Or an estimated deficit of	45, 718, 970. 60

The foregoing estimates of receipts and expenditures for the fiscal year 1898 are made upon the assumption that there will be no substantial change in existing business conditions, and that the present scale of public expenditures will not be reduced. Such estimates, even when made under the most favorable circumstances, involve so many elements of uncertainty that they can be regarded only us showing probable results, but the difficulty of reaching satisfactory conclusions, especially as to the amount of receipts, is greatly increased at the present time by the unsettled condition of business, and the impossibility of foreseeing the changes that may occur before or during the year beginning on the 1st day of July, 1897. If our ordinary business activity should be resumed, and the consumption of articles subject to taxation should increase to its normal proportions, the receipts for that year will of course be much larger than is here estimated, and there may be in fact no deficiency in our revenues.

OPERATIONS OF THE TREASURY.

According to the report of the Treasurer* of the United States, the total available assets of the Treasury at the opening of business on July 1, 1895, were \$812,627,722.05. Of this sum \$579,247,863 represented deposits held for the redemption of outstanding certificates and Treasury notes, and the remainder, amounting to \$233,379,859.05, constituted the general fund. At the close of business on June 30, 1896, the deposits held for the redemption of certificates and Treasury notes were \$547,330,973, and the general fund \$308,354,348.70, making a total of \$855,685,321.70.

The aggregate receipts for the year as shown by the warrants, including the ordinary revenues, the proceeds of loans, and the deposits for certificates, were \$820,852,810.29. The corresponding disbursements were \$748,369,469.43. In the fifteen months ending with September the redemptions of United States notes and Treasury notes in gold amounted to \$192,972,205. The net gains of gold to the Treas-

ury during the same period, exclusive of the proceeds of the sale of bonds, were \$98,138,902. Uncurrent gold and silver coins of the face value of \$5,452,724.46 were transferred during the year from the Treasury to the mint for recoinage. The redemptions of national-bank notes were nearly \$108,000,000, the largest in ten years, and with the exception of three years, the largest since 1879.

COINS AND COINAGE.

The report of the Director of the Mint* shows the operations of the mints and assay offices during the fiscal year 1896, together with statistics of foreign countries, relative to the production, coinage, and monetary condition of each.

Deposits and purchases.

The gold bullion deposited at the mints and assay offices during the year was valued at \$103,311,125.73. Of this amount, \$68,769,383.81 were original deposits, and \$34,541,741.92 were redeposits. The classification of the original deposits was as follows:

Domestic bullion	\$53, 910, 957, 02
Uncurrent domestic coins	
Foreign material (bullion and coin)	
Old plate and jewelry	3, 388, 622, 06

The face value of the uncurrent domestic gold coins transferred from the Treasury to the mint at Philadelphia for recoinage was \$825,583, and the amount deposited at the mints and assay offices was \$858,297.50, a total face value of \$1,683,880.50, the coinage value of which was \$1,670,005.53, showing a loss upon recoinage of \$13,874.97.

The silver bullion deposited represented a coinage value of \$11,848,694.92; of this amount, \$11,672,077.79 were original deposits and \$176,617.13 were redeposits. The classification of the original deposits was as follows:

Domestic bullion	\$5, 715, 742. 64
Uncurrent domestic coin	4, 099, 579. 11
Foreign material	1, 075, 328. 08
Old plate and jewelry	781, 427, 96

The purchases of silver bullion for subsidiary coinage, under the provisions of section 3526, Revised Statutes of the United States, was 184,578.14 fine ounces, costing \$122,429.62.

^{*} See appendix, p. 169.

Coinage.

The coinage executed at the mints during the fiscal year was as follows:

Description.	Pieces.	Value.
Gold Silver dollars Subsidiary silver Minor coins	3, 584, 760 7, 500, 822 12, 923, 707 54, 321, 484	\$58, 878, 490, 00 7, 500, 8±2, 00 3, 939, 819, 20 869, 337, 32
Total	78, 330, 77,3	71, 188, 468. 52

In addition to the above coinage there were coined at the mint at Philadelphia, for the Government of Ecuador, 500,000 twenty-cent pieces of the value of \$100,000, completing the coinage of 5,000,000 twenty-cent pieces for that Government.

The silver dollar coinage included in the above table was made from bullion purchased under the act of July 14, 1890, and the seigniorage on this coinage was \$2,327,736.96.

The total coinage of silver dollars from bullion purchased under the act of July 14, 1890, from August 13, 1890 (the date the law went into effect), to July 1, 1896, has been \$47,544,776. The number of fine ounces of silver employed in this coinage was 36,772,912.70, costing \$36,964,557.38, with a seigniorage of \$10,580,218.62.

From July 1 to November 1, 1896, there were consumed 6,776,936.72 fine ounces, costing \$6,038,283.69, with a coinage of \$8,762,100, giving a seigniorage of \$2,723,816.31. A total coinage under this act, to November 1, 1896, of \$56,306,876, with a total seigniorage of \$13,304,034.93; leaving on hand at the mints a balance of 125,061,262.74 fine ounces, costing \$112,865,625.54.

Of the subsidiary silver coinage, \$332,698.70 was coined from new bullion purchased under the provisions of section 3526, Revised Statutes of the United States, for subsidiary silver coinage (the seigniorage on this coinage was \$175,319.52), and \$3,607,120.50 from uncurrent subsidiary silver coin transferred from the Treasury to the mints for recoinage.

Including the balance on hand at the mints July 1, 1878, the *net* seigniorage, or profit on the coinage of silver from that date to June 30, 1896, was \$78,145,603.93.

The balance of silver bullion on hand on July 1, 1896, available for subsidiary silver coinage was 1,161,708.46 fine ounces, costing \$1,514,520.95.

The value of the minor coinage made from new material was \$689,985.15, while the remainder of the coinage—\$179,352.17—was made from old and uncurrent minor coins transferred from the Treasury

for recoinage. There were also \$353,606.80 in minor coins transferred from the Treasury to the Philadelphia mint for cleaning and reissue.

The total amount of minor coins issued by the mint at Philadelphia since 1792 to June 30, 1896, was \$27,818,107.71; of this amount, \$2,382,461.15 has been remelted, leaving \$25,435,646.56 as the total amount outstanding on June 30, 1896.

Bars.

Gold and silver bar	s were manufactured	at the	mints	and	assay offices
during the fiscal year	as follows:				•

	. , ,	Silver
Gold	. , ,	

Course of silver.

The average London price of silver bullion during the fiscal year was 30.832 pence, equivalent to \$0.68005; the New York price was \$0.68491, and the average price at the par of exchange was \$0.67588.

The highest quotation during the year was $31\frac{15}{16}$ pence, equivalent to \$0.70204; the lowest quotation was 30 pence, equivalent to \$0.66081.

The average commercial ratio of gold to silver was 1 to 30.58, and the bullion value of a United States silver dollar, at the yearly average price, was \$0.52262. The number of grains of pure silver, at the average price, purchasable with a United States silver dollar, was 710.06, equivalent to 1.479 fine ounces.

Earnings and expenditures.

The maintenance of the institutions connected with the mint service necessitated the expenditure of \$1,163,566.78 during the fiscal year, while the earnings from all sources aggregated \$3,384,069.16, a net gain over expenditures of \$2,220,502.38.

Imports and exports.

The net gold exports for the fiscal year were \$78,904,612, as against \$30,117,376 for the previous year.

The net silver exports were \$33,262,258, as against \$27,631,789 for the previous year.

Industrial arts.

The employment of the precious metals in the industrial arts in the United States during the calendar year 1895 was:

GoldSilver		
Total	 ·	25, 706, 109

XXVIII REPORT OF THE SECRETARY OF THE TREASURY.

The amount of new material used in the industrial arts and included in the above was—gold, \$8,481,789; silver, \$9,825,387.

Metallic stock in the United States.

The metallic stock in the United States on July 1, 1896, was—gold, \$599,597,964; silver, \$628,728,071 (including \$1,032,565 commercial value of silver bullion held by the Mercantile Safe Deposit Company, New York); a total of \$1,228,326,035.

Product of gold and silver.

The estimated production of the precious metals in the United States during the calendar year 1895 was:

Metals.	Fine ounces.	Commercial value.	Coining value.
Gold	2, 254, 760	\$46, 610. 000	\$46, 610, 000
	55, 727, 000	36, 445, 000	72, 051, 000

The estimated production of gold and silver in the world, for the calendar year 1895, was as follows:

Metals.	Fine ounces.	Commercial value.	Coining value.
Gold		\$200, 406, 000 110, 073, 700	\$200, 406, 000 217, 610, 800

World's coinage.

The total coinage of gold and silver by the various countries of the world was as follows:

GoldSilver	
Total	352, 697, 657

Total metallic stock and uncovered paper in the world.

The total metallic stock and uncovered paper in the world was estimated on January 1, 1896, to be as follows:

Gold. Full legal-tender silver. Limited tender silver.	3, 616, 700, 000
Total metallic stock	8, 380, 600, 000
Uncovered paper	2, 558, 000, 000

PUBLIC MONEYS.

The monetary transactions of the Government have been conducted through the Treasurer of the United States, 9 subtreasury officers, and 163 national-bank depositaries. The number of such depositaries on November 1, 1896, was 158, and the amount of public moneys held by them on that date, including those to the credit of the Treasurer's general account and United States disbursing officers, was \$16,119,096.51, a decrease since November 1, 1895, in number of depositaries of 2, and an increase in amount of holdings of \$1,862,401.71.

LOANS AND CURRENCY.

The interest-bearing debt of the United States, exclusive of the bonds issued in aid of the Pacific railroads, was increased during the twelve months ended November 1, 1896, in the sum of \$100,002,900. There were issued and sold in pursuance of the public notice of January 6, 1896, \$100,000,000 of bonds of the United States, dated February 1. 1895, and redeemable at the pleasure of the United States thirty years from that date, in coin of the standard value of July 14, 1870, with interest in such coin, payable quarterly, on the first days of February, May, August, and November. While these bonds were dated February 1, 1895, in order to make them uniform as to their terms with the four per cent bonds sold under the contract of February 8, 1895, they bore interest only from February 1, 1896, and the purchasers refunded to the Government the interest accrued from this last-mentioned date to the respective dates of payment. The average premium realized was 11.166, and the entire proceeds, principal and premium, as well as the accrued interest, were paid into the Treasury by the purchasers in United States gold coin or gold certificates. The principal and premium amounted to \$111,166,246.41, and the accrued interest to \$189,-This transaction has been reported in detail to Congress. four per cent loan of 1907 was increased in the sum of \$2,900 by the issue of bonds of that loan in settlement of accrued interest on refunding certificates of the act of February 26, 1879, presented for redemption during the twelve months.

The changes in the amounts of the several kinds of money in the United States, outside the Treasury, during the twelve months ended November 1, 1896, are shown in the following table. The estimated population of the United States November 1, 1895, was 70,378,000, and the per capita supply of money outside the Treasury was \$22.72. The estimated population and per capita supply of money November 1, 1896, was 71,902,000 and \$22.63, respectively.

	Nov. 1, 1895.	Nov. 1, 1896.	Decrease.	Increase.

Money outside the Treasury.

NATIONAL BANKS.

The records of the Department show that from the date of the granting of the first certificate of authority on June 20, 1863, to the close of the year embraced in this report the total number of national banks organized has been 5,051, making an average for each year of 153. Of this total number there were in active operation on October 31, 1896, last, 3,679, having an authorized capital stock of \$650,014,895, represented by 288,902 shareholders, making for each bank in the system an average capital stock of \$176,682, the number of shares to each 2,296, and The total amount of their circulating notes outstandshareholders 78. ing was \$211,412,820. Of this amount, \$208,988,172 was secured by United States bonds and the balance by lawful money deposited with the Treasurer of the United States. The total circulation of all national banks outstanding on October 31, 1896, was \$234,553,807, of which \$208,988,172 was secured by United States bonds deposited by active banks, \$7,091,205 by bonds still held for account of insolvent and liquidating banks, and \$18,747,430 by lawful money deposited for account of insolvent and liquidating banks and by active banks reducing circulation.

The net increase in the amount of circulation secured by bonds during the year was \$26,329,053, and the gross increase in the total circulation, \$21,099,429.

On October 6, 1896, the date of the last report of condition, the total resources of the 3,676 banks then reporting was \$3,263,685,313.83, of which \$1,893,268,839.31 represented their loans and discounts, and \$362,165,733.85 money of all kinds in bank.

Of their liabilities, \$1,597,891,058.73 represented individual deposits; \$336,342,834.70, surplus and net undivided profits; and \$209,944,019.50 outstanding circulating notes secured by bonds.

In geographical divisions the 3,679 banks in active operation are divided as follows: 1,539 banks, with a capital stock of \$401,145,135, in the Eastern States; 1,583, with a capital stock of \$110,241,660, in the

Western, and 557, with a capital stock of \$138,628,100, in the southern part of the country.

In point of number of active banks, Pennsylvania, New York, Massachusetts, Ohio, Illinois, and Texas lead, with 420, 328, 268, 248, 221, and 206, respectively. Arranged according to capital stock, Massachusetts is first, with \$97,017,500; New York second, with \$86,036,060; Pennsylvania third, with \$74,753,129; followed by Ohio, with \$45,770,338; Illinois, \$38,746,000, and Texas, \$21,863,090.

There were organized during the year reported on 28 banks, located in 15 States and the District of Columbia, with an aggregate capital stock of \$3,245,000. Of this number, 8 were in Pennsylvania, 2 each in New York, Georgia, North Carolina, Ohio, and West Virginia, and 1 each in Alabama, Illinois, Kansas, Kentucky, Maine, Missouri, Texas, Virginia, Wisconsin, and District of Columbia. The number located in the Eastern States was 12, aggregating in capital stock \$1,180,000; in the Western States, 6, with a combined capital stock of \$875,000, and in the Southern States 10, having a total capital stock of \$1,190,000. The State of Georgia is first in amount of capital stock represented by new banks, having \$600,000; Pennsylvania has \$520,000, and District of Columbia \$500,000.

The number of banks organized was 18 per cent of the yearly average. The corporate existence of 26 national banks in 16 States, with a capital stock of \$3,153,800 and a total circulation of \$1,175,400, has been extended during the year. Pennsylvania has 5; New Jersey and Illinois 3 each; with 2 each in Delaware and North Carolina. Of the total capital of such banks, that in Pennsylvania aggregates \$690,000; New Jersey, \$272,000; Illinois, \$150,000; Delaware, \$140,800; North Carolina, \$151,000.

Under the act of July 12, 1882, providing for the extension of national banks, the corporate existence of 1,633 banks, representing an aggregate capital stock of \$403,247,115, has been extended. Of these, New York has 233, with a capital stock of \$73,572,460; Massachusetts, 228, with a capital stock of \$92,592,200; Pennsylvania, 204, with a capital stock of \$53,776,000, followed by Ohio with 112 and an aggregate capital of \$18,479,000.

One bank, having a capital stock of \$100,000 and a circulation of \$90,000, has ceased on account of the expiration of its charter. This bank was located in North Carolina, and was succeeded by a new association with a capital stock of \$100,000 and circulation of \$22,500.

During the year ending October 31, 1897, the corporate existence of 19 banks, with a capital stock aggregating \$2,289,000 and circulation of \$783,900, will expire. They are located in 13 States, 4 of them being in New York and 2 each in Ohio, Michigan, and Colorado. In the succeeding ten years, from 1897 to 1906, inclusive, the corporate exist-

ence of 993 banks, having a capital stock of \$146,461,150 and a circulation of \$39,003,872, will expire.

The number of banks leaving the system during the year through voluntary liquidation was 37, having a capital stock of \$3,745,000 and circulation of \$1,262,815.

It has been found necessary to appoint receivers for 27 banks during the year. Their aggregate capital stock was \$3,805,000 and circulation \$761,500. Of this number, 4, with a capital stock of \$995,000, were among those which closed their doors in 1893 and subsequently resumed business, but through continued business depression and the character of their assets were unable to meet their obligations, and were thus compelled to go into insolvency.

A comparison of the data of this year with that set forth in the report for the year 1895 shows the number of active banks to have decreased 36, with a corresponding decrease in capital stock of \$4,305,000. The number of banks organized is 15 less, and the number going into voluntary liquidation 14 less. There has been a decrease of 9 in the number of receivers appointed and 45 in the number of extensions of corporate existence granted. The loss through expiration of charters decreased 3 and the number of banks organized to succeed expiring associations remains unchanged.

The number of exisiting banks incorporated under the laws of the various States is 5,708, and the number from which reports have been received, 4,956. In addition, reports have been received from 824 private banks and bankers, or a total of 5,780 reporting banks, which is 326 less than the number from which reports were received in 1895.

In response to a special inquiry addressed to the banks in operation in the United States, information was submitted as of July 1, 1896, by 5,723 banks, of which 3,458 were national banks and 2,265 were associations organized under State authority. From these reports it was ascertained that the number of depositors in banks and banking associations was 5,929,963, having to their credit \$3,254,439,866. The amount of money in the banks on the same date was \$413,124,849, of which gold and gold certificates amounted to \$189,558,341. Upon the assumption that the amount of gold held by nonreporting banks was in the same proportion as their number to the number of those reporting, the amount of gold in all banks on that date was approximately \$302,800,000. The transactions of the clearing houses of the country on July 1 amounted to \$227,935,464, and the balances \$19,152,834. In the statement of these balances it is noted that the proportion of actual money used was extremely small, amounting to only about \$1,350,000.

The reports from banks containing the information referred to in the foregoing paragraph exhibited also the use of credit instruments as shown by the deposits of the banks on July 1. This subject is exhaustively discussed and the conclusions drawn indicate that credit instruments in the transactions of retail trade of the country represent 67.4

per cent, wholesale trade 95.3 per cent, other mercantile transactions 95.1 per cent, and all business 92.5 per cent. The largest percentage of business represented by the use of credit instruments is shown by the deposits in the New York banks, being 96.4 per cent. The next highest percentages are 93.2, 93.3, 92.3, and 92.5 per cent for the States of Massachusetts, Maryland, Nevada, and Minnesota, respectively. The lowest percentage shown is that of California, being 69.4 per cent.

A considerable portion of the report is devoted to State bank failures prior to 1863, and from 1863 to 1896, inclusive.

Data with respect to the losses sustained by note holders and other creditors of the banks in the earlier period are meager, but are more satisfactory with respect to the losses to note holders than to other creditors of the banks. The information with respect to failures of State banks subsequent to 1863 was obtained through the instrumentality of the national bank examiners, and, while incomplete, is the most satisfactory which has ever been tabulated. The number of failures reported is 1,234; the report of capital of failed banks, \$53,632,259.36; assets, \$214,312,190.58; liabilities, \$220,629,988.27, and dividends paid, \$100,088,726.95. The returns with respect to dividends paid by these banks is unsatisfactory owing to the fact that reports show that the affairs of only 353 have been finally closed.

The Comptroller suggests the following amendments to the National Bank Act:

First. That accommodations to executive officers and employees of the banks be restricted in amount, properly secured, and only granted upon the approval of the board of directors.

Second. That no loan should be made to a director not an executive officer of the bank except either upon a deposit of collateral security or upon a note bearing the signature or signatures of one or more responsible persons, in addition to that of the director.

Third. That directors of national banks shall be required to make examination of the affairs of the bank with which they are connected on a day to be fixed by the Comptroller, a report thereof to be made to that official.

Fourth. That assistant cashiers under certain circumstances be authorized to sign circulating notes and to sign and make oath or affirmation to reports of conditions.

Fifth. That some class of public officers to be empowered to administer general oaths required to be taken by the National Bank Act.

Sixth. That organization of national banks with minimum capital stock of \$25,000 be authorized in towns, the population of which is less than 2,000.

Seventh. That national banks be permitted to establish branches under certain restricted conditions.

Eighth. That the semiannual tax authorized on circulating notes of national banks be reduced so as to equal one-fourth of one per cent.

XXXIV REPORT OF THE SECRETARY OF THE TREASURY.

Ninth. That national banks be authorized to receive circulation to the par value of the bonds deposited when the market value thereof is equal to the par value.

The Comptroller concludes his report by calling attention to the profit of the Government, derived from national banks, which is compared with the cost of the maintenance of the gold reserve on legal tenders issues of the Treasury.

The reports received in 1895 relative to the banking systems of the various countries of the world and of the United States, with additional information received since the last report was issued, in respect of foreign and State banking systems, are incorporated in his report.

FOREIGN COMMERCE.

The following table, prepared in the Bureau of Statistics of this Department, exhibits the principal features of the trade returns for the fiscal year 1896:

	1895.	1896.	+, increase; , decrease.
Imports: Merchandise: Dutiable Free	\$363, 233, 795 368, 736, 170	\$369, 757, 470 409, 967, 204	+\$6,523,675 +41,231,034
Total		779, 724, 674	+47,754,709
Per cent dutiable	50.4	52.6	
Gold Silver	36, 384, 760 20, 211, 179	33, 525, 065 28, 777, 186	-2, 859, 695 +8, 566, 007
Exports: Merchandise: Domestic		863, 200, 487 19, 406, 451	+69, 807, 888 +5, 260, 885
Totals.	807, 538, 165	882, 606, 938	+75,068,773
Gold Silver	66, 468, 481 47, 295, 286	112, 409, 947 60, 541, 670	$+45,941,466 \\ +13,246,384$
Imports for consumption Duties paid	731, 162, 091 147, 901, 218	759, 694, 084 156, 104, 599	+28, 531, 993 +8, 203, 381
Ad valorem of duties : On dutiableper cent On free and dutiabledo	41.75 20.23	39. 94 20. 55	
Tonnage: Entered tonsCleared do	19, 294, 915 19, 750, 546	20, 987, 046 21, 300, 843	+1,692,131 +1,550,297

The most gratifying features of this comparison of trade in the two years are to be found in the exports of domestic produce and merchandise, and in the revenue from customs duties on imports. It was in 1880 that the value of domestic exports passed for the first time the sum of \$800,000,000, and only three times was that figure attained in the ten years from 1880 to 1889. Since 1890 the value of exports has not fallen below \$830,000,000, except in the single year 1895. This increase in the aggregate value of exports has occurred in spite of a general and remarkable decline in the prices of the articles exported—a decline that has with few exceptions affected the entire range of domestic product. The

conditions under which \$863,200,000 were exported in 1896 are not unlike those of 1891, when the domestic exports were \$872,200,000; but the excess of exports over imports in 1891 was only \$27,354,087, while in 1896 it was \$83,475,813. So large an excess of exports prepared the way for rates of foreign exchange more favorable to this country, and contributed largely to the recent heavy movement of gold from Europe to the United States in settlement of the trade balances. While the export of gold during the fiscal year 1896 was greatly in excess of the import, the import in 1897 promises to more than turn the scale in favor of this country.

In 1860 the value of domestic manufactures exported was \$40,345,892, constituting about one-eighth of the total exports of domestic merchandise. In 1876 the value of this class of exports reached \$100,000,000, and in the following year attained \$133,933,549. From that year until 1890 there was little change in this value. From 1890 to 1893 there was a growth of about \$20,000,000, and from 1893 to 1896 nearly \$70,000,000 have been added—a remarkable increase, and making the manufactures more than 26 per cent of the entire domestic export. The details of this movement will be found in the tables printed by the Bureau of Statistics of this Department in the annual report on "Commerce and Navigation of the United States."

The average ad valorem rate of duties, under the tariff law of 1890, was about 50 per cent. The ad valorem rate in 1896 was 39.94 per cent, producing a revenue of \$156,104,599 from imported goods. Imported sugar yielded \$39,808,140.

REORGANIZATION OF CUSTOMS DISTRICTS.

· The expense of unnecessary customs ports has been commented upon heretofore, and I again invite the attention of Congress to the subject. An examination of the table showing the receipts and expenditures of the Customs Service during the past fiscal year, which is appended to this report,* will show that in numerous districts there is little or no business requiring the continuance of customs establishments. Ports are created by legislative enactment, and there would seem to be a necessity for such reorganization as will insure a more economical administration in the collection of the revenue from customs. probable that the appointment of a commission to take into consideration the needs of the Service and to prepare a plan of reorganization Deputy collectors of customs clothed with would prove beneficial. power to enter and clear vessels could be stationed at places where their services are required, and the present outlay for salaries of collectors and other officers saved, and the necessity for large deficiency appropriations obviated.

^{*} See Table No. 1, Report of the Supervising Special Agent, in the Appendix, page 802.

Compensation of collectors of customs.

In certain collection districts the compensation of collectors of customs is dependent, in a great measure, upon commissions, fees, and other emoluments, while in some districts a fixed salary is paid. Besides an appreciable saving in the cost of collecting the revenue, a less complex system of accounts, and other advantages to the Service would follow legislation providing for the payment of a fixed compensation to all officers of the customs.

Chinese exclusion.

In his report to me the Supervising Special Agent* states that during the past year 5,446 Chinese persons applied for admission to this country. Of this number, 1,521 were in transit to other countries, 415 were rejected, and 3,510 were admitted. Many difficulties have been encountered by officers charged with the enforcement of the Chinese exclusion laws, and with few exceptions their duties have been performed with promptness and in an efficient manner. In my opinion, the existing law should be so amended as to provide suitable penalties in cases where fraudulent affidavits are made before notaries public in the preparation of papers upon which claims are made for the admission to this country of Chinese persons alleged to be entitled to that right. In one instance a person was arrested for perjury and his discharge was ordered by the United States commissioner, on the ground that the laws relating to perjury do not extend to affidavits taken before notaries public.

Lead-bearing ores.

Under existing law, the sampling and assaying of imported ores are required at the ports of entry. The practice heretofore has been to transmit samples of all importations of ores to Government assayers. and upon their reports the entries have been liquidated. To furnish the necessary facilities at El Paso, Tex.; Bonners Ferry, Idaho, and Northport, Wash., an appropriation of \$45,000 was made for the erection and equipment of suitable buildings as sampling works at those places. The appropriation referred to was the subject of consideration by this Department, and was deemed sufficient for the object in view. An investigation made since the appropriation was passed shows that the proviso that not less than one-fifth of any importation of ores imported at ports at which no facilities for sampling and assaying are provided be forwarded to ports where such facilities exist, will involve an outlay so great as to prevent a strict compliance with the law, ores being imported, in many instances, at places far distant from either of the ports of El Paso, Bonners Ferry, and Northport. In view of this fact, no action, beyond the preparation of plans and specifications for the erection of the necessary buildings at the ports named, and estimates of the cost of such buildings, with their equipment, has been taken by my direction.

It has been suggested that if paragraph 165 of the tariff act of 1894 was amended in such manner as to allow importations of lead-bearing cres to be forwarded from the ports of entry, under warehouse and transportation bond, to any properly equipped smelting establishment, a competent official could be stationed at each of such establishments to supervise, personally, the sampling of ores according to commercial methods, and the samples could be submitted then to a regularly appointed Government assayer, for the purpose of ascertaining the quantity of lead contained therein. In view of the fact that about 90 per cent of ores imported into this country are consigned to bonded smelting and refining works, this suggestion meets my approval, and I commend it to favorable consideration. This plan would certainly be less expensive than the transportation of one-fifth of each importation to one of the ports having the necessary facilities, as above set forth.

Suggestion has also been made that the administrative difficulties inherent in the present law would disappear, provided all imported ores containing lead should be subject to the same duty, whether or not the lead or other substances in the ore, chiefly silver, constitute the greater value of the mass. Under the present law, whether the duty on imported ore containing lead shall be levied by applying the lead rate, three fourths of one cent per pound, on the whole weight of the ore, or only on the weight of the lead contained in the mass of ore, depends upon whether the value of the lead is greater or less than that of the silver or other substances in the ore. This ascertainment is most difficult, involving, as stated above, costly sampling works and a large number of employees. The inducements held out to fraud, it would seem, are also many. The plan suggested, however, would not be equitable to all importers of ores containing lead, for the reason that the percentage of lead contents in imported ores varies largely, often ranging from 20 per cent to 60 per cent or over, according to the location of the mines, some ores being rich in lead and others containing only a comparatively small percentage of that metal. An unjust discrimination would be the result of the adoption of a plan providing for a uniform tariff on all imported ores without regard to their component ingredients.

${\it Insufficient \ appropriation.}$

I carnestly urge upon the attention of the Congress the necessity of increasing the appropriation for the collection of the revenue from customs. The fund available for defraying the expenses of collecting the revenue from customs was created by the act of March 3, 1871, now section 3687, Revised Statutes, and consists of an annual appropriation of \$5,500,000, "in addition to such sums as may be received from fines, penalties, and forfeitures connected with the custom, and from fees

paid into the Treasury by customs officers, and from storage, cartage, drayage, labor, and services." Although the demands upon this appropriation have constantly increased with the growth of the country and the creation of new customs districts and ports, the appropriation at this time is smaller than it was in 1871. The entries of imported merchandise are almost three times as great now as they were in 1878, the first year for which this data has been officially compiled, while the total number of employees throughout the entire service has been increased less than 50 per cent. In 1871 the miscellaneous receipts which are credited to this appropriation amounted to over \$1,000,000. Since then the receipts have been largely diminished by legislation affecting fines, penalties, and forfeitures, and the abolition of many For the last fiscal year they amounted to only \$605,034.53. These receipts are constantly decreasing, and it has been necessary for Congress to make a deficiency appropriation for this service for each year since 1883.

While the deficiency appropriation for the last fiscal year—\$1,150,000—was \$380,000 larger than the deficiency for the fiscal year 1895—\$770,000—the revenue collected in 1896 was \$7,863,134.22 in excess of the amount collected in 1895, and the cost of collecting a dollar was \$0.0428, while in 1895 the cost of collecting a dollar was \$0.0423.

In 1895 the number of entries of imported merchandise was 822,886, and the average number of persons employed was 4,485, while in 1896 there were 847,203 entries, and the average number of persons employed was 5,085, an increase of 9 per cent in the number of entries, while the number of employees was increased but 5 per cent. During the years 1891 to 1894 the average number of entries was 725,868, and the average expense of collecting the revenue from customs was \$6,788,326.72. Comparing these averages with the number of entries and cost of collection in 1896—\$7,315,034.53—shows an increase during the year 1896 of 121,335 entries, or nearly 17 per cent, and an increase in expenses of \$526,707.81, or less than 8 per cent. During the past year it was necessary to considerably increase the force at the port of New York to properly supervise the exportations of articles with benefit of drawback of the duties paid, and in order to facilitate the landing of passengers and their baggage at night.

The collector of customs at New York advises me that this increase of the force at his port has materially assisted his office "in the transaction of its business in such manner as to confer great benefit upon the traveling public, has elicited expressions of public approval and satisfaction, and has enhanced the vigilance of officials, with corresponding benefit to the revenue." I am satisfied that a further sum could properly have been expended in increasing the compensation of deserving officers who are inadequately paid for the service required of them.

The uncertainty in the amount available for defraying the expenses

of collecting the revenue from customs causes serious embarrassment to the Service and hardship to the employees. I therefore earnestly recommend that the receipts which are credited to the fund for the collection of the revenue from customs be covered into the Treasury and that an annual appropriation of at least \$7,500,000 be made for this service.

A table is appended giving a detailed statement of the penal duties remitted by the Department from January 1, 1896, to November 12, 1896, under the provisions of sections 5292 and 5293 of the Revised Statutes as amended by sections 17, 18, and 19 of the act of June 22, 1874. These remissions amounted in the aggregate to \$262,507.62.

INTERNAL REVENUE.

The receipts from the several objects of taxation under the internal revenue laws for the fiscal years ended June 30, 1895 and 1896, were as follows:

Objects of towation	Fiscal years ended June 30-		Increase.	Dasmana
Objects of taxation.	1895.	1896.	Therease.	Decrease.
Distilled spirits	31,640,617.54	\$80, 670, 070. 77 30, 711, 629. 11 33, 784, 235. 26 1, 219, 432. 46 445, 248. 06	\$807, 443. 36 I, 006, 721. 48 2, 143, 617. 72	\$189,778.72 183,465.93

The total cost of collection for the The total cost of collection for the				4, 086, 292. 47 4, 127, 601. 16
Decreased cost of collection for twist	the fiscal year	r ended June	30, 1896,	41, 308. 69

The amounts above stated are the receipts actually collected during the fiscal years mentioned, but in many cases the money collected on the last day of June is not deposited until the 1st day of July, thus causing a discrepancy between the collections and deposits for that year.

A detailed statement of the receipts and expenditures will be found in the report of the Commissioner of Internal Revenue.*

The percentage cost of collection for the fiscal year ended June 30, 1896, was 2.78 per cent, as against 2.81 per cent for the fiscal year ended June 30, 1895.

The total production of distilled spirits, exclusive of fruit brandies, for the fiscal year ended June 30, 1896, was 86,588,703 taxable gallons;

^{*} See Appendix, page 508.

the total production for the fiscal year ended June 30, 1895, was 79,949,595 taxable gallons, showing an increase in production for the fiscal year just ended of 6,639,108 gallons.

There was also produced during the fiscal year ended June 30, 1896, 1,219,190 gallons of apple brandy, 63,037 gallons of peach brandy, and 2,121,625 gallons of grape brandy, making a total production of 3,403,852 gallons from fruits during the year.

A further comparison of the two fiscal years shows an increase of 986,946 gallons in the production of apple brandy, an increase of 58,379 gallons in the production of peach brandy, and an increase of 398,351 gallons of grape brandy for the fiscal year ended June 30, 1896, an aggregate increase of 1,443,676 gallons produced from fruits as compared with the previous fiscal year.

The quantity of distilled spirits gauged for the fiscal year ended June 30, 1896, was 269,334,762 gallons; the quantity gauged for the fiscal year ended June 30, 1895, was 265,688,906 gallons, making an increase in the quantity gauged for the fiscal year just ended of 3,645,856 gallons.

During the fiscal year ended June 30, 1896, 6,187 distilleries of all kinds were operated; for the preceding fiscal year 2,429 distilleries of all kinds were operated, a comparison showing an increase of 3,758 in the number of distilleries operated for the fiscal year just ended.

During the fiscal year ended June 30, 1896, there were produced 35,859,250 barrels of beer*; the number of barrels produced during the fiscal year ended June 30, 1895, was 33,589,784, making an increased production for the fiscal year just ended of 2,269,466 barrels.

For the fiscal year ended June 30, 1896, the total receipts from the taxes on tobacco, cigars, cigarettes, snuff, etc., were \$30,711,629.11. The receipts from the same sources for the fiscal year ended June 30, 1895, were \$29,704,907.63, showing an increase of \$1,006,721.48 for the fiscal year ended June 30, 1896.

ENGRAVING AND PRINTING.

The operations of the Bureau having charge of this work have been exceedingly gratifying. The cost of the work has been materially reduced, as shown by the report of the Director of that Bureau.† During the last three years its work has increased 74 per cent, while the expenditures have only increased 11.99 per cent. The saving to the Government on the work of the year now under consideration, on the basis of former cost, is \$168,488.04. Out of the appropriations made for the expenses of the work during the year, \$45,460.68 remains unexpended, to be covered back into the Treasury in accordance with law. These results could only have been accomplished by watchful care in the maragement of the Bureau.

^{*} Includes 35,152 barrels removed from breweries for export free of tax. † Sec Appendix, page 567.

The manufacture of adhesive postage stamps for the Post-Office Department has been continued during the year, in accordance with the arrangement made with that Department, with satisfactory results. The saving on this work, by reason of its execution in the Bureau, for the year is \$25,124.48. The stamps now furnished by the Bureau are equal to any that have ever been furnished by private companies.

The work on the new designs for silver certificates was completed during the year, and certificates of the denominations of one dollar, two dollars, and five dollars have been issued.

I desire to again call attention to the urgen, need of the Bureau of an outbuilding to take the place of the temporary wooden sheds now used. Estimates of the cost of this building will be again submitted, and I urge upon Congress the appropriation of the necessary money for its construction.

IMMIGRATION.

The annual report of the Commissioner-General of Immigration* for the fiscal year ended June 30, 1896, shows that there arrived in this country 343,267 immigrants, of whom 340,468 were permitted to land, and 2,799 were debarred and returned to the countries whence they came at the expense of the steamship companies by which they were The increase in immigration over the preceding year amounted to 84,731. Those denied admission into the United States included 2,010 who were likely to become public charges, and 776 who were held to be contract laborers. There were also returned 238 who had become public charges within a year after landing, some, if the cause of falling into distress existed prior to arrival, at the expense of the steamship companies responsible for their transportation, the others at the expense of the immigrant fund. From causes arising within one year after landing, 1,946 immigrants fell into temporary distress, and the cost of their maintenance and hospital charges were paid either by steamship companies or from the immigrant fund as found to be proper.

The Commissioner General reports that, with some exceptions, the immigrants of the past year were of a hardy laboring class, accustomed and able to carn a living wherever industrious people can obtain employment. It is estimated that the money brought with them amounted to at least almost \$5,000,000, and was probably much in excess of that figure, since only those having less than \$30 are required to disclose the exact amount, and it is known that very many bring the savings of years in order to buy land and build homes. It is to be noted that among immigrants of the past year, over fourteen years of age, 28.63 per cent were illiterate, as against 20.37 per cent for the fiscal year ended June 30, 1895. Illiteracy in the United States by the census of 1890 was 13.94 per cent of its population over ten years of age. The heaviest immigration of the year has been from Italy, 57,515 over four-

^{*}Full report omitted from this volume for want of space.

teen years, and contained 54.59 per cent of illiterate; Ireland, 37,496, 7 per cent illiterate; Russia, 35,188, 41.14 per cent illiterate; Austria-Hungary and provinces, 57,053, 38.92 per cent illiterate; Germany, 25,334, 2.96 per cent illiterate; Sweden, 18,824, 1.16 per cent illiterate; while from Portugal came 2,067, of whom 77.69 per cent were illiterate.

The question as to what proportion of the annual arrivals becomes permanent residents has engaged the Bureau of Immigration, and while it has not been practicable to obtain strictly accurate data on the subject, sufficient information has been gathered to indicate that, owing to many who are yearly returning to their old homes, a very large deduction must be made from the arrivals to ascertain how many become permanent residents of the United States, and the Commissioner-General doubts whether there has been any material increase in the foreign population of the United States since 1893.

There has been a decrease in Japanese immigration, there having arrived only 1,110, and the Commissioner-General reports the recent apprehension of a large migration from Japan to the United States to have been without foundation.

Additional precautions to guard the interests of the Immigration Service in respect to those European immigrants who arrive by way of Canada have been arranged, which will be found fully detailed in the Commissioner-General's report.

The immigration laws have been found to work with reasonable satisfaction, but practical administration has demonstrated the necessity for numerous minor amendments and additions, all of which are set forth by the Commissioner-General, with whose recommendations in respect thereto I concur.

The Department has under contract at this time at Ellis Island, New York Harbor, a number of necessary improvements, not the least of which is the enlargement of the island by reclaiming from the river about 2.79 acres of land, the value of which will far exceed the cost of the work. Additional accommodations for the care and comfort of immigrants have also been provided or are in course of building.

The policy as to the sale and rental of certain privileges at Ellis Island has been modified with good results. Formerly these privileges were awarded to the highest bidder, but experience showed that the privilege holder expected to make back the price of his privilege from the necessities of immigrants. Privileges are now granted to those who undertake to exchange money, transport baggage, furnish provisions, and other necessities at prices most beneficial to the immigrant. This change has resulted in a loss to the revenue of about \$17,000 a year, but it is thought the benefits which will accrue to immigrants, for whose welfare the immigrant fund is in part maintained, will more than compensate the Service in this instance.

Alien contract-labor law.

The enforcement of the alien contract-labor law has specially engaged the Immigration Service, and the vigilance of officials has resulted in the deportation of several hundred persons who came in violation of that law, and doubtless the care with which this law is enforced has prevented many other contemplated violations not only by those who might otherwise have sought labor or service abroad, but also by those who might have accepted such employment. The Commissioner-General again calls the attention of Congress to the necessity for a revision of the laws relating to this subject, and points out certain defects which render it sometimes difficult to secure convictions in cases where the law has undoubtedly been violated. I concur in his recommendations.

MARINE-HOSPITAL SERVICE.

The report of the Surgeon-General of the Marine-Hospital Service* deals, first, with the operations of the Service in its relation to the seamen of the merchant marine, and, second, in its relation to the public health. The report shows that for the fiscal year ended June 30, 1896, the total number of patients treated by the Service in its hospitals and dispensaries was 53,804, of which number 12,954 were treated in hospital, and 40,850 received relief at the several hospital dispensaries.

Aid given to other branches of the Government service is enumerated as follows:

- (1) Aid to Life Saving Service: One thousand two hundred and ninety-seven keepers and surfmen were examined as to their physical qualifications, of which number 12 were rejected. Sixty-three applicants for admission to the Service as surfmen were also rejected on account of physical defects. Two hundred and five claims for pensions and other benefits provided by the act of May 4, 1882, made by keepers and crews of the Life-Saving Service, were received and passed upon in the Office of the Surgeon-General.
- (2) Aid to the Inspection Service of Steam Vessels: Eleven hundred and three pilots were examined with regard to their ability to distinguish color, and 58 rejected on account of color blindness.
- (3) Aid to the Revenue Cutter Service: Four officers of the Revenue Cutter Service—candidates for promotion—and 54 candidates for the grades of cadet and assistant engineer were examined physically, of which last number 8 were rejected. Five hundred and eighty-two seamen were examined prior to enlistment, and 27 rejected. Ten boards of officers of the Marine-Hospital Service have been convened during the fiscal year for the physical examinations above mentioned. The retiring board for the Revenue Cutter Service, composed of officers of the Marine-Hospital Service convened by the President, under the act of Congress approved March 2, 1895, was dissolved by the President September 8, 1896.

(4) Aid to the Immigration Service: At all ports of entry in the United States where immigrants disembark, medical officers of the Marine-Hospital Service have been detailed for the medical inspection of immigrants, in accordance with the provisions of the law.

The report contains a statement of the condition of the 21 marine hospitals, with a detailed account of the repairs and alterations made and still needed. During the year the marine hospital at Cleveland, Ohio, which for twenty years had been occupied by the Lakeside Hospital Association, under lease, was turned over to the Department, and is now conducted as one of the regular hospitals of the Service.

Attention is invited to the necessity of a marine hospital for the port of New York, where the sick and disabled seamen of the merchant marine are now treated in a rented building at Stapleton, Staten Island. Copies of resolutions urging Congress to appropriate funds for a marine hospital for this port are on file in the Bureau from the Chamber of Commerce, Maritime Exchange, and other commercial bodies of New York. Within a year the lease of the present hospital building will expire, and some action by Congress will therefore be necessary to provide for the proper care of sick and disabled seamen at this, our chief seaport. I concur in the recommendation of the Surgeon-General that Congress take appropriate action in this matter.

The report further calls attention to the necessity for shelter for deck crews on western rivers, to scurvy among seamen, and the action necessary to prevent the same now under consideration in Congress, and contains a special report upon the proper schedule of rations for seamen engaged in American vessels on long voyages.

Contributed articles by the officers of the Service relating to their medical and surgical work during the year, and historical sketches of several of the marine hospitals, are included in the report.

In the purveying division of the Bureau 370 requisitions for medical and other supplies to meet the needs of 21 marine hospitals and 41 additional relief stations of the Service have been filled. Twelve national quarantine stations, 2 detention camps, and the immigrant hospital at Ellis Island, New York, have also received their supplies through this division.

The total available amount of the marine-hospital fund during the fiscal year was \$583,380.58; the expenditures were \$559,476.24, leaving on hand at the close of the fiscal year \$53,433.87. The balance of the appropriation for the prevention of epidemic diseases, available June 30, 1896, was \$504,340.45.

The Surgeon-General reports a reduction in the expenditures payable from the marine-hospital fund, brought about chiefly by rigid scrutiny of requisitions, and the prevention of unnecessary admissions into the contract hospitals, and the improper detention of patients therein, this latter being prevented by a new regulation requiring patients whose disease or injury requires a probable treatment of more than twenty

days to be transported at once, if their condition permits, to the nearest United States marine hospital, or at the expiration of twenty days' treatment in a contract hospital, the same transfer to be effected; the cost of maintaining patients in the regular marine hospitals being much less than in the contract hospitals. Although the number of patients in hospital during the fiscal year 1896 was about the same as in 1895, the expenditures payable from the marine-hospital fund were for the fiscal year 1896 about \$16,000 less than for the fiscal year 1895.

Public health service.

Under this head the report of the Surgeon-General contains the history for the year of the four principal epidemic diseases—cholera, yellow fever, smallpox, and plague.

Cholera was violently epidemic in Egypt, and the chief concern of the sanitary authorities of the United States was on account of a fear that it might be carried to the several Mediterranean ports of Europe, particularly Naples, from which port came during the past season a large proportion of the immigration to the United States. The Marine-Hospital Service made arrangements for prompt notification should the disease appear in Naples, and by appropriate action through the State Department caused a rigid observance at Alexandria of the Treasury regulation which prohibits the shipment of rags from cholera-infected ports to the United States.

The Surgeon-General calls attention to the responsibility resting upon the government having territorial jurisdiction in the countries where cholera finds its breeding place, and in the countries subjected to the incursion of this disease through Mohammedan pilgrimages, and he refers to contributed articles showing the methods by which the spread of this disease may be prevented and its prevalence in its breeding places be greatly diminished.

Yellow fever.

Under this heading are included reports from the sanitary inspector of the Marine-Hospital Service at Rio de Janeiro, giving the history of the disease in that city, the cause of its continuance, and showing the ravages it makes, particularly among the newly arrived immigrants. The statistical table shows the continued prevalence of the disease in Cuba, and the constant danger of its extension to the neighboring shores of the United States, particularly from Habana, as set forth at length in the special report giving a historical sketch of the epidemics in the United States, which are traceable directly to Habana; and making protest against the unsanitary condition of that port, to which is chiefly due the continued prevalence of the disease.

A special communication upon this subject was addressed to the Honorable Secretary of State, and his letter to the Spanish Minister thereon is included in the report. Reference is especially made to the resolution passed by the American Public Health Association declaring it to be the duty of every government possessing a seaport continuously infected with yellow fever to adopt such engineering and other sanitary measures as may be necessary to cause the disappearance of the disease.

Smallpox.

Smallpox is reported as having prevailed in 22 States, the point of greatest focal activity being the State of Louisiana, where, in New Orleans, it assumed an epidemic form, there being, up to August 1, 1896, 952 cases and 256 deaths since the 1st of November, 1895. The epidemic came to an end in the early fall. The Marine-Hospital Bureau was called upon to assist in the suppression of this disease, particularly in Arkansas, where, in Crittendon County, a camp was established and other measures taken to prevent the extension of the pest to neighboring States, and in Key West, Fla., where the State health officer was aided in his efforts by the detail of an experienced medical officer of the Marine-Hospital Service, who, under direction from the Bureau, established and maintained a detention camp.

Aid was also rendered to New Orleans, Mobile, and Apalachicola by the general vaccination of the crews of all steamers arriving at those ports.

National quarantine administration—Foreign.

In the enforcement of the quarantine regulations of the Treasury Department in foreign ports, sanitary inspectors of the Marine-Hospital Service were maintained throughout the year at Habana, Santiago de Cuba, Panama, Rio de Janeiro, and Yokohama, Japan, and during a portion of the year at Honolulu. A full report from the sanitary inspector at Habana gives in detail the extreme care exercised to prevent yellow fever being carried to the United States. Special precautions were taken with regard to baggage, even during the winter months the baggage of passengers bound for Florida being critically examined, and if considered at all dangerous stamped with a label which called for disinfection at the port of arrival.

Several complaints having been received concerning the incomplete information furnished by the consular bills of health, by request of this Department instructions were issued by the Honorable Secretary of State to consular officers, calling their attention to the deficiencies and enjoining upon them a strict compliance with all details of the regulations.

Reports from two United States consuls, one at Havre, France, and the other at Kobe, Japan, are published in full as illustrating the value of intelligent observance of the quarantine regulations of the Treasury Department which are to be enforced in foreign ports immediately on the appearance of epidemic disease.

Administration of the Treasury quarantine regulations at quarantine ports of the United States.

In the enforcement of the quarantine regulations in United States ports there were 34 fines imposed upon vessels entering without the consular bill of health required by the act of February 15, 1893.

Several circular letters containing amendments and instructions concerning the regulations were issued, and included the following subjects, namely: Notification to be given to State health authorities of the interior of the departure of immigrants arrived upon vessels upon which contagious disease has appeared; relapsing fever made a quarantinable disease; quarantine order requiring at national quarantine stations the disinfection of vessels from suspected latitudes unless specially authorized by the Bureau to give pratique without disinfection; request made of all State and local quarantines to send weekly reports to the Bureau for publication in the weekly edition of the Public Health Reports, which are transmitted to all quarantine stations; letters concerning trespass on quarantine anchorage, upon the boarding of vessels by unauthorized persons before inspection, and upon the right to forcible detention of persons in quarantine. The report also gives an account of special measures to prevent the introduction of yellow fever into Key West through Cuban refugees or returning filibusters; also the measures taken to secure the cooperation of the Canadian authorities in enforcing the disinfection of baggage of all Chinese immigrants arriving at ports on the Pacific coast.

Relations with State and local quarantine authorities.

The relations of the Marine-Hospital Service with the State and local authorities have been generally of an amicable character, although a number of differences of opinion have naturally arisen relative to respective rights and propriety of procedure. The Surgeon General reports that the local authorities have almost without exception given their hearty cooperation to the Bureau. At Portland, Me., the authorities request the Government to take possession of the station. At Baltimore, by reason of representations made, the quarantine inspection service is now maintained throughout the year instead of, as formerly, through the summer and fall months only. At Key West a steam disinfecting chamber has been provided, as required by the Treasury regulations, the attention of the authorities having been called to the necessity of this provision. At Apalachicola a sanitary inspector of the Marine-Hospital Service was appointed during the winter months to make the necessary inspection of vessels, the local quarantine having been discontinued, and later, the regulation requiring disinfection of vessels from yellow fever infected ports has been enforced by directing the collector of customs to refuse entry to vessels from such ports, unless provided with the certificates of discharge from a fully equipped quar-

antine station, it having been found that an attempt was made to disinfect vessels without the proper appliances.

The support of the Bureau was given to the State health officer of Florida in his controversy with the city council of Key West at the time smallpox was epidemic in that city, and pecuniary assistance was rendered to the same officer by the establishment and maintenance of a camp for the detention of those who had been exposed to the disease.

The report of the Surgeon-General also contains the correspondence conducted by this Department with the Governor of Mississippi concerning the United States quarantine station at Ship Island and the establishment of a supplemental station by the State authorities on Cat Island. The allegations concerning the United States quarantine station at Ship Island, made by one of the State quarantine officers, were answered in a letter prepared by the Surgeon-General and duly forwarded, to which no rejoinder has been received.

The relations of the Marine-Hospital Bureau and its representative in New Orleans with the president and quarantine officers of the board of health of Louisiana are amicable, but the board of health, as shown in the report, still objects to Federal surveillance as required by the act of Congress of February 15, 1893.

At San Francisco, while the quarantine station on Angel Island has always been under the management of the Marine-Hospital Service, the boarding and inspecting of vessels has until recently been carried on by the local quarantine officer. Congress, during the last session, made appropriation for placing the boarding vessel belonging to the Marine-Hospital Service in commission, and, accordingly, the Service is now performing the full quarantine function at this port. Some objection was made at first on the part of the San Francisco board of health, but subsequently the same body transmitted a special request to the Secretary of the Treasury that the collector of customs be directed to require the quarantine certificate of the national quarantine officer before admitting vessels to entry.

$Division\ of\ sanitary\ reports\ and\ statistics.$

The editing of the Public Health Reports, issued weekly by the Bureau, has been conducted in this division. A table of mortality statistics for the calendar year 1895 is presented, based upon replies to a circular letter addressed to all cities and towns in the United States having a population, according to the census of 1890, of 1,000 or more. Three thousand seven hundred and fifteen of these circular letters were sent out, and 1,715 replies received. From these replies the table of mortality statistics of 1,461 cities and towns has been prepared. An inquiry has been begun by circular letter with a view to ascertaining the laws and regulations at present in force in the different States and municipalities to prevent the spread of tuberculosis.

Hygienic laboratory.

In the hygienic laboratory investigations have been continued with regard to diphtheria and diphtheria antitoxin; the etiology, pathology, and prophylaxis of pneumonia; and concerning vaccinia and the serum therapy of smallpox. Other subjects of investigation in the laboratory have been: The water supply of Washington, D. C.; enteric and malarial fevers; the disinfection of the mails, bank notes, library and school books; the sanitary condition and disinfection of railway coaches; and a new disinfecting agent, formaldehyd gas, by the use of which the process of all disinfection promises to become simplified.

The report calls attention to the necessity of a separate building for the use of the laboratory. The space provided by present quarters in the fourth story of the Butler Building is too small, and is, moreover, required by the Bureau for office room; but a greater reason is the danger to the occupants of the building. An appropriation has accordingly been included in the estimates submitted to Congress by this Department.

Other public health measures conducted by the Service have been an inquiry by circular letter concerning the water supply and disposal of sewage and garbage of the cities and towns of the United States, the bacteriological study of the water supply of San Francisco, and a consideration of the prevalence and prevention of the spread of tuberculosis.

The closing portion of the Surgeon-General's report gives a brief description of the health service of the United States as it now exists, and resolutions passed by certain medical and sanitary associations relative to the enlarging the scope and facilities of the Marine-Hospital organization.

REVENUE CUTTER SERVICE.

The general and varied work of the Revenue Cutter Service, embraced in its operations upon the Atlantic Seaboard; the patrol of the North Pacific and Bering Sea, caring for the interests of the Government and of commerce as far north as Point Barrow in the Arctic Ocean; the vigilance and activity of its officers and vessels upon the Florida coast and elsewhere in the enforcement of the neutrality laws, in addition to the performance of its distinctively routine duties; in the enforcement of the customs and navigation laws; in the saving of life; the relief of distressed navigators, wherever and whenever found-abundantly commend its value and efficiency as an arm of the public service. has not been a single year in the history of the Service when, with its old and badly adapted class of vessels and depleted personnel, its resources have been as severely taxed as they have been during the one just closed, and vet, with the numerous calls made upon the organization, it has ably met them and an incomparable record of service rendered is presented.

Statistics.

An active patrol of the coast line, rivers and harbors of the United States, especially on the sea, Gulf, and Great Lakes, has been maintained, and in the performance of this work the vessels of the Service have cruised an aggregate of 307,133 nautical miles; boarded and examined 20,250 vessels of the merchant marine, of which number 645 were reported to the proper authorities for violations of the United States customs and navigation laws, incurring penalties in the sum of \$210,994. During the year 67 vessels, with 694 persons on board, in actual distress, were assisted, the value of the vessels and their cargoes amounting to \$1,011,807. The pecuniary value of the services thus rendered to the Government and to commerce represents a sum equal to \$1,222,801, which is \$287,801 in excess of the annual appropriation for the maintenance of the Service.

In aid of the Life Saving Establishment, vessels of the Service have cruised 6,681 miles.

The lives of 78 persons were saved, 60 of whom were actually taken from the water and rescued from drowning. The lives of twelve others were saved from vessels capsized in a hurricane near Savannah, Ga., while five others were rescued after their escape from a wreck, where they were found in destitute condition.

Special services.

For inspecting, drilling, and disciplining life-saving crews and superintending the construction of life-saving stations there have been constantly on duty with the Life-Saving Service, under the direction of its General Superintendent, 12 officers of the Revenue Cutter Service. The entire time and attention of these officers has been devoted to the work of the Life-Saving Service.

There have been on duty on detached service, in connection with the construction of new vessels for the Service, 18 officers of all grades. The Service has, when all grades are full, but 222 officers, from which it will be seen that the number required for duty in the Life-Saving Service under the act approved June 18, 1878 (12), and those absolutely necessary for special work, such as the superintendence of vessels building (18), and other special work (8), making 38 in all, makes a serious reduction of the force actually required for duty afloat, on the 36 vessels in commission.

Lieut. G. L. Carden, R. C. S., while in charge of the launch Scout, at Friday Harbor, San Juan Island, Washington, on September 4, 1895, was appealed to by the civil authorities at that place for assistance in protecting from mob violence 2 men charged with murder, who were threatened with lynching. Lieutenant Carden responded to the call of the authorities, received the prisoners on board his vessel, and held the mob at bay until his launch had steamed beyond their reach; conveyed

the prisoners to Whatcom, Wash:, and delivered them into the custody of the State authorities at that place.

The duty annually performed by the Revenue Cutter Service, under the provisions of section 1536, Revised Statutes, to afford aid to distressed navigators during the winter months, was performed on the North Atlantic Coast by 5 vessels of the Service, designated by the President for the work. During the four months from December 1, 1895, to April 1, 1896, these vessels cruised 20,071 nautical miles, boarded and examined 1,553 vessels, and assisted 22, valued with their cargoes at \$239,382.

The steamer Corwin, Capt. F. M. Munger, was ordered from Port Townsend, Wash., on February 11, 1896, to cruise in search of the British bark Cadzan Forrest, supposed to have met with disaster on the coast of Vancouver. The Corwin returned after a cruise of ten days without tidings of the missing vessel, having cruised a distance of 892 nautical miles. While on this cruise, Captain Munger reports having found the British sealing schooner Wanderer wrecked on the coast near San Jasef Bay. He succeeded in rescuing the master and 4 men from the wreck, whom he found in destitute condition, without means of relief or transportation, and conveyed them to Victoria, British Columbia.

During the severe hurricane that swept the coast in September last First Assistant Engineer Geo. B. Maher, R. C. S., in charge of the launch *Tybec* at Savannah, Ga., with the crew of that vessel, rendered conspicuous service in saving the crews, 12 persons in all, of several vessels capsized in the river off Savannah.

Capt. W. J. Herring, R. C. S., with the officers and crew of the steamer *Morrill*, rendered valuable aid during four hours of continuous labor in extinguishing a confiagration on the cotton wharves at Mobile, Ala., and saved the life of the master of the burning Swedish barkentine *Verdandi*.

Under the provisions of the act, approved March 6, 1896, relating to the anchorage and movements of vessels in the St. Marys River, Michigan, rules and regulations were formulated and promulgated, and the steamer *Johnson*, Capt. A. B. Davis, R. C. S., commanding, with a full complement of efficers and men, was stationed in the St. Marys River, for the enforcement of the law during the season of navigation. The work has been performed in a most creditable and efficient manner; the rules and regulations appear to have met every exigency, and vessel owners, masters, and others interested in the vessel carrying trade of the great Northwest have freely expressed their appreciation and praise of the manner in which the law has been put into operation.

Patrol of the North Pacific and Bering Sea.

For the enforcement of the provisions of the acts of Congress, approved April 6 and 24, 1894, and a supplementary act, approved June 5, 1894,

and the President's proclamations, issued April 9 and 14, 1896, the patrol of the North Pacific and Bering Sea was performed this year, as it was last, by a fleet of vessels of the Revenue Cutter Service, under the command of Capt. C. L. Hooper, R. C. S. Six vessels—the Wolcott, Capt. M. L. Phillips; the Grant, Capt. J. A. Slamm; the Perry, Capt. H. D. Smith; the Rush, Capt. W. H. Roberts; the Corwin, Capt. W. D. Roath; and the Bear, Capt. Francis Tuttle-sailed at the opening of the season and cruised actively until its close, disbanding at Unalaska September 19 last. The able captains and other officers and the faithful crews of the fleet have, under the skillful direction of the officer in command, met every emergency and are deserving of the highest consideration and praise. This fleet has cruised over 100,000 nautical miles, boarded and examined 116 different vessels, of which number 66 were engaged in fur sealing. Of this latter number, 54 were British and 12 American. These vessels were boarded by the several cutters of the patrol fleet in the aggregate 340 times, and the boarding officers actually handled, counted, and scrutinized 46,900 seal skins. were 4 British and 3 American vessels seized for violation of the fursealing regulations, all of which were disposed of in accordance with the law.

The Bear made her annual cruise to Point Barrow in the Arctic Ocean, discontinued the refuge station there, the Department being satisfied that the necessity for its continuance had ceased, and disposed of the property in accordance with instructions.

While on this cruise the *Bear* encountered heavier ice and more of it than had been known in the Bering Sea for a great many years, the harbor of Port Clarence being closed against her with pack ice, a condition hardly ever known before; but, notwithstanding the unfavorable conditions, the ship made a most successful cruise.

In the interest of the Educational Bureau of the Department of the Interior, the *Bear* visited St. Lawrence Island, Indian Point, St. Lawrence Bay, Cape Prince of Wales, St. Michaels, Unalaklik, Galovin Bay, and, when the ice pack cleared, Port Clarence, where arms and ammunition were landed for the reindeer station at that place.

The brig *Geneva*, of San Francisco, was rescued from the ice and towed to an anchorage in the harbor of St. Michaels. The officers of the *Bear* made a rough survey of St. Michaels Harbor and plotted the soundings on outline Coast Survey charts, and the same character of work was done at Unalaklik; the latter place was never before visited by a national vessel.

At Point Hope 15 men from the wrecked whaling brig *Hidalgo* were taken on board and given transportation to Unalaska.

The mission school at Point Barrow was supplied with provisions and fuel, and that at Indian Point with fuel. The whaling station at Point Barrow was provided with fuel for the winter. This was Captain Tuttle's first cruise to Point Barrow, in command of the *Bear*, and he

and his officers are deserving of high commendation for the efficient and cheerful manner in which they performed their hazardous and responsible work.

The Rush, Capt. W. H. Roberts, in addition to her regular cruising in the North Pacific and Bering Sea, was of service to the experts appointed under the provisions of the public resolution of June 8, 1896, in the prosecution of their labors.

The surgeon of the Bering Sea fleet, stationed with Capt. C. L. Hooper, commanding, at Unalaska, rendered medical aid and treatment to 137 persons of the native population, besides that extended to the officers and enlisted men of the fleet.

Cuba.

Owing to the condition of affairs on the Island of Cuba, and the frequent attempts to send illegal expeditions from the United States, it has been found necessary to maintain, during the entire year, several vessels on the coast of Florida, for the enforcement of the neutrality laws. To this end the cutters Forward, Morrill, McLane, and Winona have formed a cordon of vigilant sentinels around the peninsula of Florida, from Pensacola on the west, Key West and Tortugas on the south, to Cape Florida on the east coast. The presence of these vessels in Florida waters has greatly assisted in breaking up or scattering filibustering expeditions. The following instances afford evidence of the watchfulness of the Service in enforcing the neutrality laws:

On September 17, 1895, the Winona, Captain Abbey, scized, at Bahia Honda, Florida, the schooner Lark, with a crew of 37 persons on board.

On September 19, 1895, the *McLane*, Captain Hand, seized the steamer *Antinett* off Big Pine Key, Bahia Honda, Florida, having on board 7 Cubans and firearms.

On December 5, 1895, the Winona, Captain Abbey, and the Forward, Captain Roberts, discovered a camp at Middle Cape Sable, Florida, recently occupied by some fifty persons, where army outfits and medical supplies were found concealed in and about the camp recently abandoned, which gave evidence of the enterprise in which its occupants were engaged.

On March 4, 1896, the *Morrill*, Captain Herring, seized the schooner S. R. Mallory off Long Inlet, west coast of Florida, having a cargo of arms, ammunition, hospital stores, and other articles of army outfit valued at \$25,000.

On May 23, 1896, the *Boutwell*, Captain Kilgore, detained the steamer *Three Friends* in Savannah River, Georgia, after she had taken on board munitions of war, and convoyed her thence to Jacksonville, Fla.

On June 25, 1896, the Winona, Captain Gooding, seized the steamer City of Richmond in Biscayne Bay, Florida, having on board 34 Cubans and 449 cases of ammunition, all intended to be transferred to the

steamer Three Friends. While en route with the City of Richmond, the Three Friends was fallen in with, when she was also seized, and both vessels were taken to Key West.

All the above named vessels, the people on board, and their cargoes were delivered into the custody of the proper authorities.

The Boutwell, Colfax, and Windom are at this time engaged in the same character of effective service on the coast from Wilmington, N. C., to Jacksonville, Fla.

New vessels.

The vessel for the New England Coast and one for the Great Lakes, authorized by the Fifty-third Congress, are in course of construction at East Boston, Mass., and Cleveland, Ohio, respectively. Fair progress is being made on the New England Coast ship, and it is hoped that it will be delivered to the Government before the close of the current fiscal year, while the lake vessel is nearing completion and will be ready to go into commission with the opening of navigation on the lakes in the spring.

The vessel authorized for service on the Pacific coast is in course of construction by the Wm. Cramp & Sons Ship and Engine Building Company, at Philadelphia, and the indications are that it will be finished in the first days of January next.

The vessel for harbor service at San Francisco is nearing completion at Seattle, Wash.

Two vessels for service on the Great Lakes were authorized just before adjournment of the last session of Congress, and the plans and specifications upon which to invite proposals for their construction are nearly ready; it is expected that contracts will be entered into for their construction early in December.

It will be seen from the foregoing that Congress has provided for five new vessels for this Service. There are in service at this time many vessels that are very old, some of them relics of the late war. The age and consequent bad condition of many of the vessels of the Service involve an outlay in repairs, to keep them even fit for use, of considerable sums of money every year, and, as time goes on, the necessity for large expenditures in this direction becomes inevitable. It is not economical or consistent with good administration to continue a practice of long standing, which, in the absence of remedial legislation by Congress, must continue to be followed, of laying out money on the old, small, and obsolete type of vessels which now compose the fleet. There are now pending in the House of Representatives bills for the construction of two vessels for the Gulf Coast, two for the Pacific, and one for the Atlantic Coast-for the New York station-all of which have my approval, and have passed the Senate. All of these are absolutely necessary.

New York, the chief seaport of the country, having more ocean trade,

and collecting more customs duties than all other ports in the country combined, has been without a sea-going cruiser for more than two years. The new vessels for the Pacific and Gulf coasts are essential to the efficiency of the Service in those waters, and I earnestly recommend that the bills now pending in the House, providing for five new vessels, may be passed and the necessary authority to build them be granted at the earliest time practicable. I further recommend that a vessel for harbor service at Boston, Mass., to take the place of the one now there; another for harbor service at New York, one for like service at Philadelphia, and a fourth for the work on the St. Marys River, to enforce the provisions of the act approved March 6, 1896, be provided for.

It should be understood that the new vessels recommended are not to be additions to the fleet, but are designed to take the place of a like number of old vessels which should be sold.

The extensive coast line, the multifarious and constantly increasing labors devolving upon the Revenue Cutter Service, under the requirement of the law, demand that an efficient class of vessels, and enough of them, be provided by Congress.

Personnel.

In my last annual report I took occasion to say:

"There is no branch of the public service which, in a time of peace, requires such continuous, laborious, and hazardous service as this, nor is there any other branch in which the compensation is so inadequate in comparison with the character and extent of the work performed. The duties imposed upon the officers engaged in this service often subject them to great exposure and hardship, and require the exercise of a high order of skill and discretion, and it is, therefore, of the first importance that the mental and physical qualifications of the force should not be impaired by the retention of old, infirm, or otherwise disabled members. The simple power, which now exists, to place an officer on "waiting orders," but with no authority to fill his place on the active list by promotion, is not sufficient to preserve the efficiency of the Service, and unless further legislation is granted the injurious effects of the present system will soon be severely felt."

Very great benefit has resulted from the act approved March 2, 1895, under the provisions of which 39 officers were retired from active service because of the infirmities of age and physical disabilities incurred in the line of duty. But the enactment referred to provided for those only who were incapacitated at the date of the approval of the act, and, therefore, under the law as it now stands, should an officer become disabled his place can not be filled by promotion, but he must be continued on the active list, no matter what may be the necessities of the Service, and thus the original condition of things, the retention upon the lists of the officers physically disqualified, must be soon restored.

There is now upon the calendar of the House, Senate Bill 1461, the provisions of which meet my cordial approval, and I earnestly recommend that it be enacted into law at the earliest practicable date.

Pensions.

There are in the Revenue Cutter Service about 900 enlisted men of all grades. These men are enlisted for a term of three years, and in the same way that men are enlisted for the Army and Navy. the provisions of section 4714, Revised Statutes, the officers and seamen of the Revenue Cutter Service, who may be wounded or disabled in the discharge of their duty, "while cooperating with the Navy, by order of the President," may be placed upon the Navy pension list. The ordinary duties devolved upon the Revenue Cutter Service are fraught with greater risk of life and limb than that incurred by the Army or Navy in time of peace, while in time of war they are at least equal, and every argument that applies as a justification for extending this bounty to the enlisted men of those services has equal force on behalf of the enlisted men of the Revenue Cutter Service. I therefore recommend that the law, section 4741, Revised Statutes (act of April 18, 1814), be amended to read as follows:

"The enlisted men of the Revenue Cutter Service of the United States, who have been, or may be, wounded or disabled while in the actual discharge of their duties, shall be entitled to be placed upon a pension list, under the same regulations and restrictions as are provided by law for enlisted men of the Navy."

LIGHT-HOUSE SERVICE.

Attention is invited to the pressing necessity for more liberal appropriations to maintain the Light-House Establishment. Congress makes appropriations at each session for increasing the number of light stations, but it does not increase, in like ratio, the appropriations for supplying these stations with oil, wicks, chimneys, cleaning material, and the like; for paying the wages of the additional keepers required, for keeping the light stations in proper repair, and for keeping up the buoyage of the coasts. The estimates made for these purposes are based on the actual present necessities of the Service, as set forth in itemized requisitions made by the light-house district officers, and the appropriations asked for will, if provided, make it possible to keep the Service up to a high standard of efficiency.

The appropriation made for salaries of keepers last year was sufficient to pay those already in the Service, but nothing was left with which to pay those whose services were needed to care for the new light houses which went into operation during the current fiscal year. The Light-House Board has, therefore, been compelled to ask that an appropriation be made in the urgent deficiency bill to enable it to keep these stations lighted.

Although the number of fog signals has been constantly increasing, the annual appropriation for the maintenance of these signals has, for a number of years past, been quite inadequate. There will be for years to come a demand for additional lights as well as fog signals in waters where the full commercial development is yet to be reached, but where aids to navigation are approaching completion the improvement now most needed is more effective fog signals. In most localities the larger portion of the accidents to vessels takes place during thick weather, when lights can not be distinguished and when audible signals alone are effective. The conditions are now such that it is impossible to properly maintain the service and to replace obsolete apparatus and make other urgently needed improvements at existing stations without increased appropriations.

Some of the improvements which are greatly needed, and which could now be made, are more efficient quick steaming boilers for stations using steam signals, to facilitate starting the signal when needed, and to give greater economy while in operation; compressed air apparatus, operated by oil engines, for stations where the water supply is deficient; and an improved striking apparatus, to render fog bells more effective. The estimate for expenses of fog signals made by the Light-House Board is considered, under the circumstances, quite conservative, and it is commended to the favorable attention of Congress.

The appropriation made for the expenses of buoyage, while sufficient to maintain the buoys already in place, proved insufficient to enable the Light-House Board to meet even the most urgent additional needs of commerce, and especially to place and maintain the new anchorage buoys required by recent statute. The Board has, therefore, been compelled to ask that a deficiency appropriation be made to enable it to meet the added expenses and maintain this increased buoyage during this fiscal year. These requests are commended to favorable consideration.

The work of establishing the various new light and fog-signal stations for which Congress has provided has been prosecuted as rapidly as practicable during the year. In several cases protracted delays have resulted from the legal proceedings necessary to obtain titles to the land on which the new stations are to be erected.

The plans for the new light vessels to be stationed off Fire Island, New York; Diamond Shoal, North Carolina, and San Francisco Harbor, California, have been prepared, and arrangements are being made for their construction. The contractor for building the light vessel which is to be placed off Umatilla Reef, Oregon, having failed to finish it within the time agreed on, and there being no probability that he will be able to finish it at all, the contract has been annulled and other arrangements are being made for its completion.

Estimates are submitted for building six light vessels, three first-class vessels for outside ocean service, and three small, inexpensive vessels for use on the Great Lakes. One of the first-class light vessels is to take the place of regular vessels brought in for repair. The Light-House

Board has submitted estimates for the building of a new steam tender to take the place of one about worn out, and which will be unseaworthy by the time the new one can be made ready to take its place. These steamers are of exceeding value to the Light-House Establishment, enabling it to quickly replace buoys or light ships when they go adrift, to promptly repair light stations, to furnish light houses with supplies needed to meet an emergency, to make frequent inspections of light houses and light-ships, and to keep in constant force the discipline of the Service. The vessel it is proposed to replace is now so deteriorated from age and severe service that it can not keep the sea in heavy weather, but is forced to seek refuge in harbor at the very times when it is most needed.

LIFE-SAVING SERVICE.

The Life-Saving Establishment, at the close of the fiscal year, comprised 256 stations, of which 186 were located on the Atlantic and Gulf coasts, 55 on the coasts of the Great Lakes, 14 on the Pacific coast, and 1 at the Falls of the Ohio, Louisville, Ky. The number of disasters to documented vessels within the field of the operations of these stations during the year was 437. On board these vessels were 4,608 persons, of whom 4,595 were saved and 13 lost. The estimated value of the vessels involved was \$8,880,140, and that of their cargoes \$3,846,380, making the total value of property imperiled \$12,726,520. Of this amount, \$11,293,770 was saved and \$1,432,750 lost. The number of vessels totally lost was 67.

Besides the foregoing, there were 243 casualties to small undocumented craft—sailboats, rowboats, etc.—during the year. On board of these there were 594 persons, of whom 587 were saved and 7 lost. The value of property involved in these casualties is estimated at \$119,265, of which \$114,915 was saved and \$4,350 lost.

The number of disasters within the scope of the Service and the results therefrom aggregate as follows:

Total number of disasters.	680
Total value of property involved	\$12, 845, 785
Total value of property saved	\$11, 408, 685
Total value of property lost	\$1, 437, 100
Total number of persons involved	
Total number of persons lost	20
Total number of shipwrecked persons succored at stations	613
Total number of days' succor afforded	1, 436
Number of vessels totally lost	67

In addition to the number of persons saved from vessels, 82 others were rescued by the station crews under such circumstances of peril that most or all of them would have been lost but for the timely assistance rendered.

The life-saving crews saved and assisted to save during the year 472

vessels, valued with their cargoes at \$4,853,110. Of these vessels they saved without outside assistance 318, valued with their cargoes at \$977,495, with a loss or damage of only \$11,712. In the remaining 154 instances they united with other agencies—wrecking vessels, tugs, revenue cutters, etc.—in saving property valued at \$3,599,775, out of property imperiled of an estimated value of \$3,875,615.

The crews also rendered assistance of minor importance to 167 other vessels in distress. They also warned from danger by night signals of the patrolmen 210 vessels, and by day signals 19; in all, 229 vessels. The loss of life and property averted by such assistance and warnings can not, of course, be even approximately estimated, but that many disasters were prevented by the warnings is evident from the circumstances under which they were given.

The number of disasters during the year has exceeded that of any previous year in the history of the Service, but as regards the saving of both life and property, the foregoing data furnish the most satisfactory record the Service has vet exhibited. The best previous record was that of the year 1895, when it was shown that in only one prior year the loss of life had been smaller in proportion to the number of persons exposed, and the loss of property less in proportion to the amount For the past year the loss of both life and property is relainvolved. tively much less than ever before. The average annual loss of life since 1877, when the Service was generally extended to the sea and lake coasts, has been 1 out of 112 persons on board vessels involved in disaster and 21 per cent of the value of property imperiled. 1895 it was 1 out of 224 such persons and 14 per cent of such property, while last year the loss was only 1 out of 260 such persons and 111 per cent of such property.

The total net expenditure for the maintenance of the Service during the year was \$1,401,805.97.

The four new stations located, respectively, at Core Bank, North Carolina, Baileys Harbor, and Plum Island, Wisconsin, on Lake Michigan, and at Yaquina Bay, coast of Oregon, mentioned in the last annual report as approaching completion, have been finished and put into operation. The floating station referred to in that report as in contemplation for location near City Point, Boston Harbor, for the prevention of loss of life incident to the numerous accidents by the capsizing of yachts and sailboats in that neighborhood, has also been completed and put in commission.

Two new stations, one at Wood End on Cape Cod, near the harbor of Provincetown, Mass., and one at Rocky Point on Long Island, near East Marion, N. Y., have also been built, and are receiving their equipments. Titles have been obtained for location of the stations authorized to be established at Damariscove Island, Maine, and Petersons Point, Washington, and the plans and specifications for the buildings are

nearly completed, so that proposals for their construction will soon be invited.

New stations to replace old and inadequate ones have been built at Little Beach, Absecon, below Atlantic City, and Cape May, N. J., and one also at Cape Disappointment, Washington, and extensive repairs and improvements have been made to stations in the Third district, coast of Long Island, Eleventh district, coast of Lake Michigan, and in the Twelfth district, on the Pacific coast.

Attention was called in the report of last year to the inadequacy of the salaries of the superintendents of the life-saving districts. These officials are charged with a general supervision of the affairs of their respective districts, to which is added a heavy financial responsibility. The bonds which they are required to give are all large, several having a penalty as high as \$50,000. It is therefore recommended that the pay of these officers be fixed at \$2,000 per annum, which in my opinion would not be even a full compensation for the services rendered.

Attention was also called to the difference in the rates of wages paid to surfmen, and to the discontent which the discrimination engendered. The trouble arising from that source has not diminished, but has rather increased during the year, and the recommendation made last year that the monthly rate of \$65, established by the act of July 22, 1892, be restored, is again made.

SEAL FISHERIES.

An adequate patrol of the fur-seal fisheries during the past year has been maintained by the Revenue Cutter Service, as will appear under The returns of the catch for the past season indicate a total of about 43,000 seals taken at sea by British and American sealing vessels from the so-called American herd. Of this total, about 29,000 were taken in Bering Seaduring August and September, and the balance in the North Pacific Ocean between January and May. The eatch on the Pribilof Islands for the past season was 30,000, of which 23,842 were taken on St. Paul Island, and 6,158 on St. George Island. It was found, upon investigation, that the rapid decline in the female seals on the islands had left a large surplus of male seals, which could be killed without disturbing the proper proportions of the sexes on the islands. I determined to permit, therefore, not exceeding 30,000 seals to be taken, and this quota was fully taken. This number does not indicate that the fur seals have increased on the islands. On the contrary, there has been a most perceptible decrease during this last season. The rapid destruction of the females at sea, however, has left, as above stated, an undue proportion of males, and it was for this reason deemed advisable to take the number above stated.

During the past season the British Government, with the consent of our Government, sent Prof. D'Arcy Wentworth Thompson, of University College, Dundee, and Mr. James M. Macoun, of the Geological Museum,

Ottawa, and Mr. Andrew Halkett, of the Department of Marine and Fisheries, Ottawa, to investigate the fur-seal question. Professor Thompson and Mr. Macoun visited the Pribilof Islands, and spent much of the summer there. Mr. G. E. H. Barrett-Hamilton was also sent by the British Government to the Russian seal islands, to make an independent investigation there. These gentlemen have, I understand, made a report to their Government.

Under the provisions of a joint resolution of Congress, approved June 8, 1896, Prof. David S. Jordan, of Leland Stanford University, California, was appointed as an expert to examine into the present condition of the fur-seal herd on behalf of our Government. There were associated with him Mr. F. A. Lucas and Dr. Leonhard Stejneger, of the U.S. National Museum; Mr. Charles H. Townsend, of the U.S. Fish Commission; Lieut. Commander Jefferson F. Moser, U. S. N., and Mr. Joseph Murray, formerly special agent of the seal fisheries. gentlemen spent the summer on the Pribilof Islands, the Russian Commander Islands, and an expedition was also made to the Kuril Islands, off the coast of Japan. Although Professor Jordan has not yet prepared his final report, enough appears from the preliminary report which has just been received to indicate that the sole cause of the decrease in the fur-seal herd is pelagic sealing. The fur-seal herd is threatened with rapid extermination unless changes are speedily made in the award regulations. It is sincerely to be hoped that the respective governments may agree upon the needed changes to effectually preserve the herd and protect this valuable industry and its product for the use of man-

It is proper at this time to make mention of the meritorious services of Mr. Lucas and Dr. Stejneger of the U. S. National Museum. Under the terms of the resolution they were detailed for the purpose of assisting in this investigation. No provision, however, was made by which any compensation could be given them in addition to their regular remuneration as members of the National Museum. I earnestly urge upon Congress the propriety of appropriating additional compensation to these gentlemen for the valuable services rendered by them. The work performed could not properly be said to be incident to their regular employment. The hardships inevitably suffered were many, and I believe it to be just and equitable that reasonable extra compensation be given them for their services.

SALMON FISHERIES OF ALASKA.

Under the requirements of an act of Congress approved June 9, 1896, three inspectors were appointed to visit the canneries and fishing streams of Alaska, with a view to the enforcement of the law for the protection of the salmon. This commission entered upon the duty of inspection in July—as soon as the appropriation became available—and

the report of its work was made late in November. From this report it is apparent that many of the smaller streams which formerly produced large numbers of red salmon have been reduced to such a condition as to render their use unprofitable to those engaged in the fishing industry. This condition has been caused by a total disregard of the law of 1889, which prohibited the erection of barricades, dams, or other obstructions tending to deter the ascent of salmon to their spawning grounds. The large expanse of territory affected by that law could not be covered by a single officer during the season, owing to the inadequate transportation facilities, and inspection was therefore confined to a few canneries.

Under the recent act the inspection has been more thorough, extending to the streams and spawning grounds, thus bringing the law directly to the attention of those engaged in the unlawful practices. Complaints were investigated and reported to the Department by the inspectors, whose presence among the fishermen and personal examination of the various localities enabled them to reach conclusions free from prejudice to either of the parties concerned.

All the streams inspected in which obstructions contrary to law were found were ordered cleared, and in every case such orders were promptly obeyed. In order to preserve this condition, inspectors will be required to make occasional visits during the fishing season, and to this end better means of transportation should be provided, so that the officials will not be obliged to ask favors at the hands of those interested in evading the law.

The condition of the fisheries in Cooks Inlet, Prince William Sound, and Kodiak is much better than that of southeastern Alaska. This is due, no doubt, to the fact that the numerous companies engaged in the first-named places watch each other closely for violations of the law, and thus assist in protecting the industry. In the southeastern part, however, the packing stations are many miles apart, and the supply of fish is drawn from streams 50 or 60 miles distant, and there is consequently sharp competition for the best fish. This competition, which enhances the value of the fish, necessarily results in improper methods of obtaining a supply with the least possible labor, and hence the fencing and barricading of streams has been practiced for many years, until the streams no longer offer inducements to the fishermen.

The law of June 9, 1896, has been thoroughly promulgated throughout the entire territory, by the force of inspectors placed in the field during the season just closed, with a promise of good results. Some changes might be made which would prove valuable, as suggested in the report of the inspector.

The protection of the salmon trout, one of the most destructive of the numerous enemies of the salmon, is evidently a mistake and should be withdrawn.

The Saturday close season should be changed to Sunday, as many of the natives, having been taught to regard Sunday as a day of rest, must

either lose one day's labor or break a long-established rule by working on Sunday. As this is a hardship upon them, without any compensating benefit to the fisheries, it is respectfully urged that the law be changed in this respect.

The law, as drawn, confers authority upon the officers to protect the salmon, but no authority is given them to prevent the packing of fish unfit for food, or to prevent the wanton waste of good fish, sometimes practiced by the packers. The law should be so amended as to confer this authority as a protection to the consumers and in order that the useless destruction of fish may be prevented.

The pack for the current year is largely in excess of that of 1895, being 965,450 cases and 9,314 barrels.

The number of persons employed is estimated at 5,600, of which about 2,000 were white, 1,300 Indians, and 2,300 Chinese.

The value of the tin plate used for cases amounted to \$470,000, the duty on which amounted to about \$140,000.

About \$130,000 has been paid in wages to resident whites and natives in Alaska by the packing companies, of which the Alaska Packers Association has paid \$100,000. This association also maintains two medical stations in the Territory, one in Bering Sea and one in the Kodiak District, at which places the natives can obtain medical advice and medicine free of charge.

Hatcheries have been established, one at Karluk and one at Etholine Island. In the Karluk District 5,500,000 eggs have been secured and over 2,000,000 at Etholine Island.

As suggested in the reports of inspectors, some protection should be afforded to those engaged in propagating fish, so that the result of their labor would benefit them directly. This can be done by securing the persons engaged in these enterprises certain exclusive rights to the stream, or parts of the stream, on which the hatchery is located, and a portion, at least, of the beach contiguous to the mouth of such stream. If such action is taken it will probably result in the erection and maintenance of hatcheries at every packing station in the Territory.

PUBLIC BUILDINGS.

During the past year work has been prosecuted on 53 buildings, including extensions and repairs specifically appropriated for, of which number 11 buildings have been completed for occupation, thus placing under the control of the construction branch of this Department 383 buildings, classified as follows:

Completed and occupied	317
In course of construction during year 53

These figures show a continuous and most gratifying growth of our shipping on the Great Lakes, where, within relatively a short time, natural advantages have enabled us to build a merchant navy surpassed in extent only by those of Great Britain and Germany, and surpassing that of France or Norway, or of any other two foreign powers combined.

To the end that we may regain our maritime rank in foreign trade, I have the honor to renew the recommendation of my two preceding annual reports for the repeal of the law forbidding American registry to vessels owned by Americans and engaged in the foreign trade unless built in the United States. Our own experience, as well as that of other maritime nations, proves that law useless for the protection of American shipbuilding, while it represses American navigation. those nations which have seen fit to apply public funds to the development of the private enterprises of shipowners and shipbuilders, years ago repealed similar laws restricting to home-built vessels national registry and the use of the national flag. The urgent need of the adoption by the United States of modern and liberal policies toward shipping has been emphasized this year by the appearance of Japan as a maritime rival of this country on the Pacific. An extension at least of the legislation which resulted in the admission of the New York and Paris, the construction of the St. Louis and St. Paul, and the partial reestablishment of the United States as a maritime power on the Atlantic appears necessary to meet the new conditions confronting us on the Pacific.

From all legislative projects for the development of our shipping, in my judgment, should be excluded the adoption of discriminating duties of 10 per cent on all cargoes imported into the United States in foreign vessels. That plan would involve the total or partial abrogation of our treaties of friendship, commerce and navigation, with nearly all the nations of the world, the product of three generations of American statesmen. It would throw into confusion our trade relations with the rest of the world for the indefinite period required to recast our treaties on the basis of commercial warfare instead of commercial friendship. Its almost certain result would be the adoption by foreign nations of

retaliatory measures, not only against American shipping, which would deprive it abroad of any imagined benefits in home ports, but also against our exports, thus injuring all our industrial interests, and most of all agriculture, chief of those interests. The Commissioner of Navigation estimates, on the statistics for 1895, that the measure would at the outset impose a tax of about \$59,000,000 on our international exchanges, and if it could be maintained, would increase our ocean freight bills by fully 40 per cent, thus indirectly reducing the markets for our products.

At its late session Congress and its committees considered carefully, and in some instances took partial action on, measures recommended by the Commissioner of Navigation, defining the Government's guardianship of seamen, relating to tonnage taxes, repealing unnecessary, antiquated, or restrictive statutes, and concerning various details of the navigation laws. I again invite attention to these measures, and concur in the hope that the labor already expended on them may not be lost, and that Congress may take final action upon them before the adjournment of the present session.

I renew the recommendation of my two former reports that the several marine bureaus of the Treasury Department be assembled under the direct supervision of one Assistant Secretary of the Treasury, and to carry out the recommendation I request that Congress provide for an additional Assistant Secretary.

The annual work of the Bureau of Navigation has increased over 20 per cent during the past three years without increase in the clerical force of the Bureau or in its annual appropriation of \$26,000. this time by the abolition of useless registry bonds, American shipowners have been saved \$30,000 annually, and our lake shipowners have been saved annually about \$15,000 in charges hitherto imposed in Canada in contravention of the policy of reciprocity. The adoption of a modern measurement law has saved American shipping many thousands of dollars in foreign ports and in domestic licenses, taxes, and charges based on net tonnage. The adoption by the maritime world of the Revised International Rules to prevent collisions at sea, the chief work of the Washington International Marine Conference of 1889, has been effected, and those rules will go into effect next July. New and satisfactory rules for the Great Lakes have been enacted, and many minor measures for the benefit of American shipping, upon the recommendation of this Department, have been approved by Congress and the President.

STEAMBOAT-INSPECTION SERVICE.

The Supervising Inspector-General reports,* for the fiscal year, that the personnel of the Service at its close consisted of 169 officers, clerks, and messengers.

The expenses were: For salaries, \$283,710.97; contingent expenses, \$67,468.20.

^{*} Full report omitted from this volume for want of space.

Total number of annual certificates of inspection issued to steam vessels, foreign and domestic, 8,297. Number of certificates issued to foreign passenger steam vessels, 300; to domestic steam vessels, 7,997. Total net tonnage, 2,238,020.56. The officers licensed numbered 39,917.

Classification of inspections, tonnage, and officers licensed, according to the several divisions of navigation.

Under the act of Congress approved January 22, 1894, 6,561 marine boiler plates were tested at the mills, of which 524 were rejected for various defects.

The Supervising Inspector-General renews his recommendations of last year for legislation authorizing the Secretary of the Treasury to divide local inspection districts into two or more such districts, with a board of local inspectors in each, when the work in any district may be more economically conducted in such manner than it could by appointing assistant inspectors to the original board.

The recommendations are also renewed in behalf of legislation to secure a nonpartisan service and permanent tenure of office, except for incompetency, misconduct, or permanent physical or mental disability; and on account of the great increase of work in his office, he recommends legislation creating an Assistant Supervising Inspector-General, to be appointed by the President, by and with the advice and consent of the Senate.

COAST AND GEODETIC SURVEY.

The Superintendent of the Coast and Geodetic Survey presents in his annual report* a full account of the varied operations carried on during the fiscal year by that important branch of the public service, and gives, in concise tabular form, complete statistics relating to the distribution of field parties and the results accomplished both in field and office.

The usual maps and sketches, showing graphically the progress of the Survey and the present condition of the work, accompany the report.

The field operations of the Survey have included the measurement of base lines; reconnaissance; triangulation; astronomical determinations of time, latitude, and azimuth; telegraphic and chronometric determinations of longitude; topographical and hydrographical surveys and resurveys; tidal and current observations; determinations of magnetic declination, dip, and intensity; pendulum observations for determination of the force of gravity; geodetic leveling; Coast Pilot examinations; boundary line surveys; special topographic and hydrographic examinations, including the investigation of reported dangers to navigation; and laying out and marking of naval speed-trial courses.

More than fifty field parties were engaged on these various branches of the work, and were distributed along the Atlantic, Gulf, Pacific, and Alaskan coasts, and in the interior of the country. observations were conducted within the limits or on the coasts of twenty States and Territories along the seaboards, and in fifteen interior States and Territories.

The special operations of importance begun, continued, or completed during the year may be enumerated as follows:

Completion of the topographic and hydrographic resurvey of New Bedford Harbor and its approaches; continuation of the topographic and hydrographic resurvey of Buzzards Bay; continuation of hydrographic surveys and examinations on the coast of Massachusetts; continuation of hydrographic resurveys in Nantucket Sound, Block Island Sound, and off Montauk Point; continuation of the topographic resurvey of the southern shores of Long Island; continuation of the Hudson River survey; extension of the main triangulation eastward across the States of Maryland and Delaware to Capes Henry and Henlopen; hydrographic resurvey of the harbor and entrance of Port Royal, S. C.; magnetic determinations in various Eastern, Middle, Southern, and Western States; special hydrographic examinations along the Atlantic, Gulf,

^{*}Full report omitted from this volume for want of space.

and Pacific coasts; completion of the hydrographic resurvey of Pensacola Bay and entrance; continuation of the primary triangulation of the Oblique Arc in Alabama; continuation of the determination of points for State surveys; progress made in the triangulation of Lake Pontchartrain; continuation of the transcontinental triangulation in Kansas, Colorado, and Utah, including base-line measurements; continuation of the transcontinental line of precise levels in Kansas; continuation of the topographic and hydrographic resurvey of San Francisco Bay and Harbor; continuation of the survey of Washington Sound; continuation of general and hydrographic surveys in southeast Alaska; continuation of the California and Nevada oblique boundary line; continuation of surveys in connection with the southeast Alaska-British Columbia boundary line; magnetic determinations at sixty-one stations in various parts of the country; telegraphic and chronometric longitude determinations at twenty-two stations; gravity determinations at six stations: tidal observations at various points on the Atlantic, Gulf, and Pacific coasts, including Alaska.

In accordance with the uniform practice of the Department, requests from national or state authorities for special surveys, or for the detail of officers for special service, have been complied with whenever practicable, and the following operations have in this way been undertaken and completed:

A special hydrographic survey of the Dry Tortugas deep water anchorage and its approaches, at the request of the Navy Department; the erection of beacons on the north shore of Long Island for the Long Island Sound speed-trial course, at the request of the Honorable Secretary of the Navy; cooperation with the Navy Department in the erection of beacons on the coasts of Maine and Massachusetts for the speed trial course of the Indiana and Katahdin; cooperation with the Navy Department in laying out and marking a speed-trial course in Santa Barbara Channel for the new battle-ship Oregon; a special topographical survey, on a large scale, of the grounds of the Naval Academy at Annapolis, for the Navy Department; cooperation with the United States Geological Survey in the determination of the telegraphic difference of longitude between San Francisco, Cal., and Ellensburg, Wash.; at the request of the commissioners appointed by the United States Supreme Court, two officers of the Survey were detailed to examine and retrace a portion of the boundary line between the States of Missouri and Iowa. The assignments of two of the assistants of the Survey to special duty by appointment of the President have been continued, one as a member of the Mississippi River Commission and the other as member of the International Boundary Commission organized for the survey and marking of that part of the United States and Mexican boundary line extending westward from El Paso. The latter officer, however, performed regular Coast Survey service from the beginning of the fiscal year until October 1, the date fixed for the reassembling of the Boundary Commission.

In the office the usual progress has been made in the reduction and computation of the field results in the drawing, engraving, and preparing for publication the charts of the Survey, the Coast Pilot, and the annual tide tables, and there has been no abatement of the efforts to give the public the earliest notice of important changes or discoveries. The monthly issue of Notices to Mariners has been continued, and during the year copies were distributed gratis. The issue, during the same time, of charts, Coast Pilots, and Tide Tables has been as follows: Charts, 64,541; Coast Pilots, 848; Tide Tables, 6,5§0.

Office of Standard Weights and Measures.

This important office, also under the charge of the Superintendent of the Coast and Geodetic Survey, has been conducted as heretofore, and, notwithstanding its small force, prompt response has been made to all requests for information, and the usual amount of work in testing, verifying, and standardizing weights and measures for other departments of the Government, for States, and for private parties, has been accomplished.

Some progress has also been made in the acquiring of electrical standards and in the preparation for undertaking the determination and verification of electrical units. This work is necessarily slow on account of limited means, the whole annual appropriation for the purchase of material and apparatus and for incidental expenses being only \$500.

Among the operations carried on during the year the following may be specially mentioned as of the greatest importance:

- (1) The construction of the 50 meter comparator, by means of which a higher degree of precision in the determination of linear values is possible, and with a much less expenditure of time and labor.
- (2) The standardization, by means of this 50-meter comparator and a standard in ice, of the new duplex base apparatus. This base apparatus was designed by one of the assistants of the Survey, and was entirely constructed in the Survey instrument shop, and it is believed that it will yield results far superior to any other base apparatus yet devised for rapid and economical field work. One prominent feature of the apparatus is its yielding two simultaneous measures of a base by rods of two different metals with widely different coefficients of expansion, so that the temperatures can be deduced more accurately than by indications of the thermometers. The difficulty of obtaining the true temperature of the bars during a measure has heretofore been the greatest source of uncertainty in primary bases.

DISTRICT OF COLUMBIA.

The net expenditures on account of the District of Columbia for the fiscal year 1896 were \$6,369,362.98. The net revenues deposited in the Treasury on this account for the same period were \$3,866,247.49.

During the fiscal year the Treasurer has issued and sold \$34,500 of the 3.65 per cent bonds at a premium of from 9.75 to 12.50 per cent, which yielded, with the accumulated interest, the sum of \$64,206.70, and has paid therefrom judgments of the Court of Claims rendered under the provisions of the act of Congress approved February 13, 1895 (28 Stat., 664), to the amount of \$63,697.38, including interest.

The issue of these bonds is limited by law to \$15,000,000. The total amount issued to the close of the fiscal year was \$14,966,800, leaving but \$33,200 available to pay judgments hereafter presented.

Under the operations of the sinking funds, the net reduction of the bonded debt during the year was \$565,700, and of the annual interest charge, \$19,747.75.

The District of Columbia has paid to the United States for account of increasing the water supply, under the provisions of the acts of July 15, 1882, and June 5, 1884, \$1,077,530.89 of the principal of the sums advanced, and \$251,425.50 for interest thereon.

The debt incurred for account of the 48-inch and Fourteenth street water mains, amounting to \$295,912.69, together with the interest thereon, \$40,835.95, has been paid in full.

Congress, by the act of August 13, 1894, having otherwise provided for the redemption of the eight per centum greenback bonds, to the payment of which special taxes were pledged, the Treasurer recommends that authority be conferred upon him to deliver to the Commissioners of the District of Columbia the tax-lien certificates now held by him as security for the payment of these taxes, in order that they may apply all moneys hereafter derived therefrom to the payment of the outstanding drawback certificates, as contemplated by the act approved June 19, 1878, providing for their issue.

Detailed information in regard to the affairs of the District of Columbia will be found in the report to be submitted by the District Commissioners and by the Treasurer of the United States, ex-officio Commissioner of the Sinking Fund of the District.

THE CURRENCY.

The redemption of United States notes and Treasury notes in gold during the fiscal year amounted to \$158,655,956 and the total exports of gold amounted to \$112,409,947. During the months of August, September, October, November, and December, 1895, the withdrawals of gold from the Treasury by the presentation of notes for redemption amounted to \$67,624,575, and on the 6th day of January, 1896, the reserve having been reduced to \$61,251,710, a circular was issued calling for subscriptions for \$100,000,000 in United States four per cent bonds of the same date and character as those sold in February, 1895. The result of this was a sale of bonds to the amount of \$100,000,000, maturing thirty years from February 1, 1895, bearing interest at four

per cent per annum, for which there was paid into the Treasury in gold coin and gold certificates, on account of principal, premium, and interest, the sum of \$111,166,232.65, making the average price \$111.166, and the average rate of interest received by the purchasers 3.394 per cent per annum.

Since March 1, 1893, United States bonds to the amount of \$262,315,400 have been issued and sold for \$293,481,894.90 in gold, while during the same time notes have been redeemed in gold to the amount of \$457,039,855, and on the 1st day of December, 1896, there was free gold in the Treasury to the amount of \$131,510,352. Since the resumption of specie payments on the 1st day of January, 1879, United States notes to the amount of \$470,490,987, and Treasury notes issued under the act of 1890 to the amount of \$86,428,881, making \$556,919,868 in the aggregate, have been redeemed in gold, and since August 1, 1893, Treasury notes to the amount of \$35,121,722 have been redeemed in silver, and the notes so redeemed have been canceled and retired from circulation.

Making no deductions on account of the loss or destruction of notes, the total amount of United States currency in existence on the 1st day of December, 1896, was \$468,358,296, consisting of \$346,681,016 in United States notes, and \$121,677,280 in Treasury notes of 1890, and, consequently, it appears that the entire volume of such notes has been once redeemed in gold, and more than \$98,561,000 have been twice redeemed.

In former communications I have called the attention of Congress to this subject and have earnestly urged the necessity for early and effective legislation to provide for the permanent retirement of these notes as the only certain means of securing the stability of our currency and relieving the Government from periodical financial embarrassment, and, although I can add but little to the suggestions heretofore made, the matter is, in my opinion, of such vital importance as to justify a recurrence to it in this report. Our experience since the resumption of specie payments has so thoroughly demonstrated the impolicy of attempting to maintain the circulation of these notes as a permanent part of our currency, that further argument upon the question seems to be unnecessary, except for the purpose of again pressing the subject upon the attention of Congress and urging the prompt adoption of such measures as will, within a reasonable time, eliminate this element of weakness from our system.

The use of these notes as a circulating medium compels the Government to provide a large gold reserve for their current redemption, and as they are reissued when redeemed, such reserve must be replenished from time to time, in order to afford the public a reasonable assurance that no default will be made in the discharge of our public obligations. The difficulty of procuring gold for this purpose is greatly increased at the very times when its possession is most necessary, and, consequently, the Government, being at such times entirely deprived of gold receipts

from the ordinary sources of revenue, is compelled to issue and sell bonds upon terms less favorable than might be procured under other circumstances. The annual interest upon the addition to the public debt which has been made to procure and maintain the reserve amounts to \$16,312,616, and the aggregate of the principal and interest at the maturity of the bonds will be more than \$641,000,000, and yet the notes themselves, on account of which this enormous indebtedness has been incurred, will, if our present policy is maintained, remain unpaid. But it can not be safely assumed that this will be the whole measure of the burden imposed upon the people; because, if provision is not made for the cancellation of this currency, it is reasonably certain that emergencies will hereafter arise, from time to time, compelling the issue and sale of additional bonds to replenish the reserve, thus increasing our interest bearing debt, without in the least diminishing our obligations on account of the notes.

The maintenance of a policy which necessarily imposes upon the Government the burden of furnishing gold at the public expense to all who may demand it for use or hoarding at home, or for export to other countries, can not be justified upon any ground of expediency or sound financial principle, and even if the periodical and frequently recurring demands for gold did not weaken the foundations of our entire currency system, thus impairing confidence and depressing business, it would nevertheless be the duty of all who are charged with any degree of responsibility for the adoption of proper financial methods to insist upon the reformation of our laws on this subject at the earliest possible day. The issue and redemption of circulating notes is not a proper function of the Treasury Department, or of any other department of the Govern-While the Government has power to borrow money, it is not its duty to issue public obligations merely for the purpose of providing a paper currency for use in the transaction of business, nor has it the constitutional power, in my opinion, to make its promises legal tender in the payment of private debts. Such a policy, even if sanctioned by the Constitution, instead of imparting strength and stability to our currency system, seriously endangers it by the introduction of political and partisan considerations into the management of a subject which ought to be regulated entirely by the business interests of the people and by the laws of trade and the principles which control honest commercial intercourse.

Although the actual ability of the Government to redeem its notes promptly in gold coin may be undisputed, still the question whether they will be or ought to be so redeemed must always be open to public discussion, and it is well known that the constant agitation of this question during the past few years has upon several occasions greatly imperiled the safety of our entire currency system. So long as the United States notes remain in circulation, questions as to the mode and manner of their redemption, and as to the means of procuring and maintaining a coin

reserve for that purpose, will be made political issues, and so long as these questions remain in politics public confidence in the stability of our currency must be more or less disturbed. Even if the agitation of these questions affected only the value of United States notes, the consequences would be sufficiently serious to justify a demand for their permanent retirement, but the character of our currency is such that whatever creates a doubt or suspicion concerning their prompt redemption in gold on presentation, necessarily impairs confidence in the whole volume of our circulation and inflicts much greater injury upon the public than could possibly result from the failure of ordinary banking institutions to redeem Every menace to the gold reserve, and every manifestation of a formidable public sentiment in favor of the redemption of our notes otherwise than in gold coin, at once alarms the whole business community, depresses trade and industry, and impairs the value of our public and private securities in all the markets of the world. There is but one absolutely certain way to remove this delicate and. dangerous question from our party politics, and that is to retire and cancel the notes. All attempts to hoard them permanently by the Government must fail, for the obvious reason that our people will not consent to be taxed merely for the purpose of accumulating and holding a large and useless surplus in the Treasury. Besides, the notes must be withdrawn from circulation in order to be hoarded, and when withdrawn from circulation, it would be far more advantageous to the public to cancel them than to keep them on hand as a constant temptation to indulge in unnecessary and extravagant expenditures.

We must not be deluded into a feeling of security by the fact that there has been a suspension of gold withdrawals during the last few months and a large accession to our stock of gold from abroad during the same time, because there is no sufficient reason to believe that this condition of affairs will be permanent, if our existing system is maintained. The favorable change in the rates of exchange which stopped withdrawals and exports and turned the current of gold shipments in our direction was due to causes having but little, if any, connection with our actual or prospective financial situation. These causes were temporary in their character, and can not reasonably be expected to operate in our favor for any great length of time while our currency remains in its present unsatisfactory condition. Fluctuations in the rates of exchange are produced by causes beyond the control of official power, and one of the misfortunes of our present situation is that whenever these rates reach a point at which it is more profitable to export gold than to purchase bills for the settlement of our balances abroad, the Government is compelled to furnish the gold, or fail to maintain the standard of value established by law; in fact, the abandonment of that standard, and the legal or practical recognition of silver as the basis of our monetary system would not relieve the Government from the obligation to procure coin by the issue of bonds, or otherwise, for the

redemption of its notes. Until the notes are permanently retired, or the obligation to redeem in coin is wholly repudiated, a large reserve must be provided, and this reserve, whether it consists of gold or silver, being subject to the demands of all who desire to exchange notes for coin, must be replenished from time to time by such means as the Government is able to command. No system of coinage that can be devised will furnish the Government with either gold or silver, unless it pays for it with means already collected by taxation, or by contracting an indebtedness to be paid by the people in the future.

I am thoroughly convinced that the retirement and cancellation of United States notes of both classes, under such reasonable limitations and restrictions as to time and methods as Congress may see proper to prescribe, or as a prudent Secretary of the Treasury would adopt in the exercise of his official discretion, would not result, either permanently or temporarily, in an injurious contraction of the currency. No government, however despotic, can prescribe the exact amount of currency its people shall use in the transaction of their business, and every attempt to regulate this subject by arbitrary rules in the form of legislation, or otherwise, is a departure from true economic principles. The people, if left free to conduct their business affairs in their own way, will always decide for themselves how much money they need, and, unless prevented by artificial obstructions, the necessary amount will always be supplied either from their own resources at home, or through exchanges abroad. The volume of business transacted determines the amount of money and credit required, and whenever the volume of business demands an additional supply of money or an extension of credit, the demand will certainly be complied with, provided the laws do not interfere to prevent it. As rapidly as our notes are redeemed and canceled, gold, or a currency as good as gold, will take their places in the circulation, if the interests of the country require it.

With a liberal commercial policy, promoting the profitable introduction of our large surplus products into the markets of other countries, and a sound currency system, promising safe investments for foreign capital in our domestic industries, we may confidently rely upon the operation of the natural laws of trade and finance for an abundant supply of good money to transact all the business of the people and fully develop the great resources at our command. As soon as the resumption of specie payments had become assured, and the agitation of that question had ceased, gold began to flow into this country in large amounts, and from 1878 to 1881, both years included, our net gain from imports alone was \$179,748,592, but in addition to this, our available stock of this metal was considerably increased by our domestic production and by the renewed use of a great part of the coin previously hoarded by our people on account of its superiority in value over a depreciated paper currency. For a series of years there had been deficient crops in Europe, and the sale of our grain and provisions in foreign markets created a very large excess of exports of merchandise over imports, culminating in 1878 in a balance in our favor of \$305,139,642, the largest that ever existed in No such balance has been even approached in any year a single vear. since, except during the current calendar year 1896. In eleven months the excess of exports of merchandise over imports has been \$266,086,709; and to this should be added the net exports of silver, \$44,985,015, making a total of \$311,071,724, or nearly six million dollars more than the highest amount for any previous period of twelve months. It is scarcely possible that such changes can occur in the course of our international trade during the next few years as to prevent a large annual balance in our favor, and if these favorable results continue to be realized, and our currency system shall be placed upon a sound basis, experience and reason alike justify the conclusion that very considerable amounts of gold must be sent here to pay for our exported products, or that, even if this should not be the case, the demand upon our existing stock will cease, and our own production, amounting to not less than \$45,000,000 per annum, will be permanently added to the volume of our circulation.

But without a reformation of our currency we can not safely rely upon permanent accessions to our stock of gold from abroad in settlement of trade balances in our favor, nor can we hope even to retain permanently the stock already in the country, as is conclusively shown by the experience of the last four years. During the four years from 1893 to 1896, both inclusive, our exports of merchandise and silver exceeded our imports by the amount of \$376,408,057, and yet, during the same time our net exports of gold amounted to \$201,003,708; or, in other words, we paid during this time to the people of other countries. \$577,411,765 in merchandise and in silver and gold. Being a debtor nation, our favorable balances of trade will not bring us gold, or any other form of money, so long as we maintain a currency of doubtful value or stability, or continue an agitation which alarms foreign investors, and induces foreign creditors to demand the payment of their Under such circumstances, all our balances are absorbed by the withdrawal of previous investments and the collection of previous debts.

In my last annual report it was recommended that the Secretary of the Treasury should be authorized to issue from time to time bonds payable in gold, bearing interest at a rate not exceeding three per centum per annum, and having a long time to run, and to exchange such bonds for United States notes and Treasury notes, upon such terms as might be most advantageous to the Government, or to sell the bonds abroad for gold whenever in his judgment it might be advisable to do so, and use the gold thus obtained in making redemptions of outstanding notes. The terms in which this recommendation was made, and the suggestions submitted in support of it, showed that it did not contemplate the retirement of all the outstanding notes at one time, but that the process should be so conducted as to avoid any danger of an improper contrac-

tion of the currency. Believing that this plan of redeeming the notes, and at the same time substituting an absolutely sound currency in place of them, promises the most certain means of accomplishing the desired result within a reasonable time, I adhere to the views then expressed; but the object to be attained is so essential to the future financial safety of the country that it ought not, in my judgment, to be defeated or abandoned simply on account of differences of opinion concerning the methods of securing it.

