the present loose restrictive laws and inadequate and ineffective system of appraise-The difficulties alluded to in my last annual report in the way of securing proper values upon appraisements still exist, and can not be remedied so long as importers participate in appraisement proceed-As shown last year, the findings of re-appraising boards afford no proper criterion of values. The appraisement in each case is likely to be governed by the opinions of the principal merchant appraiser who may be selected to meet with the general appraiser, and injustice is liable to be done both to the Government and to the importer in all such re-appraisements. Much difficulty has also been experienced at ports where there are no general appraisers and where two merchants act upon appeals from the decision of the local appraiser, owing to the impossibility of securing honest and competent merchant appraisers, such merchants being in most cases disqualified under Department regulations (synopsis, 8072) by reason of having been consulted as to values by the local appraising officers.

It is believed that those sections of the "Undervaluation bill" which has passed the Senate and is now pending in the House of Representatives providing for a board of nine general appraisers to hear and finally dispose of all appeals, and to supervise more closely the work of the local appraising officers at all the ports, would go far towards removing the

evils attendant upon the ad valorem system, especially if re-enforced by the other restrictive sections contained in the bill referred to and in the tariff bill known as the Mills bill. The sections of that bill which relate to coverings, packing charges, etc., to declarations upon entry, to section 2900, Revised Statutes, to the form of consular declarations, to invoices, to the abolition of damage allowances to section 2499, Revised Statutes, to draw-backs, and to the repeal of sections 9, 10, 11, 12, 14, and 16 of the act of June 22, 1874, are all important and necessary for the reformation of our customs system.

Extended reference need not be made to the growing evils resulting from the conflicting provisions and ambiguities abounding in the existing tariff schedules, so productive of disputes, appeals, and suits, so disastrous in their effect upon legitimate importing trade and domestic manufactures, so vexatious and expensive to the Government, and which

are so constant and serious a menace to the public Treasury.

The litigation growing out of one clause of the tariff alone, that relating to "Hat materials," has engaged a large part of the time and attention of the appraising officers at the principal ports as well as that

of the collectors, district attorneys, and special agents.

Two of the officers of this division have been almost constantly engaged during the past year in collecting and formulating information relating to tariff legislation and to the preparation of suggestions and measures for the use of committees and members of Congress looking to the revision of the tariff and the existing administrative laws.

#### SUGAR CASSIFICATIONS.

Important investigations have been made at the principal ports in regard to the sampling and classification of sugars, disclosing serious irregularities in this branch of the service. A practice has prevailed since 1883 at some of the ports of retesting sugars upon the demand of the importers, or their representatives, where they claimed dissatisfaction with the original polariscopic test; such retesting was not made upon new samples obtained from the cargo as imported, and as contemplated by the regulations, but was ostensibly made of a portion of the sample originally tested. These samples were not securely kept, but were liable to be tampered with or changed, and the fact that the retest in such cases almost always showed a lower percentage of saccharine strength than the original test furnishes good grounds for believing that such samples were manipulated for the purpose of obtaining a lower classification of the sugar they represented. A large saving in duties has resulted from a discontinuance of this practice.

The same opportunities for dishonest practices were found in the methods in operation with regard to allowances for damage on sugar. New regulations have been suggested calculated to correct these abuses and secure uniformity and fairness in the sampling and classification of

sugar.

#### SMUGGLING.

Much of the time of the officers of this division, particularly those stationed upon the the Canadian frontier, has been devoted to efforts to suppress the smuggling of opium, which has been carried on extensively at various points on the frontier. A large portion of the expenses of special inspectors has been thus incurred. The high duty on smoking opium, and the fact that it is easily smuggled, has made it a favorite object of traffic with those who wished to benefit by violation of the revenue laws.

The large profits obtainable in this business has led to the formation of "rings," in which instances have come to light where customs officers have had a part. In one district on the Pacific coast one of the chief smugglers was a man who held the position of chief inspector for the customs district in which his operations were carried on. The force under him was so managed and directed that he was able for a long time to conduct his nefarious business with impunity. After his dismissal from the service he took advantage of the opportunity afforded by the completion of the Canadian Pacific Railway to introduce opium from Canada at points on the northern frontier, and was captured near Ogdensburgh, N. Y., with several hundred pounds of opium in his possession, by one of the officers of this division. His trial is now pending. Other important seizures and arrests of opium smugglers have been made.

It has been ascertained that persons of prominence in the communities where they reside are involved in these transactions, some of whom have been indicted and are now awaiting trial. It is highly desirable that the recommendations of the Department made last year for the passage of a bill prohibiting the importation of smoking opium, and providing for the seizure and destruction of the drug in that form wherever

found, should be speedily passed by Congress.

During the year there were 8,429 letters, reports, etc., received and

acted upon in this division, and 3,598 letters written.

The accompanying Table A shows the business transacted in each customs collection district, including receipts and expenses during the last fiscal year.

Table B shows the number of packages, with the invoice value and estimated duties thereon, forwarded without appraisement during the last fiscal year from and to the ports specified in the act of June 10, 1880, and acts amendatory thereof.

Table C shows the value of, and duties on, merchandise forwarded from and to the designated ports without appraisement during each

fiscal year since the approval of the act of June 10, 1880.

Table D shows the quantity of sugar remaining in warehouse June 30, 1887, and imported and exported from that date to June 30, 1888, the

actual quantity and classification being given in each case.

Table E is a comparative statement showing the number of invoices examined and appraised, the number advanced and appealed from, the amount of advances, the cost of weighing, and other information of interest relating to the administration of the customs at New York, Boston, and Philadelphia during the fiscal years 1886, 1887, and 1888.

Very respectfully,

JAMES A. JEWELL, Supervising Special Agent.

Hon. Chas. S. Fairchild, Secretary of the Treasury.

Note.—The accounts of receipts and expenditures published by the Register will vary in some cases from the figures above given, for the reason that his statement is made up from warrants issued during the fiscal year, regardless of balances in the hands of officers at the beginning and end of the year. If the accounts of each collector were closed and balances settled at the end of the fiscal year, the two statements would agree,