While an act conferring express and plenary authority upon the Secretary to issue bonds and use them or the proceeds of their sale for the purpose of retiring a certain amount of the notes each year, would, in my opinion, be the most effectual and economical way to accomplish that object, it may be that so radical a measure would not receive the assent of Congress, in the present state of the public mind on the subject, and if so, it is submitted that, at the very least, authority should be given to retire and cancel a maximum amount of notes each year when voluntarily presented by the holders and redeemed in gold; and if the maximum amount fixed by Congress should not be retired and canceled in any year by redemptions out of the gold reserve, the Secretary of the Treasury should be clothed with authority to apply to that purpose any surplus funds in the Treasury, and in addition, if necessary, to issue the character of bonds above described to a sufficient amount to comply with the provisions of the law. The adoption of such a policy would give immediate assurance of a purpose to return within a reasonable period to a safe and elastic currency system, and would remove much of the doubt and uncertainty which have for many years disturbed the public mind and embarrassed the business of the people and the operations of the Government. No sudden or large contraction of the active currency could result from the execution of such a plan, because the redemptions would be made from time to time with money already withdrawn from circulation and held in the Treasury, except in cases where it might become necessary to issue and sell bonds in order to make the redemptions correspond to the amount required or authorized; and in all such cases contraction could be easily prevented by selling the bonds abroad and thus adding their proceeds to our domestic stock of money.

As already stated, without making allowance for the loss or destruction of notes in the hands of the people, the total amount of United States legal-tender notes in existence on the 1st day of December, 1896, was \$468,358,296. On the same day the free gold in the Treasury amounted to \$131,510,352, of which \$100,000,000 was procured and is held solely for the purpose of being used in the redemption of notes, so that the additional sum required to provide for the retirement of all this currency would be, at the very highest estimate, \$368,358,296, which includes \$121,677,280 of Treasury notes issued under the act of 1890. But if the \$346,681,061 in old United States notes were retired, or even if provision

were made for their permanent retirement by such methods as would insure the accomplishment of that result within a reasonable time, our currency system would be so improved and public confidence in its stability would be so strengthened that it might be found unnecessary to continue the redemption of the Treasury notes of 1890 in gold, and in that event the total amount to be so redeemed, deducting the reserve already on hand, would be \$246,681,016. Treasury notes of 1890, as stated in a former part of this report, to the amount of \$35,121,722 have been redeemed in silver since August 1, 1893, and the notes have been canceled. During the last fiscal year the redemptions of Treasury notes in gold amounted to \$5,348,365, while during the same time the redemptions in silver amounted to \$16,405,120, or more than three times as much.

These redemptions, and the consequent substitution of standard silver coins in place of the notes, have been gradually effected without creating any noticeable disturbance of the currency and without exciting any apprehension in the public mind, notwithstanding the precarious condition of our financial affairs during the time the process has been going on, and, in view of these facts, it appears not unreasonable to suppose that, under more favorable conditions, larger amounts of silver might be safely used for the same purpose, and all, or the greater part of, these notes be retired in the same way. The act under which they were issued expressly requires the Secretary of the Treasury to coin a sufficient amount of the bullion purchased with them to provide for their redemption and to hold it in the Treasury for that purpose, thus clearly showing the intention of Congress to have them ultimately retired by substituting silver for them; and, in pursuance of this policy, such notes have been retired and canceled whenever the holders demanded. or were willing to receive, silver in exchange for them.

Whatever plan may be finally adopted for the retirement of United States notes and Treasury notes, it will fail to afford complete protection to the Government against demands for gold in the future, unless it includes a provision relieving the Treasury from the obligation to redeem national-bank notes, except such as are worn, mutilated, or defaced, and the notes of failed banks, or requires these institutions to keep their five-per-cent redemption fund in gold and to deposit gold coin for the withdrawal of bonds when circulation is to be surrendered or reduced. Prior to the act of June 20, 1874, each bank was required to redeem its circulating notes at its own counter, and also to select, with the approval of the Comptroller of the Currency, a national banking institution located in some one of the cities named in the act, at which redemptions could be made, and the Treasurer was not authorized or required even to redeem worn, mutilated, or defaced notes; but since the passage of that act each national banking association has been required to keep on deposit in the Treasury of the United States, "in lawful money of the United States," a sum equal to five per cent of its circulation, to be held and used for the redemption of its notes, and when such notes, assorted or

unasserted, are presented in sums of one thousand dollars or any multiple of that sum, the Treasurer is required to redeem them "in United States notes." In view of these provisions of the existing law, it is clear that in case the United States notes should be withdrawn from circulation, some other method of redeeming the national bank currency must be adopted, and, in my opinion, the obligation should be imposed directly upon the banks themselves, or they should be required to keep the redemption fund on deposit with the Treasurer, in gold coin.

Whoever is permitted to furnish paper currency should be required to keep it good in the hands of the people, by furnishing the means for its prompt redemption in coin when demanded, and the retirement of the United States legal-tender notes will necessarily devolve this duty upon the banks of issue, whether they be organized under our present laws or under some improved system which will give greater elasticity to our currency and afford better opportunities for the employment of capital and commercial credit in banking institutions. Before the suspension of specie payments in 1861, and for many years after resumption, the banks supplied all the gold required by our people in the transaction of their domestic business and for the settlement of balances abroad, and when the Government is released from the obligation to hold a large reserve for the redemption of its own notes, they will again be able, without loss or inconvenience, to return to the former practice in this respect, and, by the use of their own means, keep their circulating notes at par with gold.

For reasons which were submitted at some length in my last annual report, and which it is unnecessary to repeat, I recommended such amendments to the national banking laws as would permit the issue of circulating notes equal in amount to the face value of the bonds deposited and reduce the tax on notes to one-fourth of one per centum per annum, and that authority be given to establish branch banks for the transaction of all kinds of business now allowed, except the issue of These amendments would, in my opinion, greatly circulating notes. improve the system, by increasing its efficiency as a means of furnishing accommodations to the people in times of need and in localities where adequate banking facilities do not now exist. Unless the credit of the Government shall become more seriously impaired than there is now any reason to apprehend, our bonds will always be worth par in the market, and will, consequently, afford an ample guarantee for the safety of the notes issued against them; and, as the whole purpose of the law on this subject is to protect the note-holders against loss, it is difficult to see upon what ground the present limitation upon the issue of notes can be defended. When bonds to secure circulation can be procured only by the payment of a large premium, as has been the case for a great many years, the profits realized upon the notes are so small and so uncertain that banks prudently managed are generally unwilling to increase their issues in order to meet temporary demands for additional currency, and the result is that the supply remains substantially the same whether the demand be great or small. The essential element of elacticity can not be secured for this form of currency under our present laws, and it is by no means certain that it can be secured under any system which requires the purchase and deposit of bonds to secure circulation.

An annual tax of one fourth of one per cent upon the circulation of national banks will produce a sum more than sufficient to defray the expenses of governmental supervision, and, as this is the only proper purpose for which such a charge can be imposed, I am decidedly of the opinion that it should be reduced to that rate. In whatever form such taxes may be assessed, they must ultimately become charges upon the people for the use of the currency, and, consequently, they ought not to exceed the amount required to maintain the service provided at the public expense.

The provision of the national banking law which prohibits the organization of any association with a capital of less than \$50,000 and permits the organization of associations with this minimum amount only in places having a population of six thousand and less, deprives many communities of necessary local banking facilities and serves no useful purpose in maintaining the safety or efficiency of the system in other respects.

No good reason is perceived why this limitation upon the required amount of capital should not be reduced to \$25,000, without regard to population. As all banks, whether their capital is large or small, are subject to the same legal restrictions and official supervision, it is evident that the number of people residing in the towns or cities in which they are located is wholly immaterial, and, therefore, the provision referred to is manifestly arbitrary and unnecessary. Many cities and towns, especially in agricultural regions, having comparatively a small population, although greatly in need of banking facilities, are unable to command sufficient capital to comply with the requirements of the present law and are consequently subjected to very great inconvenience and considerable loss in the transaction of their busi-The amendment suggested, and a corresponding reduction of the amount of bonds required to be deposited under another provision of the statute, would afford a much needed measure of relief to such communities and contribute not a little to allay the feeling of discontent which evidently exists in some parts of the country on account of the unequal distribution of loanable funds. This modification of the law, and an amendment authorizing national banking associations having a designated amount of capital to establish and operate branches under such restrictions and limitations as Congress may see proper to prescribe, would afford opportunity for a practical extension of the system to all parts of the country, without in the least impairing its strength or efficiency. The branches ought not to be in any respect independent of the parent institutions, but should be mere agencies to receive and hold deposits, discount notes, purchase bills, and transact other business authorized by law, except the issue of circulating notes; and they should, of course, be subject to official inspection and to all the laws, rules, and regulations applicable to the kind of business in which they engage.

The propriety of prohibiting the issue of United States notes, Treasury notes, and national bank notes of lower denominations than ten dollars, in order to secure a larger and more permanent use of silver coins and certificates, has been urged upon Congress in all my annual reports, and the subject is again referred to only for the purpose of saying that the reasons heretofore stated in support of such a policy still exist and have been strengthened by the experience of each year.

It has been shown by experience that the effect of the provision contained in the 12th section of the act of July 12, 1882, authorizing the issue of gold certificates has been to increase the difficulties of maintaining the free gold in the Treasury at or above the amount of the lawful reserve, and I recommend its repeal. The manifest purpose of the law was to accommodate citizens and financial institutions having gold coin on hand, by providing for its safe custody in the vaults of the Treasury and at the same time facilitating its practical use in the form of certificates, as a part of the active currency of the country, or in the reserves of the national and other banks. It was evidently supposed that its effect would be simply to increase the total gold holdings in the Treasury, without diminishing the amount of free gold; but it has been found that the privilege to make deposits and receive certificates is a constant temptation to present notes and withdraw free gold from the Treasury, to be redeposited for the benefit of the holders of the redeemed notes. Attention was called to this subject during the last Congress, and the House of Representatives passed a bill repealing the provision referred to, but it was not passed in the Senate.

PUBLIC EXPENDITURES AND REVENUE.

At the close of the fiscal year 1895, the available cash balance in the Treasury, after deducting all current liabilities, but including the gold reserve of \$100,000,000, was \$195,240,153.87, and at the close of the fiscal year 1896, the available cash balance, excluding the current liabilities, but including the gold reserve of \$100,000,000, was \$267,432,096.70, an increase of \$72,191,942.83. The excess of expenditures over receipts during the year was \$25,203,245.70, while the deficiency during the fiscal years 1894 and 1895 was \$69,803,260.58 and \$42,805,223.18, respectively, making the total excess of expenditures over receipts from the ordinary sources of revenue during the three years, \$137,811,729.46. The ordinary expenditures of the Government, including pensions and interest on the public debt, were \$31,298,508.41 less during the fiscal

year than during the fiscal year which closed on the 30th day of June, 1893, \$15,345,833.75 less than in 1894, and 4,015,852.21 less than during The total receipts from the ordinary sources of revenue. the year 1895. including the postal service, for the fiscal year 1895 were \$17,570,705 greater than in 1894, and for the year 1896 they were \$19,102,205.48 greater than in 1895, making an aggregate increase of \$36,672,913.48 in 1896 over the year 1894. The increase in the receipts from customs during the year 1896 was \$28,203,221.05 over the receipts from the same source in 1894, and \$7,863,134.22 in excess of the receipts for 1895; but during the first five months of the current fiscal year the receipts from all sources have been \$9,628,628.48 less than during the corresponding five months of last year, while the expenditures for the same time have increased \$14,448,891.62, resulting in a deficiency of \$39,946,845.89 on the 1st day of December. The decrease in the receipts from customs during the five months was \$12,980,244, while the receipts from internal taxes were about the same as during the corresponding period last year.

For the eleven months next preceding December 1, 1896, the total value of our importations, dutiable and free, was \$116,800,000 less than during the corresponding eleven months in the calendar year 1895, the decrease in free goods being \$65,300,000, and in dutiable goods, \$51,500,000. More than four fifths of these large decreases occurred in the first five months of the present fiscal year, the falling off during that period being \$50,251,000 in free goods, and \$44,679,000 in dutiable goods. The official returns show not only that the reductions have been greater in the importations of free goods than in the importations of dutiable goods, but that, with a few exceptions, the largest decreases in proportion to the total amount of the importations have occurred in raw materials and partly finished products procured abroad for use in our domestic industries and which, when brought here, furnish additional employment for our artisans and laborers. In the free list the importations of five articles-hides and skins other than fur skins, crude india rubber and gutta percha, raw silk and wool, decreased \$31,622,254 during the four menths, July to October, and in the dutiable list five articles-manufactures of cotton, manufactures of furs, iron, and steel and manufactures of iron and steel, and leaf tobacco fell off \$13,489,328 during the same time.

As there were no changes in our tariff laws, nor any unusual interruption of our trade with other countries during this period, except in the case of Cuba, from which a considerable quantity of leaf tobacco is procured, these decreases in importations, and consequent reductions of revenue from that source, must be attributed largely, if not entirely, to the unsettled and depressed condition of business produced by the agitation of questions seriously affecting the stability and value of our currency, the necessary effect of which has been to reduce production and consumption, and to a great extent suspend the ordinary commercial operations based upon contracts to be executed in the future. The effect

of business depressions upon the amount and value of importations, and upon the public revenues derived from other sources, is very forcibly illustrated by a comparison of the official returns for the fiscal years 1893 and 1894. The whole body of tariff and internal revenue laws in force during the fiscal year 1893 remained in force, without change in any respect, during the entire fiscal year 1894, and yet the value of the importations in the latter year was \$211,416,300 less than in the former year, and the revenue from customs was \$71,536,486.11 less, while the decrease in receipts from internal revenue amounted to \$13,836,539.97, all which was on account of diminished consumption of distilled spirits, manufactured tobacco, and fermented liquors.

During the first five months of last year, 21,957,632 taxable gallons of distilled spirits, on which the tax was \$23,865,133, were withdrawn for consumption, while during the corresponding five months of the current year, 22,768,275 taxable gallons of spirits were withdrawn, upon which the tax collected amounted to \$25,064,903; but the consumption of distilled spirits during the last fiscal year was only 68,480,720 gallons, as against an average annual consumption of 91,927,112 gallons for the years 1890 to 1893, both inclusive. If the usual annual increase in the consumption of this article for all purposes had been substantially maintained, the total withdrawals during the present year would be at least 109,000,000 gallons, upon which the tax would amount to \$119,900,000, and even if there should hereafter be only such an increase as to raise the consumption to the average for the four years mentioned, the annual tax would amount to more than \$101,000,000 at the present In the estimates submitted for the current fiscal year the revenue to be derived from this source has been placed at \$75,900,000, based upon a consumption of 69,000,000 gallons, and in the estimates for the year 1898 it has been placed at \$78,100,000, based upon consumption of 71,000,000 gallons, which will certainly prove to be much below the amount received, if the promise of future improvement in our business conditions is even partially realized.

The unusual increase in the expenditures during the first five months of the present fiscal year is partly accounted for by the payment of \$5,000,000 for bounty on sugar, \$1,540,000 to the Southern Pacific Railway Company, \$725,000 on judgments of the Court of Claims, and several other considerable amounts which do not constitute any part of the ordinary or regular expenses of the Government, and, therefore, will not again appear in the accounts of payments. It is believed that a careful consideration of the existing situation, and a conservative reliance upon improved business conditions in the future, fully justify the conclusion that the estimated deficiencies for the current year and for the year 1898 will not be realized, unless our public expenditures shall be very materially increased by acts of Congress, and that, with proper economy in administration and such reductions in appropriations as might be made without detriment to the public

service, the receipts will be equal to the disbursements in 1898. But, however this may be, the condition of the Treasury is such that no revenue legislation is immediately necessary, or can become necessary for a considerable time, in order to enable the Government promptly to meet all its ordinary obligations. Although the receipts from the ordinary sources of revenue during the last three fiscal years have been less than the expenditures, there have been at all times sufficient available funds in the Treasury to maintain an efficient public service and discharge the current obligations of the Government, and no public creditor has been delayed in the collection of his claim; nor has the business of the country ever been disturbed by a doubt concerning the ability of the Government to defray its ordinary expenses.

Much the greater part of the estimated deficiency for the current fiscal year has already been incurred, and has been paid, leaving still in the Treasury, on the 1st day of December, a balance of \$225,357,098, which, after deducting the gold reserve, is about \$100,000,000 more than is necessary as a permanent fund to insure the regular conduct of the ordinary fiscal operations of the Government. The fact that this money was not collected by taxation, but was procured by the issue of bonds, for a purpose other than the payment of ordinary expenses, does not affect the situation in the least. gold secured by the issue of bonds to replenish the reserve has been used for the redemption of notes, the notes redeemed are received and held as part of the general fund, and must be used for all the public purposes to which they can be legally applied. being actually in the Treasury, the sole question is, whether it shall be used, when necessary, to defray the expenses of the Government, or be held as an idle and useless fund, in order to afford an apparent reason for the imposition of additional taxes upon the people. This available balance is represented by outstanding bonds bearing interest, and, as its permanent retention in the Treasury can be of no advantage to the Government or its citizens, no substantial reason exists why it should not be expended, if required, before our trade and industries are subjected to new or increased burdens.

The proposition that money in the Treasury, not needed for any other purpose, ought not to be applied to the payment of public expenses, simply because it was not raised directly by taxation, would not be worthy of serious discussion if it had not been indorsed in apparent good faith by many whose opinions are entitled to respectful consideration. So far as the merits of this question are affected, it can make no difference how the money was procured, for it is actually in the Treasury as a part of the public funds, and, not being needed for any other special object, a proper regard for the interests of the people demands that it shall be used for general public purposes, before resorting to taxation or other modes of procuring additional revenue. The only effect of additional revenue, under the circumstances now existing and likely to con-

tinue for some time to come, would be to increase, or, at least, to preserve, an unnecessary surplus already accumulated, and it will, I think, be generally admitted, that taxation for either of these purposes would be wholly unjustifiable.

What is most needed at present is not more taxes, but more economy in appropriations and expenditures.

The great increase in the ordinary expenditures of the Government during the last seven years has been without precedent in our history, in time of peace, and presents a subject which imperatively demands the most serious consideration of Congress. In 1870, for the first time after the close of the war, our public expenditures, excluding premiums on loans and purchases of bonds, but including interest and pensions, fell below the sum of \$300,000,000, and they continued to decrease, with some fluctuations, until 1886, when they reached their lowest point; amounting to \$242.483,138.50. During the four fiscal years beginning July 1, 1885, and ending June 30, 1889, the annual average expenditures, excluding premiums on loans, and purchases of bonds, but including all the other items mentioned above, was \$263,016,473.18, but during the next four fiscal years, beginning July 1, 1889, and ending June 30, 1893, the annual average was \$345,405,163.60, an increase of \$82,338,690.42 for The average annual ordinary expenditures of the Government during the three fiscal years beginning July 1, 1893, and ending June 30, 1896, were \$358,633,341.40, an annual increase of \$13,228,177.80 over the next preceding four years. The ordinary receipts of the Government during the last fiscal year-\$326,976,200.38-would have paid the average annual expenditures during the four years from July 1, 1885, to June 30, 1889, and left a surplus of \$63,959,727.20 at the end of each year, or \$255,838,980 at the close of the period. The expenditures for the year 1896, although \$31,298,508.41 less than in 1893, were nearly 25 per cent higher than in 1889. For the current fiscal year the ordinary expenditures, excluding the cost of the postal service, except the deficiency, will, according to the estimates, reach the sum of \$382,500,000, an amount which has been equaled in only one year since 1866.

An examination of the expenditures and the objects for which they were made, shows that during the first period of four years—1886, 1887, 1888, and 1889—the average annual payments on account of civil and miscellaneous items were \$78,262,020.13; on account of the War Department, \$38,960,721.39; on account of the Navy Department, \$16,838,568.35; on account of Indians, \$6,358,799.13; on account of pensions, \$76,586,813.43, and on account of interest on the public debt, \$46,009,553.75, while the average amount of expenditures for the same objects during the succeeding period of seven years was, for civil and miscellaneous items, \$96,780,865.81; for the War Department, \$49,577,677.53, for the Navy Department, \$27,868,164; for Indians, \$10,304,314.95; for pensions, \$135,328,561.71, and for interest on the public debt, \$31,213,341. The average annual excess of expenditures

during the last period over the expenditures for the same purposes during the first period was, for civil and miscellaneous items, \$18,518,845.68; for the War Department, \$10,616,956.14; for the Navy Department, \$11,029,498.62; for Indians, \$3,945,515.82, and for pensions, \$58,751,748.28, the only decrease being in the amount paid for interest on the public debt, which was \$14,796,211.95 less per annum than during the first period.

It does not appear that there has been any such necessary extension or substantial improvement of our public service as to justify these enormous increases in expenditures, and, in my opinion, we have reached a situation which not only forbids the favorable consideration of measures calculated to augment our annual outlay, but which obviously demands a thorough revision of our permanent appropriation laws and the enforcement of strict economy in future annual legislation upon this subject.

But, unless our annual receipts are increased by improved business conditions, or our annual expenditures are reduced, a time will arrive when provision must be made for additional revenue; and, if the expenditures of the Government shall be increased by acts of Congress, the necessity for such a measure will arise earlier than the present situation seems to indicate. In view of this possible contingency, it will not be inappropriate to submit a few suggestions concerning the general policy to be adopted in making provision to meet the future necessities of the Government. For more than a century our tariff legislation has been designed, to a great extent, at least, to accomplish objects other than the raising of revenue for public purposes. The protection of capital invested in our native industries and the protection of labor employed in the United States, against the competition of the products of foreign industries and foreign labor, have been alleged as the paramount objects in many cases, and urged as a justification for progressive increases of tariff taxes and commercial restrictions, when revenue was not needed, or when the rates imposed were made so high as to reduce the In other instances, revenue duties have been abolished in order that protective duties might be retained or increased, and the necessities of the Government and just principles of taxation have been subordinated to the demands of special interests.

So long as the income of the Government from customs and internal taxes exceeded its expenditures, the fact that protective duties were destructive of revenue, although clearly apparent to all who observed the practical operation of the system, did not attract the attention of the public generally; but the situation has been materially changed since 1892, and hereafter it will not be possible to sacrifice revenue to protection without seriously embarrassing the fiscal affairs of the Government, by depriving it of an income sufficient to defray its necessary expenditures. If the usual proportion of this income is hereafter to be derived from taxes on imported goods, the protective theory must be

abandoned as the basis of our legislation upon the subject, and a well-considered and consistent revenue system must be substituted in its place; and, in my opinion, this can be done without material injury to any trade or industry now existing in this country. The danger of a large foreign competition in our home market, and the alleged injurious effects of such competition upon the interests of domestic labor, have not only been greatly exaggerated in the past, but are less now than at any time heretofore, and must continue to grow less hereafter.

In 1886, three statisticians and economists of high standing, at the request of one of my predecessors, Mr. Secretary Manning, made and submitted to him a careful estimate of the number of persons engaged in gainful occupations in the United States, who could be subjected to foreign competition, and, although they worked by different methods and conducted their investigations independently of one another, their several estimates agreed within a fraction of 1 per cent. In their opinions, about 5 per cent of our population so engaged were subject to competition from other countries, and one of the gentlemen said: "The general conclusion that if trade were entirely free, the fraction of our present industrial population injuriously subject to foreign competition would not exceed 6 or 7 per cent, seems to me unquestionable." Those estimates were based upon the census of 1880 and the trade of 1886. Since that time, great changes have taken place in our international trade and in the cost of production and subsistence in this country, and it can not be doubted that the principal industries in the United States are relatively and actually stronger now than they were then, and, therefore, better able now than they were then to compete with foreign products, not only in the home market, but in the markets abroad, where no special privileges or advantages are conferred upon their rivals by treaties or differential tariffs.

The number of our people engaged in gainful occupations increased from 17,392,099 in 1880 to 22,735,661 in 1890, a gain of 5,343,562; and, while the increase in all such occupations during the ten years was 30.72 per cent, the increase in manufacturing and mechanical industries, which are supposed to be most subject to foreign competition, was 49.13 per cent. A further and most gratifying evidence of our growing industrial power is to be found in the greatly increased exports of the products of domestic manufacture, which now constitute, for the first time in our history, more than one fourth the total value of all our sales in foreign markets. If these products were not, at least, equal in quality to similar products of other parts of the world, and if the prices at which they are sold were not as low as the prices demanded by our foreign competitors, they could not find a market outside the limits of our own country. The exportation of manufactured products would not go on continuously year after year at an increasing rate, unless there was a profit for our people in the operation, nor unless the markets in which they are sold are in some manner benfited by

giving a preference to the American article over like articles produced elsewhere. The annual increases since 1892 in the quantities and values of exported manufactures, notwithstanding the extremely low prices which have prevailed in all the markets of the world, are without a parallel in our commercial history, and furnish such conclusive evidence of industrial power and a capacity to compete successfully with the outside world in production and trade as ought to convince our people that protective duties on imported goods can not be hereafter justified or excused upon the plea that they are necessary for the encouragement of capital or the security of labor in this country. With a healthy internal growth and a constantly increasing export trade, the influence of foreign competition in our home market must continue to diminish and there is no reason to fear that our domestic industries could be seriously interfered with, even under schedules of duties much lower than we now have.

But an examination of the various gainful pursuits in which the people of the United States were engaged in 1890, which is the date of the latest official returns upon the subject, will show that, even if we are not more independent of foreign competition now than we were then, the number of those who can be adversely affected by the importation of products from abroad is so small, in comparison with our total population, that it would be both impolitic and unjust to persist in a system of taxation designed for the special protection of their interests at the expense of all others. Of the five great classes or groups into which the total population engaged in gainful occupations (22,735,661) is divided, three-professionals, 944,328, domestic and personal servants, 4,360,506, and persons engaged in trade and transportation, 3,325,962-may be excluded at the outset as exempt from foreign competition. No tariff duties can affect these classes, except by increasing the cost of many of the commodities which they are compelled to buy and use.

Of the agricultural, mining, and fishing group, numbering 9,013,669, only a very small percentage can be subjected to direct competition with the foreigner, and this part is located on or near the seacoast or other borders of our country. In some parts of New England, in northern New York, and in a few other localities on the border, Canadian competition in agricultural products must sometimes be met to a certain extent, but the people in all these places are able to export other kinds of products, similar to those of their Canadian neighbors, and sell them at a profit in the Dominion and in other parts of the world, in competition with all others. In fact. the traffic in agricultural products across the Canadian line includes large sales by our citizens to the people of the Dominion, as well as purchases from them, and the official statistics of our whole trade with that country in this character of products show that we annually export more than three times as much as we import, our exports last year being \$17,400,000, and our imports only \$5,500,000. It is safe to say that not more than 500,000 persons, or about five and a half per cent of those engaged in agriculture, mining, and fishing in this country, can be in any degree adversely affected by competition from abroad, and all these are wholly or partially compensated for foreign interference in their home market by the increased sales which international trade secures for their own products in foreign markets.

In considering the manufacturing and mechanical industries, for the purpose of ascertaining to what extent they can be subject to foreign competition, the following general propositions may, I think, be accepted as the basis for just conclusions:

- (1) A large and continuous export of a particular class of articles proves an ability to manufacture as cheaply as any foreign competing nation.
- (2) Natural advantages, such as the proximity or cheapness of raw materials, inventiveness, special aptitudes, and facilities secured by an extensive use of superior machinery, are sufficient in most cases to exclude foreign competition.
- (3) Many occupations, such as those of bakers, blacksmiths, carpenters, masons, and others, are necessarily local; the work must be done at a particular place, and, consequently, foreign competition is impossible.
- (4) The expenses of importation—the cost of transportation, insurance, loss of interest, etc.—prevent competition from abroad in many kinds of manufacturing and mechanical products.

Applying these propositions in the investigation of the industries known as "manufacturing and mechanical," the result may be most briefly and conveniently stated in the form of a table, in which the interests subject to more or less foreign competition are classified as nearly as possible according to the tariff schedules and in accordance with an extremely liberal view of the question.

Industries.	Number of employees.	Wages.		
Clay and pottery, etc	71, 619 589, 048 11, 511 19, 474 16, 745 160, 555 38, 920 79, 707	\$35, 786, 320 201, 350, 485 7, 840, 510 11, 019, 322 10, 395, 436 88, 662, 796 12, 087, 501 36, 396, 382		
Total	987, 573	403, 538, 752		

These constitute about 21 per cent of the 4,712,622 persons engaged in all our manufacturing and mechanical industries, and, adding to them the 500,000 employed in agriculture, mining, and fishing, a total of 1,487,573 is obtained, which is about 6½ per cent of the total population engaged in all gainful occupations, according to the returns of 1890. A more thorough investigation would doubtless show that considerable

deductions ought to be made from this total. Geographical position, proximity to materials or markets, or the existence of cheap and efficient transportation facilities, operate as a strong natural protection against foreign as well as domestic competition. There is a constant internal movement of our industries, seeking more favorable situations. in order to reduce the cost of production and secure better access to the markets, and every such change, when judiciously made, strengthens our industrial system and reduces the danger of possible interference by the introduction of foreign products. If the full effect of these movements could be ascertained, it would be found that they have during the last few years contributed largely to the independence and prosperity of our manufacturing industries, and that on this account great numbers of our people who were formerly subjected to more or less foreign competition are now entirely exempt from it. The failures of many of our industries in the past have been attributed to insufficient protection against competition from abroad, when the real causes were unfavorable locations and lack of skill and experience on the part of their managers. or oversupply of products by domestic establishments.

In view of the comparatively small and constantly decreasing part of our laboring population that could be affected even by a repeal of all duties, a movement for the imposition of higher duties upon imported goods can not be regarded as justifiable upon any of the grounds usually urged in support of such measures by the advocates of the protective theory.

Nor do I believe that, under existing industrial and trade conditions, here and abroad, an increase of duties upon articles now dutiable, with the exception of a few which are not produced at all in this country, and others which are not produced in sufficient quantities to supply the demands of our own people, would yield the Government much, if any, additional revenue. What has already been said concerning the ability of our manufacturers and others to command the home market, to the exclusion of foreign products similar to their own, shows that, in the selection of imported articles for taxation for the purpose of raising revenue, the Government is necessarily confined to comparatively narrow limits. The cost of production in all the great manufacturing nations has been so nearly equalized by modern inventions and economies, that movements of their several products from one to another can not take place upon a large scale, or for any considerable length of time, if these products are burdened in the markets to which they are sent with charges to which they are not subjected in the countries of their origin; and this tendency toward equalization of cost is still going on and must continue. small tax or charge will now entirely prevent the importation of many articles which a few years ago constituted a large proportion of our total dutiable merchandise and contributed very materially to our public revenues. This great change in the relative industrial conditions of the commercial world can not be safely ignored in our investigations of this subject, and, when proper allowance has been made for its present and prospective effect upon the amount of revenue to be derived from duties upon imported goods, I think it will be found that, instead of increasing existing rates upon articles now dutiable, it will be necessary to resort to taxation upon various kinds of importations heretofore exempted simply because they were not included within the scope of the protective theory. Of course, there are some exceptions to the general proposition that increased rates upon articles now taxed would not increase revenue. Articles of taste and luxury, and articles of prime necessity, which can not now be produced in this country in sufficient quantities to supply the home demand, will yield revenue under rates of duty higher in proportion to their value than could be imposed, for revenue purposes, upon the great mass of commodities now subject to tariff taxation. So far as our dutiable schedules now include such articles, some increase of revenue might be secured by imposing higher rates, but even this will prove to be an annually diminishing amount, except in the cases of such articles as can not, on account of natural conditions, be hereafter produced here.

Of all the great manufacturing nations, ours is the only one which annually produces a surplus of food and raw materials, and, unless we fail to utilize our resources, we must become the great exporting country of the world. No very considerable part of our natural material can be much longer profitably carried to other countries and returned to us in the form of manufactures, but it will be converted into the finished product by our people in their own shops and factories, and, after supplying the home demand, the surplus will go abroad, to compete successfully with like products of other peoples not so favorably situated. This is the result toward which we have been rapidly advancing since 1892, and, unless our progress is seriously checked by unusual adverse influences, the time can not be very far distant when the importation of manufactured products as one of the sources of revenue must be substantially excluded from our estimates. While a revival of business and a return to more prosperous conditions would increase the income of the Government from customs, under the exisiting rates of duty, on manufactured articles, it is reasonably certain that the quantities and values of such articles hereafter imported will be less than they were before the depression began, and that they will not in the future, under any rate that may be established, reach the proportions of ten or fifteen years ago.

If this view of the subject is correct, it is evident that new objects of taxation must be included in our tariff schedules, or the attempt to secure the usual proportion of revenue from customs must be abandoned, and some other method of raising means to support the Government must be adopted; but, whether revenue shall be raised by duties on imported goods or by the imposition of taxes in some other form, there are certain funda-

mental rules and principles applicable to the subject, which can not be disregarded without injustice to the people from whom the exactions The first and most important one is, that no tax should are to be made. be laid except for public purposes, and that all sums paid by the people should be received by the Government. Any tax, whether impost or excise, which increases the cost of commodities to the consumer, beyond the amount collected by the Government, is unjust and indefensible upon any correct economic principle. Taxation should not only be imposed for public purposes alone, but it should be limited as far as possible to such articles as the people can avoid the use of without impairing their ability to earn a subsistence or increasing the cost of any part of the materials on which they work, that is, on articles of voluntary, rather than on articles of necessary, use; and all such taxes should be so adjusted, when possible, as to distribute the burdens of Government equally upon the people, according to their ability to bear them. It is not claimed that absolute equality in the distribution of the burdens of taxation can be secured in all cases, under any practical system that can be devised, but gross inequalities can certainly be avoided, and they are much less likely to result when revenue is made the sole object of tariff legislation than when the customs laws are framed to accomplish other purposes.

When the true principles of taxation are recognized and applied in our fiscal legislation, there will be no difficulty in securing an ample revenue for the support of the Government, in the exercise of all its proper functions, without subjecting our industries to injurious and unnecessary burdens, or our trade to injurious and unnecessary restrictions. Although the number of purely revenue articles has been much diminished by the economic changes that have taken place during the last few years, such articles are still sufficient in number, and they are and must continue to be imported in such quantities, as to afford, under moderate rates of duty, all additions to the income of the Government that future exigencies may prove to be necessary; and, no matter what may be the preferences of any part of our people upon the subject, the necessities of the situation demand the adoption of a system of taxation which will utilize these resources.

J. G. CARLISLE,

Secretary.

To Hon. Thomas B. Reed,

Speaker of the House of Representatives.

The act of March 3, 1875 (18 Statutes, 466), directs the Secretary of the Treasury to issue bonds of the character and description set out in the act of July 14, 1870 (16 Statutes, 272), to James B. Eads, or his legal representatives, in payment at par of the warrants of the Secretary of War for the construction of jetties and auxiliary works to maintain a wide and deep channel between the South Pass of the Mississippi River and the Gulf of Mexico, unless Congress shall have previously provided for the payment of the same by the necessary appropriation of money. The act of July 14, 1870 (16 Statutes, 272), authorizes the issue of \$200,000 at 5 per centum, principal and interest payable in coin of the present standard value, at the pleasure of the United States Government, after ten years; these bonds to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. Bonds and coupons payable at the Treasury of the United States. This act not to authorize an increase of the bonded debt of the United States. Ends to be sold at not less than par in coin, and the proceeds to be applied to the rederaption of outstanding 5-20's or to be exchanged for said 5-20's, par for par. Payment of these bonds, when due, to be made in order of dates and numbers, beginning with each class last dated and numbered. Interest to cease at the end of three months from notice of intention to redeem. The act of January 20, 1871 (16 Statutes, 399), increases the amount of 5 per cents to \$500,000,000, provided the total amount of bonds issued shall not exceed the amount or originally authorized, and authorizes the interest on any of these bonds to be paid quarterly. The act of December 17, 1873 (18 Statutes, 1), authorized the issue of an equal amount of bonds of the loan of 1858, which the folders thereof may, on or before February 1, 1874, elect to exenange for the bonds of this loan.	10 years	May 1, 1881	5 per cent	Par	1,500,000,000	517,994,150.00	32, 500.00
FOUR-AND-ONE-HALF-PER-CENT LOAN OF 1891. (REFUND-ING.) The act of July 13, 1870 (16 Statutes, 272), authorizes the issue of \$300,000,000 at 43 per centum, payable in coin of the present standard value, at the pleasure of the United States Government, after fifteen years; these bonds to be exempt from the payment of all taxes or duties of the United States, as well as from taxetion in any form by or under State, municipal, or local authority. Bonds and coupons payable at the Treasury of the United States. This act not to authorize an increase of the bonded debt of the United States. Bonds to be sold at not less than par in coin, and the proceeds to be applied to the redemption of outstanding 5-20's or to be exchanged for said 5-20's, par for par. The act of June 8, 1872 (17 Statutes, 336), authorizes the deposit of
United States notes without interest by banking associations in sums
not less than \$10,000 and the issue of certificates therefor in denomi-
nations of not less than \$5,000; which certificates shall be payable
on demand in United States notes, at the place where the deposits
were made. It provides that the notes so deposited in the Treasury
shall not be counted as a part of the legal reserve, but that the cer-
tificates issued therefor may be held and counted by the national
banks as part of their legal reserve, and may be accepted in the set-
tlement of clearing house balances at the place where the deposits
therefor were made, and that the United States notes for which such
certificates were issued, or other United States notes of like amount,
shall be held as special deposits in the Treasury, and used only for
the redemption of such certificates.

GOLD CERTIFICATES.

The act of March 3, 1863 (12 Statutes, 711), authorizes the Secretary of the Treasury to receive deposits of gold coin and bullion in sums of not less than twenty dollars, and to issue certificates therefor in denominations of not less than twenty dollars each; the coin and bullion deposited for or representing the certificates to be retained in the Treasury for the payment of the same on demand. The certificates so issued to be received at par in payment of intesest on the public debt and for duties on imports. The act of July 12, 1882 (22 Statutes, 165), provides that the Secretary of the Treasury shall suspend the issue of gold certificates whenever the amount of gold coin and gold bullion in the Treasury reserved for the redemption of United States notes falls below one hundred millions of dollars.

SILVER CERTIFICATES.

The act of February 28, 1878 (20 Statutes, 26, sec. 3), provides that any holder of the coin authorized by this act may deposit the same with the Treasurer or any assistant treasurer of the United States in sums not less than ten dollars and receive therefor certificates of notless than ten dollars cach, corresponding with the denominations of the United States notes. The coin deposited for or representing the certificates shall be retained in the Treasury for the payment of the same on demand. Said certificates shall be receivable for customs, taxes, and all public dues, and, when so received, may be reissued. The act of August 4, 1886 (24 Statutes, 227), authorizes the issue of silver certificates in denominations of one, two, and five dollars; said certificates to be receivable, redeemable, and payable in like manner and for like purposes as is provided for by the act of February 28: 1878.

TREASURY NOTES OF 1890.

The act of July 14, 1890 (26 Statutes, 289), directs the Secretary of the Treasury to purchase, from time to time, silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered in each month, at the market price thereof, not exceeding one dollar for three hundred and seventyone and twenty-five hundredths grains of pure silver, and to issue in payment for such purchases of silver bullion Treasury notes of the United States, to be prepared by the Secretary of the Treasury, in such form and of such denominations, not less than one dollar nor more than one thousand dollars, as he may prescribe. That said notes shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the Treasury, purchased by such notes, and such Treasury notes shall be a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes. and all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lawful reserve. That upon demand of the holder of any of the Treasury notes provided for, the Secretary of the Treasury shall redeem the same in gold or silver coin, at his discretion, it being the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law.

NATIONAL-BANK NOTES (REDEMPTION ACCOUNT).

The act of July 14, 1890 (26 Statutes, 289), provides that balances standing with the Treasurer of the United States to the respective credits of national banks for deposits made to redeem the circulating notes of such banks, and all deposits thereafter received for like purpose, shall be covered into the Treasury as a miscellaneous receipt, and the Treasurer of the United States shall redeem from the general cash in the Treasury the circulating notes of said banks which may come into his possession subject to redemption, * * * and the balance remaining of the deposits so covered shall, at the close of each month, be reported on the monthly public debt statement as debt of the United States bearing no interest.

^{*}In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redomption and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years.

† Exclusive of gold, silver, currency certificates, and Treasury notes of 1890 held in the Treasurer's cash, and including \$64,623,512 bonds issued to the several Pacific railroads

Table C.—Analysis of the Principal of the Public Debt of the United States from July 1, 1856, to July 1, 1896.

Year.	3 per cents.	3½ per cents.	4 per cents.	4½ per cents.	5 per cents.	6 per cents.	$7\frac{3}{10}$ per cents.	Total interest- bearing debt.

Note 1.—Annual interest charge computed on amount of outstanding principal at close of fiscal year, and is exclusive of interest charge on Pacific railway bonds.

Note 2.—The figures for July 1, 1879, were made up assuming pending funding operations to have been completed.

Note 3.—The temporary loan per act of July 11, 1862, is included in the 4 percents from 1882 to 1882 to 1883, inclusive, with the exception of the amount outstanding August 31, 1865, this being the date at which the public debt reached its highest point. This foun bore interest from 4 per cent to each and was redeemable on ten days' notice after thirty days; but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent interest on an average for the year.

Table D.—Statement of the Issue and Redemption of Loans and Treasury Notes (by Warrants) for the Fiscal Year ended June 30, 1896.

Note.—The difference between the amount of money in the country and the amount in circulation represents the money in the Treasury.

Currency certificates, act of June 8, 1872, are included in the amount of United States notes in circulation in the tables for the years 1873 to 1891, inclusive; since 1891 they are reported separately.

The foregoing tables present the revised figures for each of the years given.

REPORT OF THE SECRETARY OF THE TREASURY - CXXVII

Table I.—Population, Net Revenue, and Net Expenditures of the Government from 1837 to June 30, 1896, and Per Capita of the Revenues and Per Capita of Expenditures.

Year. Population. Net revenue. Per capita on revenue. Net expenses.	2. 10 1. 62 1. 42 1. 51 1. 39 1. 27 1. 15 1. 15 2. 71 2. 00

APPENDIX.

REPORTS OF HEADS OF BUREAUS AND OTHER OFFICERS.

(No. 1.)

REPORT OF THE TREASURER.

TREASURY OF THE UNITED STATES, Washington, December 1, 1896.

SIR: I have the honor to submit the following report of the transactions of this office during the past fiscal year and the condition of the public business intrusted to my charge:

REVENUES AND EXPENDITURES.

The net ordinary revenues and expenditures for the fiscal year ending June 30, 1896, in comparison with those for the year preceding, as shown by the warrants issued, were as follows:

Account.	1895.	1896.	Increase.	Decrease.
REVENUES.		:		
Customs	\$152, 158, 617 . 45 143, 421, 672. 02	\$160, 021, 751. 67 146, 762, 864, 74	\$7, 863, 134, 22 3, 341, 192, 72

Indians	9, 939, 754, 21	12, 165, 528, 28	2, 225, 774. 07	
Pensions	141, 395, 228, 87	139, 434, 000, 98		1, 961, 227, 89
Interest on the public debt	30, 978, 030. 21	35, 385, 028, 93	4, 400, 998. 72	
Total	356, 195, 298. 29	352, 179, 446. 08	6,632,772.79	10, 648, 625, 00
Net				4, 015, 852. 21
Deficiency	42, 805, 223. 18	25, 203, 245. 70		17, 601, 977. 48

There was an increase of \$13,586,125.27 in the revenues and a decrease of \$4,015,852.21 in the expenditures, making a net reduction of \$17,601,977.48 in the deficiency, which amounted to \$25,203,245.70 for the year.

The receipts and disbursements on account of the public debt, which for the fiscal year 1895 are given in detail in the Appendix, may be stated in the following summary form:

Account.	1895.	1896.	Increase.	Decrease.
RECEIPTS.				
Bonds United States notes Treasury notes of 1890 National bank notes Gold certificates Silver certificates Currency certificates	\$92, 504, 394, 62 74, 720, 000, 00 44, 215, 983, 00 12, 056, 172, 50 120, 000, 00 115, 170, 000, 00 68, 340, 000, 00	\$142, 335, 046. 41 68, 924, 000. 00 45, 158, 880. 00 5, 965, 683. 50 4, 855, 000. 00 154, 008, 000. 00 72, 630, 000. 00	\$49, 830, 651. 79 942, 897. 00 4, 735, 000. 00 38, 838, 000. 00 4, 290, 000. 00	\$5, 796, 000. 00 6, 090, 489. 00
Total Net DISBURSEMENTS.	407, 126, 550. 12	493, 876, 609. 91	98, 636, 548. 79 86, 750, 059. 79	11, 886, 489. 00
Bonds and fractional currency United States notes Treasury notes of 1890. National bank notes. Gold certificates. Silver certificates. Currency certificates.	2, 494, 549, 93 74, 720, 000, 00 50, 712, 000, 00 13, 068, 369, 00 18, 037, 940, 00 123, 424, 000, 00 71, 820, 000, 00	7, 294, 103, 35 68, 924, 000, 00 61, 564, 000, 00 11, 223, 150, 00 10, 506, 770, 00 140, 283, 000, 00 96, 395, 000, 00	4, 709, 553. 42 10, 852, 000. 00 16, 859, 000. 00 24, 575, 000. 00	5, 796, 000. 00 1, 845, 219. 00 7, 531, 170. 00
Total	354, 276, 858. 93	396, 190, 023. 35	57, 085, 553. 42 41, 913, 164. 42	15, 172, 389. 00
Excess of receipts	52, 849, 691. 19	97, 686, 586. 56	44, 836, 894. 37	

The aggregate transactions on all accounts were therefore as follows:

Account.	1895.	1896.	Increase.	Decrease.
RECEIPTS.				
Ordinary	\$313, 390, 075. 11	\$326, 976, 200. 38 493, 876, 699, 91	\$13, 586, 125, 27 86, 750, 059, 79	
Dont	407, 126, 550. 12	493, 870, 099. 91	80, 750, 059. 79	•••••
Total	720, 516, 625. 23	820, 852, 810. 29	100, 336, 185. 06	
DISBURSEMENTS.				
Ordinary Debt	356, 195, 298. 29 354, 276, 858. 93	352, 179, 446. 08 396, 190, 023. 35	41, 913, 164. 42	\$4, 015, 852. 21
Total	710, 472, 157. 22	748, 369, 469. 43	37, 897, 312. 21	
Excess of receipts	10, 044, 468. 01	72, 483, 340. 86	62, 438, 872. 85	

The excess of \$72,483,340.86 of aggregate receipts over aggregate disbursements shown by the preceding statements went into the general Treasury balance, which stood at \$773,610,008.76 on June 30, 1895, and at \$846,093,349.62 on June 30, 1896.

Of the \$820,852,810.29 of aggregate receipts for the year, a total of \$544,200,930.29, arising from the ordinary revenues, from the proceeds of the sale of bonds, from the issue of United States notes, and from deposits for the retirement of national bank notes, went to increase the available cash balance, while the disbursements on the same accounts, aggregating \$439,620,699.43, diminished that balance. Since the issues and redemptions of United States notes are required to be equal, these transactions have no effect upon the balance, but they are covered by the warrants, and the figures relating to them are here given for the sake of completeness.

• The following comparative statement shows for the two years the receipts and disbursements which affected the available balance:

Account.	1895.	1896.	Increase.	Decrease.

The amount here shown as received during 1896 on account of bonds is composed of the proceeds of the sale of \$100,000,000 of the loan of 1925, together with part of the amount realized from the last preceding issue, which part had been paid into the Treasury prior to June 30, 1895, but was not covered by warrant until after that date.

The following statement shows the amount received for the \$100,000,000 of thirty-year 4 per cent bonds disposed of during the fiscal year 1896, and also the amounts and kinds of bonds previously issued for the maintenance of the gold reserve, together with the proceeds thereof:

Account.	Loan of 1904.	Loan of 1904.	Loan of 1925.	Loan of 1925.
Principal	8, 633, 295, 71	\$50,000,000.00 8,538,500.00 181,210.20	\$62, 315, 400. 00 2, 800, 844. 62 311, 812. 27	\$100, 000, 000. 00 11, 166, 246. 41 189, 365. 66

The periods during which the proceeds of the several issues of bonds were paid into the Treasury and the kinds of money in which payment was made are shown in the following table:

Gold coin \$52, 850, 264, 24 \$53, 651, 188, 50 \$65, 428, 051, 57 \$109, 327 Standard silver dollars 20, 00 43, 00 40, 00 61, 40 49, 75 4, 40 United States notes 5, 00 5, 00 7, 00 61, 40 7, 00 61, 40 7, 00 61, 40	455. 0C 75. 00
Treasury notes of 1890	275.95
National bank notes 5.00	642.00 282.00
Gold certificates 5, 810, 420. 00 5, 068, 410. 00 2, 026 Silver certificates 37. 00 2,026	810.00 27.00
Minor coin. 8:99 6.95 92 Total 58, 660, 917. 63 58, 719, 710. 20 65, 428, 056, 89 111, 355	45. 12

If from \$773,610,008.76, the balance in the Treasury on June 30, 1895, as shown by the warrants, there be taken \$28,101,644.91, the amount on deposit with certain States, there will be left \$745,508,363.85 as the net balance. Of this, \$579,207,863 was reserved for the redemption of

certificates and Treasury notes, so that the available balance at the beginning of the fiscal year 1896, according to the warrants, was \$166,300,500.85. Adding to this the \$544,200,930.29 of receipts above shown gives \$710,501,431.14 as the aggregate of the covered moneys available for the service of the year. The total actual disbursements of \$439,620,699.43 left therefore a balance of \$270,880,731.71 available on June 30, 1896.

If from the foregoing figures there be omitted the receipts from the sale of bonds, and also the issues and redemptions of United States notes, there will be left the sum of \$332,941,883.88 as the net current receipts and \$370,696,699.43 as the net current expenditures, or an excess of \$37,754,815.55 of the latter over the former. This excess, as will be seen more clearly from the table of receipts and expenditures in the Appendix, was applied as follows:

Deficiency in ordinary revenues	\$25, 203, 245. 70
Payment of Pacific Railroad bonds	7, 199, 000. 00
Redemption of national-bank notes	5, 257, 466, 50
Redemption of demand notes, fractional currency, and matured debt.	95, 103. 35
-	

The receipts and disbursements for the two years on account of Treasury notes and the three kinds of certificates, transactions which elsewhere in this report are referred to as issues and redemptions, are shown below:

. Account.	1895.	1896.	Increase.	Decrease.

STATE OF THE TREASURY.

In addition to the general account, the Treasurer has liabilities on his agency account, arising from funds on hand to meet outstanding drafts and checks, from disbursing officers' balances on deposit, from the postal revenues, from the 5 per cent fund for the redemption of national bank notes, and from other sources. There are also liabilities on account of moneys received but not yet covered by warrant. The Treasurer's total liabilities on June 30, 1895 and 1896, according to the books of the Department, were as follows:

Account.	June 30, 1895. June 30, 1896.		
ACOUNTION.		0 4110 00, 1000.	
General. Agency. Uncovered moneys		\$846, 093, 349, 62 38, 717, 041, 63 397, 216, 08	
Total		885, 207, 607. 33	

. As against these liabilities there existed the following-described assets, whether in the Treasurer's custody and available, or recognized by the Department on other grounds as legitimate credits:

Description.	June 39, 1895.	June 30, 1896.
Gold cein and bullion Silver coin and bullion Notes and certificates Minor coin and fractional currency Deposits in national banks Bonds and interest paid Deposits with States Unavailable funds Unpaid loss on recoinage	14, 847, 562, 75 15, 665, 02 28, 101, 644, 91 1, 418, 822, 88	\$144, 715, 614, 86 513, 480, 698, 91 180, 803, 988, 44 1, 102, 293, 41 15, 555, 600, 77 27, 125, 31 28, 101, 644, 91 1, 418, 822, 88
Total	842, 148, 189. 84	885, 207, 607. 33

The amount on deposit with States is not carried on the Treasurer's books, and in the statements of the condition of the Treasury contained in this report the other unavailable funds, together with the unsettled loss on recoinage, are omitted. The total amounts of the available assets and of the corresponding liabilities on the two dates are shown below:

	June 30, 1895.	June 30, 1896.
Assets	\$812, 627, 722. 05	\$855, 685, 321. 70
Liabilities: General account Agency account	775, 593, 056, 17 37, 031, 665, 88	816, 968, 280. 67 38, 717, 041. 63
Total	812, 627, 722. 65	855, 685, 321. 70

In the Appendix will be found the usual tables showing in detail the assets and liabilities on June 30, 1896, with regard not only to their character but also to their distribution over the various parts of the Treasury system.

If the amounts of gold, silver, and United States notes on deposit for the redemption of outstanding certificates and Treasury notes be set aside, the remaining assets will constitute the available general fund as it actually existed. In composition and amount this fund was as follows:

	June 30, 1895.	June 30, 1896.
Assets:		
Gold coin and bullion	\$108, 148, 103. 04	\$101, 897, 425. 86
Silver dollars and bullion	20, 808, 102, 42	25, 410, 859. 39
Fractional silver coin] 16,604,419.75	15, 767, 055, 52
United States notes	27, 237, 031, 04	90, 221, 147, 79
Treasury notes of 1890	30, 145, 231, 00	34, 638, 033, 00
National-bank notes	4,737,984:31	10, 832, 424, 65

Bonds and interest paid	15, 665. 02	27, 125. 31
Total	233, 379, 859. 05	308, 354, 348. 70
Liabilities:		
Agency account	37, 031, 665, 88	38, 717, 041-63
Balance, general account	196, 348, 193, 17	269, 637, 307, 67
Total	233, 379, 859, 05	308, 354, 348. 70

This last statement may, without misrepresenting the virtual character of the assets, be modified by assuming the cancellation of the certificates and the addition of the amounts of coin and notes which they cover to the items of the same kinds now shown. In this form, which presents the free assets as they are ordinarily stated, the figures are given in a table in the Appendix.

The amounts of gold, silver, and United States notes on deposit in the Treasury on account of certificates and Treasury notes, together

with the amounts of those outstanding, are shown below:

	June 30, 1895.	June 20, 1896.
Assets: Gold coin and bullion.	\$48, 469, 959, 00	\$42, 818, 189, 00

Total	579, 247, 863. 00	547, 330, 973. 0

While the cash balance in the Treasury has afforded a comfortable working fund, and would have done so without augmentation from loans, the gold reserve has been the cause of much concern, and has been maintained only at the cost of a fresh issue of bonds, and by the voluntary contributions of banks and financial institutions. With the exception of a brief period in the autumn of 1895 and another in the spring of 1896, the ruling rates of foreign exchange were such, throughout the year, as to permit, if not to require, the export of gold. The movement began in volume the first week in August and continued, with a short interruption, till toward the end of January. At first the demands upon the Treasury for gold were limited to the wants of exporters, but in December considerable withdrawals began to be made by others, the amount increasing during January and rising in February, when heavy payments were made into the Treasury for bonds, to nearly \$20,000,000 for the month.

Under this drain the reserve gradually sank until February 10, 1896, when it stood at \$44,563,493. It was then rapidly built up from the proceeds of the sale of bonds, and rose to \$128,713,709 by March 31. After inconsiderable variations in the reserve during April the export of gold was resumed on May 1, and this movement, together with the continued withdrawals not for export, again put in operation the process of depletion. There was an almost daily decline until July 23, when the official figures for the reserve were \$89,669,975. At this point the bankers of the principal cities joined together in a movement of relief, the result being that the banks and financial institutions deposited gold in exchange for paper currency, and restored the reserve to \$110,782,403 by August 4. After the discontinuance of these operations the free gold again declined gradually to \$100,957,561, where it stood on September 1. In the latter half of August there occurred a favorable turn in foreign exchange, which had the effect, first, of checking the outflow of gold, and, later, of setting in motion a rapid current in the opposite direction. As some of the imported material was brought for the purpose of supplying the inland demand

for currency, and as the preference which later was manifested in the interior for gold had not yet become a factor in the situation, a great part of the early inflow found its way into the Treasury in exchange

for paper.

In ordinary times and under ordinary circumstances there is a natural flow of gold toward the Treasury, which often is limited only by the capacity of the Treasury to carry the specie. The product of our mines finds its way to the mint, where it is paid for by checks, and these are presented at the counters of the subtreasuries, or through the clearing house in New York, as currency obligations. The result is an increase of the gold reserve and a diminution of the available balance of notes and silver certificates. Gold imported in the form of bullion or foreign coin takes usually the same course.

Besides these two sources of ordinary gain to the gold reserve, there is another, in the direct exchange of paper currency for the coin, where the paper is preferred for its greater convenience. Fortunate indeed has it been for the Treasury that even during the most critical periods through which the country has recently passed, these currents of inflow have not been altogether checked, and that where their volume has been materially diminished the loss has been partly made good by the assistance of financial institutions. In the fifteen months ending with September last the withdrawals of gold from the Treasury in redemption of United States notes and Treasury notes amounted to the immense sum of \$192,972,205, while the net gains of gold from all sources attained a total of \$98,138,902.

The following table shows the redemptions of notes in gold, the receipts from the sale of bonds, the gain of gold from all other sources, and the amount of the reserve for each month, from July, 1895, to September,

1896:

Month.	Notes redeem- ed in gold.		Receipts from other sources.	
1895. July August September October November December.	16, 564, 067 17, 377, 484 2, 166, 883 16, 034, 590		9, 657, 417 9, 959, 621 2, 198, 089 2, 425, 376	\$107, 236, 487 100, 329, 837 92, 911, 974 92, 943, 180 79, 333, 966 63, 262, 268

In the Appendix, in addition to the tables heretofore published relating to the condition of the Treasury, will be found one which shows the redemptions of United States notes and Treasury notes in gold and the imports and exports of gold during each month from the resumption of specie payments on January 1, 1879. This is followed by others exhibiting the transactions between the subtreasury and the clearing house in New York, and the amount of each kind of money used by the former institution in the settlement of balances, by months, from 1880.

THE PUBLIC DEBT.

The changes which occurred during the year in the principal of the outstanding interest bearing public debt consisted of an increase of \$131,157,700 in the loan of 1925, arising from the sale of \$100,000,000 of bonds and the delivery of \$31,157,700 which had been paid for during the preceding year, together with an increase of \$11,100 in the funded loan of 1907, the result of the conversion of \$6,970 of refunding certificates and \$4,130 of interest thereon. The total net increase was therefore \$131,161,830. Inclusive of the accruing interest on the refunding certificates the total annual interest charge upon the debt as it stood at the close of the year was \$34,387,265.60.

The following is a statement of the amount and character of the debt

outstanding on June 30, 1895 and 1896:

Title.	Rate of interest,	When payable.	Outstanding June 30, 1895.	Outstanding June 30, 1896.
Funded loan of 1891. Funded loan of 1907.	Per cent.	Option of United States. July 1, 1907	\$25, 364,:500.00 559.:625, 750.00	\$25, 364, 500, 60 559, 636, 850, 0
Refunding certificates Lean of 1994 Lean of 1925	4	Convertible Feb. 1, 1904	54, 110, 00 100, 000, 000, 00	47, 140, 00 100, 000, 000, 0
Matured loans Old demand notes		do	1,721,590.26 54,847.50	162, 315, 400. 0 1, 636, 890, 2 54, 347. 5
United States notes Fractional currency National bank notes		ob	6, 894, 117, 49 25, 359, 489, 00	346, 681, 016, 0 6, 891, 184, 1 20, 102, 022, 5
Gold certificates		do	48, 469, 959, 00 328, 894, 504, 00	42, 818, 189. 0 342, 649, 504. 0 31, 990, 000. 0
Currency certificates Treasury notes of 1890.		3	146, 088, 400, 00 1, 676, 120, 983, 25	1,769,840,323.4

If the certificates and Treasury notes be set aside as mere liabilities of the Treasury, against which equal amounts of assets are reserved, the debt proper, as ordinarily classified, will be found to have been as follows:

Class.	Juno 30, 1895.	June 30, 1896.
Interest/bearing Matured Bearing no interest.	\$716, 202, 060, 00 1,721, 590, 26 378, 989, 469, 99	\$847,363,890.00 1,036,890.26 373,728,570.14
Total	1, 096, 913, 120. 25	1, 222, 729, 350.40

With respect to the conditions of payment the debt may be arranged under five general heads, as follows:

Condition of payment.	June 30, 1895.	-June:30, 1896.
At option of the United States At maturity, future dates On demand, without reissue On demand, formeissue On demand, out of deposits Total	690, 837, 560, 00 34, 030, 044, 25 492, 769, 406, 00 433, 119, 468, 00	417, 427, 693, 00

In the Appendix is given a table which shows the amount of the principal of the debt, exclusive of certificates and Treasury notes, at the end of each month, beginning with June, 1878. In this table the fund for the retirement of national bank notes, which until July, 1890, was carried as a liability of the Treasury, is uniformly treated for the whole

period as part of the debt bearing no interest. This method of presentation enables comparisons of the debt at different times to be made without the inconvenience arising from changes in the form of statement.

THE MONETARY STOCK.

According to the revised estimates of the Department the composition and distribution of the monetary stock on June 30, 1895, was as follows:

Kind.	In Treasury and mints.	In circulation.	Total stock.
Gold coin Gold bullion Silver dollars Fractional silver coin Silver bullion	371, 303, 176	\$479, 637, 961 51, 986, 043 60, 350, 014 214, 252	\$579, 400, 907 56, 828, 918 423, 289, 216 76, 954, 434 125, 611, 296

If the gold, silver, United States notes, and national-bank notes be taken as the effective stock, while the certificates and Treasury notes are regarded as merely representative, the virtual distribution of the actual monetary supply will be found to have been as follows:

Kind.	In Treasury and mints.	In circulation.	Effective stock.
June 30, 1895 : Gold Silver Notes	\$108, 210, 555 77, 738, 530 32, 325, 015	\$528, 019, 270 548, 116, 419 526, 047, 036	\$636, 229, 825 625, 854, 949 558, 372, 051
Total	. 218, 274, 100	1, 602, 182, 725	1, 820, 456, 825
June 30, 1896: Gold Silver Notes		497, 103, 183 539, 056, 358 471, 307, 990	599, 597, 964 628, 728, 071 572, 681, 563
Total	. 293, 540, 067	1, 507, 467, 531	1, 801, 007, 598

In the existing state of legislation bearing on the currency the supply of gold, silver, and notes is in each case variable. The stock of gold is increased by the product of the mines and by imports, while it is diminished by industrial consumption and by exports. Although there is no authority of law for any further addition to the existing monetary stock of silver, the nominal value of the present mass is subject to increase, from time to time, by the amount of the profit or seigniorage to arise from the coinage of the remainder of the bullion in the Treasury. Under the law the volume of United States notes is unchangeable, but the outstanding national bank notes may be increased or diminished, within certain limitations, on the initiative of the banks.

There were redeemed in silver dollars and canceled during the year ending September 30 the sum of \$18,662,000 in Treasury notes of 1890, making a total retirement of \$30,926,722 by this process since August, 1893, and reducing the volume of the outstanding notes of this issue to \$125,004,280. While this process does not affect the amount or composition of the monetary stock, except in so far as it requires the coinage of bullion, thereby realizing a profit from seigniorage, it does change the character of part of the paper money by substituting silver certificates, eventually, in the active circulation in the place of Treasury notes. This is so for the reason that the silver dollars paid out in redemption of the notes, after serving the purpose for which they may have been required in the first instance, are presently returned to the Treasury and deposited for certificates.

THE COINAGE.

The following table shows the amounts of uncurrent gold and silver coins that were transferred during the year from the Treasury to the mint to be recoined, together with the loss thereon:

Denomination.	Amount.	Loss.
Double eagles	\$254, 960. 00	
Eagles	195, 480. 00	
Half eaglesQuarter eagles		
l'hree dollar pieces	12.00	
Total gold		\$6,732.9
Standard dollars		
Fifty-cent pieces	1, 927, 987. 00	
Twenty-five-cent pieces		
Cen cent pieces	781, 794. 10	
Five cent pieces	514.46	
Total silver	4, 627, 141. 46	249, 883. 0
Aggregate	5, 452, 724. 46	256, 616, 0

The minor coin transferred to the mint amounted to \$621,841. Of this so much as could be made fit for further circulation was cleaned and the remainder was recoined.

SPURIOUS AND FRAUDULENT ISSUES.

Counterfeit silver coins and paper currency of the following kinds and nominal amounts were detected and canceled during the year at the offices of the Treasury:

Denomination.	Silver coins.	United States notes.	Treasury notes.	National- bank notes.	Silver certifi- cates.	Fractional currency.	Total.
Ten cents Twenty-five cents. Fifty cents. One dollar Two dollars Five dollars Ten dollars. Ten dollars Fifty dollars Fifty dollars Fifty dollars Fifty dollars Fifty dollars Fire hundred dollars Five hundred dollars	553. 25 745. 00 1, 363. 00	\$7.00 20.00 300.00 380.00 620.00 950.00	\$15.00 100.00		\$10.00 843.00 220.00 70.00 20.00	19. 25	\$259, 30 572, 50 936, 00 1, 380, 00 933, 00 985, 00 1, 110, 00 1, 160, 00 1, 200, 00 500, 00
Total	2, 920. 45	3, 077. 00	115.00	2, 680. 00	1, 163. 00	210.35	10, 165. 80

There were also canceled a few counterfeit gold coins, 10,250 pieces of spurious minor coin, and two counterfeit compound interest notes, one each of the denominations of \$50 and \$100.

TRUST FUNDS.

United States bonds of the following descriptions and amounts were held on June 30, 1896, in trust for national banks to secure circulating notes and public deposits:

Kind of bonds.	Rate of interest.	To secure circulation.	To secure public deposits.	Total.
Funded loan of 1891 (continued)	4 4 5	\$22, 078, 100 151, 950, 450 31, 783, 550 13, 057, 850 10, 046, 000	\$1,033,000 12,195,000 1,285,000 1,535,000 880,000	\$23, 111, 100 164, 145, 450 23, 068, 550 14, 592, 850 10, 926, 000
Total		228, 915, 950	16, 928, 000	245, 843, 950

During the year \$37,925,000 of bonds were deposited on account of circulation and \$16,689,850 withdrawn. The deposits on account of public moneys were \$3,493,000 and the withdrawals \$1,843,000.

Bonds of the following kinds and amounts were held on June 30, 1896, for the sinking funds of the Pacific railroads:

Kind of bonds.	Rate of interest.	Union Pacific.	Central Pacific.	Total.
United States bonds issued to Pacific railroads Union Pacific first mortgage. Central Pacific first mortgage. Central Branch, Union Pacific Eastern Division, Union Pacific. Sioux City and Pacific. Western Pacific United States loan of 1904	6 6 6 6	\$64,000 6,367,000 3,230,000 1,025,000 1,478,000 716,500 350,000 915,750	\$2,130,000 939,000 1,672,000 163,000 300,000 32,000 117,000 125,000	\$2, 194, 000 7, 306, 000 4, 902, 000 1, 188, 000 748, 500 467, 000 1, 040, 750
Total		14, 146, 250	5, 478, 000	19, 624, 250

Of these bonds, \$3,432,000 belonging to the sinking fund of the Union Pacific, together with \$635,160 of interest, were past due and unpaid, as also were \$643,000 of the principal of those held for the Central Pacific, with \$78,290 of interest. During the year \$10,000 of the United States bonds held for the Union and \$45,000 of those held for the Central became due and were paid by the Secretary of the Treasury. Of the Central first-mortgage bonds, \$179,000 held for the Union and \$38,000 held for the Central were paid during the fiscal year by the road. On July 1, 1896, \$432,000 of the same kind of bonds belonging to the fund of the former road and \$131,000 belonging to that of the latter were likewise paid. The total amount of bonds held on September 30, 1896, was \$19,061,250, of which \$13,714,250 was in the former fund and \$5,347,000 in the latter.

The bonds and stocks comprised in the following list are the property of the United States and are held for the Secretary of the Treasury:

Kind.	Amount.
Arkansas Stato bonds. Louisiana State bonds North Carolina State bonds Tennessee State bonds Virginia State bonds Virginia State bonds Chesapeake and Ohio Canal bonds guaranteed by Virginia.	37, 000. 00 58, 000. 00 335, 666. 663 581, 800. 00 13, 000. 00 125, 090. 00
Florida State stocks	2, 075, 466. 66 3

United States bonds are held in the following amounts, under various provisions of law, for private institutions:

Institution.	Rate of interest.	Amount.
American Printing House for the Blind Manhattan Savings Institution North American Commercial Company Total		\$250, 000 75, 000 50, 000 375, 000

A special deposit of \$70,000 of United States 4 per cent bonds is held in the name of the Comptroller of the Currency for the benefit of the Fidelity National Bank of Cincinnati.

Captured bonds of the State of Louisiana of the face value of \$545,480

are held for the Secretary of War.

REDEMPTION OF NATIONAL-BANK NOTES.

The net proceeds of the national bank notes redeemed during the year were \$107,891,026.34, the largest amount for any like period in ten years, and, with the exception of three years, the largest since 1879. The increase in the amount over recent years may be attributed to the increase in the volume of notes outstanding and the comparative inactivity of business. The increased labor was greater than could be conveniently performed by the existing force, and the consequence was that the balance of unassorted or partly assorted notes on hand increased during the year from \$4,203,973 to \$9,967,391. By the end of August

this balance had still further increased to \$13,376,890; since then, however, it has been slowly but gradually cut down. The total expenses of the year, including charges for transportation, salaries, stationery, and contingent expenses, were \$114,085.63, which have been assessed at the rate of \$1.12½ per \$1,000 of notes redeemed.

In closing this report I desire to take advantage of the opportunity to express once more my satisfaction with the efficient manner in which

those associated with me have performed their official duties.

I have the honor to be, very respectfully, your obedient servant,

DANIEL N. MORGAN, Treasurer of the United States.

Hon. John G. Carlisle, Secretary of the Treasury.

APPENDIX.

REPORT OF THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
Washington, D. C., December 4, 1896.

SIR: I have the honor to submit, in compliance with section 345, Revised Statutes of the United States, the twenty-fourth annual report of the Director of the Mint, covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1896.

DEPOSITS OF GOLD.

The original deposits of gold during the fiscal year at the several mints and assay offices of the United States, including the gold contained in silver deposits, aggregated 3,696,354.381 standard ounces of the value of \$68,769,383.81, an increase, as compared with the previous fiscal year, of 193,947.013 standard ounces of the value of \$3,608,316.53.

During the fiscal year 1896 the redeposits of gold amounted to \$34,541,741.92, showing an increase of \$12,220,719.64 as compared with the same for the previous fiscal year, making an aggregate of

\$103,311,125.73 in the total amount deposited during the year.

The redeposits of gold consisted of fine and unparted bars transferred from the mint at Denver, Colo., and assay offices at Charlotte, N. C., St. Louis, Mo., Helena, Mont., and Boise, Idaho, to the mint at Philadelphia, Pa., and from the mint at Carson, Nev., to the mint at San Francisco, Cal., transferred for conversion into coin.

The classification and weight in standard ounces (900 fine) of the original deposits and redeposits of gold bullion at the mints and assay offices of the United States during the fiscal years 1895 and 1896, and the increase or decrease, are shown in the table following.

169

Uncurrent United States gold coins of the face value of \$1,683,880.50 were received and melted at the mints and assay offices during the

year. Of this amount, \$825,583 were transferred from the Treasury of the United States for recoinage, the coining value of the same in new coin being \$818,850.04; and the remainder, \$858,297.50, the coining value of the same in new coin being \$851,155.49, was received from individuals. The difference (\$6,732.96) between the amount transferred from the Treasury for recoinage (\$825,583) and the coining value (\$818,850.04) was reimbursed the Treasurer from the appropriation "for loss on recoinage of uncurrent gold coin in the Treasury of the United States." The loss (\$7,142.01) on the amount (\$858,297.50) deposited by individuals was borne by the depositors.

DEPOSITS OF SILVER.

The original deposits of silver, including silver contained in gold deposits, during the fiscal year ended June 30, 1896, aggregated 10,030,691.88 standard ounces, having a coining value in standard silver dollars of \$11,672,077.79, against 13,092,320.67 standard ounces, of the coining value of \$15,234,700.35, for the fiscal year 1895, a decrease of \$3,562,622.56.

The redeposits of silver bullion during the fiscal year 1896 at the mints and assay offices aggregated 151,780.37 standard ounces, of the coining value in silver dollars of \$176,617.13, against 412,212.56 standard ounces, of the coining value of \$479,665.51, for the previous fiscal

year, a decrease of \$303,048.38.

The following table exhibits the classification and weight of the original deposits and redeposits of silver bullion at the mints and assay offices of the United States for the fiscal years 1895 and 1896, and the increase or decrease:

The refined silver bullion classed as original deposits was the prodnct of private refineries in the United States. As explained in former reports of this Bureau, silver bars, the product of private refineries in the United States, deposited at the mints and assay offices, are always classed as of domestic production, although frequently to a large extent composed of silver derived from ore and bullion imported from Mexico and smelted and refined in the United States. Owing to this fact, the classification of silver bullion deposited as of domestic production at the mints and assay offices is not exact.

When either refined gold or silver bars bearing the stamp of private refineries of the United States are deposited, it is impracticable for the officers of the mints and assay offices to ascertain the sources of production—whether domestic or foreign, or the locality where produced therefore the only alternative is to classify such deposits as of domestic production. Fortunately for statistical purposes, of the production of the precious metals at the close of each calendar year the private refiners courteously furnish statements to the Bureau of the Mint, showing the sources from which the gold and silver refined by them during the year is derived, exhibiting fully by individual States and Territories the amount of gold and silver produced from ores mined in each, and

also the amount of gold and silver derived from bullion and ore

imported from Mexico and British Columbia.

Tables will be found in the Appendix showing the distribution of the unrefined gold and silver bullion received by the mints and assay offices of the United States during the fiscal year among the States and Territories producing the same, and also tables of deposits and purchases of gold and silver since 1792.

Worn, uncurrent, and mutilated domestic silver coins of the face value of \$4,633,562.04 were received and melted at the mints during the fiscal year 1896. Of this sum, \$4,627,141.46 were worn and uncurrent subsidiary silver coins transferred from the Treasury for recoinage, and the remainder, \$6,420.58, multilated and uncurrent silver coins pur-

chased at the current market price of silver bullion.

The value in new subsidiary silver coins of the amount transferred for recoinage was \$4,377,258.40, showing a loss of \$249,883.06, which was reimbursed the Treasurer of the United States from the appropriation "for loss on recoinage of worn and uncurrent silver coins in the Treasury."

A table will be found in the Appendix showing by denominations and face value the uncurrent domestic coins received from the Treasury,

and purchased over the counter, during the fiscal year 1896.

The coining value of gold and silver (exclusive of redeposits) received at the mints and assay offices of the United States each fiscal year from 1880 is shown in the table following.

VALUE OF THE GOLD AND SILVER (NOT INCLUDING REDEPOSITS) RECEIVED AT THE MINTS AND ASSAY OFFICES, 1880-1896.

Fiscal year.	Gold.	Silver (coining value).	Total value.
1880	\$98, 835, 096	\$34, 640, 522	\$133, 475, 618

COINAGE.

The coinage executed by the mints at Philadelphia, San Francisco, and New Orleans during the fiscal year 1896 consisted of 3,584,760 pieces of gold, of the value of \$58,878,490; of 20,424,529 pieces of silver, of the nominal or face value of \$11,440,641.20, and the minor coinage aggregated 54,321,484 pieces, of the nominal value of \$869,337.32.

The execution of the minor coinage is confined by law to the mint at

Philadelphia.

The denominations, number of pieces, and value of domestic coinage executed are shown by the following table:

COINAGE OF THE UNITED STATES, FISCAL YEAR 1896.

Denomination.	Pieces.	Value.
Gold:		
Double eagles	2, 593, 723	\$51, 874, 460.00
Eagles	415,749	4, 157, 490. 00
Half eagles	563, 328	2, 816, 640.00
Quarter eagles	11, 960	29, 900. 00
Total gold	3, 584, 760	58, 878, 490. 00

COINAGE OF THE UNITED STATES, FISCAL YEAR 1896-Continued.

Denomination.	Pieces.	. Value.
Silver:		
Standard dollars	\$7,500,822	7, 500, 822. 00
Subsidiary:		
Half dollars	3, 610, 063	1,805,631.50
Quarter dollars	8, 022, 822	2, 005, 705. 50
Dimes	1, 290, 822	129, 082: 20
Total subsidiary	12, 923, 767	3, 939, 819. 20
Total silver	20, 424, 529	11, 440, 641. 20
Minor:		
Five-cent nickels	8, 153, 062	407, 653. 10
One-cent bronze	46, 168, 422	461,684.22
Total minor	54,321,484	869, 337. 32
Total coinage	78, 330, 773	71, 188, 468. 52

The 7,500,822 standard silver dollars embraced in the above table were coined from the balance of the silver bullion on hand, purchased under the act of July 14, 1890, and contain 5,801,417 ounces of pure silver, costing \$5,173,085.04. The seignorage on this coinage was \$2,327,736.96, which sum has been deposited in the Treasury.

Of the subsidiary silver coinage during the year \$3,607,120.50 was from bullion resulting from the melting of worn and uncurrent silver coins transferred from the Treasury for recoinage, and \$332,698,70 from silver bullion acquired under section 3526 of the Revised Statutes of the United States.

In addition to the above, the mint at Philadelphia coined 500,000 twenty-cent pieces, of the value of \$100,000, for the Government of Ecuador, completing the coinage of 5,000,000 twenty-cent pieces undertaken for that Government, under the act of January 29,1874, authorizing coinage to be executed at the mints of the United States for foreign countries.

The Government of Ecuador furnished the silver bullion and paid all

the expenses incurred in the execution of this coinage.

The number of domestic coins manufactured by the mints of the United States during the fiscal years 1895 and 1896, and the increase or decrease during the last named year, is exhibited in the following table:

Coinage of the Mints of the United States during the Fiscal Years 1895 and 1896, and the Increase or Decrease of the Same during the Latter Year.

OT 10: 17: 18: 18: 18: 18: 18: 18: 18: 18: 18: 18	Fiscal year.		Increase,	Decrease.

Total	59, 611, 112	78, 330, 773	22, 778, 993	4, 059, 332

The value of the domestic coinage executed by the mints of the United States during the fiscal years 1895 and 1896, and the increase or decrease of the same during 1896, is exhibited in the following table:

COINAGE OF THE MINTS OF THE UNITED STATES DURING THE FISCAL YEARS 1895 AND 1896, AND THE INCREASE OR DECREASE OF THE SAME DURING THE LATTER YEAR.

C1	Fiscal	year.	1000		
Classification of coinage.	1895.	1896.	Increase, 1896.	Decrease, 1896.	
Gold coins	\$43, 933, 475. 00	\$58, 878, 490. 00	\$14, 945, 015. 00		
Silver dollars	3, 956, 011. 00	7, 500, 822. 00	3, 544, 811. 60		
Subsidiary silver coins	5, 113, 469. 60	3, 939, 819. 20		\$1, 173, 650. 40	
Minor coins	712, 594. 02	869, 337. 32	156, 743. 30		
Total	53, 715, 549. 62	71, 188, 468. 52	18, 646, 569. 30	1, 173, 650. 40	

From August 13, 1890, to June 30, 1896, the number of silver dollars coined from silver bullion purchased under the provisions of the act of July 14, 1890, aggregated 47,544,776 pieces, containing 36,772,912.70 ounces of fine silver, costing \$36,964,557.38, giving a profit or seigniorage of \$10,580,218.62.

The number of silver dollars coined from July 1 to November 1, 1896, was 8,762,100, consuming 6,776,936.72 ounces of pure silver, showing a profit of \$2,723,816.31. All profits on the coinage of silver are regularly deposited in the Treasury at the close of each month.

The total number of silver dollars coined under the act of July 14,

1890, to November 1, 1896, was 56,306,876.

The total number of silver dollars coined from March 1, 1878, to November 1, 1896, under the acts of February 28, 1878, July 14, 1890, and March 3, 1891, is shown in the following table:

Coinage under act of—	Amount.	
February 28, 1878.		
July 14, 1890		
Total	439, 552, 141	

Tables will be found in the Appendix to this report, showing the denominations and values of all domestic coins manufactured by each mint during the fiscal year 1896 and during the calendar year 1895, and also tables showing the coinage, by denominations, for each calendar year, as well as the total coinage of each metal from the establishment of the Mint, 1792, to June 30, 1896.

BARS OF GOLD AND SILVER MANUFACTURED, 1896.

In addition to the coinage executed during the fiscal year 1896 there were manufactured gold and silver bars of the value of \$60,618,978.68, as shown in the following table:

	Description.		Standard ounces.	Value.
			2, 862, 108. 156 6, 333, 984. 73	\$53, 248, 523. 79 7, 370, 454. 89
Total .	••••••	•••••	••••••	60, 618, 978. 68

In the Appendix will be found tables showing in detail the manufacture of bars by institutions during the fiscal year 1896.

WORK OF GOVERNMENT REFINERIES.

There were received and operated upon by the refineries of the coinage mints and the assay office at New York, during the fiscal year 1896 1,334,145.901 standard ounces of gold and 4,533,513.52 standard ounces of silver, of the value of \$30,096,657.30, as shown by the following table:

PURCHASE OF SILVER.

The purchase of silver by the Government since November 1, 1893, the date of the repeal of the purchasing clause of the act of July 14, 1890, has been restricted to the silver contained in gold deposits, the amount received in payment of charges on silver deposits, surplus silver bullion returned by the operative officers of the coinage mints on the annual settlement of their accounts at the close of each fiscal year, and uncurrent and mutilated domestic silver coin purchased for the subsidiary silver coinage under the provisions of section 3526, Revised Statutes of the United States.

The amount and cost of silver purchased for the subsidiary silver coinage during the fiscal year ended June 30, 1896, and from July 1 to November 1, 1896, are set forth in the following tables:

SILVER PURCHASED FOR SUBSIDIARY COINAGE DURING THE FISCAL YEAR 1896.

COURSE OF SILVER.

The fluctuations in the price of silver in the London market during the year ended June 30, 1896, were not so great as for the preceding twelve months. The price ranged from 30 pence to $31\frac{15}{15}$ pence per ounce for silver .925 fine (British standard), equivalent at the former to \$0.65763 and at the last named rate to \$0.70010 in United States money per ounce 1,000 fine, a variation of \$0.04247 per ounce. The London quotation July 1, 1895, was $30\frac{1}{2}$ pence per ounce, equivalent at par of

exchange (\$4.8665) to \$0.66855 per ounce fine. The closing price of the year, June 30, 1896, was 31½ pence per ounce, equivalent to \$0.69051 per ounce fine.

The average London price for the year was 30.832 pence, equivalent

to \$0.67588 per fine ounce.

The commercial value of silver to gold at the average price for the year was 1 to 30.58. The bullion value of a silver dollar at the average price was \$0.52262. The number of grains of pure silver purchasable with a dollar at the average price was 710.06, equal to 1.479 ounces fine.

In the Appendix will be found a table showing the ratio of silver to gold since 1687, and a table showing the gold value of an ounce of fine

silver and the ratio between gold and silver since 1879.

The following table exhibits the value of the pure silver in a silver dollar at prices of silver per ounce fine from \$0.50 to \$1,2929, or parity:

DISTRIBUTION OF SILVER DOLLARS.

The number of silver dollars distributed from the mints during the fiscal year 1896 was 620,680, against 723,447 during the preceding fiscal year, showing a decrease of 102,767.

 $[\]alpha$ Rupees. b Eleven months. c From 1858-59 to 1860-61, inclusive, the home treasury was open at all times for the sale of bills on India, at rates altered from time to time by advertisement. Consequent on the mutiny, it was necessary to refrain from drawing on India, and exchange was raised to a prohibitory rate.

The following table shows the number of silver dollars on hand, the coinage, and the distribution from each mint during the fiscal year 1896:

SEIGNIORAGE ON SILVER COINAGE.

On July 1, 1895, the balance of profits on the coinage of silver on hand at the mints of the United States was \$171,210.29.

The seigniorage on the coinage of silver during the fiscal year 1896 was, on silver dollars, \$2,327,736.96, and on subsidiary pieces, \$175,319.52; a total seigniorage of \$2,503,056.48.

The amount reimbursed on account of silver wastage and loss on sale of sweeps, paid from this seigniorage, was \$1,345.96, leaving the net seigniorage on the silver coinage during the fiscal year \$2,501,710.52.

The amount deposited in the Treasury during the year was \$2,198,642.83, leaving a balance of \$474,277.98 on hand at the mints June 30, 1896, which has since been deposited in the Treasury.

Including the balance on hand at the mints July 1, 1878, the net seigniorage or profits on the coinage of silver from that date to June 30, 1896, aggregated \$78,145,603.93.

The seigniorage on the coinage of silver dollars, under the act of

July 14, 1890, from August 13, 1890 (the date the act went into effect), to June 30, 1896, was \$10,580,218.62, and from July 1 to November 1, 1896, \$2,723,816.31, a total seigniorage under this act of \$13,304,034.93.

A table showing the seigniorage on the silver coinage during the fiscal year at each mint and the disposition of the same will be found in the Appendix.

APPROPRIATIONS AND EXPENDITURES.

The specific appropriations for the support of the mints and assay offices of the United States contained in the act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ended June 30, 1896, amounted in the aggregate to \$978,900.

Owing to the increase in the number of gold deposits at the assay office at Helena, it was necessary to procure an appropriation of \$350 to supply a deficiency in the appropriation for wages of workmen at that institution, making the total amount appropriated for the fiscal

vear \$979.250.

The expenditures from the specific appropriations for the support of the mints and assay offices of the United States for the fiscal year, 1896, aggregated \$979,115.87, leaving an unexpended balance of the several appropriations for salaries, wages, and contingent expenses of \$134.13. The coinage of silver dollars from bullion purchased under the act of July 14, 1890, was resumed February 1, 1896, and continued during the balance of the fiscal year at the rate of \$1,500,000 per month, and in addition to the amount expended from the specific appropriations, there were expended from the general appropriations contained in the act of July 14, 1890, the sum of \$48,534.47. Of this sum \$28,959.22 was expended at the mint at Philadelphia on account of the coinage of silver dollars from bullion purchased under the act of July 14, 1890, and \$5,058.75 on account of storage of silver bullion acquired by the same act, and the balance, \$14,516.50, on account of coinage of silver dollars at the San Francisco mint.

The following table exhibits the appropriations and expenditures of the several mints and assay offices for the fiscal year 1896:

ESTIMATES OF APPROPRIATIONS FOR THE FISCAL YEAR 1898.

The estimates of the appropriations that will be required for the support of the mint service, including the office of the Director of the Mint, for the fiscal year 1898, as submitted, aggregate \$1,021,760, or \$1,500 less than for the fiscal year ending June 30, 1897.

EARNINGS AND EXPENDITURES OF THE REFINERIES OF THE COINAGE MINTS AND OF THE ASSAY OFFICE AT NEW YORK.

The charges received for parting and refining bullion during the fiscal year 1896 aggregated \$164,437.76, exclusive of the amount received from the sale of by-products, \$10,522.71, which sum is deposited in the Treasury as a miscellaneous receipt.

The amount expended during the year on account of expenses incident to parting and refining bullion aggregated \$140,197.79, showing

the excess of charges collected over expenditures of \$24,377.97.

The amount of charges collected for and the amount disbursed on account of the expenses incident to parting and refining bullion at the coinage mints and assay office at New York during the fiscal year 1896 are shown by the following table:

CHARGES COLLECTED AND EXPENDITURES FOR PARTING AND REFINING BULLION, 1896.

Institutions.	Charges collected.	Gross expenditures.	Surplus of charges collected.	Excess of expenditures over charges collected.
Mint at Philadelphia	\$29, 268, 56	\$28, 496. 64	\$771.92

Total	164, 437. 76	140, 197. 79	24, 377. 97	138. 00
Net surplus of charges collected.			24, 239, 97	

EARNINGS AND EXPENDITURES OF THE MINTS AND ASSAY OFFICES.

The total amount of gross earnings of the mints and assay offices during the fiscal year 1896 was \$3,384,069.16; of this, \$164,437.76 was for parting and refining bullion, \$6,601.44 for copper alley, and \$10,606.10 for charges by the minor assay offices for melting, assaying, and stamping bullion.

The seigniorage during the year on the coinage of standard silver dollars was \$2,327,736.96; on subsidiary silver coinage, \$175,319.52; on minor coinage, \$613,233.83, and on the recoinage of minor coins,

\$16,297.39; a total seigniorage of \$3,132,587.70.

The expenditures of the mint service during the year, including wastages by the operative officers, loss on sale of sweeps, and expense of distributing minor coins, amounted to \$1,163,566.78, which shows the net earnings for the year to have been \$2,220,502.38.

In the Appendix will be found a table showing in detail the earnings

and expenditures of the mint service during the year.

CLASSIFIED STATEMENT OF EXPENDITURES.

The expenditures of the mints and assay offices and of the refineries for supplies, salaries, and wages of workmen during the fiscal year ended June 30, 1896, are shown in the table following.

IMPORTS AND EXPORTS OF THE PRECIOUS METALS.

Gold.—The value of the foreign gold bullion imported into the United States during the fiscal year 1896 was \$13,663,406. Of this amount, \$9,303,577 came from England, \$2,826,327 from Mexico, \$332,644 from Colombia, \$308,344 from British Columbia, \$200,098 from France, \$348,239 from Nova Scotia, Ontario, Quebec, etc., \$303,898 from Central American States, and the remainder from various countries.

The value of foreign gold coins imported was \$7,816,248; of which amount \$5,184,732 came from Cuba, \$1,768,543 from France, \$354,037 from England, \$179,667 from the Dominion of Canada, \$119,000 from Germany, \$72,482 from Mexico, and the remainder from South and

Central America.

The value of the foreign gold ores imported for reduction was \$125,-

812, principally from Mexico and British Columbia.

The value of the gold contained in foreign base bullion and foreign silver ore imported was \$1,712,773. Of this amount, \$1,046,167 came from Mexico and \$666,606 from British Columbia.

The value of the domestic gold coins returned to the United States was \$10,189,614. Of this amount, \$4,590,061 came from the Dominion of Canada, \$1,964,850 from France, \$1,844,375 from England, \$897,138 from the West Indies, \$586,887 from South American States, \$246.951 from Mexico, and the remainder from Central America.

The value of the total gold imports into the United States during the fiscal year was as follows:

GOLD IMPORTS, FISCAL YEAR 1896.

Items.	Value.
Foreign bullion	\$13, 663, 406 7, 816, 248 125, 812
Gold in foreign base bullion \$270,561 Gold in foreign silver ores 1,442,212	1, 712, 773
Total foreign United States coin	23, 318, 239 .10, 189, 614
Total imports	33, 507, 853

Domestic gold bullion bearing the stamp of a United States mint or assay office, of the value of \$25,844,358, was exported during the fiscal year, of which \$22,280,501 went to England, \$3,548,437 to Germany, and the remainder to the Dominion of Canada. Other domestic gold bullion of the value of \$3,199,279 was also exported, of which \$2,708,898 went to France, \$395,209 to England, and \$82,277 to the Dominion of Canada.

Domestic gold coin of the value of \$77,789,892 was exported; of this amount \$38,520,000 went to England, \$25,466,575 to Germany, \$5,320,740 to the Dominion of Canada, \$4,562,529 to South America, \$2,000,500 to France, \$1,049,124 to the West Indies, \$710,190 to Hawaiian Islands, \$115,944 to Hongkong and Japan, and the remainder to Central America. There was also exported, from the ports of New York and Baltimore, gold contained in copper matte, of the invoiced value of \$100,805, all of which went to England.

The value of the foreign gold bullion reexported to England was

\$546.

Foreign gold coin of the value of \$5,475,965 was reexported, of which \$2,824,963 went to France, \$2,309,266 to Cuba, \$185,136 to Venezuela, \$65,179 to Mexico, and the remainder to England and Canada.

The value of the gold contained in foreign base bullion reexported to

England was \$2,514.

The total gold exports from the United States during the fiscal year were as follows:

GOLD EXPORTS, FISCAL YEAR 1896.

Items.	Value.
Domestic bullion (United States mint or assay office bars)	\$25, 844, 358
Other domestic bullion	3, 199, 279
Domestic coin.	77, 789, 892
Gold in copper matte.	100, 805
Domestic ore.	6
Total domestic	106, 934, 340
Foreign bullion reexported	
Foreign coin reexported	
Gold in foreign base bullion reexported	
Total foreign	5, 478, 125
Total gold exports	112, 412, 465

The value of the net gold exports for the fiscal year 1896 was \$78,904,612, as against \$30,117,376 for the fiscal year 1895. The net exports of United States gold coin from January 1, 1870, to November 1, 1896, were \$576,494,360, as shown by the table following.

IMPORTS AND	EXPORTS	OF	UNITED	STATES	GOLD	COIN.

a Port of New York only.

SILVER.—There were imported during the year 6,177,754 ounces of foreign silver bullion, of the commercial value of \$3,812,109, of which \$3,455,044 came from Mexico, \$316,610 from Honduras, and the remainder from various other countries.

During the same period the imports of foreign silver coin amounted to \$8,545,746, of which \$7,051,333 came from Mexico, \$519,787 from Colombia, \$316,167 from British Honduras, \$190,669 from Nicaragua, \$152,577 from Santo Domingo, and the remainder from South and Central America.

Foreign silver ores of the value of \$348,391 were imported from Mexico and South America.

United States silver coins of the value of \$93,057 were imported, in small amounts, from various countries.

The invoiced value of silver contained in foreign base bullion and silver lead ores imported was \$14,514,712; of this amount \$12,898,029 came from Mexico and the remainder from British Columbia.

There were contained in the base bullion and silver ore 78,457,672 pounds of lead, of the value of \$977,186, and 5,425,571 pounds of copper, of the value of \$358,874.

The table following, compiled from returns made monthly to the Bureau of the Mint by the collectors and surveyors of customs of the various ports of entry, shows the quantity and value of metals contained in ores and base bullion imported during the fiscal year ended June 30, 1896.

The value of the total silver imports into the United States during the fiscal year was as follows:

SILVER IMPORTS, FISCAL YEAR 1896.

Items.	Value.
Foreign bullion (commercial value)	\$3, 812, 109
Foreign coin	8, 545, 740
Foreign ores (commercial value)	348, 391
Silver in foreign base bullion (commercial value) \$8,279,062 Silver in foreign silver-lead ores (commercial value) 6,235,650	
·	14, 514, 712
Total foreign	27, 220, 958
United States coin.	93, 057
Total silver imports	27, 314, 01

The exports of domestic silver bullion bearing the stamp of a United States mint or assay office were 1,373 ounces, of the value of \$972, all of which went to Quebec. Other silver bullion containing 77,103,480 ounces, of the invoiced value of \$52,123,992, was exported, of which 61,401,585 ounces, of the value of \$41,578,367, went to England; 4,959,307 ounces, of the value of \$3,377,126, went to France; 9,504,424 ounces, of the value of \$6,333,543, to China, Hongkong, and Hawaiian Islands; 1,028,074 ounces, of the value of \$694,893, to Guatemala; 149,800 ounces, of the value of \$100,600, to British East Indies, and the remainder to the Dominion of Canada.

Silver coins of the United States, of the value of \$288,853, were exported; of this amount \$241,441 went to the Dominion of Canada, \$22,000 to Haiti, \$17,500 to Hawaiian Islands, and the remainder to Mexico.

Silver, of the value of \$677,984, contained in copper matte, was

exported to England.

Following are statements from the collectors of customs at the ports of New York and Baltimore relative to the value of gold and silver exported in copper matte:

OFFICE OF THE COLLECTOR OF CUSTOMS, Port of New York, October 9, 1896.

Sir: In reply to your letter of the 6th instant, I would state that the records of this office, as furnished by the shippers of pig copper, copper matte, etc., from time to time, show the amount of gold and silver contained in the several forms of copper exported from this port during the fiscal year ended June 30, 1896, to be as follows:

	Ounces.	Value.
Gold	4, 955	
Silver	992, 241	654, 382

Very respectfully,

JAMES T. KILBRETH, Collector.

DIRECTOR OF THE MINT, Washington, D. C.

OFFICE OF THE COLLECTOR OF CUSTOMS, Port of Baltimore, Md., October 9, 1896.

Sir: In compliance with your request of the 6th instant, I have the honor to inclose herewith a statement of the amount of gold and silver contained in copper matte exported from this port during the fiscal year ended June 30, 1896. The

records of this office do not indicate that there was any pig copper or other ores containing gold and silver exported during the above-mentioned period.

Respectfully, yours,

JAMES A. DIFFENBAUGH, Special Deputy Collector.

DIRECTOR OF THE MINT, Washington, D. C.

Abstract of Silver-Copper Matte Exported from the Port of Baltimore, Md., during the Fiscal Year ended June 30, 1896.

[Calculated on a basis of 60:5 per cent pure copper, 35 ounces pure silver, and 0.14 ounces pure gold.]

	Matt	e.	Pure copper.	Pure silver.	Pure gold.
	Pounds.	Tons.	Pounds.	Ounces.	Ounces.

February, 1896	448, 000	200	271, 040	7,000	28
Total	2, 259, 264	1, 008.6	1,:366,:855	35, 301	141.7204

There were reexported to England 17,288 ounces of foreign silver bullion, valued at \$11,523.

Foreign silver coin of the value of \$7,439,279 was reexported, of which \$3,739,145 went to Hongkong, \$1,152,946 to China, \$1,114,523 to England, \$452,243 to the West Indies, \$372,749 to Japan, \$215,391 to Mexico, \$198,446 to South America, and the remainder to the Dominion of Canada and Central America.

Silver contained in foreign base bullion and ores of the value of

\$33,670 was reexported to England.

The total value of silver exports from the United States during the fiscal year was as follows:

SILVER EXPORTS, FISCAL YEAR 1896.

Items.	Value.
Domestic bullion, United States mint or assay office bars (commercial value)	\$972
Other domestic bullion (commercial value).	52, 123, 992
Domestic coin.	288, 853
Silver in copper matte	677, 984
Total domestic	:53, 091, 801
Foreign bullion reexported	-
Foreign coin reexported	
Silver in foreign ore reexported	
Silver in foreign base bullion reexported 32,940	
Totalforeign	7, 484, 472
'Total silver exports	60, 576, 273

The value of the net silver exports for the fiscal year 1896 was \$33,262,258, as against \$27,631,789 for the fiscal year 1895.

Tables will be found in the Appendix showing the imports and exports of gold and silver builion and coin, by countries.

MOVEMENT OF GOLD FROM THE UNITED STATES.

The table following, showing the imports and exports of gold at the port of New York during the fiscal year 1896, has been prepared by the superintendent of the United States assay office in that city.

STATEMENT OF UNITED STATES GOLD COIN AND BULLION EXPORTED FROM THE PORT OF NEW YORK DURING THE FISCAL YEAR ENDED JUNE 30, 1896.

Estimated stock of coin July 1, 1896.	567, 495, 038	506, 761, 548	1, 074, 256, 586

Note.—Of the silver coins, \$430,790,041 were in dollars and \$75,971,507 were in subsidiary coins.

The amounts of gold and silver coin melted for receinage represent their nominal value. In the Appendix a table is given showing from what source these amounts were obtained.

The value of the gold and silver bullion owned by the Government in the mints and assay offices on July 1, 1896, was as follows:

BULLION IN MINTS AND ASSAY OFFICES JULY 1, 1896.

Metals.	Value.
Gold	\$32, 102, 926
Silver (cost)	120, 933, 958
Total	153, 036, 884

The stock of silver bullion on deposit with the Mercantile Safe Deposit Company, in New York City, on July 1, 1896, was 1,496,471 fine ounces, of the commercial value of \$1,032,565.

The total metallic stock of the United States on July 1, 1896, was as follows:

. METALLIC STOCK OF THE UNITED STATES JULY 1, 1896.

Coin and bullion.	Value.
Gold Silver (including bullion in mints and Mercantile Safe Deposit,	\$599, 597, 964
Co.)	628, 728, 071
Tetal	1,:228,:326, 035

The total metallic stock on July 1, 1895, was as follows:

METALLIC STOCK OF THE UNITED STATES JULY 1, 1895.

Coin and bullion.	Value.
Gold	\$636, 229, 825
(Co.)	625,:854,:949
Total	1, 262, 084, 774

By comparing the amounts in the above tables it will be seen that the stock of gold in the United States decreased \$36,631,861, while that of silver increased \$2,873,122 during the fiscal year.

The ownership of the stock of gold and silver coin and bullion in the

United States on July 1, 1896, was as follows:

OWNERSHIP OF GOLD AND SILVER IN THE UNITED STATES JULY 1, 1896.

Ownership.	0.11		Total gold

a Includes \$31,384,000 gold clearing-house certificates.
b Includes \$4,688,181 of their own notes held by different national banks.

There were 52,116,904 standard silver dollars in actual circulation on July 1, 1896, while on July 1, 1895, there were 51,986,043, an increase of 130,861.

The total amount of money in circulation in the United States, exclusive of the amounts held by the Treasury and the silver bullion held by the Mercantile Safe Deposit Company, on July 1, 1896, was \$1,506,434,966, against \$1,601,968,473 on July 1,1895, showing a decrease of \$95,533,507.

The following table shows the approximate stock of coin in the United States on November 1, 1896:

STOCK OF GOLD AND SILVER COIN IN THE UNITED STATES NOVEMBER 1, 1896.

70-4-	0-13		Silver coin.		Total gold and
Date.	Gold coin.	Dollars.	Subsidiary.	Total.	silver coin.
Stock July 1, 1896		\$430, 790, 041 8, 762, 100	, ,	\$506, 761, 548 8, 595, 175	\$1, 074, 256, 586 65, 147, 621
Total	624, 047, 484	439, 552, 141		515, 356, 723	

At the same date the value of the gold and silver bullion in the mints and assay offices was as follows:

GOLD AND SILVER BULLION IN MINTS AND ASSAY OFFICES NOVEMBER 1, 1896.

Metal.	Cost value.
Gold	\$48, 178, 391
Silver	115, 383, 231
Total	163, 561, 622

The amount of silver bullion in the vaults of the Mercantile Safe Deposit Company, of New York City, on November 1, 1896, was 1,051,265 fine ounces, of the commercial value of \$693,835.

This amount, added to the gold and silver bullion in the mints and assay offices and the stock of coin in the United States, gives the approximate metallic stock as follows:

METALLIC STOCK NOVEMBER 1, 1896.

Coin and bullion.	Amount.
Gold	\$672, 225, 875 631, 433, 789
Total	1, 303, 659, 664

The location of the total metallic stock and paper money in the United States on November 1, 1896, was as follows:

LOCATION OF THE MONEYS OF THE UNITED STATES NOVEMBER 1, 1896.

Moneys.	In Treasury.	Outside of Treasury.	Total.
METALLIC.			
Gold bullion	\$48, 178, 391		\$48, 178, 391

By way of comparison, a similar table is given, dated November 1, 1895:

LOCATION OF THE MONEYS OF THE UNITED STATES NOVEMBER 1, 1895.

Moneys.	In Treasury.	Outside of Treasury.	Total.
METALLIC.			
Gold bullion	\$53, 945, 262		\$53, 945, 262
Silver bullion	124, 921, 500	\$157, 108	125, 078, 608
Gold coin	88, 951, 327	475, 181, 593	564, 132, 920
Silver dollars	364, 935, 217	58, 354, 092	423, 289, 309
Subsidiary silver coin	13, 426, 421	63, 832, 759	77, 259, 180
Total	646, 179, 727	597, 525, 552	1, 243, 705, 279
PAPER.			
Legal-tender notes (old issue)	107, 694, 736	238, 986, 280	346, 681, 016
Legal-tender notes (act of July 14, 1890)	26, 565, 611	114, 526, 669	141, 092, 280
Gold certificates	168, 230	50, 417, 659	50, 585, 889
Silver certificates	8, 953, 268	333, 456, 235	342, 409, 504
National-bank notes	6, 523, 602	207, 364, 028	213, 887, 630
Currency certificates	275, 000	56, 740, 000	57, 015, 000
Total	150, 180, 447	1, 001, 490, 872	1, 151, 671, 319

From the above tables it will be seen that there was an increase on November 1, 1896, as compared with November 1, 1895, of \$21,082,585 in the amount of coin and bullion in the Treasury, and of \$4,473,839 in the amount of paper money, a total net increase of \$25,556,424.

There was also an increase of \$38,335,073 in the amount of coin in circulation and an increase of \$536,727 in bullion held by the Mercantile Safe Deposit Company of New York at the same date, while the amount of paper money in circulation decreased \$10,138,775, showing a total net increase in the actual amount of money in circulation of \$28,733,025.

MONETARY SYSTEMS AND APPROXIMATE STOCKS OF MONEY IN THE PRINCIPAL COUNTRIES OF THE WORLD.

The following table, showing the monetary systems and the approximate stock of gold, silver, and uncovered paper money in the principal countries of the world, has been compiled from the latest information obtainable, and, while necessarily but an estimate, is believed to exhibit approximately the stock of money in the world.

MONETARY SYSTEMS AND APPROXIMATE STOCKS OF MONEY IN THE AGGRE

f Actually the silver standard. g Includes Aden and Perim, Ceylon, Hongkong, Labuan, and Straits Settlements. h F. C. Harrison. i Indian currency committee report.

The estimate of the stock of silver in the Straits Settlements is that of Ottomar Haupt for 1893. He says:

"The currency of the Straits consists mainly of Mexican dollars, ninetenths of the total amount of which in the colony came there by the way of Europe. They are unloaded at Penang and Singapore, but do not remain there nor in the colony in general. The latter, with a population of 540,000, would never be able to absorb the enormous sums which we shall show by exact figures to have been exported thither. And yet it is not possible to tell how or by what way they have been reexported.

We know that the Malay Peninsula, as well as Borneo, Sumatra, Siam, and the English and French possessions in India receive annually a certain amount of these coins from the Straits; that, moreover, the Chinese coolies carry away some when they return to China; that occasionally there are direct shipments from Singapore to Penang and thence to China and Japan. But these circumstances are not sufficient to establish the proportion between the stocks in the colony and the incessant and comparatively enormous arrivals of piasters from Europe. The exports from 1869 to 1880 from Bombay and Calcutta to the Straits were £635,000, while the imports during the same period were £2,292,000 for these eleven years; therefore there was a balance exported from the Straits to India of £1,600,000. Beginning with 1880 the statistics are, unfortunately, lacking.

If, now, we turn to the exports from England to the Straits, we find, according to Pixley & Abell's Circular, that they were as follows:

Years.	Amount.		
1865-1868.	£519, 097		
1869–1874	5, 493, 524		
1875–1878	4, 014, 712		
1879–1880	2, 332, 027		
1881–1882	2, 246, 375		
1883-1884	3, 971, 176		
1885	638, 682		
1885	594, 280		
Total	19, 839, 873		

There is only one conclusion to be drawn from these figures, which are altogether disproportionate to the extent of territory of the Straits and to the number of the population; it is that a great part of the imported coins are hidden somewhere, either in the Straits Settlements themselves, or in the neighboring countries, which receive such coins more or less regularly from Penang or Singapore.

The divisional coin and piasters shipped to the Straits from England from 1878 to 1886, were as follows:

Year.	Divisional coins.	Piasters.
1878	90,000	5, 592, 000
1879		6, 732, 000
1880	45,000	7, 260, 000
1881	75,000	4, 410, 000
1882		9, 066, 000
1883		13, 794, 000
1884		10, 032, 000
1885	70,000	3, 834, 000
1886	175, 000	3, 564, 000

Everything considered, we may estimate the stock of silver in piasters, dollars, and yens held in one shape or another in the Straits Settlements in 1886 at £20,100,000, perhaps £25,000,000. The circulation of divisional coins, according to our estimate, does not exceed 800,000 piasters.

Such was the situation in 1886. From that year to 1891 the English Government shipped to the Straits 227,000 plasters in divisional coin,

and the total shipped from 1871 to 1891 was 2,684,850 piasters.

On the other hand, the shipments of piasters from England to the Straits were as follows:

	Year.	
1887		8, 240, 000
1889		
1890	•••••	6, 120, 000
1891		14, 800, 000
1892		19, 600, 000

This large increase of divisional coin and of piasters, together amounting to 61,000,000 piasters, brings our estimate of the stock of silver at the beginning of 1893 to 240,000,000 piasters and 2,000,000 piasters in divisional coin."

WORLD'S STOCK OF MONEY IN THE PRINCIPAL COUNTRIES, 1873.

Numerous inquiries have been made within the last few years for information as to the stock of money in the principal countries of the world at different periods, but especially as to 1873.

The table following, showing the stock of money in 1873 in the countries named therein, has been compiled from the most reliable data obtainable.

APPROXIMATE STOCKS OF MONEY IN THE AGGREGATE AND PER CAPITA IN THE PRINCIPAL COUNTRIES OF THE WORLD, 1873.

	Popula-	Stock of	Stock of	Uncovered		Per	capita.

GOLD AND SILVER USED IN THE INDUSTRIAL ARTS.

The amount of gold and silver used in the industrial arts, in the United States during the calendar year 1895, has been ascertained, as in former years, by making inquiries of the Government institutions and the private refineries.

In answer to these inquiries, statements were received showing the amount and value of gold and silver bars sold to manufacturers and jewelers for industrial use, and, as nearly as possible, the class of material used in the manufacture of such bars.

The weight and value of gold and silver bars furnished manufacturers and jewelers by the United States assay office at New York during the calendar year 1895 were as follows:

BARS MANUFACTURED FOR USE IN THE INDUSTRIAL ARTS BY THE UNITED STATES ASSAY OFFICE AT NEW YORK DURING THE CALENDAR YEAR ENDED DECEMBER 31, 1895.

Material used.	Go	old.	Silver.	
	Fine ounces.	Value.	Fine ounces.	Coining value.
United States coin Domestic bullion Foreign material Old plate, jowelry, etc		\$6, 768, 738. 42	1, 384. 92 5, 301, 347. 20 652, 692. 50 597, 028. 77	\$1,790.60 6,854,267.09 843,885.24 771,916.00
Total	438, 969, 676	9, 074, 308. 54	6, 552, 453. 39	8, 471, 858, 93

The weight and value of gold and silver in bars furnished manufacturers and jewelers by the United States mint at Philadelphia during the calendar year 1895 were as follows:

VALUE AND COMPOSITION OF BARS MANUFACTURED FOR USE IN THE INDUSTRIAL ARTS BY THE UNITED STATES MINT AT PHILADELPHIA DURING THE CALENDAR YEAR 1895.

	Go	old.	Silver.	
Material used.	Fine ounces.	Value.	Fine ounces.	Coining value.
Domestic bullion	1 1	\$834, 114. 95 39, 200. 82	140. 30	\$181.40

The value of United States bars—bars bearing the stamp of a United States mint or assay office—was, gold, \$633,292; silver, \$1,715,098.

These bars are manufactured by Government institutions and are included in their tables, and, in order to avoid duplication, must be eliminated from the amounts reported by private refineries.

eliminated from the amounts reported by private refineries.

The weight and value of gold and silver bars, exclusive of United States bars, furnished by private refineries for industrial purposes

during the calendar year 1895 were as follows:

Bars for Industrial Use (Exclusive of Government Bars) Furnished Goldsmiths and Others by Private Refineries during the Calendar Year 1895.

	Gold bars manufactured.		Silver bars manufactured.	
Material used.	Fine ounces.	Value.	Fine ounces.	Coining value.
Domestic bullion	42, 519	\$878, 936	2, 297, 836	\$2, 970; 939
United States coin	8, 361	172, 845		
material	51, 106	1, 056, 464	431, 540	557, 951
Foreign bullion and coin	500	10, 336	100, 250	129, 616
Total	102, 486	2, 118, 581	2, 829, 626	2, 658, 506

The value of the gold and silver bars for industrial purposes furnished by Government institutions and private refineries during the calendar year 1895 was as follows:

GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ARTS DURING THE CALENDAR YEAR 1895, AND CLASSIFICATION OF THE MATERIAL USED.

Material used.	Gold.	Silver (coin- ing value).	Total.
Domestic bullion	\$8, 481, 789	\$9, 825, 387	\$18, 307, 176
United States coin	212, 046	1,791	213, 837
Old material	2, 976, 269	1, 378, 136	4, 354, 405
Foreign bullion and coin	471, 027	973, 501	1, 444, 528
Total	12, 141, 131	12, 178, 815	24, 319, 940

The value of the gold and silver bars for industrial purposes furnished by Government institutions and private refineries during the calendar year 1894 was as follows:

GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ARTS DURING THE CALENDAR YEAR 1894, AND CLASSIFICATION OF THE MATERIAL USED.

Material used.	Gold.	Silver (coining value).	Total.
Domestic bullion	\$6, 430, 073	\$8, 579, 472	\$15,009,545
United States coin	396, 167	, . . ,	396, 167
Foreign bullion and coin	543, 585	982, 399	1, 525, 984
Old material	2, 184, 946	1, 221, 177	3, 406, 123
Total	9, 554, 771	10, 783, 048	20, 337, 819

A comparison of the values of the precious metals used in the industrial arts in the United States during the calendar years 1894 and 1895 shows an increase during the latter year of \$2,586,360 in gold and \$1,395,767 in silver.

Government institutions and private refineries report that during the calendar year 1895 there were \$212,046 in United States gold coin and \$1,791 in United States silver coin consumed in the manufacture of bars

for industrial purposes.

There are no returns showing the actual amount of United States gold and silver coins melted down by goldsmiths and jewelers, as the amount thus consumed would not appear in the reports of institutions

manufacturing bars.

Assuming the total amount of United States gold coin used in the arts to be \$1,500,000 and silver coin \$100,000, the industrial consumption of the precious metals in the United States during the calendar year 1895 would be as follows:

Industrial Consumption of the Precious Metals during the Calendar Year 1895.

Material used.	Gold.	Silver (coin- ing value).	Total.
Domestic bullion. United States coin Old material	\$8, 481, 789 1, 500, 600 2, 976, 269 471, 627	\$9, 825, 387 100, 000 1, 378, 136. 973, 501	\$18, 307, 176 1, 600, 000 4, 354, 405 1, 444, 528
Total	13, 429, 085	12, 277, 024	25, 706, 109

Total	834, 114. 95	25, 126, 623. 45	25, 960, 738. 40

All the gold bars (\$834,114.95) exchanged for gold coin at Philadelphia and \$6,768,738.42 of the amount of gold bars exchanged for gold coin at New York, under the provisions of the act of May 26, 1882, were employed in the industrial arts. The remainder of the total bars exchanged, viz, \$18,357,885.03, were exported.

The following table shows the amounts and classification of the material used in the industrial arts in the United States each year since 1880:

GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ARTS, AND CLASSIFICATION OF THE MATERIAL USED, DURING THE CALENDAR YEARS 1880-1895.

Calendar year.	United States coin.	New material.	Old material.	Foreign bullion and coin.	Total.
1880	\$3, 300, 000	\$6,000,000	\$395,000	\$1, 267, 600	\$10,962,600

PRODUCT OF GOLD AND SILVER IN THE UNITED STATES.

The statistics of the production of gold and silver in the United States for the calendar year 1895 were given in a special report made to the Secretary of the Treasury upon the production of the precious metals for 1895.

The following table shows the product as distributed among producing States and Territories:

APPROXIMATE DISTRIBUTION, BY PRODUCING STATES AND TERRITORIES, OF THE PRODUCT OF GOLD AND SILVER IN THE UNITED STATES FOR THE CALENDAR YEAR 1895 AS ESTIMATED BY THE DIRECTOR OF THE MINT.

Tables showing the product of gold and silver from mines of the United States since 1792 will be found in the Appendix.

COINAGE OF THE UNITED STATES.

The following table exhibits the number of fine ounces and value of gold and silver coinage of the United States, by calendar years, from 1873 to 1895:

Coinage of Gold and Silver of the Mints of the United States, 1873-1895.

	Go	1d.	Sil	ver.
Calendar year.	Fine ounces.	Value.	Fine ounces.	Coining value.
1873	2, 758, 475	\$57, 022, 748	3, 112, 891	\$4, 024, 748
1874	1, 705, 441	35, 254, 630	5, 290, 421	6, 851, 777
1875	1, 594, 050	32, 951, 940	11, 870, 635	15, 347, 893
1876	2, 253, 281	46, 579, 453	18, 951, 777	24, 503, 308

1895	2, 883, 941	59, 616, 358	4, 407, 055	5, 698, 010
Total	48, 233, 594	997, 076, 991	420, 860, 190	544, 142, 477

In the Appendix a table will be found showing the value of the coinage executed by each mint from 1792 to June 30, 1896.

WORLD'S PRODUCTION, 1893, 1894, AND 1895.

The production of gold and silver in the world for the calendar years 1893, 1894, and 1895 was as follows:

PRODUCT OF GOLD AND SILVER IN THE WORLD.

Calendar year.	Gold.	Silver.
1893	\$157, 494, 800	\$213, 944, 400
1894	181, 567, 800	212, 829, 600
1895	200, 406, 000	217, 610, 800

Tables compiled from information furnished by foreign governments through our diplomatic representatives and revised from the latest data, exhibiting the weight and value of the gold and silver product of the principal countries of the world for the calendar years 1893, 1894, and 1895, will be found in the Appendix.

For the sake of uniformity, the value of silver has, as heretofore, been calculated at its coining rate, viz, \$1.2929+ per fine ounce.

The following table shows the production of the precious metals in the world for the calendar years 1860-1895:

PRODUCT OF GOLD AND SILVER IN THE WORLD, 1860-1895.

[The annual production of 1860 to 1872 is obtained from 5-year period estimates, compiled by Dr. Adolph Soetbeer. Since 1872 the estimates are those of the Bureau of the Mint.]

	G	old.	Silver.		
Calendar year.	Fine ounces.	Value.	Fine ounces.	Commercial value.	Coining value.

The silver product is given at its commercial value, reckoned at the average market price of silver each year, as well as its coining value in United States dollars.

A table showing the product of gold and silver in the world for the calendar years 1493-1895 will be found in the Appendix.

WORLD'S COINAGE, 1893, 1894, AND 1895.

In the Appendix will be found a table, revised from the latest information received, exhibiting the coinages of the various countries of the world during the calendar years 1893, 1894, and 1895. The following is a summary of the same:

COINAGE OF NATIONS.

Calendar year.	Gold.	Silver.
1893.	\$232, 420, 517	\$137, 952, 690
1894.	227, 921, 032	113, 095, 788
1895.	231, 087, 438	121, 610, 219

The above figures represent, as nearly as this Bureau has been able to ascertain, the total value of the gold and silver coinages executed in

the world during the years therein named.

It must be borne in mind, however, that the total of these coinages does not correctly represent the amount of new gold and new silver made into coins during the year, for the reason that the coinages as reported include the value of domestic and foreign coins melted for recoinage, as well as old material, plate, etc., used in coinage.

In the circular letter of inquiry prepared at this Bureau and sent to foreign governments through the Department of State, asking for information on these subjects, it was especially requested that each country report the amount of such recoinages. This has been done in many

instances, but not in all.

The following table exhibits the number of fine ounces and value of gold and silver coinage of the world, by calendar years, from 1873 to 1895:

Coinage of Gold and Silver of the Mints of the World for the Calendar YEARS 1873-1895.

VALUE OF FOREIGN COINS.

The law requires:

That the value of the foreign coins as expressed in the money of account of the United States shall be that of the pure metal of such coin of standard value; and the values of the standard coins in circulation of the various nations of the world shall be estimated quarterly by the Director of the Mint and be proclaimed by the Secretary of the Treasury immediately after the passage of this act and thereafter quarterly on the 1st day of January, April, July, and October in each year.

In accordance with the above requirement, the values of foreign coins have been estimated and proclaimed as follows:

VALUE OF FOREIGN COINS JANUARY 1, 1896.

Country.	Standard.	Monetary unit.	Value in terms of United States gold dellar.	Coins.
Argentina	Gold and silver.	Peso	\$0.96,5	Gold: argentine (\$4.82,4) and \frac{1}{2} argentine. Silver: peso and divisions.
Austria Hungary	Gold	Crown	.20,3	Gold: former system—4 florins (\$1.92,9), 8 florins (\$3.85,8), ducat (\$2.28,7) and 4 ducats (\$9.15,8). Silver: 1 and 2 florins. Gold:
				present system—20 crowns (\$4.05,2); 10 crowns (\$2.02,6).

ASSAY LABORATORY OF THE BUREAU OF THE MINT.

During the calendar year 1895 there were tested by the assayer of the Bureau 440 gold coins and 536 silver coins, all of which were found to be within the legal requirements as to weight and fineness, the greatest deviation above the standard being 2.2, while the greatest deviation below was 1.4.

During the past year the proof gold prepared under the direction of the Bureau has been supplied to the assay offices with great satisfaction, the results obtained on shipments of bullion having been more uniform than when each institution prepared its own proof gold.

In the past year several counterfeit silver coins were examined for the Secret Service. These pieces were of much interest, as they are struck from an alloy closely approaching our standard, varying from 867.5 to 940 in fineness. The alloy in every case was copper.

The following table shows the number of pieces assayed at the Bureau each month and their average fineness; also the total number assayed from each mint, with the average fineness for the year:

PROCEEDINGS OF THE ASSAY COMMISSION OF 1896.

The following Commissioners were appointed by the President, under the provisions of section 3547 of the Revised Statutes, to test the weight and fineness of the gold and silver coins of the coinage of the calendar year 1895 reserved for that purpose by the coinage mints, viz: Hon. O. H. Platt, Finance Committee, United States Senate; Hon. Charles W. Stone, Committee on Coinage, Weights, and Measures, House of Representatives; Prof. Thomas M. Drown, Lehigh University, Pennsylvania; Henry Burnett, esq., Paducah, Ky.; Edward O. Leech, esq., New York; Prof. John W. Mallet, University of Virginia; Prof. Marcus Benjamin, New York; Eugene B. Braden, esq., Helena, Mont.; Andrew Stevenson, esq., Columbus, Ohio; Cabell Whitehead, esq., District of Columbia; John Cadwalader, esq., Philadelphia, Pa.; Charles H. Banes, esq., Philadelphia, Pa.; Douglas H. Thomas, esq., Baltimore, Md.; Prof. William P. Mason, Troy, N. Y.; Hon. W. W. Duffield, District of Columbia; Hon. George F. Baer, Reading, Pa.

The Commission met at Philadelphia on February 12, 1896, together with the following ex officio Commissioners: James H. Eckels, esq., Comptroller of the Currency, and Herbert G. Torrey, assayer of the United States assay office, New York.

The committee on counting reported:

The packages containing the pieces reserved by the several mints for the trial of coins, in accordance with section 3539, Revised Statutes, were delivered to us by the superintendent of the mint at Philadelphia.

The number of coins corresponded with the record kept by the Director of the

Mint of all transcripts sent him by the several superintendents.

The quantities of coin reserved at the several mints for the purposes of the Commission were as follows:

Mints.		Value.	
GOLD.			
Philadelphia	3,088	\$35, 475.00	
San Francisco	1,309	23, 985. 00	
New Orleans	100	1,000.00	
Total	4, 497	60, 460. 00	
SILVÈR.			
Philadelphia	3, 505	1, 061. 90	
San Francisco	2,198	754. 25	
New Orleans	2, 736	1, 040. 50	
Total	8, 439	2, 856. 65	
Total pieces and value	12, 936	63, 316. 65	

The committee on assaying reported:

In compliance with section 3547 of the Revised Statutes, we have taken samples of the coins reserved from time to time at the United States mints at Philadelphia, San Francisco, and New Orleans for assay.

These samples represent the various deliveries made by the coiners to the superin-

tendents of the several mints during the calendar year 1895.

The results of the assays made of the individual coins, and of the same in mass, are given in the following schedules.

. From these it will be seen that the greatest excess in the assay value of the gold coinage, as tested, above standard at the different mints (the limit of tolerance being one-thousandth) is, at—

 Pulladelphia
 900.1

 San Francisco
 900

 New Orleans
 900.1

The greatest deficiency below standard (the limit of tolerance being one-thousandth) is, at-

 Philadelphia
 899,8

 San Francisco
 899,6

 New Orleans
 899,7

The greatest excess in silver coins above standard (the limit of tolerance being three-thousandshs) is, at—

 Philadelphia
 901.1

 San Francisco
 902.5

 New Orleans
 901.6

The greatest deficiency below standard (the limit of tolerance being three-thousandths) is, at-

Philadelphia	899.1	1
San Francisco	899.	1
New Orleans	898, 5	2

The assay committee also tested the quartation of silver and the lead used in the assay of gold bullion and found them free from gold.

The acid used in the humid assay of silver was found to be free from silver, and also from chlorine.

The balances were also tested and found to be correct.

The committee therefore deem the assays exhibited in the accompanying schedules to be trustworthy.

The committee on counting reported:

The packages containing the pieces reserved by the several mints for the trial of coins, in accordance with section 3539, Revised Statutes, were delivered to us by the superintendent of the mint at Philadelphia.

The number of coins corresponded with the record kept by the Director of the Mint

of all transcripts sent him by the several superintendents.

The quantities of coin reserved at the several mints for the purposes of the commission were as follows

(1) Gold coins from the mint at Philadelphia, 3,088 in number, of the value of

\$35,475.
(2) Silver coins from the mint at Philadelphia, 3,505 in number, of the value of \$1,061.90.

(3) Gold coins from the mint at San Francisco, 1,309 in number, of the value of \$23.985.

(4) Silver coins from the mint at San Francisco, 2,198 in number, of the value of \$754.25.

(5) Gold coins from the mint at New Orleans, 100 in number, of the value of \$1,000. (6) Silver coins from the mint at New Orleans, 2,736 in number, of the value of \$1,040.50.

In all, 12,936 coins, of the aggregate value of \$63,316.65, as set forth in detail on a

subsequent page.

The verification of the number of coins being completed, the committee on weighing and assaying each selected such coins as were required.

In the report of those committees will be found an account of the disposition of these coins.

The committee on weighing reported—

That they have examined sample coins, selected at random from those reserved by the several mints, as follows:

MINT AT PHILADELPHIA.

119 gold coins, of which 95 were weighed in mass. 154 silver coins, of which 130 were weighed in mass.

MINT AT SAN FRANCISCO.

65 gold coins, of which 43 were weighed in mass. 118 silver coins, of which 100 were weighed in mass.

MINT AT NEW ORLEANS.

40 gold coins, of which 28 were weighed in mass. 86 silver coins, of which 68 were weighed in mass.

The weighing of the single pieces was made with a balance by Troemner, of Philadelphia, and the weights employed were provided by the Director of the Mint, who stated to the committee that the same were of the true standard of value as fixed by law, and that they had been carefully examined by the United States superintendent of weights and measures, and were correctly related to the troy pound of 1827.

The mass weighings were made upon the large Saxton balance of the mint. The committee examined the weights ordinarily employed in the mint, and found them to be in accordance with the usual interpretation of the standard prescribed by law.

The details of the weighings, as shown in the following tables, indicate but slight deviation from the statutory standard weight, and the coins were all within the legal tolerance.

The committee on weighing pronounces the examination of the weights of the coinage of the several mints during the year 1895 to be satisfactory.

The result of the annual test is contained in the following resolution adopted by the commission:

Resolved, That the assay commission, having examined and tested the reserved coins of the several mints of the United States for the year 1895, and it appearing that these coins do not differ from the standard fineness and weight by a greater quantity than is allowed by law, the trial is considered and hereby reported satisfactory and adopted unanimously.

Note.—The Director of the Mint exhibited to the assay commissioners a duplicate in brass of the original troy pound made in London in 1827 and procured for the use of the mint through the United States minister. England in 1758 appointed a commission to establish a unit of weight, and the copy now in the possession of the mint is the exact duplication of the original weight of 5,760 grains, established by that commission and reasserted by the commission of 1838. The weight is kept in a strong box, locked with two keys, one of which remains with the Director of the Mint at Washington and the other in the custody of the superintendent of the mint at Philadelphia.

The committee on weighing of the assay commission used this weight to compare

the accuracy of the working copies of the weight used in the mint.

MINT OF THE UNITED STATES AT PHILADELPHIA.

The number of deposits of gold and silver, including redeposits, at the mint at Philadelphia during the fiscal year ended June 30, 1896, aggregated 4,559.

The weight and value of gold and silver deposited during the year

were as follows:

Metal.	Standard ounces.	Value.
GoldSilver		\$30, 752, 557. 00 2, 339, 443. 75
Total value		33, 092, 000. 75

The weight and coining value of domestic gold and silver coin included in the deposits were as follows:

Metal.	Standard ounces.	Coining value.
Gold	59, 745, 645 1, 813, 136 , 26	\$1, 111, 546. 88 2, 109, 831. 28

The weight and value of bars manufactured were as follows:

Metal	Standard ounces.	Coining value.
Gold	155, 635, 619	\$2, 895, 546, 40
Total value	52, 388. 17	2, 956, 507. 18.

During the year there were transferred from the Treasury for recoinage 44,013.190 standard ounces of uncurrent domestic gold coin, of the value of \$818,850.04 in new full-weight coins, and 1,811,542.35 standard ounces of worn and uncurrent domestic silver coins, of the value of \$2,253,862.95 in new subsidiary coins.

The denominations and amounts of uncurrent gold and silver coins transferred to the mint at Philadelphia are shown in the following table:

Denominations.	Pieces.	Value.	
GOLD.			
Double eagles	12,748	\$254, 960.00	
Eagles	19, 548	195, 480.00	
Half eagles		365, 760. 00	
Three-dollar pieces	4	12, 00	
Quarter eagles	3, 744	9, 360. 00	
Dollars	11	11.00	
Total gold	109, 207	825, 583. 00	
SILVER.			
Dollars	1, 100	1, 100. 00	
Half dollars	1, 221, 024	610, 512. 00	
Quarter dollars	4, 723, 730	1, 180, 932. 50	
Twenty-cent pieces	1, 552	310.40	
Dimes	6, 029, 542	602, 954. 20	
Half dimes	74, 081	3, 704. 05	
Three-cent pieces	16, 149	484. 46	
Total silver	12, 067, 178	2, 399, 997. 61	

In addition to the amount of uncurrent silver coin transferred for recoinage, there were transferred from the assistant treasurer of the United States at New York \$4,500,000 in worn subsidiary silver coin and from the assistant treasurer at Chicago 1,000,000 silver dollars for storage.

During the year minor coins of the nominal value of \$353,606.80 were transferred for cleaning and reissue and \$268,234.20 for recoinage. The total number of pieces embraced in this coinage was 19,553,090. The value of all kinds of coin received from the Treasury for recoinage was as follows:

Character.	Value.
Gold (face value)	1 '
Silver	1 ' '
Total	3,493,814.81

The quantity and cost of minor coin blanks purchased were:

Character.	Pounds.	Price per pound.	Cost.
Bronze 1-cent pieces	· · · · · · · · · · · · · · · · · · ·	\$0. 1994 . 3194	\$61, 614. 60 9, 741. 70
Total	339, 500		71, 356. 30

The total amount of gold and silver bullion received, including the surplus bullion, was:

Metal	Standard ounces.	Value.
GoldSilver		\$30, 752, 711. 99 2, 373, 583. 06
Total value		33, 126, 295. 05

The quantity of gold and silver operated upon by the melter and refiner was as follows:

	Metal.	Standard ounces
Gold		3, 922, 717. 486
Silver		

The number of melts made and the number condemned during the year was as follows:

	For bars	For ingots.		
Metal.	made.	Made.	Con- demned.	
Gold	134	614	1	
Silver	332	3, 876	7	
Total	466	4, 490	8	

The value of gold and silver bars prepared for use in the industrial arts during the year is shown in the following table:

Metal.	Standard ounces.	Value.
Gold		- \$787, 002. 36 60, 960. 78
Total value		847, 963. 14

The operations of the refinery in the mint during the year were as follows:

REFINERY OPERATIONS, FISCAL YEAR 1896.

Bullion.	Gold.	Silver.
Gross weight, 1,507,369, 590 ounces.	Standard oz.	Standard oz.
Refined standard ounces by assay	496, 314, 342 496, 342, 116	1, 117, 567. 34 1, 117, 595. 08

The number of assays made by the assay department and the number of ounces of proof gold and silver made during the year ended June 30, 1896, were as follows:

Assays and ounces of proof metal.	
Gold assays	32,140
Silver assays	
Sweep assays	700
Special bullion assays	240
Bronze and nickel assays	
Ounces proof gold	60
Ounces proof silver	100

The number of dies prepared in the engraver's department for the mints is shown in the following statement:

Dies prepared.	Number
Philadelphia mint:	
Gold	87
Silver	165
Minor coins	389
Medals	34
San Francisco mint:	1

Silver	104
New Orleans mint:	ķ:
Silver	80

COINER'S DEPARTMENT.

During the fiscal year 1896 the coiner operated upon 3,894,715.250 ounces of standard gold and upon 12,062,913.60 ounces of standard silver, resulting in the manufacture of coins as shown by the following statement:

Denomination.	•	Pieces.	Value.
Double eagles		1, 512, 548	\$30, 250, 960. 00
Eagles			3, 647, 490. 00
Half eagles			1, 994, 640. 00
Quarter eagles		11, 960	29, 900, 00
Total gold		2, 288, 185	35, 922, 990. 00
Dollars		4, 500, 822	4, 500, 822. 00
Half dollars		1, 893, 160	946, 580. 00
Quarter dollars		5, 582, 822	1, 395, 705. 50
Dimes			90, 082. 20
Total silver		12, 877, 626	6, 933, 189. 70
Five cents		8, 153, 062	407, 653. 10
Cents		46, 168, 422	461, 68422
Total base		54, 321, 484	869, 337. 32

The gold wastage during the year was 28.975 ounces of standard gold, or 1.487 per cent of the legal allowance, and the percentage of finished coin produced from amount operated upon was 49.5.

The silver wastage during the same period was 2,124.64 ounces of standard silver, or 17.61 per cent of the legal allowance, and the percentage of finished coin produced from the amount operated upon was 48.9.

MEDALS MANUFACTURED DURING FISCAL YEAR ENDED JUNE 30, 1896.

Miner proof coins	1,717	63.84	85.12	21. 28
Total	6, 542	7, 433. 72	8; 600. 51	1, 166, 79

The shipments of domestic gold and silver and minor coins from the mint at Philadelphia during the fiscal year 1896 were as follows:

Items.	Value:
Gold	\$33; 257, 500
Silver dollars	14, 999
Subsidiary silver coins	1, 503, 983.
Minor coins	1, 042, 800
Total value	35, 819, 282

Among the improvements which have added to the efficiency of the establishment and comfort of the large number of employees a few may

be worthy of mention.

The vertical ore crusher recently purchased at a cost of \$400 has been shown to be an improvement on the former and somewhat primitive process of placing the ore under the rolls in the hopper of the sweep-grinding mill, as it reduces and separates with greater speed and efficiency such ores as the mint may receive.

Improvements have been made on the steam boilers by placing on them three water columns with modern gauge appliances, which indicate the condition of the water in the boilers, resulting in economy of fuel, a regular firing of the furnace, and insuring greater safety to the employees.

An improved water heater placed in the engine room has been of material advantage, as the old heater never fully performed the services required. New exhaust pipes have been supplied to the engines, the old ones having rusted to an extent that became dangerous. Large steam coil radiators have been set in the front corridor and retiring room. The steam radiators throughout the building have been supplied with drip and vent cocks, which improve the circulation and regulation of heat, so that an even distribution of it can be maintained. The improvements to the steam appliances as enumerated were made under the direction and authority of the supervising architect of the department.

After an accumulation of eight years, the wells of the melter and refiner's department have been cleaned by an excavating company employed to empty them. (These wells receive the water in which ingots are cooled and also the washings from the hands of the men employed in the melting room.) The contents were put in barrels and the residue dried, ground, and reduced to sweeps, yielding 35 barrels. The product from this operation was:

Metals.	Weight.	Value.
Standard gold	Ounces.	\$2, 778. 57
Standard silver	149, 348	105. 97
Total value	176, 57	2, 884. 51

Sum paid for cleaning the wells, \$120.

On recounting the silver dollars stored in the large vault, the bags are found to be mildewed and many broken, the result being that the coins in many instances are loose, scattered throughout the piles, and cast on the floor. At a moderate estimate, at least 4,000,000 of them will be found to be corroded so much as to make them totally unfit for circulation, making their recoinage necessary.

As each bag is counted it is weighed, and the value, weight, date, designation of vault, and the name of the counter written upon a linen tag attached thereto. It is then placed in a wooden box, the box being numbered to correspond with the number on the tag, each box thus holding \$1,000. The box is then nailed and sealed, and the contents registered in a book. This course will not only preserve the bags and simplify a future count, but enable inaccuracy of count, if there should be any, to be traced to its source.

TRANSFER AND RECOINAGE OF UNCURRENT MINOR COINS.

The amount of uncurrent copper, nickel, and bronze coins on hand July 1, 1893, and the amount of such coins transferred from the Treasury to the mint at Philadelphia during the fiscal year 1896 for conversion into current minor coins, their cost and seigniorage, also the quantity recoined, the loss in recoinage, and the balance on hand June 30, 1896, is shown in the following table:

MINOR COINS FOR RECOINAGE, FISCAL YEARS 1894, 1895, AND 1896, MINT OF THE UNITED STATES AT PHILADELPHIA.

Balance on hand July 1, 1893		\$720, 03
Uncurrent coin transferred from United States Treasury, viz:		• •
Old copper cents	\$1, 852, 39	
Nickel 1-cent coin	19, 564, 30	
Bronze 1-cent coin		•
Bronze 2-cent coin	14, 134, 76	
Nickel 3-cent coin	31, 753, 38	
Nickel 5-cent coin	442, 323, 00	
_	5	41, 029. 04

Cost of pure nickel added to nickel 1-cent metal to convert it into nickel 5-cent alloy for recoinage into nickel 5-cent coin. Cost of tin and zinc added to old copper cent metal to convert it into bronze 1-cent alloy for recoinage into bronze 1-cent coin. Cost of metal of same alloy added to nickel 3-cent metal for recoinage into nickel 5-cent coin. Seigniorage (gain by recoinage).	\$774.67 50.57 547.45	
	630, 475. 15	
Coinage executed, nominal value, viz: Bronze I-cent coin	470, 259. 01 26, 727. 74 133, 488. 40	
	630, 475, 15	

There are at present seven types of minor coins outstanding, viz, the copper half cent, copper cent, copper nickel cent, bronze 1 and 2 cent pieces, and nickel 3 and 5 cent pieces, all but two of which, viz, the 1 cent bronze and 5 cent nickel pieces are classed as uncurrent, for the reason that the others are no longer coined, but are redeemed at the Treasury in lawful money and transferred from time to time to the mint at Philadelphia for recoinage.

There were transferred from the Treasury to the mint at Philadelphia for recoinage from July 1, 1895, to June 30, 1896, worn and uncurrent minor coins of the various types, the aggregate face value of which

was \$268,234.20.

The Treasurer of the United States is reimbursed by the mint at the

full face value for all minor coins transferred for recoinage.

By utilizing the old copper cents in the manufacture of bronze 1-cent pieces and the nickel 1 and 3 cent pieces in the coinage of 5-cent pieces no loss occurs, but, on the contrary, a gain accrues. A loss, however, occurs on the recoinage of worn and uncurrent bronze 1 and 2 cent pieces, as well as on the recoinage of the nickel 5-cent piece, but it is not nearly as great as the gain on the recoinage of old copper-nickel and nickel 3-cent pieces.

The net profit on the recoinage of uncurrent minor coins for the fiscal year 1895 was \$57,083.22, and for the fiscal year 1896, \$3,542.43.

The amount of uncurrent copper and bronze and nickel coins on hand at the mint on July 1, 1895, and the amount of such coins transferred from the Treasury to the mint at Philadelphia during the fiscal year 1896, for conversion into minor coin, their face value, and the seigniorage on the quantity coined as well as the loss in recoinage and the balance on hand June 30, 1896, is shown in the following table:

Balance on hand July 1, 1895. Uncurrent coin transferred from United States Treasury: Old copper cents. Nickel 1-cent coin 3, 730, 78	,	ა, 80	<i>i</i> 5. 45	5

UNCURRENT SILVER COINS ON STORAGE AT THE MINT AT PHILADELPHIA, PA.

There are now on storage at the mint at Philadelphia \$4,500,000 in worn and uncurrent subsidiary silver coins that are unfit for circulation and should be recoined.

The transfer of this coin to the mint was due to the fact that it became necessary to relieve the vaults of the assistant treasurer of the United States at New York, and the only available vault room was found to be in the mint at Philadelphia.

It is greatly to be desired that an appropriation should be made by Congress to cover the loss on the recoinage of this coin. its recoinage is estimated to be about $6\frac{1}{2}$ per cent, or \$300,000.

MINT OF THE UNITED STATES AT SAN FRANCISCO, CAL.

The value and weight of gold and silver bullion deposited at the mint at San Francisco during the fiscal year 1896 were as follows:

Metal.	Standard ounces.	Value.
Gold	1, 182, 660, 569	\$22,002,987.33
Silver		728, 673. 37 22, 731, 660. 70

During the year there were deposited at this mint for recoinage 497.714 standard ounces of United States gold coin of the face value \$9,947.50, coining value \$9,259.79, and 144.70 standard ounces United States silver coin of the face value of \$194.98, coining value \$168.38 in standard dollars, or \$180.03 in subsidiary coin.

Foreign gold coin containing 5,681.907 standard ounces of the coining

value \$105,709.90 was deposited during the year.

During the year there was transferred from the Treasury for recoinage worn and uncurrent domestic subsidiary silver coin of the nominal value of \$727,243.85, containing 563,931.91 standard ounces of silver of

the coining value in new subsidiary coin of \$701,626.

The melter and refiner received and operated upon bullion during the fiscal year containing 2,163,270.890 standard ounces of gold and 2,132,944.07 standard ounces of silver, of which amount the operations of the refinery comprise 268,456.019 standard ounces of gold and 138,434.46 standard ounces of silver, the bullion melted for coinage during the same period being 2,159,838.330 standard ounces gold and 2,071,225.75 standard ounces of silver.

Upon the annual settlement the melter and refiner returned a surplus of 1,029.146 standard ounces of gold, valued at \$19,146.90, and 4,061.06

standard ounces of silver, valued at \$2,406.65.

He made 736 melts of gold ingots, of which 1 was condemned, and 1,256 melts of silver ingots, of which 17 were condemned.

OPERATIONS OF THE MECHANICAL DEPARTMENT.

The coiner received and operated upon 2,213,413.300 standard ounces of gold and 2,412,830.65 standard ounces of silver during the fiscal year.

During the fiscal year the coiner manufactured \$22,955,500 in gold

coin and \$1,377,451.50 in silver coin, a total of 3,291,478 pieces.

The proportion of finished coin produced during the year from ingots operated was gold, 56.3 per cent; silver, 52.6 per cent. Upon the annual settlement of the coiner's accounts it was found that there had been a wastage during the fiscal year of 190.426 standard ounces of gold, valued at \$3,542.81, and 531 standard ounces of silver, valued at \$314.68, being, respectively, 17.39 and 23.16 per cent of the legal allowance.

Coinage Executed at the Mint at San Francisco during the Fiscal Year 1896.

Denomination.	Pieces.	Value.

Dimes:	340, 516	34, 051. 60
Half dimes	4,655	232. 75
Three-cent pieces	. 1	. 03
Total silver	2, 039, 633	727, 438. 83
Total gold and silver	2, 040, 551	737, 386. 33

The following table exhibits the amount of foreign gold coin melted at the mint at San Francisco during the fiscal year 1896:

Country of coinage.	Value in United States money.	Country of coinage.	Value in United States money.	Country of coinage.	Value in United States money.
Argentina	\$14.46	France	\$155.92	New Grenada.	\$83.47
Bolivia	15. 40	Germany	353. 43	Peru	33. 80
Chile	80.45	Guatemala	. 60.85	Russia	27.86
Colombia	38. 80	Holland	40.00	Spain	1,720.05
Costa Rica	128. 14	Japan	21.93	Total	105, 626, 18
England	9, 764. 02	Mexico	93, 087. 60	Total	100, 020, 10

The annual settlement at the close of the fiscal year was superintended by Messrs. Jacob B. Eckfeldt, assayer of the United States mint at Philadelphia, assisted by Warren C. Noteware, chief clerk of the United States mint at Carson, Nev., who weighed and counted the bullion and coin on hand and reported that the balances as shown by the books were correct.

MINT OF THE UNITED STATES AT NEW ORLEANS.

The weight and value of the gold and silver deposited at the mint of the United States at New Orleans during the fiscal year ended June 30, 1896, were as follows:

Metal.	Standard ounces.	Value.
Gold Silver	1, 1	\$211, 148. 76 1, 335, 498. 37
Total value		1, 546, 647. 13

There were purchased over the counter during the year 795.125 standard ounces of uncurrent domestic gold coin of the face value of \$14,942.50, producing in new coin \$14,793.02.

There were also deposited 6,388.847 standard ounces of unrefined foreign gold bullion and 267.714 standard ounces of foreign gold coin,

making the value of foreign gold deposits \$123,843.

Gold bullion to the amount of 3,528,522 standard ounces and the value of \$65,646.92 was obtained from deposits of old gold plate and

jewelry.

During the fiscal year 1896 there were transferred and deposited by the Treasury of the United States for recoinage 1,142,747.20 standard ounces of worn and uncurrent domestic silver coin of the nominal value of \$1,499,900, representing a value of \$1,421,769.45 in new subsidiary silver coin. There were also purchased as bullion at the current market price for silver 785.50 standard ounces of silver contained in mutilated and uncurrent domestic silver coins of the face value of \$988.55, and of the value of \$977.29 in new subsidiary silver coin.

There were deposited 1,054.63 standard ounces of foreign silver bullion and coin, while there were obtained from old plate, jewelry, etc.,

2,993.27 standard ounces.

The domestic silver bullion deposited aggregated 113.31 standard ounces.

MELTER AND REFINER'S OPERATIONS.

The amount of gold and silver delivered by the superintendent during the fiscal year to the melter and refiner was as follows:

Metal.	Standard ounces.	Value.
Gold	20, 200.022	\$287, 609, 42 6, 169, 261, 23
Total		6, 456, 870. 65

On the settlement of his accounts at the close of the year, it appeared that in operating on 15,459.544 ounces of standard gold he returned an

excess of 18.676 ounces of standard gold, of the value of \$347.46. In operating on 5,301,708.88 ounces of standard silver bullion during the year the wastage was 1,617.95 standard ounces, equivalent to 20.3 per cent of the legal tolerance for wastage.

The number of gold and silver ingot melts made by the melter and refiner and the number condemned by the assayer are shown in the

following table:

INGOT MELTS MADE AND CONDEMNED.

		Melts for ingots.		
Metal.	Made.	Con- demned.		
Gold	4	1		
Silver	588	4		
Total	592	5		

REFINERY OPERATIONS.

The weight and value of gold and silver operated upon in the refinery were as follows:

Bullion.	Standard ounces.	Value.
Gold	1 ' 1	\$193, 024. 93 3, 172. 57
Total		196, 197. 50

COINER'S OPERATIONS.

There were operated upon by the coiner during the fiscal year 1896 4,971,818.50 ounces of standard silver, delivered to him in the form of ingots. The amount of coin manufactured therefrom is shown in the following table:

COINAGE EXECUTED, FISCAL YEAR 1896.

Denominations.	Pieces.	Value.
Dollars	1, 950, 000	\$1, 950, 000
Half dollars	1, 232, 000	616, 000
Quarter dollars	2, 180, 000	545, 000
Dimes	190, 000	19, 000
Total	5, 552, 000	3, 130, 000

No gold coinage was made during the year.

On the annual settlement, June 30, 1896, of the accounts of the coiner it was found that in operating on 4,971,818.50 standard ounces of silver there was a wastage of 497.78 standard ounces, equivalent to 10 per cent of the legal allowance.

ASSAY DEPARTMENT.

The number of assays made during the year was as follows:

	Character.	Number.
=		
	• • • • • • • • • • • • • • • • • • • •	<u> </u>

Messrs. George R. Coming, of the New York assay office, and F. W. Braddock, of the Bureau of the Mint, superintended the annual settlement, June 30, 1896, and reported that the accounts of the superintendent were correct.

UNITED STATES MINT AT CARSON, NEV.

The value of the bullion received at the mint at Carson, Nev., during the fiscal year ended June 30, 1896, amounted to \$536,817.66, against \$1,660,353.89 for the previous year, a decrease of \$1,123,536.23.

The weights and values of the deposits were as follows:

Metal.	Weight.	Value.
Gold	Standard ozs. 25, 765. 424 49, 389, 49	\$479, 356. 73 57, 460. 93
Total value		536, 817. 66

Owing to the investigation and trials of the persons charged with the embezzlement of gold bullion from the melter and refiner's department, the refinery has not been operated during the year, and the business of this mint was limited to the receipt of gold deposits only.

At the annual settlement and examination at the close of the fislea year, made by Mr. J. B. Eckfeldt, assayer of the United States mint at Philadelphia, the superintendent returned a surplus of 3.769 ounces of standard gold, valued at \$70.31, and 15.35 ounces of standard silver, valued at \$8.46.

EMBEZZLEMENT OF GOLD BULLION FROM THE MELTER AND REFINER'S DEPARTMENT.

Since the report of this Bureau for the fiscal year 1895 was printed the parties charged with the embezzlement of gold bullion from the melter and refiner's department of the mint at Carson—namely, John T. Jones, assistant melter and refiner, and James Heany, silver dissolver—have been convicted and sentenced to a term of eight years' imprisonment and to pay a fine of \$5,000. Mr. Andrew Mason, superintendent of the United States assay office at New York, who was charged with making the investigation, has submitted the following report on the manner in which the embezzlement was made, and the evidence upon which the guilty parties were convicted:

United States Assay Office, Superintendent's Office, New York, November 7, 1896.

SIR: Having been instructed by you to investigate the matter of a shortage in the bullion in the melter and refiner's department, which had been reported by the superintendent (J. W. Adams) of the United States mint at Carson, Nev., I found on my

arrival, on March 15, 1895, that Mr. A. L. Gallagher, of the United States Secret Service, had been in Carson for a few days making inquiries and observations outside

of the mint, having been assigned to service with me.

I learned in the mint that Mr. Hirsch Harris became melter and refiner on June 1, 1894 (Governor Adams became superintendent at the same time). The melts of gold and silver bullion remaining in the hands of his predecessor (E. B. Zabriskie) at that date had been transferred to him at the same weight and fineness at which they had been credited to Mr. Zabriskie in closing his account. The deposits received subsequently had been turned over to him by the superintendent, from month to month, at the weight and fineness with which the depositors had been credited in their payment. The parting and refining operations had been conducted in the same way that had been customary, Mr. John T. Jones, who had been assistant melter and refiner the previous four years, continuing in that position and actively looking after the operations of the department, as before. The fine gold and fine silver melts, the product of these operations, had been delivered to the superintendent as usual.

Until December 5, 1894, the sulphuric acid process had been used in parting the gold from silver. At that date and until January 3, 1895, a quantity of bullion containing a large proportion of base metal was operated upon by the nitric-sulphuric process. The gold obtained from it was kept by itself (not mixed with that from previous workings of bullion by the sulphuric acid process) and on being melted weighed 8,918.352 ounces standard instead of 10,432.629 ounces standard, which the bullion (57,132.40 ounces) ought to have yielded, according to calculations based on the recorded weight and fineness of its constituent melts. This shortage (1,514.277 ounces standard gold) alarmed the melter and refiner, who at once proceeded to have the "slum" (a leaden tank which received all solutions washed from fine gold sponge, etc., and in which any gold which might pass over in the washings by decantation would settle at the bottom) cleaned out, and the amount of gold in it exactly determined. It was found to be about 700 ounces standard, so that if it had all been credited to that operation, there would still have been a shortage of about 800 ounces of standard gold. As, however, the washing of the gold in that process had been done with great care, it was obvious that only a very limited proportion of the "slum" gold came from that. The matter was reported to the superintendent by Mr. Harris, and the remaining unparted bullion melts (deposits, etc.) were reweighed, and the exact amount of gold in them determined. The contents of various residues and gatherings from a clean up of the department were also ascertained. When the gold in these was deducted from the balance of account due by the melter and refiner to the superintendent, there appeared to be a deficit of about 3,000 ounces standard gold. This revealed the further startling fact that the shortage in the gold received from the bullion worked by the sulphuric acid process had also been very large. It was then (February 13, 1895) that the melter and refiner made a formal official announcement of the shortage to the superintendent, who sent the same to yourself, with the request that some competent person be sent to Carson to investigate the matter.

Some silver bars that had been overlooked in the excitement incident to such a condition of affairs had been found which more than balanced the reported shortage in

that metal, giving a large surplus instead.

Careful inquiries of the officers and employees failed to elicit the cause of the shortage of gold, and nothing appreciable was found, on a careful examination of the premises, including the chimneys and roofs of the building. The men employed in the department (especially those in the separating room) had been under surveillance, without result. Mr. Harris thought that the shortage must have been occasioned by theft of the gold from there, although the bullion received by him might not have contained all the gold charged in account. While the unparted bullion in his possession was being delivered to the converted and the gold charged in the converted bullion in his possession was being delivered to the superintendent, under my supervision, a number of melts having considerable gold in them were reassayed. Among them was a melt recorded as "silver purchase No. 164," received November 7, 1892, weighing 2,133.30 ounces, and containing 482½ thousandths gold and 500 thousandths silver. It was found, on a reassay, to have 19½ thousandths gold and 946 thousandths silver, showing a deficiency in gold of \$20,417.93 (1,097.464 ounces standard).

On examining the record of the delivery of bullion by the melter and refiner to the superintendent in the settlement of June, 1893, it seemed clear from its relative position on the list of melts that it had been made toward the close of the delivery, indicating that a previously unknown deficiency had been made up or covered by that neit just in time to make the melter and refiner's settlement a satisfactory one. This could only have been done through the agency of the assistant melter and refiner (John T. Jones), whom I found to have been the active manager of the department (Mr. Zabriskie had long been more or less of an invalid, and was absent at that time). The present shortage of gold (thus increased to \$75,549.75) suggested that Mr. Jones must have covered stealings on his own account by other spurious melts, and at the last moment, to prevent an investigation, been obliged to cover the stealings of another thief previously unknown or whose capacity he had underrated.

Strangely enough, on the next day the superintendent received information from Reno that James H. Heney (who had been employed for several years in the separating room previous to June 30, 1893) had brought fine gold worth over \$20,000 to the Reno (Nevada) Reduction Works (where he was unknown) for melting and assay in August, 1893. Both cases were promptly brought to the attention of the United States district attorney. They were arrested (Mr. Heney after a prolonged flight and close pursuit by members of the United States Secret Service) and after examination before the United States commissioner were held for the action of the grand jury on August 19, 1895. True bills were found against both, and their trial fixed for November 11, 1895. At that time Mr. Heney's case was taken up.

The theory of the defense was that the spurious melt had been made in February or March, 1895, by Mr. Harris, the present melter and refiner; that the original genuine silver purchase melt, No. 164, had not only been delivered in the settlement of June, 1893, to the superintendent, but also in the transfer from the old to the new officials in June, 1894, and receipted for as such; and that as there had been no shortage in the accounts, there could have been no gold stolen from the mint by any-one previous to June, 1894. Therefore, any gold that Mr. Hency might have disposed of at the Reno Reduction Works came from other and legitimate sources. The actual shortage existing in February, 1895, it was alleged, arose from losses in the separating room, incident to lack of experience by new employees; and an expert witness from San Francisco testified that the missing gold might have been dissolved, owing to the use of impure acids; a large quantity from that treated by the sulphuric acid process having been delivered in the sulphate of copper solution to the purchaser of that liquid; and another large quantity from that treated by the nitric-sulphuric process having been run into the sewer. It was testified that samples from various parts of the sewer had been sent to the same expert for assay, and reported to be rich in gold.

The manager of the works to which the sulphate of copper was delivered testified that the gold in it caused a large increase in the yield of gold from ores on which it

was used, nearly double the amount per ton being obtained from said ores.
On the part of the Government it was shown that the consolidation record kept in the melter and refiner's department had a number of leaves carefully removed, presumably with the intention of removing evidence of the use of the original melt "silver purchase No. 164" in the separating room, and probably of other like melts which had also been treated there and yet turned over (spurious ones) in the settlement. Also that quite a number of the melts contained in the bullion treated by the nitric sulphuric process already referred to were deposits of the previous year that had been transferred to the present melter and refiner in June, 1894, and presumably some of them were spurious. It was found and testified that the record of bullion sent to the separating room in July, 1894, showed that it was composed entirely of melts received in the transfer of June, 1894, and that there was a large deficit (about 1,300 ounces standard) in the gold from the workings of that month, while subsequently, when the bullion received on deposit during the term of the present melter and refiner was treated by the sulphuric-acid process, the return of gold was satisfactory. It was also shown by the record of bullion sent to and the fine gold returned from the separating room during the year ending June, 1893, that there was a deficit of from 2,200 to 2,900 ounces standard gold, according as certain melts in the June delivery might be classified as made from residues from bullion operated upon, or from deposit bullion that had not been treated. The account was not balanced as it had been in previous years.

The jury failed to agree, and a new trial was ordered for December 2, 1895. time, another lot of bullion was separated, using the same acids (nitric and sulphuric) in precisely the same way by the same men, and the calculated amount of gold in the bullion was obtained. Not a trace of gold was found in any of the solutions when carefully tested. This was presented with the evidence from the books in connection with the spurious melt No. 164 and the disposal of the stolen gold by Mr. Heney at the Reno Reduction Works. Moreover (on the new trial), a witness testified that he had been paid \$400 to send his son to Canada and \$400 more to secrete himself to avoid the service of a subpæna on the previous trial. Mr. Heney had hired a vehicle from him in August, 1893, and was driven at night from Carson to Reno by his son, stopping on the outskirts of Carson to take two bags of shot (fine gold) from their place of concealment. On this, as on the previous trial, the mass of gold melted and assayed in the reduction works was clearly identified by the parties who handled it there as being powdered or sponge fine gold, the same as that shown them in the mint. They had had no knowledge by inspection of mint fine gold in the

form of sponge or powder in August, 1893.

The jury brought in a verdict of guilty on December 21, and on December 24

Mr. Heney was sentenced to imprisonment for eight years and a fine of \$5,000.

The trial of Mr. Jones was postponed to March 2, 1896. At that time, in addition to the evidence heretofore described, it was shown by a careful comparison of the bullion melts delivered by the superintendent to the melter and refiner (during the year ending June, 1893) with the melter and refiner's record of the disposition of those melts that the sum of the melts sent to the separating room and those delivered back to the superintendent in the settlement gave an excess of over 2,200 ounces standard gold in the latter over that in the former. An identification of the other spurious melts that had been used, in addition to "silver purchase No. 164" that had providentially been carried over to 1895, was impossible, owing to the abstraction of many pages of the consolidation book, but the gross amounts of the consolidated melts that had been placed in the general record of bullion sent to the separating room proved beyond doubt that there had been other spurious melts used in the settlement in place of genuine ones, whose gold had been taken out in the separating room and stolen or used to replace other gold that had been embezzled by Mr. Jones, who had full and constant control of the bullion while in the vault attached to the office of the melter and refiner.

Nevertheless, the jury failed to agree, and on March 19 was discharged. Mr. Jones's second trial was fixed for April 20, 1896. During the interval, while making a careful comparison of the bullion accounts for the year ending June; 1891 (in which year Mr. Jones became assistant melter and refiner), tracing the individual history of every bullion melt, it was found that two melts that had been received as

deposits on April 20, that is-

	Weight.	Gold fineness.	Silver fineness.	Standard gold.	Standard silver.
Silver purchase No. 523 Silver purchase No. 524	, '	0,054 .055	0.937 .937	Ounces. 228: 684 235: 650	Ounces. 3, 968. 09 4, 014. 62

and had been sent to the separating room on April 27 and 28, respectively, and treated, were nevertheless among the melts returned in the settlement of June, 1891. After having been redelivered to the melter and refiner at the close of the settlement, they were recorded as having been separated again in July, 1891. In the year ending June, 1892, the following melts were received as deposits in April:

	Weight.	Gold fineness.	Silver fineness.	Standard gold.	Standard silver.
Silver purchase No. 437 Silver purchase No. 462		0. 108 . 093½	0. 884 . 899	Ounces. 687. 216 588. 977	Ounces. 5, 624. 99 5, 663

These were sent to the separating room in May, and appear among the melts delivered to the superintendent in the June settlement.

In the consolidation record the numbers originally entered (437 and 462) had been roughly erased and the numbers "Ex. 37" and "Ex. 67" written over them, respectively—obviously for concealment, as no such numbers appeared on the assayor's records.

These two melts, like the ones of 1891, were, after being redelivered to the melter and refiner, at the close of the settlement, sent to the separating room, in July, 1892.

Although the eleven months ending May, 1894, had previously been examined by a similar method, the records of that were treated the same way. Again two melts were found that had undergone the same strange experience, viz:

	Weight.	Gold fineness.	Silver fineness.	Standard gold.	Standard silver.
Fine bar deposit No. 47 Fine bar ⁶ deposit No. 76		0. 475 <u> </u> - . 245 <u>-</u>	0.501 .705	Ounces. 669. 292 376. 597	Ounces. 705. 18 1, 081. 47

They had been received as deposits on January 5 and February 5, and sent to the separating room on February 3 and March 13, respectively, while they were subsequently delivered to the superintendent in the settlement of May, 1894. The num-

bers "Fine bar deposits 47 and 76" in the consolidation record had been erased (imperfectly) and "Ex. 04" and "Ex. 07" written over them, respectively; evidently,

as in the year 1892, for concealment.

These two melts were used in making up the bullion mixture treated by the nitric-sulphuric process in December, 1894, and January, 1895. Their spurious character, now proved, accounted for over 1,000 onnees standard gold of the large shortage in that operation more clearly than by its exit through one pipe into the sewer and by another in the sulphate of copper to an ore-working establishment. All the original entries of these melts were in the handwriting of Mr. Jones, and the new numbers over the imperfectly erased ones were likewise written by him. These additional revelations from the records showed conclusively that the melter and refiner's department had been turned into a regular manufactory of spurious melts from the time of Mr. Jones's appointment, in 1891, until June, 1894, when Mr. Harris became melter and refiner.

The last two discovered (in 1894), with "Silver purchase 164" of 1893, covered the abstraction of 2,100 ounces of standard gold—more than one half of the shortage of

4,060.799 ounces standard (\$75,549.75).

The composition of spurious "Silver purchase 164" (0.019½ gold and .946 silver) was suggestive of that of the others, and therefore a wastage of 3,458.26 ounces standard silver in 1891, when the manufacture of spurious melts began, was properly supplemented by a surplus of 3,019.48 ounces standard silver in 1895, when the gold into which the silver had been transmutted was reconverted into the original silver. As there should have been a surplus of gold resulting from fractional gains in fineness during the five years of about \$25,000, the total amount stolen was probably \$100,000.

Mr. Jones's accounts with bankers and brokers showed a loss instead of a large gain that he had claimed as explaining sudden financial ease and plenty in 1891 and

afterwards.

With the new evidence added to that presented on the first trial, the second jury brought in a verdict of "guilty" on May 2, after having been out but a few minutes. On May 4, 1896, Mr. Jones was sentenced to eight years' imprisonment and \$5,000

The real cause of the shortage of gold in the Carson Mint had been made evident. These men (Jones and Heney) had not only stolen from the Government the gold

intrusted to their care, but had endeavored to fix the guilt on others.

The present officers and employees of the mint have been completely relieved of the imputation cast on them.

Very respectfully,

ANDREW MASON,
Superintendent U. S. Assay Office, New York.

The DIRECTOR OF THE MINT, Washington, D. C.

UNITED STATES ASSAY OFFICE AT NEW YORK.

The value of the gold and silver received during the year aggregated \$49,091,947.76, against \$43,232,906.34 for the previous fiscal year, or an increase of \$5,859,041.42. The weight and value were as follows:

Metal.	Standard ounces.	Value.
Gold		\$41, 837, 879. 02 7, 254, 068. 69
Total		49, 091, 947. 71

Uncurrent and mutilated domestic gold coins of the nominal value of \$530,575 were melted and found to contain 28,260.596 ounces of standard gold, of the value of \$525,778.53.

Uncurrent and mutilated domestic silver coin of the face value of \$3,245.50 was melted, producing 2,330.23 ounces of standard silver,

of the coining value in subsidiary coin of \$2,899.20.

Foreign gold coins of the value of \$3,115,158.50 in United States money were melted, and foreign silver coins containing 167,709.65 ounces of standard silver.

The value of gold bars exchanged for gold coin was \$36,218,270.91, of which \$29,897,201.82 was for export and \$6,321,069.09 for domestic use.

The quantity of gold and silver operated upon by the melter and refiner's department during the year was:

Metal operated on.	Standard ounces.
Gold	2, 286, 907. 148 6, 208, 465. 35

The operations of the refinery were as follows:

Bullion.	Weight.
Gross weight, 3,715,549.44 ounces. Gold	Standard ounces. 558, 999. 55
Silver	3, 274, 785. 29

During the year the number of fine, mint, and standard bars made and delivered to the superintendent was 54,389, containing 2,275,002.086 ounces of standard gold and 6,117,282.98 ounces of standard silver.

The number of gold deposits melted was 8,361; silver deposits, 3,231;

total, 11,592.

The quantity of sulphuric acid used in the parting operations was 1,365,650 pounds. The products of the sale of spent acid and blue vitriol amounted to \$9,337.99 and for old material \$348.58, a total of \$9,686.57.

On the annual settlement, June 30, 1896, of the melter and refiner's accounts, it was found that in operating upon 2,286,907.148 ounces of standard gold he returned an excess of 828.724 ounces standard, of the value of \$15,418.12, and in his operations on 6,208,465.35 ounces standard of silver he returned an excess of 7.10 ounces standard.

It is worthy of note that of the earnings (\$109,399.21) \$22,516.51 was from the charges for exchange of gold bars for gold coin (\$29,897,201.82) for export, while at the same time the expenses incident to transporta-

tion and coinage of \$29,897,201.82 were saved.

Messrs. F. P. Gross and W. F. Bowen, of the Bureau of the Mint, superintended the annual settlement, June 30, 1896, and reported that they found on hand all the coin and bullion with which the superintendent was charged.

The deposit melts assayed and computed during the fiscal year ending June 30, 1896, numbered 11,592. There were also assayed and stamped 14,000 melts of fine metal, containing over 54,000 bars.

Eight hundred special assays were made, many of them being articles of manufactured silverware marked "sterling," the same having been brought to the assay office in order that the fineness of the same might be accurately determined for use in the settlement of the suits brought against parties for offering silverware as of sterling or standard fineness which was found upon assay to be less than either sterling or standard.

Over 1,000 mixed melts of bullion and 600 barrels of sweeps were assayed for the melter and refiner. The large increase in the number

of deposits made increased the work correspondingly over the previous

year, requiring the making and use of some 70,000 cupels.

During the year a power press was purchased for use in making cupels, in place of the hand press formerly used. A hydraulic press was also substituted for the trip hammer used in preparing samples for the rolls, doing away with the noise and jar occasioned by the use of the trip hammer.

MINT OF THE UNITED STATES AT DENVER, COLO.

During the fiscal year 1896 the value of the bullion deposited at this institution amounted in the aggregate to \$4,225,983.41, as against \$5,637,459.51 for the previous fiscal year, showing a decrease of \$1,411,476.10.

Mutilated domestic gold coins of the nominal value of \$254, containing 13.177 standard ounces, of the coining value of \$245.15, were

received and melted during the year.

The following statement exhibits the value of the deposits, earnings, and expenditures; also the percentage of net expenses to deposits for the fiscal year 1896:

Deposits: Gold	
Cold. #1 160 955 90	
Guiu	1.4
Silver57, 728. 02	\$4, 225, 983. 41
Earnings	8, 638. 78
Expenditures	36, 807. 06
Percentage of net expenses to deposits, \$0.66896.	

ASSAY OFFICE OF THE UNITED STATES AT BOISE, IDAHO.

The deposits of bullion, principally from the mines of Idaho and Oregon, at the assay office at Boise during the fiscal year 1896 amounted to \$1,166,251.68, against \$1,198,149.91, the amount of deposits reported for the previous year.

The deposits, earnings, and expenditures for the fiscal year are as

follows:

Items.	Amount.
Deposits: Gold	\$1, 166, 251. 68
Expenses Percentage of net expenses to deposits, 0.66589.	4, 433, 97 12, 200, 00

ASSAY OFFICE OF THE UNITED STATES AT HELENA, MONT.

The value of the gold and silver bullion deposited at the United States assay office at Helena during the fiscal year 1896 aggregated \$2,387,737.55, against \$2,233,884.40 for 1895, an increase of \$153,853.15; an increase of \$367,004.50 over the year 1894; an increase of \$554,936.08 over the year 1893, and an increase of \$1,023,049.46 over the year 1892, showing a very material increase each year for the past four years. The principal deposits of domestic bullion were received from the mines of Montana and Idaho. There were no deposits of mutilated or uncurrent coins of the United States.

The melting department made over 3,500 melts of bullion during the year. The addition of electricity as power facilitates the work of the office to a considerable extent.

The following table exhibits the amount of deposits, earnings, and expenditures, with the percentage of net expenses to deposits, for the fiscal year:

Items.	Amount.
Deposits: Gold° Silver	\$2, 387, 737. 55

UNITED STATES ASSAY OFFICE AT CHARLOTTE, N. C.

The deposits of all bullion from the mines of the South Appalachian range at the assay office at Charlotte during the fiscal year ended June 30, 1896, amounted to \$274,569.48, as against \$236,041 for the fiscal year 1895.

No deposits of mutilated or uncurrent domestic coins were made at

this institution during the year.

The deposits, earnings, and expenditures for the fiscal year were as follows:

Items.	Amount.
Deposits: Gold	\$274, 569. 48
Expenditures	 1, 206. 42 4, 749. 72

ASSAY OFFICE OF THE UNITED STATES AT ST. LOUIS, MO.

The value of deposits of bullion during the fiscal year 1896 at the assay office at St. Louis aggregated \$106,204.58, against \$160,161.12 for the previous fiscal year, a decrease of \$53,956.54.

The deposits included uncurrent domestic gold coin of the nominal value of \$8,446.50, the value of the same in new coin being \$8,362.25.

The following table exhibits the amount of deposits, earnings, and expenditures; also percentage of net expenses to deposits during the fiscal year 1896:

Items.	Amount.
Deposits:	
Gold \$104, 851. 83	
Silver 1, 352. 75	
	\$106, 204. 58
Earnings	682. 89
Expenditures	.4, 385. 87
Percentage of net expenses to deposits, 3.48664.	

RECOINAGE OF STANDARD SILVER DOLLARS.

During the fiscal year 1896 there were transferred from the Treasury to the mints 1,100 mutilated and uncurrent silver dollars, and there were purchased at the mints and at the assay office at New York 934 silver dollars, making the number of uncurrent silver dollars received for recoinage during the year 2,034, which were used in the manufacture of subsidiary silver coins.

The total number of mutilated and uncurrent silver dollars received and melted at the mints and at the assay office at New York from 1883 to the close of the fiscal year 1896 is shown in the following statement:

Fiscal year.	Amount.	Fiscal year.	Amount.
1883	\$621	1891	\$10,800
1884		1892	42, 881

QUANTITY OF METALS OPERATED UPON, WASTAGE, AND LOSS, FISCAL YEAR 1896.

In quantity the precious metals operated upon in the different departments of the mints and assay offices during the fiscal year ended June 30, 1896, exceeded 498 tons of gold and 1,600 tons of silver.

The value of the precious metals wasted in the metallurgical and mechanical departments was \$10,622.57. A loss of \$12,561.08 occurred from the difference between the assay value of bullion contained in sweeps and leady melts sold and the amount received for the same.

The wastages and losses aggregated \$23,183.65. Against these losses there were gains arising from the operations on bullion as follows:

GAINS ARISING FROM BULLION OPERATIONS, 1895 AND 1896.

Character of gains.	Fiscal year—		
Character of gains.	1895.	1896.	
Surplus bullion returned by the operative officers	\$41,792.96	\$38, 364. 01	
Precious metals recovered in grains and sweeps Gain on bullion shipped from the minor assay offices	13, 513. 48	6, 919. 78	
to the mint for coinage	6, 203. 15	7, 004. 38	
Total gains	61, 509. 59	52, 288. 17	

Deducting the value of the total operative, wastage, and loss on sale of sweeps from the incidental gains on bullion, there was a net gain in the operations of the mints during the fiscal year of \$29,104.52.

COST OF COINAGE, 1895 AND 1896.

The following table exhibits the cost per piece of the coins executed at the mints of the United States during the fiscal years 1895 and 1896:

a No gold coinage.

HISTORY OF THE MOTTO "IN GOD WE TRUST."

From the records of the Department it appears that the first suggestion of the recognition of the Deity on the coins of the United States was contained in a letter addressed to the Secretary of the Treasury, Hon. S. P. Chase, by the Rev. M. R. Watkinson, minister of the gospel, Ridleyville, Pa., under date of November 13, 1861, which was as follows:

RIDLEYVILLE, PA., November 13, 1861.

DEAR SIR: You are about to submit your annual report to Congress respecting the affairs of the national finances.

One fact touching our currency has hitherto been seriously overlooked. I mean

One fact touching our currency has hitherto been seriously overlooked. I mean the recognition of the Almighty God in some form in our coins.

You are probably a Christian. What if our Republic were now shattered beyond reconstruction? Would not the antiquaries of succeeding centuries rightly reason from our past that we were a heathen nation? What I propose is that instead of the goddess of liberty we shall have next inside the 13 stars a ring inscribed with the words "perpetual union;" within this ring the all-seeing eye, crowned with a halo; beneath this eye the American flag, bearing in its field stars equal to the number of the States united; in the folds of the bars the words "God, liberty, law."

This would make a beautiful coin, to which no possible citizen could object. This would relieve us from the ignominy of heathenism. This would place us openly

under the Divine protection we have personally claimed. From my heart I have felt our national shame in disowning God as not the least of our present national disasters.

To you first I address a subject that must be agitated.

M. R. WATKINSON, Minister of the Gospel.

Hon. S. P. Chase, Secretary of the Treasury.

Under date of November 20, 1861, the Secretary of the Treasury addressed the following letter to the Director of the Mint:

TREASURY DEPARTMENT, November 20, 1861.

DEAR SIR: No nation can be strong except in the strength of God, or safe except in His defense. The trust of our people in God should be declared on our national coins.

You will cause a device to be prepared without unnecessary delay with a motto expressing in the fewest and tersest words possible this national recognition.

Yours, truly,

S. P. CHASE.

JAMES POLLOCK, Esq., Director of the Mint, Philadelphia, Pa.

It was found that the act of January 18, 1837, prescribed the mottoes and devices that should be placed upon the coins of the United States, so that nothing could be done without legislation.

In December, 1863, the Director of the Mint submitted to the Secretary of the Treasury for approval designs for new 1, 2, and 3 cent pieces, on which it was proposed that one of the following mottoes should appear: "Our country; our God;" "God, our Trust."

The Secretary of the Treasury, in a letter addressed to the Director of the Mint, under date of December 9, 1863, uses the following

language:

I approve your mottoes, only suggesting that on that with the Washington obverse the motto should begin with the word "Our," so as to read: "Our God and our country." And on that with the shield, it should be changed so as to read: "In God we trust."

An act was passed April 22, 1864, changing the composition of the 1-cent piece and authorizing the coinage of the 2-cent piece, the devices of which were to be fixed by the Director of the Mint, with the approval of the Secretary of the Treasury; and it is upon the 2-cent bronze piece

that the motto "In God we trust" first appears.

The act of March 3, 1865, provided that in addition to the legend and device on the gold and silver coins of the United States it should be lawful for the Director of the Mint, with the approval of the Secretary of the Treasury, to place the motto "In God we trust" on such coins as shall admit of the inscription thereon. Under this act the motto was placed upon the double eagle, eagle, and half eagle, and also upon the dollar, half and quarter dollar in the latter part of 1865.

The coinage act of February 12, 1873, provided that the Secretary of the Treasury may cause the motto "In God we trust" to be inscribed

on such coins as shall admit of such motto.

This is a brief history of the motto "In God we trust," as shown by the records of the Department.

COINAGE ACT OF 1873.

In the Appendix will be found a documentary history of the coinage act of February 12, 1873, frequently referred to by the public press and in discussions as the act that demonetized silver in the United States. Since, however, the legal-tender character of the silver dollars coined

previous to its passage was not taken away from them by the provisions of that act, it can not be properly said that silver was demonstrated by it. All that the act did was to omit the silver dollar from the list of coins thereafter to be coined. The demonstration of silver was not, therefore, effected by the act of February 12, 1873, but by section 3586 of the Revised Statutes of the United States, adopted June 22, 1874, which reads: "The silver coins of the United States shall be legal tender, at their nominal value, for any amount not exceeding five dollars in any one payment."

The last general revision of the coinage laws prior to 1873 was made by the act of January 18, 1837, and the necessity of a revision was apparent to all persons conversant with the coinage legislation of the

United States.

The Secretary of the Treasury, Hon. George S. Boutwell, in his annual report to Congress for the fiscal year 1869, refers to the subject in the following language:

The mining and coining of the precious metals is now so large a national interest that it deserves more attention than it has hitherto received. At present there is no burean or officer in the Treasury Department at Washington charged especially with the management of this great interest. I therefore recommend that provision be made for the appointment of a proper officer to be intrusted with this branch of the public business, under the direction of the Secretary of the Treasury.

The coinage of the country is diminished in amount by the fact that in England and France the mint expenses are much less than with us. It would no doubt have a tendency to prevent the export of the precious metals in the form of bullion if the

mint charges were to be reduced or altogether abolished.

In December, 1869, the Secretary of the Treasury requested Mr. John Jay Knox, then Deputy Comptroller of the Currency, to prepare a bill for submission to Congress providing for the revision of the mint and coinage laws of the United States. A rough draft of the bill was prepared by Mr. Knox, containing in a concise form nearly all the existing legislation then in force relating to the coins of the United States.

The draft as prepared by Mr. Knox was printed and submitted to the officers of the Treasury, including those of the mints and assay offices, and others who had made the subject a study, with the request that the same be examined and returned to the Department "with such notes and suggestions as experience and education should dictate."

The rough draft of the bill was reviewed by those to whom submitted and returned to the Department with such amendments sug-

gested as appeared desirable.

When all the amendments and suggestions had been duly considered, Mr. Knox, with the assistance of Hon. H. R. Linderman, formerly Director of the Mint at Philadelphia, prepared a bill which was transmitted by the Secretary of the Treasury, under date of April 25, 1870, to Hon. John Sherman, chairman of the Senate Committee on Finance.

Under date of June 4, 1870, a resolution was passed by the House of Representatives directing the Secretary of the Treasury to furnish copies of all correspondence between the Department and officers of the different mints and assay offices, and other persons, relating to the bill as submitted to the Finance Committee of the Senate.

Copies of the correspondence called for by the resolution were transmitted by the Secretary of the Treasury to the Speaker of the House

(Hon. J. G. Blaine) under date of June 25, 1870.

From the date of its introduction in the Senate the bill was printed, by order of Congress, with amendments, thirteen times, and was considered during five different sessions by the Senate and House of Representatives. The debates on the bill in the Senate covered 66 pages

and in the House of Representatives 78 pages of the Congressional Globe.

The bill was really intended as a codification of the laws relating to matters connected with the details of the mint and assay offices, yet the intention to discontinue the coinage of the silver dollar of 4121.

grains was made very evident.

In the bill as originally prepared and submitted to the officers of the Treasury, and others versed in coinage, etc., for suggestions, a silver dollar to contain 384 grains of standard silver was proposed, which was to be a legal tender to the amount of \$5 in payment of all dues except duties on imports. The proposed discontinuance of the silver dollar of \$12½ grains was expressly set forth by Mr. Knox in his report to the Secretary of the Treasury which accompanied the bill proposed when transmitted to the chairman of the Senate Committee on Finance.

The following table shows the steps by which the act of 1873 became

a law:

Proceedings.	Senate.	House.
Submitted by Secretary of Treasury	Apr. 28, 1870 May 2, 1870 Déc. 19, 1870	June 25, 1870
Passed by vote of 36 to 14		Feb., 25, 1871 Mar. 9, 1871 Jan. 9, 1872 Jan. 10, 1872

COUNTERPEITING UNITED STATES SILVER COINS.

Every precaution is taken to guard against the counterfeiting of our coins, and to see that the pieces stamped by our mints are within the limits of tolerance, both as to weight and fineness. From every delivery of coin by the coiner at any of the mints two pieces are taken indiscriminately and sent to the Bureau of the Mint, where they are weighed and assayed. In addition to this, there are taken to be tested by the annual assay commission 1 piece from each 2,000 pieces or fractional part of 2,000, and none of the coins so far tested by the Bureau or the annual assay commission have been found outside of the limit of tolerance, either as to the weight or fineness.

The mere fact, therefore, that a coin in circulation is outside these limits is presumptive evidence of its being counterfeit. But this is

not all. There is no possibility by which a coinage die of the United States can escape the custody of its officers. All such dies are manufactured by the engraver of the mint at Philadelphia, and a record of them is there kept. They are all numbered and are furnished to the mints at San Francisco and New Orleans only upon requisitions of the superintendents of the said mints on the Director of the Mint. They are required to be returned to the Philadelphia Mint at the close of the year, when they are defaced and destroyed in the presence of its superintendent, engraver, and assayer.

Yet evidence is not wanting that the silver coins of the United States are being counterfeited by the manufacture of pieces differing so little from the genuine ones in size, weight, fineness, devices, and general appearance that their fraudulent character can be detected only by an assay. In some cases, if not in a majority, the fineness and the amount of pure metal in the counterfeit pieces are higher than in similar silver

pieces issued from the mints.

The following statement shows the results of some assays of these illegal coins, made in the laboratory of the Bureau of the Mint:

Denomination.	Weight.	Fineness.	Difference in weight from genuine coins.	Difference in fineness from genuine coins.	
	Grains.	Grains.	Grains.	Thousandths.	
Half dollar	192	867.5	a 0. 9	a 32. 5	
Half dollar (1859)	197.41	918.6	b 5.41	b 18.6	
Half dollar	196.35	920.4	b 3.45	b 20.4	
Dollar	416.05	941	b 3.55	b 41	

a Under. \$b Over. From 1853 to 1873 the weight of the half dollar was 192 grains; in 1873 it was raised to 192.9.

The best executed of these pieces is the half dollar, weighing 192 grains, of the fineness of $0.867\frac{1}{2}$, which has been put in circulation both East and West. No one except those who are used to examining coins would be likely to detect any difference between it and a genuine piece. The same may be said of all counterfeit pieces whose weight differs from the legal weight by only 4 or 5 grains and whose fineness does not depart largely from that required by law.

At the prevailing price of silver the nominal or face value of our silver coins is about double their bullion value. This constitutes a great temptation to the unlawful stamping of such coins by unscrupulous persons, affording them, as it does, an opportunity to place in circulation, at a profit on the material employed of 100 per cent, spurious pieces containing as much or even more pure metal than those issued

from the mints.

This is a great danger to which the under-value coins of all countries are now exposed and from which those minted by the Netherlands for its colonies, and especially Java, have suffered greatly, as will be seen from the following extract from the Berlin Börsen-Zeitung of a recent date:

The counterfeiting of silver coins on a large scale by producing perfectly and in every detail exact imitations of the legal coins has been actually proven. It was pointed out long ago that the great depreciation of silver would lead to the fraudulent manufacture of silver coins which could in no way be distinguished from genuine ones and that this species of counterfeit would yield a profit of 100 per cent. There were a great many indications that such counterfeit coinages would be

made. Even the statistics of silver was such an indication, for the small market for the total silver product was startling. It was long a matter of surprise in Holland that the Dutch possessions in India, despite their increasing trade, drew no silver money from the mother country, but on the contrary continually shipped silver money to it. The Dutch colonies have the same currency as Holland; the coinage of silver is suspended in the Netherlands, but the old silver coins still circulate at their former full silver value. Now, counterfeits of 2½ gulden pieces have been discovered in the following manner: There are in circulation pieces which can be distinguished from the genuine neither in size nor weight nor fineness; nor is there anything in the stamping by which they can be distinguished from the genuine coins. It is only on the edge that certain deviations, impossible in genuine coins, are found.

The attention of the Dutch Government having been called thereto, it ascertained that the 2½ gulden pieces were being counterfeited on a large scale in eastern Asia and were smuggled into Java from China. The frontiers were carefully watched, and the counterfeits have already been seized by the cask. The east Asiatics use in their counterfeiting, stamps that have no inscription on the edge; the inscription on the edge is imitated by hand. This is the cause of the deviations that have been observed in individual coins, the negligence of the counterfeiter causing a mistake to slip in occasionally. Whether other silver coins are counterfeited in eastern Asia the information received which is official does not say, but it has been proven that English coins also have been counterfeited. The data used by Dr. Arendt in his pamphlet against the president of the Imperial Bank gave occasion for the collection of material on this subject in England. As a result, two shilling pieces were sent from England to Germany, one of which was well known to be a counterfeit. The Berlin experts declared that they could discover no difference between the genuine and the counterfeit piece. This matter has an extraordinary practical importance. It is impossible for trade to do without silver money, but the fraudulent increase of silver money means a serious jeopardizing of the gold standard, all the greater in proportion as silver depreciates.

The silver coins of the United States are no better protected against fraudulent imitations than are those of Holland. As there is no inscription on the edge, the counterfeiter's task is thereby rendered easier and his crime more difficult of detection.

The French 5 franc silver piece bears on the edge the legend "Dieu

protège la France" (May God protect France).

But it can no longer be claimed, as it once was, even by competent judges like Professor Jevons, that the lettering on the edge is beyond the skill of the counterfeiter. The most such lettering can do is to lessen the chances of successful fraud.

Perhaps a better safeguard can be discovered, and in view of the danger to which the silver coins of the United States are exposed, and with the design of minimizing that danger, I respectfully recommend that authority be obtained from Congress for the appointment by the Secretary of the Treasury of a commission to have experiments made for the purpose of determining the best means of preventing unlawful imitations of the silver coins of the United States.

MINT PROCESSES OF THE UNITED STATES.

With a view to supplementing the details of the work of the Mint in this publication and at the same time of meeting a legitimate demand on the part of the public for information regarding technic operations in these institutions, a demand which has greatly increased in recent years, papers descriptive of such processes, and also of the assaying of gold and silver and the preparation of dies, have been prepared for this report. The first, under the title "From mine to mint," after briefly sketching the methods of gold extraction, paying particular attention to the modern chlorination and cyanide processes, describes parting and refining, ingot making, and the work in general of the melter and refiner's department of the mints. The second bears the caption, "Assaying of gold and silver." The third, under the heading "Coin-

age operations," describes the treatment of ingots after they leave the melter and refiner's department and come to the coiner's to be rolled, annealed, whitened, and stamped. The remaining one bears the caption, "Manufacture of dies." The papers just referred to are preceded by an article on the theory and history of coinage, which serves as an appropriate introduction to them.

THEORY AND HISTORY OF COINAGE. I

Coins are pieces of money of a fixed weight, stamped by the authority of government, and employed as a circulating medium; or, as Jevons defines them, "ingots of which the weight and fineness are certified by the integrity of designs impressed on the surfaces of the metal." Their value may be represented by the material of the coins, or may depend to a greater or less extent on the credit of the state. It is represented by the material especially in full-value gold and silver coins, which, when melted into the form of bars, preserve very nearly the value they had before the stamp was obliterated. It depends in part on the credit of the state in the case of coins whose metallic value is inferior to their nominal value, as, for instance, in the "standard" silver dollars of the United States, the 5-franc silver pieces of the Latin Union, the thalers of Germany, since the depreciation of silver, in divisional silver coins, and to a still greater extent in nickel and copper coins. The standard coins of a country are those that have unlimited and unconditional legaltender power in such country. They should, in order that the monetary condition of the country may be a healthy one, have a metallic value fully equal to their nominal value, and hence at the present day should consist of gold or silver. The requirement that standard coins should be full-value coins is not perfectly fulfilled at the present time in a great many countries. Thus the German silver thalers, the 5-franc silver pieces of the Latin Union, and the United States silver dollars are intrinsically under value standard coins—that is, coins whose metallie is inferior to their nominal value.

Divisional coins are those whose legal-tender power is limited to a definite and moderate sum. They are intended only for retail trade or to help effect the full payment of sums not round in wholesale trade. They are under-value coins, because their metallic is less than their nominal value, and hence special provisions are made to prevent their immoderate increase.

Trade coins are those to which no legal-tender power is attributed by the country that issues them, and which are therefore neither more nor less than bits of gold or silver whose weight and fineness are guaranteed by the state. Examples of trade coins are the gold kronen provided for by the German monetary treaty of January 1, 1857, the Dutch ducats and Wilhelms d'or, the silver Levantine or Maria Theresa thalers, and the United States silver trade dollar provided for by the act of February 12, 1873, and retired by the act of March 3, 1887. The trade coin of widest circulation formerly, especially in the East, was the Spanish piaster, which has been replaced by the Mexican dollar. These coins were also legal tender at home.

The definitions given of standard and divisional or token coins by

¹The material of this paper has been derived largely from an article by Professor Lexis on coinage, the fullest and freest use of which has been here made, and is here acknowledged. Other sources drawn upon are Professor Sherwood's History and Theory of Money, Shaw's History of Currency, Jevon's Mechanism of Exchange, Mc€ulloch's Dictionary of Commerce, Roswag on the Precious Metals, etc.

Professor Jevons differ somewhat from those given above, which are those of Professor Lexis. Thus Jevons defines a standard coin to be one of which the value in exchange depends solely upon the value of the material contained in it, the stamp serving merely as an indication and guarantee of the quantity of fine metal. "We may," he says, "treat such coins as bullion, and melt them up or expert them to countries where they are not legislation will everywhere be recognized." According to this definition, the silver thalers of Germany, the 5-franc silver pieces of the Latin Union, and the silver dollars of the United States are not standard coins. Thus Lexis's definition makes the distinguishing quality of standard coins their full legal-tender power, while Jevons's attaches that quality to the equivalency of the nominal and metallic values of the coins. The ideal of a standard coin is reached in those pieces in which this equivalency is found united with full legal-tender power as in the gold coins of the United States, Eng-

land, France, and Germany.

A great many commodities have, at different periods of history, been employed as money. Nations of hunters used the skins of beasts for Beaver skins were thus employed in the territory of the this purpose. Hudson Bay Company. Nations of fishermen used fish, pastoral tribes cattle, and agricultural peoples wheat or some other natural product such as cacao in Central America, tobacco in Virginia and Maryland. All nations have so used ornaments, cloth stuffs, or weapons. It was probably in the form of tools that brass was first used as money. a later period that metal circulated in the form of bars or ingots and then of discs. Mercury has been used as money among the miners of Mexico, leather in Russia, tin in China, pepper in Abyssinia, rice in the Philippine Islands, diamonds in India, dried codfish in Newfoundland, eggs in Alpine towns, and oats in Estramadura in Spain. The universal quality to be found in money, therefore, is that it is a commodity possessed of intrinsic value or general utility in a greater or lesser degree. It has never been a mere sign even when in the form of paper, for the paper was always a title deed to a commodity that circulated or had circulated as money to be surrendered on receipt of the money commodity. After having constituted the principal material of coin, copper made way for silver, and in recent times silver has yielded its supremacy to gold.

Gold and silver have long been the monetary metals par excellence. Their beauty of aspect has caused them to be universally sought for; their permanent color and characteristic hardness make them readily recognizable; they are malleable and take an imprint easily; fusible and homogeneous they can be divided without difficulty into parts similar to one another which can be again united together or separated without losing anything of their value; by reason of their rarity they possess a great acquisitive power in a small volume and are thus convenient instruments of the accumulation and transportation of wealth. Lastly, the relative stability of their value allows us to suppose them to possess approximately, for a limited period, a fixed purchasing power with respect to other commodities, and to attribute to one of them the

function of a standard.

Copper, on the other hand, has long been subject to considerable variations of price. The average level of prices is, moreover, too low for that metal to have maintained, in modern communities, the prominent place it occupied when general wealth was not so great. Copper has therefore been reduced to the condition of token money.

The intrinsic or metallic value of a coin depends on its weight and fineness, that is, on the proportion in which the precious metal it contains is alloyed with the base metal. The weight and fineness of a coin being known, its fine weight may be determined. The stamp of the state is intended to guarantee the weight and fineness of the coins, so far as the progress made in the coining art makes that possi-Chevalier was of opinion that "that proportion of alloy was best which gave to the precious metals the greatest resistance to abrasion." This is too absolute a formula. Care must be taken that the proportion of alloy does not exceed certain limits. If it were too great it would become necessary, in order to keep the intrinsic or metallic value of the pieces equal to their nominal value, to increase immoderately their volume and their weight. Experiments made at the Paris mint by Mr. Ruau during a number of years have shown that in a general way the resistance to abrasion of alloys of gold and silver increases with the quantity of copper which they contain. Ruau's experiments have demonstrated the falsity of the ideas entertained on this subject ever since the researches of Cavendish and Hatchett in England in 1798, on the superiority of the fineness of eleven-twelfths. Chevalier's formula should, therefore, be modified thus: "The best alloy is that which, in the higher finenesses, offers the greatest resistance to abrasion." Coins whose legal-tender power is limited contain, frequently, In France and the Latin more alloy than full legal-tender coins. Union divisional silver coins have a fineness of 0.835, while the 5 franc silver pieces have a fineness of 0.900. The law of April 6, 1803, had made no distinction between these coins; they had all a fineness of 0.900, and were all full legal tender. In 1864 and 1865, in order to prevent the exportation of French divisional coins which the premium on silver attracted abroad, the fineness of the pieces of 20 and 50 centimes, and of the 1 and 2 franc pieces was lowered to 0.835, and their legal-tender power was limited to 50 francs, or about \$10.

In England divisional coins are legal tender to the amount of 40 shillings. They ceased to be full legal tender in 1816. The law of 1816, however, maintained them at 11 ounces 2 pennyweights of pure metal in 12 ounces, which has been the English fineness since the year 1357. But that law requires 66 shillings to be stamped from the pound troy instead of 62. In England, therefore, the weight has been lowered instead of the fineness, but the reason has been the same as in

France, viz, to prevent the exportation of the divisional coins.

In the United States divisional coins were full legal tender up to the passage of the act of February 21, 1853, when the half dollars, quarter dollars, dimes, and half dimes (in the ratio of value of 1:14.88 as compared with gold) were made legal tender to the amount of only \$5. Previous to that act they were of the same fineness as the silver dollar and exactly proportioned to it in weight. The act of 1853 lowered the weight of the half dollar from 2064 grains to 192 grains, and that of the quarter dollar, dime, and half dime in proportion, but left their fineness unaffected. At present divisional coins in the United States are legal tender to the amount of \$10 in any one payment.

From mediæval times to the almost universal adoption of the metric system, it was customary to use a special system of weights in the coinage. Under Charlemagne the Roman pound of 327 grams or 5,046.264 grains was replaced by a heavier one whose weight, divided into 12 ounces, is generally stated to have been 408 grams or 6,296.256 grains. According to the most recent investigations it is probable that it contained only 370 grams or 5,709.840 grains, and was, therefore, of

pretty nearly the same weight as the English troy pound, divided into 12 ounces of 20 pennyweights of 24 grains and containing 5,760 grains. The Troy pound was first introduced in England as a mint weight under Henry VIII, while up to that time the Saxon Tower pound containing 5,400 Troy grains had served in that capacity. On the Continent the principal mint weight was not the pound of 12 ounces, but the mark of 8 ounces, which was one half of the commercial pound used in weighing ordinary commodities and called in England the avoirdupois pound. So far as known, the mark, as a silver weight, is first mentioned in English documents of the ninth century. Its local variations were just as great as those of the commercial or trade

pound.
The I

The Dutch troy mark of 246.084 grams or 3,797.568288 grains was one of the heavier of the marks, and must not be confounded with the English troy mark. The Parisian mark was the same as that of Troyes, which afterwards came into general use in France. It contained only 244,753 grams or 3,777.028296 grains. The Salzburg mark weighed something over 256 grams or 3,950.592 grains. The heaviest of the marks was the Vienna mark, containing 280.668 grams (about three-fourths of the English pound troy). The Cologne mark was very extensively used. As early as the thirteenth century it was found, with but slight variations, in the Rhenish commercial cities. An imperial decree of 1559 provided that it should be adopted as the universal mint weight and should contain nineteen-twentieths of a Dutch troy mark or 233.780 grams, equal to 3,607.69296 grains. Local Cologne marks were found to weigh 233.72 and 234.34 grams, equivalent to 3,606.76704 grains and 3,616.33488 grains, respectively; and in the new regulation of the system of Prussian weights the Prussian mark was made to consist of 233.8555 grams or 3,008.858076 grains. The mark, as a gold-assaying weight, was divided into 24 carats of 12 grains, and as a silver-assaying weight into 16 loth of 18 grains. After the introduction of the metric system in France, the kilogram was adopted as a mint weight, and it is the present mint weight of all the other States of the Latin The German Monetary Convention of 1857 made the customs pound (Zollpfund) of 500 grams the mint weight, and it has been continued as such in the coinage legislation of the Empire. In recent Austrian and Hungarian coinage legislation the kilogram is the mint weight; in Russia the common pound; in the United States the English pound troy, and for silver divisional coins the gram as well as the troy grain.

The troy pound weight in use in the United States was obtained from England, and is a duplicate of the original standard fixed by the commission of 1758 and confirmed by that of 1838. It is a brass weight of 5,760 grains. It is kept in a safe at the United States mint in

Philadelphia.

The weight of the coins was usually determined by providing what number of them should be struck from the alloyed mint weight. This was because of the practical difficulty of putting the exact amount of standard or pure metal into the individual coins. The coiner had to be satisfied in the case of the smaller coins, and in earlier times in that of the larger also, with the agreement of the total weight of the pieces with the mint weight. Hence it is that the picking of the heavier coins out of a large number was strictly prohibited, although to no purpose.

In Germany the fineness of gold was expressed in the number of carats and grains, and that of silver of loth and grains fine in a mark

of alloyed metal, gold of 24 carats and silver of 16 loth being considered fine.

In France also gold of 24 carats meant fine gold, and the fineness was expressed in halves, fourths, eighths, etc.; silver of 12 deniers (pence) was fine silver, and a denier was divided into 24 grains. In modern times, in France, Germany, and most other States, the fineness or proportion of pure in standard or alloyed metal is simply expressed in thousandths. England, however, still clings to the old system, in which the fineness of alloyed gold is expressed in carats, 24 earat gold being considered pure; and the fineness of alloyed silver in terms of the troy pound of 12 ounces of 20 pennyweights of 24 grains. But even in England the fineness of gold and silver is not infrequently expressed in thousandths.

Even with the technic appliances and processes of modern times it is not possible to manufacture each individual coin of the absolutely exact weight required, nor the standard metal of the absolutely exact fineness, and hence legislation allows a certain deviation from the legal weight and fineness of the coins. This deviation is called the "remedy" or "tolerance." The tolerance was formerly used as a pretext for the improper diminution of the contents of the coins, and even in very recent times, in France, a profit was made every year by intentionally causing the tolerance to be almost always under. Doubtless the only course justifiable is one in which slight accidental discrepancies in weight or fineness are as apt to run over as under the standard, so that when a large number of coins is placed in the balance, their aggregate weight shall be found to be the exact legal weight. Each bag of coin issued from the mints of the United States contains the full weight called for by law.

The coins of the country in which they are intended to circulate possess an increased utility as compared with bullion, and in most countries where gold or silver is coined on private account, a mint charge to cover the cost of manufacture is imposed. This mint charge, or brassage, as it was formerly called, must not be confounded with seigniorage, which is a profit on coinage made by the Government equal to the difference between the cost of the bullion put in the coin

and its (the coin's) nominal or face value.

As coins are gradually abraded by circulation and lose something of their intrinsic or metallic value, it is in accordance with an enlightened coinage policy that the State should make provision for the retirement of the pieces it has issued when their weight has fallen below the limit of tolerated deficiency. The opinion is steadily gaining ground that the loss of weight thus caused should not be borne by the last holder of the coin but by the State as the representative of the whole people, in whose service the abrasion took place. Thus the German coinage law of 1871 provided that the 10 and 20 mark pieces that had lost more than five one-thousandths of their normal weight should be accepted by the treasuries of the State at their full nominal value; that they should not be reissued, but should be held back for recoinage; also that such abraded coins, if necessary, should be retired from circulation at the expense of the State, and recoined. In Austria-Hungary, also, according to the law of August 2, 1892, the State retires on its own charge all coins which have fallen below the tolerated deficiency of weight. This duty, however, is not imposed on the States of the Latin Union by their monetary convention. As a matter of fact, France retires on account of the State such coins as are no longer fit for circulation, through the agency of the Bank of France. In England, gold

coins whose weight has sunk below the tolerated deficiency are defaced when they come to the bank, and the last owner bears the loss. are, however, withdrawals from time to time, on account of the State, at the nominal value of the coins, as in 1891, of all the gold coins stamped during the reign of Queen Victoria.

In the United States it is provided that any gold coins of the country which are reduced in weight by natural abrasion not more than one-half of 1 per centum below the standard of weight prescribed by law, after a circulation of twenty years, and at a ratable proportion for any period less than twenty years, shall be received at their nominal value by the United States Treasury and its offices, under such regulations as the Secretary of the Treasury may prescribe against fraudulent abrasion. or other practices; and that any gold coins in the Treasury of the United States reduced in weight below this limit of abrasion shall be recoined. The loss from abrasion of silver coins falls on the Government.

The retarding of the abrasion of coins is used as the principal argument for alloying the gold and silver to be minted with base metal. Many experts claim, however, that while fine gold and silver lose the sharp outlines of the stamp more rapidly than when alloyed, on account of their greater softness when in the pure state, they do not lose more in weight; and that when alloyed they suffer greater wear and tear than when pure, from chemical causes. It is certain that the intentional addition of base metal to the pure in gold and silver coins was originally an abuse and made to counterfeit coins of pure metal. A great many gold coins, as, for instance, the Rhenish and Westphalian, con-

tained, besides copper, a certain amount of silver.

It is of the essence of every real coin that its genuineness should be attested by the Government. The Greek city States of Asia Minor were. so far as known, the first to establish mints as State institutions, and in this they were soon imitated by the larger State of Lydia. In the Persian Empire the coinage of gold was reserved exclusively to the King, while silver might be coined by satraps, dependent dynasties, and cities. In Rome, after 269 B.C., the coinage was in the hands of officials specially appointed. In the later period of the Republic the right of coinage was exercised both by the Senate and by certain generals; by the latter at first only in the districts under their military rule, but after Cæsar's time, in the cities also. In the time of Augustus, however, the Senate entirely lost the prerogative of the coinage of gold and silver and retained only the right to coin copper. In the later period of the Empire the right of coinage seems to have been frequently granted to private persons. During the Middle Ages the principle obtained that "all coins in the Roman Empire are the coins of a Roman King; and he who would have them, whether layman or cleric, must obtain them from the Roman Empire and the Roman King." The dukes of the German tribes seem, however, to have exercised the right of coinage without any special royal grant. Such grants were made in the early Middle Ages to the founders of religious houses, and beginning with the eleventh century to temporal magnates, and with the thirteenth to cities also. There thus came to be in Germany a great variety of coins, not only as to the imprint they bore, but also as to the number stamped from the mint unit of weight, and the right of supervision of all coinages which continued in the State was not sufficient to cure the evils resulting from this variety. The right of coinage was also in the hands of citizens of the large towns, who made a profit from the seigniorage under a contract entered into by them with the King.

In France also the right of coinage was possessed by many in the

thirteenth century, especially by barons and bishops. In the time of Louis IX there were over eighty who had been granted the coinage prerogative by the King. About this time efforts began to be made, with some success, to strengthen the royal power in coinage matters and to concentrate the coinage in him. Under Louis X the question was agitated of depriving all barons and prelates of the right of coinage, but the agitation resulted only in the drawing up of a list of those entitled to the privilege (twenty-nine) and in stricter provisions regarding the number of pieces to be stamped from the mint unit of weight and the imprint of the coins to be issued by them. Under the succeeding kings the crown purchased from the barons their right of coinage, and as the great vassal estates were gradually added to the royal domain, the unity of the coinage prerogative was reached in France by the end of the fifteenth century.

In England, after the conquest, the coinage prerogative was seriously endangered under Stephen of Blois, who granted the coining privilege to a great many barons, while others simply assumed it. Grants of the right were also made under John. During the period following, the influence of Parliament contributed greatly to the maintenance of the

unity of the coinage prerogative.

The real duty of the Government in guaranteeing the weight and fineness of the coins is evidently to insure, in the interest of the whole community, the manufacture of full-value coins. As a matter of fact, however, the financial interests of states or princes came in conflict with this requirement, and predominated until comparatively very recent times. Princes too frequently debased the coins of their domains, to their own profit, but to the ruin of the people. But whenever the coinage was debased an effort was made to preserve their original This effort was made in order to realize a profit equal nominal value. to the difference between the nominal value and the metallic or intrinsic value of the coins, and those possessed of the coinage prerogative in all subsequent ages have been so powerless to resist this temptation that it has been seriously questioned whether coinage by the state has not, everything considered, been productive of more mischief than of good, and whether the Chinese, who have used the precious metals by weight only, have not acted more wisely than we. The continued diminution of the contents of the specie thaler in Germany led, in 1770, to the introduction of the bar standard by the Bank of Hamburg, and the idea of its introduction was first suggested by the example of the Chinese which was deemed worthy of imitation. In the Middle Ages, also, large payments were made by weight in gold or silver marks, especially before the more general diffusion of the gold coins stamped in imitation of the Florentine gulden, notwithstanding such payments were frequently prohibited in the interests of the mints.

The profit from coinage was realized in two ways, principally, and these were sometimes employed jointly, firstly, by an artificial depression of the commercial value of the bar metal by means of limitations of trade in the same, resulting in a purchase monopoly in favor of the mints, while the coins stamped by these institutions were made to serve as far as possible as the exclusive instruments of purchase and payment; secondly, by the adhesion to a definite ideal unit of value or one represented by a real coin and by endeavoring to create an enhanced credit value of the pieces by measuring the under-value coins by that

unit.

The first method constitutes the normal manner of collecting revenue by means of the seigniorage. When, for instance, the French aignel of 1321, $59\frac{1}{6}$ pieces of which of the nominal value of 1 livre were stamped from a mark of fine gold, while the legal price of the mark was only 58 livres, the coinage charge and seigniorage amounted to $1\frac{1}{6}$ livres, or nearly 2 per cent. In principle this is the same course now pursued by the French mint, inasmuch as it pays only 3,437 francs for a kilogram of gold, while it coins 3,444.44 francs out of it; but the difference—7.44 francs—amounts to only about 2.2 per thousand of the latter sum and represents only the actual cost of coinage. But during the Middle Ages a seigniorage of 2 per cent (inclusive of the cost of coinage, which was then much higher than an present) was considered low, and in the case of gold coins it sometimes amounted to 5 and even 10 per cent.

In the case of silver pieces, in the period of greatest debasement of the coins in France the difference between the number of coins required by the law to be stamped out of a mark of pure silver and the legal price to be paid for a mark in such coins amounted sometimes to 50 per cent of the former sum. So large a seigniorage could of course be maintained only for a short time and by peculiar operations, but a coinage profit of 10 to 15 per cent might still be realized in the fourteenth and fifteenth centuries by a skillful use of the monopoly of the purchase of silver and of coinage even in the manufacture of the larger silver coins. The principal measures employed to attain this end were the following: If gold or silver mines were worked in the mint domain the right of preemption of the pure metal obtained therefrom, even from the mines owned by private parties, was claimed by the mint, and had to be sold to it at a fixed price. The mint then stamped from a mark of gold or silver a larger sum than it had paid for the same. Where the mint domain had no mines the mint lord endeavored to make a profit from the coinage by providing that all imported gold and silver, whether in the form of bars, coin, or old material, should first be sold to the mint or to certain bullion brokers, who should purchase it only at the legal price. The circulation of foreign coins was strictly prohibited; they were required to be exchanged for coins of the mint domain and to pay the seigniorage. In no market could business be transacted except with the coins stamped by the power that controlled the price of the precious metals, and foreign merchants were, therefore, obliged to have their money changed, with a deduction for the seigniorage.

This seigniorage was in reality a tax on trade of a peculiar kind, not like the excise or customs duties on commodities, but on the media of circulation. It was permissible to use bar silver as a purchase medium on condition that a duty equal to the seigniorage was paid for the privilege. The compulsory exchange of coins referred to above and the collection of seigniorage connected therewith was also required when there was less reason for it than in ordinary trade. Thus it was required in Germany whenever there was a transfer of the ownership of the coinage privilege, but frequently without such transfer, simply to exploit that privilege. To further insure the monopoly value of the coins, Goldsmiths might not the goldsmith industry was strictly regulated. purchase more gold or silver than they needed in their business, might not pay for the precious metals more than the price legally fixed, nor procure them by the melting down of the coins. Sometimes, in order that coinage material might flow to the mints in greater quantities, goldsmiths were strictly forbidden to manufacture larger articles of the precious metals. Thus by an ordinance of 1310 they were required to make no gold or silver plate during the space of a year, without the permission of the King, and according to an order of 1322

only silver plate not over 1 mark in weight. Church articles were

excepted from this order.

The import and export of the precious metals and of coins in the Middle Ages was also regulated more with reference to the coinage privilege than in accordance with the mercantilistic views that prevailed in some places. Foreign coins could be imported only to be melted down. The export of bullion, as well as of gold and silver plate, was greatly limited by the French ordinances. On the other hand, the exportation of coins of a certain kind, especially deteriorated

ones, was expressly allowed.

The progressive increase of money as a medium of exchange favored the employment of the second method of utilizing or exploiting the coinage privilege, which consisted mainly in this, that existing debts payable in money might be discharged by virtue of legal enactment in certain definite coins at the nominal value ascribed to such coins. These coins, even when not intrinsically full value, were therefore given full legal-payment power, not only to the public treasury but to everyone who had a money claim against another. The debasement of the coinage was to mediæval princes analogous to the financial resource possessed by modern states in paper money; but so long as trade by money and public credit was still in a low stage it was more difficult to keep coins 20 to 30 per cent above their intrinsic value than it is

to-day to keep at par intrinsically almost worthless paper.

The depreciation of the coinage may be most plainly followed in France. Philip the Fair began his debasement of the coin formally as a credit operation by making a solemn promise, in which he had the support of the Queen, that he would subsequently redeem the light coins at their full nominal value, but this was never done. As a general rule, however, the debasement of the coin was defended on the false principle that the livre was an ideal unit of value represented by the coins, independently of their intrinsic value. Hence several ordinances provided that all accounts should be kept only in livres—that is, that the unit of account should be 20 sols, or 240 deniers or pence, and not in quantities by weight of gold or silver or in any definite kind of coins. The undervalue coins were thus given a definite nominal value and had to-be received by creditors at such value. Wages and certain retail prices probably did not always immediately rise in proportion to the debasement of the coins, but in wholesale trade a rise in prices could not be prevented by any prohibitions. The effect of the debasement of the great mass of coins that circulated in ordinary trade was, in the main, the same as is manifested in our days by irredeemable paper with forced currency, viz, a premium on the precious metals, especially on gold coins and the standard silver coins. When the coins had been lessened in value by a series of debasements to the very lowest point a sudden return was made to heavier pieces; the existing light coins were withdrawn or simply lowered to a value equal to their metallic value. At the same time, however, it was usual to issue an ordinance to regulate the payment of debts, but no such ordinance was issued when the coins were debased. The payment of debts in heavy coins which had been contracted in light ones was thus prevented; permanent incomes and, in general, all sums which had to be paid for several successive years were always required to be made in the legal money of the time of payment, at its nominal value. Another period of confusion in the coinage which resembled that of the fourteenth century occurred in France in the last years of the reign of Louis XIV.

The idea that the coinage prerogative should not only be productive of no profit but should even be a source of expense to the State was far from occurring to the minds of men in those distant days. This higher view of the right of coinage was first expressed in England, where, in 1666, the gratuitous coinage of the gold and silver brought to the mint was introduced, and where no compensation was asked by the State for the expense it had to undergo for the coinage.

A retirement and recoinage of the abraded coins at the full legal weight at the expense of the State was effected in England in the years 1696-1698. The gratuitous coinage of gold was restored in

the United States by the law of January 14, 1875.

The economic effects of the debasement or degradation of the coins may be inferred from the consideration that, the value of all property being estimated and the stipulations in almost all contracts for its purchase, sale, or hire being made in money or coins, no change can take place in the value of such money or coins without subverting these estimates and contracts and enriching the debtor portion of soci-

ety at the expense of the creditor portion, or vice versa.

"The necessities or extravagance of government," says McCulloch, "forced them to borrow, and to relieve themselves of the incumbrances thus contracted they, in the past, almost universally had recourse to the disgraceful expedient of degrading the coin; that is, of cheating those who lent them money to the extent of the degradation, and of enabling every other debtor in their dominions to do the same. Had the names of the coins been changed when the quantity of metal contained in them was diminished there would have been no room for misapprehension. But although the weight of the coins was undergoing perpetual and their purity occasional reductions, their ancient denominations were almost uniformly preserved, and the people who saw the same names still remaining after the substance was diminished, who saw coins of a certain weight and fineness circulate under the names of florins, livres, dollars, and pounds, and who saw them continue to circulate as such after both their weight and the degree of their fineness had been lessened began to think that they derived their value more from the stamp affixed to them by authority of government than from the quantity of the precious metals they contained.

Originally the coins of all countries seem to have had the same denomination as the weights commonly used in them, and contained the exact quantities of the precious metals indicated by their name. Thus the talent was a weight used in the earliest period by the Greeks, the as, or pondo, by the Romans, the livre by the French, and the pound by the English; and the coins originally in use in Greece, Italy, France, and England bore the same names and weighed precisely a talent, a pondo, a livre, and a pound. The standard has not, however, been preserved inviolate either in modern or ancient times. It has been less degraded in England than in any other country of Europe, but even there the quantity of silver in a pound sterling is less than the third part of a pound weight," the quantity it contained in 1300, the year of the first debasement undergone by the silver coinage of England, when Edward I reduced the amount of metal in the coins by $1\frac{1}{3}$ per cent, or, in other words, when 20 shillings and 3 pence were coined out of the Tower pound instead of 20 shillings, as previously. was the beginning of the series of alterations which were carried out in England during the succeeding three centuries, and which terminated only in 1600, when the pound troy of silver was coined into 62 shillings. The period extending from 1543 to 1552 was a time when the fineness of the metal was greatly interfered with. The old proportion of 11 ounces 2 pennyweights of metal to 18 pennyweights of alloy was altered to 10 ounces of metal per pound, then to 6 ounces, or one-half, 4 ounces, or one-third, and finally, in 1551, to 3 ounces of pure metal and 9 ounces of alloy.

Various proposals to depreciate the silver currency have been made

since 1600. Says Professor Bastable:

The most remarkable of the unsuccessful schemes for debasing the standard was that of Loundes, which was advanced in 1695, when the discussions preparatory to the recoinage of 1696 were being carried on. Loundes's plan was to coin the pound troy of standard silver into 77 shillings and 6 pence, thus debasing it 25 per cent. He was resisted by Locke, who, in his Further Considerations Concerning Raising the Value of Money, contributed materially to the development of monetary theory, and the recoinage was mainly in consequence of his efforts, in combination with those of Newton and Montague, based on thoroughly sound principles.

A survey of the condition of the coinage in the various countries of the world at the present day shows that the great economic disturbances and evils, which once had their origin in the debasement of the coins, no longer exist in civilized States, but at the same time reveals the fact that there is in many of them a circulation of undervalue coins—that is, of coins whose metallic is inferior to their nominal value—greater probably, relatively speaking, than in any previous age. Think only of the vast amount of intrinsically depreciated full legaltender silver coins in the Latin Union, in the United States, in Germany, Austria-Hungary, and Holland. That these undervalue, full legal tender silver coins circulate as they do, and in the quantities that they do, is evidence of the enormous increase of public credit, which finds a still more striking illustration in the fact that countries like France have been able to keep even irredeemable paper money, with forced currency, almost at its nominal value, and that others are able to put paper money without any special covering, or an insufficient covering in specie, in circulation, and to keep it of equal value with their metallic money. The so-called Gresham law, that good money and bad money can not circulate side by side, but that the bad drives out the good, does not, therefore, apply where the lack of full intrinsic value of the one kind of money is supplied by a universally acknowledged credit value.

HISTORY OF MODERN COINAGE.

The history of modern as distinguished from ancient coinage may be said to begin with the reformation of the coinage of Rome under Constantine, who introduced the solidus $=\frac{1}{12}$ of a pound =4.55 grams =70.2156 grains of gold, of the value of \$3.02, as the principal coin. Besides this, he provided for a silver coin of the same weight, which was to have the value of $\frac{1}{1000}$ of a gold pound. After Julian's time, however, the principal piece coined was a silver one of the weight of $\frac{1}{14}$ of a pound, called the siliqua, which was given an increased nominal value, since 24 of them were reckoned equal to a gold solidus.

In the Frankish Empire, under the Merovingians, the gold solidus was the basis of the coinage system, which was then in a rather undeveloped state; yet its metallic contents sank in the second half of the sixth century to $\frac{1}{34}$ of a pound. The silver pence of the Franks had their origin probably in the siliqua, which had become continually lighter. Forty of them were reckoned equal to the gold solidus; but there were also old heavy pence, 12 of which constituted a solidus. In the eighth century gold became rarer and rarer, and a gradual transition to the silver standard was made by the substitution for the gold

solidus of a silver unit of account, also called a solidus, divided into 12 pence. This silver solidus subsequently received the name of shilling in England and Germany. At first 300 pence were coined out of a pound of silver; but under Pepin it was provided that 22 solidi of 12 pence each should be stamped out of a pound of silver, and that the

coiner should retain 1 solidus out of the 22 as seigniorage.

Pepin, however, soon adopted a heavier standard, the 20-shilling standard, which was further improved under Charlemagne by his making the basis of the coinage a still heavier pound, containing probably 370 grams, or 5,709.840 grains, the mint weight, and providing that 240 pence, or 20 solidi of account, should be stamped out of it. Of Charlemagne's system, Professor Sherwood says that it was the direct successor of an old Roman system of coinage which then prevailed. Its basis was a pound of silver divided into 240 pence. Charlemagne rather debased the Roman standard—that is, he made the pound of silver about one-tenth less than the old Roman pound of silver had been, but he kept the system of 240 pence in the pound, and this system was introduced with more or less success into what is now France and what is now Germany.

Charlemagne's system has remained, as to form, up to the most recent period, the basis not only of the countries of his Empire but also of England. Indeed, England is the country, as already remarked, in which the pound of 20 shillings and 240 pence has lost least in intrinsic value. Originally, indeed, it was not the Carlovingian but the Saxon pound, lighter by about one-sixteenth. But even the English unit of account could not escape the fate of gradual debasement; the pound weight became a pound tale—i. e., a sum of 240 pence in the coins then existing—and the latter were diminished several times in weight after the year 1300, while their fineness still remained a high

one $(11_{\frac{1}{10}}:12)$.

After the time of Henry VIII came a period of coinage debasement which culminated in 1551. But a thorough reform of the coinage was effected in 1560 under Elizabeth. The first large coinages of gold in England were made under James I, and from the time of his accession until the death of William III in 1701, they amounted to £15,764,357. Silver, however, was still the principal standard metal, and in 1695 another attempt was made to reform the currency by the recoinage of the silver pieces, most of which had been abraded and clipped. While this attempt was making, the coinage of gold, with an exception in favor of the African Company, was prohibited. The new full weight silver coins were soon exported, and the reduction of the current value of the guinea in 1717, on the advice of Newton, did not suffice to arrest the outflow of silver. In 1774 the gold standard in England achieved an almost complete victory by the act of 14 George III, cap. 42, which provided that silver coins not of full weight (and there were no others then in circulation) need not be accepted in payments of more than £25 except by weight (standard silver being 62 pence per ounce). This provision was renewed several times and made permanent in 1798. As early as 1797, however, the coinage of silver was suspended, and the single gold standard, therefore, in principle, introduced. Its normal operation was, however, prevented by the existence at the time of a paper currency. The law of the 22d of July, 1816, which established the present English monetary system, held fast to the gold standard and introduced it for the first time in history in all its strictness, since it provided that silver pieces should be used only as divisional coin, with a legal-tender power limited to 40 shillings.

While England had the silver standard the largest silver coin actually stamped was the crown, of the value of 5 shillings, with a weight of 464.516 grains and a fineness of 0.925, or a fine weight of 429.677 grains. The guinea, which was first coined under Charles II, had a variable value, rising from 20 to 22 shillings and more. It was subsequently rated at 21 shillings. Its weight was 129.432 grains and, with a fineness of eleven-twelfths, it had a fine weight of 118.651 grains. The law of 1816 substituted for it the sovereign of 20 shillings, which, therefore, represents the old silver pound in gold and weighs $123\frac{1}{173}$ grains, with a fine weight of $113\frac{1}{6\frac{1}{23}}$ grains. The silver coins, being divisional coins,

were lessened in weight in the proportion of 62 to 64.

In France the livre of 12 sols, or sous or 240 deniers or pence, remained the unit of account up to the time of the French Revolution, but gradually declined in value to about 19 cents American money—that is, to one eighty-third of its original value. The denier at last could not be coined at all; the liard, equal to one-fourth sou, was the smallest cop-After the violent usurpations of Louis XIV and the John Law catastrophe, the coinage system of France from 1726 to the revolution was in a rather stable condition. The principal French silver coin from 1726 to 1793 was the new ecu of 6 livres, weighing 29.488 grams, or 455.058816 grains 0.916% fine, with a fine weight of 27.031 grams, or 417.142392 grains. The livre in this écu corresponds almost exactly to the franc of the new French system, which was given its final form by the law of March 28, 1803. By the provisions of that law the franc was to contain 5 grams of standard silver. The ratio of 1 to 151 between gold and silver was made the basis for the determination of the weight of the gold coins, and at this ratio the legal weight of the 20-franc gold piece was 6.4516 grams, and its fine weight 5.8065 grams, or 89.6059080 grains.

The United States dollar had its origin in the Spanish piaster of 8 reals of Mexican silver, which, in turn, was patterned after the Joachimsthaler. There was properly no coinage in the United States during the colonial period. Maryland had a mint at one time, and one or two of the other States, but they practically amounted to nothing. sachusetts had one or two issues; but the coins, so far as the United States had coins before the Revolution, were English coins to some extent, and later, Spanish coins that were circulated by Spain in the South American countries and traveled up to the United States. early colonial period the different colonies used all sorts of substitutes for coin-for instance, Indian wampum and bullets in Massachusetts, skins and furs in New York, tobacco in Maryland and Virginia. The unit of account was the Spanish milled dollar or piece of eight (pieza Up to about 1775, however, accounts were kept in pounds, shillings, and pence—a pound consisting then, as now, of 20 shillings, and a shilling of 12 pence "colonial" or "pound" currency, 1333 pounds of which were equal to 100 pounds sterling. Four pounds "colonial currency" were, therefore, equal to 3 pounds sterling. This par of the colonial and the sterling pound was established by the fact that the Spanish piaster, or milled dollar, was worth in the colonies 6 shillings, while in England it was valued at only 42 shillings. Calculated in accordance with the legal weight and fineness of the Spanish silver piaster (up to 1772, 8½ pieces from the gross Castilian marco 0.909722 fine), the "pound currency" was a quantity of \$2.069966 grams, or 1,296.503715 grains of fine silver.

Besides the Spanish milled dollar, there was a variety of other foreign coins in circulation, but in keeping accounts the pound and the shilling

come next in order of common usage to the dollar. The method by which the colonial composite system of current coins was regulated consisted in coinage tariffs, so much in vogue in early European monetary history. Such a tariff, issued in 1750, valued the ounce of silver at 6 shillings 8 pence and the Spanish milled dollar at 6 shillings, the guinea at 28 shillings, and the English crown at 6 shillings 8 pence. In this tariff all foreign coins were valued in proportion to the Spanish piece of eight, it being considered that many and great inconveniences would arise in case any coined silver or gold, or English half pence and farthings, should pass current at any higher rate than in just proportion to that piece. The shilling was stamped by some of the colonies, and constituted a large part of the money in circulation. It, however, varied greatly in value in the different colonies. Thus the Spanish dollar equaled 5 shillings in Georgia; 8 shillings in North Carolina and New York; 6 shillings in Virginia, Connecticut, New Hampshire, Massachusetts, and Rhode Island; 7 shillings 6 pence in Maryland, Delaware, Pennsylvania, and New Jersey; 32 shillings 6 pence in South Carolina. This accounts for the present reckoning of 12½ cents to a "shilling" in New York, Ohio, etc., and of 16¾ cents in New England and Virginia. The Spanish dollar, with which this comparison was made, was itself not unfrequently below the legal weight, and therefore varied in value If the pieces mentioned in the coinage tariff of 1776 were of full weight, the ratio there established was the English ratio of 1 to 15.21. ratio for bullion was not materially different.

The tariff of 1776 had been in operation six years when the Colonies began to feel keenly the difficulties caused by the variety of coins constituting their metallic circulating medium, as well as its injurious effects on business and on the methods of keeping accounts. The need of a special American coinage was frequently expressed, and in 1782 (15th of January) Robert Morris, the superintendent of finance, at the request of a committee of the Congress of the Confederation, submitted a scheme for a national coinage and for the establishment of an American mint, which met with its approval. Jefferson, like Morris, recommended the decimal system, but advocated the dollar as the unit. The proposals of Morris and Jefferson were, however, not carried into effect, and the matter remained in this unsettled state until May 13, 1785, when the grand committee on the money unit made its report. The report of the grand committee on the money unit contended that the exchange in the United States should not be more than 15 grains of silver for 1 of gold; that the charge for coinage should be 21 per cent for gold and a little over 3 per cent for silver; that the unit should be a dollar of 362 grains of pure silver with a multiple gold piece of 5 dollars and decimal aliquot parts. In 1786 the Congress of the Confederation chose as the monetary unit of the United States the dollar of 375.64 grains of pure silver. This unit had its origin in the Spanish piaster or milled dollar, which constituted the basis of the metallic circulation of the English colonies in America. It was never coined, there being at that time no mint in the United States.

The act of April 2, 1792, established the first monetary system of the United States. The bases of the system were: The gold dollar, containing 24.75 grains of pure gold, and stamped in pieces of \$10, \$5, and \$2½, denominated, respectively, eagles, half eagles, and quarter eagles; the silver dollar, containing 371.25 grains of pure silver. A mint was established. The coinage was unlimited and there was no mint charge. The ratio of gold to silver in coinage was 1:15. Both gold and silver were legal tender. The standard was double. The act of 1792 under-

valued gold, which was therefore exported. The act of June 28, 1834. was passed to remedy this by changing the mint ratio between the metals to 1:16.002. This latter act fixed the weight of the gold dollar at 25.8 grains, but lowered the fineness from 0.9163 to 0.899225. fine weight of the gold dollar was thus reduced to 23.2 grains. act of 1834 undervalued silver as that of 1792 had undervalued gold, and silver was attracted to Europe by the more favorable ratio of 1:15½. The act of January 18, 1837, was passed to make the fineness of the gold and silver coins uniform. The legal weight of the gold dollar was fixed at 25.8 grains, and its fine weight at 23.22 grains. The fineness was therefore changed by this act to 0.900 and the ratio to 1:15.988+. Silver continued to be exported. The act of February 21, 1853, reduced the weight of the silver coins of a denomination less than \$1, which the acts of 1792, 1834, and 1837 had made exactly proportional to the weight of the silver dollar, and provided that they should be legal tender to the amount of only \$5. Under the acts of 1792, 1834, and 1837 they had been full legal tender. By the act of 1853 the legal weight of the half dollar was reduced to 192 grains, and that of the other fractions of the dollar in proportion. The coinage of the fractional parts of the dollar was reserved to the Government.

The act of February 12, 1873, provided that the unit of value of the United States should be the gold dollar of the standard weight of 25.8 grains, and that there should be coined besides the following gold coins: A quarter eagle, or 2½-dollar piece; a 3-dollar piece; a half eagle, or 5 dollar piece; an eagle, or 10 dollar piece, and a double eagle, or 20 dollar piece, all of a standard weight proportional to that of the dollar piece. These coins were made legal tender in all payments at their nominal value when not below the standard weight and limit of tolerance provided in the act for the single piece, and when reduced in weight they should be legal tender at a valuation in proportion to their actual weight. The silver coins provided for by the act were a trade dollar, a half dollar, or 50-cent piece, a quarter dollar, and a 10-cent piece, the weight of the trade dollar to be 420 grains troy; the half dollar, 121 grams; the quarter dollar and the dime, respectively, onehalf and one fifth of the weight of the half dollar. The silver coins were made legal tender at their nominal value for any amount not exceeding \$5 in any one payment. The charge for converting standard gold bullion into coin was fixed at one fifth of 1 per cent (abolished by the act of January 14, 1875). Owners of silver bullion were allowed to deposit it at any mint of the United States to be formed into bars or into trade dollars, and no deposit of silver for other coinage was to be received. Section 2 of the joint resolution of July 22, 1876, recited that the trade dollar should not thereafter be legal tender and that the Secretary of the Treasury should be authorized to limit the coinage of the same to an amount sufficient to meet the export demand for it.

The act of March 3, 1887, retired the trade dollar and prohibited its coinage. That of September 26, 1890, discontinued the coinage of the 1 dollar and 3 dollar gold pieces. The act of February 28, 1878, directed the coinage of silver dollars of the weight of 412½ grains troy, of standard silver, as provided in the act of January 18, 1837, and that such coins, with all silver dollars theretofore coined, should be legal tender at their nominal value for all debts and dues, public and private, except where otherwise expressly stipulated in the contract. The Secretary of the Treasury was authorized and directed by the first section of the act to purchase from time to time silver bullion at the market price thereof, not less than \$2,000,000 worth nor more than \$4,000,000 worth per

month, and to cause the same to be coined monthly, as fast as purchased, into such dollars. A subsequent act, that of July 14, 1890, enacted that the Secretary of the Treasury should purchase silver bullion to the aggregate amount of 4,590,000 ounces, or so much thereof as might be offered, each month, at the market price thereof, not exceeding \$1 for 371.25 grains of pure silver, and to issue in payment thereof Treasury notes of the United States, such notes to be redeemable by the Government, on demand, in coin, and to be legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract. The act directed the Secretary of the Treasury to coin each month 2,000,000 ounces of the silver bullion purchased under the provisions of the act into standard silver dollars until the 1st day of July, 1891, and thereafter as much as might be necessary, to provide for the redemption of the Treasury notes issued under the act. The purchasing clause of the act of July 14, 1890, was repealed by the act of November 1, 1893. The act of June 9, 1879, made the subsidiary silver coins of the United States legal tender to the amount of \$10. The minor coins are legal tender to the amount of 25 cents.

An account of the monetary systems of the principal countries of the

world will be found at the end of this volume.

FROM MINE TO MINT.

By D. K. TUTTLE, Ph. D., Melter and refiner of the United States Mint at Philadelphia.

The great increase in the production of gold in recent years is not attributable alone to the discovery or opening of new fields. It is largely due to the use of better business methods in the working of time-honored processes, but more largely to the introduction of new means of extraction, which, whether worked alone or in combination with the old, make it possible to treat with profit immense quantities of lowgrade ores in known deposits or of so-called refractory ores which have hitherto defied profitable treatment.

If space permitted, it would be interesting to take a glance at the whole field of gold getting, but it is hoped that some notes on the later and perhaps the coming

methods of extraction may prove useful.

It is likely that the stamp mill and amalgamator process will survive as long as we have free milling ores. But the day of letting rich tailings go to waste has passed or is rapidly passing away.

The Robinson mine in South Africa furnishes an admirable illustration of what

modern methods can accomplish in supplementing the stamp mill.

In 1893, 94,842 tons of ore were worked—first by the familiar method of stamping and amalgamation. The yield from the stamps was \$1,885,583. The tailings instead of being allowed to go to waste were passed over Frue vanners, by which sulphurets to the amount of 2,714 tons were obtained. These concentrates were roasted, treated by chlorination, and yielded \$219,514.

The tailings from the concentrators, amounting to 55,200 tons, were passed on to the cyanide works, where gold to the amount of \$289,722 was recovered. A statement

of these returns would show:

	Per ton.
From mill From chlorination From cyanide. Total	\$19. 88 2. 32 3. 05 25. 25

It will be seen that more than 20 per cent of the returns came from the tailings treated by modern processes, and that these added 27 per cent to the output from the stamps. These results should be very suggestive to mine owners.

It would be a platitude to say to any intelligent mining man that no one process is suited to all ores; but it has not been so well understood that no single process is likely to afford the largest possible returns from any one ore.

The concentrates in the case of the Robinson mine were collected at very low cost while the tailings were passing from the stamps to what would have been the dump. Yet they yielded \$80.88 per ton by chlorination. The tailings from the Frue vanners cost nothing for crushing, yet they yielded more per ton than some orcs profitably treated in this country.

The chlorination process has found its way into quite extensive use in the United States, and much more may be expected from it when, as is hoped, water power expended in the electrolytic decomposition of common salt for the production of

chlorine may dispense with the transportation of chemicals to remote regions. This seems to be one of the possibilities of the future.

The limitations of the cyanide process are beginning to be understood, and its possibilities will become more apparent as this knowledge is extended. Its failures are what might have been expected with the experience of to-day. That it has a brilsuited to but a limited class of ores, yet these are plentiful. The ores of the Mercur mine in Utah would be valueless for treatment by any other known process. It is best suited for silicious or limestone ores, in which the gold is finely divided. It will make a foir extraction from participarts in which the poldies has not become will make a fair extraction from pyritic ores in which exidation has not begun. It is suited to old tailings weathered and leached by rains, and to new tailings where the leaching is not made too slow by slimes. Any difficulties here are likely to be mechanical ones.

It is not suited to ores carrying coarse gold, as the time required for solution is too long. It has not been successful with ores carrying copper, which seems to have a destructive action on the cyanide solution. Partially oxidized pyritic ores or tailings must be rich enough to pay for a preliminary alkaline leaching.

A comparatively simple chemical examination will determine the treatment best suited for any gold-bearing material, and many an expensive mistake has been made by subjecting a valuable ore to a treatment admirably adapted to some other and quite different mineral deposit.

It is now fully understood and appreciated that oxygen enters as a necessary ele-

ment in the reaction by which gold is dissolved by potassium cyanide.

Efforts are being made to supplement the cyanide solution with oxidizing chemicals, but while much may be loped from experiment in this direction there is as yet no assured success to note.

PARTING AND REFINING PROCESSES.

Gold and silver are not found native in a state of purity. Indeed, they seem to "hunt in couples." Our California nuggets contain, on an average, about 88 per cent gold, the balance being chiefly silver. Native silver has been found more nearly approaching purity; but even this contains enough gold to pay for parting. But by far the largest source of silver is the lead and copper ores of the West, in which it occurs accompanied by gold, in small percentage it is true, but very important in value.

The lead ores are smelted to "base bullion," in which the gold and silver are caught. The lead smelter afterwards carries the concentrating process up to the point of doré bars, which are silver carrying gold as its chief impurity. These bars

go to the refinery for parting.

The copper minerals of Montana, Arizona, etc., carry silver and gold, and the electrolytic process of refining the crude copper made from these ores is now an enormous industry. In this process the solution and current are so regulated that only pure copper passes over and is deposited on the cathode, while the original plate—the anode—is disintegrated and the impurities fall to the bottom of the tank as a mud, technically known as "slimes." This mud is a veritable drag net of nearly all the impurities known to the metallurgist, containing, besides gold and silver, notably copper, bismuth, antimony, arsenic, lead, sulphur, selenium, and tellurium. After a more or less successful purification in the copper works, the resulting bullion is subjected to one of the parting and refining processes described below.

Some gold ores are associated with platinum and platiniridium. Iridosmine is rather abundant in the auriferous beach sands of northern California. Dentists' scrap again contains platinum, tin, and copper. Jewelers' bars, resulting from the melting down of old jewelry, watch cases, etc. (filled and solid), contain nearly all

the metals used in the arts.

It will thus be seen that the material to be treated is of the most heterogeneous description and not infrequently special methods have to be adopted. Thus, iridosmine is separated from gold by alloying the latter with sufficient silver to so diminish the specific gravity of the molten mass that the heavy iridosmine grains will settle to the bottom of the crucible. The silver and gold are then carefully poured off and parted by acids, as hereafter described.

METHODS OF PARTING.

Three general methods are in use for parting gold and silver, known as the "nitricacid," the "sulphuric-acid," and the "electrolytic" process, respectively. The latter is in use in a few private plants, where it gives satisfaction, but it seems to be better adapted to large smelting works, where argentiferous lead is purified, than to Government refineries.

The electrolytic process is said to give satisfactory results only when the bullion to be parted has been refined in a cupel furnace until it contains not over 2 per cent of impurities (lead, copper, bismuth, etc.). None of our mints or assay offices can easily be provided with facilities for such wholesale capelling operations, and the process has therefore been confined, as stated, to lead-smelting plants. It yields silver of exceptional purity (0.999½), and the estimated output of the few concerns using it is some 10,000,000 ounces fine silver per annum. As it is an interesting process from a scientific as well as industrial point of view, a short description may not be amiss before proceeding to deal with the methods in use at the Government institutions.

ELECTROLYTIC PARTING AND REFINING.

The silver carrying gold and a small percentage of impurities is east from the cupel into flat plates about 18 inches long, 10 inches wide, and one-half inch thick,

weighing about 30 pounds each.

These plates form the anodes, and are suspended by three lugs cast on one of the long sides. They, therefore, hang with the greater length horizontal. Tanks of California redwood planks are very carefully made, 11 feet long by 2 feet wide and 20 inches deep (inside measure). Six partitions are placed crosswise in a tank so as to give seven separate cells or "baths." In each cell three plates or anodes are suspended, alternating with four cathodes. These latter are thin-rolled sheets of pure silver 13 by 20 by $\frac{1}{3^2}$ inches thick, weighing 50 troy ounces each. The distance between anode and cathode is about $1\frac{3}{4}$ inches.

Both anodes and cathodes are suspended by conducting wires from copper rods resting on the edges of the tank. Two copper bars traverse these top edges and are connected with the respective poles of the dynamo. The cross rods supporting the plates rest on these bars, but one end of the rod carrying an anode is insulated by a rubber band, while the opposite end of the red carrying a cathode is insulated in like manner. The current must therefore pass from one conductor to the anodes, through the solution and the cathodes, to the return conductor. It will be seen that the current is divided between these seven cells and that we have 21 anodes connected in multiple with 28 cathodes.

A model plant consists of fourteen such tanks containing seven cells each. Ten A model plant consists of four teen such tanks containing seven cens each. Ten of these tanks are constantly in circuit, four being in turn cut out for charging, discharging, and possible repairs. These ten tanks are connected in series. The dynamo furnishes a current of 180 amperes, with an electro-motive force of 90 volts. Such a current requires 22 horsepower. The total cathode surface is 10 square feet in each tank. There is, therefore, a current density of 18 amperes per square foot of cathode surface. This is high as compared with that used in copper refining, but is purposed via in order that the silver may be denosited in coarse crystals nonadherent purposely so in order that the silver may be deposited in coarse crystals nonadherent The silver can then be easily brushed off and collected at short to the cathodes. Thus the constant renewal of cathodes is avoided and an important saving effected in the stock of silver carried in the baths.

Each anode is inclosed in a muslin bag, which serves to catch the undissolved metals, which fall as a black slime. In this are found all the gold and bismuth, the greater part of the lead as peroxide, together with some silver and copper. Below this system of anodes, cathodes, and bags in the bath is stretched on a box-like frame a piece of cloth, on which is gathered the deposited silver as it is scraped from the cathodes by wooden "brushes." These brushes straddle the cathodes without touching, and are kept moving to and fro by machinery, and they serve, not only to brush off the silver as fast as it is deposited, thus preventing short circuits, but

also to keep the solution uniform by gentle agitation.

The solution is one of silver and copper nitrate, to which about 1 per cent of nitric acid is added. The acid tends to prevent the deposition of copper with the silver, and about 1 pint is added to each bath every twenty-four hours. Three-eighths of 1 volt will decompose silver nitrate, while copper nitrate requires $1\frac{1}{6}$ volts, and lead

nitrate a still higher voltage.

In a slightly acid solution, containing silver, copper, and lead nitrates, the current will not deposit a trace of anything but silver until the lead and copper get to be largely in excess of the silver. It is said that pure silver will be deposited from a solution containing one and one-half times as much copper as of silver. Of course the gradual accumulation of impurities in the bath necessitates its gradual renewal by addition of fresh solution, the silver being precipitated from the portion withdrawn by salt water.

Each tank is cleaned of deposited silver every other day and of gold slimes once a week. A full-sized apode is dissolved in about two and one-half days. The crystalline silver is washed thoroughly with hot water, dried, and melted. The gold slimes are melted, granulated, and parted by acid.

Such a plant as described will produce about 33,000 ounces of fine silver each

twenty-four hours.

ACID-PARTING PROCESSES.

Acid-parting processes depend upon the solubility of silver, copper, etc., in an acid which will not attack the gold. Strong sulphuric (oil of vitriol) is such an acid, and nitric acid is another, but their mode of action and the apparatus required are quite different. The use of each will be described in detail.

THE NITRIC-ACID PROCESS.

This is the oldest and until a comparatively recent date the only method in use for parting gold and silver. The first notice we have of its use on a large scale was in the fifteenth century, and proved a very profitable one, by some Germans at Venice, who employed it in extracting gold from Spanish silver, keeping their art a secret. They acquired with their wealth the title of "gold makers" by their mysterious operations.

Parting by nitric acid is conducted on a large scale in much the same manner as an assay of gold bullion is made in the laboratory. It consists of the following

operations:

(1) Assorting and proportioning the bullion; (2) granulation of the same; (3) solution of the silver in acid; (4) treatment of the gold residue; (5) precipitation of the silver as chloride; (6) reduction of the chloride by zinc; (7) washing, drying, and melting the parted metals.

It is of course desirable that the bullion should be approximately free from base metals other than copper. Tin, antimony, and arsenic are especially objectionable, the two former not being soluble in nitric acid. They give insoluble oxides, which remain behind with the gold and must be remarked in the give ruisble writch acids. remain behind with the gold and must be removed in the crucible by suitable oxidizing fluxes. Copper, on the other hand, acts as a substitute for silver in the parting process, being, as it is, readily soluble in nitric acid. When silver deposits are scarce, therefore, such as contain considerable quantities of copper, whether of gold or silver, are not undesirable, although the copper requires more acid for solution than the silver which it replaces.

It was originally thought that the proper proportion for parting was three parts silver to one of gold, hence the name "quartation" given to the process. Experience has shown, however, that a lesser proportion of silver is quite as effective, and that the copper may be considered as silver for parting purposes. The proportion of gold to silver (and copper) used at the Philadelphia mint is 1 to 23.

The necessary calculations having been made, the deposits are assorted into melts of about 4,000 ounces each, preferably by mingling gold and silver deposits. If the latter are not on hand in sufficient quantity, fine silver is substituted. The "melt" is now brought to fusion in a large crucible, thoroughly mixed, and then by means of a dipping cup is poured into cold water from a height of some 3 feet. The cup is given a peculiar swirling, wavy motion, by which means the thin stream of molten metal is broken up when it strikes the water into leafy granules and hollow spheres, not unlike golden popcorn in appearance—this to expose as much surface as possible for the action of the acid. These granulations are dissolved in porcelain vessels of about 33 gallons capacity. Twelve such vessels are placed in a large water bath in what is called the "parting house." Provision is made for heating the water surrounding the jars, and a connection from the top of the house to a chimney serves to carry off the acid fumes.

Each jar receives a charge of 190 pounds of granulations and 175 pounds strong When the first strong action has subsided, steam is admitted to the water surrounding the jars. The metal and acid will about half fill the jar. At intervals of twenty minutes the contents are thoroughly stirred with a wooden paddle, the doors on the side of the house being raised for the purpose. The charge paddle, the doors on the side of the house being raised for the purpose. The charge is kept boiling gently during six hours, by which time most of the silver will have been dissolved, leaving the gold as a granular sediment. The steam is turned off from the bath, and hot water added to the jars to dilute the strong silver solution. After subsidence of the gold, the clear solution, containing silver, copper, lead, etc., is siphoned off and transferred to the precipitation tank. The jars are again filled with hot water, the contents well stirred, and again allowed to settle. The clear liquid is added to the first, and 50 pounds of fresh, strong acid added to each jar. The boiling is renewed for five or six hours, when washing of the gold by decantation is several times repeated. The gold sediment is now transferred to a lead-lined tub, mounted upon a truck. This tub has placed in it a perforated false bottom,

which is carefully covered with cotton cloth, the whole constituting a large colander or movable filter. Water is now passed through the gold until most of the silver has been removed, the wash waters being transferred, as before, to the large tank for

precipitation.

From this filter the gold is transferred to cast-iron pots, in which it receives a boiling in strong sulphuric acid, to which a small quantity of niter is added. This treatment extracts an additional portion of silver and materially increases the fineness of the gold. The strongly acid liquor is ladled off into vessels partly filled with water. From this solution the silver and a little gold are periodically recovered as "residues." The gold is thrown from the iron pots into water, washed a number of times by decantation, and then thoroughly sweetened on a portable tub filter, such as has been described. It is now dried and melted. If a sample bar, upon trial, proves to be tough, the melt is now ladled into iron molds, giving bars of some 300 to 400 ounces each. If the trial bar is brittle, the molten mass is fluxed with niter through an "eye" of bone ash. The niter oxidizes lead, antimony, arsenic, sulphur, etc., the products being absorbed by the bone ash cover.

About 6,000 ounces constitute such a melt, and we have some fifteen bars of a

fineness of 0.998 or 0.999, and worth, say, \$8,000 each.

RECOVERY OF THE SILVER.

The silver solutions, together with the wash waters from the gold treatment described, are transferred to a large precipitation tank having a capacity of some 2,000 gallons. This is never filled to its full capacity, since abundant room must be left for stirring and rousing the contents. Salt water is now run into the silver solution until a test shows that enough has been added to convert all silver present into chloride. An excess is avoided, since silver chloride is slightly soluble in salt water. The contents of the large tub are now drawn off through a filter. This is a wooden tank 6½ feet long, 3 wide, and 1½ in depth, lead lined, and provided with a perforated false bottom. The bottom and sides of this tank are carefully covered with cotton cloths as a filtering medium. The curd-like silver chloride is run into this filter through a large wooden stopcock. The liquid which drains off is returned to the filter until it runs clear, after which it is passed through several traps to the sewer. Fresh water is passed through the chloride until all soluble matters are removed, when it is allowed to drain. The filter tank is mounted on low wheels for convenience of moving the chloride to the reducing vat. This is again a lead-lined rectangular tank. The silver chloride is transferred to this tank by means of a copper scoop shovel. Hot water is run on, and granulated zinc added in sufficient quantity to reduce the chloride to metallic silver. The addition of sulphuric acid hastens the action and serves to dissolve the slight surplus of zinc which it is necessary to use to insure complete conversion into metallic silver. The reduced silver is now taken out with a copper scoop having a shovel handle and put into a filter colander, such as we described previously when speaking of gold treatment. In this colander the silver is washed with hot water until entirely sweet. It is now ready for compression into solid cakes by hydraulic pressure. These cakes are dried in a current of hot air, when they are ready for melting

THE SULPHURIC-ACID PROCESS.

Thoroughly satisfactory as is the nitric-acid process, so far as its effectiveness is concerned and the high grade of gold and silver which it yields, yet the comparatively high price of nitric acid and the necessity of using either platinum or porcelain vessels led to its being superseded in modern plants by the sulphuric-acid parting process. Diluted sulphuric acid has no action on silver, but the strong acid, when heated, is decomposed by that metal, giving off sulphurous acid and forming silver oxide, which passes into solution in the excess of acid as silver sulphate. If gold is present in moderate percentage, say not to exceed one-third of the whole, strong sulphuric acid will extract the silver and leave the gold as a granular brown sediment. Should the bullion contain anything like one-half gold, the latter metal will protect the silver against acid attack, and the result will be failure. It is, therefore, the business of the refiner to adjust for the melting pot gold deposits with those of silver carrying small quantities of gold, or, failing such, to add fine silver so as to have from two to three parts of silver for each part of gold. Such an admixture is melted in a large crucible, thoroughly mixed, and then, with a "dipping cup." is poured into cold water, as described in speaking of the nitric-acid process.

But the proper adjustment of silver to the gold is not the only point requiring care. Most bullion coming to the refinery contains varying quantities of copper, and this metal works very badly in strong sulphuric acid, although we found that metal the least objectionable one in the nitric-acid treatment. While decomposing

the acid with formation of copper sulphate, this latter, unlike the silver sulphate, is insoluble in oil of vitriol, hence, if present in any considerable quantity, copper soon acts as a protector to the bullion and the chemical action either ceases or becomes tediously slow. Besides apportioning the silver to gold, it is necessary, therefore, to so combine deposits that the granulations do not contain more than 6 to 8 per cent of copper.

DISSOLVING THE SILVER.

The success of this beautiful process really depends upon the happy observation that while weak sulphuric acid rapidly dissolves iron, yet, if the acid be strong enough, it has no appreciable action—just the reverse of its relations to silver. Cast-iron vessels may therefore be employed. A cast-iron kettle will last for years, during which time hundreds of tons of silver may be dissolved in it by beiling oil of vitriol. Large iron kettles are used, weighing half a ton, mounted over a furnace. Into this a charge of 300 to 400 pounds of the granulated bullion is placed, and covered with three or four times its weight of acid—66 B. Heat is applied, when a lively evolution of sulphurous acid sets in, which, if too violent, must be checked by the addition of a little cold acid and slackening of the fire. This boiling is continued for several hours, during which time the escaping and consumed acids are gradually replaced. When the solution is complete the fire is withdrawn and the contents of the kettle allowed to quietly settle. A little cold acid is added to aid the precipitation of any suspended gold. Hoods over the kettles carry off the fumes to condensing

and suppression apparatus.

The strongly acid solution, while still hot, is siphoned off into the "reducing houses." These are long, rectangular vats lined with lead, and provided with sloping covers like the roof of a house. These covers are hinged to what would be the ridge pole, and are counterbalanced so as to be easily raised. Slabs or ingots of metallic copper are placed on the bottom and sides of these vats, which are then partly filled with cold water. The hot silver solution is then run in. A lively commotion ensues, as will readily be imagined when one recalls the heat evolved by the mingling of cold oil of vitriol with water. In this case the acid is nearly at its boiling point, which is greatly above that of water, and the resulting crackling and spluttering must be seen to be appreciated. The result is a weak solution of silver sulphate, rendered milky by the separation of fine crystals of that salt, the solubility of which is very slight in pure water. The copper immediately begins to precipitate the silver as a beautiful crystalline moss, easily detachable from the plates when the operation is complete. This requires about twenty-four hours. Meanwhile the copper has taken the place of silver, and we have now a strong solution of copper sulphate (blue vitriol). This blue solution is drawn off for crystallization, and the spongy silver carefully transferred to leaching tubs for thorough sweetening with fresh water. The silver, now in the form of minute, flaky crystals, is compacted into cakes by means of hydraulic pressure and these cakes dried in a current of warm air, after which a simple fusion in a black-lead crucible without fluxes gives a bullion 0.998 or 0.999 fine. If silenium or tellurium is present in the bullion, it will pass into solution with the silver and be deposited with it by the copper plates. In this case the spongy silver will be dark colored and the melt will be brittle. It must then be fluxed with niter.

The sulphate of copper is a staple article of commerce, and is carefully prepared for the market. When sold, the proceeds should materially reduce the expense of parting the bullion. But, unfortunately, while the materials for its production, the acid and copper, are purchased out of the fund arising from the collected charges from the depositor, yet the product, blue vitriol, is by present ruling treated as "waste product," the proceeds from which when sold must be turned into the general Treasury instead of the refinery fund.

We left the gold as a sediment in the large iron dissolving kettle. A small quantity

of fresh acid is added and the gold then removed to a smaller vessel by an iron ladle, perforated with holes. It is transferred to another iron pot, in which it receives a number of repeated boilings with fresh strong acid. There are not less than five such boilings. The finishing acids are siphoned off and used upon fresh charges of bullion. The gold is now transferred to a tub, in which it is washed first with cold water and then with hot. These washings find their way to the silver-precipitating tanks. It is now transferred to a lead-lined vat mounted upon a truck. This vat has a perforated false bottom, which is carefully covered with cloth, the whole constituting a large movable filter. Water is now passed through the gold in this filter until it is entirely sweet. If the gold is in coarse particles it may be dried and melted without danger of its being mechanically carried off while placing it in the crucible, but if very fine it is compacted into cakes while wet by hydraulic pressure. These cakes are dried, as were those of silver, in a current of warm air, and melted in a graphite crucible. A trial sample is taken to see if the metal is tough. The presence of even small quantities of lead will render the gold brittle, in which case it is fluxed with niter through an "eye" in a cover of bone ash. When tough, it is ladled into iron molds. About 6,000 ounces constitute such a bar melt. The bars are worth about \$8,000 each.

FINE BARS.

The bullion thus purified is now ready for issue to the public for industrial use, or to enter on its second stage toward coinage.

The consumption of gold and silver in the industrial arts is much greater than is

generally supposed.

During the year ending June 30, 1895, gold and silver bars for industrial use were manufactured in the Philadelphia mint and the assay office at New York to the coinage value of \$17,818,581, in about equal proportions as to value. Private refineries furnished not less than \$5,000,000 more. This first cost for what to the gold beater, Private refineries jeweler, watch-case maker, etc., is simply his raw material represents an enormous industry when we consider the amount of high-grade labor which is bestowed on gold and silver wares. These bars are 0.999 fine and are furnished to the public by what may be called a system of exchange.

A depositor may bring crude bullion in any quantity (\$100 or more in value) and receive either fine gold bars or coin, at his option, to the full value of the gold in his deposit, less a trifling charge for melting, assaying, parting, etc. These charges vary according to the nature of the deposit, but may amount to 5 cents per ounce. The bars or coin are delivered from stock on hand as soon as the value of the deposit is ascertained by assay, usually the following day. For the silver contained in gold deposit the owner may either receive pure silver bars or be paid in silver dollars or

currency, at the market value of silver.

INGOTS FOR COINAGE.

Having a stock of refined gold and silver nearly pure, the first step toward conversion into coin is to make an alloy with copper, in such proportions as will produce standard planchets or "blanks" in the hands of the coiner. While the standard fineness of gold and silver coin is the same, yet, as will appear later, the quantity of copper to be used in the two cases differs a little, yet materially.

Weighed quantities of gold and copper, or of silver and copper, are melted together in a large black-lead crucible, the molten metals thoroughly mixed and then pearly into cost iron molds to produce whether heads to receive the contract of the contra

then poured into cast-iron molds to produce what are known as ingots. These are rectangular bars, differing in size according to the kind of coin for which they are intended. The ingot for silver-dollar coinage is 1\frac{1}{2}\$ inches wide by one-half inch thick and 12\frac{1}{2}\$ inches long. Some 70 such ingot bars are made from one "melt," and weigh collectively about 3,300 ounces (220 pounds).

All the ingots are stamped with the melt number, of which a record is kept by

the melter and refiner, by the assayer, and by the superintendent.

The crucible is set for the day's work in a furnace peculiarly adapted to the purpose, and a continuous fire maintained, using the best stone coal and a natural draft. Five or six melts are made in each furnace during the eight hours; and if the crucibles were taken out of the furnace at each time of pouring much time would be lost in resetting and surrounding it with a fresh fire.

The metal, when melted, is thoroughly mixed by stirring with a tool not unlike a churn dasher, and it is then ladled out into the molds with what is called a "dipping cup." This is a small black-lead pot made with a lip on one side and a straight edge on the opposite side, so formed as not to be crushed when firmly

gripped by a pair of nipping tongs.

The molten metal is slowly poured from the dipping cup into upright molds, of which some twenty are placed in a shallow iron pan convenient to the furnace. As soon as a mold is filled it is removed by an attendant helper, and passed by him to another, who opens it on an iron-covered table and throws out the red-hot ingots. These are chilled in water and then immersed for a few minutes in very dilute sulphuric acid. This latter removes a slight coating of copper oxide and gives the ingot a bright matte color. The "gate" end of the ingot is then cut off in a "topping machine," which has a shear knife driven by steam power. The little fringe left on the ingot by the parting line of the mold is removed by a file and then each ingot receives the number indicating the melt from which it was made.

The mold, when ready for use, consists of three pieces, clamped together by a band and set screw. The outer pieces are recessed to the form of an ingot, while the central piece acts as a mere partition between them. Thus each mold becomes double and furnishes two ingots at a filling, while only consisting of three main

parts.

Standard coin is composed of 900 parts of gold (or silver) and 100 parts of purest copper in each 1,000. While the law allows a slight margin in the fineness of our

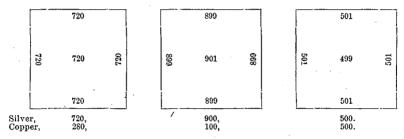

coins, to provide for the limitations of all human workmanship, yet this margin is sharply defined, and is but a fraction of 1 per cent. Small as this margin is, no mint work would be considered good which did not produce coin very far within its limits. Our gold coin rarely varies from standard fineness by more than three one-hundredths of 1 per cent. Silver coin, which is much more difficult to make uniform, as will be explained, may vary by as much as one-tenth of 1 per cent in individual pieces, though the average is almost exactly correct.

It may seem to be a rather simple problem to first calculate the quantity of copper required to be added to bullion of known fineness and then to so apportion the metals on an accurate balance as to get an almost mathematical result after blending them

by fusion.

If this were so, the formula for the production of gold and silver ingots would be identical.

In fact, the practice is very different in alloying the two metals for the production of standard coin. If gold and copper are melted together in any proportion and thoroughly mixed while fluid, the resulting bar or ingot will be uniform throughout in composition. But when silver is alloyed with copper only one proportion is known which will give a uniform casting. This proportion is 72 per cent silver to 28 of copper, and differs widely enough from our standard alloy to complicate matters in a marked degree. With more silver than 72 per cent the center of a cast bar will be richer than the outside, which chills first, while with a less percentage than 72 per cent the center of the bar will be poorer and the outside richer than the average. This characteristic of silver-copper alloys is known to metallurgists as "segregation."

Section through silver-copper bars showing, effect of "segregation."

It would seem that any alloy of silver and copper containing either more or less silver than 72 per cent has a lower melting point or remains fluid longer than the 72 per cent alloy. Hence the last portion of metal to chill in the center of a bar will in the one case be richer and in the other poorer than the average fineness of the molten metal poured into the mold when cold. A cutting from the outside of such a bar is therefore never taken for an assay. Only when the bar approaches fine silver can "a cutting" be relied on by the assayer. When ingots are made for standard silver coin, samples are taken from each melt by the assayer, whose certificate is necessary before the ingots can pass to the coiner. Since a cutting from single ingots or even a sample bar cast from the melt would be misleading, what is called a "granulation" is taken. When a "melt" is ready for pouring into the molds, a little of the molten metal is dropped into water, giving "grains" or large shot, which may be rolled out and used entire, or nearly so, for assay. Two such granulations are, in fact, taken, one at the commencement of the "pouring" and a second when the crucible is nearly empty. These granulations are each assayed, and must not only show the melt to be of proper fineness but must agree with each other within some hundredths of 1 per cent before the ingots made from the melt are adjudged to be of proper fineness to pass to the coiner.

From what has been said about segregation, it will be readily understood that a silver ingot is not uniform in composition. In a cross section the center of such an ingot is appreciably richer in silver than the outside surface, which first chilled in contact with the iron mold. The ingot, being a flat bar, is rolled out by the coiner into long strips the thickness of the future coin. The rich center of the bar has now become the rich central line of a long thin strip, and disks or planchets punched from such a strip will necessarily be richer in silver than the scrap.

It will now be easily seen that if the meter and refiner furnished to the coiner silver ingots of 0.900 average fineness, the planchets cut therefrom would make coin above standard.

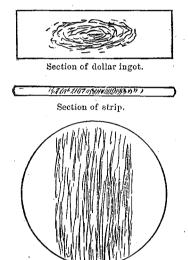

It has been found by long experience that the silver ingot which will produce standard coin should not assay above 0.899 in silver.

All calculations for amount of copper required in making up silver melts have 0.899 as the final result desired. The problem is still further complicated by the fact that about one-half of the weight of ingots sent to the coiner comes back as clippings and of lower fineness than the average. These clippings are added to each melt of fresh bars when available, and their lower fineness must be allowed for in calculating the alloy required for the bars.

When two rows of planchets are cut from strips, as is the case in quarter-dollar and dime coinage, the central line is left intact, and the clips are therefore richer than dollar and half-dollar clips, from which but one row of planchets have been cut. It thus appears that not only the quantity but the kind of clippings added to

the bar melt modify the quantity of alloy to be added. No two silver bars have the same weight, and they usually differ a few thousandths in fineness, so that the alloy must be calculated for each individual melt. furnaces in operation on ingots, making five or six melts each per day, it will be seen that the calculations required involve much labor, and an interesting chapter might be written on the short-cut methods of wonderful accuracy which the ingenious computor is driven to invent by the constant iteration of similar yet never identical calculations.

Such are some of the perplexities arising from "segregation" in silver-copper

Plan view of dollar planchet; shaded lines showing richer portions in each case.

The manufacture of gold ingots is much less troublesome to the computer. same crucible which has a holding capacity of, say, 3,300 ounces of standard silver will serve for a gold melt of 6,000 to 6,500 ounces (400 to 430 pounds avoirdupois). The fineness of gold bars is furnished to the melter and refiner by the assayer to the tenth of one-thousandth.

Bars, preferably of identical fineness, are weighed off in proper quantity for a melt, and placed on a hand truck with a melt number tagged to each little pile of bars. A sufficient number of such are prepared for a day's melting. A clest of drawers mounted on a truck carries suitable-sized boxes, each having a permanent number plainly marked on it.

The copper requisite for melt Nos. 1, 2, 3, etc., is placed in boxes 1, 2, 3, etc., and the trucks with bars and the one carrying the boxes of alloy meet in the melting room where the distribution is made, a single melt at a time—bars and alloy—to each

furnace.

A strict record is kept and the melting room is charged with weight of all metals sent into it in the morning. At the close of work for the day and before the workmen are dismissed, all returns from the room, whether ingots, tops, filings, etc., are weighed, when any shortage, real or apparent, will be noted. Of course the returns never exactly equal the charge sent out, since some little metal will adhere to the crucibles and some will be found in the ashes. This is afterwards recovered as "sweeps." But for the time being these shortages are unknown quantities. Experience, however, has shown what may be expected to pass into the sweeps, and an allowance is made in comparing the charge and returns from the day's work.

"SWEEPS."

This is a very broad general term in mint practice, and includes every kind of waste material known to contain, or likely to contain, gold or silver, except actual sweepings. The floor of the melting room is sweep each day, but the gatherings from the broom are carefully mingled with a suitable flux and thrown into one of the crucibles, still hot and surrounded by the fire left from the day's work. A crucible is selected which has seen such service as to entitle it to retirement from age. On the following morning the contents of the crucible will be found to have "sweated" down, the flux to have fused into a glass, and a lump of metal or "king" will be found at the bottom on breaking the crucible. This king is weighed, credited to the melting room, sent to and charged to the refinery.

The actual "sweeps" consist of broken crucibles and dipping cups, all ashes from the fires, burnt gloves, aprons, saw dust, and packages in which bullion has been sent to the mint, settlings in catch wells and in roof gutters; in short, everything which may contain bullion without its being visible to the eye.

All material of this kind is sent to the sweep cellar, and such as needs crushing is passed under heavy cast-iron rollers mounted in a mill similar in principle to the Chilian. The advantage of the roller crushing is that while brittle materials are reduced to a coarse powder, any pellets of metal will be flattened out and caught in the sifting operation which follows.

These metallic scales are melted down and find their way to the refinery. What passes through the sieves still has value, and, if the product of silver working, it is

sampled, assayed, barreled, and sold to smelting works.

If the powdered material is from furnaces in which gold has been worked, it is passed through an amalgamator into settling tanks. The mud from these is dried,

sampled, assayed, and sold.

The melter and refiner receives a credit in his bullion account for the amount of gold and silver shown by assay to be contained in the sweeps sold. Sales are made on competitive bids, and the returns from this source at the Philadelphia mint are from \$18,000 to \$20,000 per annum for sweeps produced in the melting department

ASSAYING OF GOLD AND SILVER.

By Jacob B. Eckfeldt, assayer of the United States mint at Philadelphia, Pa.

ASSAY OF GOLD.

Gold received at the mint for refining or coinage, either in a manufactured or native condition, is of every variety of fineness, the alloy in a majority of cases being silver, with a smaller proportion of base metal.

In some cases of low-grade gold the alloy is largely composed of copper.

object of the assay is to ascertain these different proportions, both in order to base the calculations for value and for subsequent minting operations. For this purpose a small sample is cut from each bar after melting. The fineness of this sample must, if the melting has been properly conducted, be the fineness of the gross amount.

The fineness of gold being expressed in thousandths (pure gold being 1,000), it has

been found expedient in assaying to employ the French system of weights, using the demigramme as a unit of 1,000 parts with the decimal divisions to the tenthousandth of that weight.

The demigramme is rather less than 8 grains. From the sample, after it has been laminated for convenience in chipping, there is accurately weighed 1 demigramme

on the assay balance.

This assay balance is so constructed as to be of the utmost precision and delicacy, and so fine is the adjustment that it is sensitive to the fiftieth of a milligramme.

To the gold, after being accurately weighed, there is added sufficient fine silver to make about twice (according to one system) or thrice (according to another method, now less used) the estimated amount of silver which may be contained in the alloy, extreme care being necessary that the amount of silver added varies as little as possible from this proportion, as in any marked divergence the result would be liable to inaccuracy. Practice enables an expert to judge of the fineness of the gold within a few thousandths, thus securing the proper basis for the addition of silver. It is needless to say that the added silver is accurately weighed.

If the gold for assay is of low fineness, or contains a large amount of base metal, where it is impossible to estimate the quality, it is customary to make a preliminary

or approximate assay as a basis or guide for a subsequent rigid assay.

The gold and silver, each having been weighed, are inclosed in a piece of lead foil about ten times the weight of the assay. A very little copper is added, merely to assist the cupellation. These are now ready for what may be termed the first part of the operation, that of removing the copper and other base metal. This is effected by the cupelling process.

The cupel is a small, shallow cup made from the ash of bones or the pith of animal It possesses the quality of absorbing the oxides of the metals, but not the

metals themselves.

The bone or pith is first well burned in open air and thoroughly ground, after

which it is moistened with water and pressed in a mold to the desired shape.

The assay furnace is oval in cross section, about 1 foot in height, made of fire brick. Extending across the furnace about the center is what is known as the "bridge" (this is also made of fire brick), and is designed to support the muffle. The muffle is the oven for the reception of the cupels. It is ______-shaped in cross section, flat-bottomed, with an arched top, its length nearly corresponding to the depth of the furnace. The modern furnace is arranged for burning gas; the flame completely surrounding the muffle subjects it to a high beat assily controlled and receptable. rounding the muffle subjects it to a high heat, easily controlled and regulated.

The front of the furnace has an arched opening corresponding to the muffle; through this opening the cupels are introduced by a long pair of spring tongs. When in operation, the muffle is nearly closed by a door, allowing, however, the entrance of a regulated current of air, which, passing over the assay, exidizes the lead and base metals, their exides being absorbed by the cupel.

At the back of the muffle is a slit or opening, which allows the exit of the unabsorbed fumes formed by the exides of the metals, which are not absorbed by the

The furnace having been properly heated, the cupels are placed therein and the furnace having been properly heated, the cupels are placed therein and the furnace having been properly heated, the cupels are placed therein and the furnace having been properly heated, the cupels are placed therein and the furnace having been properly heated, the cupels are placed therein and the furnace having been properly heated, the cupels are placed therein and the furnace having been properly heated, the cupels are placed therein and the furnace having been properly heated, the cupels are placed therein and the furnace having been properly heated, the cupels are placed therein and the furnace having been properly heated, the cupels are placed therein and the furnace having been properly heated. brought to a uniform temperature of which the assayer must judge from experience. Each leaden bullet with its contents is then placed in its cupel, and the furnace closed. The lead in which the gold and silver has been inclosed is rapidly changed to a fluid vitreous oxide, which, exerting an oxidizing effect upon the base metals in the gold, causes their absorption into the pores of the cupel.

The lead likewise helps to form a more uniform alloy of the gold and silver.

The precious metal is allowed to remain in the cupel until all agitation ceases; it then presents a bright surface, which indicates that the base metals have been oxidized and absorbed.

The cupel is now allowed to cool gradually, and the button of pure gold and silver detached. The next step in the operation is the extraction of the silver, which is

effected by digesting the rolled-out button in nitric acid.

The object of the addition of fine silver previous to the cupellation is to make an alloy, in which the particles of gold will be so far separated from each other that they may not protect any part of the silver from free action of the acid. A total extraction of the silver, both that which has been added and that which was originally in the alloy, is thus insured, within the limit hereafter described.

The button is hammered, annealed, and rolled to a thin strip, to furnish a larger surface for the action of the acid. This strip is loosely coiled into a small roll,

technically termed a cornet.

The cornet is now ready for the process of separating the silver. If three parts of silver have been added in making up the assay, the action of the acid has to be conducted more slowly (to lessen the danger of breaking the cornet) than when but two parts of silver have been used; consequently, a weaker acid is employed.

The cornet is introduced into a small vessel or flask, containing 11 fluid ounces of

nitric acid at 22° of Baumé's hydrometer; heat is then applied, either by a sand bath

gas jet, and the acid boiled for ten minutes.

The resulting solution, which contains nitrate of silver, is poured off, and three-fourths of an ounce of stronger acid, at 32° Baumé, is substituted. This is also boiled for ten minutes, after which the operation is again repeated with acid at 32°.

When the boiling or digestion is completed, it is presumed that the whole of the silver has been removed. The acid is accordingly poured off, and the cornet well washed with pure water. It is then deposited in a small clay crucible, which is placed in the muffle, that the gold may be dried and annealed.

The cornet (which is now fine gold) is brought to the assay balance and its weight. certained in thousandths of a demigram. The number of thousandths which it ascertained in thousandths of a demigram.

weighs expresses the fineness of the original sample in thousandths.

If but two parts of silver have been used in preparing the assay, the cornet is introduced into the flask containing 1 ounce of nitric acid at 32° Baumé's hydromintroduced into the flask containing I ounce of intric acid at 32° Baume's hydrometer. This acid is boiled for ten minutes, when it is poured off and replaced by another equal charge of acid of the same strength, in which the gold is again boiled the same length of time. After the second boiling has been completed, the cornet is washed, dried, annealed, and weighed, as in the preceding case.

By subjecting another demigram of the alloy to the cupellation process, without adding any silver, the base metal alone is removed. The loss gives the proportion of base metal, and, the fineness in gold being known, the amount of silver is ascertained by difference. It must equal 1,000, less the sum of gold and base metal.

It is customary with every assay or set of assays to make one or more of pure gold, as a test assay or proof of the work, to detect any possible inaccuracy from overheating, too prolonged boiling, and particularly to afford the necessary correction

for "surcharge," which will be explained at the close.

With every set of assays for the determination of base metal there is also a proof assay made. For this purpose gold of a standard fineness is used when the assays are of native gold, or in other cases when the proportion of alloy is not very large. A special proof, however, is made for every such assay. The proof, by calculation from the approximate assay, is so composed that when melted it will make an alloy similar to the sample for assay. Its exact proportion of base metal being thus known, any deviation from this proportion shown by cupellation becomes apparent. By this deviation the necessary correction is made upon the result of the regular assay. In an assay of gold containing platinum, as in dentist plate, the amount of silver in the alloy can not be accurately determined by the cupellation process, for the reason that the platinum, being a nonoxidizable metal, it is not absorbed by the cupel, but is returned in the button as precious metal.

The proportion of silver in such an alloy is ascertained by the humid assay (elsewhere described). For this purpose a definite proportion of the alloy is weighed, inclosed in lead with sufficient fine silver, for the proper working by the humid assay. The bullet is then placed in a cupel, and retained in the furnace until the whole is melted, when it is immediately taken out, without allowing any absorption by the cupel. When solidified, the alloy thus formed is placed in a bottle, and dissolved in nitric acid, after which it is proceeded with as described in the article on

the humid assay of silver.

Another method of making this assay for silver, is to weigh a definite proportion of the alloy, and carefully fuse it under cyanide of potassium, with an excess of pure cadmium or zinc. As soon as fused, the alloy is poured, the resulting button, freed from cyanide, is dissolved in nitric acid, together with the proper quantity of fine silver for the humid assay working. After complete solution the assay is proceeded with as further described.

The object of the cadmium is to form an easily partible alloy, that is, one in which the gold is thoroughly broken up by the acid and any alloyed silver completely

dissolved.

Within a few years an improvement has been adopted in the apparatus for assaying as conducted in the United States Mint. The cornets are prepared as previously described, but in place of boiling them in flasks they are deposited in separate cups of platinum, arranged in a basket-like apparatus of the same material, capable of

holding sixteen assays in a small space.

This is placed in a basin or cup of platinum containing nitric acid of the required strength, acid at 22°, if three parts of silver have been used, and at 32°, if but two parts. Heat is applied and the acid boiled for ten minutes; the basket containing the cornets is then withdrawn and placed in another similar vessel, and acid at 32° is poured over them and boiled as before. This change is generally made the third time to insure a complete extraction of the silver. To prevent the escape of the fumes from the decomposition of the acid, a dome-shaped covering is placed over the vessel which connects by a tube with a condenser, or a flue.

The boiling operation or digestion having been completed, the cornets are washed,

The boiling operation or digestion having been completed, the cornets are washed, dried, and annealed without removing them from their respective separate compartments in the basket. The great advantage in this operation is the uniformity with which the cornets are treated, all being subjected at once to the same action from the acid. It also saves time and trouble in repeated decantings. It is somewhat liable to the danger of spoiling the whole set by the breaking up or by transposi-

tion of some of the assays, but with due care this will rarely happen.

The foregoing operation does not entirely remove the silver, although it was formerly supposed that it did, and thus the gold coins of the best mints showed a deficiency from the true or legal fineness even when it was not intended. This small quantity of silver which persistently clings to the gold is called the "surcharge."

The surcharge of silver is very minute and varies, say, from two to seven or eight tenths of a thousandth. It is ascertained in each assay or set of assays by the "proof" already mentioned, which shows the amount of silver retained by a known weight of gold under identical treatment with that given the sample under assay. The weight of the cornet from the proof strip will be greater than that of the gold in it by the amount of the "surcharge." The surcharge thus found is therefore to be deducted from the weight of such cornets as accompanied the proof through all the processes of treatment.

In assaying fine (or nearly fine) gold, we weigh the proof to 1,000 parts of our test gold; but in assaying ingots for coinage and the ordinary class of deposits a proof of 900 parts is used, and in lower grades of gold a synthetic proof is used corresponding to the approximate or supposed fineness of the metal, the object being to subject an alloy of known composition closely similar to that under test to identical treatment.

After the ingots have been made, the first and last ingot from every melt are carried to the assay room and a sample slip taken from each. These are assayed separately and their fineness reported to the melter and refiner. The ingots or melts which may be too far from the legal standard, or fail to show a uniformity of fineness in the assays, are condemned. They are then remelted with the proper addition of either gold or copper, as the case may require, to bring them to standard.

With every sample of gold assayed there is also a corresponding duplicate assay made, to guard against any error which might possibly occur in the various assay processes. Besides this, the duplicate serves to show if the alloy be of a uniform fineness throughout. If such is not the case (as shown by the variation of the assays), the mass from which the sample was taken is remelted and stirred to make

it homogeneous, after which it is assayed in duplicate as before.

In case the gold for assay be of low fineness, or if there is but a small proportion of gold in the alloy, it is found to be expedient in preparing the assay to add sufficient fine gold so that the assay may contain 900 parts of gold in the 1,000. By this course the exact fineness of the alloy is ascertained, otherwise an allowance would have to be made for a slight absorption of gold by the cupel, which will happen when a large proportion of alloy is present. When the weight of the cornet is ascertained, the amount of fine gold which was added must be deducted, the difference being the fineness of the original alloy.

It sometimes happens that the ordinary amount of lead is insufficient to cause the entire elimination of all the base alloy in the gold. It may be, too, that the cupel is not capable of absorbing the entire amount of lead which such an assay would require. To avoid these difficulties it is customary to weigh the assay at one-half the usual weight, adding fine gold as described above, thus diminishing in like pro-

portion the amount of base metal to be exidized and absorbed by the cupel.

ASSAY OF SILVER.

The object of the silver assay is to determine the exact proportion of silver contained in any bullion, plate, or coin. The assay does not regard the nature or variety of the alloying metals, but simply their proportionate weight to that of the pure silver. Incidentally, however, for the benefit of the melter and refiner (in the mint assays), or for his own information and experience, the assayer takes cognizance, in passing, of the nature of his solutions and precipitates; also of the ductility of the metal to be tested.

When the silver alloy is melted a sample is taken out for the assayer. This

is done by dipping a small portion from the pot and pouring it into cold water. The resulting granulations are carried in copper cups to the assayer's laboratory.

The reason for this method of sampling silver is elsewhere explained.

After drying the granulations by heat, about twenty-hundredths of an ounce are reserved in the assay room and the remainder returned. The sample lots are now laid out upon a board containing cup-like sockets bored at regular intervals and numbered. A granulation from each sample is next hammered and rolled into a thin strip, this being merely for convenience in cutting for the adjustment in weighing the assay. Each strip is laid beside its kindred granulations and numbered by stamping. The board is now removed to the assayer's "weighroom."

There are two methods of assaying silver—one known as the "dry" or "furnace" assay or "cupellation;" the other, the "wet" or "humid" assay or the "volu-

metric process.

The method of "furnace assay" or cupellation, already described for gold, when applied to silver requires such a nice regulation of temperature and so many extreme precautions, and is at best so liable to uncertainty of results, that it is now only used in a subsidiary way, to furnish an approximate result, or a basis for the closer

and more delicate manipulations of the humid assay.

The humid assay, with proper care and due attention to the condition of the liquids, may be regarded as a perfect process of analysis for silver, both as respects accuracy and uniformity of results. The principle of the humid assay is that of determining the proportion of fine silver in an alloy by ascertaining the exact amount of a precipitant of known value required to eliminate the silver contained in a solution of of the precipitated silver. The necessary amount of the precipitating agent being found and the weight of the alloy known, the number of parts of silver in a thousand is deduced by calculation. For this purpose a solution of common salt, chloride of sodium, is used.

STANDARD SOLUTIONS.

Two solutions of different proportions are made; the first is known as the "normal solution," the second as the "decimal solution." The former begins, the latter finishes the operation.

The normal solution is prepared by taking the saturated solution of salt in water and adding water to it in the proportions, by weight, of 97.93 parts water, 2.07 parts saturated solution, together making 100.

By supposing an example, the successive steps of the assay process can be more readily followed and understood.

If the silver be of an unknown fineness, an "approximate" assay must first be made by cupellation or by a preliminary humid assay. If, however, as in the case of ingots, foreign coins, standard plate, or silver nearly fine, the fineness be suppos-

able or approximately known, no previous assay is requisite.

Let us now suppose that the silver to be assayed be not far from .900 fine. working weight will be thus determined: Divide 1,000 by 900, and the result is 1.111; that is, we have a weight which will contain 1,000 parts and will be precipitated by

the fixed dose of normal solution.

For convenience in calculating, however, the table of weights increases and diminishes by fives; and as there is always more or less uncertainty about the supposed fineness, and also concerning the strength of the normal solution (owing to changes of temperature and evaporation of its water), and for another reason the next higher weight rather than the next lower weight is used, i. e., 1.115 in preference to 1.110. The object of this will appear more obvious hereafter.

We are now ready to weigh the silver. The balance in use is sensible to the tenth

of a thousandth of a gram, to which point the result may be carried if necessary,

although it is not customary to report so closely.

With a pair of delicate forceps the assayer places upon the scales the weight 1.115. (i. e., one gram and one hundred and fifteen thousandths) of a gram, as previously determined. Upon the other side of the scale the granulations are added until the requisite amount is nearly obtained; the final adjustment is made by cuttings from the rolled slip.

The adjustment completed, the silver is poured from the pan through a funnel into a glass bottle of particular shape and size, then dissolved in, say, 10 grams nitric acid (26° Baumé) by gentle heat.

It is during this process of solution that one of the especial advantages of the humid assay is reaped—in the detection of various foreign elements in the alloy, as gold, tin, copper, antimony, the sulphide of silver, etc., some of which dissolve with difficulty, others not at all, and all showing characteristic differences.

Precipitation by the normal solution is the next step in the operation.

The solution is contained in a large glass vase moderately elevated above the table. An india-rubber tube drops from a stopcock at the bottom of the vase and lies loosely along the table except about midway of its length, where it is intercepted by a smaller spigot; this is screwed down at a convenient working point for the right hand, the tube being free at the left.

The end of the tube is now slipped over the nozzle of a stationary, perpendicular pipette; with the right hand the table spigot is turned on, and the normal solution flows upward into the pipette, the top of which is drawn into a fine opening. Any overflow simply falls into a saucer surrounding the pipette. When full the flow is cut off, the finger placed upon the upper vent, and the tube withdrawn from the lower nozzle; we have thus an exact measurement of 100 cubic centimeters.

The assay bottle containing the solution of nitrate of silver is next placed under

the pipette, the finger is removed at the top, and the solution falls into the bottle.

The immediate result of the operation is the formation of chloride of silver (also nitrate of soda), which is a white, flocculent substance, rendering the liquid in the bottle opaque. Other compounds, as the nitrates of copper and lead, etc., may remain the liquid in the substance. in the solution, none of which seriously interferes with the assay, and some not at all.

It being necessary that the white precipitate should not thus pervade the liquid, the bottle is placed in a machine known as the "agitator," which gives it a violent agitation. This can, of course, be done by hand, but since several assays are made at once, the aid of steam saves both labor and time. The agitation is continued four or five minutes, whereby the precipitates curdle and quickly subside.

The bottle is next carried to the blackboard table—an upright slab of slate of the full length—and at the back of the table is marked off into ten divisions and numbered. If there be more than one assay in process, each bottle is placed opposite

its respective number.

The agitation having caused the chloride to settle as a dense white precipitate at the bottom of the bottle, the liquor (nitrate of soda) remains transparent, though

sometimes colored by the alloying metals.

It is to be understood that the charge of normal solution from the pipette is calculated to precipitate exactly 1 gram of pure silver; but as there has been probably either more or less than the exact 1,000 parts of fine silver in the original weight of 1.115, we have yet to ascertain whether the normal solution has performed the whole work of precipitation, or (in event of the alloy being baser than we had supposed) whether the precipitation has been overdone, i.e., whether an excess of salt remains in the bottle.

Accordingly the bottle is charged by a small hand pipette with a measure of the "decimal solution" of salt (previously described). This solution is only one-tenth as strong as the normal solution, and the single dose is, in bulk, the one-hundredth part of the large pipette, so that one dese of decimal solution precipitates only the one-thousandth part of a gram, i. c., 1 milligram. If the normal solution was not sufficient to precipitate all the silver, there will, upon allowing the decimal dose to run gently down the inside of the bottle, be a white cloud formed upon the surface of the liquid, the density of this cloud varying with the amount of silver still in solution.

The assayer now holds the bottle to the eye level and judges by the appearance of this cloud, as nearly as possible, how many more decimal doses will be required to

precipitate all the silver remaining in solution.

Suppose the assayer now decides that three additional doses will finish the work of precipitation. He accordingly so charges the bottle, noting the charge upon the slate. The bottle is agitated again, and when the liquid is cleared it is tried as before with a decimal dose of salt water. If the judgment and application of doses have been correct, only a delicate trace will appear on the surface. This proves the assay complete.

It may be that the operation of dosing and agitating will have to be repeated several times, the assayer each time adding to the record upon the slate; but the

process is always the same until the final trace is reached.

As the density of the normal solution may vary from day to day, or during the day, with the temperature, and from other causes, assays of pure silver are made as a daily test of the state of the solution—in other words, an assay is made of the

normal solution by silver of known fineness.

This assay is known as the "proof," and by it all other assays are adjusted, when the normal solution is proved by it to be at variance. Suppose, for example, our "proof silver" to have been weighed at 1.004. If the normal solution were exactly correct it would precipitate the 1,000 and leave the 4 to be precipitated by decimal doses. But supposing the proof assay is found to require only three and one-half additional doses; this shows the normal solution too strong by half a thousandth in other words, every assay should have recorded for it a half-decimal dose more. This correction is accordingly made for each assay.

In our example, three doses were required to finish the precipitation, but our proof has shown that another half should be added in the record since the normal solution was by so much too strong. The result upon the slate will then be three and one-half instead of three.

The fineness of the silver is then obtained by the following proportion:

Normal solution. Decimal solution. Fine silver. Required fineness. Weight. 1,000 1.000 1.115 $+3^{\frac{1}{2}}$ showing the silver to have been .900 fine. For the sake of expedition, however,

tables are in use for the determination of both weight and fineness.

It may be that the original weight of the alloy was not sufficient to contain 1,000 parts of pure silver, and, consequently, when the decimal charge is added no trace of chloride appears, or the same result would ensue from the assayer having overdosed the bottle with the decimal solution during the "working." In such cases a decimal solution of nitrate of silver is used.

This is the "descending," while the working by salt is the "ascending" assay. As the latter forms a clearer liquor after shaking, and for other reasons, too, the ascending mode is more satisfactory. It is now apparent why the next greater (1.115) instead of the next smaller weight (1.110) is selected, thus allowing the assayer what is called "working room." It is necessary that the assayer in the above operation be correct in his eye judgment of the decimal dose required, since the slightest overdose precludes the appearance of the trace after the next agitation, and requires him to work back with the opposite solution.

It is the custom at the mint to work to the one-fourth of a thousandth in silver, though in the higher grades of fineness the results can be carried to the tenth, if

necessary

It sometimes happens that silver contains alloys which render the liquor in the bottle so obscure that the judgment of the cloud density is impeded and the final trace hardly discernible. This annoyance may be removed by the tedious and unsatisfactory operation of filtering after each agitation. But a quicker and better method is sometimes resorted to here, which consists in using 250 milligrams (one-fourth of a gram) of the alloy and adding fine silver to make up the full gram for precipitation. The result is obtained by subtraction of the fine silver and multiplication for the full gram. Sometimes 500 parts and sometimes 1,000 parts of alloy are used.

When silver contains sufficient gold to pay for its extraction a regular gold assay is made, by the process described in the paper upon that branch of the business. If the gold be in large proportion the alloy must be rolled very thin (for the humid assay) and boiled in a stronger acid, or the metal may be fused with cadmium (and treated as described in the article on gold assaying) before proceeding with the Duplicate assays are always made, to guard against error in the assay

process, and also to detect any want of homogeneity in the mass of silver.

In the assay of ingots, five melts with their duplicates, constitute a full "set." To prevent confusion and error, the bottles are all numbered, in sets, from 1 to 10, and are carried from place to place in a port-flagon made to hold ten. The assayer reports to the melter and refiner the fineness of each melt, condemning those which vary too far from the legal standard.

MANUFACTURE OF DIES.

By CHARLES E. BARBER, Engraver of the United States Mint.

Coinage and medal dies are prepared in the following manner:

When a coin or a medal is required, the first thing to be obtained is the design; that having been agreed upon, the work of producing the die follows, by one of two methods. The first and oldest is the following:

The design being determined, a drawing is made the exact size of the coin or medal From this drawing a tracing is taken for the purpose of transferring the

design to the piece of steel that is to be the die.

To transfer the design to the steel, proceed as follows: Smooth the surface of the steel with a dead smooth file, then go over the face of the die with fine-cutting oilstone or very fine emery, used as a lap. obtained a perfect surface on the face of the die, cover the same with a thin coating of transfer wax; then take the tracing which you have made with lead pencil and place that in position, face down, upon the transfer wax, and carefully rub with some smooth instrument, such as a burnisher. When you have rubbed this tracing sufficiently, remove the tracing, and you will find the design transferred to the steel.

This transfer is, of course, very delicate, and easily obliterated; therefore to preserve it, it is best and necessary to go over the lines with a sharp-pointed instru-

ment, graver, or other sharp tool.

The next process is to remove the steel where the form or relief is required, forming an intaglio in the die so that relief may be had on the coin or medal. done with chisels and gravers. As the work progresses the engraver wishes to see the effect of his cutting, and from time to time takes impressions from his die in soft wax or clay. This is done by having a wood block, on the end of which is placed some soft wax or clay, and by the use of a hammer he drives the soft material into the die, which gives an impression in relief, the same as the coin or medal is intended to be, and in this way he proceeds until he has accomplished the desired result. prevent the wax from adhering to the surface of the die, a little plumbago is mixed with the wax or a small quantity is dusted on the surface before taking the impression.

In some cases the die is not brought to a finished state, as some part can perhaps be better done in relief. In that case, when all that can be accomplished to advantage in the die is completed, it is hardened, and a soft-steel impression is taken from it, and the unfinished parts are then completed. This steel relief is in turn hardened, and by means of a powerful press is driven into a soft piece of steel, thus making a die

which, when hardened, is ready for use for making coins or medals.

It often occurs that all the design can be produced in the die by cutting away the steel, and in that case no hub is taken; the die is fully completed and hardened

Another method, and more modern, is this:

After the design for the coin or medal is settled upon, the engraver prepares a model in wax, or any material he may prefer to use, of the design selected, or as much of it as he may think most desirable for the production of the medal or coin. The model is generally made three, four, or five times as large as the finished work is When the model is finished an electrotype is made. This electrointended to be. type when sufficiently strong is prepared for the reducing lathe, and a reduced copy

is made the size required for the coin or medal, as the case may be.

The reducing lathe is a machine, working somewhat upon the principle of the pantograph, only in this case the one point traces or follows the form of the model, while another and much smaller point made in the form of a drill cuts away the material, and thus produces a reduction of the model. This process of reducing the design from the model is necessarily a very slow operation, as accuracy of the reduction depends entirely upon the slow motion of the machine and delicate handling of While it is not in the power of the operator or machine to improve the model, it is quite an easy matter, if not properly managed, for the machine to distort or the operator to lose the delicacy of the model.

The reducing machine can work either from a model in relief or intaglio, though

the relief is more often used, and is considered the better way.

In describing this process, I have said the engraver makes a model of the design he wishes to produce, or as much as he thinks desirable. To explain more fully, I would say some designs or parts of a design are not calculated for reducing by machine, and therefore the engraver only reduces so much of the design as he knows from experience will give the desired effect; the rest he cuts in as described in first method of die engraving, namely, cut with gravers and chisels. When the reduction is made by the machine from the model it is then taken by the engraver and worked over and finished in all the detail and delicate parts, as the machine does not produce an entirely finished work. When finished by the engraver it is hardened and tempered. If the reduction has been made intaglio, when hardened it is completed and is called a die, and coins or medals can be struck from it; but if in relief, it is called a hub, and the process of making a die from it commences, which is done as follows:

The hub or relief being made hard, a piece of steel is prepared in the following manner to receive the impression of the hard hub: Take a block of steel sufficiently large to make your die, and carefully anneal it until it is quite soft. This is done by heating the steel to a bright red and allowing it to cool very gradually, being careful to exclude the air by packing the steel in carbon. The steel being soft, turn off the surface of the block of steel and smooth it before you commence the process

called hubbing, which is as follows:

Place the block of soft steel under the plunger of a strong screw press; then put the hard relief or hub on top of the soft steel, and bring down your plunger with a good sharp blow. This will give you an impression upon the soft steel. In order to make a proper impression, the process of annealing the steel and the one just described, called hubbing, must be repeated many times, until you have a perfect impression of This being obtained, you have a die which only requires being hardened the hub. and tempered to be ready for use.

This last-described process of making dies is only followed for coinage and medal dies of the most artistic character. For all ordinary die work, such as is used by silversmiths and jewelers, the first-described method of engraving dies is generally

used, it being quicker and sufficiently good for their use.

To harden the steel dies, they are packed in cast-iron boxes filled with carbon to exclude the air, and when heated to a bright red are cooled suddenly with water. As this would leave them too hard, and liable to crack and break on the edges, the temper is what is technically called drawn, which is done by gently heating until you notice a color appearing upon the surface of the steel. A light straw color is a good color for cutting tools, but dies are generally brought to a deeper color, and in some cases to a blue.

COINAGE OPERATIONS.

By WILLIAM E. MORGAN. Coiner of United States Mint at Philadelphia, Pa.

GOLD.

The ingots as received from the melter and refiner vary in size and weight according to the denomination of coin for which they are to be used. The following table gives the various sizes and approximate weights:

Denominations.	Approxi- mate weight.	Length.	Thick- ness.	Width.
Double cagles Eagles Half cagles Quarter cagles	62	Inches. 125 1115 121 121	Inches. \\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\	Inches. 1½ 1½ 2½ 1½ 2½

The first operation in converting ingots into coin, called "breaking down," is the passing of them between heavy rolls, which results in the ingot being formed into "strips."

To more clearly understand this, it may be said that the ingots are divided into drafts of from 40 to 60 ingots, and each draft passed between the "break-down" rolls a number of times, determined by the malleability of the metal. After each operation the rolls are tightened or brought closer together by means of wedges under the lower roll, which wedges are worked by means of a worm wheel. Such tightening of the rolls is shown by an indicator similar to a clock dial.

The following tables show the reduction of the ingot after each passage between the "break-down" rolls:

DOUBLE	EAGLES			
Draft.	Dial indicator.	Length.	Thick- ness.	Width.
		Inches.	Inches.	Inches.
1	11.30	14.7	13	123

In "breaking down" ingots the metal becomes hard and springy, and further rolling than that indicated in the above tables, without softening, causes the strips to crack and split. To avoid this they are annealed as follows:

Inclosed in copper canisters, sealed with potters' clay to exclude air and thus prevent oxidation, the strips are placed in a furnace heated to about 1,500° F., where they remain for about one hour and a half, the time depending upon the heat of the furnace and the size of the strips.

After being cooled off in water, and each strip wiped dry, they are ready for further reduction in the finishing rolls.

Double eagles and eagles are passed through the finishing rolls three times, half eagles and quarter eagles four times, the dimensions of the resulting strips being shown in the following tables:

DOUBLE	EAGLES			
Draft.	Dial indicator.	Length.	Thick- ness.	Width.
		Inches.	Inches.	Inches.
1	7	479	<u>2</u> 4	15
2	7. 50	544	33 32	15

3	8.35	78	93 3	59 64
4	8.50	943	1 32	50

It has been found impracticable to roll strips so as to give planchets of exact standard weight, and after leaving the finishing rolls the strips are of such thickness that planchets cut therefrom will vary from the standard weight as follows:

Denominations.	Gra heav	
Double eagles		
Half eagles		8
Quarter eagles	4	5

This excess of weight is reduced by the "draw benches."

The strips upon leaving the finishing rolls are again annealed, cut in two for convenience in handling, and taken to the pointing rolls that about 1½ inches of the end may be pointed or flattened to permit their easy passage through the dies of the draw bench, and they are then greased with tallow.

The draw benches are double, each section being independent in its action of the

other. Each section has two dies regulated by set screws; between these dies the pointed end of the strip is passed, and being seized by the jaws of the carriage, which is drawn by means of an endless chain, the strip is drawn through and reduced as near as may be to standard weight. This operation is similar to that of wire drawing.

When the strips are drawn to the proper weight, which is ascertained by weighing sample planchets cut from either end, they are taken to the cutting shears and the pointed ends cut off to avoid the possibility of a planchet being cut out of the same. This done, the strips are taken to the cutting press, and by means of a steel punch,

working into a matrix, the planchets are cut therefrom.

The planchets, together with the resulting perforated strips, spoiled pieces, and chips, are taken to the wash room and thoroughly cleansed of the grease by washing in a lye compound of soap, borax, and water. After rinsing in clean water they are dried in a large copper pan which is heated by steam. The planchets are then taken to the selecting tables and all perfect blanks separated from the imperfect ones, The latter, together with the perforated strips, are returned to the melter and refiner to be remelted, while the former are sent to the adjusting room.

The standard or legal weight of gold coin is:

	Denominations.	Grains
· Half eagle		129

The tolerance allowed by law on individual pieces is:

Denominations.	Grains.
Double eagle	k.
Eagle	ŀ
Quarter eagle	1

Each piece is weighed in the adjusting room, and if found to be heavier than the legal limit, is reduced within the limit by filing the edge of the planchet; if lighter than the legal limit, it is condemned and returned to the melter and refiner to be remelted.

Those planchets which have been adjusted are then taken to the milling machines

to undergo the operation of having the raised edge (technically termed "milling") put on them. The milling protects the surface of the coin from abrasion.

In the milling machines the planchets are fed by hand into a vertical tube, and, one by one, are caused to rotate in a horizontal plane in a groove formed on one side by a revolving wheel and on the other by a fixed segment of corresponding groove. Each piece as it passes through this narrow groove has its edge evenly forced up into a border or rim.

The milled pieces are then taken to the cleaning room to be cleaned. To facilitate the cleaning, as well as to soften the pieces for the imprint of the dies, they are again annealed by heating to a cherry red, then dipped into a solution of sulphuric

acid and water sufficiently strong to clean and brighten them.

After being thoroughly rinsed in boiling water they are hand riddled in sawdust

to dry them, and are then ready for the stamping press.

The most important operation in the stamping of a piece is the adjustment of the dies in the press. This adjustment requires great skill and long experience, much depending upon the character of the metal to be operated upon.

The pieces are fed to the press through a vertical tube, and as each piece reaches the bottom of the tube steel feeders carry it over between the dies, place it in a steel collar, when the dies close upon the planchet and the obverse and reverse impressions are made.

The inner rim of the collar is reeded or fluted, and the planchet before being struck is slightly less in diameter than the collar; but the pressure upon the dies causes the piece to expand in the collar and takes from it the reeding on its edge.

The following table shows the pressure necessary to bring up a sharp, clear impression on the various denominations of gold coins:

Denominations.	Pressure.
·	Tons.
Double eagle	175
Eagle	
Half eagle	
Quarter cagle	

Double cagles and eagles are struck at an average rate of 80 per minute, while half eagles and quarter eagles are struck at the average rate of 100 per minute.

SILVER.

With the exception of annealing, the operations incidental to the coinage of silver

are the same as for gold.

Silver strips are not inclosed in canisters while being annealed, as was the case with gold, but are subjected on the open hearth of a furnace to a dull red heat. Although a reducing temperature is sought to be preserved, the strips become tarnished or oxidized on the surface from the formation of a slight film of copper

This film is easily removed from the planchets by immersion in a weak solution of

sulphuric acid.

After the planchets have been whitened they are placed in a revolving riddle, filled with sawdust, that they may be dried and brightened.

The standard or legal weight of silver coin is:

	Denominations.	Grains.
Dollar		 412.50
Half dollar		 192.90
Quarter dollar		 96.45
Dime		38. 58

The deviation from the standard weight allowed by law on individual silver

pieces is 1.5 grains.

Dimes are not adjusted. If any pieco is found to be above or below the limit of tolerance it is marked "condemned" and remelted, and therefore greater care has to be exercised in the management of the draw benches that the percentage of condemned dime planchets may be reduced to a minimum.

The pressure used in stamping silver coins is:

Denominations.	Pressure.
Dollar	110
Quarter dollar Dime	

Silver dollars, half dollars, and quarter dollars are struck at an average rate of 80 per minute, while dimes are struck at an average rate of 100 per minute.

COUNTING.

As before stated, there is a limit of tolerance on individual pieces, but all ccins are far within this limit. Those pieces that are heavier than the standard weight are termed "heavies;" those that are lighter than standard weight are termed "lights."

Gold coin is put up in drafts of \$5,000 each. The legal weight of \$5,000 in gold coin is 268.75 troy ounces, but there is a deviation allowed by law of one-hundredth of an ounce from this legal weight. In making up the drafts the "lights," "heavies," and "standards" are mixed so that the deviation from 268.75 ounces shall not exceed one-

hundredth of an ounce.

Silver coin is put up in drafts of \$1,000 each. The legal weight of \$1,000 in standard silver dollars is 859.375 troy ounces, and of \$1,000 in subsidiary silver—that is, half dollars, quarter dollars, and dimes-803.75 ounces. In making up drafts the "lights," "heavies," and "standards" are mixed so that the deviation from the legal weight of \$1,000 in dollars, half dollars, or quarter dollars, shall not exceed twohundredths of an ounce, and one-hundredth of an ounce in \$1,000 in dimes.

MONETARY STATISTICS OF FOREIGN COUNTRIES.

The statistics of the production and coinage of the precious metals, imports and exports of gold and silver, amount of bank and Government notes, both covered and uncovered, of the different foreign countries, published annually in the reports of this Bureau, are obtained directly from the governments of such countries by the representatives of the United States accredited to them.

A list of the interrogatories, covering the points on which information is sought from the governments of foreign countries, is sent yearly to the United States ambassadors and ministers through the Department of State, and the replies in the form of reports are forwarded directly to the Bureau of the Mint.

The interrogatories for 1895 were as follows:

(1) What was the amount of gold coined during the calendar year 1895, by denominations and values? What amount was recoined (withdrawn from circulation) during the year, domestic and foreign coins separately.

(2) Same question as to silver.(3) What was the weight of fine gold used in the industrial arts during the calendar year 1895?

(4) What amount of this was new gold, and what amount old gold?
(5) What was the weight of fine silver used in the industrial arts during the calendar year 1895?

(6) What amount of this was new silver, and what amount old silver?

(7) What was the import and export of gold during the calendar year 1895? (Coin, bullion, and ore, as well as their weight and value, should be given separately, if possible.)
(8) Same question as to silver.
(9) What was the total import of United States gold coin during the year?

- (10) What was the total import of gold from the United States direct in 1895? (11) What was the amount of United States gold coin deposited at the mints and
- melted? (12) What was the weight expressed in kilograms, fine, and the value of the gold

produced from the mines of the country during the calendar year 1895?

(13) Same question as to silver. (In answering this interrogatory state whether the value given is commercial or coining value.)

(14) What were the weight and value of the output of gold from the refineries of the country during the year?

(15) Same question as to silver.

(16) What, approximately, was the stock of gold coin and bullion in the country at the close of the calendar year 1895?

(17) Same question as to silver.

- (18) What was the amount of Government notes outstanding at the end of the year 1895 9
- (19) What was the amount of bank notes outstanding at the end of the year 1895? (20) What was the amount of uncovered Government notes at the end of the year 1895 9
- (21) What was the amount of uncovered bank notes at the end of the year 1895? (22) What was the actual currency of the country-gold and silver, or inconvertible

paper?

(23) Is gold at a premium as compared with the actual currency of the country; and if it is, what was the average premium during the year 1895?

(24) What was the average rate of exchange on London during the year 1895? (25) Were any laws passed during the year 1895 affecting the coinage, issue, or legal-tender character of the metallic or paper currency? If so, please transmit copies of the same.

(26) Is there a report published of the operations of the mint? If so, please

forward a copy of the same.

It is usual for this Bureau to supplement the information received through our foreign representatives by other statistical data obtained from printed documents, both official and nonofficial.

For special information kindly furnished the Bureau the Director desires to express his personal obligations to the following gentlemen: Hon. Horace Seymour, deputy master of the royal mint, London; Hon.

George Anderson, deputy master of the mint, Melbourne, Australia; Hon. J. H. W. Hart, assistant secretary of the Government of India; Mr. J. Stavoli, chief of the bureau of statistics, Mexico; to the chancellor of the exchequer, Russia; the directors of the mints of Japan, the Netherlands, Paris, Berlin, Madrid, Vienna, and Kremnitz; Mr. Augustus Sauerbeck, London, and Mr. Ottomar Haupt, Paris.

The replies to the interrogatories, which are given in full in the appendix (LI, p. 313) to this report, are indicated by the numbers of

the questions.

In the list of questions propounded to foreign governments for the calendar year 1895 were the following:

What was the total import of United States gold coin during the year? and What was the amount of United States gold coin deposited at the mints and melted?

The following table shows the countries from which answers to these two interrogatories were received, the amount of United States gold coin imported by them, and the value of the United States gold coin melted at their mints:

Countries.	Amount imported.	Amount melted.
Argentina	\$1,400,000	
Austria-Hungary		\$4, 208, 816
Germany		8, 383, 772
Netherlands		55, 826
Total	7, 813, 390	12, 648, 414

IMPORTS AND EXPORTS OF THE PRINCIPAL COUNTRIES OF THE WORLD.

The imports and exports of the precious metals of the principal countries of the world during the calendar year 1895 are exhibited in the following table. The information relating to foreign countries was received through representatives of the United States in them:

IMPORTS AND EXPORTS OF THE PRECIOUS METALS IN THE PRINCIPAL COUNTRIES OF THE WORLD, 1895.

GOLD COIN AND BULLION.

Countries	Imports.	Exports.	Excess of imports over exports.	Excess of exports over imports.

MONETARY STATISTICS OF FOREIGN COUNTRIES.

The statistics of the production and coinage of the precious metals, imports and exports of gold and silver, amount of bank and government notes, both covered and uncovered, of the different foreign countries, published annually in the reports of this Bureau, are obtained directly from the governments of such countries by the representatives of the United States accredited to them.

My grateful acknowledgments are due to the officers and employees of the various mints and assay offices, as well as to the clerical staff of the Bureau, for the fidelity and zeal they display in performing the duties assigned them.

Respectfully, yours,

R. E. Preston, Director of the Mint.

Hon. J. G. CARLISLE, Secretary of the Treasury.

LHI.—COINS OF THE UNITED STATES, AUTHORITY FOR COINING, AND CHANGES IN WEIGHT AND FINENESS AND AMOUNT COINED.

GOLD COINS.

DOUBLE EAGLE.

Authorized to be coined, act of March 3, 1849. Weight, 516 grains; fineness, 0.900. Total amount coined to June 30, 1896, \$1,277,693,220.

EAGLE.

Authorized to be coined, act of April 2, 1792. Weight, 270 grains; fineness, 0.9163. Weight changed, act of June 28, 1834, to 258 grains. Fineness changed, act of June 28, 1834, to 0.899,225. Fineness changed, act of January 18, 1837, to 0.900. Total amount coined to June 30, 1896, \$266,538,270.

HALF EAGLE.

Authorized to be coined, act of April 2, 1792. Weight, 135 grains; fineness, 0.916%. Weight changed, act of June 28, 1834, to 129 grains. Fineness changed, act of June 28, 1834, to 0.899,225. Fineness changed, act of January 18, 1837, to 0.900. Total amount coined to June 30, 1896, \$220,631,035.

QUARTER EAGLE.

Authorized to be coined, act of April 2, 1792. Weight, 67.5 grains; fineness 0.916\(^2_8\). Weight changed, act of June 28, 1834, to 64.5 grains. Fineness changed, act of June 28, 1834, to 0.899,225. Fineness changed, act of January 18, 1837, to 0.900. Total amount coined to June 30, 1896, \$28,711,015.

LHA.—COINS OF THE UNITED STATES, AUTHORITY FOR COINING, AND CHANGES IN WEIGHT AND FINENESS AND AMOUNT COINED—Cont'd.

THREE-DOLLAR PIECE.

Authorized to be coined, act of February 21, 1853. Weight, 77.4 grains; fineness, 0.900. Total amount coined to September 26, 1890, \$1,619,376. Coinage discontinued, act of September 26, 1890.

ONE DOLLAR.

Authorized to be coined, act of March 3, 1849. Weight, 25.8 grains; fineness, 0.900. Total amount coined to September 26, 1890, \$19,499,337. Coinage discontinued, act of September 26, 1890.

SILVER COINS.

DOLLAR.

Authorized to be coined, act of April 2, 1792. Weight, 416 grains; fineness, 0.892,4. Weight changed, act of January 18, 1837, to 412½ grains. Fineness changed, act of January 18, 1837, to 0.900. Coinage discontinued, act of February 12, 1873. Total amount coined to February 12, 1873, \$8,031,238. Coinage reauthorized, act of February 28, 1878. Amount coined from March 1, 1878, to June 30, 1896, \$430,790,041. Total amount coined to June 30, 1896, \$438,821,279.

TRADE DOLLAR.

Authorized to be coined, act of February 12, 1873. Weight, 420 grains; fineness, 0.900. Coinage limited to export demand, joint resolution July 22, 1876. Coinage discontinued, act of February 19, 1887. Total amount coined, \$35,965,924.

HALF DOLLAR.

Authorized to be coined, act of April 2, 1792.
Weight, 208 grains; fineness, 0.892,4.
Weight changed, act of January 18, 1837, to 2061 grains.
Fineness changed, act of January 18, 1837, to 0.900.
Weight changed, act of February 21, 1853, to 192 grains.
Weight changed, act of February 12, 1873, to 12½ grams, or 192.9 grains.
Total amount coined to June 30, 1896, \$132,662,308.

COLUMBIAN HALF DOLLAR.

Authorized to be coined, act of August 5, 1892. Weight, 192.9 grains; fineness, 0.900. Total amount coined, \$2,501,052.50.

QUARTER DOLLAR.

Authorized to be coined, act of April 2, 1792.
Weight, 104 grains; fineness, 0.892,4.
Weight changed, act of January 18, 1837, to 103\frac{1}{3} grains.
Fineness changed, act of January 18, 1837, to 0.900.
Weight changed, act of February 21, 1853, to 96 grains.
Weight changed, act of February 12, 1873, to 6\frac{1}{4} grams, or 96.45 grains.
Total amount coined to June 30, 1896, \$51,166,166.75.

COLUMBIAN QUARTER DOLLAR.

Authorized to be coined, act of March 3, 1893. Weight, 96.45 grains; fineness, 0.900. Total amount coined, \$10,005.75.

EM.—COINS OF THE UNITED STATES, AUTHORITY FOR COINING, AND CHANGES IN WEIGHT AND FINENESS AND AMOUNT COINED—Cont'd.

TWENTY-CENT PIECE.

Authorized to be coined, act of March 3, 1875. Weight, 5 grams, or 77.16 grains; fineness, 0.900. Coinage discontinued, act of May 2, 1878. Total amount coined, \$271,000.

DIME.

Authorized to be coined, act of April 2, 1792. Authorized to be coined, act of April 2, 1732.
Weight, 41.6 grains; fineness, 0.892,4.
Weight changed, act of January 18, 1837, to 41‡ grains.
Fineness changed, act of January 18, 1837, to 0.900.
Weight changed, act of February 21, 1853, to 38.4 grains.
Weight changed, act of February 12, 1873, to 2‡ grams, or 38.58 grains.
Total amount coined to June 30, 1896, \$28,904,300.50.

HALF DIME.

Authorized to be coined, act of April 2, 1792. Weight, 20.8 grains; fineness, 0.892,4. Weight changed, act of January 18, 1837, to 20§ grains. Fineness changed, act of January 18, 1837, to 0.900. Weight changed, act of February 21, 1853, to 19.2 grains. Coinage discontinued, act of February 12, 1873. Total amount coined, \$4,880,219.40.

THREE-CENT PIECE.

Authorized to be coined, act of March 3, 1851. Weight, 12% grains; fineness, 0.750. Weight changed, act of March 3, 1853, to 11.52 grains. Fineness changed, act of March 3, 1853, to 0.900. Coinage discontinued, act of February 12, 1873. Total amount coined, \$1,282,087.20.

MINOR COINS.

FIVE CENT (NICKEL).

Authorized to be coined, act of May 16, 1866. Weight, 77.16 grains; composed of 75 per cent copper and 25 per cent nickel. Total amount coined to June 30, 1896, \$14,292,235.30.

THREE CENT (NICKEL).

Authorized to be coined, act of March 3, 1865. Weight, 30 grains; composed of 75 per cent copper and 25 per cent nickel. Coinage discontinued, act of September 26, 1890. Total amount coined, \$941,349.48.

TWO CENT (BRONZE).

Authorized to be coined, act of April 22, 1864.
Weight, 96 grains; composed of 95 per cent copper and 5 per cent tin and zinc.
Coinage discontinued, act of February 12, 1873.
Total amount coined, \$912,020.

CENT (COPPER).

Authorized to be coined, act of April 2, 1792. Weight, 264 grains.

Weight changed, act of January 14, 1793, to 208 grains. Weight changed by proclamation of the President, January 26, 1796, in conformity with act of March 3, 1795, to 168 grains.

Coinage discontinued, act of February 21, 1857.

Total amount coined, \$1,562,887.44.

LIE.—COINS OF THE UNITED STATES, AUTHORITY FOR COINING, AND CHANGES IN WEIGHT AND FINENESS AND AMOUNT COINED—Cont'd.

CENT (NICKEL).

Authorized to be coined, act of February 21, 1857.

Weight, 72 grains; composed of 88 per cent copper and 12 per cent nickel. Coinage discontinued, act of April 22, 1864.
Total amount coined, \$2,007,720.

CENT (BRONZE).

Coinage authorized, act of April 22, 1864.

Weight, 48 grains; composed of 95 per cent copper and 5 per cent tin and zinc. Total amount coined to June 30, 1896, \$8,073,910.34.

HALF CENT (COPPER).

Authorized to be coined, act of April 2, 1792.

Weight, 132 grains.

Weight changed, act of January 14, 1793, to 104 grains.

Weight changed by proclamation of the President, January 26, 1796, in conformity with act of March 3, 1795, to 84 grains.

Coinage discontinued, act of February 21, 1857.

Total amount coined, \$39,926.11.

TOTAL COINAGES.

Gold	\$1, 814, 692, 253. 00
Silver	
Minor	27, 830, 048. 67

Besides gold and silver and certificates of deposit of gold and silver with the Treasury, the circulation of the United States consists of Government and nationalbank notes.

VENEZUELA.

The monetary unit is the venezolano or peso, divided into 100 centavos, a silver coin weighing 25 grams, 0.900 fine, or equal to the French silver 5-franc piece. There are also gold coins equal to the French gold pieces. The one-fifth venezolano piece is called the "bolivar," equal to 1 franc.

The ratio of gold to silver is 1 to 15½. The only difference between the French monetary system and that of Venezuela is that whereas the French 5-franc piece is unlimited legal tender, the 5-bolivar piece or venezolane is legal tender only to the amount of 500 bolivars, or about \$100 in United States gold coin. In this respect Venezuela is more like a single gold-standard country. For convenience, however, it is generally classed among double-standard countries.

The weight, fineness, etc., expressed in grains of the coins of Venezuela are as

follows:

•GOLD.

Denomination.	Weight.	Fineness.	Pure gold contained.	Value in United States gold coin.
100 bolivars 50 bolivars 20 bolivars 10 bolivars 5 bolivars	248. 903 99. 561 49. 780	Thousandths. 900 900 900 900 900 900	Grains. 448. 025 224. 012 89. 605 44. 802 22. 401	\$19. 295 9. 647 3. 859 1. 929 . 964

SILVER.

Denomination.	Weight.	Fineness.	Pure silver contained.	Value compared with silver in United States silver dollar.

LIHE.—SUMMARY OF MONETARY EVENTS SINCE 1786.

1786.—Establishment of the double standard in the United States with a ratio of 1 to 15.25; that is, on the basis of 123.134 grains of fine gold for the half eagle or \$5 piece, and 375.64 grains of fine silver for the dollar, without any actual coinage.

1792.—Adoption of the ratio of 1 to 15 and establishment of a mint with free and gratuitous coinage in the United States; the silver dollar equal to 3711 grains fine,

the eagle to 247; grains fine.

1803.—Establishment of the double standard in France on the basis of the ratio of 1 to 15½, notwithstanding the fact that the market ratio was then about 1 to 15.

1810.—Introduction of the silver standard in Russia on the basis of the ruble of 17.99 grams of fine silver, followed in 1871 by the coinage of imperials or gold pieces of 5 rubles, of 5.998 grams, therefore with a ratio of 1 to 15. This ratio was changed by the increase of the imperial to 5 rubles 15 copecks, and later to 1 to 15.45.

1815.—Great depreciation of paper money in England, reaching 26½ per cent in May. Course of gold, £5 6s., and of silver, 71½d. per ounce standard. In December the loss was only 6 per cent. Gold at this period was quoted at £4 3s., and silver

1816.—Abolition of the double standard in England which had had as its basis the ratio of 1 to 15.21, and adoption of the gold standard on the basis of the pound sterling at 7.322 grams fine in weight.

Coinage of divisional money at the rate of 66d. per ounce. Extreme prices, £4 2s.

for gold and 64d. for silver; in January, £3 18s. 6d., and 591d. in December. 1816.—Substitution for the ratio of 1 to 15.5 in Holland, established by a rather confused coinage, of the ratio of 1 to 15%.

1819.—Abolition of forced currency in England. Price of gold £3 17s. $10\frac{1}{2}$ d. and of silver, 62d. per ounce in October, against £4 1s. 6d. and 67d. in February. 1832.—Introduction of the monetary system of France in Belgium with a decree providing for the coinage of pieces of 20 and 40 francs, which, however, were not travel.

stamped. Silver, 594d.

1834.—Substitution of the ratio of 1 to 16 for that of 1 to 15 in the United States by reducing the weight of the eagle, \$10 gold piece, from 270 grains to 258 grains.

In 1837 the fineness of the United States gold coins was raised from 0.899225 to 0.900, and the silver coins from 0.8924 to 0.900, giving a ratio of 1 to 15.988 and fixing the standard weight of the silver dollar at 412½ grains. Silver, 59½d.

1835.—Introduction of the company rupee, a piece of silver weighing 165 grains

fine, in India, in place of the sicca rupee. Creation of a trade coin—the mohur, or piece of 15 rupees—containing 165 grains of fine gold. Silver, 591d.

1844.—Introduction of the double standard in Turkey, with the ratio of 1 to 15.10.

Silver, 591d.

1847.—Abolition of the double standard in Holland by the introduction of the silver standard on the basis of a 1-florin piece 0.945 grams fine, the coinage of which had already been decreed in 1839. Silver, 5944d. 1847.—Discovery of the gold mines of California.

1848.—Coinage in Belgium of pieces of 10 and 25 francs in gold, a shade too light. These pieces were demonstrated and withdrawn from circulation in 1884. Silver,

1848.—Replacing the ratio of 1 to 16 in Spain, which had been in force since 1786, by that of 1 to 15.77.

1850.—Introduction of the French monetary system in Switzerland without any actual coinage of gold pieces. Silver, 60^{1}_{16} d.

1851.—Discovery of the gold mines of Australia.

1853.—Lowering of the weight of silver pieces of less value than \$1 to the extent of 7 per cent in the United States, and limitation of their legal-tender power to \$5. Silver, 61 d.

1853.—Maximum of the production of gold reached in California, when it amounted to \$65,000,000.

1854.—Introduction of the gold standard in Portugal on the basis of the crown of 16.257 grams fine. Before this period the country had the silver standard, with a rather large circulation of gold coins stamped on the basis of 1 to 15½ in 1835 and 1 to 16½ in 1847. Silver, 61½d.

1854.—Modification of the ratio of 1 to 15.77 in Spain by raising it to 1 to 15.48, and by lowering the piaster from 23.49 grams to 23.36 grams fine.

1854.—Introduction of the silver standard, as it existed in the mother country, in Java, in place of the ideal Javanese money, and coinage of colonial silver pieces.

¹ The price of silver given hereafter represents the average rate per ounce standard—that is, the mean between the highest price and the lowest price quoted during the year.

NIES -SUMMARY OF MONETARY EVENTS SINCE 1786-Continued.

1857.—Conclusion of a monetary treaty between Austria and the German States, in accordance with which I pound of fine silver (one-half a kilogram) was stamped into 30 thalers or 521 florins of south Germany, or 45 Austrian florins, resulting in 1 thater equaling 1½ German florins or 1½ Austrian florins. Silver, 61¼d.

1861.—Law decreeing the coinage of gold pieces of 10 and 20 francs exactly equal to French coins of the same denomination in Belgium. Silver, 61¼d.

1862.—Adoption of the French monetary system by Italy. Silver, 6176d.

1865.—Formation of the Latin Union between France, Belgium, Switzerland, and Italy on the basis of a ratio of 1 to 15½. Silver, 61½d.

1867.—First international monetary conference held in Paris.

1868.—Adoption of the French monetary system by Roumania, with the exclusion of the 5-franc silver piece, which was, however, stamped in 1881 and 1883. Silver, 60⅓d.

1868.—Admission of Greece into the Latin Union. The definite and universal introduction of the French monetary system into the country was effected only in

1883.

1868.—Adoption of the French monetary system, with the peseta or franc as the unit, by Spain. The coinage of gold alphonses d'or of 25 pesetas was made only in

1871.—Replacing of the silver standard in Germany by the gold standard. Coinage in 1873 of gold pieces of 5, 10, and 20 mark pieces, the latter weighing 7.168 grams fine. Silver, 60±d.

1871.—Establishment of the double standard in Japan with the ratio of 1 to 16.17 by the coinage of the gold yen of 1.667 grams and of the silver yen of 26.956 grams,

both with a fineness of 0.900.

1873.—Increase of the intrinsic value of the subsidiary coins of the United States. Replacing of the double standard by the gold standard. Reduction of the cost of coinage of gold to one-fifth per cent, the total abolition of which charge was decreed in 1875. Creation of a trade dollar of 420 grains with a fineness of 0.900. Silver, 59¼d.

1873.—Suspension of the coinage of 5-franc pieces in Belgium.

1873.—Limitation of the coinage of 5-francs on individual account in France.

1873.—Suspension of the coinage of silver in Holland.

1873.—Formation of the Scandinavian Monetary Union. Replacing of the silver standard in Donmark, Sweden, and Norway by that of gold on the basis of the krone. Coinage of pieces of 10 and 20 kroner, the latter weighing 8.961 grams, with a fineness of 0.900.

1874.—Introduction of the system of contingents for the coinage of 5-franc silver

pieces in the Latin Union. Silver, 58 16 d.

1875.—Suspension of the coinage of silver on individual account in Italy. Silver, 56{d.

1875.—Suspension of the coinage of silver on account of the Dutch colonies.

1875.—Introduction of the double standard in Holland on the basis of the ratio of 1 to 15.62 by the creation of a gold piece of 10 florins, weighing 5.048 grams fine, with the maintenance of the suspension of the coinage of silver.

1876.—Great fluctuations in the price of silver, which declined to 462d., representing the ratio of 1 to 20.172, in July. Recovery, in December, to 58½d. Average

price, 52**4d.**

1877.—Coinage of 5-franc silver pieces by Spain continued later, notwithstanding the decline of silver in the market. Silver, 543d.

1877.—Replacing of the double standard in Finland by that of gold or the basis of the mark or franc.

1878.—Act of United States Congress providing for the purchase, from time to time, of silver bullion, at the market price thereof, of not less than \$2,000,000 worth per month as a minimum, nor more than \$4,000,000 worth per month as a maximum, and its coinage as fast as purchased into silver dollars of 412½ grains. The coinage of silver on private account prohibited. Silver, 5216d.

1878.—Meeting of the second international monetary conference in Paris. Prolongation of the Latin Union to January 1, 1886.
1879.—Suspension of the sales of silver by Germany. Silver, 514d.

1879.—Resumption of specie payment by the United States.
1887.—Third international monetary conference in Paris. Silver, 514d.

1885.—Introduction of the double standard in Egypt. Silver, 48\$\frac{2}{3}d.

1885.—Prolongation of the Latin Union to January 1, 1891.

1886.—Great decline in the price of silver, which fell in August to 42d., representing a ratio of 1 to 22.5, and recovery, in December, to 46d. Modification of the coinage of gold and silver pieces in Russia. Silver, 45gd.

1887.—Retirement of the trade dollars by the Government of the United States in

February. Demonetization of the Spanish piasters, known as Ferdinand Carolus,

LINE.—SUMMARY OF MONETARY EVENTS SINCE 1786—Continued.

whose reimbursement at the rate of 5 pesetas ended on March 11. New decline of

silver in March to 44d., representing the ratio of 1 to 21.43. Silver, 44\(\frac{1}{3}\)d. —United States—Repeal of the act of February 28,1878, commonly known as Bland-Allison law, and substitution of authority for purchase of 4,500,000 fine ounces of silver each month to be paid for by issue of Treasury notes payable in coin. (Act of July 14, 1890.) Demonetization of 25,000,000 lei in pieces of 5 lei in Roumania in consequence of the introduction of the gold standard by the law of October 27. Silver, 4711d.

1891.—Introduction of the French monetary system in Tunis on the basis of the

gold standard. Coinage of national gold coins and billon. Silver, 45 16d.

1892.—Replacing of the silver standard in Austria-Hungary by that of gold by the law of August 2. Coinage of pieces of 20 crowns, containing 6.098 grams fine. The crown equals one-half florin. Meeting of the fourth international monetary conference at Bressels. Production of gold reaches its maximum, varying between 675,000,000 and 734,000,000 francs. Silver, 3913d.

1893.—Suspension of the coinage of silver in British India and of French trade dollars on individual account. Panic in the silver market in July in London, when the price fell below 30d., representing the ratio of 1 to 31.43. Repeal of the purchasing clause of the act of July 14, 1890, by the Congress of the United States.

1895.—Adoption of the gold standard by Chile.

1895.—Russia decides to coin 100,000,000 gold rubles in 1896.

LIV.-DOCUMENTARY HISTORY OF THE COINAGE ACT OF FEBRUARY 12, 1873.

[Senate Mis. Doc. No. 132, Forty-first Congress, second session. Letter of the Secretary of the Treasury to the chairman of the Committee on Finance, communicating a report of John Jay Knox in relation to a revision of the laws pertaining to the Mint and coinage of the United States. April 28, 1870, referred to the Committee on Finance and ordered to be printed. May 2, 1870, ordered that 500 additional copies be printed for the use of the Treasury Department.]

TREASURY DEPARTMENT, April 25, 1870.

SIR: I have the honor to transmit herewith "A bill revising the laws relative to the mint, assay offices, and coinage of the United States," and accompanying report. The bill has been prepared under the supervision of John Jay Knox, Deputy Comptroller of the Currency, and its passage is recommended in the form presented. It includes, in a condensed form, all the important legislation upon the coinage, not now obsolete, since the first mint was established, in 1792; and the report gives a concise statement of the various amendments proposed to existing laws and the necessity for the change recommended. There has been no revision of the laws pertaining to the mint and coinage since 1837, and it is believed that the passage of the inclosed bill will conduce greatly to the efficiency and economy of this important branch of the government service.

I am, very respectfully, your obedient servant,

GEO. S. BOUTWELL, Secretary of the Treasury.

Hon. John Sherman, Chairman Finance Committee, Senate of the United States.

REPORT OF THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, December 7, 1896.

SIR: In compliance with law, I herewith submit for the consideration of Congress the annual report of the Comptroller of the Currency. It constitutes the thirty-fourth report made, and is for the year ended October 31, 1896.

The total number of national banks organized from the date of the granting of the first certificate of authority, on June 20, 1863, to the close of the year embraced in this report has been 5,051, making an average for each year of 153. On the 31st of October last there were in active operation, of this number, 3,679, having an authorized capital stock of \$650,014,895, represented by 288,902 shareholders. The average capital stock of each bank in the system was \$176,682, the number of shares to each, 2,296, and of shareholders, 78. The total outstanding circulating notes of the banks in active operation was \$211,412,820, of which \$208,988,172 was secured by bonds of the United States and the balance by lawful money deposited with the Treasurer. The total of all national-bank circulation outstanding on October 31 was \$234,553,807, of which amount \$7,091,205 was secured by bonds still held for account of insolvent and liquidating banks and \$18,747,430 by lawful money deposited for their account, and by active banks reducing circulation.

The net increase in the amount of circulation secured by bonds during the year was \$26,329,053, and the gross increase in the total circula-

tion, \$21,099,429.

On October 6, 1896, the date of the last report of condition, the total resources of the 3,676 banks then reporting was \$3,263,685,313.83, of which \$1,893,268,839.31 represented their loans and discounts and \$362,165,733.85 money of all kinds in bank.

Of their liabilities, \$1,597,891,058.73 represented individual deposits, \$336,342,834.70 surplus and net undivided profits, and \$209,944,019.50

outstanding circulating notes secured by bonds.

In geographical divisions the 3,679 banks in operation are divided as follows: 1,539 banks with capital stock of \$401,145,135 in the Eastern States, including Delaware and Maryland; 1,583, with capital stock of \$110,241,660, in the Western, and 557 with capital stock of \$138,628,100 in the Southern States.

In point of number of active banks Pennsylvania, New York, Massachusetts, Ohio, Illinois, and Texas lead with 420, 328, 268, 248, 221, and 206 banks, respectively. Arranged according to capital stock, Massa-

chusetts is first with \$97,017,500; New York second, with \$86,036,060; Pennsylvania third, with \$74,753,129; followed by Ohio, with \$45,770,338;

Illinois, \$38,746,000, and Texas \$21,863,090.

There were organized during the report year 28 banks, located in 15 States and the District of Columbia, with an aggregate capital stock of \$3,245,000. Of this number 8 were in Pennsylvania, 2 each in New York, Georgia, North Carolina, Ohio, and West Virginia, and 1 each in Alabama, Illinois, Kansas, Kentucky, Maine, Missouri, Texas, Virginia, Wisconsin, and District of Columbia. The number located in the Eastern States is 12, the capital stock aggregating \$1,180,000; in the Western States 6, with a combined capital stock of \$875,000, and in the Southern States 10, having a total capital stock of \$1,190,000. The State of Georgia is first in amount of capital stock represented by new banks, having \$600,000; Pennsylvania has \$520,000, and the District of Columbia \$500,000.

The number of banks organized was 18 per cent of the yearly average. The corporate existence of 26 national banks in 16 States, with capital stock of \$3,153,800 and a total circulation of \$1,175,400, has been extended during the year. Pennsylvania has 5; New Jersey and Illinois 3 each; Delaware and North Carolina 2 each; and in the following States 1 each: Alabama, Colorado, Connecticut, Georgia, Iowa, Maine, Maryland, Massachusetts, Minnesota, New York, and Ohio. Of the total capital, Pennsylvania aggregates \$690,000; New Jersey, \$272,000; Illinois, \$150,000; Delaware, \$140,800; North Carolina, \$151,000; Alabama, \$100,000; Colorado, \$100,000; Connecticut, \$100,000; Georgia, \$100,000; Iowa, \$400,000; Maine, \$50,000; Maryland, \$75,000; Massachusetts, \$100,000; Minnesota, \$50,000; New York, \$75,000; and Ohio, \$600,000.

Under the act of July 12, 1882, providing for the extension of national banks, the corporate existence of 1,633 banks, representing an aggregate capital stock of \$403,247,115, has been extended. Of these New York has 233, with capital stock of \$73,572,460; Massachusetts 228, with capital stock of \$92,592,200; Pennsylvania 204, with capital stock of \$53,776,000, followed by Ohio with 112 and an aggregate capital of \$18,479,000.

The number of banks leaving the system by reason of the expiration of their corporate existence was 1, having capital stock of \$100,000 and circulation of \$90,000. This bank was located in North Carolina, and was succeeded by a new association with capital stock of \$100,000

and circulation of \$22,500.

During the year ending October 31, 1897, the corporate existence of 19 banks, with a capital stock aggregating \$2,289,000 and circulation of \$783,900, will expire. They are located in 13 States, 4 of them being in New York, 2 each in Colorado, Michigan, and Ohio, and 1 each in Georgia, Indiana, Iowa, Maine, Massachusetts, Nebraska, New Hampshire, Pennsylvania, and Texas. In the succeeding ten years, from 1897 to 1906, inclusive, the corporate existence of 993 banks, having capital stock of \$146,461,150 and circulation of \$39,003,872, will expire.

The number of banks leaving the system during the year through voluntary liquidation was 37, having capital stock of \$3,745,000 and

circulation of \$1,262,815.

It has been found necessary to appoint receivers for 27 banks during the year. Their aggregate capital stock was \$3,805,000 and circulation \$761,500. Of this number 4, with capital stock of \$995,000, were among those which closed their doors in 1893 and subsequently resumed

business, but through continued business depression and the slow character of their assets were unable to meet their obligations, and were

thus compelled to go into insolvency.

A comparison of the data of this year with that set forth in the report of this Bureau for the year 1895 shows the number of active banks to have decreased 36, with a decrease in capital stock of \$4,305,000. The number of banks organized is 15 less and the number going into voluntary liquidation 14 less. There has been a decrease of 9 in the number of receivers appointed and 45 in the number of extensions of corporate existence. The loss through expiration of charters decreased 3, and the number of banks organized to succeed expiring associations remains unchanged.

The following abstracts of the reports made by the banks in response to the five calls required by law indicate the changes which have characterized the status of the banks at different periods covered by the report. In addition thereto are given abstracts of the reports of 1892, 1893, 1894, and 1895, for purposes of comparison. The rapidity of change in condition from time to time during these years has been so

marked that it is deemed worth while to call attention thereto.

SUMMARY OF THE STATE AND CONDITION OF EVERY NATIONAL BANK REPORTING DURING THE YEAR ENDED SEPTEMBER 30, 1892.

ANALYSIS OF REPORTS OF 1896.

The change in the item of individual deposits during the report year of 1896 is shown to be as follows: It increased from \$1,701,653,521 on September 28, 1895, to \$1,720,550,241 on December 13, 1895; declined to \$1,648,092,868 on February 28, 1896, then slightly increased on May 7, 1896, again decreased from \$1,668,413,507 on July 14, 1896, to \$1,597,891,058 on October 6, 1896, being almost \$104,000,000 less than the amount shown on September 28, 1895.

The number of banks holding these deposits on September 28, 1895, was 3,712, with capital stock of \$657,135,498, as against 3,676 on

October 6, with capital stock of \$648,540,325.

The surplus fund of the banks on September 28, 1895, was \$246,448,426, and their net undivided profits \$90,439,924. On October 6, 1896, the former had increased to \$247,690,074, while the latter had decreased to

\$88,652,759.

On September 28, 1895, national-bank notes outstanding secured by bonds deposited amounted to \$182,481,610. The returns under each call showed a continued increase during the year, the amount on December 13, 1895, being \$185,151,344, on February 28, 1896, \$187,217,372, on May 7, 1896, \$197,382,364, on July 14, 1896, \$199,214,049, and on October 6, 1896, \$209,944,019.

The amount due to other national banks, which on September 28, 1895, stood at \$320,228,677, decreased to \$285,314,203 on May 7, 1896, increased on July 14, 1896, to \$291,990,811, and then fell to \$269,043,386

on October 6, 1896.

The amount due to State banks and bankers, which on September 28, 1895, was \$174,708,672, decreased to \$157,980,455 on May 7, 1896, increased to \$162,311,142 on July 14, 1896, and fell to \$146,058,794 on October 6, 1896.

The liabilities of the national banks for money borrowed, in different forms, aggregated on September 28, 1895, \$35,254,611, had increased on February 28 to \$40,866,736, decreased to \$30,573,001 on July 14,

increasing to \$38,967,450 on October 6.

The total liabilities, which on September 28, 1895, were \$3,423,629,343, decreased to \$3,377,638,822 on May 7, 1896, and to \$3,263,685,313

on October 6.

On the side of resources, the loans and discounts, which on September 28, 1895, amounted to \$2,059,408,402, decreased to \$1,966,211,736 on February 28, 1896. They increased on May 7 to \$1,982,886,364, only to decrease to \$1,893,268,839 on October 6, indicating a falling off in this item of about \$166,000,000 as compared with the aggregate of loans and discounts on September 28, 1895.

The amount of United States bonds to secure circulation, which on September 28, 1895, was \$208,682,765, increased to \$237,291,650 on

October 6, 1896.

The banks held, on September 28, 1895, \$26,118,350 United States bonds, other than those securing circulation. On December 13 the amount decreased to \$24,013,900, then increased on February 28, 1896, to \$48,132,400, and decreased on October 6 to \$25,135,500.

The investment of assets in stocks, securities, etc., on September 28, 1895, was \$195,028,085. It had decreased on October 6 to \$188,995,352.

The investment in banking house, furniture, and fixtures, which on September 28, 1895, was \$78,244,849, showed but slight variations during the year, being on October 6, \$78,046,817.

Other real estate and mortgages owned on September 28, 1895, amounted to \$25,527,027, and increased to \$27,403,155 on October 6.

The amount due from other national banks (not reserve agents) on September 28, 1895, was \$123,521,087, increased on December 13 to \$131,007,238, then decreased to \$114,073,966 on May 7, increased slightly on July 14, 1896, and decreased to \$111,830,935 on October 6.

The amount due from State banks and bankers on September 28, 1895, was \$30,830,482, increased to \$33,341,627 on December 13, and

decreased on October 6 to \$29,583,299.

The amount due from approved reserve agents decreased from \$222,287,251 on September 28, 1895, to \$189,344,601 on February 28, afterward increased to \$204,384,106 on July 14, and decreased to \$190,077,533 on October 6.

Exchanges for clearing house, which on September 28, 1895, amounted to \$57,506,787; on February 28 had increased to \$89,996,450, but

decreased, on October 6, to \$76,760,416.

The specie held by the banks on September 28, 1895, was \$196,237,311,

while on October 6, it was \$200,808,632.

The amount of legal-tender notes and United States certificates of deposit for such notes which on September 28, 1895, aggregated \$143,866,685, decreased to \$130,649,423 on December 13, increased to \$147,006,652 on May 7, decreased to \$140,378,290 on July 14, and increased to \$142,334,730 on October 6.

REVIEW OF REPORTS, 1892 TO 1896.

As a supplement to the analysis of the bank returns of 1896, it is not out of place to undertake a brief review of those of the past four years, marking as they do the most trying conditions through which the national banking system has been called to pass. Such review, it is believed, will best illustrate the very great changes which have

occurred within a period so comparatively brief.

On September 30, 1892, the aggregate resources, as also the aggregate liabilities, of the national banks rose to the highest mark in the history of the system, viz, \$3,510,094,897. On the side of liabilities, individual deposits stood at \$1,765,422,983, and on the side of resources, loans and discounts were \$2,171,041,088, being respectively the maximum amount ever registered, either before or since September 30, 1892. Along the lines of these two items of receiving deposits and lending money, representing, as they do, the principal functions of banking in this country, the greatest fluctuations have occurred during the years under consideration. The item of deposits showed very little variation in amount from September 30, 1892, to May 4, 1893, when it was \$1,749,930,817. After the latter date, however, it shrunk suddenly and rapidly to \$1,556,761,230 on July 12, 1893, and on October 3, 1893, touched \$1,451,124,330, the lowest point since December 11, 1889. From this shrinkage of deposits, amounting to nearly \$300,000,000, from May 4 to October 3, there was a rapid and steady recovery, until on October 2, 1894, just a year after the date of lowest depression, they were \$1,728,418,819, or but \$21,000,000 less than on May 4, 1893. There was thereafter for a brief period a slight decrease in the volume, but it rose again on July 11, 1895, to \$1,736,022,006, falling to \$1,648,092,868 on February 28, 1896, and standing at \$1,668,413,507 on July 14, 1896. Between this date and October 6, 1896, decrease was marked, being nearly \$71,000,000, leaving the deposits at the latter date at \$1,597,891,058.

The resources of the banks showed loans and discounts to the amount of \$2,161,401,858 on May 4, 1893. They had fallen on July 12 to \$2,020,483,671, and on October 3 to \$1,843,634,167. It is noticeable that

after this date there was a steady expansion of loans and discounts

until October 2, 1894, when the amount was \$2,007,122,191.

As the deposits held by national banks are the chief source of supply for the funds from which loans and discounts are made to their customers, and as the law requires the banks, in the interest of depositors, to keep on hand in money a stated proportion of the funds deposited with them for safe keeping, known as lawful money reserve, this reserve is necessarily affected by the movements of deposits and loans, and an examination of its ebb and flow during the four years under review is of equal interest.

On September 30, 1892, the lawful money reserve of all the banks, consisting of specie, legal money notes, and certificates for legal tenders deposited, amounted to \$327,000,000; on December 9, 1892, it was \$318,000,000; on March 6, 1893, \$313,000,000, and on May 4, 1893, \$322,000,000. The variations during this period, it thus appears, were slight; but owing to the extraordinary demands of depositors occurring suddenly and unexpectedly after May 4, the reserve on July 12, 1893, fell to \$289,000,000, the banks being compelled to pay \$193,000,000 of deposits during that period, \$141,000,000 of which were provided by the calling in of loans and discounts, which the banks, under the force

of such withdrawals, were compelled to demand.

The drain of deposits continued after July 12, and by October 3, 1893, \$105,000,000 additional had been withdrawn, these and prospective withdrawals being provided for by the collection of \$177,000,000 of loans and discounts, with the result that the reserve on hand reached on October 3, \$346,000,000. After October 3, 1893, with returning confidence, deposits rapidly returned to the banks and there was gradual expansion of loans and discounts, though in smaller proportion. There was again an increase in reserve. From \$346,000,000 on October 3 it went to \$414,000,000 on December 19, 1893; to \$433,000,000 on February 28, 1894, touching on May 4, 1894, \$452,000,000, the highest point it has ever reached. It decreased to \$439,000,000 on July 18, to \$402,000,000 on October 2, and \$374,000,000 on December 19, 1894. On July 11, 1895, the amount stood at \$382,000,000, after which it fell to \$340,000,000 on September 28, 1895, since which time, and up to October 6, 1896, the reserve on hand has not been subject to sudden fluctuations. The variations are measured by a limit of \$12,000,000 between the highest and lowest amounts held.

With a more settled condition in business affairs there was seen a greater expansion of loans and discounts and a consequent gradual

decrease in the amount of reserve held.

The amount of circulating notes of the national banks outstanding on September 30, 1892, was but \$143,423,298. The increase thereof was very slight and gradual, due mainly to the compulsory obligation of new banks to deposit bonds, up to July 12, 1893, when it stood at \$155,070,821. Under the stress of a currency famine the issues expanded by October 3, 1893, to \$182,959,725, but thereafter steadily decreased, falling to \$169,337,071, on December 19, 1894. With the new issue of bonds, the lessened price of bonds, and an apparent increased margin of profit in issuing notes, the volume began to increase, untilon October 6, 1896, it amounted to \$209,944,019, or about \$66,000,000 greater than on September 30, 1892.

In the matter of capital stock, the maximum in the history of the system was reached on December 9, 1892, being \$689,698,017 for 3,784 banks. This amount had decreased to \$688,701,200 on May 4,1893, while the number of banks had increased to 3,830, the largest number doing business at any time since the establishment of the system. After May 4,

1893, there was an almost steady decrease in capital stock as well as in the number of banks, and on October 6, 1896, there were but 3,676 banks doing business with capital of \$648,540,325, a falling off of 154 in the number of banks and of over \$40,000,000 in capital stock. It is, however, noteworthy that in the face of this substantial decrease in the number of banks and their capital stock, they had, on October 6, 1896, a surplus fund of \$247,690,074, and net undivided profits of \$88,652,759, making a total of \$336,342,833 as compared with an aggregate of \$340,524,178 on September 30, 1892, of which \$238,871,424 was surplus fund and \$101,652,754 net undivided profits.

In view of the heavy losses sustained by the banks during four years of severe liquidation and shrinkage in values, reflected in the figures showing largely reduced net earnings (only 5 per cent for the year ended March 1, 1895, and 5.4 per cent for 1896), these figures bear tribute not only to the efficiency of the law compelling banks to lay aside a certain percentage of earnings as a surplus fund, but also to the prudence and courage of bank managers in strengthening the security of depositors by doing more than the law requires in this respect in the face of

a largely reduced earning capacity.

The complaint has been not infrequently heard during the past years that those engaged in banking have been unfair toward the business public in the matter of withholding credit. A careful study of the returns given show that such restriction has resulted from necessity and not from choice. The unsettled currency conditions which have so marked the course of the country of late have made depositors more easily frightened into demanding their deposits, and to meet such calls on demand large amounts of idle money had to be constantly kept in In such case it could not be otherwise than that loans on the one hand should be called in and new credit denied on the other. profits of banking have thus been curtailed, for such profit arises only where the largest portion of a bank's deposits are in the hands of bor-The course pursued resulted in diminished profits to those interested as shareholders, but it in turn afforded the depositor the opportunity of obtaining his deposit whenever desired.

EARNINGS AND DIVIDENDS.

The act of March 3, 1869 (section 5212, Rev. Stat.), provides that each national banking association shall report to the Comptroller within ten days after declaring a dividend the amount of such dividend and the amount of net earnings in excess of such dividend. Abstracts of these reports by semiannual periods from associations in each State, reserve city, and geographical division for the current and prior years, will be found in the appendix, and also a table showing, from March 1, 1870, to March 1, 1896, the number of banks, capital, surplus, dividends, net earnings, and ratios of dividends, etc., to capital, etc., for each year, and the average for twenty-seven years. The average number of banks for the current year was 3,698; capital, \$655,960,855; surplus, \$248,203,540; net earnings, \$48,566,794; dividends paid, \$45,551,673. The average rate per cent of dividends paid was 6.9; the per cent of dividends based on capital and surplus, 5; and the per cent of net earnings on capital and surplus, 5.4. A comparison with the reports of the previous year indicates a decrease of 37 in number of banks, \$8,751,510 in capital, and \$700,872 in dividends paid; while the surplus fund increased \$2,597,285 and net earnings \$3,006,485. The surplus fund at its maximum, prior to the current year, was \$247,732,601 in 1894, when the number of banks was 3,764. This fund now exceeds that amount by \$470,939, while the number of banks is 66 less. The maximum rate of dividends paid was 10.5 percent in the year ended March 1, 1870, and the minimum 6.8 per cent in 1894. The aggregate amount of net earnings and dividends paid during the twenty-seven years was \$1,475,063,464 and \$1,200,699,576, respectively. The average rate of dividends based on capital for that period was 8.3 per cent; net earnings on capital and surplus, 7.9 per cent; and dividends on capital and surplus, 6.4 per cent.

REPORTS FROM STATE BANKS AND BANKING ASSOCIATIONS.

The information obtainable by the Comptroller relative to resources, liabilities, and condition of banks, banking companies, and savings institutions organized under State and Territorial authority is given herewith, and is substantially complete, except from the following named States and Territories: Delaware, Maryland, South Carolina, Georgia, Alabama, Louisiana, Texas, Arkansas, Tennessee, Washington, Oregon, Utah, Nevada, Idaho, New Mexico, and Indian Territory. To the official returns from State officers is added such information as has been furnished by State banks and bankers doing business in the States and Territories above named.

In view of the fact that reports sought, relative to the condition of State and other banks and in the various investigations undertaken, were not confined to national banks alone, the courtesy of replies received from those without the jurisdiction of the Comptroller is doubly appreciated. The gathering of these reports and the making of these investigations, however, show that very great good might be accomplished if, in the various States of the Union, there could be had uniformity as to date and form of reports of condition of banks, reports of earnings and dividends, and classification of money in bank. With this end in view, it is proposed to send at an early date from this office a circular addressed to the chief executives of the States, requesting them to call the attention of the legislatures to the desirability of taking such action as will bring about this result. At present there is a failure to present in one general report much valuable information as to banks other than national, owing to this want of uniformity in method and time in calling for statistics on the part of the various States. In justification of the suggestion, it is to be said that the Comptroller of the Currency is the only officer who has to do with the gathering of information relative to banks, who is required by law and who attempts to present a general summary of the banking condition of the whole country and of all classes of banks.

CONDITION OF STATE BANKS AND BANKING ASSOCIATIONS.

On or about the close of the fiscal year ended June 30, 1896, the number of banks incorporated under State authority and in operation was 5,708 and the number from which reports have been received 4,956. Reports have also been received from 824 private banks, making a total of 5,780 reporting banks, or 323 less than reported in 1895. Abstracts of the reports by classes and States with the sources of information indicated will be found in the Appendix.*

The following statement shows the principal items of resources and liabilities of these banks in 1893, 1894, 1895, and 1896:

Items.	1893.	1894.	1895.	1896.	
Loans Bonds Cash Cash Capital Surplus and undivided profits Deposits Resources	205, 645, 203 406, 007, 240 346, 206, 287 3, 070, 462, 680		\$2, 417, 468, 494 1, 375, 026, 025 227, 743, 303 422, 052, 618 370, 397, 003 3, 185, 245, 810 4, 138, 990, 529	\$2, 279, 515, 283 1, 210, 827, 389 169, 198, 601 400, 831, 399 362, 602, 702 3, 276, 710, 916 4, 200, 124, 955	

^{*} See footnote, page 507.

An analysis of the foregoing statement shows an increase in the aggregate resources in 1896 over those of 1895 of about \$61,000,000; over 1894 of \$331,000,000, and over 1893 (from reports received prior to the monetary stringency of that year) of \$221,000,000. Loans and discounts, which in 1893 amounted to \$2,348,193,077, declined in 1894 to \$2,133,628,978, increased in 1895 to \$2,417,468,494, and fell in 1896 to \$2,279,515,283. The cash held in 1893, amounting to \$205,645,203, increased in 1894 to \$229,373,004, declined in 1895 to \$227,743,303, and to \$169,198,601 in 1896. In 1894 the capital stock, which in 1893 amounted to \$406,007,240, had declined to \$398,735,390, increased to \$422,052,618 in 1895, and declined to \$400,831,399 in 1896. The deposits in 1896 are greater in amount than at any time during the four years under consideration, being \$3,276,710,916. In 1893 deposits amounted to \$3,070,462,680. They declined in 1894 to \$2,973,414,101, and increased to \$3,185,245,810 in 1895.

The number of State banks which reported is 3,708, a decrease of 66 from the number reporting in 1895. The principal items of resources and liabilities of these banks are: Loans, \$702,505,798; stocks and bonds, \$97,234,561; capital, \$240,133,835; deposits, \$695,659,914. The aggregate resources amount to \$1,107,187,508. These figures compared with those of 1895 show the decrease as follows: Capital, \$10,270,460; deposits, \$16,750,509; aggregate resources, \$40,358,310. Loans and discounts and investments in stocks and bonds have increased \$4,817,730

and \$5,245,865, respectively.

The reports of dividends paid by State banks and loan and trust of companies have been received from 1,310 institutions located in 32 of the States and Territories. State banks to the number of 1,195, with capital of \$87,985,913, reported the payment of dividends to the amount of \$5,985,222, the average rate being 6.8 per cent; loan and trust companies to the number of 115, with capital of \$52,715,402, paid dividends amounting to \$5,254,200, an average rate of 9.9 per cent. The aggregate capital of the State banks and loan and trust companies reporting this information is \$140,701,315, dividends paid \$11,239,422, and the average rate 7.9 per cent.

CONDITION OF SAVINGS BANKS.

Savings-bank reports to the number of 988 have been received, of which 677 are from mutual institutions and 311 from stock savings banks, the latter being operated for the benefit of both shareholders The aggregate resources of the latter class of banks and depositors. are only about 14 per cent of the resources of all reporting savings institutions. With the exception of 4 banks located in Ohio, 5 in Indiana, 1 in Wisconsin, and 1 in West Virginia, the mutual savings banks are confined to the New England and Eastern States. aggregate resources of this class of banks amount to \$1,849,906,921; loans and discounts, \$845,788,348; United States bonds, \$147,761,264; other bonds and stocks, \$717,416,244; surplus and undivided profits; \$158,595,655; and deposits, \$1,688,190,603. The aggregate resources of both mutual and stock savings banks are \$2,143,307,163; loans, \$1,055,187,769; United States bonds, \$148,525,375; other bonds and stocks, \$756,676,312; surplus and undivided profits, \$174,714,993; deposits, \$1,935,466,468, of which \$1,907,156,277 are savings deposit accounts. An increase over 1895 is noted in each of these items, as follows: Loans, \$19,590,627; stocks and bonds, \$63,393,988; surplus and undivided profits, \$605,094; deposits, \$91,108,670; total resources. \$89,542,835.

The number of depositors in savings banks has increased since 1895 from 4,875,519 to 5,065,494, and the average deposit from \$371.36 to \$376.50. In view of the fact that nearly 80 per cent of both number of depositors and amount of deposits in savings banks is represented by banks in the New England States and New York, the following statement is of interest as showing the percentage of population in the States named who are depositors in savings banks:

	State.	Number.	Per cent.
New Hampshire Vermont Massachusetts Rhode Island Connecticut		162; 444 103; 28: 1, 302; 475 1, 305, 475 346, 755	41. 3 309 50. 1 34. 6 41. 5
	↑	_,,	

It will be noticed from the foregoing table that 23.9 per hundred of the inhabitants of Maine are depositors in the savings banks. The proportion is slightly greater in New York, increases to 30.9 in Vermont,

and reaches the maximum, 50.1, in Massachusetts.

On July 1 last reports were received from national banks, and also partial returns from State banks and loan and trust companies, relative to the number of depositors and amount of deposits held by them on that date. The actual deposits being known, the number of depositors in the two latter classes have been estimated. Adding the number of shareholders in building and loan associations (taken from information appearing in the last report of the Commissioner of Labor on building and loan associations) to the number of depositors in the banks and banking institutions, the aggregate is obtained of the number of individuals in the States named who are creditors of these institutions. It is probable that some persons have accounts in more than one bank, but the number presumably is not large enough to materially affect the results.

From a comparison of the figures in the table immediately preceding with those in the one following it will be noticed that the States maintain the same relative positions; that is, the proportion in Maine, 29.7, is the least; New York follows with 35.8; Vermont, 36.3; Rhode Island, 43.9; New Hampshire, 47.1; Connecticut, 47.8, and Massachusetts, 59.2. The average for the seven States is 42.04. The number of depositors and the percentage of the population who are depositors in the various classes of institutions mentioned appear in the following statement:

States.	Number of depositors.	Per cent.
Maine New Hampshire Vermont Massaciusetts Rhode Island Connecticut New York	185, 057 121, 176 F, 539, 500	29: 7' 47. 1' 36.3 59: 2' 43: 9' 47. 8' 35. 8
Total	5, 008, 691	42. 04

Similar information relative to the other geographical divisions of the country would be of great value, but from none other are the returns complete enough to enable satisfactory results to be shown. Elsewhere in the report, in connection with the statement of cash held by banks on July 1, is shown the number of depositors and amount of deposits of national and such other banks as reported in each State and Territory.

In connection with the usual reports from savings banks an attempt was made to obtain information relative to the number of depositors having to their credit specified amounts, that is, \$500 or less, over \$500 and less than \$1,000, etc. Such information as was obtained relates to Maine. New Hampshire, Massachusetts, Rhode Island, and Connecticut, but as the classifications are dissimilar, comparisons are not possible, except with respect to Maine, New Hampshire, and Rhode Island. In Maine 77.52 per cent of the depositors are in the class having to their credit \$500 or less; in New Hampshire 74.92, and in Rhode Island 71.26. The class ranging from \$500 to \$2,000 represents 19.92 in Maine, 21.49 in New Hampshire, and 28.74 in Rhode Island. In Connecticut 87.86 per cent have to their credit less than \$1,000; 8.5 per cent over \$1,000 and less than \$2,000, and 3.64 per cent over \$2,000. returns from Massachusetts are for the year ended October 31, 1894 (none more recent having been compiled), and relate to the number of deposits made in that year. The banking law of Massachusetts restricts deposits, to one individual, to \$1,000, but interest may be allowed to accumulate until principal and interest amount to \$1,600, beyond which sum interest ceases. The number of deposits in the class of \$500 or less represents 97.56 per cent and 70.05 per cent of the amount of deposits; 2.44 per cent of the number of deposits represents 29.95 per cent of the amount of deposits. These figures indicate that wage earners are the principal patrons of savings institutions. The following table shows in detail the foregoing information:

CLASSIFICATION OF DEPOSITS IN SAVINGS BANKS IN THE STATES NAMED.

	Depositors.		Deposits.	
Classification of deposits.	Number.	Per cent.	Amount.	Per cent.
MAINE.

Information with respect to the rate of interest paid by savings banks is but partial, but it is noted that from the returns it is exceedingly difficult to maintain the rate of interest which has been paid during the past few years, and indications are that a reduction in the rate

is inevitable in the near future. The latest returns indicate that the average rate paid is a fraction less than 4 per cent.

LOAN AND TRUST COMPANIES AND PRIVATE BANKS.

Loan and trust companies to the number of 260 have submitted reports. The principal items of resources and liabilities are as follows: Loans, \$462,158,337; United States bonds, \$37,400,637; other bonds and stocks, \$163,763,914; capital, \$111,146,973; surplus and other undivided profits, \$84,313,612, and deposits, \$586,468,156.

Private banks to the number of 824 have reported, showing an aggregate capital of \$22,310,086; undivided profits, \$7,799,625; deposits, \$59,116,378; loans, \$59,663,379; United States bonds, \$2,386,416; other stocks and bonds, \$4,840,174, and aggregate resources, \$94,348,131.

PRINCIPAL ITEMS OF RESOURCES AND LIABILITIES OF ALL BANKS.

A condensed statement is herewith given for the purpose of comparison, exhibiting the principal items of resources and liabilities of each class of banks referred to:

Items.	State banks.	Loan and trust companies.	Savings banks.	Private banks.
Loans United States bonds. Other bonds Cash Capital Surplus and profits Deposits. Total resources.	96, 507, 673 101, 038, 641 240, 133, 835 95, 774, 472 695, 659, 914	\$462, 158, 337 37,400, 637 163, 763, 914 26, 800, 871 111, 146, 973 84, 313, 612 586, 468, 156 855, 282, 153	\$1, 055, 187, 769 148, 525, 375 756, 676, 312 35, 201, 528 27, 240, 505 174, 714, 993 1, 935, 466, 468 2, 143, 307, 163	\$59, 663, 375 2, 386, 416 4, 840, 174 6, 157, 561 22, 310, 086 7, 799, 625 59, 116, 376 94, 348, 131

Similar information relative to national banks, banks other than national, and the total of all banks appears in the following table:

Items.	3,676 national banks.	5,780 other banks.	9,456, all banks.
Loans United States bonds Other bonds, etc Cash Capital Surplus and profits Deposits Total resources.	280, 057, 145 188, 995, 353 343, 143, 362 648, 540, 325 336, 342, 834 1, 613, 062, 537	\$2, 279, 515, 283 189, 039, 316 1, 021, 788, 073 169, 198, 601 400, 831, 399 362, 602, 702 3, 276, 710, 910 4, 200, 124, 955	\$4, 172, 784, 122' 469, 096, 461 1, 210, 783, 426' 512, 341, 963 1, 049, 371, 724 698, 945, 536 4, 889, 773, 447 7, 463, 810, 269

The capital stock of national banks on July 14 and of all other banks at date of latest returns to this Bureau aggregates \$1,051,976,25!, an average of \$14.71 per capita of population. The averages in 1893, 1894, and 1895 were \$16.29, \$15.61, and \$15.44, respectively.

The aggregate banking funds, which include capital, surplus, undivided profits, and individual deposits of national and all other banks, are shown to be \$6,695,486,521, an average of \$93.69 per capita. The per capita averages in 1893, 1894, and 1895 were \$95.68, \$93.57, and \$95.83, respectively.

The specie and other currency held by national banks on July 14 and by other banks about the same date amounted to \$531,856,513. The classification of this amount was but partially made by the returning officers, except as to the national banks, and therefore appeared as follows: Gold, including certificates, \$200,980,831; silver and silver certificates, \$48,832,667; national-bank notes, legal-tenders, and currency

certificates, \$206,522,953; fractional currency, \$999,427; specie, not

classified, \$2,413,485; cash, not classified, \$72,107,150.

The Appendix* contains an abstract of the reports of each class of banks by States and geographical divisions for the past and prior years and tables covering in detail the subjects hereinbefore mentioned. These tables are followed by a summary of condition of the Canadian banks on August 31 last, and the latest reports of the loan and trust companies of the District of Columbia.

The Comptroller, through the courtesy of Mr. Albert C. Stevens, editor of Bradstreet's, has been placed in possession of a statement showing the assets and liabilities of the banks other than national which failed in each State during the year ended August 31 last, which

also appears in detail in the Appendix.*

INVESTIGATION AS TO KINDS OF MONEY AND CURRENCY IN ALL BANKS.

The importance of obtaining a proper classification of the money and currency held by the banks throughout the country led to the sending out of a circular addressed to the individual banks—national and other together with trust companies, requesting them to furnish this office with a correct classification of the amount and kinds of money held upon the 1st day of July last. The number of banking houses and trust companies inquired of was 12,962, and replies were received from The information, while in a measure incomplete, is of such a character as to enable a thoroughly fair and correct result from all to be approximated.

Heretofore in reports received from banks other than national there has seldom been made any attempt to separate into classes the kinds of money held by such banks, and consequently the amount of gold, for instance, has appeared as a very insignificant sum for all of such In the Comptroller's report for 1895 the returns, as made up from State and other reports, showed the amount to be but \$10,000,000 for all banks other than national. The reports received under this request were from 3,458 national banks, 1,494 State banks, 457 savings banks, 230 private banks, and 84 loan and trust companies. The number of each kind not reporting were: National banks, 231; State banks and trust companies, 3,366; savings banks, 307; private banks, 3,322. The total number of banks, by geographical divisions, the number

reporting, and the number not reporting, is as follows:

Geographical division.	Total.	Report ing.	Not re- porting.
New England States:			
Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut.	1, 226	829	397
Eastern States:	,		
New York, New Jersey, Pennsylvania, Delaware, Maryland, and District of Columbia	2, 137	1, 275	862
Southern States: Virginia, West Virginia, North Carolina, South Carolina, Georgia,		•	
Florida, Alabama, Mississippi, Louisiana, Texas, Arkansas,			
Kentucky, and Tennessee	2,053	676	1, 377
Western States: Missouri, Ohio, Indiana, Illinois, Michigan, Wisconsin, Iowa, Min-			
nesota, Kansas, and Nebraska	6, 266	2,434	3, 832
Pacific States and Territories:	-,	_,	,,,,,,
Nevada, Oregon, Colorado, Utah, Idaho, Montana, Wyoming, New			
Mexico, North Dakota, South Dakota, Washington, Arizona, Oklahoma and Indian Territory	1, 280	509	771
			
Total United States	12,962	5, 723	7, 239

^{*} See footnote, page 517.

The total amount of eash in the 5,723 institutions reporting was \$413,124,849, divided as follows: Gold coin, \$134,077,003; gold certificates, \$55,481,338; silver dollars, \$8,254,612; fractional silver, \$7,399,073; silver certificates, \$39,663,596; Treasury notes, 1890, \$13,126,018; United States notes, \$110,469,375; currency certificates, \$20,858,000; national-bank notes, \$23,795,834. Of this total cash the 3,458 national banks reporting held \$335,174,616, and the 2,265 State, etc., banks \$77,950,233. The amount of gold coin and gold certificates held by these national banks was \$155,073,604, and by these State, etc., banks \$34,484,737. In this connection it may be stated that the total number of national banks, viz, 3,689, held on July 14, the date of the report nearest July 1, \$361,658,485 cash, of which amount there was in gold coin and gold certificates \$161,853,560.

The total cash and the part thereof of gold and gold certificates held by reporting banks in each geographical division is as follows:

Geographical division.	Total cash.	Amount of gold and gold certificates.
New England States. Eastern States Southern States Western States Pacific States and Territories	29, 086, 601 109, 584, 645	\$15, 403, 768 88, 580, 133 9, 558, 183 56, 410, 427 19, 605, 830
Total	413, 124, 849	189, 558, 341

A comparison of the money holdings in these geographical divisions shows that the 829 reporting banks in the New England States held but \$6,602,671 more total cash and \$5,845,585 more gold and gold certificates than the 676 reporting banks in the Southern States, not including Missouri; the 1,275 banks in the Eastern States \$103,544,924 more total cash and \$32,169,706 more gold and gold certificates than the 2,434 banks in the Western States; the 676 banks in the Southern States \$3,451,841 more total cash and \$10,047,647 less gold and gold certificates than the 509 banks in the Pacific States and Territories; the 829 banks in the New England States \$10,054,510 more cash and \$4,202,062 less gold and gold certificates than the 509 banks in the Pacific States and Territories. It has been deemed necessary to indicate the location of banks reporting and not reporting in order to give a proper measure by which to estimate the amount and character of cash of banks not reporting. It is a fair estimate to be drawn from reports received, and in view of their general distribution and character, and the proportion of cash of those reporting to total cash held in all such banks, that as 2,265, or 24.4 per cent of all banks and companies other than national banks held \$34,484,737 in gold coin and gold certificates, the whole number of banking institutions and companies in operation in the United States on July 1, other than national, viz, 9,260, held on that day in gold coin and gold certificates \$140,939,807. Adding to this amount \$161,853,560, the total gold coin and gold certificate holdings of the national banks on July 14, as being the same as held by all of them on July 1, the total gold and gold certificate holdings of the banks of the country on that day was \$302,793,367.

A comparison of the cash holdings of banks other than national, as shown by the Comptroller's report of 1895, shows that on July 1, 1895, the 6,093 then reporting held in cash \$227,743,303. As in this report

2,265 of such banks report \$77,950,233 of eash, it is evident that the importance, capital, etc., of the banks not reporting equals that of those reporting, and the estimate made is fairly borne out. The correctness of this conclusion is further evidenced by the eash holdings of the 5,780 banks of this character reporting to this office on or about the close of the fiscal year ended on July 1 last, the amount being \$169,198,601. These figures were not obtained from the special reports of July 1, but from reports of the general condition of the banks made to the Comptroller.

The report of the Treasurer of the United States shows that upon July 2 there was free gold in the Treasury to the amount of \$101,648,103. It is evident from all these facts that the available gold and gold certificates in the banks and the free gold in the Treasury on or about July 1 was \$404,441,470. On October 31 it was larger, as the free gold in the Treasury amounted to \$118,443,021, making the total in the Treasury

ury and in banks \$421,236,388.

If the reports heretofore given in the Comptroller's report as to the gold holdings of the banks could have been made from individual reports from the individual banks of the country, as in this instance, the showing would have been as it now is as to the character of the cash held by banks other than national.

NUMBER OF DEPOSITORS IN, AND CASH HOLDINGS OF, REPORTING BANKS.

In order to present in a condensed form the results of the replies received from the 5,723 reporting banks respecting the number of depositors, amount of deposits, and cash holdings, on July 1, 1896, the fol-

lowing table (pp. 420 and 421) is given.

An examination of the returns shows that the total number of depositors in the national banks reporting on July 1 was 2,315,333, with individual deposits aggregating \$1,586,087,193. On July 14 the total individual deposits of all the national banks were \$1,668,413,508 and the estimated number of depositors 2,435,625. The total number of depositors in the 2,265 reporting banks other than national was 3,614,630, with deposits aggregating \$1,668,352,673. In 1894 an investigation showed the number of bank depositors to be about 9,000,000. A conservative estimate, in view of the fact that the number of depositors in national banks shows an increase of about half a million and of savings-bank depositors of over 287,000, would make the total number now not less than 10,000,000, with total deposits aggregating over \$5,000,000,000.

CHANGES IN MONEY AND CURRENCY HOLDINGS OF NEW YORK CITY
AND OTHER BANKS.

The frequent reference to the relative holdings of moneys by the banks of New York City and elsewhere has led to the preparation of tables bearing upon that subject, which will be found in the Appendix.*

These tables show the different kinds of money held by the national banks of the United States, by geographical divisions, Western, Southern, and Eastern, as compared with the holdings of the national banks of New York City on the same dates, viz, May 7, 1896, and October 6, 1896; the holdings of specie by the New York City banks from February 28, 1890, to October 6, 1896, inclusive, and the amount of silver certificates held by the banks in the late spring and early winter of each year from 1890 to the present time as compared with amounts held on same dates by New York banks. By this last table is shown to some extent the inflow and outflow of the different kinds of money between New York and the different geographical sections of the country.

From the table showing specie held by the national banks of New York from February 28, 1890, to October 6, 1896, inclusive, it is noted that the holdings of gold have always been largely in excess of the amount of silver dollars, silver certificates, and fractional silver coin. It also appears that the holdings of gold Treasury certificates, with slight fluctuations, increased steadily from 1890 to March 1, 1892, but from that time to October 6, 1896, they rapidly decreased (except on February 28, 1894, at which time the financial stringency of 1893 had operated to increase the reserve in banks), owing to the fact that such certificates are no longer issued by the Treasury, until, on October 6, 1896, they amounted to only \$8,997,540, as against \$70,144,740 on March 1, 1892, and \$52,481,770 on February 28, 1894. To offset this marked decrease caused by cessation of issue, the New York Clearing House, for its own convenience, first issued gold clearing house certificates, and on May 4, 1894, the New York banks held such certificates to the amount of \$26,100,000. The amount slightly decreased from that time until October 6, 1896, when it was \$22,265,000. Gold coin, on the other hand, has increased since February 28, 1890, when it amounted to \$9,007,097, until, on October 6, 1896, it amounted to \$13,895,591.15, having fluctuated between those dates, reaching its highest point December 19, 1893, viz, \$45,544,117.50.

Standard silver dollars decreased, with slight variations, from \$267,449 on February 28, 1890, to \$75,699 on October 6, 1896. Silver certificates also decreased from \$4,224,685 on February 28, 1890, and \$15,559,127 on February 28, 1894, to \$3,835,775 on October 6, 1896. Fractional silver increased from \$356,433.37 on February 28, 1890, to

\$492,252.37 on October 6, 1896.

The reports of specie held during this period by the banks of New York City show that, while slightly greater in volume than in 1890, the amount has steadily decreased since 1894, when the highest point was reached, to the present time, silver having increased and decreased in

about the same ratio as other kinds of money held.

From the tables showing the different kinds of money held by national banks in the different sections of the country on May 7, 1896, and October 6, 1896, it will be seen that the total holdings had decreased between these two dates \$11,500,000, of which \$9,000,000 came from the New York City banks, and the balance from banks in the Eastern States.

^{*}See footnote, page 507.

The holdings of banks in the Western States had increased \$1,000,000 and in the Southern States \$700,000. The balance of the withdrawals can be accounted for by the money hoarding on the part of the people, thus withdrawing a large amount from circulation.

MONETARY SYSTEMS AND STOCKS OF MONEY IN THE PRINCIPAL COUNTRIES OF THE WORLD.

Through the courtesy of the Director of the Mint, the Comptroller is enabled to present herewith statements exhibiting (1) the monetary systems, the population, and the approximate stocks of money in the principal countries of the world in 1896, and (2) the approximate stock of gold, silver, and uncovered money in the countries named in 1873 and 1896, and the changes which have occurred between those dates. From the first table it is noted that of the thirty-four countries seventeen are on a gold and silver basis, ten on a gold basis, and seven on a silver basis. The ratio between gold and full-tender silver ranges from 1 to 161 in Mexico to 1 to 15 in India. The ratio between gold and limited tender silver ranges from 1 to $15\frac{7}{8}$ in Turkey to 12.9 in Russia. The aggregate stock of gold in the countries named is shown to be \$4,143,700,000; the total stock of silver is \$4,236,900,000, of which \$3,616,700,000 is full tender and \$620,200,000 limited tender. amount of uncovered paper is \$2,558,000,000. Over 77 per cent, or \$3,191,800,000, of the stock of gold is held in five countries, namely: France, \$772,000,000; Germany, \$675,000,000; United States, \$672,200,000; United Kingdom, \$584,000,000, and Russia, \$488,600,000. Seventy-seven per cent, or \$3,272,600,000, of the stock of silver is held by the following named countries: India, \$950,000,000; China, \$750,000,000; United States, \$631,400,000; France, \$492,200,000; Straits Settlements, \$242,000,000, and Germany \$207,000,000. There is no other country which has a stock of silver in excess of \$100,000,000, except Siam, which has \$193,300,000.

The South American States, Russia, United States, and Austria-Hungary have outstanding \$1,646,100,000, or about 64 per cent of the uncovered paper money. The amount outstanding in each of these countries is as follows: South American States, \$550,000,000; Russia, \$467,200,000; United States, \$424,400,000; Austria-Hungary, \$204,

500,000.

The second table is of special interest as showing not only the amount of the various kinds of money in each country and in the aggregate in 1873 and 1896, but also the changes between those dates. Information is shown with respect to 13 countries. The amount of gold held by them in 1873 was \$1,209,800,000 and in 1896 \$3,698,700,000, a net increase of \$2,488,900,000. It is noticeable that there has been an increase in every country named, with the exception of Norway, in which the reduction has been slight, namely, \$100,000. The stock of silver has increased from \$1,057,700,000 in 1873 to

The stock of silver has increased from \$1,057,700,000 in 1873 to \$1,732,300,000 in 1896, a net increase of \$674,600,000. The only countries which show a reduction in the amount of stock of silver are France, \$7,800,000; Germany, \$99,200,000; and Denmark, \$2,100,000.

The amount of uncovered paper has decreased from \$2,322,500,000 in 1873 to \$1,713,900,000 in 1896, a net decrease of \$608,600,000. The following countries show an increase: Great Britain, \$52,000,000; Germany, \$35,300,000; Italy, \$80,700,000; Belgium, \$37,400,000; Netherlands, \$17,200,000; and Norway, \$1,500,000. It is noted that Australasia had no uncovered paper money outstanding at either date,

and that Sweden, which had in 1873 \$6,000,000 outstanding, has none While there has been a material decrease in the amount of uncovered paper outstanding, the net increase of all kinds of money was \$2,554,900,000.

The information, as shown by these tables, with respect to the various kinds of money in the United States on the dates named is of special interest. In 1873, the stock of gold amounted to about \$135,000,000, and in 1896, to \$672,200,000; silver increased from \$6,200,000 to \$631,400,000, of which \$555,600,000 is full tender, and \$75,800,000 limited tender. The amount of uncovered paper has decreased from \$749,400,000 to \$424,400,000, but the aggregate money supply has increased \$837,400,000. The supply has more than kept place with the growth of population, for while the gain of population since 1870 has been 85.2 per cent, the increase of the stock of money has been 94 per cent.

The table exhibiting the monetary systems is herewith given.

VALUE TO THE PUBLIC OF BANKS AND GROWTH IN NUMBER AND DEPOSITS.

The use of substitutes for money by the public in making payments has resulted from the improved facilities of exchange, brought about by the employment of better methods of banking and the increased deposits gained through the growth in the number of banks. In previous reports from the Comptroller's Office attention has been called to the advantage thereby gained to the general public, but in more than one instance and from more than one section general and sweeping denunciation is made of the whole system. The great body of the people, however, can not but know that since the inauguration of the national banking system there has been a direct and immense money saving to all classes.

It is unnecessary to enter into a detailed discussion of the question, but in a general way it may be stated that this bettered condition has been seen in the saving in heavy discounts on the bank currency prevalent before 1863; the saving in the rates of interest on loans and discounts; the saving in making of exchange, and the saving to customers in charges for making collections. If the subject could be freed from all connection with politics and never enter as an issue into a political campaign all would readily admit these things and insist upon the benefits being enlarged instead of restricted. It is worthy of notice that despite political opposition all sections of the country show a greater public demand for their establishment and a larger use of the agencies which they afford in transacting the daily affairs of life. This statement is best illustrated by the following table, compiled from as accurate statistics as can be obtained, and while the total number of banks set forth together with the total amount of deposits fall short of the actual number and amount, owing to the failure to receive reports from all banks, the figures as given indicate that the increase has been proportionate to the increase in the country's population:

Number of National and Other Banks and Their Deposits, in Each Geographical Division, in the Years 1863, 1870, 1880, 1890, and 1896.

1863.

^{*} The figures for 1870 include State bank reports for 1873, no figures for 1870 being obtainable. The number of banks other than national in each geographical division is not shown in the reports from which the statement of number of banks and deposits was taken.

CHANGES IN CLEARING-HOUSE RETURNS.

Upon the same lines have been the changes in the transactions of the clearing houses during the same periods. The early reports of the Comptrollers do not contain information with respect to the operations of any except the clearing house of the city of New York. The clearings and balances for that association, which represent from 55 to 60 per cent of the aggregate clearings of all associations, for the respective years of 1863, 1870, 1880, 1890, and 1896, were as follows:

Year.	Clearings.	Balances.
1863 1870	27, 804, 539, 406 37, 182, 128, 621 37, 660, 686, 572	\$677, 626, 483 1, 036, 484, 822 1, 516, 538, 631 1, 753, 040, 145 1, 843, 289, 239

The largely increased balances shown as between the years 1880 and 1890 and the year 1896, with a lessened total of clearings, are due to the disturbed monetary conditions characterizing the events of the past year. The general lack of confidence in the stability of business credit could not be better illustrated than by this marked difference, nor could the great and sudden fluctuations in the conditions of the banks be made more manifest.

The clearings for the whole country in 1884, when the statistics were first published in the Comptrollers' reports, were \$47,387,408,275. In 1891 they amounted to \$56,803,253,957, in 1895 to \$50,872,674,108, and in 1896 to \$51,977,799,114.

INSOLVENT NATIONAL BANKS, 1896.

The number of banks placed in the hands of receivers during the year was 27, located in 15 States, having an aggregate capital stock of \$3,805,000 and circulation of \$761,500, of which amount \$132,608 has been destroyed and \$628,892 is yet outstanding. Of these banks 4 were temporarily closed during the financial stringency of 1893 and subsequently resumed business. Their location and capital stock are shown in the following table:

Name of bank.	Location.	Capital.
First National Bank First National Bank Bellingham Bay National Bank Kittitas Valley National Bank	Orlando, Fla	\$85,000 800,000 60,000 60,000

The banks which failed during the year are nine less in number than those which were placed in the hands of receivers in 1895, and \$1,430,020 less in amount of capital stock, but the nominal assets and the ascertained liabilities are more, the former by \$1,638,077 and the latter by \$1,965,334.

The following table sets forth in detail the names, location, capital stock, and condition of the assets of failed banks of the year at the time of the appointment of receivers therefor:

INSOLVENT NATIONAL BANKS FROM 1863 TO 1896.

From the date of the organization of the first national bank, in 1863, up to and including October 31, 1896, as shown by the table on page 515 of this report, 330 banks, or about 6½ per cent of all created, have failed. They are located by States as follows: In New York, 34; Kansas, 29; Washington, 22; Texas, 21; Pennsylvania, 20; Nebraska, 17; Illinois, 16; Ohio, Indiana, and Montana, 11 each; Missouri and Colorado, 9 each; Iowa and South Dakota, 8 each; Tennessee, Michigan, and North Dakota, 7 each; Virginia, Florida, and Alabama, 6 each; Oregon and California, 5 each; Vermont, Massachusetts, New Jersey, Georgia, Louisiana, Arkansas, and Minnesota, 4 each; New Hampshire, Connecticut, District of Columbia, North Carolina, Wisconsin, and New Mexico, 3 each; Mississippi and Wyoming, 2 each, and South Carolina, Kentucky, Nevada, Utah, and Oklahoma, 1 each, being an average of 10 failures a year.

Thirteen of the 330 associations placed in the hands of receivers as insolvent have been restored to solvency and resumed business, and one permitted to go into voluntary liquidation; the affairs of 154 have been finally closed, and of the remaining, 162 are still open, 32 of which,

however, are on the inactive list.

The total capital stock of all these failed national banks amounted to \$55,775,920, circulation to \$19,641,909, and the total claims proved against them to \$98,322,170.

The receivers appointed to administer upon the assets of such associations reported \$65,220,676 as good, \$61,329,555 as doubtful, and \$43,072,192 as worthless. The total assets aggregated \$187,328,774. To this must be added the assessment upon shareholders, amounting to \$29,067,070, making an aggregate total of assets and assessments of

\$216,395,844.

To the creditors of these insolvent associations has been paid in the form of dividends up to the present time the sum of \$62,766,144; loans paid and other disbursements, \$12,809,437; legal expenses, \$2,628,365, and all other expenses, \$4,631,801. The amount of offsets allowed and settled amount to \$13,569,732, and the losses on assets compounded or sold under order of court aggregate \$39,512,525. The nominal value of assets returned to shareholders was \$4,902,023. There has been returned to shareholders in cash \$1,117,384. The amount in the hands of the Comptroller undistributed is \$1,854,798. The nominal value of unliquidated assets is \$55,488,836, and the uncollected assessments on shareholders, \$17,114,799.

The number of banks which failed during the last four years was 149, having a total capital of \$22,745,020, nominal assets amounting to

\$65,534,381, and claims proved \$25,594,603.

PERCENTAGE OF DIVIDENDS PAID BY FAILED NATIONAL BANKS.

The lowest percentage of dividend paid to the creditors of any failed national bank whose affairs are closed was that of fourteen and a fraction to the creditors of the Cook County National Bank, of Chicago, Ill., being No. 38 on the list of banks placed in the hands of receivers. The next lowest percentage of dividend was seventeen and a fraction, to the creditors of the Tennessee National Bank, of Memphis, constituting No. 5 on the list. The average percentage of dividends paid to creditors of insolvent national banks whose affairs are entirely closed is about 75 per cent. Of the total dividends paid to creditors of all the insolvent national banks from the beginning of the national banking system in 1863, amounting, as above stated, to \$62,766,144, the sum of \$2,451,959 was paid during the past year. The average percentage of all cost of conducting insolvent trusts to assets other than those collected has been 5.51.

The difficulties attendant upon the liquidation of the assets of failed banks during the past four years have arisen through many of such assets being of a character not to be reduced to money in a season of financial depression. Many indeed would be worthless under any financial condition. It is contemplated that real estate beyond an amount needed for banking purposes shall constitute no part of a bank's assets, and yet under the plea of having acquired it for a debt previously contracted, many failed banks are found to have a great amount of it, either wholly unsalable or salable only at a very great sacrifice. The weakness of banks holding assets of this character has been developed during these years, and in consequence a large number of them have passed into the hands of receivers to be dealt with according to law.

CAUSES OF FAILURE OF NATIONAL BANKS AND DUTY OF DIRECTORS.

A careful examination has been made into the causes of failures of national banks and the number failing from each cause, from 1863 to 1896, with the following result:

Three have resulted from defalcation of officers; 22 from defalcation of

officers and fraudulent management; 1 from defalcation of officers and excessive loans to others; 2 from defalcation of officers and depreciation of securities; 13 from depreciation of securities; 19 from excessive loans to others, injudicious banking, and depreciation of securities; 18 from excessive loans to officers and directors, and depreciation of securities; 6 from excessive loans to officers and directors, and investments in real estate and mortgages; 3 from excessive loans to others, and depreciation of securities; 4 from excessive loans to others, and investments in real estate and mortgages: 1 from excessive loans and failure of large debtors; 4 from excessive loans to officers and directors; 4 from failure of large debtors; 8 from fraudulent management; 15 from fraudulent management, excessive loans to officers and directors, and depreciation of securities; 12 from fraudulent management and depreciation of securities; 24 from fraudulent management and injudicious banking; 8 from fraudulent management, defalcation of officers, and depreciation of securities; 5 from fraudulent management, injudicious banking, investments in real estate and mortgages, and depreciation of securities; 9 from fraudulent management, excessive loans to officers and directors, and excessive loans to others; 19 from injudicious banking; 54 from injudicious banking and depreciation of securities; 12 from injudicious banking and failure of large debtors; 13 from investments in real estate and mortgages and depreciation of securities; 43 from general stringency of the money market, shrinkage in values, and imprudent methods of banking; and 8 were wrecked by the cashiers.

The inevitable conclusion to be drawn from a study of the causes resulting in these failures is that in the great majority of instances those directly responsible for the management of the banks involved, both directors and executive officers, have been negligent of their duties and wanting in insisting upon the employment of methods of ordinary safety and prudence. It follows that every bank failure has caused more or less loss to creditors and shareholders and subjected those connected with these institutions to criticism. The relation which the Comptroller's office bears to the banks and its method of examinations have been so much a matter of public discussion that it seems wise at this time to call the attention of both Congress and the public to these relations and the duties which it is believed rest directly upon and should be discharged by those whose oaths make it obligatory on

them to conserve the interests of the bank. The duties resting upon directors are not in contemplation of law merely formal ones, to be met in a formal manner only. It is expected that they shall be thoroughly conversant, both in general and in detail, with the manner of the conduct of institutions with which connected and the methods employed. Bank directors should know whether the best bookkeeping methods are used in their banks, whether precautionary measures in the verifying of entries upon ledgers and pass books are taken, and whether employees from president to bookkeeper are engaged in speculative enterprises and employing the bank's funds, thus endangering the safety of those trusting the bank. character of the internal management necessarily makes the institution a safe or an unsafe one. In so far as the Comptroller is concerned, nothing more can be done in this regard than to suggest changes for the better, and by examinations made under his direction ascertain whether or not the capital stock of the bank is impaired either through the taking of worthless paper, overextending credit, or through defalcations. These examinations are made but twice a year, and are in no wise designed to relieve the directors from their responsibility in the premises. It is often assumed that they do, but the assumption is erroneous.

They but emphasize the necessity of examinations and the duty of directors to make them. The Comptroller, through his examiners, inspects the paper of a bank only after it has been taken. The executive officers and directors should know of its character before it is taken.

The Comptroller can not detail who in the bank shall verify the entries made upon ledgers and pass books of depositors. He can only suggest the wisdom of having another than the one who makes such entries verify them. The frequent changing of bookkeepers from desk to desk and the calling in of pass books at frequent intervals are suggestions sent from this office, but the carrying into effect of them falls upon those who at all times have to do with the active management of the If directors delegate the powers they alone should discharge to the executive officers, the executive officers are apt to delegate them to others, and a condition is reached which, if it does not bring about scandal, results in loss. The security of the bank depositor is certain to be maintained if bank officers and directors cooperate with the supervising officers and insist that both the spirit and the letter of the bank act be carried out. It can never be made absolutely sure, however, if the examining is all done by the governmental officers and none by the directors. Examinations by both, thorough and complete, are essential, and the depositor has a right to demand of the latter as much attention to official duty and official oath as of the former. He is entitled to the very best service of both.

HISTORY OF STATE BANK FAILURES PRIOR TO 1863.

The recent discussion of many questions connected with banking and currency and the probability of still further discussion have made it seem advisable to collect as much data as possible covering the experience of the American people in dealing with banks and methods of banking. It is safe to say that at some time in the history of this country nearly every theory evolved in connection with the business of banking has been tried and its development attempted. It is equally true that at all times in the country's history, in all sections of it, and among all classes false principles of monetary science and bad practices in finance have without exception resulted disastrously to all concerned. A complete history of these experiments, carefully compiled, would furnish a thoughtful field for study on the part of the practical banker, as well as the political economist. If it did not free the country wholly from erroneous notions of banking and finance, it would certainly tend to lessen them.

It is to be regretted that more satisfactory statistics on the subject of early bank failures are not to be obtained. The general history is known, but the specific items of loss in many instances are entirely wanting. At the best, it is but fragmentary. While it is probable that the historical facts here collected are far from complete, they can not but be of some benefit, and with that end in view they are made a part of this report as proper information to be submitted to Congress. They make more complete the history of failed banks in the United States, and added to such as follow, concerning the history of failures from 1863 to the present time, State and national, give material value to the whole record.

The laws of the several States have permitted the widest latitude, but with records so incomplete much of their value is lost, as it is impossible to draw comparisons which can be considered reliable. The great value of public information regarding the banks of the country was early appreciated. During the war of 1812 and the period imme-

diately following, the suspension of specie payments by most of the banks and the unsatisfactory condition of their circulation drew special attention to their importance as factors in conducting the fiscal operations of the Government and of the communities where located. On March 1, 1819, the House of Representatives passed a resolution directing-

The Secretary of the Treasury to transmit to Congress at an early period in the next session a general statement of the condition of the Bank of the United States and its offices, similar to the return made to him by the bank; and a statement exhibiting as nearly as may be practicable the amount of capital invested in the different chartered banks in the several States and the District of Columbia, the amount of notes issued by those banks and in circulation, the public and private deposits in them, the amount of loans and discount made by them and remaining unpaid, and the total quantity of specie they possess; and also to report such measures as, in his opinion, may be expedient to procure and retain a sufficient quantity of gold and silver coin in the United States, or to supply a circulating medium in place of specie, adapted to the exigencies of the country and within the power of the Government.

On February 12, 1820, the then Secretary of the Treasury, Hon. William H. Crawford, presented his report, which shows the condition of the Bank of the United States in September, 1819, to be as follows:

In further pursuance of the attempt to obtain information on the subject the House of Representatives, on July 10, 1832, adopted the following:

Resolved, That the Secretary of the Treasury be directed to lay before the House at the next and each successive session of Congress copies of such statements or returns, showing the capital, circulation, discounts, specie, deposits, and condition of the different State banks and banking companies as may have been communicated to the legislatures, governors, or other officers of the several States within the year and made public, and where such statements can not be obtained, such other information as will best supply the deficiency.

In accordance with this resolution, reports were made for the year 1833, from 1835 to 1841, 1846 to 1848, 1850, 1852 to 1859, and from 1861 to 1863. These reports, though of interest in showing the general condition of the banks, are wanting in details which would be of value.

In 1873 the Comptroller of the Currency was charged with the preparation of an annual report on the condition of the banks and banking companies of the several States and Territories. These returns have been given in the reports of this office since that time. While it has been difficult to cellect the statistics for going banks of this class, the information concerning the failed banks has been almost unobtainable. In nearly all the States the affairs of insolvent banks are administered by trustees or receivers appointed by the courts, the same as for other insolvent institutions. These receivers make special reports as called for by the appointing court, and a final report when their accounts are settled and they are discharged. Such reports are prepared in various ways, and frequently do not contain detailed information. They are usually filed with the clerk of the court, and from that time are, without special efforts, inaccessible.

With renewed agitation of the subject the Senate again adopted a resolution on July 26, 1892, calling upon the Secretary of the Treasury for information concerning State banks, and directed a report on, "the number and names of State banks, banking institutions, or savings banks that have suspended or failed since 1839, and the loss severally of stockholders, note holders, and other creditors of said banks." The response to this resolution was almost entirely confined to information contained in reports to this office. In 1875 the then Comptroller of the Currency, the Hon. John Jay Knox, made an exhaustive effort to secure statistics of failed State banks, and the same appeared in the reports made by him. Further attention was given to the affairs of such banks in the Comptrollers' reports for 1876, 1879, 1891, 1892, and 1895.

The period prior to the establishment of the national-banking system may be divided into that which pertains to colonial history, and from the Revolutionary war to 1863. It is stated that the first private bank in America was established in 1686, in Massachusetts, while its organizers were "persons of estate and known integrity and reputation." It is reported to have been a failure, resulting in loss to those interested. During the colonial period a number of other banks were established in different colonies, for the purpose of providing currency with which to transact the daily business of the people, but sooner or later the circulating notes of a majority of these institutions were at a discount, and they resulted in loss to creditors and note holders.

Several of the colonies also engaged in the business of loaning money, or, more properly, circulating notes, on real estate or other security, always, however, with certainty, as has been aptly said, "the more the issues the greater the depreciation of the notes." Massachusetts, Rhode Island, Pennsylvania, New Jersey, South Carolina, and Georgia

participated in this plan of attempting to relieve the business necessities of their citizens; and while at the outset, owing to the great scarcity of metallic money in circulation during this period, the currency of the banks, together with notes of private individuals, were forced into general use and temporary aid furnished, the general effect of the experiment could not from any point of view be considered as a successful one.

From the close of the Revolutionary war to 1863 the amount of circulation issued by the banks varied largely. During the entire period, with now and then a brief interval, the notes, with the exception of those of the banks of New England and a few others, were continually at a discount. Losses to note holders, other creditors, and stockholders were extremely large. The first Bank of the United States did not result in any loss, but its successor, failing to secure a renewal of its charter from Congress, after continuing in business under an act of the legislature of Pennsylvania until 1841, did. At the closing of its affairs in 1856 it appears that the creditors had been paid in full, but

the stock investment of \$28,000,000 was a total loss.

In 1782 the first State bank in Massachusetts was authorized. From 1805 to 1810 the bank notes in the State were depreciated and very unstable in value, and a number of the banks failed. In 1814 nearly all of the banks outside of New England were compelled to suspend specie payments, and most of them were either closed or continued with great loss to their creditors. In 1829 the Farmers' Bank of Belchertown suspended, with a capital of \$100,000; the Sutton Bank, with a capital of \$100,000, and the Brighton Bank, with a capital of \$150,000, failed. In 1836 the Nahant Bank of Lynn, with a circulation of \$242,965, failed. From 1837 to 1840 the Chelsea, the Kilby, Middling, Interest, La Fayette, Franklin, Commonwealth, Middlesex of Cambridge, American, Commercial, Fulton, and Hancock banks failed.

It is claimed that during the period from 1837 to 1844 32 banks suspended, the circulation of which was redeemed, with the exception of the Roxbury Bank; but as the circulating notes were a first lien upon their assets, it is probable, from the information at hand, that other

creditors, as well as stockholders, lost their entire interests.

From 1844 to 1855 only two banks failed; in 1857 one more was added, but it is understood that the circulating notes of these three were redeemed in full. The total failures in Massachusetts during the whole

period was 52.

The first State bank organized in Rhode Island was in 1791. In 1809 the Farmers' Exchange Bank of Gloucester failed, with a circulation of \$580,000 and assets of but \$86.46; in 1829 the Farmers and Mechanics' Bank of Pawtucket failed. No loss was sustained because of its circulating notes. In 1832 the Burrillville Bank failed, with a circulation of \$49,000, which was finally redeemed without interest. The other creditors and the shareholders received nothing. In 1836 the Scituate Bank failed, but redeemed its circulation in full, and thereafter reopened. In 1843 the Rhode Island Agricultural Bank failed, and a part of its circulating notes was finally redeemed. In 1857 five banks failed, and in 1858 three others, some of which redeemed their circulation in full, while others defaulted. The total failed banks in Rhode Island was 13.

In 1792 the first State bank was organized in Connecticut. In 1825 the Eagle Bank failed, with a circulation of \$1,163,237, and assets estimated at the time of failure to be worth \$300,000. The result was a large loss to note holders. The Derby Bank also failed, with a circulative of \$200,000 this.

tion of \$80,000, entailing almost a total loss.

In 1799 the first bank was organized in Maine. By 1829 the Castine.

the Hallowell, and Augusta banks, with a total circulation of \$460,000, failed. Before this time the Wiscasset, the Kennebec, and the Passamaquoddy banks had also failed. A large amount of the circulation of these banks was a total loss to note holders. From 1837 to 1839 the Globe Bank, the Washington County Bank, the Frankfort Bank, the Stillwater Canal Bank, and the Bank of Oldtown failed, with heavy losses except to note holders. Eleven other banks failed prior to 1854, of which it is stated the circulation was redeemed in full. In that year the Shipbuilders' Bank and the Canton Bank failed, with heavy losses to the holders of their notes. In 1855 the Mousam River Bank and the Grocers' Bank failed. Most of the circulation of these two banks was redeemed. In 1856 one other bank failed, and in 1857 five others, but their circulation was largely redeemed. The total failed banks in Maine during this period was 37.

The Sanford Bank, which failed in 1861, up to January 1, 1863, had only paid a small amount of its circulation; the Norombega Bank of Bangor had redeemed its circulation, but no information is given as to other liabilities; the Atlantic Bank, which failed in February, 1860, had redeemed its circulation, but no other information is given; the Mariners' Bank of Wiscasset had redeemed its circulation, and had remaining some real estate, the proceeds of which could be applied to

the payment of other creditors.

The first State bank was organized in New Hampshire in 1792. By 1809 the Cheshire, the Hillsboro, and the Coos banks had failed, with heavy losses on circulation. Between 1839 and 1845 the Concord Bank failed, with a circulation of \$88,000 and deposits of \$70,000; the Wolfboro Bank, with a circulation of \$38,000, and the Lancaster Bank, with a circulation of \$48,000, also failed. But a small amount of the circulating notes and no other claims were paid by these banks. During this period 8 other banks failed, some of which redeemed their circulation in full. The total of failures in New Hampshire during the period was 14.

In 1862 the bank officials of New Hampshire reported that the Weare Bank, which had suspended at Hampton Falls, with a capital of \$50,000, and with assets amounting to \$104,341, from which it had collected about \$44,000, had nearly redeemed its circulation. The Exeter Bank, which

failed in 1860, was reported to have been nearly liquidated.

In 1806 the first bank was organized in the State of Vermont. It was an institution the capital of which was supplied by the State. In 1812 it failed, causing a loss of over \$200,000 to the State, but the note holders and other creditors were paid in full when its affairs were finally closed in 1845. In 1839 the Essex Bank failed, with a circulation of \$66,262 and deposits of \$3,798. But a small portion of the circulation was paid from the assets of this bank. In 1862 the Black River Savings Bank had paid final dividends amounting to 65.82 per cent on its liabilities, while the affairs of the Middleburry Savings Bank were nearly closed, but with almost a total loss to creditors.

In the State of New York the first bank chartered was in 1791. In the years before 1831 the following banks had failed: In 1819, Bank of Niagara, capital \$400,000; 1820, Bank of Hudson, capital \$300,000; 1825, Bank of Washington and Warren, capital \$400,000; Bank of Plattsburg, capital \$300,000; 1827, Aqueduct Association, capital \$90,000; 1829, Bank of Columbia, capital \$160,000; Middle District Bank, capital \$500,000; 1830, Franklin Bank, capital \$500,000. While capital stock of these banks is given, no information is at hand as to

the amounts which were finally paid to their creditors.

The failed banks whose liabilities were secured by the safety fund

system are as follows:

Bank of Buffalo, capital \$200,000, circulation \$111,234; Commercial Bank of Buffalo, capital \$400,000, circulation \$174,782; City Bank of Buffalo, capital \$400,000, circulation \$127,845; the Wayne County Bank, capital \$100,000; Commercial Bank of New York, capital \$500,000; Commercial Bank of Oswego, capital \$250,000; Watervliet Bank, capital \$250,000; Clinton County Bank, capital \$200,000; Lafayette Bank, capital \$500,000; Bank of Lyons, capital \$200,000; Bank of Oswego capital \$150,000. All the liabilities, including circulation of the above banks, were paid in full from the safety-fund deposit. The liabilities of the banks amounted to \$3,000,000, but only \$138,277 was realized from their assets.

Subsequent failures were: The Canal Bank of Albany, with a capital of \$300,000, circulation, \$185,531. Lewis County Bank, capital, \$100,000, circulation, \$150,000, with no other liabilities. Yates County Bank, capital, \$100,000, circulation, \$148,958. Bank of Orleans, capital, \$200,000, circulation, \$200,000. The Canal Bank paid no creditors except note holders. The Yates County Bank and the Bank of Orleans paid the largest part of the note holders. The failure of the

Lewis County Bank was complete.

Under the free-banking system, inaugurated in 1838, there were 57 failures, which resulted as follows, viz:

Of this total of 57 failed banks under the free banking law of 1838, 29 were within the first five years, and had an aggregate circulation of \$12,233,374. Their securities, consisting of stocks, bonds, and mortgages, were sold for \$953,371, entailing a loss of \$601,966. The avails of these 29 banks were only 74 per cent of the circulation, with nothing for the other creditors. The losses to the note holders occurred only in the case of those banks which had deposited State stocks other than those of New York. Of the entire number failing, but 23 redeemed their circulating notes in full. At the end of 1862, the Reciprocity Bank of Buffalo was in the hands of a receiver. The circulation at date of failure amounted to \$159,577 The affairs of the Bank of Orleans and the Yates County Bank were still unsettled.

From 1852 to 1857, and prior to the panic, 51 of the 94 free banks and private institutions in Indiana are reported as having failed, with almost entire absence of payment to note holders or other creditors. The amount of circulation and other liabilities have not been obtained During 1863 the circulation of the Bank of North for these banks. America at Clinton was redeemed at the Southern Bank of Terre Haute at 90 cents. The circulation of the State Stock Bank at Peru was redeemed at the Bank of Goshen at 85 cents, and the circulation of the New York and Virginia State Stock Bank was redeemed at par. The circulation of the following banks was redeemed by the auditor of the State from securities which had been deposited with him: Bank of Albany, at 90 cents; Bank of Albion, at par; Bank of Gosport, at par; Bank of Perryville, at par; Bank of South Bend, at par; Boone County Bank (genuine), at par; Bank of T. Wadsworth, at 91 cents; Bank of Rockport, at par; Central Bank, at par; Farmers' Bank of Jasper, at 91 cents; Kalamazoo Bank, at par; State Bank of Marion, at 90 cents; Savings Bank of Indiana (genuine), at 69 cents; Wayne Bank, at Logansport, at par; Wayne Bank, at Richmond, at par; and Agricultural Bank, at par. In the notice of the auditor of the State it is set forth in italics that persons sending notes "will take particular notice" that no other suspended-bank notes are redeemed at his office.

The bank reports from Minnesota show that on January 1, 1863, the circulation of the Bank of Rochester was being redeemed at 164 cents

on the dollar; Chisago County Bank at 194 cents; Filmore County Bank, 20 cents; Bank of Owatonna, 203 cents; Exchange Bank, 214 cents; Central Bank, 30 cents; Nicollet County Bank, 35 cents; Bank of the State of Minnesota, 70 cents; Bank of St. Paul, 98 cents, while the circulation of the Bank of Redwing was provided for at par.

The banking system of the State of Michigan prior to 1863 was, as practiced, entirely based upon frauds. It is current history that the bank commissioners were carefully watched with a view to transporting specie from banks already examined to those which it was supposed they were about to visit. Gold and silver never before circulated so freely or traveled so rapidly, and if the same well-filled boxes or bags were found in several banks in succession some official was ready to swear that the bona fide ownership was vested in the present possessor. Sometimes it passed the commissioner by rapid transit on the road; sometimes it was transported by night; sometimes, arriving too late, it was handed in at the back door of the banking house while an examination was in progress. But there were some banks that had no amount The Bank of Sandstone, for instance, never of even borrowed specie. had any specie, and although its liabilities exceeded \$38,000, it had no assets of any kind at the time when it was reported upon. change Bank of Shiawassee had in the safe but 7 coppers and a very small amount of paper, while it had bills in circulation to the amount of \$22,267. The Jackson County Bank was discovered by the commissioners to have many large and well-filled boxes, but on being opened and examined it was found that while the top was covered with silver dollars there was nothing below but nails and glass. The only box containing silver brought into the room and sworn to by a director present as the property of the bank was afterward the subject of an action by the director against the receiver of the bank for its recovery, claiming it as his own individual property. A settlement of the bank's affairs proved that, with an indebtedness of some \$70,000, it had not more than \$5,000 of available assets. It was reported by the bank commissioners in December, 1839, that only 3 chartered banks, with 1 branch bank, and 4 organized under the general law out of 60 recently established were then in existence. The report of the attorney-general of the State, made at the same time, enumerates 42 banks under injunction and exhibits the condition of their affairs so far as ascertained. His report is an exhibition of a large amount due creditors, with little or no available assets with which to liquidate. It is estimated that the circulation outstanding, which was a total loss to the note holders of the State, was not less than \$1,000,000.

Illinois, Indiana, and Wisconsin passed free-bank laws in 1851, 1852, and 1853, respectively. Few of the banks organized under these laws escaped disastrous failure, either prior to 1857 or in the panics of that year and of 1861. Immense loss was entailed upon all of their creditors. At these two periods most of the banks of the Southern and Western States failed, either because their business was transacted without any actual supply of capital or from reckless management.

It is stated in Elliott's Funding System, page 1176, that in 1841, out of banks having a capital amounting to \$317,642,692 and circulation of \$121,665,198, fifty five banks, with a total capital of \$67,036,265 and a circulation of \$23,577,752, failed. In nearly every instance the capital of these banks was entirely lest

of these banks was entirely lost.

In the financial report for 1838 the balance of public deposits due from banks which had suspended specie payments amounted to \$2,345,535, including the Commercial Bank of Buffalo, the Mobile branch of the Bank of Alabama, the Planters' Bank of Mississippi at

Natchez, the Agricultural Bank of Natchez, the Bank of Kentucky at Louisville, the Franklin Bank of Cincinnati, the State Bank of Indiana, the Bank of Michigan at Detroit, and the Farmers and Mechanics' Bank at Detroit.

The following list of 129 banks, with capital amounting to \$24,212,339, and 36 banks of which the capital was not known, are banks enumerated by Hon. Albert Gallatin, previously Secretary of the Treasury, in Considerations on the Currency and Banking System of the United States:

LIST OF THE BANKS WHICH FAILED OR DISCONTINUED BUSINESS FROM JANUARY 1, 1811, TO JULY 1, 1830.

	Thirty-six banks	

In the Comptroller's report for 1878 an estimate is made that the losses upon all of the currency issued by State and private banks amounted annually to 5 per cent, but no estimate had been made as to the losses to other creditors and shareholders. As in most cases prior to 1863 the noteholders were preferred creditors, undoubtedly the loss to depositors and shareholders must have been enormous.

STATEMENT EXHIBITING THE NUMBER OF BANKS, WITH CIRCULATION, DEPOSITS, AND AMOUNTS DUE TO OTHER BANKS, BY STATES, FOR THE NINE YEARS PRIOR TO JANUARY, 1863.

RESULTS OF INVESTIGATION RELATIVE TO INSOLVENT STATE BANKS FROM 1863 TO 1896.

In my annual report for the year 1895 certain information then obtained respecting insolvent State banks was given. It was, however, so meager and fragmentary as to be highly unsatisfactory. In order to supply the defects, and to gather reliable data, on August 6 of the present year an inquiry was instituted regarding the condition of insolvent banks other than national subsequent to February 25, 1863, the date when the original national bank act went into effect. The following information was requested: Name and location of the bank; date of failure; liabilities not including capital stock, surplus, and undivided profit; dividends paid; estimate of further dividends.

In view of the difficulty experienced last year in prosecuting this inquiry, it was decided to have the investigation made through nationalbank examiners exclusively, and a letter, of which the following is a copy, was sent to each one of the 58 national bank examiners in the

United States:

TREASURY DEPARTMENT. OFFICE OF THE COMPTROLLER OF THE CURRENCY, Washington, D. C., August 6, 1896.

Sir: In October, 1895, this office made an attempt to secure certain information, for incorporation into the annual report of the Comptroller of the Currency, relative to failed banks other than national in the different States, and the banking officials of such States, together with a number of the examiners, were requested to aid me in this respect.

The information received, however, was not of sufficient completeness to warrant its insertion in the report, and I have now undertaken to secure the desired information through the national-bank examiners exclusively, using that obtained last year

as a basis upon which to begin work.

To this end I send you inclosed herewith a tabulated list of the information received concerning the State of ______, covered in part by your territory, and the request that you endeavor, either by personal call upon those possessed of the facts while visiting a place for the purpose of examining a national bank or by correspondence whenever necessary, to verify this information, and add anything more you may be able, going back, if possible, to the year 1863.

I will send you by mail a supply of blanks to be used for the purpose mentioned, and you will please observe the headings and give the information as indicated

therein.

It is understood that the receivers of these State banks are appointed by the various State courts, their reports being filed with the clerks of the courts appointing them. It would appear that the desired information could be obtained either from the receiver of each of the banks or from the clerk of the court, from whom it ought to be obtainable without necessitating the payment of fees.

I shall look to you for this information, in as complete form as it is possible for you to obtain it, not later than October 1, 1896.

Please acknowledge receipt of this letter, and advise me from time to time of the progress you are making.

Very respectfully, JAMES H. ECKELS, Comptroller. As a result of the effort to collect information on this subject, reports

were received as to 1,164 banks, having an aggregate capital of The nominal assets reported amounted to \$212,725,771.58, the liabilities to \$218,833,563.86, and the dividends paid to \$99,711,330.75. In addition to this, 70 failures are reported in the various States, with no information as to dates of closing. The capital of these 70 banks amounted to \$445,000, nominal assets \$1,586,419, liabilities \$1,796,424.41, and dividends paid, \$377,396.20. The total failures, therefore, reported from 1864 to October 31, 1896, aggregate 1,234; capital \$53,632,259, nominal assets \$214,312,190.58, liabilities \$220,629,988.27, dividends paid \$100,088,726,95. This information is shown, by years, in the following table:

Number of Failures, Capital, Assets, Liabilities, and Dividends Paid by Banks other than National which Failed in Each Year from 1864 to 1896.

The following table shows the number of failures, capital, assets, liabilities, and dividends paid by banks in each State and Territory. It will be observed that some States have suffered from failures to an extent greater than others, but this is partially explained by the fact that some of the examiners had better opportunities and showed greater diligence than others, and, in addition to this, the information in certain sections was more readily obtainable, and in others the difficulties encountered were almost insurmountable. In some cases it was impossible, for various reasons, to get all of the desired information, or even to get the exact number of failures during the period covered by this investigation, and those States, necessarily, show fewer failures than have actually taken place:

Number of Failures, Capital Stock, Assets, Liabilities, and Dividends Paid by Banks Other than National which Failed in Each State and Territory from 1863 to 1896.

States and Territories.	No. of failures.	Capital.	Nominal assets.	Liabilities.	Dividends paid.

PERCENTAGE OF DIVIDENDS PAID BY STATE BANKS.

The reports of insolvent State banks show that 158 banks paid dividends to creditors of 100 per cent; 128 paid 75 per cent and over, but less than 100 per cent; 184 paid 50 per cent and over, but less than 75 per cent; 203 paid 25 per cent and over, but less than 50 per cent, and 192 made payment of less than 25 per cent.

Herewith is given a tabulated statement of all of such banks, and their location by States:

Number of Failed Banks in Each State and Territory which Paid Dividends at the Rates Indicated.

STATE BANKS PAYING NO DIVIDENDS.

In the States and Territories regarding which information concerning failed banks was received, 282 associations, with an aggregate capital stock of \$12,067,869, assets amounting to \$30,698,307, and liabilities aggregating \$26,351,087, are reported as having paid no dividends to creditors. Of these associations one is reported in Alabama, amount of capital, assets, and liabilities not being given; Arizona, one, capital \$50,000, assets \$81,033, liabilities \$32,405; Arkansas, one, capital \$12,500, assets \$47,889, liabilities \$35,389; California, three, capital \$159,600, assets \$513,548, liabilities \$266,969; Colorado, nine, capital \$240,000, assets \$812,888, liabilities \$608,264; Connecticut, two, capital \$51,600, assets \$81,799, liabilities \$29,599; Florida, four,

capital \$41,500, assets \$17,571, liabilities \$40,194; Georgia, three, capital \$400,000, assets \$1,041,161, liabilities \$725,895; Idaho, three, capital \$50,000, assets \$126,678, liabilities \$280,527; Illinois, twentyfive, capital \$991,000, assets \$2,138,106, liabilities \$2,480,779; Indiana, nine, capital \$310,000, assets \$290,992, liabilities \$403,759; Iowa, nine, capital \$170,000, assets \$641,112, liabilities \$961,322; Kansas, seven, capital \$105,000, assets \$276,090, liabilities \$273,686; Kentucky, five, capital \$545,000, assets \$1,180,466, liabilities \$863,461; Louisiana, two, capital \$283,000, assets \$72,346, liabilities \$65,000; Michigan, two, capital \$251,000, assets \$641,067, liabilities \$247,184; Minnesota, ten, capital \$1,188,000, assets \$2,693,551, liabilities \$1,920,281; Mississippi, one, no information regarding capital, assets, and liabilities; Missouri, twelve, capital \$102,500, assets \$1,259,224, liabilities, \$1,183,027; Nebraska, fifty-seven, capital \$1,427,740, assets \$3,965,655, liabilities \$2,541,458; Nevada, two, capital \$30,000, assets \$259,435, liabilities \$234,861; New Mexico, three, capital \$15,000, assets \$5,000, liabilities \$117,000; New York, twelve, capital \$1,305,000, assets \$4,586,431, liabilities \$3,220,963; North Dakota, ten, capital \$432,133, assets \$1,030,334, liabilities \$503,259; Ohio, twenty-one, capital \$275,565, assets \$552,656; liabilities \$1,688,752; Oklahoma, two, capital not given, assets \$2,000, liabilities \$18,500; Oregon, four, capital \$50,000, assets \$34,500, liabilities \$146,200; Pennsylvania, nineteen, capital \$600,000, assets \$170,950, liabilities \$1,472,092; South Carolina, two, capital \$35,000, assets and liabilities not given; South Dakota, ten, capital \$142,000, assets \$248,060, liabilities \$272,921; Tennessee, one, capital \$30,000, assets \$50,000, liabilities \$270,000; Texas, one, capital \$5,000, assets \$43,848, liabilities \$27,782; Utah, three, capital \$210,000, assets \$485,710, liabilities \$375,257; Virginia, three, capital \$504,000, assets \$1,355,000, liabilities \$949,000; Washington, twentytwo, capital \$1,491,300, assets \$3,479,287, liabilities \$2,215,641, and Wisconsin, eleven, with capital stock of \$564,431, assets \$2,513,920, and liabilities \$2,129,660.

INSOLVENT STATE BANKS HAVING NO CAPITAL STOCK.

In the States of California, Colorado, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Maine, Maryland, Minnesota, Montana, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, South Dakota, Tennessee, Texas, Vermout, Virginia, Washington, Wisconsin, and Oklahoma Territory there are 233 insolvent banks reported as having no capital stock. Their total nominal assets are given as \$33,458,225 and their aggregate liabilities, \$53,742,095. The reports from Massachusetts, New Hampshire, and Ohio did not give the capital stock of the various insolvent associations in those States.

TIME REQUIRED TO CLOSE INSOLVENT STATE BANKS.

An effort has been made to ascertain from the information at hand the average time required to close the affairs of these insolvent associations, with the following results: The longest time the affairs of any insolvent association was open is reported as twenty-four years. There is one association reported as continuing twenty-two years; two for twenty-one years; two for eighteen years; three for seventeen years; one for sixteen years; one for fourteen years; four

for thirteen years; ten for twelve years; thirteen for eleven years; four for ten years; fifteen for nine years; eleven for eight years; seventeen for seven years; fourteen for six years; twenty-six for five years; twenty-eight for four years; and forty-six for three years. The average time required to close the affairs of 353 of the 1,234 failed banks was four and three-fourths years. The affairs of the remaining 881 banks are either still unsettled, or, if settled, the reports do not so state.

RESULT OF INVESTIGATION ON EXTENT OF THE USE OF CREDIT INSTRUMENTS IN DAILY PAYMENTS.

From time to time there have been carried on through the office of the Comptroller of the Currency investigations tending to make more complete the information afforded Congress and the public on the extent to which the use of instruments of credit enter into the settlement of wholesale and retail transactions in daily life. The importance of these investigations has been augmented by the growing demand for such legislation upon the subject of banking as will give to the country a bank note issue adequate to meet the needs of the business world, absolutely sound, and so regulated as to make it continually and automatically responsive at any and all seasons of the year and under all conditions of trade and commerce.

It can not be expected that such bank or other currency system can be evolved without the legislative branch of the government and others who have to deal with it having complete knowledge of the matters which most affect and enter into the making of transfers of property from seller to buyer. It was with this end in view that the investigation, the result of which is herewith given, was undertaken. The hope at the outset was that it would be more exhaustive in its scope than any previous one, and it is believed in many respects the results gathered justify the expectation had when the investigation was

entered upon.

In the tabulation and analysis of these returns the services of David Kinley, Ph. D., professor of political economy at the University of Illinois, have been largely availed of. He has had as an assistant Mr. N. A. Weston, a member of the faculty of the same university. The facts obtained being so thorough in character, it was desired to present them, together with the deductions to be drawn therefrom, in a manner equally complete and accurate. Professor Kinley, having aided in elaborating the results of the investigation of 1894 and being fully conversant with the whole subject and the manner of dealing with the statistics gathered, was therefore again called upon.

IMPORTANCE OF THE INQUIRY.

The important bearing of bank notes upon the transactions of the commercial world is emphasized by the constant attempt made to regulate their issue by legislation. In the first instance, to the largest degree, such desired legislative control arose from a pronounced hostility toward the bank note on the part of the lawmaking powers and the public. The greater the misinformation upon the subject the greater the hostility evidenced against bank-note currency. Fifty years ago among every class of people were found large numbers who looked upon the notes of a bank as a tool which the banks could and generally did use contrary to the public welfare. It was also believed that their issue was the most important business of the bank.

These ideas are by no means extinct to day. It was in consequence of holding to this belief concerning bank notes that legislation at that time was so largely directed in this and other countries toward efforts to control the banks in their powers to issue them. The course of banking, however, notwithstanding the attempt to thus control it by legislation, has developed upon entirely different lines, and the feature of modern-day banking in the United States and England is the deposit and not the note issue feature. The note issuing function is but the incident and not the principle in its operations. The check, and not the note, is the symbol of banking progress, and its extensive use is the best proof of a high plane of industrial and commercial life. The check system is therefore a subject of interest and importance in our business world—of so much interest and so much importance that knowledge of the extent and influence of it is necessary to a proper understanding of the machinery of exchange. The fact that it has been a matter of inquiry on many different occasions is evidence of the value attached to any data that can be secured concerning it. It is a matter of scientific interest as giving a clearer idea of exchange in modern communities, and of practical importance because of its bearing upon the question of the determination of the volume of money needed under given social and economic conditions.

The quantity of money necessary to a country to transactits business and the possibility of determining this quantity have long been subjects of discussion and investigation, though not a few writers have taken the position that both are questions of little importance. If it be true that the quantity of money has an important part in determining the level of prices, obviously the monetary policy of the country would be clearer if it were possible to determine the quantity of money needed under existing conditions. It is believed, however, that the importance of this level of prices through long periods has been greatly overestimated. So, too, in some quarters, it is evident that the influence of the quantity of money on prices has been equally exaggerated, while in others that influence has been belittled. Correspondingly, too much or too little importance has been attached to the use of credit instruments* in payments, by one authority or another, accord-

ing as he was influenced by his previous theory.

In the Report of the Comptroller of the Currency for 1892, Volume I,

page 32, the following statement appears:

Over 90 per cent of all business transactions are done by means of credit. When the public loses confidence and credit is impaired and refused over 90 per cent of the business transacted is directly affected. It is easy to realize how unprofitable it is for the remaining 10 per cent of money to carry on the business of the country without business stringency and financial distress.

Similar or different views have been expressed by students of monetary problems in this country and abroad, all tending to show from the conflicting opinions entertained that any facts which can be obtained upon the subject must be regarded of great value.

PRICES AND QUANTITY OF MONEY.

The relation between the quantity of money and prices can not be here discussed, but certainly the factors which determine the price level are numerous, and the amount of money which the country requires depends not on one but on many circumstances. A careful study,

^{*}In this connection the term "credit instrument" is used as a convenient term for all classes of bank paper that are used in making payments and are not commonly called money.

however, of the amount of the country's trade, the number and frequency of payments to be made, the commercial and domestic habits of the people, and other factors enumerated by economic writers, show that they may be reduced to three or four groups, or that there are two or three so important as to exert a determining influence upon the leveling of prices. Of these the extent of credit operations and the use of credit instruments in exchanges occupy no unimportant position. Without undertaking to formulate a relation between the quantity of money and prices, and therefore between the extent of credit instruments and prices, it is proper to assume that a relation does exist. On that assumption it is designed that the present investigation shall furnish some information concerning the character and influence of one of these factors.

The problem is so exceedingly complex as to render it difficult to arrive at conclusions of absolute accuracy, but the difficulty of the inquiry only makes it more necessary that it should be investigated. It is undoubtedly true that there is no known way of directly determining the quantity of money necessary in a country at any given time, nor is it certain that there is any indirect method available. It is, however, not unreasonable to assume that so far as actual payments are concerned the quantity of money and the quantity of credit instruments are complementary, allowing for velocity of circulation, and that if the latter can be determined approximately and approximate data of the total trade of the country can also be secured, some information will be obtained, although, possibly, it may be slight, upon the subject

PREVIOUS INVESTIGATIONS MADE OF SUBSTITUTES FOR MONEY.

It will be interesting and proper in this connection to review briefly the history of previous attempts to determine the amount of credit instruments used in business. The first information of importance published on this subject was that furnished in a report of the committee of the House of Commons on the crisis of 1857. That report contains an analysis of the operations of the banking house of Mr. Slater for 1856, in which he gives the following table,* showing the proportion in which each million of receipts and expenditures were made in money and the various forms of credit:

RECEIPTS.

In bankers' drafts and mercantile bills payable after date Checks payable on demand	357, 715	2000 000
Bank of England notes. Gold. Silver and copper Post-office orders.	28, 089 1, 486	£900, 938
•		99, 062
Total		1,000,000
PAYMENTS.		
By bills of exchange Checks on London bankers	302, 674 663, 672	966, 346
Bank of England notes	22, 743 9, 427 1, 484	000, 040
		33,654
Total	• • • • • • • • • • • • • • • • • • • •	1,000,000

^{*} The table is taken from McLeod's Theory and Practice of Banking.

This table shows that in the operations of this banking house gold and silver entered to an extent of less than 3 per cent, Bank of England notes to 7 per cent, credit instruments 90 per cent. Of the payments, gold and silver formed 1 per cent, bank notes 2 per cent, credit instru-

ments 97 per cent.

The next data of importance on the subject given to the public were furnished by Sir John Lubbock in his article "Country clearing," published in the Journal of the London Statistical Society, September, 1865. The account, as follows, is taken from the report of the Comptroller of the Currency for 1881:

	Pounds sterling.	Per cent.
Clearing Checks and bills which did not pass through the clearing house. Bank notes Coin Country notes	139,000	70.8 23.4 4.9 .6
Total	23, 095, 000	100

It would appear from this that out of £1,000,000 rather more than £700,000 passes through the clearing house. The second account given above, £5,394,000, includes, of course, the transfers made in our own books from the account of one customer to that of another. These amount to £3,603,000, the remainder, £1,791,000, representing the checks and bills on bankers which did not clear.

In order to ascertain the proportion of payments made in bank notes and coin in town, I have taken the amount, £17,000,000, paid in by our London customers. This

was made up as follows:

	Pounds ster- ling.	Per cent.
Checks and bills on clear in bankers. Checks and bills on oursolves. Checks and bills on other bankers Bank of England notes Country bank notes. Coin	1,600,000 1,400,000 674,470	77. 4 9. 5 8. 3 4. .1
Total	16, 802, 000	100

The above amount of bank notes, small as it is, must, I think, be still further reduced. All the clearing bankers have accounts at the Bank of England, and as we require notes to supply our till, we draw them from the Bank of England, crediting the bank in our books. Out of the above amount of £674,470, £266,000 were notes drawn by us from the bank to replenish our till, and did not represent the amount paid in by our customers to their credit. On the other hand, we must add the amount of notes paid in for collection, and deduct the loans on security which pass

through the different set of books, and which represent the sum of £2,460,686. Making these alterations, we find that out of £19,000,000 credit to our town customers, £408,000 consisted of bank notes, £79,000 of country bank notes, and

£118,000 of coin.

	Pounds sterling.	Per cent.
Checks and bills. Bank notes Country notes. Coin.	18, 395, 000 408, 000 79, 000 118, 000	96.8 2.2 .4
Total	19, 000, 000	100

It has been objected that Sir John Lubbock's statistics do not fairly represent the proportion of payments made in England with ready money, on the ground that his bank did not afford accurate indications of the character of the commercial transactions of all England. The objection, it would seem, is well founded. Certainly the returns did not furnish a sufficient basis for safe conclusions.

Among the returns obtained in the present investigation was a statement from a Chicago banking house of its total transactions for the first six months of 1896, which showed that only twenty-two one-hundredths of 1 per cent of the whole six months' business was in "currency." It would hardly be fair to conclude that the business of all similar houses was performed on an equally small basis of money. Indeed, in no case among the returns of the present investigation is there a similar instance.

The next data on this subject were gathered in this country by the Treasury Department at the request of President Garfield, then in the House of Representatives. In his speech on resumption, November 16, 1877, he stated that when he was chairman of the Committee on Banking and Currency in 1871 he requested the Comptroller of the Currency to secure for him data on the subject from 52 selected banks. He goes on to say:

I selected three groups; the first was the city banks, the second consisted of banks in cities of the size of Toledo and Dayton in the State of Ohio. In the third group, if I may coin a word, I selected the "countriest" banks, the smallest that could be found, at points away from railroads and telegraphs. The order was that those banks should analyze all their receipts for six consecutive days, putting into one list all that can be called eash—either coin, greenbacks, bank notes, or coupons—and into the other list all drafts, checks, or commercial bills. What was the result? During those six days \$157,000,000 were received over the counters of the 52 banks, and of that amount \$19,370,000—12 per cent only—was in cash, and 88 per cent, that was amount representing every grade of business, was in checks, drafts, and commercial bills.

Following this effort to secure data on the subject was the one made by the Comptroller of the Currency in 1881. On two dates, June 30 and September 17 of that year, he asked the national banks for classified returns of their receipts and payments. As shown by the tables incorporated in this report, returns were received in June from 1,966 of the 2,106 national banks in operation, and for September 17 returns were received from 2,132, being all the national banks in operation at that It will be seen by the tables that the gold coin in the returns on the first date amounted to sixty-five hundredths of 1 per cent of the total receipts, and the silver coin to sixteen one hundredths of 1 per cent; the paper money was 4.6 per cent and checks and drafts were 91.77 per cent. The Comptroller gives 95.13 per cent as the total percentage of credit instruments used for payments, according to these returns. In this, however, he includes clearing house certificates. The same thing was done in subsequent reports in 1890 and 1892. Inasmuch, however, as these clearing house certificates are really certificates of deposit of currency, they can not be properly classed with They should therefore be left out in figuring the checks and drafts. total percentage of credit instruments. On September 17 of the same year gold coin formed 1.38 per cent of the receipts of the national banks; silver coin, seventeen hundredths of 1 per cent; paper, 4.36 per cent; checks and drafts, 91.85 per cent. The Comptroller includes clearing house certificates again, and so makes the total per cent of credit instruments 94.09. Other totals may be gathered from the tables, which are inserted in the report for the purpose of comparison.

TABLE I.—ANALYSIS OF NATIONAL-BANK RECEIPTS, JUNE 30 AND SEPTEMBER 17, 1881.

	June 30-1,9	66 banks.	Sept. 17—2,132 banks.

In his report for 1881 the Comptroller also discusses the use of checks in France, England, Scotland, and Ireland. In France, as is well known, "the use of deposits, bank accounts, and checks is still in its infancy." In the past ten years, however, their use has doubtless increased. The Bank of France for several years made an effort to persuade the public to use them to a larger extent, and offered advantages to those who kept current accounts, in the shape of better facilities for "transfer from one place to another free of cost for all sums proceeding from discount operations or the encashment of documents on demand. We have desired to proceed further with this plan, and we have just completed the first arrangement by giving to all those who had current accounts with us, without exception, a means of disposing by open checks of the whole of the sums which stand to their credit. * * will be delivered gratuitously when they are drawn against the proceeds or discounts of drafts on demand encashed by the bank, and they will be made payable in all our establishments indifferently."*

In England banking has reached a high stage of development, and the percentage of credit instruments used in transactions in that country probably runs as high as it does in our own. The London Banker's Magazine for November, 1881, gives data from which the Comptroller of the Currency in that year reported that the percentage of checks in the receipts of London banks averaged 97.23, in the banks of Edinburg 86.78, in the banks of Dublin 89.90, and in the country banks, in 261

places, 72.86.

In the same report of the Comptroller is given a table showing the percentage of bank notes, coin, and checks used in the transactions of several English banking houses. In one case 90 per cent of the total receipts consisted of bills and checks, and 97 per cent of the payments were of the same character. Two banks of Manchester showed 47 per cent, 58 per cent, and 68 per cent of total payments in credit instruments in the years 1859, 1864, and 1872, respectively. In still another case, the transactions of an English banking house for six working days in each month for a period of seven months in 1878 and 1879 showed 96.5 per cent of the total receipts in credit instruments and 96.9 per cent of the total payments in paper of the same character. The foreign data, however, are small and insignificant when compared with those which have been obtained from investigations in this country.

The subject was investigated again in 1890 and 1892. In the former year, on July 1, checks, drafts, etc., constituted 91.46 per cent of the total receipts of 3,364 banks. In September the percentage for 3,474

 $^{^{\}ast}$ Report of the Bank of France for 1880, as quoted in report of the Comptroller for 1881.

banks was 90.3. Tables II and III show the details. If clearing-house certificates are included, the per cents are 92.5 and 91.04 for 1890 and 90.61 for 1892.

Table II.—Analysis of National-Bank Receipts, July 1 and September 17, 1890.

The Comptroller notes as a conspicuous change the increase in the percentage of credit instruments returned by country banks from 14.11 per cent in June, 1881, to 25.28 per cent in September, 1892. He summarizes the results as follows:

The variations in the percentage of the different kinds of money, checks, drafts received, as shown in the statistics for September 15, 1892, do not essentially vary from those of 1890 and 1891. The percentage shows a decrease for each of the three years reported and a corresponding increase in the amount of cash received by the banks over their counters.

A study of the results of the investigations thus far discussed shows that although they are very valuable as throwing light on the extent to which the credit instruments enter into payments for all classes of transactions, they are not satisfactory as a means of determining the percentage of such paper used in the actual trade of the country.

In the first place, the figures obtained show the total receipts of the banks. The receipts of a bank during a given day may be very different

from its deposits, inasmuch as the receipts will usually include bills for collection, checks presented for cashing, notes discounted, and various other items which go to swell the total per cent of credit paper. In the second place, the results received furnish no satisfactory means of distinguishing between the credit paper that passed in consequence of speculative transactions and that which represents real trade. Still further, no measures were taken to have the returns classified on the basis of the different classes of business. And, finally, no investigation was made into incidental influences affecting the use of checks.

In consequence of these and other defects, the inquiry of 1894 was instituted. This investigation was confined entirely to retail trade. It called for the deposits received by the national banks from certain classes of retail traders instead of for the total receipts of the banks. The banks were requested to specify the amount of each of the different kinds of money and the amount of checks and other instruments of credit in the deposits of retail grocers, butchers, clothiers, furniture dealers, and fuel dealers. The day selected for securing the data was the settling day nearest the 30th of June. These five classes of retail dealers were selected for the reason that the purchase of their products represents the principal part of the expenses of living of the people at Hence, any data received concerning the mode of payment in transactions of this kind it was thought would be valuable as showing the extent to which credit paper actually was used in trade payments. "Settling day" was selected on the supposition that the returns on such a day would be more likely than any other to show the normal volume of trade and the normal volume of checks deposited.

Information was also sought concerning the length of period of credit in retail trade; the length of the wages period; the method of payment of wages, whether by checks or in money, and the extent to which wage checks are cashed by merchants. The purpose of this last was to secure some information whereby correction could be made for the deposit by merchants of pay checks which they had simply cashed instead of receiving in payment for goods. The results of the investigation are given in the general comparative table presented in the present report (table No. XVI).* It appeared from the returns that about 58 per cent of the deposits of the traders concerned was in checks and other instruments of credit, and that from the investigation 50 per cent is a fair average for the amount of credit paper entering into the

transactions of the dealers reporting on the date mentioned.

The investigation of 1894, too, was unsatisfactory, for several reasons. In the first place, returns were asked for only a part of retail trade, expenditures in which constitute about 67 per cent of the total expenses of an average family. In the second, the returns came from the national banks only, and in this respect were defective, like all previous reports. Still further, there were no figures in existence to permit a comparison to be made with those obtained. And, finally, the reports were for but one day. For this last reason it was thought they were liable to serious error, because the deposits made by the traders on the day in question probably represented sales made throughout the period of credit common to their community, while the money deposits probably did not include payments for all the cash sales made during that period

^{*}The data received in 1894 have been gone over again since the publication of the Comptroller's report and certain corrections made. These appear in this table. The general average is only slightly changed.

Some effort has been made in the present investigation to meet this

difficulty.

As a result of these obvious difficulties it seemed best to make another investigation on a much larger scale and with more careful attention to the form of the returns. It was desirable to secure comparative data to test the figures previously obtained, and to take advantage of previous experience in order to eliminate sources of error. These sources of error, as has been noted, came principally from the paucity of the returns, the small industrial field covered by them, and the nonclassification of depositors.

THE PRESENT INQUIRY.

In pursuance of these ideas a circular was sent out asking for the necessary information, in the following form:

> TREASURY DEPARTMENT. OFFICE OF THE COMPTROLLER OF THE CURRENCY, Washington, D. C., June 15, 1896.

The Cashier - Bank,

Sir: In 1894, in response to the special request issued by the Comptroller of the Currency, the national banks made reports to this office showing the extent of the use of credit instruments in retail transactions by their customers, the results being shown in the annual report issued from this Bureau in that year. It is now desired for purposes of comparison, and also to increase the fund of information relative to the use of credit instruments, to extend the scope of inquiry to cover not only retail but wholesale transactions, and as well transactions of other depositors in all banks. With this end in view, I inclose herewith a blank form on which you are requested to state, as of the "settling day" in your community nearest to July 1, the amount and characterists reads in your bank on the dayscatch by (1) retail dealers. and character of deposits made in your bank on the day selected by (1) retail dealers, (2) wholesale dealers, and (3) all other depositors. Your attention is also called to the three inquiries following the statement of deposits with respect to "proportion of checks," etc., "payment of wages by checks," and "time of payment of wages."

Information is also desired respecting the number of your depositors, total deposits in bank, and all actual cash on hand, classified as indicated, at the close of business on the day selected for this and the statement above called for.

In order to make the investigation as complete as possible, this request has been

In order to make the investigation as complete as possible, this request has been sent to every banking institution in the United States—national, State, savings, and private banks, and trust companies. These statistics will be of sufficient value, it is believed, to warrant urging upon you to aid in making them thoroughly complete. In making a request for returns from those who are not conducting banks under the national-bank act, it is hoped the responses will be as general and complete as from those who are connected officially with this office. Such courtesy will be greatly appreciated, and the assurance is given that the publication of the information submitted will be confined entirely to a general summary of the returns. The subject is of wide and general interest and will give an amount of statistical information that will be of benefit to the public.

As the compilation of these returns will involve considerable time and labor, I trust that you will transmit your report to me as promptly as possible after July 1.

Very respectfully.

Very respectfully,

JAMES H. ECKELS, Comptroller.

- Bank, _____, July —, 1896.

The Comptroller of the Currency, Washington, D. C.

SIR: In compliance with your special request, dated June 15, 1896, I append hereto statements showing (A) the amount and character of deposits made in this bank on July—, (1) by retail dealers, (2) by wholesale dealers, and (3) by all other depositors; and (B) number of depositors, total amount of deposits, and cash on hand, classified as indicated.

(A) Deposits made in this bank on July -, 1896.

Respectfully yours,					

It is to be noted that the circular called for deposits, not receipts. Obviously the deposits would be less in volume, as has already been stated, than the receipts, but they would represent more accurately the real business transactions of the country. The circular, it will further be noticed, called also for a classification of depositors into "retail dealers," "wholesale dealers," and "all others," together with the usual classification of the deposits. The date selected was the settlement day nearest the 1st of July. A settlement day was selected for reasons already given. Midsummer was chosen merely as a matter of convenience. Further, the circular asked for certain incidental information. It asked whether the percentage returned was an average one, whether wages were usually paid by checks in the community, and what was the length of the wage period. Information on the two latter points is of considerable value in determining whether or not the percentage of checks returned in any given community is due, to a large extent, to these special causes.

Bank.

Those who are familiar with statistical investigations need not be told that it is quite impossible to prepare a form so phrased as to preclude the likelihood of misinterpretation, or to secure information so accurate as to cover all possible variations in the conditions that it seeks to investigate. It almost seems as if common words were turned into stumbling blocks by the mere fact of being used in a formal way. It is exceedingly difficult to get uniform interpretation of even very simple questions and terms. The present investigation is no exception to this experience. In interpreting the results obtained we must allow for errors due to various causes of this kind.

In the first place, it is difficult in some cases to draw the line between retail merchants and wholesale merchants. Where, for example, some asked, Shall we class the jobber, or the lumber merchant? The answer depends upon the community, the extent of the business, and the point of view. Ordinarily the retail merchant is regarded as one who sells directly to consumers; yet there are many dealers who sell both to consumers and to jobbers. One or two Boston banks were unable to classify the returns of some merchants in Fancuil Hall market for this

very reason.

Again, in a bank with a very large number of depositors, many of them are personally unknown to the officers of the bank. In such a case a proper classification can not be made. The best that could be done under these circumstances was for the bank to return the statistics of deposits of all who were known to be retail dealers. This was done in some cases. The omissions, however, such as they were, can have no effect of any importance on the average results, for the dealers included were, in all likelihood, representative. Moreover, there can not have been many omissions, for the difficulty arose only in a few of the larger cities.

In the next place, the returns, although more complete than any ever before obtained, are, after all, partial. Of the nearly 13,000 banking institutions of all kinds in the country, 5,700 sent replies, of which 5,530 were available. Of these 3,474 were from national banks and the remainder State and private banks, savings banks, and loan and

trust companies.

However, allowance can probably be made for any error due to the partial character of the returns. The results as obtained are tabulated hereinafter. There are three sets of tables of totals. The first set consists (1) of the deposits of retail dealers returned by the national banks in each State and Territory; (2) those of wholesale traders returned by the same banks; (3) the deposits of all the other depositors returned by the same banks; (4) the total deposits of all three classes of customers as returned by the same banks. The second set of tables contains the data, similarly arranged, returned by banks other than national. The third set of tables, also consisting of four, presents the total deposits of each class of dealers as returned by all the banks that made replies. The returns are presented in this detail for several reasons. First, inasmuch as the returns of the previous investigations came from national banks alone, it is desirable to present by themselves the data

inasmuch as the returns of the previous investigations came from national banks alone, it is desirable to present by themselves the data now received from them for purposes of comparison. Such a comparison will enable it to be determined how far the allowances made at previous times for omissions now supplied were good. In the next place, the presentation of the tables in so great detail will enable it to be distinguished more clearly the real business transactions from those that are purely speculative; and, finally, it will give some information as to

the use of the different classes of banks by the people, and the comparative influence of national and other banks in the business transactions of the country.
The tables are as follows:

From the face of the returns the conclusion to be drawn is that 67.4 per cent of the retail trade of the country is transacted by means of credit paper; that 95.3 per cent of the wholesale trade is so carried on; 95.1 per cent of business other than mercantile, and 92.5 per cent of all business.

In retail trade the national banks have 80 per cent of the deposits. The percentage of credit instruments in these deposits varies from 52 in Rhode Island to 87.3 in Nevada.* According to the returns of two years ago South Dakota stood lowest, with 37.6 per cent. It appears from the tables covering retail trade that the per cent of checks shown by the two investigations, in 1894 and 1896, is very nearly the same in Arkansas, Kansas, Maine, Maryland, Montana, and New Mexico,

^{*}The returns from Nevada are so small in the aggregate that they are not a safe basis for inference.

although the percentages for the last two are probably too high; that the present returns give higher percentages for Arizona, California, Colorado, Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Louisiana, Massachusetts, Michigan, Missouri, Minnesota, New Jersey, New York, North Carolina, North Dakota, Ohio, Pennsylvania, South Dakota, Tennessee, Utah, Vermont, West Virginia, Wisconsin, and Wyoming, and that in every case but three—Arizona, Delaware, and Wyoming—the number of banks reporting is much larger than in 1894. There seems to be no sufficient explanation of the higher per cent except that being deduced from a much larger volume of trade it is

more truly representative.

Indiana and Ohio, whose percentages were clearly abnormal in the returns of 1894, take their obviously proper place now with Illinois, Pennsylvania, and other adjoining States. The per cents in the present tables for Wyoming and Arizona are doubtless abnormally high. The deposits reported from Wyoming are \$26,000 less than two years ago, although four more banks sent in replies. The deposits reported from Arizona are in all only \$23,000 from five banks, as against \$77,000 from four banks two years ago. The percentage this time is less than in 1894 for Alabama, Florida, Georgia, Mississippi, Nebraska, New Hampshire, New Mexico, Rhode Island, Texas, Virginia, and Washington; the returns from New Mexico, with two more banks reporting than there were two years ago, show \$7,000 less of deposits, and the percentages in both cases, \$3.6 and \$0.3, are evidently too high. The other changes all seem to place the States concerned in a more probably correct position. The changes one way and the other have affected the average for the whole country by only 8.9 per cent.

The average per cent of credit instruments in the retail deposits is

The average per cent of credit instruments in the retail deposits is almost identical for the returns of both sets of banks, despite the great disproportion of the total deposits. The national banks yield an aver-

age of 67.9; the other banks, an average of 67.3.

The most remarkable difference in the averages of the two sets of tables are in the cases of California and Idaho. The national bank average for the former is 76.6 per cent, while the average of other banks is only 42.8 per cent. The difference is in the large amount of gold coin evidently in deposits of other State and private banks. A difference of 30.8 per cent exists in the averages for Idaho, but the larger of the averages is clearly too high on account of being based on too few returns. The averages work out practically the same from the two sets of returns for the States of Illinois, Idaho, Michigan, Nebraska, New York, North Carolina, North Dakota, Ohio, Pennsylvania, and Washington. It seems pretty certain that errors due to too few replies in either class of banks are offset by the fullness of the other set in most cases.

The high per cent in States like Missouri and New Mexico does not necessarily mean that checks are so much more largely used there than, for example, in Massachusetts. It probably shows rather that banks are used by a smaller per cent of the population, but by that part of the people which in any community uses checks most. The trade by this part of the population is doubtless much larger in proportion to their number than is that transacted by the rest. Hence the per cent, while too large, is probably not so much too large as at first thought

might appear.

There are certain points that need to be cleared up, and certain omissions that must be allowed for, before it is certain that the result

obtained is accurate.

In the first place, are the checks deposited by the retail dealers received wholly in payment of purchases made by them? Doubtless

not. In communities where wages are paid by check, merchants are often called on to cash these checks. In so far as their deposits include checks thus cashed, credit instruments would appear to represent too large a proportion of the business receipts of the depositors. But in most cases probably the checks thus cashed by the merchants are presented by customers who carry accounts with them. The amount owed by the owner of the check to the merchant would be deducted from the amount of the check and the balance turned over to him. It is proper enough, therefore, to regard even such checks as representing to a certain extent payments by credit paper. In so far as the checks cashed by merchants are cashed in full, they would make the proportion of checks in their deposits too large if their deposits are assumed to represent the extent of their trade. All things considered, the error due to this cause is probably too insignificant to deserve notice.

The second point to be considered, and one of more importance on its face, is the question whether the proportion of cash and credit paper in bank deposits may be properly regarded as that which exists in actual payments by customers. This has been denied, on the ground that a business man is likely to use part of the cash he receives in the interval between its receipt and the time of its deposit. The answer to this objection, however, is not difficult. The business man who is accustomed to using checks is as likely to give his check for such a payment as to make the payment in cash; moreover, it seems pretty well established that the cash in a tradesman's till is relatively constant.

even allowing for such payments.

The next question to consider is, What allowance should be made for deposits in banks from which no replies were received? The correction due to this failure ought not to be difficult. There is no reason to think that the deposits of banks which did not answer would be any different in character from those of the banks which did answer. It has been asserted that the banks from which no answers come in such investigations are those outside of the large cities, and that the average obtained is therefore too high. The returns do not show this to be Many banks in large places, such as Nashville, Tenn., wholly true. The returns of small State and private banks average failed to report. about the same as others. Even if the assertion were true, however, allowance could be made for the partial nature of the returns by adding for the banks not replying amounts in the proportion of their number to the total number of banks in country districts. As has been said, the total number of banking institutions to which blanks were sent is about 13,000; of the replies received, 5,530 were used. If the banks of the reserve cities are thrown out there will be left 5,005. This is 60 per cent of the whole number of banks outside of those cities: therefore 40 per cent of the country banks did not reply. If to the total deposits reported from the country outside of these cities is added 40 per cent for the nonreplying banks, the aggregate would be \$22,600,000. The amount of checks, similarly increased, is \$14,000,000. The resulting percentage of checks is 62. This is a variation of only 5.4 per cent from that obtained from the banks actually reporting.

Still further must be considered carefully the question whether the bank deposits are representative of the medium of payment used by all industrial classes. It is certainly true that there are very many people who do not use banks at all. The total number of depositors in the banks from which replies have been received is 5,929,963.* How many of these are individuals not in business at all, how many are men of

^{*}Omitting, in the case of most of the commercial banks, certificate deposits.

trade, retail or wholesale, and how many are corporations, it is of course impossible to say; and of the individuals who are in trade there is no means of ascertaining to a certainty how many carry on their business without receiving checks at all. It is probably true that all industrial classes whose annual income is below \$500 or \$600 do not use checks to any extent, though this number is being daily lessened by the increased use by them of savings banks. There are four classes of the population who, it has been urged, should be included among the noncheck users, whose trade would materially lower the percentage deduced from the bank returns. They are the negro population in the South, portions of the foreign population in our large cities,

all other wage earners of small income, and farmers.

To consider these classes in detail: The nonuse of checks by the negroes is undoubtedly offset to a large extent by the use of store orders and by direct barter. These store orders are used to a considerable extent in the payment of wages in the mining and country districts, especially throughout the South. Moreover, a considerable amount of the commodities consumed by these people is raised on their own plats of ground directly for their own consumption. That portion of their living which is thus supplied creates no additional demand for a medium of exchange. It would not be fair, therefore, to count the total value of the expenditure of the noncheck-using negroes on the side of cash in determining the percentage of credit instruments used in payments in retail trade; for the ultimate question under investigation in this and similar discussions is: What per cent of the demand for a medium of exchange is supplied by credit instruments? Obviously, products which are exchanged by direct barter, or are consumed by their producers, do not enter into the amount of this demand.

As to the second class, the foreign population, it is doubtless true that the suggestion made may apply to such portions of them as have not been used in their home countries to the deposit feature in banking, and therefore unacquainted with payments made by checks. In so far as they are located in the city, their trade would tend to lower the per cent of credit paper. How much it is impossible to say, but certainly not in proportion to their number, because until the commencement of the use of checks by this class the amount of their individual income is usually small, and their number, moreover, is comparatively small. Some data illustrating their habits in the matter of the use of

checks are given below in another direction.

These remarks apply also to the third class, the native white wage earners of small income, somewhat modified, however, by the extent to which checks are used in paying wages. Owing to the probably greater intelligence of this class, to the educational influence of the system of paying wages by check, and to the general character of the individuals in the class, the percentage of checks used is undoubtedly higher than is the case in the second class considered. There is some evidence to show this in some of the detailed accounts of specific places given below, especially as shown in the report from New Brunswick, N. J.

As to the farmers, it is not at all an uncommon supposition that they do not use checks to any considerable extent. This, however, can not by any means be taken for granted. It is learned from bankers, in the East and middle West especially, that checks are used by farmers in making payments to a larger extent than cash. In one town of importance in central Illinois it has happened that in a business of fully \$20,000 in one day, carried on with farmers mostly, it was not necessary to open the safe of the bank to take out money at all. In another case

it was found that a business of \$20,000 by a bank is done on the average with not more than \$500 in the till. In running through the balances shown by the books of this particular bank for a considerable period it was shown that the extreme variation of the money in the till was \$2,500 for a total business aggregating several hundred thousands. Information received from other sections of the country point to the existence of a similar state of affairs.

There are still other considerations which render it by no means a foregone conclusion that the trade of farmers is carried on to only a small extent by means of checks. With them also, as with other classes mentioned, if the need for checks is small, so, too, especially in the case of the multitude of "small farmers" is the need for money. "Small farmers" produce largely for their own consumption. The influence of the trade of the farmers in swelling the money side of the account is offset by this fact. Still again, a great deal of the farmers' trade in certain sections is done by direct barter. This of course tends to decrease as the country becomes more thickly settled. In the East it probably has practically died out, but it has not done so in very many places in the West and South. The report from New Brunswick, N. J., states: "Time was, and only recently, when farmers had long-standing accounts with the merchants. Now the merchant makes his purchases and pays for them, in most cases, at once. Farmers were formerly accustomed to trade out their produce. Now they receive payment for it and deal with whom they choose."

Upon this same subject reports from many sources show that the habit of paying with checks on the part of farmers is growing, though in all parts of the country not an inconsiderable part of trading on account is still carried on. Farmers are credited on the books of the dealers with the produce which they bring in, and secure their supplies on the basis of this credit. In a single grocery store in the city of Urbana, Ill., it is developed by the report that there are 73 such running accounts, and there are four or five similar stores in the city. All these would reduce the proportion of cash trade and make the percentage of

payments in cash smaller.

The fair conclusion from a consideration of all these facts is that not the whole of the trade which is not shown in bank returns can be properly credited to the money side of the account in determining the proportion of checks used in trade; in other words, that the percentage of credit instruments used in retail trade, as shown by the accounts of those tradesmen who use banks, is not larger than the actual percentage by the entire proportion of the trade of those who are not bank users.

When the investigation of two years ago was made it was attempted to secure some data on the subject directly from retail traders throughout the country. However, only a few replies were received, and they came too late to be incorporated in the report then made. They are of interest and value still, and as they bear upon this point, some of them

are here given:

NEW BRUNSWICK, N. J.—Returns were received from four grocery stores showing the per cent of their total trade which was paid for in checks during the month of September, 1894. Three of these stores were so situated as to attract patrons of all classes in the community. The fourth was evidently a small suburban grocery, for the whole trade for the month was less than \$1,000. The percentage of checks received in payments by the first three in a total trade of over \$10,000 was 51.6. The small store mentioned received only 1.6 per cent of its payments in checks. The average per cent for the four was 47.5. The percentage

as shown by the bank returns for the city of New Brunswick in the present investigation is 47.2. The grocers' trade is of such a character that doubtless it receives from people of medium incomes a smaller proportion of checks than other branches of trade from people of the same New Brunswick is a manufacturing city of some 20,000 inhab-It contains manufactories of wall paper, rubber and leather goods, three machine and tool factories, sash and blind works, pottery works, cigar and cigarette factories, medicine manufactory, saw mills, carriage manufactories, and numerous other small industries, and its trade transactions are fairly representative of this class of cities. Further information received bears out the belief that the percentage, 47.5, is too low to be representative of all retail trade in the city. In the deposits of one bank of the place for thirteen days in September, 1894, only 3 per cent was in money. The extent to which the wealthier classes use checks is illustrated by the statement to the effect that of \$60,000 received in payment of lodging and board at a certain hotel during the summer of 1894 only \$600 was in money.

LEWISTON, ME.—The data from Lewiston, Me., were from two grocers and two fuel dealers. Checks entered into the receipts of the two grocers for the month of September, 1894, to the extent of 10 per cent, and of the fuel dealers to an extent of 25.4 per cent. The average for the four dealers was 17 per cent. The percentage as shown by the reports of the present investigation is 55.8. Lewiston is a city containing extensive manufactories of cotton and woolen goods, lumber and machinery, and boots and shoes. As the stores from which figures were received in Lewiston are considered "among the best of the grocery stores of the city—that is, they carry the best quality of goods and are patronized by well-to do and wealthy people"—the small percentage of checks is therefore remarkable, and is probably not repre-

sentative.

IOWA CITY, IOWA.—Returns were first received from ten classes of retail dealers, and they show that the percentage of checks received in payment of the day's trade, Saturday, November 24, varied from two in the case of grocers to thirty in the case of furniture dealers, butchers, and dealers in flour and feed. The average percentage for all the dealers was 14. Afterward the report was extended to several other places, and covered the trade of grocers, dry-goods dealers, clothiers, hardware, furniture, and boot and shoe dealers, druggists, and "others." The results were:

	c	ash sale	s.	Rum	ning acco	unts.	Cash and running accounts.			
	Cur- rency.	Checks.	Prod- uce.	Cur- rency.	Checks.	Prod- uce.	Cur- rency.	Checks.	Prod- uce.	
Winterset		7 7 8	3	62 56 65	31 44 33	7	79 85 83	16 15 14	5	
Averages	89	7	4	65	33	2	83	14	3	

The average per cent in the present returns for Iowa City, three banks reporting, is 74; for Davenport, from six banks, 64; for both, 67; for all Iowa, 60.7.

LAWRENCE, KANS.—Replies received showed per cent of checks in receipts of one furniture dealer to be 10; in those of two butchers, 21. The bank average in the returns of last July is 57, three banks reporting.

ANN ARBOR, MICH.—One grocer, 44 per cent.

REDWOOD, CAL.—One general store, 34 per cent.

SAN JOSE, CAL.—One dry-goods dealer, 20 per cent; one butcher, 55 The present bank average is 45.

PALO ALTO, CAL.—One grocer, 24 per cent.

MAYFIELD, CAL.—Mayfield is a farming town a short distance from Palo Alto. One grocer, 63 per cent. This grocer's trade was of nearly the same volume as that of the Palo Alto tradesman.

Another source of error, which it was thought would tend to make the per cent of credit instruments too large, was due to the supposed fact that the deposits made in the bank by traders on a settling day would represent sales made throughout the period of credit common to their community, while the money deposits would not include all the cash sales made during that period. The figures of two years ago from Iowa seemed to show that this supposition was well founded. If this were true, it is obvious that the percentage of checks would be too high, although the excess would be offset to the extent that immediate

payments were made by check throughout the credit period.

From investigations made in 1894 it was concluded "that the error due to this source can not be great. If it were, the returns from places which have long periods of credit should show a larger proportion of checks than the returns from other places; but the figures do not show this to be uniformly so. Moreover, if the people of a community were in the habit of using checks they would be more likely to make even immediate payments with them than with money." In order to test the point several banks in Chicago and in Champaign and Urbana, Ill., were requested to give the per cent of checks in total deposits of representative retail traders for the month of October of the present Eight replies were received representing the accounts of some forty retail traders. In some cases only percentages were given, so that it is impossible to figure out a general average that we can regard as The individual replies made the following showing: exactly correct.

Case 1.—Returns from a bank in the business portion of Chicago. One grocer, 40 per cent; one butcher, 22 per cent; one clothier, 40.5 per cent; one dry-goods dealer, 78.5 per cent; one coal dealer, 33 per cent;

one furniture and house furnishing dealer, 57.4 per cent.

Case 2.—A similar Chicago bank. One grocer, 95 per cent; one shoe dealer, 22 per cent; one dry-goods dealer, 36 per cent; one butcher, 3 per cent; one coal dealer, 58 per cent.

Case 3.—A third Chicago bank similarly situated. This bank did not return the per cent for individual dealers, but gives the percentage of checks in total receipts for the month of October in "seven strictly retail accounts, representing totally different lines of business," as 683 per cent.

Case 4.—This is the case of a bank in Chicago situated in a retail district of the city. The population is dense and composed mainly of foreigners. The returns are again for the month of October, and are as follows: One retail grocer, 15.5 per cent; one butcher, 21 per cent; one coal dealer, 12 per cent; one clothier, 9 per cent; one dry goods dealer, 19 per cent; one furniture dealer, 18 per cent. As already pointed out, the percentage of checks in a population unacquainted with deposit banking, as expected, would be found to be below the average. These figures bear out the truth of the remark.

Case 5.—This gives a statement of the accounts of retail dealers in Champaign, Ill., for the month of October. Two dry-goods dealers, 11 per cent; two grocers, 44 per cent; two butchers, 54 per cent; two hardware dealers, 76 per cent; two clothiers, 40 per cent; one furniture dealer, 49 per cent; one lumber dealer, 91 per cent. The total receipts and the total checks are given, so that the average per cent is found to be 33\frac{1}{3} if the lumber dealer is left out, and 40.7 per cent if he is included.

Case 6.—This also is an account of Champaign tradesmen. The returns were not made in detail, but they represent the trade for the month of October of one grocer, one butcher, one coal dealer, one clothier, one dry-goods dealer, and one furniture dealer. The percentage of checks in the aggregate receipts was 55.2.

Case 7.—This case represents the trade of similar dealers in the city of Urbana, Ill., for the same time. One grocer, 18.6 per cent; one butcher, 21.8 per cent; one dry goods dealer, 47 per cent; one boot and shoe dealer, 39 per cent; one furniture dealer, 43.7 per cent, and one

coal dealer, 53 per cent.

A general average for all these cases can be ascertained by proceeding as follows: Several banks gave the actual deposits for the month for each class of dealers. From these is to be gotten the relative weight of each class in the total. Calling groceries 1, the weights are 1.25, 1.133, .04, .51, .73, .36, .72, for the business of the butcher, hardware dealer, dry-goods dealer, clothier, furniture seller, coal dealer, and shoe dealer, respectively. Assume that these relative weights hold in the cases where only per cents were returned; assume, further, that in these cases the deposits of the dealers reported in these banks were to the deposits in the banks reporting actual figures in the same ratio as the relative total deposits of the banks concerned; then the average per cent of credit instruments for all dealers reported in all these cases, except No. 4, was 58 per cent, and including No. 4, was 54.

If it should be assumed that the per cent shown by the Chicago bank in case No. 4 is fairly representative of the use of checks in payments among the foreign population; if, also, is assigned the low average of 5 per cent to the negro population; if, further, is assigned 60 as the fair average for native whites, and if, finally, is assumed the amount of the payments made by each class to be in proportion to their numbers, 20,000,000, 10,000,000, and 40,000,000, respectively, 40 is found as the general average per cent of checks used in retail payments for the whole country. This is the lowest that can reasonably be assigned in view

of all the facts.

The average per cent of checks used in retail trade may be estimated in still another way. From the report of the Commissioner of Labor for the year 1890 the average expenditure per day per individual in this country may be estimated as about 50 cents. This is certainly true for the vast majority of the population. Indeed, it is perhaps somewhat too high. Assuming, however, that it is correct, and taking the population at present as 70,000,000, \$35,000,000 is had as the total average daily expenditure for "daily living" in this country. This is only \$8,500,000 more than the total retail deposits, according to the returns of the banks in the present investigation. It is here estimated that 16 is the proper per cent of checks used in retail payments by the foreign population, and that 5 is not too high a per cent for the negro population. The average of these two, weighted in the proportion of the respective numbers of the two classes of people, is 7 per cent. If, now, it is assumed that 7 per cent of the above \$8,500,000 was paid by checks, there is \$595,000 to be added to the check returns in the banks. This gives a total of \$18,600,000 of checks, and \$35,000,000 for a grand total expenditure. The percentage of checks is 53.

In view of all the facts, the true average per cent of checks used in

making payments in retail trade can be fixed at about 55.

THE SECOND CLASS OF DEPOSITORS.

A consideration of the facts brought out by the second class of depositors is not less interesting. Already there has been pointed out the difficulty of exactly classifying wholesale as distinct from retail traders, and the difficulty, less here than in the case of retailers, of including in the list of wholesale merchants all who may properly be said to belong there. There is no reason to think, however, that errors due to these two circumstances are either more numerous or more important than in the case of retail dealers. Indeed, it is hardly to be supposed that the percentage of checks used by wholesale merchants, as shown by the bank returns, will vary so much from the actual conditions as would be the case with retail dealers. The percentage for

the whole country, as shown by the returns, is 95.3.

The wide difference between the per cents for wholesale and that shown for retail traders establishes at once the fact, insisted on by economic critics, that it is untrue to say that 90 per cent or more of the whole business of the country is done by means of credit instruments. The statement obviously holds true, as has been claimed, for wholesale It has not been found possible, however, to secure direct evidence of the habits of retail dealers and jobbers in the matter of their payments to wholesale merchants. In a few cases only, six in all, has any information been obtained relative thereto. In each one of these the percentage of checks in the payments made to jobbers and wholesale merchants by the retail dealers was over 96. These cases, however, were so purely local that no dependence can be placed upon them as representative. The percentage shown by the national banks for wholesale trade is 95.6; that of the other banks is 92.8. Several States have no returns in the figures of the State and private banks. The figures in both classes of banks are virtually the same in the States of Connecticut, Illinois, Indiana, Kentucky, Louisiana, Maryland, Missouri, Nebraska, Ohio, Pennsylvania, and Tennessee.

It is interesting to observe the difference in the extent of the use of checks by this class of dealers in the various States. The percentages vary from 69.2 in Arizona to 97.9 in Minnesota. Twenty-nine States show averages of 90 per cent or over, 10 of them being over 95. Fifteen of the others have each an average greater than 85. The returns for this class of trade are so meager for Arizona, Indian Territory, Oklahoma, and Wyoming that the per cents are probably not normal. The total deposits shown are \$63,088,438, as against \$26,536,930 for retail trade. There is no reason to think that the general average of

95 for this class of trade is too high.

THE THIRD CLASS OF DEPOSITORS.

The third class of depositors concerning whom the bankers returned information must be very miscellaneous in its make-up. Here undoubtedly are found the corporations, individuals not in business, and all other individuals and bodies not of a mercantile character. Here, too, are those accounts which represent the great mass of speculative transactions in the country, as distinguished from legitimate business. Of course there is no way of distinguishing the deposits of these various classes. The average percentage for the country is virtually the same for this class of deposits as for the second class. It is higher, of course, in New York than in any other State, for the figures for Nevada are again not to be relied on because of the paucity of returns. The States with 90 per cent or over range as follows, after New York: Maryland and Massachusetts; Pennsylvania; Illinois and Delaware; Minnesota,

Colorado, Florida, and New Mexico; Virginia, Utah, New Jersey, New Hampshire, Mississippi, Kansas, Rhode Island, Connecticut, and Arkansas; Missouri, Nebraska, Tennessee, and Louisiana. Arizona

is lowest, with 74 per cent.

It has been asserted that certain branches of business represented in this third class of deposits are of such a character that their receipts preclude the use of checks almost entirely, and that the kinds of business are so important that they must lower the averages very materially. Railroads, street railways, and newspapers have been instanced. But the freight business of railroads is larger than the passenger traffic, and is paid for largely by checks. So are newspaper advertisements to a considerable extent. The receipts of street railways are only a fraction in the great total of the business of a city like New York or Chicago. The special consideration of these lines of business does not modify the conclusions arrived at. Moreover, their receipts are doubtless very

largely in the returns.

Table No. XV shows the grand total results. According to this the per cent of business done by checks, all classes being included, is 92.5. New York State leads the list, with 96.4 per cent. Closely following come Massachusetts and Maryland, with 93.2 and 93.3, respectively, and Nevada and Minnesota, with 92.3 and 92.5. Missouri has 90.7; New Mexico, 90.8. The lowest percentage shown is that of California, 69.4. If the present percentages are compared with those gotten from the total receipts accounted for in the investigation of 1892, we find that, leaving out the reserve cities, they are nearly the same at both times for New Hampshire, Delaware, New York, New Jersey, Pennsylvania, Florida, Indiana, Iowa, Kansas, Michigan, Minnesota, Wisconsin, North Carolina, and Virginia. They are higher for the District of Columbia, Maryland, Louisiana, Mississippi, Missouri, Illinois, Nebraska, Utah, and Idaho.

ULTIMATE CONCLUSION.

What conclusion is finally to be reached as to the true proportion of the demand for an exchange medium which is met by the use of credit instruments? First, the returns for mercantile business must be considered. The average per cent of retail trade transacted by means of credit instruments, it is seen, is 67, according to the face of the returns; that 40 per cent is as low as could in reason be claimed to be correct, and that 55 per cent is, all things considered, probably about accurate.

There seems no reason to think that the per cent of checks shown by the returns for wholesale payments needs to be diminished by any allowances. That per cent is 95. If the returns for retail and wholesale business are combined, 87 is had as the average per cent of the deposits of the merchants of both classes in the form of credit instruments. If the retail business is taken at 40, and weights the per cents of the two classes of trade according to their total returns, we get 79 as the average per cent. If the retail average is taken at 55, the similarly weighted average for both kinds of business is 83. If each kind of business is regarded as of equal importance, the averages are: With retail trade at 40 per cent, 68; with retail trade at 55 per cent, 75.

It is therefore not unreasonable to assume that 75 is a net figure at which to rest as the per cent of both retail and wholesale business

which is done by credit-paper exchange.

What influence should the third class of check users have in determining the final proportion of credit instruments in the exchange medium? Some writers argue that the checks due to speculative transactions should be ruled out of the count. "If all these receipts represented

legitimate business," wrote the Comptroller in 1881, "the means for merchandising and manufacturing would be most abundant." Speculative transactions occur in the business of wholesale dealers; but the speculation which it is claimed should be thrown out of the calculation is, perhaps, transactions in stocks. The payments, however, for stock transactions can not be regarded otherwise than as constituting a real part of the demand for an exchange medium, and so influence the amount needed; speculative transactions of other kinds exert an influence on prices, and also influence that demand.

The real question of importance is as to the per cent of the total currency demand which is satisfied by means of credit instruments. It would seem, therefore, that in seeking to determine what amount or per cent of money of account is dispensed with because of the use of credit instruments, the means of payment in speculative transactions may not be ignored, even when they are purely stock speculations. If, however, they are thrown out, what is left? The Comptroller, in 1881, estimated that of the \$165,000,000 checks and drafts received by the banks of New York City on September 17 of that year, three sevenths represented stock transactions. If even one half of the total transactions of "all other" depositors, as representing speculations in stocks, is deducted and assume that they are all paid for by checks, \$200,000,000 is left for the total business deposits, of which \$180,000,000 was in checks. This is 90 per cent.

Heretofore in this report it has been assumed that the figures obtained from retail trade are within \$9,000,000 of the total retail business for the day, and that the checks used in performing this business formed about 53 per cent of the whole medium of payment. It has been estimated that the total amount of checks passing through the New York clearing house is about 70 per cent of the whole number drawn. Of course, the percentage will be much lower for the country as a whole. If it is assumed that it is 30 per cent for the country as a whole, and there are added to the figures returned by the banks for the various kinds of deposits amounts representing 30 per cent of the returns in checks, after rejecting \$100,000,000 for stock transactions, 85 per cent is left as a result. This is probably not far out of the way as representing the per cent of the business of the country which is paid for by means of checks, drafts, and other credit instruments. This method, of course, is arbitrary, but is probably as reliable as any other that could be assumed.

It may safely be concluded, therefore, that at least 80 per cent is a

reasonable estimate from all the data presented.

The subject may be looked at in still another way. If it is assumed that the volume of business is constant for a brief period, and if it is supposed that this volume may be taken to represent the total money demand, then the amount of the medium of exchange necessary for the country would be approximately the sum of these quantities: The amount of money actually used to make exchanges in a given period, as a week, divided by the velocity of circulation; the amount of credit instruments used in payments in the same period, divided by their velocity of circulation; the amount of money needed as a reserve for the credit operations. Each one of these is very difficult to determine. The question of the velocity of circulation, especially, is a problem on which there is very little definite information. If, however, satisfactory information were available, it would now be less difficult to deal with the "quantity of money" question than ever before.

The general result of this discussion is very strongly to emphasize

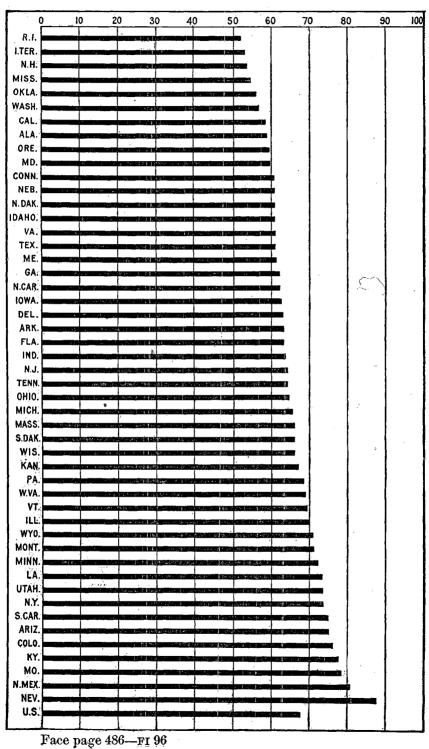

the importance of the part played by credit instruments of exchange in the economy of the country. It bears out the statement made as a result of the investigation of 1894, as follows:

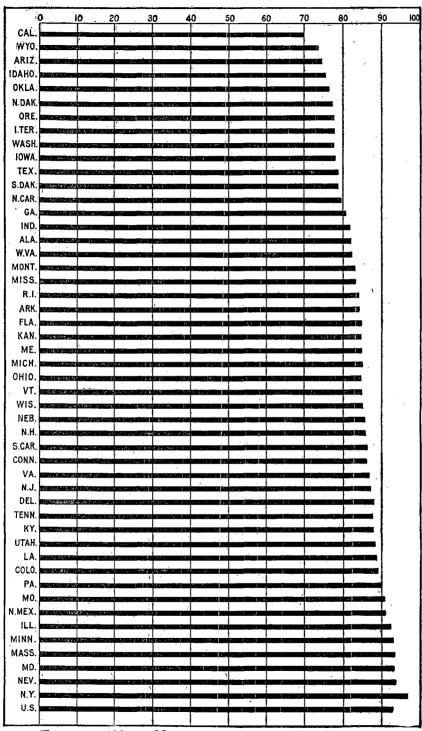

The advocates of a large volume of money, not inherently sound money, have used their belief to offset the statement that credit is a more determining cause of prices in modern business than money. The results of the present inquiry, however, are on the whole in the line of the former conclusions as to the importance of credit instruments in payments and exchanges generally, and against the necessity of any additional provisions for simply an increase in the volume of money without taking into consideration the other and more important elements which should characterize our monetary circulation.

The two diagrams which follow present readily to the eye the relative standing of the States in the use of checks in retail and in all business

transactions as shown by the bank deposits.

There is also appended a comparative table (XVI) of the results of all the investigations made in this country in which the data are full enough for comparison. It must be remembered that the figures for 1894 are for part of retail trade only, and show deposits. A similar caution is necessary with regard to the first column for 1896. The last column, again, contains only deposits.

INCREASE IN THE USE OF CREDIT INSTRUMENTS.

Is the percentage of payments made by means of checks, drafts, and other credit instruments increasing? This has been both affirmed and denied. It has too often been tacitly assumed that the amount of checks drawn increases with the population. This, however, is not quite accurate. The returns show that places of comparative sparseness of population use a higher percentage of checks than do more thickly settled portions of the country. The percentage of checks used depends on a variety of circumstances. Besides those given heretofore there may be mentioned as among these causes the proximity to a large commercial center; the industrial character, whether manufacturing or agricultural; the length of the wage period; the habit of paying wages by checks; the rate of wages, or rather the range of incomes, and the scale of prices itself. If prices are very low and purchases small, a larger number of small pieces of money are likely to be used in retail trade.

The percentage of checks returned depends partly on the state of trade. In a period of business depression the demand for a medium of exchange is lessened, and the proportion of this diminution of demand which falls on the credit part is proportionately larger than

that which falls on the money part.

Still again, allowance must be made for any increase in the quantity of Government or bank notes. In so far as these are not certificates of deposit, they are virtually credit instruments, and should be counted on the credit side of the account.

The extent of the use of credit instruments is affected also by certain minor causes, such as the season. Several banks, in returning the blanks sent to them, remarked that the percentage of credit instruments was an "average for this season of the year," or below or above the

average for this season of the year, as the case might be.

Finally, the use of checks varies like the use of any other highly developed tool of industry. If trade is on a large scale, the check has a more important function. If trade is active, business confidence great, men hopeful, there will be in business transactions a larger pro-

portion of credit paper.

It will be observed, however, that beginning with places of the smallest population the percentage rises to a certain point, then falls, then rises again. To make more clear this subject a table (XVII) by States in the order of their population, showing the percentage of checks for each State according to the present investigation, and another (XVIII) showing the percentages for the usual geographical groups of States are herewith given, as is also a table (XIX) showing the percentages obtained from all the investigations on this subject for sixteen of the largest cities of the country. It will be observed that the average varies from 92.27 in September, 1890, to 93.68 in June of the same year. It is 92.3 for 1896.

TABLE XVII.—PERCENTAGES BY STATES IN ORDER OF POPULATION.

OTHER POINTS OF INTEREST SHOWN BY THE RETURNS.

There are certain incidental points of considerable interest, concerning which information was secured from the banks in the present investigation. Perhaps the most interesting is the showing of the bank deposits for the different classes of depositors, with reference to the amount of various kinds of money actually in use in the hands of the people, as shown in Tables XII–XV, inclusive. The percentage of gold coin shown for all retail trade was 2.4; of silver coin, 3.2; of paper money, 26.7. The percentage of gold coin was highest in California where it was 36.4. Oregon had 30 per cent; Washington State, 22.6; Idaho, 18.2; Utah, 15; Wyoming, 10.9; Arizona, 10.3. A study of the tables shows, as did the returns in 1894, that gold coin has a more extensive circulation in the extreme Western States than in any other part of the country.

Silver coin predominated in Georgia, Alabama, Mississippi, North Carolina, Florida, Louisiana, Tennessee; in other words, silver is more largely in the hands of the people in the Southern States than elsewhere. Paper currency shows the largest percentages in the Eastern States. New Hampshire leads, with 44.2; the District of Columbia has 38.8; Connecticut has 37.4; Maryland has 37.6; Maine, 36.6; Michigan

shows 30 per cent; Massachusetts, 32; Mississippi, 35.

In wholesale trade the average per cent of gold used was for the whole country 0.3 per cent; of silver, 0.4 per cent; of paper, 4 per cent. Nevada, Utah, Washington, California, and Arizona show the largest percentage of gold. The percentage of silver used is in no case remarkable. Such as it is, however, it is largest in the Southern States. In wholesale trade, as in retail, the largest percentage of paper money used is in the Eastern and Northern States. New Jersey has 12 per cent, North Dakota 8½, South Dakota 10.

A study of the table showing the grand total returns reveals similar

variations.

PAYMENT OF WAGES.

Table XX shows the ratio of replies obtained affirmatively and negatively to the second question on the blank sent out, viz: "Is it customary in your community to pay wages by check?" It shows also the ratio of the number of replies giving the wage period as monthly, semimonthly, and weekly. The information obtained, of course, is only of a very general character, yet it serves to prove something of the influence which both have on the use of checks by the people at large.

It is likely that in many cases an answer "yes" was given to the question concerning the payment of wages by check when the writer meant salaries rather than wages. It is likely, too, that a similar mistake was made by some in giving the wage period. From notes appended to many of the blanks it would seem that where wages are paid monthly or semimonthly they are more largely paid with checks.

ANALYSIS OF RETURNS FROM CLEARING HOUSES FOR JULY 1, 1896.

In order to make as complete as possible the statistics relative to the monetary transactions of July 1, a circular was also addressed to the clearing-house associations of the country requesting information of the business of that day. The replies received were from 66 of the 78 of such associations then in active operation in the United States. Their total clearings upon the day stated amounted to \$227,935,464. The balances of these total clearings settled in cash or cash exchanges were but \$19,152,834. The items making up such balances were as follows:

Gold	\$1, 325, 015
Gold clearing-house certificates	265,000
Silver and silver certificates	175, 950
United States notes	3, 451, 761
Currency	1, 017, 101
Currency certificates	
National-bank notes	
Exchanges	3, 088, 299
Managers' certificates	3,904,904
Collections by creditor from debtor bank	85, 930
Not stated	
and the control of th	

On examination of the individual items of settlement, it is found that but \$1,350,000 of the aggregate balances consisted of coin, the various forms of paper currency being, as a matter of fact, "substitutes for money." Upon this basis the proportion of actual money used in settlement is extremely small.

An analysis of the accompanying table setting forth in detail the transactions of these clearings by States, together with the information sent with the returns, shows the methods for settling balances to vary in different States, and also to differ between clearing houses located in the same State. In some cases balances due by debtor banks are paid in gold coin, silver coin, or paper currency to the manager of the

clearing house, who disburses this money to the creditor bank. The extent to which this practice prevails is shown in columns headed "Gold," "Silver," and "Paper currency," respectively. Again, the debtor banks settle their balances by paying part in money and part in drafts on their correspondent banks to the clearing house manager, who remits the currency and drafts to a correspondent bank and gives his drafts on such bank to the creditor banks for amounts due to them.

In other cases, no money or drafts are handled by the clearing houses, but it is the custom for the clearing house manager to certify the amount due to or due from each bank and the manner in which this certificate or order of the manager is settled by the debtor bank is not uniform. In a few instances the manager's certificate or order is not presented to the debtor bank for payment, but is held by the creditor bank until needed to settle an adverse balance. As a general thing, however, the order is presented to the debtor bank for payment either in currency or by drafts drawn by the debtor bank upon a correspondent bank in New York, Chicago, St. Louis, or some other city, as may be agreed between the creditor and debtor banks. The extent to which settlements are made by manager's certificates or orders is shown in columns headed "Collections from debtor banks," "Exchanges," "Manager's checks or orders." To a large extent and in some of the largest cities balances are habitually settled by exchange on correspondent banks in neighboring or distant cities, and no money passes between the debtor and creditor banks in such cases.

SUGGESTED AMENDMENTS TO THE BANK ACT.

It is one of the duties imposed by law upon the Comptroller of the Currency that he shall in his annual report to Congress indicate such amendments to the bank act as would in his judgment improve the national banking system. In discharge of that duty, I submit for consideration the following suggestions which it is believed, if embodied into law, would be of material public benefit:

First. That the loans and discounts of any bank to its executive officers and employees be restricted in amount, secured by proper collateral or by additional signature or signatures of financially responsible persons to the notes taken, and made only upon the approval of

the board of directors, a written record thereof being kept.

Second. That no loan shall be made to a director who is not an executive officer of the bank except either upon a deposit of collateral security or upon a note given therefor bearing in addition to such director's own signature the signature or signatures of one or more financially responsible person or persons.

Third. That upon a day in each year, to be designated by the Comptroller, the directors of national banks shall be required to make an examination of the affairs of the bank with which connected and submit to the Comptroller of the Currency a report thereon upon blanks to be

furnished for such purpose.

Fourth. That the assistant cashier, in the absence or because of the disability of the cashier, be authorized to sign the circulating notes and to sign and make oath or affirmation to reports of condition of a national bank.

Fifth. That some class of public officers be empowered to administer the general oaths required to be taken by the National Bank Act.

Sixth. That in places having a population of less than 2,000 inhabitants national banks shall be permitted, under regulations to be made by the Comptroller of the Currency and approved by the Secretary of the Treasury, to be organized with a capital stock of not less than \$25,000, and with a corresponding reduction in the amount of bonds required to be deposited with the Treasurer of the United States.

Seventh. That national banks be permitted under such regulations and restrictions as shall be made by the Comptroller of the Currency and approved by the Secretary of the Treasury to establish branch banks in towns and villages where no national bank is established and where the population does not exceed 1,000 inhabitants; such branch banks to have the right to receive deposits, make loans and discounts, and buy and sell exchange, but in no case to be permitted to issue circulating notes other than of the parent bank. It shall in all respects be considered as a part of the parent bank, and in each case where such branches are maintained the Comptroller shall receive in the reports of the central bank a statement properly sworn to and attested of the condition of its branches. He shall also have the right of separate and independent examinations, and he may, whenever he deems it necessary, require, before granting the right to any bank to maintain branches, that the paid-up capital stock of such bank be increased to an amount to be fixed by him with the approval of the Secretary of the Treasury.

Eighth. That the semiannual tax levied on account of the circulating notes of national banks be reduced so as to equal but one-fourth of 1

per cent per annum.

Ninth. That the Comptroller of the Currency be authorized to issue to national banking associations circulating notes to the par value of

the bonds, when the market value thereof is equal to the par value, deposited by them with the Treasurer of the United States to secure such notes.

ARGUMENTS IN SUPPORT OF SUGGESTIONS.

The amendments denominated, respectively, first, third, fourth, and fifth, and those denominated eighth and ninth, have been repeatedly urged upon the law-making branch of the Government and as repeatedly failed of definite and decisive consideration. The second, sixth,

and seventh are now for the first time presented.

The first proposed are designed wholly to reach the necessary and safe administration of the affairs of national banks, and are essential thereto. No possible objection can be raised to either one or all of them, and if the time could be had for their consideration, it is not unlikely they would find a place upon the statute book. It is respectfully urged that as they in no wise bear upon the subject of giving an enlarged power to the national banks no objection against their enactment could be raised by even those who see fit to oppose the system.

AMENDMENTS TO RESTRICT BORROWING BY OFFICERS AND DIRECTORS AND TO ENFORCE KNOWLEDGE OF BANK'S CONDITION.

It is known by those familiar with the conduct of banks that danger, loss, and at times scandal and dishonesty arise in the conduct of a bank from the too large use of its funds by its executive officers, employees, and directors. And not less often does it occur that directors, charged with the duty under the law of administering its affairs, at such times plead ignorance of the condition developed by its failure or the serious impairment of its capital. The first and second amendments recommended design to remedy the one and take away all excuse for the other of these sources of weakness to banks and of delinquencies of those who are concerned in the management. Their enactment would tend, at the close of a period of many bank failures and defalcations, characterized in the majority of instances by overloans to executive officers and directors and gross negligence of duty, to reintrench in the confidence of the public the banking system.

The deposit feature of banking in this country has been developed to its present great proportions by the national bank, the source of whose strength has arisen from its national character. If there is no legal responsibility because of its national origin and supervision resting upon the general government to protect depositors and shareholders against needless loss, there is a moral one, which can only be discharged by the enactment and enforcement of the best protective measures. The powers now vested in the Comptroller of the Currency, despite the exercise of them to the utmost, are but limited. He can suggest, but not enforce—as he might in the light of the amendments asked for—rules and regulations which would guarantee a better condition of affairs in the banking world and relieve the public of anxiety in times

of financial uncertainty.

AMENDMENT RELATING TO CASHIER.

The giving of authority to the assistant cashier in the absence or because of the disability of the cashier to sign the circulating notes of a bank and its reports of condition under calls from the Comptroller is asked in order to relieve the banks of an embarrassment so frequently met. The bank act restricts the power in these respects entirely to the

cashier, and in his absence or disability loss and embarrassment are entailed by the want of someone to sign such notes, and this delay is occasioned through want of the proper person to sign and make oath or affirmation to reports of condition.

AMENDMENT RELATING TO THE ADMINISTRATION OF OATHS.

In 1882 the Supreme Court of the United States delivered an opinion through Mr. Justice Harlan, in the case of the United States v. Curtis, to the effect that there was no act of Congress which gave notaries public in the different States the authority to administer the eaths verifying reports of condition of national banks prior to the passage of the act of February 26, 1881, chapter 82.

The reasoning in that opinion appears to apply equally well to the oaths required of directors of national banks under section 5147 of the Revised Statutes. Inasmuch as the act of February 26, 1881, simply provides for the verification of bank reports, it would seem proper that an amendment should be made to the section referred to authorizing some class of officers to administer the oaths therein provided for.

ORGANIZATION OF NATIONAL BANKS WITH A LESS CAPITAL STOCK THAN FIFTY THOUSAND DOLLARS.

The national banking system was for many years protested against, by those who looked upon its creation by national statute, as an innovation of the rights reserved to the States under the provision of the Federal Constitution. Whether or not the prejudice against the system upon that ground has yielded through the decision of the Supreme Court upholding the constitutionality of the law, or for other reasons, the fact is that throughout the whole country whatever complaint is now urged against it is placed upon a different basis. It has drawn to itself support and inspired general confidence because of its central and uniform governmental supervision and examination, the frequent publication of sworn reports of condition, the double liability of shareholders, the percentage of reserve to be held against deposits required, and the necessity of having the bank's funds invested in quick assets rather than tied up in real-estate investments. These features have been the means of giving it a strength beyond any State system, and guarantee its future continuance. Its usefulness, however, can still be enlarged and its benefits to the people made more widespread.

The complaint to day is mainly directed against it because the minimum capital stock required is so large that small towns and villages can not have the banking advantages which they might if less capital were required. The allegation is not without force, argument, and reason. In many sections of the country under existing requirements national banks, though needed, can not be supported from a want of surplus investable capital necessary to establish them. These places suffer more for want of banks of deposit and discount than from any need of banks of issue, but under amendments six and seven, to which attention is called, either banks of issue, deposit, and discount or banks of deposit and discount alone could be had.

The minimum capital stock required at present for the organization of a national bank is \$50,000, with a deposit with the Treasurer of the United States of United States bonds of \$12,500. The proposed reduction of capital stock to \$25,000, with a proportionate reduction in the amount of bonds to be deposited with the Treasurer, in places of less

than 2,000 inhabitants would give independent banks of issue to communities in the South and West which, owing to the conditions surrounding them, can not take from their daily business needs a greater sum and invest in banking. The result is that they are deprived both of the use of foreign and local capital and the utilization of their own credits. The safety of banking upon a reduced capital stock in such localities would be not less than that which attaches at present in larger cities and towns upon a greater capital stock. State banks are, under proper regulations and safeguards, conducted upon the basis of a small capital and, with the methods of examinations employed and the requirements exacted, there is no reason to believe that banks in the national system would be less safe. It would be far better for depositors in all towns and villages of limited population if officers and directors of national banks had dividends to pay upon but half of fifty thousand of capital instead of upon the whole amount. It would lessen the hazarding of loans upon uncertainties in order to make a profit which can not be legitimately earned and therefore diminish the number of resultant failures.

The enabling of these communities to have national banks would bring them in touch with those portions of the country where there is a surplus of investable capital. For many years this capital has been invested in other States largely in national bank stocks and it has thus come about that facilities for commercial exchange have been afforded many places where local capital could not be furnished for the purpose, and the loanable capital needed increased, with the effect of lowering rates of interest beyond those previously prevailing. In evidence of the extent of this investment it was shown by an investigation made in 1889 that nearly one third of the capital stock of 520 national banks in Iowa, Minnesota, Missouri, Kansas, and Nebraska had been contributed by Northern and Eastern shareholders, while in Dakota, Idaho, Montana, New Mexico, Utah, Washington, Wyoming, and Arizona more than one half of that of 144 national banks was held by nonresident shareholders. In the States of Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, Arkansas, Kentucky, and Tennessee, of the shares of 410 national banks a little more than one-sixth of the total was held by nonresidents. The investments of this character made by nonresidents since the date given, and especially so during the years from 1890 to 1892, have been at least as large, if not larger, than in the years prior, but the figures are not at hand to state with accuracy the proportion. The facts alluded to, however, form of themselves such data upon the point made as to make them worthy of consideration.

THE ESTABLISHING OF BRANCH BANKS.

The construction placed upon the National Bank Act, as now in force, by the Supreme Court precludes the establishment of branch banks. In the agitation for the increased volume of circulating medium, either in the form of silver or irredeemable greenbacks, it has been many times suggested by those who have argued against both, that with the majority of the communities where the honest demand for more money was made it was a lack with them of credit and not a lack of volume in the country's circulating medium from which they suffered. The statement is undoubtedly true; but it arises in the largest measure only because they have not the means of availing themselves of that which elsewhere entitles and obtains credits which is

equivalent to and does answer the purposes of money. This state of affairs is due in the most appreciable degree from not having at hand such facilities for banking as will enable them to show to those in control of loanable capital why credit should be extended and to whom.

The very smallest of agricultural communities, even though deprived of transportation facilities, under a branch-bank system could still be given the advantages of available capital, lower interest, and lessened cost of exchange, privileges they can not enjoy when dependent upon the banking methods employed by the village or entirely isolated store-The branches grafted upon a parent institution of strength would introduce a capital into places unable to support independent banks, which could successfully compete with that of the local loaner of money at exorbitant rates of interest, and make it possible to obtain credit without endangering all property interests in so doing. would as well afford a place of local deposit, and within a very brief period the local capital, theretofore idle and useless, would become available loanable capital. The use of a bank as a place of deposit of funds means the use of the check, the draft, the bill of exchange, and other credit devices which reduce to a minimum the passing from hand to hand of actual money or the currency representatives of money in the payment of obligations. Under such an order of things every dollar would become an efficient dollar, and instead of supporting but a single transaction it would support many.

It is not an extravagant assertion to state that with these enlarged opportunities of gaining credit at hand, all entitled thereto could readily obtain it. It would soon follow that all of such would come to appreciate the fact that money is always to be had by those seeking it if they can offer sufficient inducements in the way of current profit and hope of return to its owner to cause him to part with it. which is termed "the money question" is, in its proper analysis, more one of facilities of exchange, methods of transportation, and means of obtaining credit than of the volume thereof in existence in a particular country or locality. The whole surplus loanable capital of the world is always available to the people of every country where credit is maintained and who offer investments which promise a margin of Modern methods of banking and modern methods of transportation make it immaterial whether the volume of money in the world is greater in London or New York, in Chicago or New Orleans, in Boston or San Francisco. It is as equally available for one place as the other if proper knowledge is had by the owner of it of the financial

character and ability of those desiring its use. Upon the same lines it is available between these centers of commerce and smaller and more remote places. The important thing is the possession of this knowledge, by those who control the money or credit to be loaned. It is knowledge of a character only to be obtained through the corporations and men whose business is dealing in debts and credits, viz, banks and bankers. If a community is deprived of banks and bankers, it is deprived of the channel through which it can make known that it has to offer to investable capital that which entitles to credit. It is false reasoning which overlooks this, the true source of the difficulty, and alleges that there is a scarcity of money and that the volume should be increased. The scarcity of money argument, however, always stops short of an explanation of how it is to be obtained after the increase is had, unless the defects in distribution existing

before the increase was made are remedied.

The permitting of branch banks would be the forming of agencies through which a better trade distribution of currency could and would be made. The money of a country congests at the great financial centers, to remain idle and profitless or to be used at a very small profit, only because there seem to be no new arteries through which it can flow. It is not a matter controlled by any feeling of sentimentalism or wish to create a scarcity in one section of the country and a plethora in another, for such rule of conduct could have but one result, loss to all concerned.

It may be objected to the establishing of branch banks that they would tend to create a monopoly. The objection is hardly tenable; for there could not, under the proposed amendment, be established a branch in any city, town, or village where a national bank was in existence, and moreover the privilege of establishing a branch at a designated place would be open to the competition of all banks already established outside of such place. Upon the other hand, they would stand as an aid introduced from the outside, which, while of profit to the nonresident shareholder, would in the end be of equal if not of greater benefit to resident citizens. They could not weaken the parent bank; for with the taking on of new responsibilities additional capital could be required. They would place the national banking system in this respect in lien with the systems maintained in other great commercial nations and in accord with the provisions of some of the banking systems of the Under the restrictions adverted to, it is immaterial that the number of central banks in the United States would be so largely in excess of those in England, Scotland, Ireland, Germany, France, and If the principle is a correct one, the administrative detail involved will not be difficult of solution.

The monetary problems which confront Congress, embarrass the administrative officers of the Government, harass the business world, and bring a plague upon American politics must ultimately find solution in required banking improvements. The time must come when the banks shall be such agencies of distribution of loanable capital as will make credit everywhere equally available to the extent to which those seeking it are justly entitled. So, too, must a point be finally reached when banks shall issue all of the credit currency of the country and stand wholly responsible, instead of the Government, for its redemption in gold coin whenever and in whatever quantities presented.

THE ISSUING OF NOTE'S BY THE GOVERNMENT AND BY THE BANKS.

Upon the specific subject of granting an increase issuance of circulating notes upon bonds deposited, and a reduction in the rate of tax now collected beyond any possible need of the Government, discussion has not been wanting in recent years in any reports made to Congress by Comptrollers of the Currency. It has been given a place in messages of the President and the reports of the Secretary of the Treasury. The urgency evidenced by these repeated efforts has arisen from a belief that no valid reason can be urged against the propriety of such amendments, nor can any be assigned for further continuing the present provisions of the bank act in this regard.

No one can urge that the payment of notes issued to the amount of 100 cents on the dollar of each bond deposited to secure the notes is not completely assured, nor can it be gainsaid that the rate of tax upon circulation of one-fourth of 1 per cent per annum is not amply sufficient

to reimburse the Government for all expenditures made by it on behalf of the banks. Thereasons for the provisions of the law when first enacted do not now, nor is it at all probable that they will ever again, exist. It is a frequent complaint that though the national banks alone are enabled to issue bank notes without incurring heavy penalties, they fail to use the privilege to the extent that the public has a night to expect and demand. This complaint fails to take account of the fact that banks, whether national, State, or private, do not deliberately undertake an investment of capital in any enterprise unless the promised profit from it is greater than that of some other in which this capital

might be engaged. Banks other than national do not issue bank notes, simply because by so doing they must incur loss through the enforcing of the 10 per cent tax against the notes so issued. Upon the same grounds national banks do not issue notes when there is either a direct loss to them in so doing or a profit too small to warrant the investment in bonds and the payment of the rate of tax levied. While it is true that national banks are in a sense public institutions, in that they are under direct governmental supervision, they are none the less associations of private individuals formed wholly for purposes of private gain. There is invested in them the individual property interests of individual citizens and it is as unreasonable to find fault with them for not conducting a losing business as it is to so treat the individual in the other dealings which he carries on. The public has a right to expect from that part of it engaged in national banking just as much, and no more, business generosity than from those engaged in agriculture, manufacture, or mining. On the other hand, this class is entitled to as much consideration from the general public as the classes referred to, and no more.

There is no monopoly under the present banking laws given to any class of citizens beyond that which comes to any person having investable capital. It is on the same footing exactly with the business of the merchant with no more favoring laws in the matter of taxation. It is to be doubted whether the returns upon the capital invested in banking, proportionate to the amount, indicate as large a percentage of profit as that invested in merchandise. The net earnings on the capital stock and surplus fund of national banks for the past year was 5.4 per cent, including all profit made on the issue of circulation. As compared with the profits accruing to those interested in many mining and manufacturing enter-

prises the rate is exceedingly small.

The Actuary of the Treasury has for recent years estimated the profit upon bank circulation, secured by all classes of accepted Government bonds, to be as follows:

.Date.	Profit.
October 31, 1894. October 31, 1895. October 31, 1890.	1.107

Upon this basis the amount of national bank circulation outstanding secured by a deposit of bonds was—

November 1, 1894	79, 401, 364
November 1, 1895	90180. 961
November 1, 1896	16, 510, 014

It thus appears that the law controlling bond-secured circulation is that which governs all other business undertakings. Increase follows conditions of promised profit and decrease those where no apparent profit is discernible. Unnecessary restrictions and unnecessary taxation only serve to hamper at needed times an enlarged circulation of an instrument of credit which has the merit of always being safe and redeemable. It is not to be claimed that these amendments would make the bank-note circulation of the country perfect, but they would at least improve it and again attract to its attention banks which have now become indifferent. If the right of note issue should properly vest in national banks they ought to have every privilege which can be consistently and properly granted, and thus enabled to make the exercise of this function a means of facilitating the interests of trade and commerce. It is unnecessary to discuss the right. That has been passed upon by the courts and the national bank note is the willingly accepted bank currency of the people. It is therefore certain to continue, and for this reason, if for no other, legislation which will make of greater scope and wider utility the note issuing powers of the national banks is legislation which should find enactment.

The monetary difficulties of the Treasury which affect every class of people and embarrass the administration of the affairs of the Treasury Department can not longer continue without entailing still greater loss and more widespread financial disaster. They do not find their origin in any mere surface and temporary weakness, nor are they due to recent and passing conditions. They are inherent in the financial policy which has been built up in the United States and constitute an integral part of it. Instead of lessening in ill effects with time, they will accumulate more strength for harm at each recurring season of financial and business

disturbance.

The policy of having the Treasury a bank of issue, as it is in the issuing of the Treasury notes, without attaching to it needed bank of issue powers, and of making it a bank of deposit in the maintenance of the subtreasury system without corresponding bank-of-deposit essentials, violates the laws of all successful government financiering. If the Treasury is to be a bank of issue, it should be clothed with complete powers in this regard. If it is to be a bank of deposit, it should be governed by principles invoked by such an institution and make of benefit to trade and commerce the moneys which come into its vaults. It ought not to embarrass the business world by locking up vast sums, resulting at times in artificially creating a money stringency, and at others, by suddenly expending equally large amounts, creating a plethora. If the harm worked by this latter feature of our financial policy is less than that flowing from the former, it is nevertheless a source of very great weakness.

Though it may be a debatable question as to the wisdom of taking the moneys gathered for public revenues out of the channels of daily business and looking them up in the subtreasuries of the country, the experience of this and other countries certainly demonstrates that there is little, if any, room to doubt the folly of the direct issue and redemption of Treasury bank notes by the Government. It is a practice abandoned as a controlling policy by every great government save the United States, on the ground of unsoundness. Other countries which tolerate it at all, issue these notes only in very limited quantities and not on lines followed here. It had no advocates in this country until the advent of the civil war, and was then accepted only because of an urged necessity, under the promise of being but a temporary expedient

and was admittedly wrong as a matter of principle by those who fathered it. The staunchest friends it had in either House of Congress protested against the continuance of Treasury issues beyond the war period, and with equal emphasis promised at an early date their payment and cancellation.

A policy in finance wrong in principle never becomes right in practice. The truth of the statement is fully illustrated by the course of the legal-tender Treasury issues of the United States. They have been always a disturbing element in business, and their current redemption a continuing weakness and anxiety to the Treasury. They compet the Treasury of the United States to carry a reserve of gold which their use makes the basis of supply for all places and all people. They have not even the merit of being without expense to the Government. At one time it was argued in behalf of continuing their issue and compulsory reissue that to cancel them meant to dangerously contract the currency. That argument has given way to one which assumes that they are what is termed "a noninterest bearing debt," and are consequently carried without additional tax upon the public. Those who advance this as argument either disregard or are ignorant of the facts. In order to present the full effect of the Treasury issues of the Gov-

In order to present the full effect of the Treasury issues of the Government in creating and continuing an interest bearing debt since the war, and to draw a comparison between that and the effect of note issuing by the national banks upon the Government's income, the following statement has been prepared at the request of this office by the chief of the loans and currency division of the Treasury Department:

Cost of the Gold Reserve, Including Liability for Principal of Bonds Sold and Interest Thereon to their Maturity.

Principal of bonds sold for resumption purposes:	
18 ⁷ 7 and 1878	\$95, 500, 000
	100, 000, 000
1895	62, 315, 400
1896	100, 000, 000
Total principal.	357, 815, 400
Interest at 4 per cent on the average amount of the free gold in the Treasury from January 1, 1879, to January 1, 1895	93, 440, 000
T	451, 255, 400
Interest from January 1, 1895, to July 1, 1907, on \$95,500,000 4 per cent bonds of 1907.	47 750 0001
Interest from January 1, 1895, to February 1, 1904, on \$100,000,000 5 per cent bonds	45, 416, 666
Interest from February 1, 1895, to February 1, 1925, on \$62,315,400 4 per cent bonds	74, 778, 480
Interest from February 1, 1896, to February 1, 1925, on \$100,000,000 4 per cent bonds	116, 000, 000
Total cost, including liability, except United States notes outstanding. Add amount of United States notes still outstanding	735, 200, 546 346, 681, 016
Total cost and liability	1, 081, 881, 562
If the United States notes had been funded on the 1st day of Janu the 30-year 4 per cent bonds of 1907, then being sold, the total cost t ment therefor, including interest from January 1, 1879, to July 1, 190 follows:	to the Govern-
Principal of bonds	\$346, 681, 000 395, 216, 340
	741, 897, 340
Difference in favor of converting the United States notes into bonds	339, 984, 222

It may be objected that the item of \$93,440,000, interest at 4 per cent on the average amount of the free gold in the Treasury from January 1, 1879, to January 1, 1895, should be eliminated from the items of cost as not proper to be included therein. But even when this is deducted, there is yet an enormous direct money cost to the Government growing out of these issues which could have been lessened by the sum of \$214,044,222 if the notes had been funded on January 1, 1879, into 30-year 4 per cent bonds of 1907.

It may be still further objected that a part of the notes redeemed with the gold thus procured has been used to defray the expense of the Government, but this objection does not reach to the merit of the question, because none of this interest-bearing indebtedness would or could have been lawfully created if the United States notes and Treasury notes had not been in circulation. The seat of difficulty has been the necessity of the maintenance of the gold reserve for current redemption, a difficulty which can not be obviated as long as the causes of it are in existence.

EFFECT OF MAINTAINING TREASURY AND NATIONAL-BANK NOTES COMPARED.

The argument as stated in favor of the continuance of Treasury notes is their assumed lack of cost to the public. That advanced against issues of national banks is that they burden the people and take from the people for private benefit. If the first argument is opposed by the facts, not less so is the second. The comparison could not be more striking or the results upon the income of the Treasury more diametrically opposite. The course of the former has increased the rate of taxation necessary to meet the expenses of the General Government, while that of the latter has lessened it. This rate has been further lessened by other items of revenue gained to the Government directly from the national banks.

REVENUE RECEIVED BY THE GOVERNMENT FROM NATIONAL BANKS FROM 1863 TO OCTOBER 31, 1896.

\$7, 855, 887, 74 60, 940, 067, 16 79, 390, 680, 89 617, 225, 34
148, 803, 861. 13
2, 826, 466.00
148, 803, 861. 13 2, 826, 466. 00
21, 956, 621. 85
173, 586, 948. 98
16, 147, 700. 00
157, 439, 248. 98

It thus appears that instead of loss resulting to the Government from the creation of the national banks, the direct money benefit to it therefrom has been \$157,439,248.98, which could be further augmented by adding the saving made to the Treasury by having had annually the use of the five per cent redemption and lawful money fund kept by the

banks for the current and ultimate redemption of their notes with it,

amounting, on October 31 of the present year, to \$26,951,641.

The efforts in other countries have been directed toward divorcing the treasury department of governments from the bank note function. That function has been given to corporations created for the purpose. It has followed that the duties of their treasury departments have been limited to the collection and expenditure of revenues and their regulation, while the banks have issued promissory bank notes and both currently and ultimately redeemed them. The problem of maintaining a gold reserve to a certain amount has not vexed and harassed them, nor interfered with the conduct of the citizens' private business. volume of the currency so issued has depended upon the needs of business as seen in many portions of such countries by institutions invested with the right to meet the local demand. It is not affected by change of political parties nor discussed as a matter to be decided by political There is no state of affairs peculiar to the United States affiliations. which makes it wise to employ different methods or to invoke different rules in the same line of conduct. It is equally certain that there is no exemption vouchsafed to this country from loss in violating the proven rules requisite to sound and prudent monetary and fiscal operations.

The current credit instruments entering into the movements of finance, trade, and commerce ought all to be issued by the banks as needed, under government supervision, in order to insure uniformity and guard against loss. The responsibility for their redemption in gold coin should be wholly borne by the banks, and upon the banks should rest the duty of furnishing whatever gold is needed for domestic or foreign business purposes. In order to attain this end the credit currency of the government now outstanding should be redeemed in gold and retired, through funding or otherwise, as speedily as safety will permit, and the banks made to assume the rights and burdens which properly belong to them. The sound State and private banks prior to 1863 redeemed their own notes in gold and furnished all gold needed for domestic trade and to settle international balances. The national and other banks from the resumption of specie payments until 1890, when the government's credit currency was again enlarged and legislated upon, followed the same practice. The question is not one of ability on their part to meet such demand, but one of opportunity, freed from government competition and unrestricted by unrequired government control.

It is respectfully submitted that legislation by Congress, based upon safe and prudent lines, having in view the gradual payment and cancellation of the credit currency now maintained by the Government and the issuance hereafter of all of such currency through the banks, with full responsibility therefor placed upon them, should be had at the very earliest practicable moment. The results which would follow such enactments would be beneficial, and neither would monopoly be created

nor favor shown thereby.

FOREIGN AND STATE BANKING SYSTEMS.

In the report for 1895 appeared papers concerning the banking systems of the following countries: Belgium, Canada, Chile, China, Denmark, Ecuador, France, Germany, Greece, Guatemala, Haiti, Hawaii, Italy, Korca, Liberia, the Netherlands, Paraguay, Peru, Portugal, Russia, Salvador, Siam, Switzerland, Turkey, Uruguay, and Venezuela. They were prepared by representatives of this Government to countries to which accredited. It has been thought best to reprint these papers

in the Appendix,¹ and to add others received since from the following countries, viz: Argentina, Austria, Bolivia, Brazil, British Columbia, Bulgaria, Colombia, Costa Rica, Dutch Guiana, Egypt, Great Britain, Japan, Jaya, Mexico, Newfoundland, Nicaragua, Persia, Roumania, Servia, and Sweden. In addition, through permission of the author, Mr. Charles A. Conapt, extracts have been taken from his Modern Banks of Issue upon the banking systems maintained in the French colonies in America, British colonies in Latin America, Dutch Guiana, Java, Bulgaria, Servia, and Cuba. In view also of the fact that the edition of the report of 1895 has been exhausted, there is also reprinted the reports then published of the bank systems maintained in the various States and Territories and the local regulations pertaining thereto.

NATIONAL-BANK ACT AND DIGEST OF BANK CASES.

The report herewith submitted has also been enlarged by the embedying in it of a revised edition of the National Bank Act and a carefully prepared digest of the decisions of the courts, both Federal and State, upon questions affecting the administration of the bank law. To this has been added a table of cases, arranged in alphabetical order.

APPENDIX AND SECOND VOLUME.

In the Appendix is also to be found the usual tables, together with

added ones bearing upon the subjects of special investigation.

In the second volume of the report will be found a detailed statement of the condition of all the national banks as shown by the report of condition on October 6, 1896, alphabetically arranged by States and properly indexed.

CONCLUSION.

The added work entailed by the investigations made and tabulated, together with an increase in correspondence, has largely fallen upon the force of employees in the Comptroller's office. It has been done without increasing the number thereof, and in a manner which warrants the renewing of the testimony heretofore given to each one's character and efficiency. The work done by the national bank examiners and the receivers of failed national banks has been equally satisfactory, conscientious, and intelligent.

James A Eckelo
Comptroller of the Currency.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

The Appendix and tables here referred to, which are omitted for want of space, will be found in the separate volume of the Comptreller's full report.

REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT. OFFICE COMMISSIONER OF INTERNAL REVENUE. Washington, D. C., November 1, 1896.

SIR: In conformity with the instructions contained in your letter of October 2, 1896, I have the honor to submit the following report of the operations of the Bureau of Internal Revenue for the fiscal year ended June 30, 1896, and also certain additional information relating to the work performed and receipts from the various sources of internal revenue during the months of July, August, and September of the current fiscal year:

The titles of the tables 1 found at the close of the bound volume of this

report are as follows:

Table A, showing the receipts from each specific source of internal revenue and the amounts refunded in each collection district, State, and Territory of the United States for the fiscal year ended June 30, 1896.

Table B, showing the number and value of stamps for special taxes. manufactured tobacco, snuff, cigars, cigarettes, distilled spirits, fortified sweet wine, fortified wine for export, fermented liquors, oleomargarine, export stamps for distilled spirits, playing cards, and opium manufactured for smoking purposes; also the number of the different kinds of certificates of registry, with the number and value of documentary stamps used for validating unstamped instruments, issued to collectors of internal revenue during the fiscal year ended June 30, 1896.

Table C, showing the percentages of receipts from the several general sources of internal revenue now taxable in each State and Territory of the United States to the aggregate receipts from the same sources, by

fiscal years, from July 1, 1863, to June 30, 1896.

Table D, showing the aggregate receipts of internal revenue in each collection district, State, and Territory of the United States, by fiscal years, from September 1, 1862, to June 30, 1896.

Table E, showing the receipts from specific and general sources of internal revenue, by fiscal years, from September 1, 1862, to June 30,

Table F, showing the ratio of receipts from specific sources of internal revenue to the aggregate receipts of the same, by fiscal years, from July

1, 1863, to June 30, 1896.

Table G, showing the returns of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, and cigarettes, under the several acts of legislation and by fiscal years, from September 1, 1862, to June 30, 1896; also statement of the production of distilled spirits and fermented liquors in the several States and Territories, by fiscal years, from July 1, 1877, to June 30, 1896.

¹ The tables here referred to are omitted from this volume.

Table H, showing the receipts from special taxes in the several States

and Territories for the twelve months ended June 30, 1896.

Table I. Abstract of reports of district attorneys concerning suits and prosecutions under the internal-revenue laws during the fiscal year ended June 30, 1896.

Table K. Abstract of seizures of property for violation of internal-

revenue laws during the fiscal year ended June 30, 1896.

Table L, showing the collections, expenses, and percentage cost of collection in the several collection districts during the fiscal years ended June 30, 1895 and 1896.

COLLECTIONS FOR THE FISCAL YEAR ENDED JUNE 30, 1896.

In my last annual report I estimated that the receipts from all sources of internal revenue for the fiscal year ended June 30, 1896, would aggregate \$165,000,000. The actual receipts were \$146,830,615.66, or \$19,169,384.34 less than my estimate.

RECEIPTS FOR THE PAST TEN FISCAL YEARS.

Fiscal year ended—	
June 30, 1896	\$146, 830, 615. 66
June 30, 1895	143, 246, 077, 75
June 30, 1894	
June 30, 1893	
June 30, 1892	153, 857, 544. 35
June 30, 1891	
June 30, 1890.	
June 30, 1889 June 30, 1888	130, 894, 434, 20
June 30, 1887	118, 837, 301. 06

ESTIMATED RECEIPTS FOR THE CURRENT FISCAL YEAR.

From calculations based upon the receipts reported for the months of July, August, and September, 1896, and after giving due weight to the very general anticipation of material changes for the better in the business conditions of those industries which contribute to internal-revenue taxes, I estimate that the receipts from all sources of internal revenue for the current fiscal year will aggregate \$150,000,000.

Schedule of articles and occupations subject to tax under the internal-revenue laws of the United States in force November 1, 1896.

SPECIAL TAXES.	
Ra	te of tax.
Rectifiers of less than 500 barrels a year	\$100.00
Rectifiers of 500 barrels, or more, a year	200.00
Retail liquor dealers	25.00
Wholesale liquor dealers	100.00
Retail dealers in malt liquors	20.00
Wholesale dealers in malt liquors	50.00
Manufacturers of stills	50.00
and for stills or worms, manufactured, each	20.00
Brewers, annual manufacture less than 500 barrels	50.00
annual manufacture 500 barrels or more	
Manufacturers of oleomargarine	
Retail dealers in oleomargarine	48.00
Wholesale dealers in oleomargarine	480.00
Manufacturers of filled cheese	400.00
Wholesale dealers in filled cheese	250.00
Retail dealers in filled cheese	12.00

COST OF COLLECTION.

The cost of collection for the past fiscal year, distributed among the different items of appropriation, was approximately as follows:

For salaries and expenses of collectors, including pay of deputy col-	
lectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine.	\$1, 813, 015, 54
For salaries and expenses of revenue agents, surveyors of distilleries.	
gaugers, storekeepers, and miscellaneous expenses.	1, 936, 461. 22
For paper for internal-revenue stamps	29, 830, 58
For expenses of detecting and punishing violations of internal-revenue	
laws.	49,601.33
For salaries of officers, clerks, and employees in the office of Commis-	
sioner of Internal Revenue	257, 383. 80
Simple of the stat	
Total amount expended	4, 086, 292, 47

PERCENTAGE OF COST OF COLLECTION.

The percentage of cost of collection is 2.78 per cent. The expenses for the previous fiscal year were \$4,127,601.16, or 2.81 per cent of the collections for that year, the figures indicating a slight decrease in the

percentage of cost for the fiscal year just ended.

The amount appropriated for salaries and expenses of agents, gaugers, storekeepers, etc., was \$1,900,000, while, owing to the increased number of distilleries in operation, resulting in an increase in the amount of taxes collected from spirits of more than \$490,000, as compared with the previous year, as shown in this report, the actual expenses for this purpose were \$7,379.32 more than the amount appropriated, as shown by unpaid accounts now on file, and for which an additional appropriation will be needed.

MISCELLANEOUS EXPENSES.

The act of Congress approved August 7, 1882, making provision for sundry civil expenses for the year ended June 30, 1883, required the Commissioner of Internal Revenue to make a detailed statement of all miscellaneous expenditures in the Bureau of Internal Revenue for which appropriation was made in that act. In accordance with this requirement, I submit the following detailed statement of miscellaneous expenses incurred:

±	
Telegraphing on public business	\$390.68
Locks for use at distilleries	1,651.43
Hydrometers used in gauging spirits	7,046.50
Weighing beams for use in weighing spirits	928.56
Expenses of testing spirits weighed, labor, etc	41.65
Steel canceling dies	210.75
Steel canceling dies	
margarine	1, 217. 04
Stationery for internal-revenue officers	410.10
The Internal Revenue Record supplied to internal-revenue officers	2, 200.00
The Federal Reporter for the office of the Commissioner of Internal Rev-	,
enue	35.00
Compensation of United States attorneys in internal-revenue cases allowed	
under sections 827 and 838, Revised Statutes	460.00
Traveling expenses of clerks and chemist under special orders of the	•
Department	169.08
Expenses of seizures and sales by collectors	699.83
Total	15, 460, 62

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal-Revenue Service for the fiscal year ending June 30, 1898, as follows:

For salaries and expenses of collectors, including pay of deputy collectors and surveyors and clerks, and expense of enforcing the act of August 2, 1886, taxing oleomargarine, and the act of August 4, 1886, imposing on

the Government the expense of the inspection of tobacco exported, and	
the act of June 6, 1896, imposing a tax on filled cheese	
For salaries and expenses of 20 revenue agents, for fees and expenses of	
gaugers, for salaries of storekeepers, and for miscellaneous expenses	2, 150, 000
For paper for internal-revenue stamps	50,000
For detecting and bringing to trial and punishment persons guilty of	
violating the internal-revenue laws, including payment for information	
and detection	60,000
For salaries of officers, clerks, and employees in the office of the Commis-	. '
sioner of Internal Revenue	

4, 369, 090

SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1898, the sum of \$259,090 as salaries for the following officers, clerks, and employees in this Bureau:

One Commissioner, at	\$6,000
One Deputy Commissioner, at	3, 200
One chemist, at	2,500
Two heads of division, at	2,500
Five heads of division, at	2,250
One superintendent of stamp vault, at	2,000
One stenographer	1,800
Twenty-four clerks, at	1,800
Twenty-four clerks, at	1,600
Thirty-four clerks, at	1,400
Twenty-four clerks, at	1, 200
Thirteen clerks, at	1,000
Forty clerks, at	900
Two messengers, at	840
Fourteen assistant messengers, at	720
Thirteen laborers, at	660
,	

An aggregate of 200 persons.

I also recommend the appropriation of the sum of \$2,500 as salaries for one stamp agent, at \$1,600, and one counter, at \$900, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections should vary from the amounts estimated, the salaries will be readjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of—	Salary.
\$25,000 or less. 25,001 to \$37,500 37,501 to 50,000 50,001 to 75,000 75,001 to 100,000 100,001 to 125,000 125,001 to 175,000 175,001 to 225,000 225,001 to 275,000 225,001 to 275,000 225,001 to 275,000 325,001 to 375,000	2, 125 2, 250 2, 375 2, 500 2, 625 2, 750 2, 875 3, 000 3, 125	\$375,001 to \$425,000. 425,001 to 475,000. 475,001 to 550,000. 550,001 to 625,000. 625,001 to 700,000. 700,001 to 775,000. 775,001 to 850,000. 850,001 to 925,000. 925,001 to 1,000,000. 1,000,001 and upward.	3, 500 3, 625 3, 750 3, 875 4, 000 4, 125 4, 250 4, 375

In addition to the salary based upon the above-mentioned scale, the collector shall receive a commission of one-half of 1 per cent on tax-paid spirit stamps, and may receive additional compensation on account of territorial extent, as provided by law, provided the gross compensation does not exceed \$4,500. (See sections 3148 and 3314, Rev. Stat.)

OFFICIAL FORCE.

The force connected with this Bureau during the fiscal year which ended June 30, 1896, in the various districts throughout the United States, as reorganized under the Executive order of May 21, 1887, was 63 collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
33	4, 375 4, 250 4, 000	1 1 4 5	3, 625 3, 500	2 4 2 1	\$2,875 2,750 2,625 2,500

There were also employed 962 deputy collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
22 33 1 10 31 2 59 9	\$2,000 1,900 1,800 1,750 1,750 1,600 1,550 1,500 1,450 1,450	34 169 127 136 2 64 4 23 1 5	\$1, 300 1, 200 1, 160 1, 000 1, 000 950 900 850 800 750 600	9	\$500 480 425 400 360 300 230 240 200 150

There were also employed in the offices of the different collectors 185 clerks, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
1	\$1,800 1,600 1,500 1,400 1,300 1,250 1,200	8	\$1, 150 1, 100 1, 000 900 800 750 720	9	\$700 650 600 500 400

Also 27 porters, messengers, or jamitors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
6	\$600 500 480 400	1	\$360 300 240 200	1	\$120 100

At the close of the year ended June 30, 1896, 198 officers, clerks, messengers, and laborers were employed in this Bureau, and the aggregate amount paid during the year for their salaries was \$257,383.80.

STOREKEEPERS, GAUGERS, ETC.

There were also employed 622 gaugers, who received fees not to exceed \$5 per day, 450 storekeepers, and 1,479 storekeepers and gaugers, whose pay did not exceed \$4 per diem, and 5 distillery surveyors. All the foregoing officers are paid only when actually employed.

Storekeepers are assigned to those distilleries only which have a surveyed daily capacity exceeding 100 bushels, and are paid such compensation as may be prescribed by the Commissioner of Internal Revenue,

not to exceed \$4 per day.

Storekeepers and gaugers are assigned to distilleries having a capacity of 100 bushels or less, which are in operation, and to distilleries of a capacity not exceeding 500 bushels, when under suspension.

Under the act of August 28, 1894, storekeepers and gaugers may now be assigned to perform the separate duties of a storekeeper at any distillery, or at any general or special bonded warehouse, or to perform

any of the duties of a gauger, under the internal revenue laws.

The very material increase in the number of storekeepers and gaugers results from the change made in the law providing for the assignment of these officers to the separate duties of the combined office. This has resulted in a material saving in the expense for that service.

The pay of storekeepers and gaugers assigned to distilleries whose registered daily capacity is 20 bushels or less, is fixed by law at \$2 per diem. The pay of those assigned to larger distilleries has been graded

according to the following scale:

Compensation of storekeepers and gaugers assigned to distilleries in operation having a surveyed daily capacity exceeding 20 bushels, and not exceeding 40 bushels, \$3 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 40 bushels, and not exceeding 60 bushels, \$3.50 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 60

bushels, \$4 per day.

The compensation of such officers assigned to distilleries under suspension having a surveyed daily capacity not exceeding 20 bushels, and having not exceeding 5,000 gallons of spirits in the distillery warehouse, is \$2, for such days only as the officer is required to be in attendance to make withdrawals of spirits, or for other necessary purposes; when the quantity of spirits in warehouse of a suspended distillery having a daily capacity not exceeding 500 bushels, exceeds 5,000 gallons, and does not exceed 25,000 gallons, the compensation is \$2 per day of constant attendance; when the quantity exceeds 25,000 and does not exceed 100,000 gallons, \$3 per day; and when the quantity exceeds 100,000 gallons, \$4 per day.

GENERAL CONDITION OF THE OFFICE AND THE SERVICE.

The work of the Bureau, both in the office and in the field, is in good condition, and it affords me very great pleasure to commend the efficiency, industry, and competency of the officers, clerks, and employees in the several branches of the service. Under these conditions the result has been the prompt and accurate disposal of all the business of the Bureau up to date.

I desire to call special attention to the marked improvement of the service in the field since the classification under the civil-service law of the various employees in that branch of the service. This is especially noticeable in those districts in which there has heretofore been a

disposition on the part of subordinate employees to enter into collusion with persons engaged in the illicit manufacture and sale of distilled

spirits.

Under the old order of things, the subordinate employee looked forward to nothing better than his employment at a small compensation during the period of his assignment to duty at a distillery. As a result, he frequently became careless in the discharge of his duties, and, in some cases, sought to increase his income by actual collusion with the distiller to whose premises he was assigned, such collusion having for its object the defrauding the Government of its revenues.

Under present conditions, the employee has learned that a serious infraction of his duty renders him liable to peremptory dismissal from the service, and that without any hope of reemployment. He has also learned that a strict compliance on his part with the law and regulations will place him in the line of promotion, and enable him to be

advanced to the higher grades of the service.

In the districts referred to, the improved condition of the service is evidenced by the greatly decreased number of complaints filed with this office, and, also, by the largely increased receipts from penalties imposed for violations of the law and regulations.

REVENUE AGENTS' DIVISION.

During the past fiscal year 20 agents have been employed—1 as chief of division in this office, 16 in charge of territorial divisions, and 3 in the examination of the offices and accounts of collectors. Under the provision of the sugar-bounty law 2 agents were employed.

EXPENSES OF REVENUE AGENTS.

There have been expended from the appropriation for salaries and expenses of revenue agents during the year the following amounts:

Aggregate salary of agents	\$48, 596, 00
Aggregate amount of traveling expenses	
Stationery furnished agents	410, 10
Transportation over Pacific railroads	635, 27

82, 263, 87

While this report shows the amount expended from the appropriation for the discovery of violations of internal-revenue law, it does not exhibit the correct results, for the reason that many cases discovered within the time named are before the courts or pending a settlement by offers in compromise in this office, the aggregate results of which would materially increase the sums reported.

In some districts the reports show violations of law, and seizures of property and assessments resulting therefrom, while but little, and in some instances none of the "fraud fund" was expended. The results reported in such cases are due to the individual work of the agents, or the deputies under their direction, and the "fraud fund" is not entitled

to the credit for such work.

EXPENDITURES FOR THE DISCOVERY AND PUNISHMENT OF VIOLATORS OF LAW.

In accordance with the provisions of the act making an appropriation of \$50,000, the following detailed statement of expenditures for detecting and bringing to trial and punishment persons guilty of violating internal-revenue laws is submitted:

AMOUNT EXPENDED THROUGH REVENUE AGENTS FOR FISCAL YEAR 1896.

Name.	Amount.	Name.	Amount.

MANUFACTURE OF STAMP PAPER.

After due advertisements in the public prints and by Department circular for proposals to furnish stamp paper for the fiscal year ending June 30, 1897, five sealed bids were presented, which were opened on the 22d day of April, 1896, in the office of the Commissioner of Internal Revenue, by a committee appointed by the Honorable Secretary of the Treasury to open and consider such bids as might be presented ples of the paper to be furnished were submitted with each of the bids. and after the same were scheduled and classified, and the samples submitted to the usual mechanical tests, an award of contract was recommended by the committee to the lowest and best bidder whose sample of paper stood a satisfactory test as compared with the paper in use. Accordingly the contract was duly awarded on the 16th day of June, 1896, to the New York and Pennsylvania Company, of New York, at 4.5 cents per pound, including cost of transportation and delivery at the Treasury Department, this being a reduction of one tenth of 1 cent per pound from the former contract price, which was 4.6 cents per pound.

PRODUCTION OF STAMPS.

All of the stamps used by this Bureau are engraved and printed by the Bureau of Engraving and Printing, with the exception of stamps for tobacco imprinted on foil wrappers, which have been printed and furnished by the John J. Crooke Company, of New York, under a contract which provides that the imprinting of such stamps shall be without cost to the Government, the contractors receiving such remuneration from the manufacturers of tobacco as may be agreed upon between them, and reimbursing the Government for the salaries of one stamp agent for the United States and one counter, amounting to \$2,500 per annum.

NEW CLASSES OF STAMPS ADDED UNDER THE ACT OF CONGRESS APPROVED JUNE 6, 1896.

The act approved June 6, 1896, imposed a tax of 1 cent per pound on all "filled cheese" in the hands of dealers on the ninetieth day after the passage of the act, and the same on all domestic filled cheese manufactured after September 4, 1896, being the ninetieth day after the passage of the act. An internal-revenue tax of 8 cents per pound was also imposed on all filled cheese imported from any foreign countries in addition to any customs duty imposed on the same, and special taxes as follows, viz: On the business of manufacturer of filled cheese, \$400 per annum; wholesale dealer in filled cheese, \$250 per annum, and retail dealer in filled cheese, \$12 per annum. In accordance with the provisions of the act, stamps to represent the taxes above mentioned have been ordered to be prepared, due mention of which will be made in the report for the next fiscal year.

STOCK OF STAMPS IN VAULT.

The stock of stamps in the vault October 1, 1896, of the various classes and denominations, was 200,466,124, and the value of the same \$72,835,907.14. This is a larger stock by several millions, both in number and value, than has been reported on hand for several years, and represents the full storage capacity of the vault. The statement of the Bureau of Engraving and Printing on October 1, 1896, shows a balance due to be delivered to this Bureau on past orders of 56,630,000 stamps.

REDEMPTION OF DOCUMENTARY AND PROPRIETARY STAMPS.

During the fiscal year ended June 30, 1896, 59 applications for redemption of documentary, check, and proprietary stamps were received for consideration, the aggregate value of amounts claimed being \$209.81, and the various sums stated ranging from 4 cents to \$50. The time allowed by law for the redemption of these classes of stamps having expired June 30, 1886, under the limitation imposed by section 17 of the act of March 1, 1879, the claims were rejected and the stamps forwarded therewith were returned to the applicants.

TOBACCO DIVISION.

The aggregate amount of taxes collected from tobacco during the last fiscal year was \$30,711,629,11. This amount includes internal-revenue taxes paid by stamps on imported and manufactured tobacco, snuff, cigars, and cigarettes.

The net increase of collections for the last fiscal year, as compared with those for the previous fiscal year, was \$1,006,721.48. The increase

from the following articles was:

Cigars and cheroots	\$221, 350, 51
Cigarettes	358, 493, 53
Tobacco, chewing and smoking	323, 849, 94
Snuff	103, 027. 50
<u>.</u>	

The increase in the number of cigars and cheroots and in the quantities of smoking and chewing tobacco and snuff, as compared with those taxed for the previous fiscal year, was:

Cigarettesdo	715, 321, 060
Total net increasedo	, ,
Tobacco, chewing and smoking poundsSnuff do	5, 397, 499 1, 717, 125
,	

The export account shows a decrease in manufactured tobacco and snuff of 821,008 pounds, a decrease in the number of eigars exported of 96,314, and an increase in the number of eigarettes exported of 166,227,290.

COMPARATIVE STATEMENT.

The following exhibit shows in detail the receipts for the fiscal year ended June 30, 1896, from each particular source of the tobacco tax, as compared with those for the previous fiscal year:

RECEIPTS FROM TOBACCO AND SNUFF. Manufactured tobacco	\$15, 220, 028. 25 752, 915. 92

THE TABULAR STATEMENTS.

In the tables annexed will be found statements showing the manner in which the manufacturing is distributed among the different States and districts, the number of persons and firms engaged in each of the two branches of manufacturing, the quantity of different kinds of material used, and the quantity and kinds of product manufactured. These tables are compiled from the reports received from the collectors of internal revenue of the transactions of manufacturers in their several districts for the calendar year ended December 31, 1895, a period of time differing from the fiscal year ended June 30, 1896, which will account for any apparent discrepancies between them and the previous part of the report relating to tobacco.

ABATEMENT CLAIMS.

On the 1st of July, 1895, there were pending 466 claims for abatement of assessed taxes, amounting to \$83,887.03, and during the year 5,341 claims, amounting to \$448,838.37, were presented.

Of these, 4,334 claims, amounting to \$275,277.77, have been allowed by this office, and 1,200 claims, amounting to \$228,916.61, have been

rejected or returned for amendment.

This left 273 claims for abatement still pending on the 30th of June,

1896, amounting to \$28,531.02.

Since that date, and up to October 1, 1896, 1,079 other claims have been filed, amounting to \$87,668.40, and 856 claims have been allowed, amounting to \$59,978.73, and 291 rejected or returned for amendment, amounting to \$34,746.67, and on the 1st of October, 1896, 205 claims for abatement were pending, amounting to \$21,474.02.

REFUNDING CLAIMS.

On the 1st of July, 1895, there were pending 299 claims for the refunding of taxes collected, amounting to \$162,873.54, and during the year 1,324 other claims, amounting to \$91,456.91, were presented. Of these, 1,311 claims, amounting to \$83,828.81, have been allowed, and 118 claims, amounting to \$25,078.13, have been rejected or returned for amendment. This left 194 claims for refunding still pending on the 30th of June, 1896, amounting to \$145,423.51.

Since that date, and up to the 1st of October, 1896, 49 other claims, amounting to \$6,862.87, have been received, and 29 claims, amounting to \$1,277.50, have been allowed, and 38 claims, amounting to \$19,014.60, have been rejected or returned for amendment. On the 1st of October, 1896, 176 claims for refunding, amounting to \$131,994.28, were pending.

COMPARATIVE STATEMENT OF DISTILLERIES REGISTERED AND OPERATED.

The whole number of grain distilleries registered during the fiscal year ended June 30, 1896, was 1,833, of which number 1,351 were

operated.

The number registered during the fiscal year ended June 30, 1895, were 1,949 and 1,621, respectively, showing a decrease during the last fiscal year of 116 in the number registered and of 270 in the number

The larger portion of the decrease in the number registered and operated occurred in the class of distilleries having the smaller capacities for the production of spirits, there having been a decrease of 111 distilleries of this class registered and of 229 in the number operated. In the class of larger distilleries there was a decrease of 5 in the

number registered and of 41 in the number operated.

During the fiscal year ended June 30, 1895, there were registered 1.683 distilleries of the smaller class, varying in daily grain capacity from not over 5 to not over 60 bushels each, and of this number 1,385, or 82+per cent, were operated.

Of the larger distilleries, having daily grain capacities varying from over 60 bushels to several thousand bushels each, 266 were registered,

and 236, or nearly 89 per cent, were operated.

During the fiscal year ended June 30, 1896, of the smaller distilleries, 1,572 were registered, and 1,156, or 73+ per cent, were operated.

Of the larger distilleries, 261 were registered, and 195, or 74+ per cent, were operated.

There were 11 molasses distilleries registered and 11 operated, a de-

crease of 1 in the number registered for the previous fiscal year. A very large increase occurred in the number of fruit distilleries registered and operated, there having been 4,845 registered and 4,825 operated, an increase in the number registered and operated over the

previous fiscal year of 3,925 and 4,028, respectively. The total number of grain, molasses, and fruit distilleries registered

during the year is 6,689, and the total number operated is 6,187.

There was an increase of 3,808 in the number of all kinds of distilleries registered and of 3,758 in the number of all kinds operated during the fiscal year ended June 30, 1896, as compared with the fiscal year ended June 30, 1895.

The quantity of molasses used for the production of spirits other than rum has become so large as to require separate mention, and is stated in the table above with the product therefrom in appropriate columns.

In this table, as heretofore prepared, the grain used included the molasses used for the production of spirits other than rum reduced to its equivalent in grain; and the spirits produced included the spirits produced from both grain and molasses.

The number of gallons of molasses used for the production of spirits during the last fiscal year is 3,507,609, with a product therefrom of

2,642,322 gallons of spirits.

The quantity of grain used for the production of spirits during the fiscal year ended June 30, 1896 (18,630,618 bushels), shows an increase of 1,130,907 bushels over the actual amount of grain used in the preceding fiscal year (17,499,711 bushels, which is exclusive of 557,396 bushels included in last year's report as the equivalent of 3,583,264 gallons of molasses used for the production of spirits); and is 3,224,214 bushels less than the average (21,854,832 bushels) for the last ten years.

The number of gallons of spirits produced from grain during the year (82,456,153) shows an increase of 4,283,641 gallons over the product for the year ended June 30, 1895 (78,172,512 gallons, which included the spirits produced from 3,583,264 gallons of molasses, reduced to its equivalent in grain), and is 11,681,196 gallons less than the average product for the last ten years.

The yield of spirits from each bushel of grain is 4.42+ gallons.

The yield for the two preceding years was 4.42+ gallons for 1894

and 4.32 + gallons for 1895.

The quantity of molasses used for the production of rum during the fiscal year (1,891,356 gallons) shows a decrease of 328,191 gallons from the quantity used in the previous year (2,219,547 gallons), and is 458,835 gallons less than the average (2,350,191 gallons) for the last ten years.

The quantity of rum distilled from molasses during the fiscal year (1,490,228 gallons) shows a decrease of 286,855 gallons from the product of the previous year (1,777,083 gallons), and is 295,435 gallons less than the average product (1,785,663 gallons) for the last ten years.

GENERAL BONDED WAREHOUSES.

Under the authority conferred for that purpose by section 51 of the act of August 28, IS94, I have established in a number of collection districts one or more warehouses for the storage of spirits distilled from materials other than fruit, known as general bonded warehouses.

Some of these warefrouses have proved to be of convenience to the taxpayer without an undue amount of expense to the United States. Others have been found to be detrimental to the interests of the Government.

Under the general provisions of the law, the privilege of removal to and storage in these warehouses is extended to all kinds of distilled spirits without exception, and consequently several of the warehouses so established have been mainly used for temporary occupancy by spirits for which the warehouses served merely as distributing agencies, instead of furnishing a convenient place for the permanent storage of spirits which require to be aged and ripened, as was contemplated by the statute.

The practice of distributing these spirits, designed for immediate consumption, from the warehouse rather than from the distillery has resulted, of course, in delaying the payment of the tax thereon until the expiration of the period covering the transportation of the spirits from the distillery to the warehouse and their subsequent disposition to the trade; and consequently the natural loss of the taxable article occurring during such delay is, in respect to the tax, transferred to the Government, instead of falling upon the owner, by whom it has properly been hitherto borne.

In view of this condition of affairs I have deemed it best to discontinue such of these warehouses as were manifestly not subserving the

purposes of their establishment.

I would recommend that the statute in this regard be so amended as to limit the privilege of storage in these warehouses to such spirits as may be approved by this office; and, further, that provision be made for a charge of not less than 25 cents each for the general bonded warehouse stamps and rewarehousing stamps which are affixed to packages of spirits upon transfer from a distillery warehouse to a general bonded warehouse, or from one general bonded warehouse to another, which charge, it is believed, would mainly defray the expense to which the

Government is put for the supervision and control of these warehouses. Unless action to this effect should be taken it would seem to be best that the authority for their establishment should be withdrawn.

DIVISION OF ASSESSMENTS.

The following statements relative to assessments, to spirits deposited in and withdrawn from distillery warehouses, general bonded warehouses and special bonded warehouses, the number and location of each of such warehouses, and the names of the proprietors thereof; to the stock of spirits in the United States October 1, 1896; to the exportation of spirits, fermented liquors, tobacco, snuff, cigars, and cigarettes, and playing cards in bond; to the exportation of tobacco, cigars, fermented liquors, and stills, with benefit of drawback; to the use of grape brandy, tax free, in fortifying wines, are prepared from reports in the division of assessments.

The statements relative to assessments are to be found on this page and the page following; statements relative to operations in distillery warehouses commence on page 83 (see also special index on page 82); to operations in general bonded warehouses, on page 154, and in special bonded warehouses on page 188; to exportations in bond free of tax from special bonded warehouses, on page 193; as to tobacco, snuff, cigars, and cigarettes, on page 197; as to playing cards, on page 198; to exportations with benefit of drawback, on page 198, and to the use of brandy in fortifying wines, on page 196.

ASSESSMENTS.

1, By States and Territories, 1896.

The following statement shows the amount of assessments in each of the several States and Territories of the United States, except where two or more are comprised in one district, during the fiscal year ended June 30, 1896:

States and Territories.	Amount.	States and Territories.	Amount.
Alabama Arkansas California and Nevada Colorado and Wyoming Connecticut and Rhode Island Florida Georgia Illinois Indiana Iowa Kansas, Indian Territory, and Oklahoma Kentucky Louisiana and Mississippi Maryland, Delaware, and District of Columbia Massachusetts Michigan Minnesota Missouri	7, 199. 53 31, 558. 95 2, 149. 13 7, 335. 70 3, 495. 16 21, 158. 98 40, 321. 31 8, 031. 55 12, 420. 21 4, 355. 23 1, 815, 885. 37 9, 776. 89 11, 231. 31 20, 421. 45 6, 814. 41 10, 499. 55	Montana, Idaho, and Utah Nebraska, Northand South Dakota. deficiencies in bonded accounts which have been collected, taxes previously abated, con- science money; also fines, penalties, and for-				
feitures, and costs paid to collectors by order of court or by order of Secretary, and unas-				
sessable taxes recovered; also amount of penalties and interest received for validating	210, 823, 90	100 001 70		02 020 01
unstamped instruments (Form 58) Special taxes (licenses)	71, 069, 04	65, 928. 40		26, 962. 31 5, 140. 64
Total	1, 468, 618. 57	2, 622, 142. 83	1,370,265.75	216, 741. 49

Taxes on deficiencies in the production of distilled spirits and on excess of materials used by distillers abated before assessment during the fiscal year ended June 30,1896, are as follows:

One hundred and sixty claims received from grain distillers, amount of tax abated—	
On excess of material used On deficiencies in production of distilled spirits	\$1, 638. 21
On deficiencies in production of distilled spirits	64, 230. 39
Total	65, 868. 60
On deficiencies in production of distilled spirits	511. 19
Total grain and fruit	66, 379. 79

STATEMENT AS TO STAMP TAXES ASSESSED.

All taxes payable by stamps not paid at the time and in the manner required by law have been assessed and accounted for separately from those not payable by stamps. The amount of stamp taxes so assessed and accounted for is as follows:

Balance as per last report	\$105, 368. 78
Balance as per last report	362, 835. 65
Total	468, 204. 43
Amount collected during year. Amount abated during year. Balance on hand June 30, 1896.	79, 420, 66
'Total	468 204 43

INCREASED PRODUCTION OF SPIRITS.

The quantity of spirits (86,588,703 gallons) produced and deposited in distillery warehouses during the fiscal year ended June 30, 1896, is greater than the production (79,949,595.3 gallons) of the year 1895 by 6,639,107.7 gallons. The difference is distributed among the different kinds as known to the trade as follows:

Increase in the production of— Alcohol	Gallons. 1, 140, 377. 5 4, 502, 522. 7 6, 322, 523. 9
Total increase 1 Decrease in the production of— Gallons. Bourbon whisky 1, 781, 290, 3 Rye whisky 3, 168, 476, 2 Rum 286, 855, 9 Gin 78, 293, 3 High wines 11, 400, 7	11, 965, 424. 1

DECREASED WITHDRAWAL OF TAX-PAID SPIRITS.

The quantity of tax-paid spirits (60,635,356.1 gallons) withdrawn from distillery warehouses during the fiscal year ended June 30,1896, is less than the quantity (74,176,239.5 gallons) withdrawn from distillery warehouses during the fiscal year ended June 30, 1895, by 13,540,883.4 gallons, the decrease being distributed among the different kinds known to the trade as follows:

Decrease in withdrawals of— Bourbon whisky. ' Rye whisky. Rum. Gin High wines Pure neutral or cologne spirits	2, 053, 401. 3 456, 418. 9 40, 020. 9 71, 109. 4
Total decrease Increase in withdrawals of— Alcohol	16, 295, 117. 3
Total increase.	• •
Net decrease	13, 540, 883. 4

If the quantity, 703,120.3 gallons (as stated by the Chief of the Bureau of Statistics), of exported domestic spirits reimported during the year upon payment of a customs duty equal to the internal-revenue tax be added, the quantity virtually withdrawn from distillery warehouses during the year ended June 30, 1896, is found to be 61,338,476.4

¹ The quantity as stated by the chief of the Bureau of Statistics is 703,520.6 gallons, but the amount of duty (\$773,432.30) reported by him as collected represents the duty at \$1.10 per gallon (the present rate of internal revenue tax) on 703,120.3 gallons only. To avoid a possible overstatement this latter quantity is given in this place.

gallons, or 14,440,164.1 gallons less than during the year 1895, including

the 1,602,401 gallons reimported and tax-paid during that year.

There were also tax-paid withdrawals of spirits from general bonded warehouses amounting to 6,216,284.1 gallons which should be added to the above, making the total domestic spirits, exclusive of fruit brandy, withdrawn from bond on payment of the tax, or of a duty equal to the tax, 67,554,760.5 gallons, or 20,232,794.5 gallons less than the quantity so withdrawn during the fiscal year ended June 30, 1895.

The tax actually paid on spirits withdrawn from distillery warehouses and general bonded warehouses and on reimported domestic spirits was

as follows:

Year ended June 30, 1894	
Year ended June 30, 1896	
	·
D	A COO = CO O=

The relatively favorable showing as to receipts as compared with withdrawals is due to the increased rate of tax under the act of August

28, 1894, from 90 cents per gallon to \$1.10 per gallon.

The decrease of leakage allowed as compared with the year 1895 is 918,387.5 gallons, and is distributed among the different kinds of spirits known to the trade as follows:

Decrease of leakage allowed for—	Gallons.
Bourbon whisky Rye whisky	167, 338
Alcohol	52, 306. 9
Rum High wines	10, 805 5, 648. 1
Pure, neutral, or cologne spirits	70, 543. 7
Total decrease Increase of leakage allowed for—	,
Gin	2, 378. 4
Net decrease	918, 387. 5

DISTILLED SPIRITS ALLOWED FOR LOSS BY LEAKAGE OR EVAPORATION IN WAREHOUSE.

The quantity of spirits (2,614,783.6 gallons) reported in the preceding table as lost by leakage or evaporation in warehouse is that portion of actual leakage in warehouse from packages withdrawn during the year which has been allowed in accordance with the provisions of section 17 of the act of May 28, 1880.

The following statement shows the quantity of spirits, as per original gauge, withdrawn from warehouse for all purposes during the stated period, and the amount and percentage of leakage allowed thereon under the provisions of the act named:

Year.	Total quantity withdrawn.	Leakago allowed.	Percentage of withdrawals.
1880	84, 335, 900 80, 281, 611 83, 291, 190 92, 022, 593 a 90, 925, 783 b 78, 566, 767 70, 782, 951 74, 391, 751 81, 879, 458 88, 066, 945 92, 761, 985 100, 094, 159	Gallons. 75, 834 811, 466 1, 231, 336 2, 291, 013 3, 858, 494 4, 424, 314 1, 806, 868 1, 833, 681 2, 209, 327 3, 145, 111 2, 932, 249 2, 256 3, 532, 810 5, 626, 833, 171, 1 2, 614, 783, 6	. 099 . 963 1. 553 2. 755 4. 193 4. 806 2. 296 2. 599 2. 906 3. 841 3. 328 2. 600 3. 522 4. 681 5. 677 4. 277

d Includes 7,408,518 gallons transferred to general bonded warehouses and on which leakage will be allowed on final withdrawal.

The quantity of spirits (1,118,931.5 gallons) withdrawn for exportation during the fiscal year ended June 30, 1896, is less than the quantity (1,310,825.3 gallons) so withdrawn during the fiscal year ended June 30, 1895, by 191,893.8 gallons, the decrease being distributed among the different kinds known to the trade as follows:

Decrease in the withdrawals of— Bourbon whisky	Gallons.
Rye whisky	
Rum	175, 329, 2
Pure, neutral, or cologne spirits	29,915.3
Miscellaneous	11, 796. 6
Total decrease	252, 756. 9
Alcohol	•
Gin	
Total increase	60, 863. 1
Net decrease	191, 893. 8

a Includes 7,750,696 gallons stamped for export not actually withdrawn.
b Includes 2,494,091 gallons stamped for export not actually withdrawn.
c Includes 2,216,452.2 gallons transferred to general bonded warehouses and on which leakage will be allowed on final withdrawal.

SPIRITS REMOVED IN BOND FOR EXPORT.

The following statement shows the quantity and percentage of production of distilled spirits removed in bond for export during each fiscal year since the passage of the act of June 6, 1872:

Year.	Taxablo (proof) gal- lons experted.	Percent- age of pro- duction.	Year.	Taxable (proof) gallons. exported.	Percent- age of pro- duction.

INCREASED WITHDRAWALS OF SPIRITS FOR SCIENTIFIC PURPOSES AND USE OF THE UNITED STATES.

The preceding table shows an increase of spirits withdrawn for scientific purposes and for the use of the United States of 8,677.9 gallons over the quantity so withdrawn in the fiscal year ended June 30, 1895, as follows:

Increase in— Rye Alcohol Pure, neutral, or cologne spirits Miscellaneous	7, 669. 6
Total increase Decrease in Bourbon Net increase	183.7

SPIRITS LOST BY FIRE IN WAREHOUSES FOR THE LAST TWENTY-FOUR YEARS.

The following statement shows the quantity of spirits lost in distillery warehouses by fire during each of the last twenty four *calendar* years. As it shows also the stock of spirits in warehouse at the close of each of the *fiscal* years 1872 to 1895, both inclusive, the percentage of loss on stock held may be readily computed.

[Quartities in taxable gallens.]

Year.	In bond June 30.	Total loss.	Year.	In bond June 39.	Total loss.
T872 1873 1874 1875 1876 1877 1878 1878 1879 1880 1881 1882 1883	15, 817, 709 13, 367, 253 12, 984, 896 13, 258, 794 14, 088, 773 19, 212, 470 31, 363, 869 64, 648, 111	28, 309 9, 901 124, 602 81, 493 99, 102 7, 487 29, 913 2, 465 14, 620 198, 251 175, 216 396, 299 416, 609	1885 1856 1887 1888 1889 1890 1890 1891 1892 1893 1893 1895	65, 145, 269 61, 030, 236 68, 569, 288 89, 718, 271 112, 921, 457 127, 596, 339 147, 894, 694 137, 993, 078 136, 402, 552, 1	109, 030 181, 198 112, 722 18, 925 32, 252 1, 160, 769 50, 431 48, 944 1, 975, 766 58, 728. 5 27, 655. 1

[Averagoloss, 755 of 1 per cent.]

The loss during the six months ended June 30, 1896, was 1,570,495.8 gallons, the stock on hand June 30, 1896, being 149,327,121.1 gallons.

There has not yet been any loss of distilled spirits by fire in any special bonded warehouse established under act of March 3, 1877, nor in any general bonded warehouse established under act of August 28, 1894.

STOCK ON HAND, PRODUCTION, AND MOVEMENT OF SPIRITS FOR FIVE YEARS.

The following table shows the stock on hand, production, and movement of spirits, other than fruit brandies, for the fiscal years 1892, 1893, 1894, 1895, and 1896:

Distilled spirits.	1892.	1893.	1894.	1895.	1896.

a This includes 1,426,700.9 gallons in general bonded warehouses and 419,543.2 gallons in transit June 30,1335, between distillery warehouses and general bonded warehouses.
b This includes 1,141,324 gallons added under act of Angust 28, 1894, and 74.6 gallons excess found on regauge at general bonded warehouses.
c This includes 55.5 gallons excess found on regauge at general bonded warehouses.
d This includes 364,329.5 gallons tax paid upon withdrawal from general bonded warehouses.
f This includes 6,242,630.7 gallons withdrawn tax paid from general bonded warehouses.
This includes 1,132.6 gallons withdrawn for general bonded warehouses for export.
g This includes 71,326.9 gallons withdrawn for export from general bonded warehouses.
h This includes 1,192,514 gallons deducted under act of August 28, 1894, 4,591.5 gallons leakage in general bonded warehouses, and 180.5 gallons withdrawn for use of the United States from such warehouses.
This includes 143.038.8 gallons withdrawn from a deather of the United States from such warehouses.

i This includes 143,038.8 gallons withdrawn from or destroyed or lost in general bonded warehouses. k This includes 2,642,832.1 gallons in general bonded warehouses, 153,475.8 gallons in transit between distillery warehouses and general bonded warehouses, and 2,066.4 gallons in transit between general bonded warehouses.

DISTILLED SPIRITS IN THE UNITED STATES OCTOBER 1, 1896.

The quantity of distilled spirits in the United States (except what may be in customs bonded warehouses and in fruit-brandy distilleries) on the 1st day of October, 1896, was 192,111,162.1 gallons, this quantity being distributed as follows:

	Ganons.
In distillery warehouses	141, 242, 027. 9
In special bonded warehouses	2, 008, 013. 3
In general bonded warehouses	2, 641, 011. 4
In transit between distillery warehouses and general bonded warehouses	207, 258. 5
In hands of wholesale liquor dealers	15, 063, 725
In hands of retail liquor dealers	30, 644, 100
· · · · · · · · · · · · · · · · · · ·	
Total	191 806 136 1

In making the above computation the average stock of each retail liquor dealer in the United States is estimated at 150 gallons.

FORTIFICATION OF WINES WITH GRAPE BRANDY FREE OF TAX.

The quantity of grape brandy used in fortifying wines under the act of October 1, 1890, as amended by the act of August 28, 1894, during the year ended June 30, 1895, was 1,047,001.2 tax gallons.

the year ended June 30, 1895, was 1,047,001.2 tax gallons.

The quantity of brandy used and of each kind of wine fortified during the year ended June 30, 1896, in each district is shown in the following table:

First California.		Fourth California.		Fourth North Carolina.

Total	1, 063, 961	651, 762, 390

a This includes 7,500 cigars removed for export in the Twenty-third district of Pennsylvania prior to July 1, 1895, but not so reported until after that date.

Upon comparing the foregoing statements as to manufactured tobacco, cigars, and cigarettes with those for the fiscal year ended June 30, 1895, the increase in 1896 as to cigarettes and the decrease as to tobacco and cigars is found to be as follows:

	Increase.	Decrease.
Tobacco. pounds Cigars number do		821, 007 76 06 314
Cigarettesdo	166, 227, 290	

The increase as to cigarettes continues to be the prominent feature of this class of exportations. The business of exporting cigarettes has grown during the past fourteen years as follows:

NUMBER DURING FISCAL YEAR ENDED JUNE 30.

Year.	Number.	· Year.	Number.	Year.	Number.
1882 1883 1864 1885 1886	68, 413, 560 86, 243, 485 204, 811, 420	1888	180, 769, 800 246, 679, 750 259, 310, 050	1892 1893 1894 1895 1896	397, 827, 260 401, 605, 300 461, 859, 100

OLEOMARGARINE.

The following statements, showing operations under the act of August 2, 1886, defining butter and imposing a tax upon and regulating the manufacture, sale, importation, and expertation of eleomargarine, comprise-

First. A summary of operations at oleomargarine manufactories during the fiscal year ended June 30, 1896; also a summary of operations during the past two fiscal years, and by months covering the period from November 1, 1886, to June 30, 1896.

Second. A statement of the receipts from all classes of taxes imposed

by the oleomargarine law, for the year ended June 30, 1896.

Third. A statement by States and Territories showing the number of establishments for which special tax was paid to carry on during the fiscal year ended June 30, 1896, the business of manufacturing and dealing in eleomargarine; also, in aggregate, of all persons who paid oleomargarine special taxes for the twelve months ended June 30, 1895.

Fourth. A statement of the total production and of total receipts from all oleomargarine sources for each fiscal year since the oleomarga-

rine law took effect.

It appears from the subjoined table that the average monthly production of oleomargarine under the operations of the law has been as follows:

•	Pounds.
During the eight months ended June 30, 1887	2,711,828
During the fiscal year ended June 30—	, ,
1888	
1889	
1890	
1891	3, 699, 367
1892	4,030,346
1893	5, 602, 024
1894	5, 801, 853
1895	4, 746, 508
1896	4, 237, 769
·	. ,

It also appears that the average monthly quantity withdrawn from factories on payment of the tax was as follows:

	•	rounds.
During the eight months ended June 30, 1887		. 2,592,946
During the fiscal year ended June 30—		,
1888		. 2, 707, 430
1889		. 2, 821, 970
1890		. 2,566,494
1891		. 3, 601, 292
1892		. 3, 909, 625
1893		. 5, 371, 989
1894		. 5, 508, 004
1895	·	. 4, 469, 686
1906		3 078 189

The average quantity withdrawn monthly for exportation during the same time is shown to have been as follows:

•	Pounds.
During the eight months ended June 30, 1887.	90.566
During the fiscal year ended June 30—	•
1888	. 140, 516
1889	. 145, 746
1890	
1891	. 102, 426
During the fiscal year ended June 30—	
1892	107, 981
1893	232, 124
1894	. 283, 890
1895	278, 123
1896	258, 850

In the fiscal years 1887 and 1888 the largest production month was March; in the fiscal year 1889, December; in the fiscal year 1890, October; in the fiscal year 1891, March; in the fiscal year 1892, March; in the fiscal year 1893, January; in the fiscal year 1894, October; in the fiscal year 1895, October; while the greatest production during the fiscal year ended June 30, 1896, occurred in October. The quantity produced during these months was as follows:

	Pounds.
In, March, 4887	3, 568, 254
In March, 1888	3, 940, 727
In December, 1888.	4, 181, 317
In October, 1889	4,072,333
In March, 1891	
In March, 1892	5, 916, 871
In January, 1893	7, 824, 657
In October, 1893	9, 318, 006
In October, 1894.	7, 046, 429
In October, 1895	5, 922, 649

The months in which the production fell below 2,000,000 pounds were as follows:

	During the fiscal year ended June 30, 1887:	Pounds.
	May, 1887, produced.	1, 885, 027
`	June, 1887, produced	1, 375, 423
	During the fiscal year ended June 30, 1888.:	
	July, 1887, produced	1, 208, 638
	July, 1887, produced. During the fiscal year ended June 30, 1889:	• •
	June, 1889, produced	1,575,362
	During the fiscal year ended June 30, 1890:

SUGAR BOUNTY.

During the fiscal year ended June 30, 1894, there were received at this office 5,761 applications and a like number of bonds of maple sugar producers.

These applications and bonds were approved and licenses were issued

previous to the repeal of the bounty law, August 28, 1894.

At the date of the repeal of the bounty law, August 28, 1894, certain licensed sugar producers, including 4,539 of the maple sugar producers above mentioned, had completed the production of their sugar and presented their several claims for bounty, and these claims at that date remained unpaid.

These claims were classified as follows:

Claim.	Number of claims.	Amount.
Maple. Beet. Cane Sorghum	91	\$121, 765. 40 86, 780. 72 29, 286. 46 436. 00
Total	4, 572	238, 268. 58

The above claims were distributed throughout the United States in the sugar-producing districts, as follows:

MAPLE-SUGAR CLAIMS.

District.	Number of claims.	Amount involved.
New Hampshire. Third Massachusetts. Fourteenth New York. Twenty-first New York Twenty-ighth New York Twelfth Pennsylvania Twenty third Pennsylvania. Maryland. West Virginia. The act of Congress approved March 2, 1895, entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1896, and for other purposes," appropriated \$238,289.08, to cover the amount of these claims.

These claims were approved by the Commissioner of Internal Revenue and referred to the Auditor for the Treasury Department, and the same were paid under the following provisions of law:

BOUNTY ON SUGAR PRODUCED PREVIOUS TO AUGUST 28, 1894.

Act of March 2, 1895 (28 Stat., 933), entitled "An act making appropriation for sundry civil expenses of the Government for the fiscal year ending June 30, 1896, and for other purposes," provides:

That there shall be paid by the Secretary of the Treasury to those producers and manufacturers of sugar in the United States from maple sap, beets, sorghum, or sugar cane grown or produced within the United States, who complied with the provisions of the bounty law as contained in Schedule E of the tariff act of October first, eighteen hundred and ninety, a bounty of two cents a pound on all sugars testing not less than ninety degrees by the polariscope, and one and three-fourths cents a pound on all sugars testing less than ninety degrees and not less than eighty degrees by the polariscope, manufactured and produced by them previous to the twenty-eighth day of August, eighteen hundred and ninety-four, and upon which no bounty has previously been paid, and for this purpose the sum of two hundred and thirty-eight thousand, two hundred and eighty-nine dollars and eight cents is hereby appropriated, or so much thereof so may be necessary.

BOUNTY ON SUGAR PRODUCED IN THE UNITED STATES IN THE PERIOD COMMENCING AUGUST 28, 1894, AND ENDING JUNE 30, 1895.

The act of March 2, 1895 (28 Stat., 933), provides:

That there shall be paid to those producers who complied with the provisions of the bounty law as contained in Schedule E of the tariff act-of October first, eighteen hundred and ninety, by filing the notice, application for license, and bond therein required, prior to July first, eighteen hundred and ninety-four, and who would have been entitled to receive a license as provided for in said act, a bounty of eight-tenths of a cent per pound on the sugars actually manufactured and produced in the United States testing not less than eighty degrees by the polariscope, from beets, sorghum, or sugar cane grown or produced within the United States during that part of the fiscal year ending June thirtieth, eighteen hundred and ninety-five, comprised in the period commencing August twenty-eighth, eighteen hundred and ninety-four, and ending June thirtieth, eighteen hundred and ninety-five, both days inclusive; and for this purpose the sum of five million dollars, or so much thereof as may be necessary, is hereby appropriated: Provided, That no bounty shall be paid to any person engaged in refining sugars which have been imported into the United States, or produced in the United States, upon which the bounty herein provided has already been paid or applied for.

applied for.

The bounty herein authorized to be paid shall be paid upon the presentation of such proof of manufacture and production as shall be required in each case by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, and under such rules and regulations as shall be prescribed by the Commissioner

of Internal Revenue, with the approval of the Secretary of the Treasury. And for the payment of such bounty the Secretary of the Treasury is authorized to draw warrants on the Treasurer of the United States for such sums as shall be necessary, which sums shall be certified to him by the Commissioner of Internal Revenue, by whom the bounty shall be disbursed, and no bounty shall be allowed or paid to any person as aforesaid upon any quantity of sugar less than fivehundred pounds. * * *

which sums shall be disbursed, and no bounty shall be allowed or paid to any person as aforesaid upon any quantity of sugar less than fivehundred pounds. * * * That any person not entitled to the bounty herein provided for, who shall, with intent to defraud, apply for, or receive the same, shall be guilty of a misdemeanor, and, upon conviction thereof, shall pay a fine not exceeding five thousand dollars, or be imprisoned for a period not exceeding five years, or both, in the discretion of the

court.

Regulations concerning the presentation of claims and payment of bounty under this act were prepared by this office and approved by the Secretary of the Treasury on the 18th day of June, 1895.

These regulations were published and transmitted to the several col-

ectors of internal revenue in the sugar-producing districts.

The office blanks and forms relative to claims and accounts of manufacture and production were also prepared and forwarded to the collectors for the use of sugar producers.

In addition to the foregoing work, the names of persons who had complied with the act of October 1, 1890, were collected, and their

accounts were opened.

The regulations prescribed that all claims should be filed on or before the 1st day of September, 1895, and afterwards this limitation was extended to October 1, 1895.

These claims in the aggregate amounted to \$6,111,505.44, and were classified as follows:

District.	Kind of sugar.	Number of claims.	Amount of production.	Bounty claimed.
Louisiana Third Texas Florida California Nebraska Kansas Utah	dodoBeetdo	13 9 3 1 2	Pounds. 698, 952, 432 15, 476, 585 706, 965 36, 651, 121 5, 635, 975 782, 465 5, 732, 832	\$5, 591, 617. 94 123, 812. 64 5, 655. 72 293, 208. 97 45, 087. 80 6, 259. 72 45, 862. 65
Total		502	763, 938, 375	6, 111, 505. 44

In the course of the examination of these claims in this office, it appeared in a number of cases that the producers were not able to present sufficient proof of production and classification to support their several claims for bounty upon the quantity of sugar covered by their claims, and these claims were reduced to cover the actual production of sugar which tested not less than 80° by the polariscope. In other cases it was ascertained that the producers were entitled to bounty upon a quantity of sugar exceeding the amount covered by their claims, and they were permitted to amend their several claims so as to cover the actual quantity of sugar produced by them which had reached the bounty point.

Of the whole number of claims (502) presented by producers who complied with the provisions of the bounty law, as contained in Schedule E of the tariff act of October 1, 1890, by filing the notice, application for license, and bond therein required prior to July 1, 1894, 493 claims were approved for payment, and these claims were referred with their proper schedules to the Auditor for the Treasury Department for

examination and certification by that officer.

These claims, as approved, aggregate \$6,085,156.66, and this amount

exceeds the appropriation under the act of March 2, 1895, \$1,085,156.66, and the sum of \$5,000,000 appropriated by that act has been prorated among the claimants entitled thereto.

Number and Amount of Claims Approved for Bounty on Sugar, Testing not Less than Eighty Degrees by the Polariscope, Produced in the United States by Licensed Sugar Producers, from Beets, Sorghum, and Sugar Cane During the Bounty Period Commenced August 28, 1894, and ended June 30, 1895.

[Rate of bounty, 0.8.]

District.	Kind of sugar.	Number of claims.	Production.	Amount of approved claims.
Louisiana. Texas, third district Florida California, first district Nebraska Montana Kansas	dododo	13 4 3 1	Pounds. 695, 690, 942 15, 435, 995 697, 375 36, 651, 121 5, 635, 975 5, 786, 932 746, 254	\$5, 565, 527. 48 123, 487. 97 5, 579. 00 293, 208. 97 45, 087. 80 46, 295. 46 5, 970. 03
Total		493	760, 644, 594	6, 085, 156. 66

The following is a statement of the whole number of approved claims and the amount of bounty appropriated, prorated among the claimants:

District.	Number of claims.		Amount of appropriation prorated.	Balance.

INCOME-TAX RETURNS.

In pursuance of a joint resolution of Congress, approved April 6, 1896, providing for the destruction of income-tax returns, copies, statements, and records relative thereto, I delivered, on the 5th of May, 1896, all of said returns, records, and documents filed in this office under the provisions of "An act to reduce taxation," etc., in effect August 28, 1894, to a committee appointed by the honorable Secretary of the Treasury to destroy said records and files. The committee assumed immediate control of said documents, records, and files, and on the date of their delivery totally destroyed the same by burning.

DIVISION OF CHEMISTRY.

The following table shows the number and character of samples examined in the work of the laboratory at Washington, D. C., during the past fiscal year:

Oleomargarine	110
Butter	
Malt liquors	28
Fermented liquors other than malt	13

Distilled liquors Fortified (and sweetened) wines Ink Mucilage Typewriter ribbons Miscellaneous	$\frac{37}{9}$ 12
Total	
Expert testimony in regard to samples was rendered in a number	\mathbf{of}

cases in the District of Columbia courts.

The number of samples of material suspected of being oleomargarine

examined during the year was 176, an increase of 48 over last fiscal year.

The act approved June 6, 1896, defining and taxing "filled cheese," will greatly increase the work of the laboratory. During the two months since it went into operation 31 samples were received for examination under its provisions, of which number 3 proved to be filled cheese.

I have the honor to be, very respectfully,

Jos. S. MILLER, Commissioner.

Hon. John G. CARLISLE, Secretary of the Treasury.

REPORT OF THE DIRECTOR OF THE BUREAU OF ENGRAV. ING AND PRINTING.

TREASURY DEPARTMENT, BUREAU OF ENGRAVING AND PRINTING. October 1, 1896.

SIR: I have the honor to submit the following report of the opera-

tions of this Bureau during the fiscal year 1896:

After paying every obligation for the fiscal year 1896 there remains an unexpended balance to be covered back into the Treasury of \$45,460.68.

During the year there have been purchased permanent additions to the machinery plant aggregating in cost \$20,262. These permanent additions to the plant will last, at a low estimate, ten years, and, therefore, but one-tenth of their cost is properly chargeable to the cost of

the year's work.

In addition to this amount of extraordinary expenses should be added the cost of printing new bonds during the year, amounting to \$13,331.19. While these items all go to swell the cost of the year's work, none of them were considered in making estimates upon which the appropriations were based, and, therefore, really constitute a saving, which, if added to the unexpended balance, the sum thereof would be \$77,027.67.

The average cost per thousand sheets, based upon total expenditures,

during the past four years has been as follows:

1893	\$25, 35	1895	\$20.30
1894	23.73	1896	17.37

This shows a decrease of \$7.98 per thousand sheets since 1893; but to get at the actual cost of the regular work during 1896, we must deduct \$50,786.03 paid on the Columbian Exposition diploma out of a special appropriation, but included in gross expenditures; \$18,235.80, representing nine-tenths of the cost of new machinery; and \$13,331.19, cost of new bonds, from the total expenditures; 25,555 diplomas and 73,004 new bonds from the total number of sheets produced, and we then have total expenditures on regular work \$1,387,006.68, and total number of sheets produced, 84,952,036; showing actual cost per thousand sheets, including postage stamps, to be \$16.32, or \$9.03 decrease since 1893.

The total expenditures for the same four years were as follows:

1893	\$1, 238, 464, 36	1895	\$1, 439, 265. 94
		1896	

The total number of sheets produced was as follows:

	_	•	
1893	48, 853, 528	1895	70, 886, 033
1894	55, 516, 961	1896	85, 050, 595

After applying the same deductions to the foregoing tables, it will be seen that while the work of the Bureau has increased nearly 74 per cent, the expenditures have only increased 11.99 per cent. It is to be expected that as the volume of work increases the proportionate cost would decrease, under ordinary conditions; but it will be apparent also that so vast a decrease in the cost of the work could have been accomplished only by watchful care in the management of the Bureau.

The average number of sheets handled per employee was as follows:

1909	36 650 1	1895	40 67K
1904	40 920	1896	55 001
1094	40, 200	1000	55, 551

This indicates an increased usefulness of the employees of over 52

per cent.

To make a correct comparison between the cost of work done in the year 1893 and 1896, it is proper to deduct the amount paid for postage stamps and the number of sheets of postage stamps delivered, for the reason that in 1893 postage stamps were not printed by this Bureau.

Total expenditures	\$1, 387, 006. 68 153, 581. 62
Balance	1, 233, 425. 06
Total sheets	84, 952, 036 30, 647, 771
Balance	54, 304, 265

These tables show that the cost of the regular work in 1896 was \$22.71 per thousand sheets, or \$2.64 less than the cost of the regular work in 1893. Therefore there has been saved to the Government in the cost of work of 1896, exclusive of postage stamps, as compared with the cost of the work in 1893, \$143,363.56.

It has been claimed that the cost of manufacturing postage stamps in this Bureau exceeded the agreed price between the Treasury and Post-Office Departments, and that excess of expenditures in the manufacture of postage stamps was made up from the regular appropriation of the Bureau, which increased the cost of regular work, exclusive of postage stamps.

The lowest cost per thousand sheets during any year since the foundation of the Bureau, prior to the addition of the postage stamps, was in 1894, when it was \$23.73. A comparison with the cost this year, 1896, exclusive of postage stamps, will show a still further decrease of

\$1.02 to \$22.71.

This statement of facts refutes the above claim as to the excessive cost of manufacturing postage stamps beyond contradiction. The repayments from the Post-Office Department for postage stamps furnished during the year was \$153,581.62. The cost at lowest responsible bidder's price under advertisement of October 16, 1893, would have been \$178,706.10, showing a saving of \$25,124.48.

The actual saving on account of reduced cost of work, therefore, is:

	•			,	
On regular work					\$143, 363, 56
On postage stamps					25, 124, 48
		,	•		
motol					100 100 01

It may not be out of place to record some of the more conspicuous reforms that have taken place in the service since 1893, which have resulted in reducing the cost of the work in this Bureau.

All cigarette stamps were formerly produced by steel plate printing. Changing this mode of printing to that of surface has reduced the cost of production of cigarette stamps during the year \$67,639.26.

A doubling of the forms in the surface branch for a portion of the

year, thus producing twice the subjects with one impression, has

resulted in a saving of \$1,918.76.

A reduction in the rates paid on internal revenue work has resulted in a saving of \$17,249.50 without injustice to the 100 printers doing this work, as they still make an average of \$4.32 per diem, and some of them will average over \$7 per day.

A careful investigation into the material used in the Bureau and the price paid therefor has resulted in a great saving. On one item alone there has been a reduction in cost of \$16,521.10, and the material used

throughout the service is the best that can be purchased.

These changes have not been made at the expense of perfect and efficient work. The issues during this year show that the Bureau has accomplished a standard of work never attained before by this or any other Government.

The new issue of silver certificates of 1896 has now reached the country and received universal commendation. These notes have demonstrated the possibility of fine art being utilized to advantage in the production of bank notes, and result in the most perfect security against counterfeiting. A conservative policy would suggest change in the currency only when it has been imitated by counterfeiters in a manner that is dangerous to commerce. In each of the denominations of silver certificates where changes have been made this condition has existed for some time, and there are many other issues that should be

changed for the same reason.

I am of opinion that the standard established by the recent issues should be maintained. They have been produced by the employment of the best artistic talent in the country, the best engravers, the use of the best material, and the most careful printing that can be done. All of these factors go to make up the greatest difficulties in the production of notes, even in this Bureau, where every facility for the work is furnished. Therefore, if there should be an attempt to counterfeit these notes, the difficulties in the production of a successful counterfeit will be increased tenfold as compared with the regular set forms heretofore used by the Government. I most earnestly recommend that

in all new issues of the Government this policy be continued.

The completion and delivery of the Columbian Exposition diploma has demonstrated the ability of this Bureau to accomplish a quality of engraving and surface printing not surpassed in this country or in The diploma has been received by the exhibitors at the Exposition, representing nearly all the civilized countries of the world, with great satisfaction, and has received the most flattering compliments. In fact, this work is a credit to the Treasury Department. There were 25,555 diplomas printed. An individual award was granted for every exhibit, the text of which was applicable alone to that one diploma. Therefore for every diploma it was necessary to set up a form and print by the surface process in a manner that would harmonize with the beautifully and artistically engraved letters and general design of the This has been so successfully accomplished that many are at a loss to know where the engraved work ends and the surface work begins. The magnitude of this work can only be appreciated by those who were engaged in it.

The deliveries made during the year have been, so far as I have been able to ascertain, entirely satisfactory to every branch of the various Departments for which work is being done. In previous years the Internal Revenue Bureau has complained that this Bureau did not make deliveries of internal revenue stamps in sufficient quantities to

enable a compliance with the statutory requirement of three months' supply in its vaults, and the Commissioner has commented on this in his annual reports. During the year 1896, however, requests were frequently made to reduce the deliveries, for the reason that the vaults of the Internal Revenue Bureau were full and could not take care of the large deliveries from this Bureau. As a matter of fact, this Bureau has met the demands of the Internal Revenue Bureau and been able to go

beyond their requirements.

Engraved steel constitutes the foundation of all the work done by this Bureau, and perfect workmanship by the engravers results not only in better work in all the other branches, but imparts to our securities that intricate quality which renders counterfeiting most difficult. Absolute security from counterfeiting is the great desideratum at which we are striving. Therefore I have attempted, without extravagance, to employ the very best engravers at salaries commensurate with the value of their work in the commercial world. This is the only course that will secure the best engravers to the Government service. Some of the salaries paid may seem high, but there is not a first-class engraver now employed by the Bureau, whether vignette, scroll, or letter, who can not make as much as he is now being paid outside of Government employment, the main incentive for Government employment in this branch being security of payment, leave of absence with pay, fewer hours of work per day, and steadiness of work—factors which are fixed by law.

In each of the annual reports made for several years has appeared a recommendation that the dilapidated frame outbuildings, in which is contained machinery for making ink and for doing the laundry work, be replaced with substantial brick structures, large enough to enable the proper performance of these important branches of the service. I

now repeat that recommendation.

As before stated, the work of this Bureau since 1893 has increased nearly 74 per cent, and the only addition in the way of increased space has been the construction of three additional stories on the old boiler house. This improvement will provide space in the main building for doing the work properly for many years to come without further additions, but the outbuildings are absolutely essential to the successful performance of the branches of the work above mentioned. The laundry is used for cleansing and preparing the rags used by the printers, which will be considered by anyone familiar with the work of printing one of the most important factors in good printing; and probably the proper manufacture of ink is the most important. It is, therefore, poor economy on the part of Congress to refuse an appropriation for these buildings.

It is with some pride that I submit this my annual report for the fiscal year 1896, for the reason that I am convinced the result of the year's work will be satisfactory both to you and to the Congress making future appropriations. Your approval of substantially all of my recommendations convinces me of the continuance of your confidence, the honor of which I fully appreciate, and the successful result demonstrates the wisdom of the policy of keeping the business transacted in charge of the Director of the Bureau, subject to the direct personal approval

of the Secretary.

The financial statement of the year will be found in the Appendix.

Hon. John G. Carlisle, CLAUDE M. Johnson, Director.

Secretary of the Treasury.

APPENDIX.

REPORT OF THE REGISTER.

TREASURY DEPARTMENT, OFFICE OF THE REGISTER, Washington, D. C., October 19, 1896.

SIR: I have the honor to submit the annual report of the business

of this office for the fiscal year ended June 30, 1896.

The Register of the Treasury signs and issues all bonds of the United States, the District of Columbia, the Pacific railroads, the Cherokee Indian lands, the Louisville and Portland Canal Company, and the Spanish indemnity, and transmits to the Treasurer of the United States schedules showing the name of every individual, corporation, etc., holding registered bonds and entitled to receive interest thereon. He signs all transfers conveying money from the United States Treasury to all the United States sub-treasuries and depositories, and all the correspondence of the office. He receives, examines, and registers coupon bonds exchanged for registered bonds, and redeemed and registered bonds transferred and finally redeemed. He receives, examines, arranges, and registers all redeemed United States notes, gold certificates, silver certificates, Treasury notes, detached interest coupons, interest checks on registered bonds, redeemed fractional currency, and all other United States securities redeemed and destroyed; also, all customs, internalrevenue, and postage stamps condemned for imperfections and to be destroyed. He is represented on the committee having in charge the destruction by maceration of certain of the United States securities, etc., mentioned herein. The work is performed in two divisions, as follows:

DIVISION OF LOANS.

The work performed in this division includes all matters in connection with bonds of the United States, the District of Columbia, the Pacific railroads, and an indebtedness of the Government of Spain to certain American citizens, known as the Spanish indemnity, etc.

These duties include—

(a) The receipt of new bonds after their preparation by the Bureau of Engraving and Printing, and the care of same until required for issue.

(b) The issue of coupon and registered bonds upon warrant of the Secretary of the Treasury, or upon certificates showing the payment of accepted subscriptions for loan, together with the record of such issue.

(c) The examination of all assignments of registered bonds as to their

sufficiency and regularity.

(d) The recording of registered bonds which have been canceled upon assignments by the parties or corporations in whose name they have been standing, together with the issue of new bonds in the names of the assignees, with proper entries of such issues.

(e) The recording of redeemed coupon and registered bonds.

(f) The examination of all papers submitted to show the authority of the representatives of corporations, of the estates of decedents, and of persons under legal disability; also papers presented as proof of succession where bonds are held in a fiduciary capacity. These papers

refer to parties or corporations both in the United States and in foreign countries.

(g) The keeping of ledger accounts with every individual, corporation,

or other holder of registered bonds.

(h) The keeping of general accounts showing all changes in the amounts of each loan, and the preparation of summary statements of transactions in connection therewith.

(i) The preparation of quarterly, semi-annual, and annual schedules on various loans, for the payment of interest by the Treasurer of the United States. This includes the preparation of copy for the printer, examination of proof, and footing of the schedules.

(j) The filing, arrangement, and custody of the various books, records, bonds, and papers connected with the business of the division.

(k) Preparing a consolidated index to all registered bonds issued since 1836.

(1) The completion of the work assigned by the Department order constituting a commission "to prepare a history of interest, discounts, premiums, and expenses of the public loans."

NOTE.—Much of the detailed tabular matter contained in the Register's report is omitted from this compilation.

The following tables summarize some of the principal items of the work performed in this division:

STATEMENT OF WORK PERFORMED BY DIVISION OF LOANS DURING THE YEAR ENDED JUNE 30, 1896.

A CONDENSED HISTORY OF ALL THE LOANS OF THE UNITED STATES, FROM 1776 TO JUNE 30, 1896.

The following condensed history of all the loans of the Government from 1789 to June 30, 1896, inclusive, is submitted as supplemental to the statements of "Interest on the public debt," "Expenses of the national loan," and "Refunding the national debt," published in the annual report of the Register for the fiscal year 1894, and to premium and discount realized on the sale or purchase of the several loans, and profit derived from the same from various sources; discount sustained on the issue, premium paid on the purchase, and commission paid, etc., published in the annual report of the Register for the fiscal year 1895. While, however, those statements cover a period only from January 1, 1835 to June 30, 1885, inclusive, the figures in the present exhibits include all transactions from the latter date to June 30, 1896, inclusive, thus extending sixteen years beyond the final limit of Bayley's National Loans of the United States, of which the present work may be regarded as a condensation and continuation. Several inaccuracies occurring (no doubt inadvertently) in his book have been corrected, and here also will be found much valuable information, including, as far as possible, "a copy of each obligation issued by the Government since March 4, 1789," etc., appended to the respective loans and not contained in said book.

Owing to the burning of the Treasury building by the British troops on August 24, 1814, a large number of accounts and records were destroyed, and it has been found impossible to determine by loans the amount of interest paid by the Government, and the premium, discount, etc., pertaining to the earlier issues.

The following tables show in condensed form the amounts of profits and losses on account of the national loans from 1789 to June 30, 1896,

inclusive:

PROFIT.

•	

In the foregoing statement there is not included, of course, any expenditures out of the many appropriations made before the beginning of the account of the "Expenses of the national loan" in 1862

¹For the reason heretofore given it was found impossible to ascertain the amount of premium realized, etc., in connection with the earlier loans.

for paying the expenses, etc., of the leans anterior to that time. accounts should all be analyzed, and the entire information, when collected, should, as a matter of the highest interest and value, be published in durable book form.

LOAN FROM FARMERS-GENERAL OF FRANCE. (RESOLUTION OF DECEMBER 23, 1776.)

Length of loan, indefinite; redeemable as per contract; amount authorized, \$10,000,000; amount issued, \$181,500; sold at par; interest, 5 per cent, payable annually; first issue (receipt of money, 1,000,000 livres, \$181,500), June 4, 1777; final redemption, December 31, 1793.

This was the first loan negotiated by the Continental Congress, and was for the purpose of purchasing supplies and to aid in building cruisers to prosecute the war of the Revolution. As per contract, the payments were made in tobacco. The interest on \$153,688.89, the balance of this loan, ceased December 31, 1793, when it was merged into the general account of the French debt; this date is therefore given as that of its final redemption.

FRENCH LOAN OF EIGHTEEN MILLION LIVRES. (RESOLUTION OF DECEMBER 3, 1777.)

Length of loan, indefinite; redeemable as per contract; amount authorized, \$10,000,000; amount issued, \$3,267,000; sold at par; interest, 5 per cent, payable annually; first issue, first calendar quarter of 1778; final redemption, December 31, 1795.

This loan was, like the other, also for carrying on the war. By contract it was to be repaid in twelve annual payments of 1,500,000 livres each, to commence from the third year after the conclusion of peace, the whole arrears of interest up to the date of the treaty of same (September 3, 1783), amount undetermined, being, by favor of the King of France, remitted. A balance of \$759,900 due at the date of the last payment above, viz, December 31, 1795, was redeemed by an exchange of 54 per cent stock, issued under the act of March 3, 1795.

LOAN FROM SPAIN IN 1781, PER INSTRUCTIONS OF SEPTEMBER 28, 1779, TO JOHN JAY, MINISTER TO SPAIN.

Length of loan, indefinite; redeemable as per contract; amount authorized, \$5,000,000; amount issued, \$174,017 $\frac{12}{90}$; sold at par; interest, 5 per cent, payable annually; first issue, first calendar quarter of

1781; final redemption, August 21, 1793.

This loan was likewise for continuing the war. In the account of issues the dollar is divided into 90 parts, and each 90th is subdivided into 68 parts, in conformity with the method of computation at the time the loan was made. In the Receipts and Expenditures for 1793 the principal is stated at \$174,011, and the interest to December 31, 1790, at \$76,371.50. The difference, $6\frac{13}{90}$, appears, in the final adjustment, to belong to principal instead of interest. (Journal O. G., p. 3065.)

FRENCH LOAN OF 10,000,000 LIVRES. (RESOLUTION OF OCTOBER 26, 1779.)

Length of loan, fifteen years; redeemable in ten annual installments, from November 5, 1787; amount authorized, \$1,815,000; amount issued, \$1,815,000; sold at par; interest, 4 per cent; payable annually; first issue, November 5, 1781; final redemption, December 31, 1795.

This loan was for procuring supplies for the almost naked and starving Revolutionary Army. The money, though borrowed in Holland, was obtained only on the credit of France, and became a debt to that country; the King "having been pleased to charge himself with the expense of commissioners and bank for the loan." When the money was received 5,000,000 livres was paid into the French treasury on account of supplies furnished, leaving a balance due France for same of \$24,332.86. A balance of this loan of \$176,000, due at the date of the last payment given above, was redeemed by an exchange of 4½ per cent stock issued under the act of March 3, 1795.

HOLLAND LOAN OF 1782. (RESOLUTION OF OCTOBER 26, 1779, RATIFIED SEPTEMBER 14, 1782.)

Length of loan, ten to fifteen years; redeemable in five equal installments, annually, from 1793 to 1797; amount authorized, \$10,000,000; amount issued, \$2,000,000; sold at par; interest, 5 per cent, payable annually; first issue, second calendar quarter of 1782; final redemption,

fourth calendar quarter of 1797.

This loan, like the others, was for the furtherance of the war, the necessities and stress of circumstances at the time being exceedingly great. The united firms in Holland, through whom this money was raised, were allowed 4½ per cent to cover all charges, except 1 per cent further allowed on the annual interest received and paid by them. The negotiations for this loan, which commenced in 1780, were attended with the greatest difficulty, and it was not until Mr. John Adams had been recognized as minister that his efforts to obtain it proved successful.

FRENCH LOAN OF SIX MILLION LIVRES. (RESOLUTION OF SEPTEMBER 14, 1782.)

Length of loan, thirteen years; redeemable originally, in six annual installments, from January 1, 1785; amount authorized, \$4,000,000; amount issued, \$1,089,900; sold at par; interest, 5 per cent, payable annually; first issue, first calendar quarter of 1783; final redemption, December 31, 1795.

This loan was to be applied toward defraying the expenses which might be incurred, and of those which had been incurred during 1782, for carrying on the war. The loan was not repaid as per contract. It remained unpaid until 1795, when it was redeemed by an exchange of

5½ per cent stock, issued under the act of March 3, 1795.

HOLLAND LOAN OF 1784. (RESOLUTION OF OCTOBER 26, 1779, RATIFIED FEBRUARY 1, 1785.)

Length of loan, seventeen years, redeemable by annual payments thereafter, within six years; amount authorized, \$10,000,000; amount issued, \$800,000 (+\$276,000 "obligations" distributed by lottery as a bonus on the loan, besides which \$80,720 "gratifications" were allowed on the original certificates); sold at par; (Bayley, considering "bonuses," "gratifications," etc., says, "sold at 6.65 per cent"); interest, 4 per cent, payable annually; first issue, first calendar quarter of 1784; final redemption, first calendar quarter of 1807.

This loan was needed to save the credit of the United States, already endangered by the fact that drafts for nearly 1,300,000 guilders in excess of the amount already raised in Holland had been drawn by the Superintendent of Finance, part of which had already reached Europe. The united firms were to receive on this loan, as on the loan of 1782, a commission of $4\frac{1}{2}$ per cent to cover all expenses. The sum of interest at 4 per cent, and of the "obligations" and "gratifications" paid, would not be quite equivalent to $6\frac{2}{4}$ per cent annual interest on the original certificates for the time the loan ran.

DEBT DUE FOREIGN OFFICERS. (RESOLUTION OF JANUARY 22, 1784, ACT OF MAY 8, 1792.)

Length of loan, indefinite; redeemable as per contract; amount authorized, indefinite; amount issued, \$186,998.78; sold at par; interest, 6 per cent, payable annually; first issue, April 5, 1784 (interest to run from January 1); final redemption, fourth calendar quarter of 1828.

The certificates under this loan were issued as substitutes for others issued in 1782 for balances due to foreign officers for services during the war, a part of their demands having at that time been paid in cash, the said certificates, like all paper of the Continental Congress, being greatly depreciated in value. In 1803 the larger portion had been reimbursed.

HOLLAND LOAN OF 1787. (RESOLUTION OF OCTOBER 26, 1779, RATIFIED OCTOBER 11, 1787.)

Length of loan, ten to fifteen years; redeemable in five equal installments, annually, from June 1, 1798; amount authorized, \$10,000,000; amount issued, \$400,000; sold at par; interest, 5 per cent, payable annually; first issue, second calendar quarter of 1787; final redemption, second calendar quarter of 1802.

This loan was rendered necessary in order to raise money with which to pay the interest on the loans previously contracted in Holland in 1782 and 1784. The interest which had before fallen due, had been paid partly by remittances from America and partly by some portions of the amount raised on the original loans.

HOLLAND LOAN OF 1788. (RESOLUTION OF OCTOBER 26, 1779, RATIFIED JULY 2, 1788.)

Length of loan, ten to fifteen years; redeemable in five equal installments, annually, from June 1, 1799; amount authorized, \$10,000,000; amount issued, \$400,000; sold at par; interest, 5 per cent, payable annually; first issue, first calendar quarter of 1789; final redemption,

second calendar quarter of 1803.

This loan was negotiated to meet the expenses of the United States in Europe and to afford a financial basis on which to start the new Government at home. As the Continental Congress was utterly without funds to turn over to its successor, money had to be provided in some way. Thomas Jefferson, who was then minister of the United States at the Court of Versailles, with Mr. John Adams, then about to return to America, conducted the negotiations. The amount of expenses, etc., paid by the United States does not appear.

TEMPORARY LOAN OF 1789. (ON THE AUTHORITY OF THE SECRETARY OF THE TREASURY.)

Length of loan, temporary; redeemable as per contract; amount issued, \$191,608.81; sold at par; interest, 6 per cent, payable as per contract; first issue, September 13, 1789; final redemption, June 8, 1790.

This is believed to be the only loan ever negotiated by the Treasury Department without authority of law. On assuming the position of Secretary, Mr. Hamilton found himself entirely without funds to meet the ordinary expenses incurred at the beginning of the present form of government (April 30, 1789), except by borrowing, until the revenues from duties on imports and tonnage (out of which the loan was to be repaid) began to come into the Treasury. The money was obtained from the Bank of New York and the Bank of North America. The Secretary said: "Obvious considerations dictate the propriety, in future cases, of making previous provision by law for such loans as the public exigencies may call for, defining their extent, and giving special authority to make them."

TEMPORARY LOAN OF 1790. (ACT OF MARCH 26, 1790.)

Length of loan, indefinite; redeemable as per contract; amount authorized, indefinite; amount issued, \$55,000; sold at par; interest, 6 per cent, payable on redemption ("maturity"); first issue, first calendar

quarter of 1790; final redemption, May 22, 1790.

This loan was negotiated by authority of the President (George Washington), he having by section 7 of the above act been authorized to empower the Secretary of the Treasury to make such loans as might be requisite to carry into effect the appropriations made by the act. The contract for the loan provided for its repayment upon similar terms as the preceding loan from the Bank of New York, the revenues derived from duties on imports and tonnage being pledged for its redemption. The money was needed for the compensation of the members and employees of Congress, the payment of the salaries of the civil list, etc., and of arrears of interest on the Dutch loans.

There was in the Treasury at the time a sum not exceeding \$50,000.

HOLLAND LOAN OF 1790. (ACTS OF AUGUST 4 AND 12, 1790, SECTIONS 2 AND 4, RESPECTIVELY.)

Length of loan, ten to fifteen years; redeemable by lot, in five equal annual installments from February 1, 1800; amount authorized, \$14,000,000; amount issued, \$1,200,000; sold at par; (Bayley, considering commission and expenses, says "sold at 95½ per cent"); interest, 5 per cent, payable annually; first issue, first calendar quarter of 1790;

final redemption, first calendar quarter of 1804.

The act of August 4, 1790, authorized a loan of not exceeding \$12,000,000, to be applied to paying, in whole or in part, the foreign debt of the United States. The act of August 12, 1790, authorized a loan of not exceeding \$2,000,000, to be applied to the purchase of the debt of the United States; rate of interest, in the first instance not limited, in the second not to exceed 5 per cent. The charges for commission and expenses were fixed by contract at 4½ per cent on the principal.

SIX PER CENT, THREE PER CENT, AND DEFERRED SIX PER CENT STOCKS OF 1790. (ACT OF AUGUST 4, 1790, SECTIONS 3, 4, 13, AND 15.)

Length of loans, indefinite; redeemable by payments not to exceed 8 per cent per annum; amount authorized, indefinite; amount issued, of 6 per cents, \$30,088,397.75, of 3 per cents, \$19,719,237.39, of deferred 6 per cents, \$14,649,328.76; total, \$64,456,963.90; sold at par; interest, 6 and 3 per cent, payable quarterly; first issue, 6 per cents, January 1,1791; 3 and deferred 6 per cents, January 1,1800. Amount outstanding June 30, 1896, \$27,869.77, \$13,953.13, and \$13,934.90, respectively; total, \$55,757.80.

These loans provided for the funding of the domestic debt. Subscriptions were to consist of the certificates issued under the authority of the Continental Congress, and by the respective States; the same to be received at rates scaled greatly below their face value. The amount outstanding is included in the Finance Report under the title

of "Old Debt."

COPY OF OBLIGATION.

Six per cent stock of 1790.

(No. —) United States Loan Office, State of —, —, 17—

Be it known, that there is due from the United States of America unto —— or —— assigns, the sum of ———, bearing interest at six per cent per annum, from the first day of January, 1791, inclusively, payable quarter-yearly, and subject to redemption by payments, not exceeding in one year, on account both of principal

and interest, the proportion of Eight Dollars upon a Hundred of the stock bearing interest at six per cent; created by virtue of an act, making provision for the debt of the United States, passed on the fourth day of August, 1790, which debt is recorded in this office, and is transferable only by appearance in person, or by attorney, at the proper office, according to the rules and forms instituted for that purpose.

--- Dollars.

HOLLAND LOAN OF MARCH, 1791. (ACTS OF AUGUST 4 AND 12, 1790, SECTIONS 2 AND 4, RESPECTIVELY.)

Length of loan, eleven to sixteen years; redeemable by lot, in five equal annual installments, from 1802; amount authorized, \$14,000,000; amount issued, \$1,000,000; sold at par (Bayley, considering commission and expenses, says, "sold at 96 per cent"); interest, 5 per cent, payable annually; first issue (entire amount), February 15, 1791; final

redemption, first calendar quarter of 1805.

The act of August 4, 1790, authorized a loan of not exceeding \$12,000,000, to be applied to paying in whole or in part the foreign debt of the United States; rate of interest not limited. The act of August 12, 1790, authorized a loan of not exceeding \$2,000,000, at not exceeding 5 per cent interest, to be applied to the purchase of the debt of the United States. The charges for commission and expenses were fixed by contract at 4 per cent on the principal.

HOLLAND LOAN OF SEPTEMBER. 1731. (ACTS OF AUGUST 4 AND 12, 1790, SECTIONS 2 AND 4, RESPECTIVELY.)

Length of loan, eleven to sixteen years; redeemable in five equal annual installments, from 1802; amount authorized, \$14,000,000; amount issued, \$2,400,000; sold at par (Bayley, considering commission and expenses, says, "sold at 96 per cent"); interest, 5 per cent, payable annually; first issue, third calendar quarter of 1791; final redemption, first calendar quarter of 1805.

Details the same as for the foregoing loan. Charges for commission, etc., the same, viz: 4 per cent on the principal.

HOLLAND LOAN OF DECEMBER, 1791. (ACTS OF AUGUST 4 AND 12, 1790, SECTIONS 2

AND 4, RESPECTIVELY.)

Length of loan, twelve to sixteen years; redeemable in five equal annual installments, from 1802; amount authorized, \$14,000,000; amount issued, \$1,200,000; sold at par (Bayley, considering commission and expenses, says, "sold at 94½ per cent"); interest, 4 per cent, payable annually; first issue, fourth calendar quarter of 1791; final redemption, first calender quarter of 1807.

Details the same as for the two foregoing loans, with the exception that the charges for commission and expenses were fixed at 5½ per cent

on the principal.

ANTWERP LOAN OF 1791. (ACTS OF AUGUST 4 AND 12, 1790, SECTIONS 2 AND 4, RESPECTIVELY.)

Length of loan, eleven to fourteen years; redeemable by lot, in five equal annual installments, from 1802; amount authorized, \$14,000,000; amount issued, \$820,000; sold at par (Bayley, considering commission and expenses, says, "sold at 96 per cent"); interest, 4½ per cent, payable annually; first issue, fourth calendar quarter of 1791; final redemption, fourth calendar quarter of 1805.

Details the same as for the three foregoing loans. The charges for commission and expenses were fixed at 4 per cent on the principal. The money obtained was remitted to France for the purpose of paying installments due on the debt to the Government of that country.

SUBSCRIPTION LOAN OF 1791. (ACT OF FEBRUARY 25, 1791.)

Length of loan, ten years or less; redeemable in ten years by equal annual installments, or sooner in greater proportions, at the option of the Government; amount authorized, \$2,000,000; amount issued, \$2,000,000; sold at par; interest, 6 per cent, payable semi-annually;

first issue, June 25, 1792; final redemption, December 31, 1801.

The act (which created the "Bank of the United States") authorized the making of a subscription of \$2,000,000 to the capital stock of said bank, the same to be paid out of the money which should be borrowed by virtue of the acts of August 4 and 12, 1790, and also authorized the borrowing from the bank of an equal sum, to be applied to the purposes for which the said money was procured. "The interest on \$1,000,000 commenced December 20, 1791, and upon the remaining \$1,000,000 July 1, 1792." The Government, through receipts from dividends averaging about \$\frac{3}{2}\$ per cent, and sale of stock, 2,220 shares of which sold in 1802 at an advance of 45 per cent, realized a net profit of \$573,580, or nearly 28.7 per cent on this transaction. The gross profit was \$1,773,580, and the interest for ten years \$1,200,000.

TEMPORARY LOAN FROM THE BANK OF NORTH AMERICA. (ACT OF MARCH 3, 1791.)

Length of loan, indefinite; redeemable as per contract; amount authorized, \$312,686.20; amount issued, \$156,695.56; sold at par; interest, none; first issue, fourth calendar quarter of 1792; final redemption, December 21, 1793.

This loan was designed to defray the expenses of "raising and adding another regiment to the military establishment, and for making further provision for the protection of the frontiers." The money was obtained as advances from the bank by leaving on deposit therewith,

as an offset, the sum of \$177,998.08, arising from the proceeds of foreign bills. The amount of the loan was by this act to be repaid out of the moneys which, prior to the 1st of January following, should arise from the duties upon spirits distilled and upon stills within the United States, the faith of the same being pledged to make good any deficiency.

HOLLAND LOAN OF 1792. (ACTS OF AUGUST 4 AND 12, 1790, SECTIONS 2 AND 4, RESPECTIVELY.)

Length of loan, eleven to fifteen years; redeemable in five annual installments, from 1803 to 1807; amount authorized, \$14,000,000; amount issued, \$1,800,000; sold at par; (Bayley, considering commission and expenses, says, "sold at 96 per cent"); interest, 4 per cent, payable annually; first issue, second calendar quarter of 1792; final redemp-

tion, second calendar quarter of 1807.

Object of the loan, the purchase of the debt (domestic) of the United States at its market price, not exceeding par. The charges for commission and expenses were paid by contract, at 4 per cent on the principal, with an additional charge of 1 per cent on the interest received and paid. Bayley says (page 26 of his book), "The commissions and charges amounted to 5 per cent, with an additional charge of 1 per cent on the interest received and paid." And on page 106 he says, "The charges for negotiating the loan were fixed by contract at 5 per cent on the principal."

TEMPORARY LOAN OF 1792. (ACT OF MAY 2, 1792.)

Length of loan, indefinite; redeemable at the pleasure of the Government; amount authorized, \$523,500; amount issued, \$400,000; sold at par; interest, 5 per cent, payable semi-annually; first issue, second

calendar quarter of 1792; final redemption, December 31, 1796.

The money derived from this loan was to be applied toward carrying into execution the "Act of March 3,1791 making further and more effectual provision for the protection of the frontiers of the United States." The interest accruing to January 1, 1793, was made payable on that day; and thereafter on July 1 and January 1 of each year. The duties on certain articles were increased to provide for the repayment of this loan.

HOLLAND LOAN OF 1793. (ACTS OF AUGUST 4 AND 12, 1790, SECTIONS 2 AND 4, RESPECTIVELY.)

Length of loan, ten years; redeemable in 1803; amount authorized, \$14,000,000; amount issued, \$400,000; sold at par; (Bayley, considering commission and expenses, says, "sold at 96½ per cent"); interest, 5 per cent, payable annually; first issue, second calendar quarter of 1793;

final redemption, second calendar quarter of 1803.

This money was needed to meet the first installment due on the loan of 5,000,000 guilders obtained in Holland by the Continental Congress in 1782. The bankers of the United States in Holland either furnished the money themselves, or obtained from the holders of the stock a reloan or continuation of the amount for ten years, at the same rate of interest. The commission and expenses were fixed by contract at 3½ per cent on the principal.

TEMPORARY LOAN OF 1793. (ACT OF FEBRUARY 28, 1793.)

Length of loan, indefinite; redeemable at the pleasure of the Government; amount authorized, \$800,000; amount issued, \$800,000; sold at par; interest, 5 per cent, payable semi-annually; first issue, June 1, 1793; final redemption, June 11, 1794.

This loan was rendered necessary on account of the increased expenditures attendant on Indian troubles, the large amount needed for the payments of interest on the public debt, and the growing demands for current expenses. The redemption was charged to the surplus of the duties on imports and tonnage at the end of the year 1793. The interest on this loan commenced June 1, 1793.

HOLLAND LOAN OF 1794. (ACTS OF AUGUST 4 AND 12, 1790, SECTIONS 2 AND 4, RESPECTIVELY.)

Length of loan, eleven to sixteen years; redeemable in five equal annual installments, from 1805 to 1809; amount authorized, \$14,000,000; amount issued, \$1,200,000; sold at par; (Bayley, considering commission and expenses, says, "sold at 96 per cent"); interest, 5 per cent, payable annually; first issue, August 31, 1794; final redemption, second

calendar quarter of 1809.

The money raised through this loan was needed to pay installments and interest due on the foreign debt, and to make purchases of the domestic debt, under the acts of August 12, 1790 and May 8, 1792, constituting effectually a sinking fund. The charges for commission and expenses were fixed by contract at 4 per cent on the principal. This was the last of the Holland loans. They, with the Antwerp loan of \$820,000, amounted to \$13,000,000, of which \$3,600,000 was borrowed under authority of the Continental Congress, per resolution of October 26, 1779, and \$9,400,000 by the new Government, under the acts of August 4 and 12, 1790, sections 2 and 4, respectively. Of the \$9,400,000, over \$3,000,000 was used in buying up the domestic debt, under the operations of the sinking fund, the balance in paying the debt due Spain, debt due foreign officers, and a large portion in paying a part of the debt due France.

TEMPORARY LOAN OF MARCH, 1794. (ACT OF MARCH 20, 1794.,

Length of loan, indefinite; redeemable at the pleasure of the Government; amount authorized, \$1,000,000; amount issued, \$1,000,000; sold at par; interest, 5 per cent, payable semi-annually; first issue, second calendar quarter of 1794; final redemption, January 1, 1795.

The money from this loan was to be applied to such public purposes as were authorized by law, and was to be repaid out of the duties on imports and tonnage to the end of the year 1794. The loan was obtained from the Bank of the United States. It commenced to bear interest as follows: April 1 on \$400,000; May 1 on \$200,000; June 1 on \$200,000, and July 1 on \$200,000.

TEMPORARY LOAN FROM THE BANK OF NEW YORK. (ACT OF MARCH 20, 1794.)

Length of loan, indefinite; redeemable as per contract, June 8, 1796; amount authorized, \$1,000,000; amount issued, \$200,000; sold at par; interest, 5 per cent, payable semi-annually; first issue, fourth calendar

quarter of 1794; final redemption, October 29, 1796.

The purpose of this loan was to provide against any deficiencies in moneys appropriated by the same act for defraying any expenses incurred in the intercourse with foreign nations (especially pending the Algerine difficulties); an account of expenditures wherefor as soon as might be, was to be laid before Congress. The interest commenced October 8, 1794.

TEMPORARY LOAN OF JUNE, 1794. (ACT OF JUNE 9, 1794).

Eength of loan, indefinite; redeemable within one year; amount authorized, \$1,000,000; amount issued, \$1,000,000; sold at par; interest, 5 per cent, payable semi-annually; first issue, August 27, 1794; final

redemption, April 1, 1795.

This loan was to enable the President to carry into effect the law of March 27, 1794, providing a naval armament for the protection of American commerce against the Algerines. The payments of interest and the redemption were to be charged to the revenues to be provided during that session of Congress. The loan was obtained from the Bank of the United States.

TEMPORARY LOAN OF DECEMBER; 1794. (ACT: OF DECEMBER 18, 1794.);

Length of loan, indefinite; redeemable as per contract, equally January 1 and April 1,1795; amount authorized, \$2,000,000; amount issued, \$2,000,000; sold at par; interest, 5 per cent, payable semi-annually; first issue, fourth calendar quarter of 1794; final redemption, September 27, 1805.

This loan was obtained from the Bank of the United States. The money was to be applied to such public purposes as were authorized by law, and repaid out of the duties on imports and tonnage for the year 1795, as follows, \$1,000,000 on January I and \$1,000,000 on April 1,1796; but the time for redemption was by mutual agreement extended. Interest commenced on the respective amounts January I and April I, 1795.

TEMPORARY LOAN OF FEBRUARY, 1795. (ACT OF FEBRUARY 21, 1795.)

Length of loan, indefinite; redeemable as per contract, in four equal installments, December 31, 1796, 1797, 1798, and 1799; amount authorized, \$800,000; amount issued, \$800,000; sold at par; interest, 6 per cent, payable quarterly; first issue, first calendar quarter of 1795; final

redemption, October 17, 1803.

This loan, which was also precured from the Bank of the United States, was to be applied to the purposes set forth in the act of July 1, 1790, as amended by the act of February 9, 1793, and the act of March 20, 1794, "providing the means of intercourse between," and "making further provision for the expenses attending the intercourse of the United States and foreign nations," more immediately, toward procuring the release of American citizens held as prisoners in Algiers. The redemption was charged upon the revenue from certain duties specified in the act of February 21, 1795. The interest began January 1, 1795.

TEMPORARY LOAN OF MARCH, 1795, "A." (ACT OF MARCH 3, 1795, SECTION 1.)

Length of Ioan, one year; nedeemable January 1, 1797, or sooner, on one month's notice; amount authorized, \$1,000,000; amount issued, \$500,000; sold at par; interest, 6 per cent, payable semi annually; first issue, fourth calendar quarter of £795; final redemption, September 27, £805.

The authority for this lean was "An act making further provision for the support of public credit and for the redemption of the public debt." It empowered the commissioners of the sinking fund, with the approbation of the President of the United States, to make discretionary loans, not exceeding in one year \$1,000,000, payable within the

same time, to be applied to the payments of interest on the public debt. The redemption was charged to sundry revenues from duties specified, of which these loans were hypothecations. The time for the redemption of this loan, over one year, was extended by mutual agreement. Interest commenced January 1, 1796. This loan, too, was obtained from the Bank of the United States.

TEMPORARY LOAN OF MARCH, 1795, "B." (ACT OF MARCH 3, 1795, SECTION 6.)

Length of loan, indefinite; redeemable as per contract, by December 31, 1797; amount authorized, \$1,469,439.29; amount issued, \$500,000; sold at par; interest, 6 per cent, payable semi-annually; first issue, second calendar quarter of 1795; final redemption, June 30, 1802.

This loan was also precured from the Bank of the United States. It was authorized by "an act making further appropriations for the military and naval establishments, and for the support of Government," and was to be applied to the appropriations made for those purposes. Its redemption was charged to specific revenues (part in anticipation) named in section 5 of the aforesaid act. The interest commenced April I, 1795.

TEMPORARY LOAN OF MARCH, 1795, "C." (ACT OF MARCH 3, 1795, SECTION 6.)

Length of loan, indefinite; redeemable as per contract; amount authorized, \$1,469,439.29; amount issued, \$500,000; sold at par; interest, 6 per cent, payable semi-annually; first soue, third calendar quartest, 1770.000

ter of 1795; final redemption, October 17, 1803.

This loan might be termed a second section of the one preceding, it being negotiated under the authority of the same act, and, like it, was obtained from the Bank of the United States. It was rendered necessary because it was deemed "that the product of the ordinary revenues will be inadequate to the demands of the current service and the reimbursement of" sundry of the earlier loans about to fall due, etc. The interest commenced October 1, 1795.

FOUR-AND-ONE-HALF PER CENT STOCK OF 1795. (ACT OF MARCH 3, 1795, SECTION 2.)

Length of loan, indefinite; redeemable at the pleasure of the Government; amount authorized, total of foreign debt; amount issued, \$176,000; sold at par; interest, 4½ per cent, payable quarterly; first issue, second calendar quarter of 1795; final redemption, September 30, 1808.

The "act making further provision for the support of the public credit," etc., authorized the opening of a loan to the full amount of the foreign debt, for which it was exchangeable and which it was intended to replace, with interest one half per cent in excess of the rate borne by such debt. The interest and redemption were charged to certain revenues from duties specified in the act. This stock was issued in paying the balance due on the French loan of 10,000,000 livres. It commenced to bear interest from January 1, 1796.

FIVE-AND-ONE-HALF PER CENT STOCK OF 1795. (ACT OF MARCH 3, 1795, SECTION 2.)

Length of loan, time redeemable, amount authorized, same as foregoing; amount issued, \$1,848,900; sold at par; interest, 5½ per cent, payable quarterly; first issue, second calendar quarter of 1795; final redemption, March 31, 1815.

The act, authorization and provisions the same as for the preceding The stock was issued in paying the balance due on the French loans of 18,000,000 and 6,000,000 livres. It commenced to bear interest January 1, 1796.

COPY OF OBLIGATION.

Five and one-half per cent stock of 1795.

Four Thousand Dollars. (No. ---)

TREASURY OF THE UNITED STATES, REGISTER'S OFFICE,

Be it known that there is due from the United States of America unto . assigns, the sum of Four Thousand Dollars bearing interest at five and an half per centum per annum from the first day of ——, inclusively; payable quarter-yearly, and subject to redemption by the payment of said sum, whenever provision shall be made therefor by law; which debt is recorded in this office, and is transferable only by appearance in person or by attorney at the proper office, according to the rules and forms instituted for that purpose.

Register.

TEMPORARY LOAN FROM THE BANK OF NEW YORK. (ACT OF MAY 31, 1796.)

Length of loan, one year; redeemable as per contract; amount authorized, \$5,000,000; amount issued, \$320,000; sold at par; interest, 6 per cent, payable semi-annually; first issue, third calendar quarter of 1796; final redemption, November 14, 1797.

The amount authorized by the act named was to be applied to the payment of the principal of the public debt. The repayment was charged to certain specified revenues. Of this loan, the larger portion was really merely a continuation of that of 1794 from the same bank. The \$120,000 remainder was applied in part payment of the loan obtained from the Bank of the United States in 1792. The interest commenced July 1, 1796.

SIX PER CENT STOCK OF 1796. (ACT OF MAY 31, 1796.)

Length of loan, twenty-two years; redeemable after December 31, 1819; amount authorized, \$5,000,000; amount issued, \$80,000; sold at 87½ per cent; interest, 6 per cent, payable quarterly; first issue, fourth

calendar quarter of 1797; final redemption, July 2, 1822.

The act given for this and the preceding loan provided "That it shall be lawful for the commissioners of the sinking fund, with the approbation of the President of the United States, to borrow or cause to be borrowed, on the credit of the United States, any sum not exceeding five millions of dollars, to be applied to the payment of the capital, or principal, of any parts of the debt of the United States now due, or to become due, during the present year, to the Bank of the United States, or to the Bank of New York, or for any installment of foreign debt." The stock provided for was sold through the Bank of New York to the New York Insurance Company. The discount on the sale was \$10,000.

NAVY SIX PER CENT STOCK. (ACT OF JUNE 30, 1798.)

Length of loan, indefinite; redeemable at the will of Congress; amount authorized, limited to cost of certain vessels; amount issued, \$711,700; sold at par; interest, 6 per cent, payable quarterly; first issue, third calendar quarter of 1798; outstanding June 30, 1896, \$100; included in the Finance Report under the title of "Old Debt."

In contemplation of the difficulties with France, this loan was to provide for the purchase of not exceeding twelve vessels for naval purposes, above the six frigates (still unfinished) authorized to be built during the troubles with the Barbary Powers in 1794. For this stock no money came into the Treasury, and its redemption was provided for out of the general funds, the money for that purpose being advanced to the commissioners of the sinking fund in 1806.

COPY OF OBLIGATION.

UNITED STATES OF AMERICA,

Unto ----, or ---- assigns, the sum of One Thousand Dollars, bearing interest at six per centum per annum from the — day of —, inclusively, payable quarter-yearly, and redeemable at the pleasure of the United States; being stock created by virtue of "An act supplementary to the act entitled 'An act to provide an additional armament for the further protection of the trade of the United States, and for other purposes," passed the 30th June, 1798, which debt is recorded in this office, and is transferable only by appearance in person or by attorney at the proper office, according to the rules and forms instituted for that purpose. 1,000 Dollars.

1,000 Dollars.

Commissioner.

TEMPORARY LOAN OF 1798. (ACT OF MARCH 3, 1795.)

Length of loan, indefinite; redeemable as per contract, January 1, 1803; amount authorized, \$1,000,000; amount issued, \$200,000; sold at par; interest, 6 per cent, payable semi-annually (January and July); first issue, fourth calendar quarter of 1798; final redemption, September 27, 1805.

This lean was procured through the commissioners of the sinking fund, from the Bank of the United States, to meet the seventh installment of \$200,000, due December 31, 1798, on the "Subscription loan of 1791," negotiated with the said bank. The interest commenced January The act of March 3, 1795, authorized the commissioners of the sinking fund, with the approval of the President, to borrow the sums requisite for the payment of the installments of the principal of the public debt, as provided for by the same act. The redemption was charged to certain revenues from duties specified.

EIGHT PER CENT LOAN OF 1798. (ACT OF JULY 16, 1798.)

Length of loan, indefinite; redeemable after fifteen years, or at the option of the Government; amount authorized, \$5,000,000; amount issued, \$5,000,000; sold at par; interest, 8 per cent, payable quarterly; first issue, first calendar quarter of 1799; final redemption—see loan of 1800.

This loan was to be applied to making good deficiencies in appropriations made during that session of Congress; and, in anticipation of an invasion, pending war with France, to defraying expenses incurred by calling into service the militia, or in raising, equipping, and calling out regular troops or volunteers. The payments of interest and repayment of principal were charged to the surplusage of certain duties on imports and tonnage, the faith of the United States being pledged to make good any deficiency.

EIGHT PER CENT LOAN OF 1800. (ACT OF MAY 7, 1800.)

Length of Ioan, indefinite; redeemable after fifteen years, or at the option of the Government; amount authorized, \$3,500,000; amount issued, \$1,481,700; sold at an average premium of nearly 53 per cent; interest, 8 per cent, payable quarterly; first issue, third calendar quarter of 1800; outstanding June 30, 1896, \$500; included in the Finance Report under the title of "Old Debt."

This being really a re-enactment of the preceding loan, the purposes and provisions were precisely alike. Owing to the loss of a portion of the early records, the redemption of these two loans has been merged in one statement. An excess of redemption of \$1,000 was caused by the fraudulent issue of that amount in the loan of 1798. In 1808, \$200 having been redeemed by authority of the act of March 11, 1808, on bonds of indemnity for certificates lost before being funded, in the Receipts and Expenditures for that year the transaction is erroneously reported as an expenditure on account of "Miscellaneous claims." Of these stocks the commissioners of the sinking fund purchased in 1807 and 1808 \$1,056,700 at from 1 to 34 per cent premium, the same amounting to \$26,921.50, and a commission of 1 of I per cent, amounting to \$2,641.75, was allowed on the purchases.

LOUISIANA SIX PER CENT STOCK. (ACT OF NOVEMBER 10, 1803.)

Length of loan, fifteen to eighteen years; redeemable in four equal installments, in 1818, 1819, 1820, 1821 (redemption "by purchase" began in 1812). Amount authorized, \$11,250,000; amount issued, \$11,250,000; sold at par; interest, 6 per cent, payable quarterly; first issue, first cal-

endar quarter of 1804; final redemption, October 23, 1823.

This stock was issued to the French Government in part payment for Louisiana, pursuant to the treaty of April 30, 1803. Of the \$3,759,000 additional assumed by the United States, all was paid in money for spoliation to American citizens, except \$11,731.02 carried to the surplus fund June 30, 1868. The redemption of the principal and payments of interest were charged upon the commissioners of the sinking fund. No special revenues were appropriated or charged for the redemption. The commissioners purchased of this stock in 1812, 1813, 1817, and 1818, \$1,294,100 at from one fourth to 3\frac{1}{4} per cent discount, the same amounting to \$8,257. A commission of one-fourth of 1 per cent was allowed on the purchase, the same amounting to \$3,235.25.

(No. ----)

BANK OF THE UNITED STATES AT -**-**, 18--

Be it known that there is due from the

UNITED STATES OF AMERICA,

Unto —— or —— assigns, the sum of ——, bearing interest at six per centum per annum from the first day of ——, inclusively, payable quarter-yearly, being —— unpaid of stock created by virtue of an act entitled "An act authorizing the creation , bearing interest at six per centum per of a stock to the amount of eleven millions two hundred and fifty thousand dellars, for the purpose of carrying into effect the convention of the 30th of April, 1803, between the United States of America and the French Republic, and making provision for the payment of the same," passed the tenth day of November, 1803; and now transferable to and from the books of this bank by virtue of the act entitled "An act to facilitate the transfer of the stock created under an act passed on the tenth Countersigned:

Cashier.

President.

EXCHANGED SEX PER: CENT STOCK OF 1807. (ACT OF EEBRUARY 14, 1807, SECTION 2.)

Length of Ioan, indefinite; redeemable after six months? public notice; amount authorized, equal to unredeemed old 6 per cent and deferred 6 per cent stocks of 1790, at par value; amount issued, \$6,294,051.12; sold at par; interest, 6 per cent, payable quarterly; first issue, third calendar quarter of 1807; final redemption (See Aux. Ledger, p. 558 for \$3,565.14, balance transferred to Bank of Columbia, District of Columbia, acting as loan agent, May 14, 1824).

This stock was issued for the unredeemed portions of the stock aforenamed (per Bayley "of the nominal amounts," respectively, of \$7,435,767.61 and \$1,940,672.01; total; \$9,376,439.62). The payments of interest and the redemption were charged upon the funds already pledged for the payment of the original stocks. In 1807 the commissioners of the sinking fund purchased \$300,007.62 of this stock at from 1 to 4 per cent discount; which amounted to \$6,553.40; and they allowed one. fourth of 1 per cent commission on the purchase, amounting to \$750.02.

SIX PER CENT LOAN OF 1810. (ACT OF MAY 1, 1810.)

Length of loan, not to exceed six years from January 1, 1811; redeemable as per foregoing, or before, as fixed by contract; amount authorized not to exceed the amount of the principal of the public debt redeemable by law during the year 1810; amount issued, \$2,750,000; sold at par; interest, 6 per cent, payable quarterly; first issue, fourth calendar quarter of 1810; final redemption, September 1, 1811.

This loan was actually to provide against anticipated deficiency in the revenues for meeting the general expenditures of the Government. By section 2 of the act the holders of the "Exchanged six per cent stock," created by section 2 of the act of February 11, 1807, were to be given preference in the subscriptions to this loan. The payments of interest and the redemption were charged upon the sinking fund, the faith of the United States being pledged to make good any deficiency.

SIX PER CENT LOAN OF 1812. (ACT OF MARCH 14, 1812.)

Length of loan, twelve years; redeemable at the pleasure of the Government, after twelve years from January 1, 1813; amount authorized, \$11,000,000; amount issued, \$8,134,700; sold at par; interest, 6 per cent, payable quarterly; first issue, second calendar quarter of 1812;

final redemption, March 12, 1833.

The purpose of this loan was for defraying expenses for which, preparatory to the impending war (declared within four months thereafter) with Great Britain, appropriations were made, or about to be made, during that session of Congress. The payments of interest and the redemption were charged upon the sinking fund. The commissioners purchased of this stock in 1812, 1813, and 1814, \$1,928,197.88 at various rates of discount amounting to \$4,354.08.

TEMPORARY LOAN OF 1812. (ACT OF MARCH 14, 1812.)

Length of loan, irregular; redeemable at various dates, according to contract; amount authorized, \$11,000,000; amount issued, \$2,150,000; sold at par; interest, 6 per cent, payable quarterly; first issue, second calendar quarter of 1812; final redemption, June 28, 1817.

This loan was negotiated under the same authority, for the furtherance of the same object as the one preceding, and the payments of interest and redemption of principal were similarly charged upon the sinking

TREASURY NOTES OF 1812. (ACT OF JUNE 30, 1812.)

Length of loan, variable; notes redeemable, respectively, one year from date of issue; amount authorized, \$5,000,000; amount issued, \$5,000,000; sold at par; interest, $5\frac{3}{5}$ per cent, payable on redemption; first issue, fourth calendar quarter of 1812; final redemption, third calendar quarter of 1820. "Unadjusted, short, \$100."

The motive for this loan was to provide against possible deficiency in the amount it was hoped would be realized through the two preced-The notes were to be issued at par, in payment for supplies or debts due by, and received in payment of all duties and taxes due to the United States, and for public lands sold. The payments of interest and the redemption were charged upon the sinking fund. The commissioners were authorized to purchase the said notes at not above par.

EXCHANGED SIX PER CENT STOCK OF 1812. (ACT OF JULY 6, 1812.)

Length of loan (minimum), twelve years; redeemable at the pleasure of the Government, after December 31, 1824; amount authorized, the full amount of the old 6 and deferred 6 per cent stocks outstanding; amount issued, \$2,984,746.72; sold at par; interest, 6 per cent, payable quarterly; first issue, fourth calendar quarter of 1812; final redemption, February 10, 1827.

This loan, in a report to Congress on June 24, 1812, was advocated by the Secretary of the Treasury on the presumption that by producing a favorable effect on the price of the old 6 per cent and deferred stocks, which were at 2 or 3 per cent under par, it would facilitate obtaining the desired four and a half millions yet unsubscribed to the \$11,000,000 loan authorized by the act of March 14, 1812, "the result of which," he said, "was more than doubtful;" also declaring, that "any depression in the public funds would seriously affect the sales of the residue of the new The payments of interest and the redemption were charged to the sinking fund. In 1817 the commissioners purchased of this stock \$315,637.73, at rates from par to 1 per cent discount, the same being Bayley says the above stock was issued for the unredeemed portions of 6 per cent and deferred stocks of 1790, "of the nominal amounts," respectively, of "\$3,455,731.81 and \$2,345,156.58;" total **\$**5,800,888.39.

SIXTEEN MILLION LOAN OF 1813. (ACT OF FEBRUARY 8, 1813.)

Length of loan (minimum), thirteen years; redeemable after January 1, 1826; amount authorized, \$16,000,000; amount issued, \$18,109,377.43;

sold as per below; interest, 6 per cent, payable quarterly; first issue, first calendar quarter of 1813; outstanding June 30, 1896, \$46.39; included in the Finance Report under the title of "Old Debt."

This loan was for the purpose of defraying any public expenses for which appropriations were made. The war with Great Britain being then in progress, the requirements for military and naval operations were necessarily large. Of this stock, \$17,578,177.43 (with a slight difference) was sold at 88 per cent, the discount amounting to \$2.109,377.43, and \$531,200 sold at par, by giving, in addition to the interest, an annuity of 13 per cent for thirteen years, for that time amounting to \$103,584. A commission of one-fourth of 1 per cent was allowed to agents on subscriptions of \$100,000. The payments of interest and the redemption were charged to the sinking fund, and the faith of the United States was pledged to make good any deficiency. In 1817 and 1819 the commissioners purchased of this stock \$2,580,943.68 and \$1,136.36, respectively, total, \$2,582,080.04, at par, and also in IS17 they purchased \$6,160.94 at a discount of \$61.61; the brokerage on these purchases amounted to \$18.09. \$23,317.82 redeemed in 1822, was exchanged for 5 per cent stock, act of April 20, 1822; \$3,094,766.97 redeemed in 1824 and 1825, was exchanged for 4½ per cent stock, act of May 26, 1824, and \$1,148,854.20 redeemed in 1826, was exchanged for 45 per cent stock, act of March 3, 1825. Pursuant to published notice by the Secretary of the Treasury, the interest on \$2,740,423.91 ceased July The payment of annuities is contained in the interest.

TREASURY NOTES OF 1813. (ACT OF FEBRUARY 25, 1813.)

Length of loan, variable; notes redeemable one year, respectively, from date of issue; amount authorized, \$5,000,000; amount issued, \$5,000,000; sold at par; interest, $5\frac{2}{5}$ per cent, payable on redemption; first issue, first calendar quarter of 1813; final redemption, fourth calendar quarter of 1820. "Unadjusted, short, \$900."

This loan was for the furtherance of the objects for which the preceding loan was authorized. The notes were to be applied in payment for supplies or debts due by the Government, or for the purpose of borrowing money, and were made receivable in payment of all duties and taxes laid by the United States, and for lands sold by the same authority. A commission of one-fourth of 1 per cent was allowed to agents. The redemption and payments of interest were charged upon the sinking fund. In 1815 \$15,000 ("with \$810 accrued interest") was converted into stock of the "undesignated loan," act of March 24, 1814.

SEVEN-AND-ONE-HALF MILLION LOAN OF 1813. (ACT OF AUGUST 2, 1813.)

Length of loan (minimum), twelve years; redeemable at the pleasure of the Government, after January 1, 1826; amount authorized, \$7,500,000; amount issued, \$8,498,581.95; sold at 11.75 per cent discount; interest, 6 per cent, payable quarterly; first issue, fourth calendar quarter of 1813; final redemption, August 2, 1845. "Unadjusted, over, \$21."

This loan was further to provide for the purposes of the preceding two loans. A commission of one-eighth of 1 per cent was allowed to agents on subscriptions of \$100,000. The payments of interest and the redemption were charged to the sinking fund, and the faith of the United States was pledged to make good any deficiency. The discount on the sale amounted to \$998,581.95. In 1817 the commissioners purchased \$1,662,349.56 of this stock at par; \$23,386.95, redeemed in 1822, was exchanged for 5 per cent stock, act of April 20, 1822; \$1,359,960.98, redeemed in 1825, was exchanged for 4½ per cent stock, act of May 26, 1824, and \$5,370,560.01, redeemed in 1826, was exchanged for 4½ per cent stock, act of March 3, 1825.

TREASURY NOTES OF MARCH, 1814. (ACT OF MARCH 4, 1814.)

Length of loan, variable; notes redeemable, respectively, one year from date of issue; amount authorized, \$10,000,000; amount issued, \$10,000,000; sold at par; interest, $5\frac{2}{5}$ per cent, payable on redemption; first issue, second calendar quarter of 1814; final redemption, fourth calendar quarter of 1837. "Unadjusted, short, \$43,160."

These notes were to be applied in payment for supplies, debts due by the United States, or for the purpose of borrowing money, and were receivable in payment of all duties and taxes laid by the Government, and for public lands sold. A commission of one-fourth of 1 per cent was allowed to agents. The redemption and payments of interest were charged upon the sinking fund.

TEN MILLION LOAN OF 1814. (ACT OF MARCH 24, 1814.)

Length of loan (minimum), twelve years; redeemable at the pleasure of the Government, after December 31, 1826; amount authorized, \$25,000,000; amount issued, \$9,919,476.25; sold at 20 per cent discount; interest, 6 per cent, payable quarterly (January, April, July, and October); first issue, second calendar quarter of 1814; outstanding June 30, 1896, \$288.98; included in the Finance Report under the title of "Old Debt."

This loan was for the purpose of defraying any expenses for which appropriations were made during the year 1814. A commission of one-fourth of 1 per cent was authorized to be paid to agents. The discount on the issue amounted to \$1,983,895.25. The reimbursement and payments of interest were charged upon the sinking fund. In 1817 the commissioners purchased \$2,207.12 of this stock at 1 per cent discount, amounting to \$22.07, and \$1,406,095.90 at par. \$3,000 redeemed in 1822, was exchanged for 5 per cent stock, act of April 20, 1822. The interest on \$2,256,039.21 ceased July 1, 1828, these bonds having been called for redemption at that time.

Be it known that there is due from the

UNITED STATES OF AMERICA,

Loan of May 2d, 1844, of ten millions of dollars.

Register.

SIX-MILLION LOAN OF 1814. (ACT OF MARCH 24, 1814.)

Length of loan (minimum), twelve years; redeemable at the pleasure of the Government, after December 31, 1826; amount authorized, \$25,000,000; amount issued, \$5,384,134.87; sold at 20 per cent discount; interest, 6 per cent, payable quarterly (January, April, July, and October); first issue, third calendar quarter of 1814; final redemption,

August 15, 1834.

This loan was additional to the one preceding. A commission of one-fourth of 1 per cent was allowed on subscriptions of \$25,000 or over. Of this stock, \$250,000 and \$675,000 were taken, respectively, by six and seven banks of Philadelphia and Baltimore, and \$1,100,009.87 by the corporation of New York, the money to be expended for the defense, etc., of those cities. The discount on the issue amounted to \$1,076,826.97. In 1817 the commissioners of the sinking fund purchased \$350,000 of the stock of this loan at 1 per cent discount, amounting to \$3,500, and \$976,354.10 at par. A commission of one-fourth of 1 per cent was allowed agents on purchases. In 1822 \$7,000 was redeemed by conversion into exchanged 5 per cent stock, act of April 20, 1822.

COPY OF OBLIGATION.

Six-million loan of 1814.

SIX PER CENT STOCK OF 1814. LOAN OF AUGUST 22D, 1814, OF 6,000,000 DOLLARS.

(No. ----.)

Be it known that there is due from the

UNITED STATES OF AMERICA,

Unto —— or —— assigns, the sum of ——, bearing interest at six per centum per annum, from the —— day of ——, inclusively, payable quarter-yearly; being stock created in pursuance of an act of Congress, passed on the twenty-fourth day of March, 1814, entitled "An act authorizing a loan for a sum not exceeding Twenty-five Millions of Dollars," the principal of which stock is reimbursable at the pleasure of the United States, at any time after the last day of December, in the year 1826; which debt is recorded in this office, and is transferable only by appearance in person, or by attorney, at the proper office, according to the rules and forms instituted for that purpose.

Dollars ----

Commissioner.

Loan of August 22d, 1814, of six millions of dollars.

UNDESIGNATED LOAN OF 1814. (ACT OF MARCH 24, 1814.)

Length of loan (minimum), twelve years; redeemable at the pleasure of the Government, after December 31, 1826; amount authorized, \$25,000,000; amount issued, \$746,403.31; sold at from 5 to 20 per cent discount; interest, 6 per cent, payable quarterly (January, April, July, and October); first issue, fourth calendar quarter of 1814; final redemption, August 15, 1834.

This and the preceding lean, being negotiated under the same act and for similar purposes as the ten million lean next preceding, were both really additional to the same. The issues under the aforesaid act authorizing a lean of \$25,000,000 amounted to \$21,050,014.43, including Treasury notes for \$5,000,000 issued under the act of March 4, 1814, which by the terms of that act were to be deemed a part of this lean. The receipts were \$17,895,423,26, the discount being \$3,154,501.17. The cash, viz, \$150,000, covered in, in 1814, on account of this lean, was subscribed by several corporations in Baltimore for the purpose of building a steam frigate for the defense of that port. In 1815, \$15,000 in Treasury notes, act of February 25, 1813 (with \$810 accrued interest), was redeemed by conversion into this stock. In 1817 the commissioners of the sinking fund purchased \$208,507.54 of this stock at par. The discount on the issue of this lean was \$93,868.95.

MISSISSIPPI STOCK. (ACT OF MARCH 31, 1814.)

Length of loan, indefinite; redeemable out of money received from sale of land ceded to the United States in the Mississippi territory; amount authorized, \$5,000,000; amount issued, \$4,282,036.92 ("\$114.20\frac{1}{2}\text{ additional awarded has never been called for") sold at par; interest, none; first issue, third calendar quarter of 1815; outstanding June 30, 1896, \$871.78, included in the Finance Report under the title of "Old Debt."

This stock was designed to indemnify certain claimants of public lands in the Mississippi territory (nearly 50,000,000 acres) lying south of the State of Tennessee and west of the Chattahoochie River, ceded to the United States by Georgia April 24, 1802. By the terms of cession the United States was to pay Georgia out of the first proceeds of the sales of the lands thus ceded, \$1,250,000, and to have the right to reserve 5,600,000 acres, or the proceeds of their sale, for the purpose of satisfying any claims which might be made to any part of the ceded territory. Of this stock \$2,448,789.44 was transferred to the Government in payment for public lands.

(No. —.)

TREASURY OF THE UNITED STATES, REGISTER'S OFFICE, ———, 18—

Be it known that there is due from the

UNITED STATES OF AMERICA,

Register.

TEMPORARY LOAN OF 1814: (ACT OF NOVEMBER 15; 1814.)

Length of loan, indefinite; redeemable as per contract; amount authorized, \$3,000,000; amount issued, \$1,450,000; sold at par; interest, 6 and 7 per cent, payable annually; first issue, fourth calendar quarter of 1814; final redemption, September 16, 1816.

This loan was to be applied to defray any expenses that should be authorized by law (particularly destined to provide for the expenditures of the last quarter of the year 1814). The amount was borrowed from the banks under special contracts. The payments of interest and the redemption were charged upon the sinking fund. \$400,000 was borrowed at 7 per cent and the balance at 6 per cent.

TREASURY NOTES OF DECEMBER, 1814. (ACT OF DECEMBER 26, 1914.)

Length of loan, variable; notes redeemable, respectively, one year from the date of issue; amount authorized, \$10,500,000; amount issued, \$8,318,400; sold at par; interest, 52 per cent, payable on redemption; first issue, first calendar quarter of 1815; final redemption, third calendar quarter of 1841. "Unadjusted, over, \$41,030."

Of the amount authorized under the act, entitled "An act supplemental to the acts authorizing a loam for the several sums of \$25,000,000, and \$3,000,000," \$7,500,000 was to be in lieu of uneffected portions of the said loan, authorized by the acts of March 24 and November 15, 1814, to be applied to the same purposes, and \$3,000,000 was to defray the expenses of the War Department for the current year. The notes were made receivable for duties and taxes laid by the United States, and for public lands sold. A commission of one-fourth of I per cent was allowed to agents. The redemption and payments of interest were charged upon the sinking fund.

DIRECT TAX LOAN. (ACT OF JANUARY 9, 1815.)

Length of loan, indefinite; redeemable upon receipt of direct tax; amount authorized, \$6,000,000; amount issued, \$2,000,000; sold at par; interest, 6 per cent; first issue, second calendar quarter of 1815; final redemption, June 1, 1815.

This loan was designed to meet the large expenses estimated for the year, principally for carrying on the war with Great Britain, for the fact that this war had been formally closed by the treaty of peace signed at Ghent, December 24, 1814, was not yet known in this country.

The loan was in hypothecation of the direct tax laid by the same act, and the money was to be applied to the payment of the public debt and other expenses of the Government.

TEMPORARY LOAN OF 1815. (ACT OF FEBRUARY 13, 1815.)

Length of loan, indefinite; redeemable as per contract; amount authorized, \$500,000; amount issued, \$225,000; sold at par; interest, 6 per cent, payable annually; first issue, second calendar quarter of 1815; final

redemption, May 8, 1816.

The damage done by burning to the public buildings in the city of Washington by an incursion of the enemy on the night of August 24, 1814, gave rise to this loan. The money was to be applied to repairing and rebuilding the President's house, the Capitol, and other public offices, on their present sites.

SMALL TREASURY NOTES OF 1815. (ACT OF FEBRUARY 24, 1815.)

Length of loan, indefinite; redeemable at the pleasure of the Government; amount authorized, \$25,000,000; amount issued, \$3,392,994; sold at various rates from par to 4 per cent premium; interest, none; first issue, first calendar quarter of 1815; final redemption, first calendar

quarter of 1842. "Unadjusted, short, \$2,061."

The act authorized the issue of Treasury notes of various denominations, not to exceed \$25,000,000, to be applied in payment for services or supplies, for debts due by the Government, or for borrowing money. Notes of lower denominations than \$100 were to bear no interest and to be transferable by delivery alone. These were made exchangeable for a 7 per cent funded stock, created by the same act, and were receivable in all payments to the United States; but however redeemed or surrendered, were liable to be reissued and applied anew to the same purposes, and in the same manner as when first issued. Thus the original issue of \$3,392,994, as received and funded in 7 per cent stock, was reissued and again received and funded until the 7 per cent stock amounted to \$9,070,386. See also "Treasury notes" and "Treasury note stock," same act. The premium realized on the sale was \$32,793.73, net.

COPY OF OBLIGATION.

Small Treasury notes of 1815.

No. ---

Receivable everywhere by the United States in payment of Duties, Taxes, and Public Lands.

TREASURY DEPARTMENT, March 25, 1815.

The United States promise to receive this note for Five Dollars in all payments to them; or to fund the amount at seven per cent interest, on request; agreeably to the act of Congress of February 24th, 1815.

Countersigned:

Register of the Treasury.

In behalf of the United States.

SEVEN PER CENT STOCK OF 1815. (ACT OF FEBRUARY 24, 1815.)

Length of loan, irregular; redeemable after December 31, 1824; amount authorized, \$25,000,000; amount issued, \$9,070,386; issued for ("small") Treasury notes at par; interest, 7 per cent, payable quarterly (January, April, July, and October); first issue, second calendar quarter of 1815; outstanding June 30, 1896, \$32.52; included in the Finance Report under the title of "Old Debt."

The act authorized the issue of \$25,000,000 in Treasury notes of various denominations, those lower than \$100 to bear no interest, to be transferable by delivery alone, and exchangeable at par for 7 per cent certificates of funded stock. The redemption and payments of interest were to be effected out of funds established by law for such purposes, on account of funded public debts contracted since the declaration of war against Great Britain, the faith of the United States being pledged to provide sufficient additional means if necessary. In 1817 the sinking fund commissioners purchased \$332,990.01 of the stock at from 5.75 to 6.51 and in 1819 \$136,947.22 at from 4.40 to 4.57 per cent premium. Under the act of January 22, 1824, having been authorized to purchase at various rates during said year \$8,610,000, they further purchased \$1,949,404.01 and \$1,376,839.39, on which was paid \$38,987.93 and \$10,325.94 premium, respectively. The total paid was \$77,216.30. A commission of one fourth of 1 per cent was allowed to purchasing agents.

TEMPORARY LOAN OF MARCH, 1815. (ACT OF MARCH 3, 1815.)

Length of loan, indefinite; redeemable at various dates, as per contract; amount authorized, \$18,452,800; amount issued, \$1,150,000; sold at par; interest, 6 per cent, payable quarterly; first issue, second

calendar quarter of 1815; final redemption, April 26, 1817.

This loan was to be applied to defraying any expenses for which appropriations were made. At the close of the year 1814 a large portion of the war debt was due and unpaid, while another considerable portion was fast becoming due. These unpaid or accruing demands were in part for temporary loans obtained under the act of March 14, 1812, and the balance for Treasury notes issued under various acts. The payments of interest and the redemption were charged to the sinking fund, and the faith of the United States was pledged to make good any deficiency.

SIX PER CENT LOAN OF 1815. (ACT OF MARCH 3, 1815:)

Length of loan (minimum), thirteen years; redeemable after December 31, 1827; amount authorized, \$18,452,800; amount issued, \$12,288,147.56; sold at from par to 5 per cent discount; interest, 6 per cent, payable quarterly; first issue, second calendar quarter of 1815; final redemp-

tion, December 31, 1835. "Unadjusted, over \$1,523.73."

The act authorized a loan for the amount shown. Under that authority this loan and the one preceding were effected. The purposes and provisions for the payments of interest and the redemption, were as previously indicated. The discount on the sale was \$588,820.93. A commission of one fourth of 1 per cent was allowed to agents. In 1817 the commissioners of the sinking fund purchased \$2,782,524.23 of this stock at from 1 per cent discount to par. The discount amounted to \$2,565.13. The brokerage on these purchases amounted to \$638.02.

TREASURY NOTES OF 1815. (ACT OF FEBRUARY 24, 1815.)

Length of lean, indefinite; redeemable at the pleasure of the Government; amount authorized, \$25,000,000; amount issued, \$4,969,400; sold at par; interest, 5\frac{2}{3} per cent, payable on redemption; first issue, third calendar quarter of 1815; final redemption, first calendar quarter of 1841. "Unadjusted, over, \$600."

The act authorized the issue of Treasury notes of various denominations, not to exceed \$25,000,000, to be applied in payment for services or supplies, or for debts due by the United States, or for borrowing money. Notes of the denomination of \$100 and over were made payable to order, and transferable by delivery and assignment. These were made exchangeable for a 6 per cent stock created by the same act, and were receivable in all payments to the United States; but, however redeemed or surrendered, were liable to be reissued as originally issued.

COPY OF OBLIGATION.

Interest per day 1½ cents. " per month 45 cents.

per year \$5.40 cents.

TREASURY NOTE STOCK OF 1815. (ACT OF FEBRUARY 24, 1815.)

Length of loan, irregular; redeemable after December 31, 1824; amount authorized, \$25,000,000; amount issued, \$1,505,352.18; issued for Treasury notes (of denominations of \$100 and over) at par; interest, 6 per cent, payable quarterly (January, April, July, and October); first issue, third calendar quarter of 1815; outstanding June 30, 1896, \$67.53, included in the Finance Report under the title of "Old Debt."

As the 7 per cent stock of 1815 was designed to redeem the "small Treasury notes" of said year, this stock was intended to redeem the notes of the denominations of "\$100 and over," also of the same year; the four loans being under the authority of the same act. The provisions for the payments of interest on, and the redemption of the two classes of stock were identical.

FIVE PER CENT LOAN OF 1816. (ACT OF APRIL 10, 1816.)

Length of loan, indefinite; redeemable at the pleasure of the Government; amount authorized, \$7,000,000; amount issued, \$7,000,000;

sold at par; interest, 5 per cent, payable quarterly; first issue, first calendar quarter of 1817; final redemption, June 30, 1831.

This stock was issued in payment of the Government subscription for 70,000 shares of the capital stock of the second Bank of the United States, under authority of the act named, by which the bank itself was established. The bank was prohibited from selling or transferring more than \$2,000,000 of this stock in any one year. In 1837 and 1838 the stock of the nation in the bank was nearly all sold at a large premium and the proceeds paid into the Treasury. Financially the transaction proved a success. There were received as bonuses \$1,500,000, from dividends, \$7,118,416.29, and from sale of bank stock, \$9,424,750.78, total, \$18,043,167.07. The subscription was \$7,000,000; interest for thirteen years, \$4,550,000; total, \$11,550,000. Net gain, \$6,493,167.07

FIVE PER CENT STOCK OF 1820, LOAN OF 1,000,000 DOLLARS.

No. -

TREASURY OF THE UNITED STATES. REGISTER'S OFFICE, ----, 182-.

Be it known that there is due from the

UNITED STATES OF AMERICA,

Unto —— or —— assigns, the sum of ——, bearing interest at five per centum per annum from the —— day of ——, inclusively, payable quarter-yearly; being stock created in pursuance of an act of Congress passed on the 15th day of May, 1820, entitled "An act to authorize the President of the United States to borrow a

sum not exceeding Three Millions of Dollars;" the principal of which stock is reimbursable at the pleasure of the United States, at any time after the first day of January, in the year 1832, which debt is recorded in this office, and is transferable only by appearance in person, or by attorney, at the proper office, according to the rules and forms instituted for that purpose.

Dollars ----

Register.

SIX PER CENT LOAN OF 1820. (ACT OF MAY 20, 1820.)

Length of loan, indefinite; redeemable at the pleasure of the Government; amount authorized, \$3,000,000; amount issued, \$2,000,000; sold at a premium of 2 per cent; interest, 6 per cent, payable quarterly; first issue, second calendar quarter of 1820; final redemption, December 27, 1822.

The purpose of this loan was similar to the one preceding, both having been negotiated under authority of the same act. The payments of interest and the redemption of principal were similarly provided for. A like commission was allowed to agents.

FIVE PER CENT LOAN OF 1821. (ACT OF MARCH 3, 1821.)

Length of loan (minimum), fourteen years; redeemable after January 1, 1835; amount authorized, \$5,000,000; amount issued, \$4,735,296.30; sold at a premium of from 5.1+ to 8 per cent; interest, 5 per cent, payable quarterly; first issue, first calendar quarter of 1821; final redemption, June 11, 1839. There was an overredemption of 4 cents by a clerical error in the New York, N. Y. office.

This loan was to defray such public expenses as had been or might be authorized by law. It was demanded by the fact that \$5,477,776.76 of the public debt, interest included, would fall due in 1821. \$4,000 was appropriated for paying a commission of not exceeding one-eighth of 1 per cent to agents, if necessary, and other expenses of the loan. The sinking fund and the faith of the United States to supply any deficiency were pledged for the payments of interest and the redemption of the principal. There was a premium of \$264,703.70 realized on the sale of the loan.

Register.

EXCHANGED FIVE PER CENT STOCK OF 1822. (ACT OF APRIL 20, 1822.)

Length of loan (minimum), eight, nine, and ten years; redeemable, one-third, respectively, after December 31, 1830, 1831, and 1832; amount

authorized, \$26,000,000; amount issued, \$56,704.77; sold at par; interest, 5 per cent, payable quarterly; first issue, fourth calendar quarter of

1822; final redemption, December 30, 1833.

This stock was issued in exchange for \$23,317.82 of the 6 per cent \$16,000,000 loan, and \$23,386.95 of the 6 per cent \$7,500,000 loan of 1813, and \$3,000 of the 6 per cent \$10,000,000 loan, and \$7,000 of the 6 per cent \$6,000,000 loan of 1814. The loan was originally devised for the exchange of \$12,000,000 of the 7 per cent stock of 1815, and 6 per cent stock of 1812, and \$14,000,000 of the 6 per cent stock of 1813, 1814, and 1815, due in the years 1825 and 1826, but the anticipated subscriptions were not realized. The funds pledged for payments on account of the old, were to remain pledged for payments on account of the new stock.

FOUR-AND-ONE-HALF PER CENT LOAN OF 1824. (ACT OF MAY 24, 1824.)

Length of loan (minimum), eight years; redeemable after January 1,1832; amount authorized, \$5,000,000; amount issued, \$5,000,000; sold at par; interest, 4½ per cent, payable quarterly; first issue, second calendar quarter of 1824; final redemption, December 24, 1833.

This loan was to provide for the awards of the commissioners, under the treaty with Spain of February 22, 1819, whereby in consideration of the cession of Florida, the United States renounced certain claims for spoliation on American commerce and some other claims of American citizens on Spain, and agreed to pay the same, not to exceed the above amount; also to make satisfaction for injuries sustained by Spaniards by the operation of United States troops in Florida. The act appropriated a sum equal to what would be necessary to pay the

interest on the stock to the end of 1824.

TREASURY NOTES OF 1837. (ACT OF OCTOBER 12, 1837.)

Length of loan (authority for issuing), one year two and one-half months; redeemable after one year from respective dates of notes; amount authorized, \$10,000,000; amount issued, \$10,000,000; sold at par; interest, one-tenth of 1, 2, 5, and 6 per cent, payable on redemption; first issue, fourth calendar quarter of 1837; outstanding June 30,

1896—see "Treasury notes prior to 1846," post.

Although in 1835 the United States was, for the first time in the history of the country, practically out of debt, ample funds having been deposited to meet the \$328,582.10 of the public debt estimated to be still outstanding, solely because payment had not been demanded—owing to the subsequent changed financial condition of the country, and the prevailing extraordinary depression and panic in 1837, most of the banks having suspended specie payments, it was deemed expedient to authorize the issue of Treasury notes in such sums as the exigencies of the Government might require, not exceeding the above amount. They were to be issued in payment of debts due by the United States; were to be transferred by delivery and assignment; were to be received for all payments to the United States, and the Secretary of the Treasury was authorized to borrow money on the credit of the same. The interest paid on these notes was \$126,232,85.

TREASURY NOTES OF 1838. (ACT OF MAY 21, 1838.)

Length of loan (authority for issuing), seven and one-third months; redeemable after one year from respective dates of notes; amount authorized, \$10,000,000; amount issued, \$5,709,810.01; sold at par; interest, 6 per cent, payable on redemption; first issue, second calendar quarter of 1838; outstanding June 30, 1896—see "Treasury notes prior to

1846," post.

The condition of the country and of the public finances had not improved at the end of 1837. In May, 1838, the President informed Congress that the available means in the Treasury were only \$26,000. Owing to demands awaiting payment, the resources on hand could carry the Government but a few days. In consequence, the above act was passed authorizing the further issue of Treasury notes, according to the provisions and subject to all the conditions, etc., contained in the act of October 12, 1837, in place of notes issued under said act, and afterwards paid into the Treasury and canceled. The odd figures are owing to interest accrued. The interest paid was \$287,234.14.

TREASURY NOTES OF 1839. (ACT OF MARCH 2, 1839.)

Length of loan (authority for issuing), four months; redeemable after one year from respective dates of notes; amount authorized, "the remainder authorized to be issued" by the previous act; amount issued, \$3,857,276.21; sold at par; interest, 2 and 6 per cent, payable on redemption; first issue, first calendar quarter of 1839; outstanding June 30, 1896—see "Treasury notes prior to 1846," post.

The power to issue and reissue Treasury notes under the two foregoing acts having expired December 31, 1838, the above act extended the time to June 30, 1839, and was passed at the instance of the Secretary of the Treasury, who informed the House of Representatives that it would be impossible to meet the demands upon the Treasury without

it. The interest paid was \$177,158.87.

TREASURY NOTES OF 1840. (ACT OF MARCH 31, 1840.)

Length of loan (authority for issuing), one year; redeemable after one year from respective dates of notes, or before, at the option of the Government; amount authorized, not to exceed \$5,000,000 outstanding at any one time; amount issued, \$7,114,251.31; sold at par; interest, 2, 5, $5\frac{2}{5}$, and 6 per cent, payable on redemption; first issue, second calendar quarter of 1840; outstanding June 30, 1896—see "Treasury notes prior to 1846," post.

It being deemed that its anticipated resources would not be available in time to meet the demands on the Government, the above act was passed to remedy this inconvenience. It renewed the provisions of the act of October 12, 1837, and authorized the issue of Treasury notes in lieu of others redeemed within the above limit. The interest paid was

\$284,763.69.

TREASURY NOTES OF 1841. (ACT OF FEBRUARY 15, 1841.)

Length of loan (authority for issuing), one year; redeemable after one year from respective dates of notes, or sooner, if possible; amount authorized, not to exceed \$5,000,000 outstanding at any one time; amount issued, \$7,529,062.75; sold at par; interest, 2, 5, $\frac{52}{5}$, $\frac{51}{2}$, and 6 per cent, payable on redemption; first issue, first calendar quarter of 1841; outstanding June 30, 1896—see "Treasury notes prior to 1846," post.

It appearing possible that not only might the estimated available balance of \$24,273 which would remain in the Treasury at the close of 1841 entirely disappear, but an actual deficit of several millions be found under the operation of the compromise tariff act of 1833, the above act was passed to ward off this danger. The notes were to be issued, except as otherwise specified, under the limitations and provisions of the act of October 12, 1837, as modified by the act of March 31, 1840. The interest paid was \$530,789.32.

LOAN OF 1841. (ACT OF JULY 21, 1841.)

Length of loan, three and one half years; redeemable upon six months' notice, or any time after three years from January 1, 1842; amount authorized, \$12,000,000; amount issued, \$5,672,976.88; sold at par; interest, $5\frac{2}{5}$, $5\frac{1}{2}$, and 6 per cent, payable quarterly; first issue, third calendar quarter of 1841; final redemption, third fiscal quarter of 1847.

It was estimated that at the close of the year there would be a probable deficit of \$11,406,132.98. During the previous four years the expenditures had exceeded the revenues by \$31,310,014.20. The issue of Treasury notes had been but an expedient to postpone temporarily the payment of a constantly increasing debt. The only remedy was by a sufficiently long loan to allow the public finances, aided by returning prosperity, to recuperate. This was the intent of the above law. money was to be applied to the redemption of outstanding Treasury notes, and to defray public expenses. From August 21 to December 16, 1844, the Secretary of the Treasury purchased \$490,350 of the 51 and \$128,125 of the 6 per cents, at various rates, ranging from eleven one hundredths to seventy five one hundredths of 1 per cent above The premium paid amounted to \$3,268.93. The interest paid was \$1,078,925.47.

TREASURY NOTES OF 1842. (ACT OF JANUARY 31, 1842.)

Length of loan (authority for issuing), one year; redeemable after one year from respective dates of notes; amount authorized not to exceed \$5,000,000 outstanding at any one time; amount issued, \$7,959,994.83; sold at par; interest, 2 and 6 per cent, payable on redemption; first issue, first calendar quarter of 1842; outstanding June 30, 1896—see "Treasury notes prior to 1846," post.

Up to January 1, 1842, there was an estimated deficiency of \$627,557.90 over the amount received from the foregoing loan, which, owing to the short period it had to run, did not seem to meet with much favor, while the estimated excess of expenditures over revenues for 1842 was \$14,218,570.68. In this emergency the above issue was authorized, subject to the provisions and limitations of the act of October 12, 1837; the notes when redeemed to be reissued, but not to exceed in amount the limit per above. The interest paid was \$377,604.02.

LOAN OF 1842. (ACT OF APRIL 15, 1842.)

Length of loan, twenty and two-thirds years, redeemable upon six months' notice, or at any time not exceeding twenty years from January 1, 1843; amount authorized, \$17,000,000; amount issued, \$8,343,886.03; sold at from 2½ per cent discount to par; interest, 6 per cent, payable semi-annually; first issue, second calendar quarter of 1842; final re-

demption, fourth fiscal quarter of 1872.

The act extended the provisions of the act of July 21, 1841, increasing the amount by \$5,000,000. It was passed, like that for the issue of Treasury notes of January 31, 1842, to prevent the threatened deficiency indicated in the note to that act. It was manifest that the power to keep outstanding \$5,000,000 in Treasury notes could not make up a deficiency of over \$14,000,000; hence the necessity for this loan. Of this stock \$1,700,000 was sold at 97.50. The discount was \$42,500, but it was offset by \$82.20 accrued interest. From 1849 to 1858 the Secretary of the Treasury purchased \$5,460,521.92 of this stock at various rates ranging from 5 to 21 per cent above par. Bayley gives the amount of premium paid as \$729,686.87 instead of \$727,864.95. The difference of \$1,821.92, occurring in 1853, can not be reconciled. \$437.38 commission was paid. The interest paid was \$7,365,532.34.

Unto —— or —— assigns, the sum of One Hundred Dollars, bearing interest at six per centum per annum from the —— day of ——, 184—, inclusively, payable half-yearly, being stock created in pursuance of an act of Congress entitled "An act authorizing a loan not exceeding the sum of Twelve Millions of Dollars," approved July 21st, 1841, and an act of Congress entitled "An act for the extension of the loan of eighteen hundred and forty-one, and for an addition of Five Millions thereto, and for allowing interest on Treasury notes due," approved April 15th, 1842, the principal of which stock is reimbursable at the pleasure of the United States at any time after twenty years from the 31st day of December, 1842, which debt is recorded in and transferable at the office of the Register of the Treasury, by appearance in person, or by attorney, according to the rules and forms instituted for that purpose.

Register of the Treasury.

TREASURY NOTES OF 1842. (ACT OF AUGUST 31, 1842.)

Length of loan (authority for issuing), seven and one-half months; redeemable after one year from respective dates of notes; amount authorized, \$6,000,000; amount issued, \$3,025,554.89; sold at par; interest, 6 per cent, payable on redemption; first issue, third calendar quarter of 1842; outstanding June 30, 1896—see "Treasury notes

prior to 1846," post.

It had been found possible to realize at par, as prescribed, but a small portion of the amount needed under the act of July 21, 1841, or even under the act of April 15, 1842, which permitted the sale of stock for an extended period, at less than par. It was declared, in debate, that to meet \$3,875,000 immediate liability of the Government, not one dollar was available, and the stock must either "be sacrificed to the shylocks of the country," or some remedial provisions be made. In this emergency the act was passed. It provided, in case the aforesaid stocks could not be sold except at below par, for the issue of Treasury notes, as exigency might demand, to the amount authorized, under the provisions, etc., of the acts of October 12, 1837 and March 31, 1840. The notes redeemed might be reissued or replaced by new issues, up to April 15, 1843; the amount outstanding not to exceed \$6,000,000. The interest paid was \$180,254.97.

TREASURY NOTES OF 1843. (ACT OF MARCH 3, 1843.)

Length of loan (authority for issuing), one and one third years; redeemable after one year from respective dates of notes; amount authorized, indefinite; amount issued, \$1,806,950; sold at par; interest, one-tenth of 1, and 4 per cent, payable on redemption; first issue, second fiscal quarter of 1844; outstanding June 30, 1896—see "Treasury notes prior to 1846," post.

This was simply an issue of new notes in place of others issued under previous acts and redeemed, etc. The estimated revenues for the year were but little in excess of the current expenses; hence the necessity for some action. The national debt in March, 1843, was said to be \$27,409,338, of which \$11,608,977 fell due during the year, and might be presented for payment. The act provided that when any Treasury notes issued under previous acts should, after the passage of this act, be redeemed before July 1, 1844, other notes to the same amount might be issued in their stead under the limitations, etc., of the acts under which they were originally issued. It authorized the payment of interest on notes of this act after maturity, and also on those issued under the act of August 31, 1842. The interest paid was \$4,931.50.

LOAN OF 1843. (ACT OF MARCH 3, 1843.)

Length of toan, ten years; redeemable July 1, 1853; amount authorized, indefinite; amount issued, \$7,004,231.35; sold at from 1 to 3\frac{3}{4} per cent premium; interest, 5 per cent, payable semi-annually; first issue, second calendar quarter of 1843; final redemption, third fiscal quarter of 1855.

This loan was obtained under the same act authorizing the issue of Treasury notes of 1843. The third section authorized the President at his discretion, to cause to be redeemed and canceled such of the notes then outstanding as became due, by the issue of stock, under the limitations, etc., of the act of April 15, 1842. There was realized on the sale \$176,632.35 premium. In 1845 the Secretary of the Treasury purchased \$400,000 of this stock at an average rate of 3\{\frac{2}{3}\}\ per cent premium. In November, 1848, \$136,000 was purchased at 1.268 per cent discount, the same amounting to \$1,725. In 1852, \$15,000 was purchased at one-fourth of 1 per cent, and \$137,700 at 1\{\frac{1}{2}\}\ per cent premium. In 1853, \$4,296,862.50 was purchased (including purchases at par) at various rates from par to 2\{\frac{1}{4}\}\ per cent premium. Bayley gives the total premium paid as \$23,332.05. Deduct \$1,000 commission in 1845, and add \$17,832.67 in 1853 and \$5 in 1855, on account of "Premium and interest:" correct amount, \$40,169.72. The commission paid amounted to \$1,422.50.

"TREASURY NOTES PRIOR TO 1846." (SEE TREASURY NOTES OF 1837, 1838, 1839, 1840, 1841, 1842 (JANUARY AND AUGUST), AND 1843, ante.)

Length of loan (authority for issuing), four months to one and one-third years; notes redeemable one year from their respective dates as issued; amount authorized, \$51,000,000; amount issued, \$47,002,900; sold at par; interest at various rates, from one-tenth of 1 to 6 per cent, payable on redemption; first issue, fourth calendar quarter of 1837; outstanding June 30, 1896, \$82,425.35; included in the Finance Report under the title of "Old Debt."

On March 31, 1847, the First Comptroller directed the Register to close the several accounts with the above issues, and consolidate and transfer the balances outstanding, aggregating \$328,083.14, to a new account, known thereafter under the above caption. The redemptions, therefore, having been recorded in conformity with said plan, the outstanding can not be given otherwise than in accordance therewith. \$13,586.29, per Bayley, "Unadjusted short," in 1880, remains unsettled. The act of April 15, 1842, section 9, and the act of March 3, 1843, section 2, authorized the payment of interest at 6 per cent from March 5, 1842, on notes of all the above issues due and unpaid before that day; and from their dates of maturity on all under said acts subsequently falling due, until redeemed, or sixty days' notice be given for their redemption. The interest on these combined loans amounted to \$1,968,969.36.

TREASURY NOTES OF 1846. (ACT OF JULY 22, 1846.)

Length of loan (authority for issuing), one year; per act of January 28, 1847, extended conformably to time set therein; redeemable one year from respective dates of notes; amount authorized, \$10,000,000; amount issued, \$7,687,800; sold at par; interest, one tenth of 1 to 5\frac{2}{3} per cent, payable on redemption; first issue, first fiscal quarter of 1847; outstanding June 30, 1896, \$5,900; included in the Finance Report under the title of "Old Debt." "Unadjusted, short, \$1,000."

War with Mexico was declared May 13, 1846. To prevent a threatened deficiency of \$12,587,000, as per report of the Secretary of the

Treasury, should the war continue until July 1, 1847, this loan was provided. The notes were to be issued as emergency required, except as otherwise provided (as were all the "Treasury notes prior to 1846"), under the limitations and other provisions of the act of October 12, 1837. In place of any of this issue redeemed, authority was given to issue others, within the limit outstanding at any one time. The interest paid was \$96,524.88.

COPY OF OBLIGATION.

Treasury note (act July 22, 1846). Receivable in No. -Payment THE UNITED STATES of all Public Dues. Promise to pay one year after date to ----- or order One Hundred Dollars with interest at the rate of — per centum. WASHINGTON, -**-, 184-**Countersigned: Register. Treasurer of the United States. LOAN OF 1846. (ACT OF JULY 22, 1846.) Length of loan, ten years; redeemable November 12, 1856; amount

authorized, \$10,000,000; amount issued, \$4,999,149.45, of which \$363,900 was sold at an average rate of .277 per cent premium, the balance at par; interest, 6 per cent, payable semi-annually; first issue, second fiscal quarter of 1847; final redemption, fourth fiscal quarter of 1861.

The act providing for the issue of Treasury notes, authorized the borrowing of such an amount of money as the President might deem proper (instead of issuing the whole amount of Treasury notes), under the same provisions as contained in the act of April 15, 1842; such sum, together with the Treasury notes issued, not to exceed \$10,000,000. From November 18 to December 21, 1846, \$363,900 of this stock was sold at a premium, as per above, the same amounting to \$1,007.75. On October 4, 1852, \$3,000 was purchased at 6.83 (not at 183 per cent, as Bayley has it) above par, the premium paid amounting to \$204.89, not, as Bayley gives it, \$558.77; difference, \$353.88, which amount he is in excess in the total for the loan. From May 21 to June 29, 1853, inclusive, \$65,200 was purchased at rates from 6.22 to 7.57 above par, the premium paid being \$4,317.72. From 1854 to 1857, inclusive, \$4,896,939.71 was purchased at various rates from eighteen one hundredths of 1 to 9 per cent above par, the premium paid amounting to \$221,329.88; aggregate, \$225,852.49. \$183 commission was paid, and the interest amounted to \$2,414,256.69.

TREASURY NOTES OF 1847. (ACT OF JANUARY 28, 1847.)

Length of loan (authority for issuing), up to six months after ratification of peace with Mexico; notes redeemable after one or two years from their respective dates; amount authorized, \$23,000,000; amount issued, \$26,122,100, including reissues; sold at par; interest, $5\frac{1}{2}$ and 6 per cent, payable on redemption; after maturity of notes, to cease at the expiration of sixty days' notice; first issue, third calendar quarter of 1847; outstanding June 30, 1896, \$950; included in the Finance Report under the title of "Old Debt." "Unadjusted, over, \$350."

This issue was rendered necessary in view of an anticipated further deficit. The notes were to be issued as exigency required. Authority was given to borrow money on the credit of the same. They were

transferable by delivery and assignment indorsed thereon. They were to be paid to such creditors as chose to receive them at par, and were made receivable in all payments to the Government. When redeemed other notes might be issued in their stead, provided the amount outstanding, together with the stock authorized by the same act (and in which they, as well as notes issued under previous acts could be funded), did not at any time exceed \$23,000,000. The authority under the act of July 22, 1846, to issue Treasury notes, was extended by the fifteenth section, to the period fixed by this act, on the same terms and conditions; the issue under said section, however, not to exceed \$5,000,000. The interest paid was \$1,576,882.75.

THE UNITED STATES

Promise to pay Five Hundred Dollars to the order of ———, with interest at six per cent per annum.

Washington, —, 184—.

Countersigned:

Register of the U. S. Treasury.

Treasurer of the United States.

Principal fundable, at the option of the holder, in United States six per cent stock bearing semiannual interest, redeemable after 1867.

LOAN OF 1847. (ACT OF JANUARY 28, 1847.)

Length of loan, twenty years eleven months; redeemable January 1, 1868; amount authorized, \$23,000,000; amount issued, \$28,230,350; sold at rates varying from 1½ to 2 per cent premium; interest, 6 per cent, payable semi-annually; first issue, third fiscal quarter of 1847; outstanding June 30, 1896, \$950; included in the public debt statement under the title of "Old Debt."

The act authorized the issue of \$23,000,000 in Treasury notes, or stock for any portion of the amount; both not to exceed said sum. Section 14 authorized the conversion of Treasury notes of this or any previous act into said stock; hence the apparent overissue. From June 30, 1847 to August 15, 1849, a portion of this stock was sold at a premium. The premium realized on this loan was \$74,884.98. From April 20, 1849 to October 17, 1857, \$18,815,100 was purchased at rates ranging from 1.26 to 21.58 per cent above par, the amount paid being \$3,463,432.63. Bayley gives \$2,674.27 more premium paid on this loan than the books and accounts show. He is in excess, respectively, in 1851 and 1854, \$80.32 and \$4,206.97; the latter being a net repayment which he failed to deduct; and he is less in 1853, \$1,613.02, cause undetermined. From October 20, 1866 to June 27, 1867, \$2,194,050 was purchased at from 1½ to 8 per cent below par, the discount amounting to \$132,104.25; and from July 2, 1867 to February 7, 1868, \$303,850 was purchased at from 1 to 1½ per cent below par, the discount being \$3,712; total, \$135,816.25. Bayley did not get this, it is presumed, owing to the fact that (the redemption account having been charged with the full amount) the discount was covered in as a "profit." There was paid \$2,396.42 commission, and \$17,433,341.92 interest on the loan.

BOUNTY-LAND SCRIP. (ACT OF FEBRUARY 11, 1847.)

Length of loan, indefinite; redeemable at the pleasure of the Government; amount authorized, indefinite; amount issued, \$233,075; sold at par; interest, 6 per cent, payable semi-annually; first issue, fourth fiscal quarter of 1847; outstanding June 30, 1896, \$3,000, included in the Finance Report under the title of "Old Debt."

The act providing for the issue of a warrant for 160 or 40 acres of land, in favor of each enlisted man for a term of enlistment of twelve months or less, respectively, who served in the Army during the war with Mexico, and was honorably discharged, or died while in the service, allowed everyone entitled, the option to receive such warrant or a Treasury scrip for \$100 or \$25, according to the term for which the soldier enlisted. Certificates to the amount of \$400 were canceled, having been improperly obtained. The interest paid was \$13,782.68.

LOAN OF 1848. (ACT OF MARCH 31, 1848.)

Length of loan, twenty years; redeemable after July 1, 1868; amount authorized, \$16,000,000; amount issued, \$16,000,000; sold at rates from 3.02 to 4.05 per cent premium; interest, 6 per cent, payable semi-annually; first issue, first fiscal quarter of 1849; final redemption, December 31, 1872.

The President, in his message, having deemed it probable that if the war with Mexico continued until July 1, 1848, the expenditures would exceed the revenues by about \$16,000,000, the act was passed authorizing this loan. There was realized \$487,191.16 premium on the sale of the loan. From 1849 to 1858, inclusive, there was purchased of this stock \$7,091,658.20 at rates ranging from 8.185 to 22.46 per cent above par; total paid, \$1,253,134.58. Bayley gives \$1,876.50 less premium paid on this loan than the books and accounts show. He is in excess in 1849, \$2,899.63, "short interest" deducted, in Report 100449, from premium due; and he is less in 1853, \$569.16, undetermined, and in 1854, \$4,206:97, being the net counter payment on account of the repayment of the same amount in the loan of 1847 in the same year. in correction of an error which occurred in 1853. From October 15, 1866 to June 27, 1867, \$886,400 of this stock was purchased at from $1\frac{3}{4}$ to 17.3 per cent below par, the discount amounting to \$81,401.25; from July 2 to October 19, 1867, \$226,350 was purchased at from 1 to 2 per cent below par, the discount amounting to \$3,999.50; and on July 6, 1868, \$1,602,500 was purchased at from one eighth to one fourth of 1 per cent below par, the discount amounting to \$3,691.25; total, \$89,092. Bayley did not get this, it is presumed, owing—as in the loan of 1847 to the fact that (the redemption account having been charged with the full amount) the discount was covered in as a "profit." Of \$721.37 commission paid, \$66.25 was paid out of the "Expenses of the national loan" in 1864. The interest paid was \$13,127,734.29.

TEXAN INDEMNITY STOCK. (ACT OF SEPTEMBER 9, 1850.)

Length of loan, fourteen years; redeemable January 1, 1865; amount authorized, \$10,000,000; amount issued, \$5,000,000; sold at par; interest, 5 per cent, payable semi-annually (January and July); first issue, third fiscal quarter of 1851; outstanding June 30, 1896, \$20,000; included in the public debt statement under the title of "Old Debt."

The stock authorized by the act named was to be issued to Texas in satisfaction of all claims against the United States arising out of the annexation of said State. But \$5,000,000 was issued, as a subsequent act, of February 28, 1855, provided that the creditors of Texas should be paid in cash, and increased the amount to be paid them to \$7,750,000, to be divided pro rata among such as were comprehended in the first act. From 1854 to 1858, inclusive, \$1,539,000 of this stock was purchased at rates ranging from 5.14 to 12 per cent above par, the premium paid In 1864 \$992,000 was redeemed, as per Receipts being \$117,534.26. and Expenditures, "at a deduction of 4 per cent," being a trifle over that rate, the discount amounting to \$39,699.39. this amount at all. In 1865 \$427,000 was redeemed at 4 per cent below par, but the discount of \$17,080 was not covered in as such until December 23, 1870, by warrant No. 467 of that date. \$14.73 and \$15.89 discount on the redemption of \$5,000 and \$8,000, also in 1865, having at first been erroneously charged to interest account, was subsequently, by warrant No. 269 and counter warrant No. 76, also of December 23, 1870, charged to principal and credited to "Unclaimed interest" account. It has not been found to have ever been otherwise covered in. Total discount on redemption, \$56,810.01. The interest paid was \$2,704,173.52.

For the Secretary of the Treasury:

TREASURY NOTES OF 1857. (ACT OF DECEMBER 23, 1857.)

Length of loan, one year; notes redeemable one year from date of issue; amount authorized not to exceed \$20,000,000 outstanding at any one time; amount issued, \$52,778,900; sold at par; interest at various rates, from 3 to 6 per cent, payable on redemption, to cease after maturity at the expiration of sixty days' notice; first issue, third fiscal quarter of 1858; outstanding June 30,1896, \$700; included in the Finance Report under the title of "Old Debt." "Unadjusted, short, \$1,900."

This loan was authorized through the Secretary of the Treasury reporting that so great was the falling off in the revenues from customs, owing

to the monetary crisis of that period (the banks having suspended specie payments), it would be absolutely necessary to provide the Treasury with some additional means of meeting the demands upon it. The first issue was limited to \$6,000,000, at not more than 6 per cent interest, to be expressed on the notes; the remainder to be issued at the lowest rate, not to exceed 6 per cent. The notes were transferable by indorsement and delivery, and receivable in all payments to the United States. The Secretary was authorized to borrow money on the credit of the notes. Others might be issued in place of those redeemed, the power to issue to cease January 1, 1859. Notes were issued bearing interest as follows: \$6,323,600 at 3 per cent, \$107,000 at 3½ per cent, \$110,000 at 3½ per cent, \$768,000 at 4per cent, \$688,000 at 4per cent, \$10,055,700 at 4per cent, \$4,532,500 at 4per cent, \$7,533,900 at 5per cent, \$8,204,500 at 5per cent, \$3,514,100 at 5per cent, and \$10,941,600 at 6per cent. The interest paid was \$2,603,572.69.

LOAN OF 1858. (ACT OF JUNE 14, 1858.)

Length of loan, fifteen years; redeemable after January 1, 1874; amount authorized, \$20,000,000; amount issued, \$20,000,000; sold at an average premium of 3.59 per cent; interest, 5 per cent, payable semi-annually (January and July); first issue, first fiscal quarter of 1859; outstanding June 30, 1896, \$2,000; included in the public debt statement under the title of "Old Debt."

The appropriations having, as represented, been increased by legislation nearly \$10,000,000 over, and the revenue from customs having fallen about the same amount below the estimates for the current fiscal year, while \$25,157,058.27 public debt would fall due within ten years, this loan under the circumstance was deemed indispensable. The certificates of stock were to be issued for not less than \$1,000 each, with coupons attached, but by the act of March 3, 1859, the issue of registered stock was also authorized. The premium realized was \$719,365.72. There was a rebate of interest of \$1,857.88. The interest paid was \$15,120,705.06.

Register of the Treasury.

LOAN OF 1860. (ACT OF JUNE 22, 1860.)

Length of Ioan, ten years; redeemable January 1, 1871; amount authorized, \$21,000,000; amount issued, \$7,022,000; sold at rates varying from par to 1.45 per cent premium; interest, 5 per cent, payable semi-annually; first issue, second fiscal quarter of 1861; final redemption, March 31, 1892.

In the estimated means of the Treasury for the current and next fiscal years, no provision having been made for the redemption of the \$20,000,000 Treasury notes the authority for the reissue of which would cease "June 30 next," this loan was designed for that purpose, and to replace in the Treasury any amount of such notes that had been paid in for public dues. The failure to realize the whole amount of the loan was caused by the political troubles preceding the war of the rebellion. Bids for the whole \$10,000,000, advertised September 8, 1860, were speedily made. It, however, soon becoming evident that war was inevitable, during the commercial crisis which ensued, a portion of the bidders forfeited their deposits, and the loan was withdrawn from the market. The premium realized on the sale was \$33,216.20. There was a rebate of interest of \$28.62. The forfeiture on bids amounted to \$29,990. The interest paid was \$3,516,223.48.

TREASURY NOTES OF 1860. (ACT OF DECEMBER 17, 1860.)

Length of loan, one year; notes redeemable after one year from dates of issue; amount authorized, not to exceed \$10,000,000 outstanding at any one time; amount issued, including reissues, \$10,010,900; sold at par; interest, from 6 to 12 per cent, payable on redemption; first issue, second fiscal quarter of 1861; final redemption, June 17, 1868.

Authority for the issue of these notes became necessary when it was found that but a portion of the \$21,000,000 loan authorized by the act

of June 22, 1860, could be obtained. Notes were not to be issued of denominations less than \$50. They were to be issued at 6 per cent, or such rate of interest as might be offered by the lowest bidders who would receive them at par, after public advertisement. They were made transferable by indorsement and delivery, and receivable in all payments to the United States. New notes might be issued in place of those redeemed within the limit imposed, the power to issue and reissue to cease January 1, 1863. Notes were issued bearing interest as follows: \$70,200, at 6; \$5,000, at 7; \$24,500, at 8; \$33,000, at $8\frac{1}{2}$; \$10,000, at $8\frac{3}{4}$; \$65,000, at 9; \$10,000, at $9\frac{1}{4}$; \$160,000, at $9\frac{1}{2}$; \$77,000, at $9\frac{3}{4}$; \$1,027,500, at 10; \$266,000, at $10\frac{1}{4}$; \$623,000, at $10\frac{1}{2}$; \$1,367,000, at $10\frac{3}{4}$; \$1,432,700, at 11; and \$4,840,000, at 12 per cent. The interest paid amounted to \$1,147,229.83.

Washington, ——, 186—Countersigned:

Register of the U. S. Treasury.

Receivable in payment of all public dues.

LOAN OF FEBRUARY, 1861. (ACT OF FEBRUARY 8, 1861.)

Length of loan, not less than ten nor more than twenty years; redeemable December 31, 1880; amount authorized, \$25,000,000; amount issued, \$18,415,000; sold at an average rate of 10.97 per cent discount; interest, 6 per cent, payable semi-annually (January and July); first issue, third fiscal quarter of 1861; outstanding June 30, 1896, \$5,000; included in the public debt statement under the title of "Old Debt."

The Secretary of the Treasury had reported that there would be an actual deficit in the revenues of \$21,677,524. As besides this, the deficiency bill appropriated between two and three million dollars, the deficiency it was estimated would be \$24,000,000, while there was in the Treasury on January 1, 1861, but \$2,233,220, and at least \$5,000,000 were required to carry on the daily operations; hence the necessity for this loan. As prescribed, the funds were to be used in the payment of current demands, for the redemption of outstanding Treasury notes, and to replace in the Treasury the sum of such notes as had been paid in for public dues. The following stock was issued at the average rates as follows: \$8,006,000 at \$90.47 $_{10}^{\, \circ}$; \$3,099,000 at \$94.01, and \$7,310,000 at \$85.34 $_{100}^{\, \circ}$ per hundred. In the fiscal year 1880 there was purchased per appropriation account \$2,837,000, at rates ranging from 2.21+to 3.04 per cent above par, the premium paid amounting to \$74,161.95. Bayley, although including this period, does not give this premium. In the fiscal year 1881, up to December 31, 1880, \$7,638,000 was purchased at rates varying from .24 to 2.13+ per cent, the premium paid being \$51,277.58.

(See note to 10.40 loan.) There was a rebate of interest on this loan of \$95.08. The discount on the issue amounted to \$2,019,776.10. The total premium paid was \$125,439.53, and the interest \$21,695,013.23.

Washington, ——, 18—. Entered ——. Recorded ——.

Register of the Treasury.

TREASURY NOTES OF 1861. (ACT OF MARCH 2, 1861.)

Length of loan, part sixty days, and two years; redeemable sixty days, and two years from date; amount authorized, indefinite; amount issued, \$35,364,450; sold at rates ranging from par to 1.27 per cent premium; interest, 6 per cent, payable on redemption; first issue, fourth fiscal quarter of 1861; outstanding June 30, 1896, \$2,450; included in the public debt statement under the title of "Old Debt." "Unadjusted, short \$1,400."

On December 22, 1859, it was estimated by the Secretary that there would be a balance in the Treasury June 30, 1861, of only \$3,530,196.61, which left no margin for any additional appropriations, or provisions that might be determined upon by Congress within this period, for the payment of any portion of the public debt, which then amounted to nearly \$60,000,000. Following this, after many of the Southern members had withdrawn, the above act was passed. It provided, first, for a loan not to exceed \$10,000,000, redeemable on three months' notice after July 1, 1871, and payable without notice July 1, 1881; the same to be applied to the payment of appropriations made by law and the balance of Treasury notes then outstanding. If proposals for the loan were not satisfactory, the issue of Treasury notes for the full amount was authorized, and also for the whole or any part of the money which was authorized to be borrowed by previous acts. notes were to be for not less than \$50 each. They were to be received in all payments to the United States. Interest was to cease upon call, after maturity. Of the amount issued \$22,468,100 was redeemable in two years, and \$12,896,350 sixty days after date. The war of the rebellion, which began a few weeks after the passage of the bill, necessitated an increase in the issue far in excess of the amount originally contemplated. The premium realized was \$414.70. The interest paid was \$1,001,564.61

Treasury note (act March 2, 1861).

Treasurer of the U. S.

Receivable in payment of all public dues.

OREGON WAR DEBT. (ACT OF MARCH 2, 1861.)

Length of loan, twenty years; redeemable July 1, 1881; amount authorized, \$2,800,000; amount issued, \$1,090,850; sold at par; interest, 6 per cent, payable semi-annually (January and July); first issue, first fiscal quarter of 1862; outstanding June 30, 1896, \$2,500; included in the public debt statement under the title of "Old Debt."

The amount authorized was appropriated for the payment of expenses incurred by the Territories of Washington and Oregon in the suppression of Indian hostilities in 1855 and 1856. Section 4 of the act

pression of Indian hostilities in 1855 and 1856. Section 4 of the act provided that, if deemed expedient, coupon bonds of denominations not less than \$50, might be issued to the claimants or their legal heirs, as per terms above. In the fiscal year 1863 (as per the Treasurer's books from August 28, 1862 to March 3, 1863), \$69,550 of these bonds were purchased at rates ranging from three-eighths of 1 to 2 per cent below par. The discount no doubt amounted to \$1,180.19, but one-eighth of 1 per cent commission, amounting to \$86.95, evidently was offset against it. The balance, \$1,093.24, was not covered in until the fiscal year 1869, by warrant No. 610, of September 30, 1868, then appearing as a "profit." Probably owing to this, and the further fact that the warrants and accounts charging up and giving credit for the full redemption made no reference to it, Bayley in his book failed to note the transaction. Of \$14,740.42 total premium paid, Bayley did not show \$13,331.77 paid, per appropriation account, prior to 1881. The interest paid to 1885, inclusive, was \$1,139,425.38, but a net excess of repayment of \$14,547 since, reduced it to \$1,124,878.38. There was a rebate of interest on this loan of \$10.44.

LOAN OF JULY AND AUGUST, 1861. (ACTS OF JULY 17 AND AUGUST 5, 1861.)

Length of loan, twenty years; redeemable at the pleasure of the Government, after June 30, 1881; amount authorized, \$250,000,000; amount issued, \$189,321,350; sold, the first \$50,000,000 at 10.67 + per cent discount, the balance at par; interest, 6 per cent, payable semi-annually (January and July); \$127,597,200 continued at 3½ per cent; first issue, July, 1861, outstanding June 30, 1896, \$48,850, including \$5,600, continued at 3\frac{1}{2} per cent; included in the public debt statement under the title of "Old Debt."

Congress met in extra session July 4, 1861. Eleven States had attempted to secede from the Union and were in actual revolt. enty five thousand volunteers had been called into the field to suppress the rebellion. The Secretary of the Treasury estimated the expenditures for the fiscal year 1862 at \$318,519,581.87, which eventually proved more than \$240,000,000 less than the actual expenditures. The President asked authority to borrow \$400,000,000, and this amount, added to the whole revenues of the Government, was more than \$100,000,000 short of the expenditures. Under these circumstances the above acts were passed. Of the above issue, under section 1 of the first act, bonds to the amount of \$50,000,000 were issued. Though the interest began July 1, they did not pass to the purchasers until November 16, 1861. They were sold at 10.67 + per cent below par, the discount amounting to \$5,338,768.09, but this was offset by \$1,134,246.57 accrued interest from July 1 to November 15, 1861, inclusive, reducing it to \$4,204,521.52. The remainder of the bonds, \$139,321,350, was issued in exchange for 7-30s, as authorized by section 1 of the second act. \$1,864,961.15 premium paid, Bayley does not show \$1,376,085.04 paid, per appropriation account in 1880. The balance was paid after 1880 (see note to 10-40 loan). Of \$200,395,857.49 interest paid, \$3,103,449.95 was at 34 per cent. There was a rebate of interest of \$1,394.16 on this loan.

(Memorandum printed across face of bond:) At the request of and for value received by the owner of this bond the same is continued during the pleasure of the Government to bear interest at the rate of three and one-half (3½) per centum per annum from July 1st, 1881, payable semiannually as provided in Treasury Circular No. 42, dated April 11, 1881.

TEMPORARY LOAN OF 1861. (ACTS OF JULY 17 AND AUGUST 5, 1861.)

Length of loan, five months; reimbursable as per agreement; amount borrowed, \$50,000,000, obtained at par; interest, 7.3 per cent, payable at reimbursement; negotiated August 19, 1861; final reimbursement,

January 14, 1862.

This loan was negotiated with the associated banks, under the above acts, August 19, 1861, as follows, viz: Of Boston, \$10,000,000; Philadelphia, \$5,000,000, and New York, \$35,000,000. It was reimbursed as follows: In money, "by warrants," in various amounts, running continuously from August 31, 1861 to January 14, 1862—to Boston banks, \$8,875,000 (report 143268); Philadelphia, \$4,437,500 (report 144192), and New York, \$31,062,500 (report 145243); total, \$44,375,000; in 7.3 bonds of the issue dated August 19, 1861, paid in final settlement, to balance, January 14, 1862—to Boston banks, \$1,125,000; Philadelphia, \$562,500, and New York, \$3,937,500; total, \$5,625,000; aggregate, \$50,000,000. With the cash payments interest was paid on the same to the amounts as follows: To Boston banks, \$124,258 (report 143279); Philadelphia, \$62,129 (report 144213), and New York, \$434,903 (report 145977); total, \$621,290. The whole \$50,000,000 having in the fiscal year 1862, per the Receipts and Expenditures, been covered in as a part of the receipts on account of the regular 7.30s of 1861, in balancing the same Bayley properly threw out of that loan the \$44,375,000 paid, as shown, in cash, and retained the \$5,625,000 as a subscription thereto. He did not state this loan at all.

SEVEN-THIRTIES OF 1861. (ACT OF JULY 17, 1861.)

Length of loan, three years; redeemable August 19 and October 1, 1864; amount authorized, indefinite; amount issued, \$139,999,750; sold at an average premium of .465 of 1 per cent; interest, 7.3 per cent, payable semi-annually; first issue, August 19, 1861; outstanding June 30, 1896, \$10,700; included in the public debt statement under the title of "Old Debt." "Unadjusted, short, \$48,150."

The act authorized the borrowing of a sum not exceeding \$250,000,000, for which coupon or registered bonds or Treasury notes might be issued in such proportions as deemed advisable, the bonds to bear interest not exceeding 7 per cent, the notes to be of any denomination not less than \$50, with interest at the rate of 7.3 per cent per annum. The supplemental act of August 5, 1861, authorized the issue of a part of the bonds authorized by the preceding act, at 6 per cent, these bonds to be exchanged for Treasury notes bearing 7.3 per cent interest per annum, but no such bond was to be issued for less than \$500, nor was the whole amount of such bonds to exceed the amount of Treasury notes bearing 7.3 per cent interest. \$650,320.44 premium was realized on the sale of these bonds. Commission to the amount of \$36,504.35 was paid out of the "Expenses of the national loan" in 1862 and 1863. The interest paid was \$27,645,258.07.

TEMPORARY LOAN OF 1862. (ACTS OF FEBRUARY 25, MARCH 17, AND JULY 11, 1862, AND JUNE 30, 1864.)

Length of loan, indefinite; redeemable after ten days' notice; amount authorized, \$150,000,000; highest amount outstanding June 12, 1866, \$149,500,000; amount issued, including reissue, \$716,099,247.16; sold at par; interest, 4, 5, and 6 per cent, according to contract, payable on redemption; first issue, third fiscal quarter of 1862; outstanding June 30, 1896, \$2,850; included in the public debt statement under the title of "Old Debt."

The first act authorized temporary loan deposits of \$25,000,000 for not less than thirty days, with interest at 5 per cent per annum, payable after ten days' notice. The second act authorized the increase of such deposit to \$50,000,000, at rates of interest not to exceed 5 per cent. The third act authorized a further increase of deposits to \$100,000,000. The fourth act authorized a further increase not to exceed \$150,000,000, at interest not to exceed 6 per cent, or a decrease of the rate of interest on ten days' notice, as the public interest might require. The interest paid was \$18,784,096.84.

LEGAL TENDER NOTES. (ACTS OF FEBRUARY 25, 1862, JULY 11, 1862, AND MARCH 3, 1863.)

Amount authorized, \$450,000,000; amount issued, including reissues, \$2,786,985,808; highest amount outstanding June 30, 1864, \$449,338,902; sold at par; interest, none; first issue, fourth fiscal quarter of 1862;

outstanding (uniformly since 1880, inclusive, up to which time the issue was \$1,640,559,947), \$346,681,016. From 1880 the issues, yearly, were

for the exact amounts of the redemptions.

The first act authorized the issue of \$150,000,000 in notes, payable to bearer, of denominations not less than \$5; \$50,000,000 to be applied to the redemption of demand notes authorized by the act of July 17, 1861, the notes to be a legal-tender in payment of all debts, public and private, within the United States, except duties on imports and interest on the public debt, and to be exchangeable for 6 per cent The second act authorized an additional issue of \$150,000,000. not more than \$35,000,600 to be of a lower denomination than \$5, and no note for a fractional part of a dollar. The third act authorized an additional issue of \$150,000,000 of denominations not less than \$1. It also limited the time in which Treasury notes might be redeemed for United States bonds, to July 1, 1863. The amount authorized by this act was to be in lieu of \$100,000,000 authorized by the resolution of January 17, 1863.

United States of America. This note is a legal tender at its face value for all debts public and private except duties on imports and interest on the public debt. Counterfeiting or altering this note, or passing any counterfeit or alteration of it, or having in possession any false or counterfeit plate or impression of it, or any paper made in imitation of the paper on which it is printed, is felony, and is punishable by \$5,000 fine, or 15 years imprisonment at hard labor, or both.

FIVE-TWENTIES OF 1862. (ACTS OF FEBRUARY 25, 1862, MARCH 3, 1864, AND JANUARY

Length of loan, five or twenty years; redeemable after May 1, 1867; payable May 1, 1882; amount authorized, \$515,000,000; amount issued, \$514,771,600; sold at an average premium of .049 + of 1 per cent; interest, 6 per cent, payable semi-annually (May and November); first issue, fourth fiscal quarter of 1862; outstanding June 30, 1896, \$218,600; included in the public debt statement under the title of "Old Debt."

The first act, in order to provide for funding the Treasury notes and floating debt of the United States, authorized the issue of \$500,000,000 in bonds, redeemable at the pleasure of the Government after five years, and payable twenty years from date. The second act authorized an additional issue of \$11,000,000 in bonds to persons who subscribed for the loans by January 21, 1864. The third act authorized an additional issue of \$4,000,000 of these bonds, to be sold in the United States or Europe. The correct premium realized on the sale was \$252,875. Bayley gives "the premium realized on a portion of the issues of this loan, as stated in the Receipts and Expenditures, at \$1,826,868.75." Of this amount \$1,573,993.75 was on the sale of five-twenties of June, 1864, as per miscellaneous covering warrant No. 408 of September 30,

From March 12 to 16, 1875, \$1,096,500 of these bonds were purchased for the sinking fund, by the assistant treasurer of the United States at New York, at one eighth of 1 per cent below par, the discount being \$1,370.62, as per pay warrant No. 57 and miscellaneous covering warrant No. 1487 of March 31, 1875, the latter filed with report 26474. Bayley does not give this. There was a rebate of interest on this loan of \$18,300.61. From the fiscal year 1871 to that of 1874, both inclusive, there was redeemed \$345,255,450 at from par to rates ranging from 6.47 to 15.9 per cent above par, the premium paid being \$6,786,017.29. Bayley does not show any premium as paid on this loan. Commission to the amount of \$1,441,369.68 was all paid out of the "Expenses of the national loan" in 1863, 1864, and 1865. The interest paid was \$298,982,775.82.

CERTIFICATES OF INDEBTEDNESS OF 1862. (ACTS OF MARCH 1 AND 17, 1862, AND MARCH 3, 1863.)

Length of loan, one year; redeemable one year from date; amount authorized, no limit; amount issued, including reissues, \$561,753,241.65; sold at par; interest, 6 per cent; first issue, third fiscal quarter of 1862; outstanding June 30, 1896, \$3,000; included in the public debt statement under the title of "Old Debt."

The first act authorized the issue of the certificates named, to public creditors who might elect to receive them, payable one year from date, or earlier, at the option of the Government. The second act authorized the issue of these certificates in payment of disbursing officers' The third act made the interest payable in lawful money. Bayley mentions "\$3,183.75 received in 1866 on account of premium" on this loan. It was really a part of \$23,608.75 discount on \$20,000,000 certificates purchased before maturity. Of said amount \$20,425 (deposited August 5, 1862,) was covered in by warrant No. 95 of August 7, 1862, as a "profit." The \$3,183.75 balance (deposited December 23, 1862) was covered in by warrant No. 743 of June 30, 1866, erroneously as princi-Subsequently, by warrant No. 276 and counter warrant No. 511 of December 28, 1870, it was charged back to principal and erroneously covered as premium. A "gain" of \$3,452.50 on \$500,000 purchased through Jay Cooke & Co., March 6, 1866, was covered in as part of warrant No. 738 of December 31, 1867. By warrant No. 430 of March

11, 1869, there was covered in \$153,200.63 as a "profit" on the purchase of certificates of this loan. These sums make \$180,261.88 discount. Bayley did not get this. The interest paid was \$31,147,265.76.

Register of the Treasury.

Treasurer of the United States.

Issued on account of ——, No. ——, dated ———, 1864.

Act of March 1, 1862.

FRACTIONAL CURRENCY. (ACTS OF JULY 17, 1862, MARCH 3, 1863, JUNE 30, 1864, AND JUNE 21, 1879.)

Redeemable on presentation; amount authorized, \$50,000,000; amount issued, including reissues, \$368,720,079.51; sold at par; interest, none; first issue, first fiscal quarter of 1863; outstanding June 30, 1896—less

\$8,375,934 estimated as lost or destroyed—\$6,891,184.14.

The first act authorized the use of postage and other stamps as currency, and made them receivable in payment of all dues to the Government less than \$5. The fourth section of the second act authorized the issue of fractional notes in lieu of postage and revenue stamps, commonly called postal currency; made them exchangeable in sums not less than \$3 for United States notes, and receivable for postage or revenue stamps, and in payment of dues to the Government except duties on imports, less than \$5, and limited the amount to \$50,000,000. The fifth section of the third act authorized an issue of \$50,000,000 in fractional currency, and provided that the whole amount of these notes outstanding at any time should not exceed this sum. Section 3 of the fourth act directed to be paid out on account of arrears of pensions, the legaltender currency held as a special fund for the redemption of fractional currency under section 1 of joint resolution 17 of July 22, 1876, and provided for its redemption, on presentation, out of the general funds. The \$8,375,934 "lost or destroyed" would constitute a profit on this loan.

ONE AND TWO-YEAR NOTES OF 1863. (ACT OF MARCH 3, 1863, SECTION 2.)

Length of loans, one and two years, respectively; redeemable one and two years from date; amount authorized, \$400,000,000; amount issued, of one-year notes, \$44,520,000, of two-year notes, \$166,480,000; total, \$211,000.000; sold at par; interest, 5 per cent, payable on redemption; first issue, two-year notes, first fiscal quarter of 1864, one-year notes, third fiscal quarter of 1864; outstanding June 30, 1896, one-year notes, \$31,965; two-year notes, \$27,300, total, \$59,265; included in the public debt statement under the title of "Old Debt." "Unadjusted,

short, one-year notes, \$40, two-year notes, \$100; total, \$140."

On December 4, 1862, the deficiency over receipts for the fiscal year 1864 and the remainder of 1863, was estimated by the Secretary of the Treasury at \$899,300,701.22. The public debt at the time was stated at \$783,804,252.64, and it was estimated that if the war continued to July 1, 1864, it would amount to \$2,000,000,000. It was said to be simply impossible to continue so mighty a struggle by the use of gold and silver only. Nay, if all the specie in the country, and all the currency of the loyal States, could be poured into the public treasury, the whole would not meet the demands of the war up to July 1, 1864. England and France in time of war, both extended their paper currency to the utmost limits. Even the Bank of England, strong as it was, paid no specie from 1791 to 1821, and its notes were sold as late as 1814 at a discount of 25 per cent. To meet these conditions the act was passed, authorizing the above and three following loans. These Treasury notes were to be of denominations not less than \$10, and were made a legal-tender for their face value. Up to August 10, 1875, a separate account was kept with each series, but, in conformity with the direction of the First Comptroller of that date, the two accounts have since been consolidated. The interest paid on these loans amounted to \$8,526,146.86.

LOAN OF 1863. (ACTS OF MARCH 3, 1863 AND JUNE 30, 1864.)

Length of loan, seventeen years; redeemable July 1, 1881; amount authorized, \$75,000,000; amount issued, \$75,000,000; sold at an average premium of 4.453 per cent; interest, 6 per cent, payable semi-annually (January and July); \$50,457,950 continued indefinitely at 3½ per cent;

first issue, fourth fiscal quarter of 1864; outstanding June 30, 1896, \$8,200, inclusive of \$100 continued at $3\frac{1}{2}$ per cent; included in the

public debt statement under the title of "Old Debt."

The first-named act authorized the issue of \$900,000,000 in bonds; \$300,000,000 for the fiscal year 1863 and \$600,000,000 for the fiscal year 1864, of denominations of not less than \$50, redeemable in not less than ten nor more than forty years; principal and interest payable in coin. The second act, section 3, repealed so much of the preceding act as limited the authority thereunder to the current year, and the authority altogether except as to \$75,000,000 of bonds for which subscriptions had already been invited. The premium on the sale was \$3,339,593.80. This is \$157.50 less than given by Bayley, as follows: Included in covering warrant No. 537 of December 31, 1864, \$7.68 was found by the Treasurer's books and transcript of August 27, 1864, to be accrued interest on seven-thirties of 1864. Warrant No. 446 of December 23, 1870, covered in \$150.22 as premium. It was really the difference between \$461.33 accrued interest, paid in currency (covered by warrant No. 653 of September 30, 1868) on \$2,000 premium (covered by warrant No. 651 of even date) from July 11, 1864, and the gold value, and it (as well as the \$464.33) has been carried, as it should have been, to ""profit." Of \$748,549.80 premium paid, Bayley does not show \$549,035.18 paid, per appropriation account in 1880. The balance was paid after. (See note to 10.40 loan.) Of \$76,820,494.02 interest paid on this loan, \$1,929,147.81 was at 3½ per cent. There was a rebate of interest of \$404.22. There was a "profit" of \$614.55 on the loan as shown above.

[Seal of U.S. Treas. Dept.]

Are indebted unto ——, or assigns, in the sum of One Thousand Dollars, redeemable after 30th day of June, 1881, with interest from the first day of ——, 18—, inclusive, at six per cent per annum, payable on the first day of January and July

in each year. This debt is authorized by act of Congress approved March 3d, 1863, and is transferable on the books of this Office.

Washington, —, 18-.

Series of 1873. Act of March 3d, 1863.

Register of the Treasury.

(Memorandum printed across the face of bond:) At the request of, and for value received by, the owner of this bond, the same is continued during the pleasure of the Government, to bear interest at the rate of three and one-half $(3\frac{1}{2})$ per centum per annum from July 1st, 1881, payable semi-annually, as provided in Treasury circular No. 42, dated April 11, 1881.

COMPOUND-INTEREST NOTES. (ACTS OF MARCH 3, 1863 AND JUNE 30, 1864.)

Length of loan, three years; redeemable three years from date; amount authorized, \$400,000,000; amount issued, \$266,595,440; sold at par; interest, 6 per cent, compound, payable on redemption; first issue, fourth fiscal quarter of 1864; outstanding June 30, 1896, \$169,980; included in the public debt statement under the title of "Old Debt."

The first act authorized the issue of \$400,000,000 in Treasury notes, of denominations not less than \$10; interest not exceeding 6 per cent payable in lawful money; to be a legal-tender for their face value; redeemable not more than three years from date. The second act authorized the issue of \$200,000,000 in Treasury notes, of denominations not less than \$10; redeemable after three years from date, with interest not exceeding 7.3 per cent, payable in lawful money, at maturity; to be a legal-tender to the same extent as United States notes, for their face value, excluding interest. A discount on redemption, of \$116,731.35, as determined by the lists of purchases recorded in the Treasurer's office, arose as follows: \$54,556.59 was a gain on \$2,367,000; \$39,922.79 on \$1,945,000, and \$22,161.97 on \$5,268,970, purchased before maturity, through Jay Cooke & Co., in February, March, and April, 1866, and \$90 arose as a gain on \$1,333,610 of purchases in July, 1866. \$116,731.35 was covered in as a part of warrant No. 783 of December 31, 1867. Out of the appropriations for paying premium, all made prior to 1880, amounting to \$282,683.52, \$1,376.25 commission of the amount given as such was paid, and \$1.25 excess of premium paid and refunded, but erroneously covered as premium received, has been deducted; making the payment \$281,306.02. Bayley does not show either the discount realized or premium paid on this loan. Of \$7,382.37 commission paid, \$6,006.12 was paid in 1868, per report 22492, out of the "Expenses of the national loan." Of this amount, \$3,550 had previously been paid in 1867, as premium, per report 19808.

By act of Congress this note is legal tender for Ten Dollars, but bears interest at six per cent, compounded every six months, though payable only at maturity, as follows:

6 months' interest	30	Note	worth	10.30
One year	60	"	"	10.60
18 months	92	".	"	10.92
Two years	1.25	. "	"	11.25
Thirty months	1.59	"	"	11.59
Three years	1.94	"	" "	

This sum, \$11.94, will be paid the holder for principal and interest, at maturity of note, three years from date.

GOLD CERTIFICATES. (ACTS OF MARCH 3, 1863 AND JULY 12, 1882.) (FOR SILVER CERTIFICATES SEE PAGE 92.)

Payable on demand; amount authorized, indefinite; amount issued, including reissues, \$1,534,174,880.46; sold at par; interest, none; first issue, second fiscal quarter of 1866; outstanding June 30, 1896, \$42.818.189.

The fifth section of the first act authorized the deposit of gold coin and bullion with the Treasurer, or any assistant treasurer of the United States, in sums not less than \$20, and the issue of certificates therefor in denominations the same as United States notes; and these certificates were also authorized to be issued in payment of interest on the public debt. The amount was limited to a sum not greater than 20 per cent of the amount of coin and bullion in the Treasury, and they were made receivable for duties on imports. The second act provides that the issue of gold certificates shall be suspended whenever the gold coin and bullion reserved for the redemption of United States notes falls below \$100,000,000.

TEN-FORTIES OF 1864. (ACT OF MARCH 3, 1864.)

Length of loan, ten or forty years; redeemable after ten years; payable forty years from date, in coin; amount authorized, \$200,000,000; amount issued, \$196,118,300; sold at rates varying from par to 7 per cent premium; interest, 5 per cent, payable semi-annually (March and September), in coin; first issue, fourth fiscal quarter of 1864; outstanding June 30, 1896, \$35,350; included in the public debt statement under the title of "Old Debt."

The amount authorized was in lieu of so much of the loan authorized by the act of March 3, 1863, to which this was supplemental. Of \$1,499,728.56 premium realized on the sale, \$508,351.29 was premium on the loan, and \$991,377.27 premium on accrued gold interest paid in currency. Bayley and the Receipts and Expenditures give the premium realized as \$659,422.78. Of this amount, \$151,071.49, covered in by warrants Nos. 252 of June 13, and 518, 519, 530, 636, and 637 of June 30, 1864, was found by the schedules attached, to be premium on interest. The total amount given as premium on accrued interest in the Receipts and Expenditures (for 1864, 1866, 1867, and 1869, which in this instance Bayley did not take up) was \$10,606.69. To these two items have been added \$61.44, part of warrant No. 316 of December 14, 1864, erroneously covered as interest, and \$829,637.65 erroneously printed in the Receipts and Expenditures in 1865, as the same. In 1866 \$1,550,000 of this loan was purchased at an average rate, net, of 8.74 per cent discount. The total discount was \$135,462.08, which is less \$1,937.50 commission and \$411.05 interest, which were deducted; report 719737. Bayley failed to show this. In 1879 \$14,404.73 premium (paid on the purchase of \$2,089,500; average rate .689 per cent) was charged up as interest; reports 27634 and 27640. In 1865 \$948,000 in 6 per cents of 1881, and \$2,782,000 in 5.20 bonds of 1862, were bought through Jay Cooke & Co., for the assistant treasurer of the United States at New York, at rates ranging from 5\frac{1}{2} to 6\frac{1}{2} per cent premium, and within a few days

resold at from $5\frac{1}{2}$ to $7\frac{1}{2}$ per cent premium; the net profit realized (\$8,575 commission paid on the purchases and sales having been deducted) being for the 1881s, \$2,945, and for the 5-20s of 1862, \$9,837.50. At the same time there was also bought, \$2,755,000 in 10-40 bonds at from 7 to $9\frac{3}{5}$ per cent discount, and resold at from $7\frac{5}{5}$ to $8\frac{1}{2}$ per cent discount; there being realized thereon (\$5,387.50 commission and \$137.25 interest paid on the purchase and sale having been deducted) a net profit of \$4,931.25. As the total of the profits, viz, \$17,713.75, was absorbed by being deducted from \$1,735,613.86, the net premium paid resulting from the purchase and sale of gold, coincident with the bond transactions, they do not anywhere appear; report 152915. There was paid \$631,245.93 commission on this loan, out of the "Expenses of the national loan," in 1864, 1865, 1866, 1868, and 1869. There was a net rebate of interest of \$30.33, and a profit of \$6.21. The interest paid was \$140,681,114.22.

It is hereby certified that the

UNITED STATES OF AMERICA

Washington, March 1st, 1864.

Register of the Treasury.

FIVE-TWENTIES OF MARCH, 1864. (ACT OF MARCH 3, 1864.)

Length of loan, five or twenty years; redeemable after five, and payable twenty years from date; amount authorized (inclusive of 10.40 loan), \$200,000,000; amount issued, \$3,882,500; sold, \$182,000 at an average of 4.14 per cent premium, the rest at par; interest, 6 per cent, payable semi-annually (May and November), in coin; first issue, third fiscal quarter of 1866; final redemption, first fiscal quarter of 1877.

Of \$26,374.60 realized on the sale of this loan, \$8,532.55 was premium, and \$17,842.05 premium on accrued interest. The face of warrant No. 352 of June 9, 1866, covering in the first amount, had evidently been changed from interest to read correctly, "premium." Warrant No. 360 of same date, covered in \$68,819.33 as "interest," but \$17,842.05 of that amount was determined to be as shown. Warrant No. 361 of even date, covered in \$182,000 principal, to which these items appertained. Bayley does not give any premium realized or paid on this loan. The purchases were in the fiscal years 1871, 1872, and 1873, and the premium paid amounted to \$187,408.39. The interest paid was \$1,664,961.85.

Register of the Treasury.

Act of March 3d, 1864.

FIVE-TWENTIES OF JUNE, 1864. (ACT OF JUNE 30, 1864.)

Length of loan, five or twenty years; redeemable at the pleasure of the Government, after November, 1869; payable November 1, 1884; amount authorized, \$400,000,000; amount issued, \$125,561,300; sold at an average rate of 3.781 per cent premium; interest, 6 per cent, payable semi-annually (May and November), in coin; first issue, second fiscal quarter of 1865; outstanding June 30, 1896, \$16,400; included in the

public debt statement under the title of "Old Debt."

Of the premium derived from the sale of this loan, viz, \$4,751,289.66, \$4,747,956.38 was on bonds and \$3,333.28 premium on accrued interest. In Bayley the premium realized, "as stated in the Receipts and Expenditures," is given as \$3,178,710.81. To this has been added \$1,573,993, part of warrant No. 408 of September 30, 1865, erroneously covered as premium on 5-20s of 1862, and \$155 per warrant No. 712 of December 31, 1871, on Peters's donation of \$1,000 to the sinking fund, and there has been deducted \$4,903.18, part of warrant No. 775 of March 30, 1867, determined to belong to the consols of 1865. Bayley makes no note of \$5,343,518.29 premium paid on the purchase of this loan. The purchases were in the fiscal years 1871, 1872, 1873, and 1874. The interest paid to 1885, inclusive, was \$62,554,921.98, but a net excess of repayment since that time reduced it to \$62,547,053.57. The commission, to the amount of \$1,687.50, was paid out of the "Expenses of the national loan." There was a rebate of interest of \$2,340.99 and a forfeiture on bids of \$80.

Treasury Department.
Redeemable after five, and payable twenty years from date.

SEVEN-THIRTIES OF 1864 AND 1865. (ACTS OF JUNE 30, 1864 AND MARCH 3, 1865.)

Length of loan, three years; redeemable August 15, 1867, June 15 and July 15, 1868; amount authorized, \$800,000,000; amount issued, including reissues, \$829,992,500; sold at par; interest, 7.3 per cent, payable semi-annually, in lawful money; first issue, first fiscal quarter of 1865; outstanding June 30, 1896, \$124,050; included in the public debt

statement under the title of "Old Debt."

Under section 2 of the first act, \$200,000,000 of these notes, of not less than \$10 each, was authorized to be issued in lieu of an equal amount of the \$400,000,000 of the 5-20s authorized by the first section of the same act; and it was provided that the total amount of United States notes issued, or to be issued, should never exceed \$400,000,000, and such additional sum, not exceeding \$50,000,000, as might be temporarily required for the redemption of temporary loans. The second act authorized a loan of \$600,000,000, and the issue therefor of bonds or Treasury notes; the latter to be of denominations of not less than \$50, interest at not more than 7.3 per cent per annum, payable in lawful money. These notes were not issued as legal-tenders. But a comparatively small portion of them, and such but temporarily, ever entered into circulation. Bayley gives, "per the Receipts and Expenditures," \$316,876.14 premium as realized on the sale of this loan. Of this amount, \$24,639.09, covered in by warrant No. 663 of March 31, 1866, was really premium on the sale of 5-20s of 1865; and the remainder, \$292,237.05, covered by warrant No. 586 of December 31, 1870, was a repayment by F. E. Spinner, Treasurer of the United States, of a balance of funds advanced to him to pay premium on the purchase of the loan. Bayley makes no note of \$17,673,306.29 premium paid on the purchase. Out of the appropriations for paying premium, as disclosed in sundry reports, there was paid \$8,449.30 commission; and out of the "Expenses of the national loan," there was further paid \$5,080,810.63 for the same; total, \$5,089,259.93. In some instances commission (and premium paid as well) was charged to interest account; and discounts on purchases were absorbed by being offset against payments of commission and interest. There was a profit of \$10,741.57 in favor of the loan, as shown through transactions on "profit and loss account" on the Treasurer's books. The interest paid was \$141,536,427.73.

NAVY PENSION FUND. (ACTS OF JULY 1, 1864 AND JULY 23, 1868.)

Length of loan, indefinite; amount authorized, indefinite; amount invested, \$14,000,000; sold at par; interest, 3 per cent, payable semi-annually (January and July); first issue, second fiscal quarter of 1865; outstanding June 30, 1896, \$14,000,000; not included in the public debt statement.

The first act cited, authorized the Secretary of the Navy to invest in registered securities of the United States, so much of the Navy pension fund (the proceeds of the sale of prizes captured during the recent war) in the Treasury, January 1 and July 1 in each year, as would not be required for the payment of naval pensions. Section second of the second act fixed the interest at 3 per cent per annum, in lawful money, and confined its use to the payment of naval pensions exclusively.

The interest paid was \$13,853,535.76.

FIVE-TWENTIES OF 1865. (ACTS OF MARCH 3, 1865 AND APRIL 12, 1866.)

Length of loan, five or twenty years; redeemable after November 1, 1870; payable November 1, 1885; amount authorized, indefinite; amount issued, \$203,327,250; sold at an average rate of 2.874+ per cent premium; interest, 6 per cent, payable semi-annually (May and November), in coin; first issue, second fiscal quarter of 1866; outstanding June 30, 1896, \$21,850; included in the public debt statement under the title of "Old Debt."

The act of March 3, 1865, authorized the issue of \$600,000,000 in bonds and Treasury notes (see 7-30s of 1864 and 1865) in addition to amounts previously authorized; the bonds to be for not less than \$50; interest payable at not exceeding 6 per cent per annum, in coin, or 7.3 per cent, in currency. In addition to the amount of bonds authorized, authority was also given to convert Treasury notes or other interestbearing obligations into bonds of this act. The second act construed the first to authorize the receipt of any obligations of the Government. whether bearing interest or not, in exchange for any bonds authorized thereby; or to sell any of such bonds, provided the public debt should not be increased thereby. Of \$5,141,353.96 premium realized on the sale of this loan, \$4,841,058.17 was premium on bonds, and \$300,295.79 premium on accrued interest. Bayley gives the premium realized as \$5,179,393.07. To this add \$24,639.09, warrant No. 663 of March 31, 1866, erroneously covered to 7-30s of 1864 and 1865; and deduct per various warrants, premium, consols of 1865, \$70,345.01, and premium on accrued interest, 5-20s of 1865, \$292,628.98. To the latter add \$7,666.81, part of warrant No. 364 of December 6, 1866, erroneously covered as interest, and it makes the amount of premium on interest given above. As the premium, and premium on accrued interest realized on the 5-20s of 1865 and consols of 1865, 1867, and 1868, was all covered in, generally, as 5.20s of 1865, the work of separation is both intricate and difficult. Bayley says nothing of \$4,102,665.46 premium paid on the purchases of this loan. The commission paid, as far as determined, viz, \$77,611.49, was paid out of the "Expenses of the national loan." There was a rebate of interest on this loan of \$6,072.61. The interest paid was \$113,695,906.32.

COPY OF OBLIGATION.

Act of March 3d, 1865.

CONSOLS OF 1865. (ACTS OF MARCH 3, 1865 AND APRIL 12, 1866.)

Length of loan, five or twenty years; redeemable after July 1, 1870; payable July 1, 1885; amount authorized, indefinite; amount issued, \$332,998,950; sold at an average premium of 3.676 per cent; interest, 6 per cent, payable semi-annually (January and July), in coin; first issue, first fiscal quarter of 1867; outstanding June 30, 1896, \$109,200; included in the public debt statement under the title of "Old Debt."

These bonds were issued under identically the same authority and provisions as the 5-20s of 1865. Of \$12,398,208.55 premium realized on the sale of the loan, \$12,241,894.75 was straight premium, and \$156,313.80 premium on accrued interest. Bayley states the premium realized as \$12,291,531.54. From this deduct the \$156,313.80 determined to be premium on interest, and add \$4,903.18, part of warrant No. 775 of March 30, 1867, erroneously covered as premium on 5-20s of June, 1864, \$70,345.01 from 5-20s of 1865, \$28,347.44 from premium on consols of 1867, and \$3,081.38 unaccountable shortage. See further note to 5-20s of 1865. There was \$3,131.74 rebate on this loan, and \$14,489,659.95 premium was paid on redemption. Bayley does not show any premium paid on the purchase. Commission to the amount of \$93,142.05 was paid out of the "Expenses of the national loan." The interest paid was \$168,518,123.46.

Redeemable after five and payable twenty years from July 1st, 1865.

CONSOLS OF 1867. (ACTS OF MARCH 3, 1865 AND APRIL 12, 1866.)

Length of loan, five or twenty years; redeemable after July 1, 1872; payable July 1, 1887; amount authorized, indefinite; amount issued, \$379,618; sold at an average premium of 1.054+ per cent; interest, 6

per cent, payable semi-annually (January and July), in coin; first issue, first fiscal quarter of 1868; outstanding June 30, 1896, \$171,200; included

in the public debt statement under the title of "Old Debt."

These bonds, like the consols of 1867, were also issued under the same authority and provisions as the 5-20s of 1865. The premium realized on the sale was \$4,003,548.33. If there was any premium on accrued interest the warrants do not show it. Bayley states the premium realized as \$4,031,895.77. Deduct \$28,347.44, consols of 1865. There was a rebate of interest of \$4,659.27, and \$132,901.27 premium was paid on the purchase. Bayley does not show any premium paid on the purchase of this loan. There was \$24,060.29 commission paid out of the "Expenses of the national loan." The interest paid was \$225,043,477.25.

Redeemable after five and payable twenty years from July 1st, 1867.

CONSOLS OF 1868. (ACTS OF MARCH 3, 1865 AND APRIL 12, 1866.)

Length of loan, five or twenty years; redeemable after July 1, 1873; payable July 1, 1888; amount authorized, indefinite; amount issued, \$42,539,930; sold at an average premium of .045 per cent; interest, 6 per cent, payable semi-annually (January and July), in coin; first issue, fourth fiscal quarter of 1868; outstanding June 30, 1896, \$16,850; included in the public debt statement under the title of "Old Debt."

These bonds, as well as the consols of 1865 and 1867, were issued under the same authority and provisions as the 5-20s of 1865. There was \$19,253.49 premium realized on the sale. If there was any premium on accrued interest, the warrants do not indicate it. Bayley agrees with the premium realized as herein given. There was \$453.94 rebate of interest on the loan, and \$716,362.06 premium was paid on redemption. Bayley makes no mention of premium paid on the purchase of the loan. He is short, net, of the combined revised amount of premium received on account of the 5-20s of 1865 and the consols of 1865 and 1867, \$3,081.38, which amount, as indicated in the notes thereto, is immediately identifiable with the first-named loan. All the commission given, as far as determined, was paid out of the "Expenses of the national loan." The interest paid was \$25,714,345.92.

THREE PER CENT CERTIFICATES. (ACTS OF MARCH 2, 1867 AND JULY 25, 1868.)

Length of loan, indefinite; payable on demand; amount authorized, \$75,000,000; amount issued, including reissues, \$85,155,000; sold at par; interest, 3 per cent, payable semi-annually, in lawful money; first issue, second fiscal quarter of 1868; outstanding June 30,1896, \$5,000; included in the public debt statement under the title of "Old Debt."

The object of this loan was to provide for the redemption of the compound-interest notes. The first act authorized the issue of temporary loan certificates, not to exceed \$50,000,000 at any time outstanding, in the manner prescribed by section 4 of the act of February 25, 1862, entitled "An act to authorize the issue of United States notes and for the redemption or funding thereof, and for funding the floating debt of the United States." The second act authorized \$25,000,000 of these certificates for the same purpose.

The interest paid on this loan was \$5,694,528.78.

Treasury Department. Issued under the act of March 2, 1867, providing for the redemption of compound interest notes.

CERTIFICATES OF INDEBTEDNESS OF 1870. (ACT OF JULY 8, 1870.)

Length of loan, five years; payable September 1, 1875; amount authorized, \$678,362.41; amount issued, \$678,362.41; sold at par; interest, 4 per cent, payable semi-annually (March and September); final redemption, December 31, 1875.

These certificates were issued, one third to the State of Maine and two-thirds to the State of Massachusetts, for the use and benefit of the European and North American Railway Company, and were in full adjustment and settlement of all claims of said States or railway company (to which latter the claim had been assigned by the former, to aid in constructing its line of railway to the northern boundary of the United States), for interest on moneys expended by the State of Massachusetts, before the separation of Maine therefrom in 1820, on account of the war of 1812-1815 with Great Britain.

The amount of principal allowed, viz, \$657,924.74, out of \$\$43,349.60 claimed, had been paid as follows: \$430,748.26, March 31, 1831, and \$227,176.48, March 3, 1859; and on these amounts, from said dates, the interest allowed in satisfaction of which these certificates were issued,

was computed.

The interest paid on the loan was \$135,600.

JOHN ALLISON, Register of the Treasury.

FIVE PER CENT LOAN OF 1881. (ACTS OF JULY 14, 1870, JANUARY 17, 1871, DECEMBER 17, 1873, JANUARY 14, 1875, AND MARCH 3, 1875.)

Length of loan, ten years; redeemable after May 1, 1881; amount authorized, indefinite; amount issued, \$517,994,150; sold at .015 per cent premium; interest, 5 per cent, payable quarterly (February, May, August, and November), in coin; \$401,504,900 continued indefinitely at $3\frac{1}{2}$ per cent; first issue, fourth fiscal quarter of 1871; outstanding June $30, 1896, \text{ of } 5 \text{ per cents}, \$32,500, \text{ of continued at } 3\frac{1}{2} \text{ per cent}, \$2,250,$ total \$34,750; included in the public debt statement under the title of "Old Debt."

The first act authorized the issue of \$200,000,000 of these bonds at not less than par, for coin, and the application of the proceeds to the redemption of 5-20s; or the exchange of these bonds for 5-20s. second act increased the amount to \$500,000,000. Under these ("refunding") acts there was issued \$486,043,000. The third act authorized the issue of 5 per cent bonds in lieu of any bonds of the loan of 1858, which the holders might, by February 1, 1874, elect to exchange there-The fourth act authorized to be issued or disposed of, at not less than par, in coin, bonds of the United States of any of the classes described in the first act, to the extent necessary for the redemption of fractional currency in silver coins of denominations of ten, twenty five, and fifty cents, of standard value. The fifth act authorized the issue of bonds of the character, etc., set forth in the first act, to James B. Eads, or his legal representatives, in payment, at par, for the construction of jetties, etc., at the South Pass of the Mississippi River and Gulf of Mexico. Under the last three acts there was issued \$31,951,150 in bonds of this loan. Of \$77,265.51 premiums realized on the sale (at rates ranging from one-fourth of 1 to 3.37 per cent—average 1.62+), \$435 was covered by warrants Nos. 1091 and 1092 of September 30, and 468 of December 15, 1874, as miscellaneous revenue. There has not been taken up here \$385,100.07, covered by warrants Nos. 515 of May 31 and 512 of September 8, 1876, and 428 of March 15, 1877, premium realized on bonds pertaining to the Geneva award, found to have been credited to that Bayley says nothing of premium realized or paid on this loan. There was a rebate of interest of \$1,170.60, and \$57 forfeiture on bids. The premium paid was \$982,378.79. There was paid \$221,896,331.64 interest, of which \$16,954,468.05 was at 3\frac{1}{2} per cent continued. Of \$1,817,837.04 commission, \$426.59 was paid out of the "Expenses of the national loan" and \$1,817,410.45, net, out of the appropriation for "Refunding the national debt, 5 per cent," out of which latter was also paid \$768,370.72 for expenses.

Ten Thousand Dollars.

Act of July 14, 1870.

Ten Thousand Dollars.

(Memorandum printed across the face of the bonds) At the request of and for value received by the owner of this bond, the same is continued during the pleasure of the Government, to bear interest at the rate of three and one-half (3½) per centum per annum from August 12, 1881, as provided in Treasury circular No. 52, dated May 12, 1881.

FOUR AND ONE HALF PER CENT LOAN OF 1891. (ACTS OF JULY 14, 1870, JANUARY 20, 1871, AND JANUARY 14, 1875.)

Length of loan, fifteen years; redeemable after September 1, 1891; amount authorized, indefinite; amount issued, \$250,000,000; sold (for resumption) from par to 1½ per cent premium; interest, 4½ per cent, payable quarterly (March, June, September, and December), in coin; \$25,364,500 continued indefinitely at 2 per cent; first issue, second fiscal quarter of 1877; outstanding June 30, 1896, of 4½ per cents, \$389,150; of those continued at 2 per cent, \$25,364,500; total, \$25,753,650.

The first act authorized the issue of \$300,000,000 in bonds of this loan at not less than par, for coin, the proceeds to be applied to the redemption of 5-20s; or the bonds to be exchanged for said 5-20s, par for par. Under this ("refunding") act there was issued, at par, \$185,000,000. The third act authorized to be issued or disposed of, at not less than par, in coin, either of the classes of bonds described in the first act, for the purpose of redeeming, on or after January 1, 1879, in coin, the outstanding legal tender notes, when presented in sums of not less than Under this ("resumption") act there was issued \$65,000,000, at from par to 11 per cent premium. The bonds continued at 2 per cent, per above, were issued (as in the instance of the 1881 loan) in exchange for the original bonds, by mutual agreement between the Secretary of the Treasury and the holders, and were made redeemable at the pleasure of the Government. Of \$145,786,037.83 interest paid, \$2,404,694.24 was at 2 per cent continued. The \$1,167,784.63 commission and \$74,074.27 other expenses, were paid out of the appropriation for "Refunding the national debt, 4½ per cent." The premium realized on the sale of this loan was \$750,000. In the Receipts and Expenditures the premium given as realized in 1879, includes \$746,943.25 on the funded loan of 1907. The ledger and warrants show it to belong to that loan. Bayley gives this loan as sold at par. There was a rebate of interest on the loan of \$24.89. There was paid \$9,998,201.40 premium on the purchase.

Act of July 14th, 1870.

(Memorandum printed across the face of the bond): At the request of and for value received by the owner of this bond, the same is continued during the pleasure of the Government, to bear interest at the rate of two (2) per centum per annum from September 2, 1891, as provided in Treasury Circular No. 99, dated July 2, 1891.

FOUR PER CENT LOAN OF 1907. (ACTS OF JULY 14, 1870, JANUARY 20, 1871, AND JANUARY 14, 1875.)

Length of loan, thirty years; redeemable after July 1, 1907; amount authorized, indefinite; amount issued, \$740,887,100; sold (for refunding) from par to ½ per cent premium; interest, 4 per cent, payable quarterly (January, April, July, and October), in coin; first issue, first fiscal quarter of 1878; outstanding June 30, 1896, \$559,625,750.

The first act authorized the issue of \$1,000,000,000 in bonds of this loan at not less than par, for coin, the proceeds to be applied to the redemption of 5.20s; or the bonds to be exchanged for said 5.20s, par for par. Under this ("refunding") act there was issued \$710,387,100, at from par to ½ per cent premium. Of this amount, \$40,052,050 was issued in the conversion of "Refunding certificates" authorized by act of February 26, 1879; \$93,410 being on account of accrued interest. (For this loan see page 93.) In the tables in the Finance Reports from 1892 to 1895, both inclusive, the issues for such exchanges in said years, amounting to \$59,750, were not taken up.

The third act authorized to be issued or disposed of, at not less than par, in coin, either of the classes of bonds described in the first act, for the purpose of redeeming on or after January 1, 1879, in coin, the outstanding United States legal-tender notes, when presented in sums of not less than \$50. Under this ("resumption") act there was issued at par \$30,500,000, of which \$5,500,000 was applied to the payment of the "Halifax award." Of \$746,948.25 premium realized on the sale, the Receipts and Expenditures for 1869 gives \$746,943.25 as on the 1891 loan, while the ledger and warrants show it to belong to this. Bayley does not give any premium realized on this loan. There was \$24.80 rebate of interest on this loan, and a forfeiture on bids of \$2.96. \$46,396,006.64 premium was paid on purchases. \$1,950,749.33 commission and \$651,415.35 other expenses, were paid out of the appropriation for "Refunding the national debt, 4 per cent." The interest paid was \$463,016,852.81.

The bonds alike of the 5 per cent loan of 1881, the 4½ per cent loan of 1891, and the 4 per cent loan of 1907, issued under the act of July 14, 1870, were exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. The act was not to authorize an increase

of the bonded debt of the United States.

Interest to cease at the end of three months' notice of intention to redeem.

For value received, -- the within registered bond of the United — assign to —— States, and hereby authorize the transfer thereof on the books of the Treasury Department.

Dated ——, 18—. State of ——, County of ——, Town of –

Personally appeared before me the above-named assignor, known or proved to me - payee of the within bond, and signed the above transfer, acknowledging the same to be his free act or deed.

Witness my hand, official designation, and seal.

Note.—The execution and acknowledgment of the above assignment, when not made at the Treasury Department, must be before a U. S. judge, U. S. district attorney, clerk of a U. S. court, collector of customs, collector or assessor of internal revenue, U. S. Treasurer or Assistant Treasurer or the president or cashier of a national bank, or, if in a foreign country, before a U. S. minister or consul. In all cases the officer must add his official designation, residence, and seal if he has one. When the assignment is made by a corporation, it must be named as the assignor; when by a guardian, trustee, executor, administrator, an officer of a corporation, or anyone in a representative capacity, proof of his authority to act must be produced to the officer before whom the assignment is made and must accompany the bond. Assignors must be identified as known and responsible persons to the satisfaction of the officer.

One Thousand.

CERTIFICATES OF DEPOSIT. (ACT OF JUNE 8, 1872.)

Length of loan, indefinite; redeemable on demand; amount authorized, indefinite; amount issued, \$1,201,300,000; sold at par; interest, none; first issue, first fiscal quarter of 1873; outstanding June 30, 1896,

\$31,990,000.

The act authorized the deposit of United States notes, without interest, by banking associations, in sums of not less than \$10,000, and the issue of certificates therefor in denominations of not less than \$5,000; payable on demand in United States notes, at the places where the deposits were made. It provided that the notes so deposited in the Treasury should not be counted as a part of the legal reserve, but that the certificates issued therefor might be held and counted by the national banks as part of their legal reserve, and accepted in the settlement of clearing-house balances at the places where the deposits therefor were made, and that the United States notes for which such certificates were issued, or other United States notes of like amount, should be held as special deposits in the Treasury, and used for the redemption of such certificates. In the tables of the Finance Reports for 1874, 1875, and 1876, the amount issued is given as \$137,675,000, which was

the sum of the issues in 1873 and 1874, the subsequent issues not having been added thereto. In the report for 1877, the amount was changed to \$64,780,000 and it is continued at that in all subsequent reports up to and including that for 1895.

Asst. Treasurer U. S.

Treasurer of the United States.

United States Notes. Act of June 8, 1872, chapter 346, series of 1875.

SILVER CERTIFICATES. (ACT'S OF FEBRUARY 28, 1878 AND AUGUST 4, 1886.) (FOR GOLD CERTIFICATES SEE PAGE 76.)

Redeemable on demand; amount authorized, indefinite; amount issued, \$1,094,350,000; sold at par; interest, none; first issue, fourth fiscal quarter of 1878; outstanding June 30, 1896, \$342,619,504.

The first act authorized the issue of certificates in denominations corresponding to those of United States notes, but not of smaller denominations than \$10, in exchange for the coin authorized by this act; said coin to be deposited by the holder with the Treasurer or any assistant treasurer of the United States, and retained in the Treasury for the payment of the certificates on their presentation; said certificates to be receivable for customs, taxes, and all public dues, and be subject to reissue when so received. The second act authorized the issue of silver certificates in denominations of one, two, and five dollars; the same to be receivable, redeemable, and payable in like manner, and for like purposes as was provided for by the first act.

COPY OF OBLIGATION.

United States Silver Certificate.

Silver certificates (act August 4, 1886).

[Issued in denominations of 1s, 2s, 5s, 10s, and 20s.]

Receivable, redeemable, and payable in like manner and for like purposes as provided for by the Silver Certificates of the act of February 28, 1878.

REFUNDING CERTIFICATES. (ACT OF FEBRUARY 26, 1879.)

Length of loan, indefinite; redeemable by conversion into 4 per cent bonds of 1907; amount authorized, indefinite; amount issued, \$40,012,750; sold at par; interest, 4 per cent, payable on conversion; first issue, fourth fiscal quarter of 1879; outstanding June 30, 1896, \$47,140.

The act authorized the issue, in exchange for lawful money of the United States, certificates of deposit of the denomination of \$10, bearing interest at the rate of 4 per cent per annum, and convertible at any time, with accrued interest, into 4 per cent bonds described in the refunding act; the money so received to be applied to the payment of the bonds bearing interest at a rate not less than 5 per cent, in the mode prescribed by said act. The conversions up to June 30, 1896, were, on account of principal, \$39,965,610, and interest, \$98,034; total, \$40,063,644. Much of the accrued interest was paid, otherwise, in money. There was a premium realized on these certificates of \$105, covered in by warrant No. 749 of September 27, 1879. Total interest paid, \$388,280.34.

TREASURY NOTES OF 1890. (ACT OF JULY 14, 1890.)

Redeemable on demand; amount authorized, indefinite; original issue, \$155,931,002; amount issued, including re-issues, \$295,228,120; sold at par; interest, none; first issue, first fiscal quarter of 1891; outstanding

June 30, 1896, \$129,683,280.

The act directs the Secretary of the Treasury to purchase, from time to time, silver bullion to the aggregate amount of 4,500,000 ounces, or so much thereof as may be offered in each month, at the market price thereof, not exceeding \$1 for 371.25 grains pure silver, and to issue, in payment for such purchases of silver bullion, Treasury notes of the United States, to be prepared by the Secretary of the Treasury, in such form and of such denominations, not less than \$1 nor more than \$1,000, as he may prescribe; that such notes shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the Treasury, purchased by such notes; and such Treasury notes shall be a legal-tender in payment of all debts, public and private, except when otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes, and all public dues, and when so received may be reissued; and such

notes, when held by any banking association, may be counted as a part of its lawful reserve; that upon demand of the holder of any of the Treasury notes provided for, the Secretary shall redeem the same in gold or silver coin, at his discretion, it being the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law.

This Note is a Legal Tender at its face value in payment of all debts, public and private, except where otherwise expressly stipulated in the contract.

NATIONAL BANK NOTES. (REDEMPTION ACCOUNT.) (ACT OF JULY 14, 1890.)

Length of loan, indefinite; payable as occasion demands; amount authorized, indefinite; amount deposited, \$98,181,064.75; received at par; interest, none; first receipt, first fiscal quarter of 1891; outstanding the large of 1891 and 1892 and 189

ing, being balance in Treasury June 30, 1896, \$20,102,022.50.

The act provides that balances standing with the Treasurer of the United States to the respective credits of the national banks for deposits made to redeem the circulating notes of such banks, and all deposits thereafter received for like purposes, shall be covered into the Treasury as miscellaneous receipts, and the Treasurer of the United States shall redeem from the general cash in the Treasury, the circulating notes of said banks which may come into his possession subject to redemption * * * and the balance remaining of the deposit so covered, shall, at the close of each month, be reported on the public debt statement as debt of the United States bearing no interest.

LOAN OF 1904. (ACTS OF JULY 14, 1870 AND JANUARY 14, 1875.)

Length of loan, ten years; redeemable after February 1, 1904; amount authorized, indefinite; amount issued, \$100,000,000; sold, \$50,000,000 at \$117.266 + and \$50,000,000 at \$117.077; interest, 5 per cent, payable quarterly (February, May, August, and November); first issue, third fiscal quarter of 1894; outstanding June 30, 1896, \$100,000,000.

The second act authorized the Secretary of the Treasury to use any surplus revenues from time to time in the Treasury not otherwise appropriated, and to issue, sell, dispose of at not less than par, in coin, either of the descriptions of bonds of the United States described in the first act, for the purpose of redeeming, on and after January 1,

1879, in coin, at the office of the assistant treasurer of the United States in New York, the outstanding United States legal tender notes when presented in sums of not less than \$50. Of the issue made under this authority, \$50,000,000 in bonds were issued in the fiscal year 1894, and \$50,000,000 in the fiscal year 1895.

These issues were rendered indispensable by the necessity for maintaining the \$100,000,000 gold reserve fund required by the act of July 12, 1882. (See Rev. Stat., sec. 5207, p. 100%.) On April 22, 1893, the fund had become reduced to \$95,432,357; for the first time falling below the prescribed sum. On January 17, 1894 it stood at \$69,757,824, and it was then impossible to increase it without resorting to the issue and sale of bonds under the authority of the resumption act (act of January 14, 1875). After the sale of the first \$50,000,000 the free gold amounted to \$107,446,802. On August 7, 1894, it had fallen to \$52,189,500, but was slowly replenished until November 4, 1894, when it reached \$61,878,374; but in anticipation of further demands it was then found to be necessary to issue \$50,000,000 additional bonds. The premium realized on the sale of the entire loan of \$100,000,000 of 5 per cent bonds was \$17,171,795.71. Interest paid to June 30, 1896, \$9,099,533.85.

Act of January 14, 1875.

LOAN OF 1925. (ACTS OF JULY 14, 1870 AND JANUARY 14, 1875.)

Length of loan, thirty years; redeemable after February 1, 1925; amount authorized, indefinite; amount issued, \$162,315,400; sold at an average of \$108.6042; interest, 4 per cent, payable quarterly (February, May, August, and November); first issue, third fiscal quarter of 1895; outstanding June 30, 1896, \$162,315,400.

There were two issues under these acts, each for the purpose of replenishing the gold reserve. The first was made March 12, 1895, amounting to \$62,315,400, on which \$2,800,844.62 premium was realized, the bonds having been sold at an average of \$104.4946. The second issue commenced February 10, 1896, and amounted to \$100,000,000, on which \$11,166,246.41 premium was realized, the bonds having been sold at an average of \$111.1662. Total premium realized, \$13,967,091.03. Total interest paid on the loan to June 30, 1896, \$3,554,454.57.

Register of the Treasury.

CENTRAL PACIFIC RAILROAD. (ACTS OF JULY 1, 1862, JULY 2, 1864, AND MAY 7, 1878.)

Length of loan, thirty years; redeemable thirty years from date of issue; amount authorized, indefinite; amount issued, \$25,885,120; sold at par; interest, 6 per cent, payable semi-annually (January and July); first issue, May 12, 1865; outstanding June 30, 1896, \$23,327,120.

There was redeemed of these bonds by the Government (leaving the

There was redeemed of these bonds by the Government (leaving the railroad company still indebted to it for the same), \$2,357,000 in the fiscal year 1895, and \$201,000 in the fiscal year 1896; total, \$2,558,000. Of the amount outstanding, \$1,404,000 due January 1, 1896, had not been presented for redemption. The amounts as follows will become payable on the following dates: \$2,112,000, January 1, 1897; \$10,614,120, January 1, 1898, and \$9,197,000 January 1, 1899. Total interest paid, per vouchers, \$42,728,159.70. The public debt statement of June 30, 1896, with reference to the railroad direct, gives the following figures: Principal outstanding, \$25,885,120; interest accrued and not yet paid, \$657,693.60; interest paid by the United States, \$42,730,499.64; interest repaid by company, by transportation service, \$7,665,351.41; by cash payments, 5 per cent net earnings, \$658,283.26; balance paid by the United States, \$34,406,864.97; sinking fund—bonds, \$5,478,000; cash, \$1,126,185.57; total, \$6,604,185.57. The difference between the interest

paid per vouchers and by the public debt statement it was found could not be reconciled, but is owing partly to unclaimed dividends, amount uncertain, and \$1,770 outstanding checks. While the account of "Unclaimed Pacific Railroad interest" kept in the Division of Book-keeping and Warrants, Secretary's office (the several roads not being designated therein), shows a balance of \$4,229.96 due by the Government since August 31, 1883, an alphabetical record in the office of the Auditor for the Treasury Department shows only \$360 in all remaining unpaid, of which \$150 pertains to the Central and \$210 to the Union Pacific roads. Applying these known amounts, appertaining hereto, the total interest paid per this statement for this road is less than per the public debt statement by \$419.94. (See remarks to Central Branch, Union Pacific.)

KANSAS PACIFIC RAILWAY. (ACTS OF JULY 1, 1862, JULY 2, 1864, AND MAY 7, 1878.)

Length of loan, thirty years; redeemable thirty years from date of issue; amount authorized, indefinite; amount issued, \$6,303,000; sold at par; interest, 6 per cent, payable semi-annually (January and July); first issue, November 1, 1865; outstanding June 30, 1896, \$4,238,000.

There was redeemed of these bonds by the Government (leaving the railway company still indebted to it for the same), \$2,065,000 in the fiscal year 1896. Of the amount outstanding, \$15,000 due January 1, 1896, had not been presented for redemption. The amounts as follows will become payable on the following dates: \$2,800,000 January 1, 1897, and \$1,423,000 January 1, 1898. Total interest paid, per vouchers, \$10,847,760.97. The public debt statement of June 30, 1896, with reference to the railway direct, gives the following figures: Principal outstanding, \$6,303,000; interest accrued and not yet paid, \$126,690; interest paid by the United States, \$10,850,323.44; interest repaid by company, by transportation service, \$4,466,765.49; balance paid by the United States, \$6,383,557.95. Adding \$2,220 outstanding checks to the interest paid per this statement, it will still be less than the amount per the public debt statement by \$342.47, which difference it was found could not be reconciled. (See remarks to Central Pacific.)

UNION PACIFIC RAILROAD. (ACTS OF JULY 1, 1862, JULY 2, 1864, AND MAY 7, 1878.)

Length of loan, thirty years; redeemable thirty years from date of issue; amount authorized, indefinite; amount issued, \$27,236,512; sold at par; interest, 6 per cent, payable semi-annually (January and July); first issue, February 1, 1866; outstanding June 30, 1896, \$22,943,512.

There was redeemed of these bonds by the Government (leaving the railroad company still indebted to it for the same), \$4,293,000 in the fiscal year 1896. Of the amount outstanding, \$27,000 due January 1, 1896, had not been presented for redemption. The amounts as follows will become payable on the following dates: \$3,840,000, January 1, 1897; \$15,919,512, January 1, 1898, and \$3,157,000 January 1, 1899. Total interest paid, per vouchers, \$45,407,261.75. The public debt statement of June 30, 1896, with reference to the railroad direct, gives the following figures: Principal outstanding, \$27,236,512; interest accrued and not yet paid, \$687,495.36; interest paid by the United States, \$45,407,248.66; interest repaid by company, by transportation service, \$15,409,348.20; by cash payments, 5 per cent net earnings, \$438,409.58; balance paid by the United States, \$29,559,490.88; sinking fund—bonds, \$14,146,250; cash, \$2,030,549.21; total, \$16,176,799.21. Adding \$1,590 outstanding checks and \$210 unclaimed dividends to the

interest paid per this statement, it will be in excess of the amount per the public debt statement by \$1,813.09. (See remarks to Central, and Central Branch, Union Pacific.)

CENTRAL BRANCH, UNION PACIFIC RAILROAD. (ACTS OF JULY 1, 1862, JULY 2, 1864, AND MAY 7, 1878.)

Length of loan, thirty years; redeemable thirty years from date of issue; amount authorized, indefinite; amount issued, \$1,600,000; sold at par; interest, 6 per cent, payable semi-annually (January and July);

first issue, July 27, 1866; outstanding June 30, 1896, \$960,000.

There was redeemed of these bonds by the Government (leaving the railroad company still indebted to it for the same), \$640,000 in the fiscal year 1896. The amounts as follows will become payable on the following dates: \$640,000, January 1, 1897, and \$320,000 January 1, 1898. Total interest paid, per vouchers, \$2,748,534,29. The public debt statement of June 30, 1896, with reference to the railroad direct, gives the following figures: Principal outstanding, \$1,600,000; interest accrued and not yet paid, \$28,800; interest paid by the United States, \$2,749,808,26; interest repaid by company, by transportation service, \$635,957.97; by cash payments, 5 per cent net earnings, \$6,926.91; balance paid by the United States, \$2,106,923.38. Adding \$180 outstanding checks to the interest paid per this statement, it will still be less than the amount per the public debt statement by \$1,093.97.

Beginning with the fiscal year 1871, an appropriation account for the payment of interest was opened under the title of each of the Pacific railroads. Prior to that time such payments by the Government, on its bonds issued in favor of the several companies, had been included in the general appropriation account of "Payment of interest on the public debt, created since July 21, 1841, per act of February 9, 1847." Besides this, up to the end of the fiscal year 1879, the system of payments on schedules prevailed, resulting in the frequent return of "unclaimed dividends," and the subsequent periodical payment of various amounts of the same. It is, therefore, difficult to make an exact balance between the dividends of interest accrued on the entire issue (and reported as paid in the public debt statement), and the actual payments to the individual holders of the bonds. (See remarks to Central

Pacific.)

WESTERN PACIFIC RAILROAD. (ACTS OF JULY 1, 1862, JULY 2, 1864, AND MAY 7, 1878.)

Length of loan, thirty years; redeemable thirty years from date of issue; amount authorized, indefinite; amount issued, \$1,970,560; sold at par; interest, 6 per cent, payable semi-annually (January and July); first issue, January 24, 1867; outstanding June 30, 1896, \$1,970,560.

The amounts as follows will become due on the following dates: \$320,000, January 1, 1897, and \$1,650,560, January 1, 1899. Total interest paid, per vouchers, \$3,146,138.94. The public debt statement of June 30, 1896, gives the following: Principal outstanding, \$1,970,560; interest accrued and not yet paid, \$59,116.80; interest paid by the United States, \$3,146,168.94; interest repaid by company, by transportation service, \$9,367; balance paid by the United States, \$3,136,801.94. Adding \$30, checks unpaid, to the interest paid per this statement, it will balance exactly with the amount per the public debt statement.

SIOUX CITY AND PACIFIC RAILROAD. (ACTS OF JULY 1, 1802, JULY 2, 1804, AND MAY 7, 1878.)

Length of loan, thirty years; redeemable thirty years from date of issue; amount authorized, indefinite; amount issued, \$1,628,320; sold

at par; interest, 6 per cent, payable semi-annually (January and July): first issue, March 16, 1868; outstanding June 30, 1896, \$1,628,320.

The amount issued per above will fall due January 1, 1898. Total interest paid, per vouchers, \$2,685,537.49. The public debt statement of June 30, 1896, gives the following: Principal outstanding, \$1,628,320; interest accrued and not yet paid, \$48,849.60; interest paid by the United States, \$2,685,537.49; interest repaid by company, by transportation service, \$246,659.49; balance paid by the United States, \$2,438,878. As may be seen, the interest paid per this statement agrees exactly with the amount per the public debt statement.

The totals for all the Pacific railreads, as given in the public debt statement of June 30, 1896, are as follows: Principal outstanding, \$64,623,512; interest accrued and not yet paid, \$1,608,645.36; interest paid by the United States, \$107,569,586.43; interest repaid by companies, by transportation service, \$28,433,449.56; by cash payments, 5 per cent net earnings, \$1,103,619.75; balance paid by the United States, \$78,032, 517.12; sinking fund—bonds, \$19,624,250; cash, \$3,156,734.78; total, \$22,780,984.78.

The total interest paid per these statements, on the bonds pertaining to all the roads, is \$107,563,393.14; adding \$5,790, unpaid checks, and \$360, unclaimed dividends (per the record in the office of the Auditor for the Treasury Department), makes \$107,569,543.14, which is \$43.29 less than the gross amount paid per the public debt statement.

DIVISION OF NOTES, COUPONS, AND CURRENCY.

The duties of this branch of the office are now confined to the care of all redeemed detached coupons, redeemed, exchanged, and transferred coupon bonds, redeemed interest checks, with other miscellaneous redeemed securities to be placed on file for reference, together with the charge of the final count and examination of all United States notes, gold and silver certificates, and statistical matter, before their destruction.

Statements 1 to 22, inclusive, covering every branch of service

assigned to this division, give in a detailed form an account of the work during the year, of which the following summary is submitted:

There were received, registered, and scheduled during the year, 36,571 coupon bonds, with 3,577,664 coupons attached, amounting to \$33,224,850. These coupon bonds consist of exchanges and transfers of the loans of 4 per cent consols of 1907, 5 per cent of 1904, 4 per cent of 1925, and

District of Columbia funded debt.

With these additions to the files at the beginning of the year, the coupon bonds in the custody of this division will aggregate in number 1,967,396, and in amount \$1,147,609,650. The total number of redeemed coupons of various loans received during the fiscal year was 984,807: counted and numerically arranged, 1,114,569; entered in numerical registers, 866,784; compared with numerical registers, 529,084; scheduled by loans, dates, and denominations, 444,670, and entered in ledgers, At the close of the year there were on file, boxed and labeled, 100,887,669 redeemed coupons, amounting to \$1,220,309,496.701. During the year, in the currency branch, there were counted and delivered to the destruction committee, 55 old demand notes, amounting to \$500; 7,066,583 United States notes of various issues, amounting to \$68,942,000; 14,216,406 Treasury notes of 1890, amounting to \$61,564,000; 35,072,353 silver certificates, amounting to \$140,283,000; 66,300 gold certificates, series of 1882, amounting to \$5,448,050; 707 4 per cent refunding certificates, amounting to \$7,070; one, two, and three-year compound-interest notes, amounting to \$1,750, and 13,202 pieces of fractional currency, amounting to \$2,933; in the aggregate number of notes, 56,435,683, and in the aggregate amount, \$276,231,303.35.

Checks issued for the payment of interest on registered bonds of the United States, Pacific railroads, and funded debt of the District of Columbia, received, 134,901; counted, verified, registered, and scheduled, 118,974, and examined after registration, 139,894. The total number of interest checks on file at the close of the year aggregates

3.732,178, amounting to \$703,108,113.82.

Gold certificates, act of July 12, 1882, series of 1888 (payable to order), received, registered, and examined, 529, amounting to \$4,520,000. Total on file of this class of vouchers, 20,412, amounting to \$156,085,000. Currency certificates of deposit, act of June 8, 1872, received, regis-

tered, and examined, 9,321, amounting to \$91,175,000. Total on file,

133,969, amounting to \$1,235,400,000.

Interest checks issued for dividends on Spanish indemnity certificates, act of June 7, 1836, received and registered, 85, amounting to \$28,342.27. Total on file, 254, amounting to \$85,075.65.

Interest checks on certificates of indebtedness for Cherokee lands, received and registered, 20, amounting to \$265,600. Total on file, 39,

amounting to \$531,200.

Statistical matter counted and prepared for destruction, as shown, gives 1,402,3674 sheets of postage stamps of various denominations; 765,103½ sheets of internal revenue stamps; 5,500 sheets of customs stamps; 71,495 sheets of United States notes; 141,900 sheets of Treasury notes of 1890; 345,072 sheets of silver certificates, and 93,572½ sheets of miscellaneous matter, aggregating 2,825,0104 sheets as having been counted in committee and destroyed during the fiscal year.

Internal-revenue stamps of various issues, redeemed and destroyed, 2,066,492, amounting to \$1,371,753.02. The statement of issues and redemptions by numbers, denominations and amounts, of United States interest-bearing notes and certificates of various issues, redeemed and outstanding to June 30, 1896, shows that there were still outstanding the following amounts of each class of securities named: Seventhirty notes, act of July 17, 1861, \$10,700; seven-thirty notes, acts of June 30, 1864 and March 3, 1865, \$124,050; one-year 5 per cent Treasury notes, act of March 3, 1863, \$32,105; two-year 5 per cent Treasury notes, act of March 3, 1863, \$27,450; three-year 6 per cent compound-interest notes, acts of March 3, 1863 and June 30, 1864, \$170,830; gold certificates, act of March 3, 1863, \$182,400; certificates of indebtedness, acts of March 1 and 17, 1862, and March 3, 1863, \$3,000; 3 per cent certificates, acts of March 2, 1867, and July 25, 1868, \$5,000, and 4 per cent refunding certificates, act of February 26, 1879, \$47,140.

For the better preservation of the files during the fiscal year, and in the line of old and uncurrent work, 374,929 coupon bonds of various old loans, with 13,704,384 coupons attached, amounting to \$187,785,650,

were rearranged, relabeled, and refiled.

The total number of all the redeemed and canceled securities of every class on file and in the custody of this division, June 30, 1896, is 110,869,358, amounting to \$7,202,620,036.44½.

The total amount of redeemed canceled securities delivered to the

destruction committee to June 30, 1896, was \$6,846,561,773.48.

In the last annual report attention was drawn to the fact that the files of this division were in a very much crowded condition, and that it was almost impossible to keep the vouchers in a convenient form for ready reference. During the year some relief from the entanglement and confusion has been given by securing the possession of room 94, basement, a small, dark room, which, for the present gives space sufficient to file the accumulation of interest checks and other small vouchers.

As vouchers accumulate rapidly, still further room will be needed in

the near future for the proper filing of accounts.

The verifying, counting, and arranging of coupons is up to date, and all coupons which have been received in the division, up to and includ-

ing June 30, 1896, have been registered.

In conclusion, it is a source of much pleasure to me to be able to say that the clerks in this division have performed their official duties faithfully, zealously, and satisfactorily.

Respectfully submitted,

To the Honorable

J. FOUNT. TILLMAN,
Register.

The SECRETARY OF THE TREASURY.

(No. 7.)

REPORT OF THE COMPTROLLER OF THE TREASURY.

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE TREASURY,
Washington, October 29, 1896.

SIR: In compliance with the request contained in your letter of October 2, 1896, I have the honor to submit the following report of the business transacted in this office during the fiscal year ending June 30, 1896:

WARRANTS.

The following warrants were received, examined, countersigned, entered on registers, and posted into ledgers under their several heads of appropriations, viz:

The unfinished business of the First and Second Comptrollers' offices

The unfinished business of the First and Second Comptrollers' offices has been practically disposed of. A very few accounts still remain on hand awaiting the decisions of courts, as stated in last year's report. A number of explanations to suspensions in accounts settled by the Comptrollers have been disposed of.

From the above tables it is seen that by far the largest number of appeals was taken from the settlements made by the Auditor for the State and other Departments, the number being more than twice as many as the number of appeals from the Auditor for the War Department, the next highest on the list, the number of appeals from the Auditors for the other Departments being comparatively small.

The appeals from settlements made by the Auditor for the State and other Departments were principally on accounts for the compensation of officers of United States courts—district attorneys, marshals, clerks, and commissioners. A change was made by Congress in the act of May 28, 1896, in the system of compensating district attorneys and marshals, from fees, depending upon the particular services rendered by these respective officers, to fixed salaries, as prescribed by that act. Provision was made by the act for the appointment by the marshals of office deputies, who should also be compensated by salaries, leaving only under the fee system, so far as the marshal's office is concerned, a class of deputies known as "field deputies." This action accords in part with the recommendations made in my last annual report and in my report for 1894 as First Comptroller.

The same act created a new class of commissioners, to be known as "United States commissioners," and prescribed for their payment a fee bill much simpler and more explicit than that contained in the Revised Statutes for circuit court commissioners. It was also provided that the Attorney General should recommend a plan for fixing the compensation of clerks of the various courts of the United States. It is confidently believed that the change in the method of compensating district attorneys and marshals will prove thoroughly satisfactory in practice, and that when the provisions of the act relating to United States commissioners become fully operative the number of appeals taken from the settlements by the Auditor for the State and other Departments will be greatly lessened. It is to be hoped that Congress will apply the system of salaries to the payment of clerks of courts.

By far the largest number of appeals taken from the settlements made by the Auditor for the War Department relate to claims for back pay and bounty, and nearly all the rehearings relate to the same matter. As each of these appeals or rehearings relates to one claim only, the facts in each case are different—hence the large number of opinions on these matters. These opinions, however, are rather upon questions of fact than upon new questions of law. With the exception of these back pay and bounty claims and some other war claims, practically all the work of the accounting officers is upon current accounts. So far as the office of the Comptroller is concerned, all questions relating to current accounts are promptly disposed of, as is clearly shown by the fact that of the number of appeals filed prior to June 1, remaining on hand June 30, there were only 14, other than those taken from settlements by the Auditor for the War Department, and these were wholly of the class above mentioned.

By section 8 of the act of July 31, 1894, the "Dockery Act," authority was conferred upon the Comptroller to revise upon his own motion, independently of any request therefor either by the claimant or the head of the Department interested, any account settled by an Auditor within a year. This provision was evidently enacted in order to furnish a check upon the Auditors as a substitute for the former detail revision of all accounts by the Comptrollers. It was furthermore intended thereby that the Comptroller should investigate the manner in which settlements were being made by the various Auditors, so as

to ascertain whether the rulings of the former Comptrollers of the Treasury and of the Commissioner of Customs prior to October 1, 1894, when the "Dockery Act" took effect, and the decisions of the present Comptroller's Office since that date, were being properly applied.

The work of completing the unfinished business of the former Comp-

The work of completing the unfinished business of the former Comptrollers and the Commissioner of Customs, the revising of accounts on appeals, and deciding questions presented by heads of Departments and disbursing officers, together with the routine work imposed upon the Comptroller's Office, has been of such a character as to preclude hitherto the revision of accounts by the Comptroller upon his own motion, except in a few isolated cases. It is believed that the work of the office is now in such condition that attention may be given to this important provision of the accounting system heretofore neglected, and that a systematic detail revision of particular accounts covering all the classes of accounts settled by the various Auditors may be inaugurated during the present fiscal year.

With the beginning of the new accounting system it was determined to publish the decisions of the Comptroller upon questions of importance which would establish precedents for the settlement of future accounts. The first volume, covering the period from October 1, 1894, to July 1, 1895, containing 594 pages, carefully indexed, was issued during the last fiscal year. Part I of the second volume, covering the half year from July 1 to December 31, 1895, was issued about February, 1896. The completed volume, containing 296 opinions, being all those of permanent value on questions of law not previously decided, rendered

during the entire fiscal year 1896, has since been issued.

It is hoped that hereafter the decisions may be promptly published, after the expiration of each quarter, in temporary pamphlet form, for the guidance of disbursing and other officers directly interested in the public accounts, and that the permanent bound volumes will be issued shortly after the expiration of each fiscal year. It is believed that this method of publishing the decisions of the Comptroller, enabling all persons charged with the duty of expending or disbursing the public funds to promptly know the rulings of the Comptroller's Office on all important questions brought before the office for decision, will prevent in many cases the contracting of obligations against the Government not warranted by law and the illegal disbursement of the public funds, and thus simplify the settlement of accounts by the Auditors and lessen the number of appeals to the Comptroller.

It not infrequently happens that constructions placed upon acts of Congress relating to the compensation or other emoluments of officers of the United States, the language of which is somewhat ambiguous, become by reason of long continuance the settled practice of the Executive Departments as constituting the true construction of the statutes. Many years afterwards the construction of these acts by the accounting officers may be reversed by the courts and a larger amount than had been theretofore allowed is held to be due these officers. Immediately after such decisions claims covering the entire period of time since the enactment of the laws are presented either by the officers themselves, or in many cases, where the construction of the accounting officers has continued for a long period unreversed, by the heirs of officers already

aeaa.

As Congress has for more than thirty years furnished a tribunal in the Court of Claims in which the validity of this character of claims might have been tried immediately after the construction was placed upon the acts by the accounting officers, if such construction was deemed

erroneous, it is confidently believed that no injustice will be done if the jurisdiction of the accounting officers over claims of this character is taken away, especially as it is a matter of common notoriety that in many cases the claims have been instigated by diligent attorneys rather than by the officers themselves. An example of such legislation in a particular case may be found in the act of July 28, 1892 (27 Stat., 313), wherein it was provided:

That hereafter the accounting officers of the Treasury shall not receive, examine, consider, or allow any claim against the United States for sea pay or commutation of rations which has been or may be presented by officers of the Navy, their heirs or legal representatives, under the decisions of the Supreme Court, which have heretofore been adopted as a basis for the allowance of such claims, which accrued prior to July sixteenth, eighteen hundred and eighty.

The case particularly referred to in that enactment was that of United States v. Strong (125 U. S., 656). It appears that the petition in the Strong case was filed in the Court of Claims July 17, 1886, and as the statute of limitations relating to that court excludes from its jurisdiction any claims accruing prior to six years from the date of filing the petition, the date "July 16, 1880," referred to by Congress in the abovequoted clause, relates to claims which would have been barred in the Court of Claims in the test case.

Like legislation applicable to all claims of a generally similar character is respectfully recommended. The time of the accounting officers is fully occupied in the settlement of current matters and should not be taken up in the adjustment of a class of claims which might have been presented to the courts by the claimants at earlier dates if at the time they had felt themselves aggrieved by the determination of the accounting officers.

Considerable difficulty has been experienced in determining in many cases whether certain appropriations were to be considered as "permanent specific appropriations," so as to make them available for the payment of expenses incurred after the fiscal year for which the appropriation acts in which they are contained were made. It is to be hoped Congress will furnish a definition of these words as recommended in previous reports.

Respectfully, yours,

R. B. Bowler, Comptroller.

The SECRETARY OF THE TREASURY.

REPORT OF THE AUDITOR FOR THE TREASURY DEPARTMENT.

TREASURY DEPARTMENT,
OFFICE OF THE
AUDITOR FOR THE TREASURY DEPARTMENT,
October 15, 1896.

SIR: I have the honor to submit my report of the transaction of business in the office of the Auditor for the Treasury Department for the fiscal year 1896.

CONDITION OF BUSINESS.

The condition of public business in this office at the close of the fiscal year 1896 was satisfactory. The 1,025 accounts remaining on hand, as shown on page 11 of this report, were received during the quarter then ended, and it was not possible for this office to adjust these in the condition in which they then were.

To state the case briefly, at the close of the fiscal year 1896 there was not then pending in this office an account that could have been settled.

Particular attention is called to the work of this office under section 9 of the act approved March 2, 1895 (28 Stat. L., 808), by which, beginning July 1, 1895, masters of vessels were required to forward to this office copies of the manifests of their vessels before making entry at the custom-house, and collectors were required to forward copies of all manifests filed with them and to show on the same the disposition of all merchandise named therein. Experience showed that, in order to put a complete check upon the merchandise imported, it was necessary for the Department to direct that the manifests of all railroad cars not under consular seal and of all wagons and other vehicles be forwarded to this office, and such direction was given by the Department. the operation of said law and the orders of the Department, manifests of all vessels, railroad cars, wagons, and vehicles required to be forwarded to this office are received promptly, and each piece or package of merchandise now imported into the United States at the 599 ports and subports at which such vessels, cars, and vehicles arrive, not including the 6 ports at which naval officers are stationed, are promptly checked up.

The first six months of the fiscal year were devoted to perfecting this system by which collectors of customs are required to faithfully account for all merchandise received into their custody. An aggregated statement of the same will be found on page 13 of this report. Table A of the appendix shows that during the first half of the fiscal year there were received in this office 56,683 manifests of vessels, boats, cars, and other vehicles, and 1,091 manifests of cars under consular seal.

Beginning with January 1, 1896, a detailed record of these manifests was required to be kept, and the result is shown in Table B of the appendix. By the said table it is shown that this office received,

examined, and checked 10,114 manifests of vessels and small boats, 104,388 railroad ears not sealed, 4,795 wagons and other vehicles, and 630 railroad ears under consular seal, making the total number of manifests received, examined, and checked during the year 177,701.

The importance of this new work will be realized when it is understood that from 1789 to 1895 the Treasury Department was not informed of the arrival of a vessel, car, or vehicle, and the accounts of the collectors of customs were not examined and checked by this office so as to show that the duty on all merchandise coming into the possession of collectors of customs was duly accounted for, while under the new system, which has now been in operation one year, it is impossible for a collector of customs to receive into his custody any merchandise shown on the manifests of vessels, cars, or vehicles arriving and not collect the correct rate or amount of duty on the same.

I take pleasure in expressing to you my appreciation of the intelligence and diligence of the Deputy Auditor, Hon. Robert M. Cousar; the law clerk, Mr. J. C. L. Gudger; the chiefs of division, Messrs. J. G. Dill, Chester E. Rees, T. O. W. Roberts, and C. E. Fitzsimons, and of the clerks and other employees, who have so zealously worked for the advancement of the office and the correct dispatch of public

business.

Appended hereto is a statement of the work performed in this office for the fiscal year.

E. P. BALDWIN, Auditor for the Treasury Department.

The SECRETARY OF THE TREASURY.

APPENDIX.

REPORT OF THE AUDITOR FOR THE WAR DEPARTMENT.

TREASURY DEPARTMENT,
OFFICE OF AUDITOR FOR WAR DEPARTMENT,
Washington, D. C., October 1, 1896.

SIR: I have the honor to submit the following annual report, showing the details of the work performed in this office during the fiscal year

ending June 30, 1895.

A brief statement of the duties performed by each of the several divisions in this Bureau is given, with a detailed report of the work performed by each division during the fiscal year.

PAY AND BOUNTY DIVISION.

This division receives and examines all claims for arrears of pay and bounty due soldiers or their heirs for services in the Army. These claims are entered in registers according to regiments or other organizations, and are then filed in the same order to await their turn for examination. After a claim has been reached, the soldier's military record having been obtained from the War Department, a transcript of all payments made to the soldier is procured from the archives division of this office. If nothing is found to be due, a disallowance is recommended and the case is sent to the review division, where it receives a second audit, and after an agreement is reached between the two divisions the disallowance is submitted to the Audifor for certification to

the Secretary of the Treasury.

When anything appears to be due from the United States, all necessary evidence as to identity, heirship, title, etc., is collected by this division, an itemized statement of the soldier's account is made, and all papers sent to the review division for re-examination. After the balance has been found it is certified to the division of bookkeeping and warrants, and a copy of each certificate is sent to the Secretary of War. When the certificates have been issued the claims and accompanying papers are placed in the files of settled claims according to the number of the settlement. This division also investigates all cases of fraud, forgery, false personation of claimants, etc., and necessary steps are taken through the officers of the Department of Justice and otherwise to recover any moneys that may have been improperly drawn from the Treasury and to punish the offenders.

The following tables show the work performed by this division during the fiscal year ending June 30, 1896:

EXAMINING BRANCH. .

Classes of claims.	Claims pending July 1, 1895.	Claims received.	Sent to settling branch.	Dis- allowed.	Referred else- where.	Claims pending June 30, 1896.
WHITE SOLDIERS.					,	
Commissioned officers and enlisted men subsequent to April 13, 1861, arrears of pay and all bounties	19, 365 153 44	12, 617 57 34	6, 516 20 16	7, 989 29	2, 032 136	15, 445 25
COLORED SOLDIERS.						
Arrears of pay and bounty	4, 935	2, 431	813	1, 365	1,602	3, 586
Total	24, 497	15, 139	7, 365	9, 392	3, 809	19, 070

SETTLING BRANCH.

Classes of claims.	Claims pending July 1, 1895.	Received from examin- ing branch.	Settled and closed.	Dis- allowed.	Referred else- where.	Claims pending June 30, 1896.
WHITE SOLDIERS.						
Commissioned officers and enlisted men subsequent to April 13, 1861, arrears of pay and all bounties Claims prior to April 14, 1861	i	6, 516 20 16	5, 328 20 16	200		1, 623
COLORED SOLDIERS.						
Arrears of pay and bounty	41	813	710	35		109
Total	676	7, 365	6,074	235		1, 732

Number of claims settled and allowed during the year	6,074 \$493,735,98
Whole number of claims disallowed and referred	
Total number of claims disposed of	
Number of claims pending June 30, 1896	
Number of letters written and mailed during the year	158, 685

In addition to the 19,510 claims disposed of during the year ending June 30, 1896, there were 7,365 claims perfected by the examiners and transmitted to the auditing branch for settlement. There were also 37,239 claims examined and suspended for material evidence.

The following table gives a comparative statement of the number of claims pending in the pay and bounty division at the end of each of the last five fiscal years, showing a gradual gain on the work for each year:

Number of claims pending—	Examining branch.	Settling branch.	Total.
June 30, 1892. June 30, 1893. June 30, 1894. June 30, 1895. June 30, 1896.	39, 146 32, 497 24, 497	799 649 548 676 1, 732	45, 511 39, 795 33, 045 25, 173 20, 802

The work of the pay and bounty division is still about one year behind. although the above tabulated statement shows that a gradual gain has been made on the back work during the last four years, the number of claims on hand having been reduced by 5,716 during the fiscal ending June 30, 1893, and by 6,750 during the fiscal year ending June 30, 1894, and by 7,872 during the fiscal year ending June 30, 1895, and still further reduced by 4,351 during the last fiscal year, which has brought the work up to claims filed subsequent to June 30, 1895. At the same rate of gain on this back work it will require the present force at least three years to bring the work up to date, if as many new claims continue to be filed; but an increase of twenty five clerks would enable this work to be brought up to date in less than two years, and I respectfully recommend, as I recommended in my last two annual reports, that this increase of force be made, in order that all just claims for pay and bounty due to soldiers and to the families of deceased soldiers may be paid more promptly.

MAIL AND MISCELLANEOUS DIVISION.

The duties of the mail and correspondence section of this division are to examine, stamp, and distribute all the incoming official mail, including claims and accounts; to brief, jacket, and register all claims, important papers, additional evidence, etc., and answer calls for information in regard to officers and enlisted men who served in the United States armies since July 1, 1815, received from the Adjutant-General of the Army, Record and Pension Office, Quartermaster-General, Commissary-General of Subsistence of the War Department, or from the Commissioner of Pensions, and also answer all letters which do not pertain to claims on file in this office, and refer letters to the proper office or bureau which do not belong to the work of this office. All the mail is promptly disposed of the same day as received, and the work of briefing, jacketing, and registering claims and other matters is promptly done. There has been a slight decrease in the number of claims received and also in the incoming mail generally, as compared with several previous fiscal years.

The duties of the ordnance, medical, and miscellaneous section of this division are to settle the accounts of disbursing officers of the Army sent to this office by the War Department, pertaining to ordnance, medical, and hospital appropriations, contingencies of the Army, and salaries of officers and employees of the War Department; also to settle the accounts of the National Home for Disabled Volunteer Soldiers; also the accounts of the disbursing clerk of the War Department, and claims of a miscellaneous character, such as claims under special acts of Congress; claims for material furnished the Ordnance Department; claims for refundment of bounty money taken from soldiers under General Orders, No. 305, of 1864, and for money erroneously paid to secure exemption from draft. There were over eighty different appropriations made for the settlement of these accounts and claims, involving an

expenditure of over \$10,000,000.

This division also keeps a record of all the requisitions issued pertaining to the business of this office, amounting in the aggregate to \$51,687,470.66, as appears from the following statement (p. 6) of the requisitions approved during each month of the fiscal year.

i i	Month.	Number of requisitions.	Amount.
July	1895.	 322 211	\$7, 498, 202. 50 6, 904, 660. 35
September October November		 179 172 192	4, 781, 691, 61 3, 902, 867, 73 4, 299, 071, 82 4, 192, 143, 89
February March April May	1896.	 175 156 184	2, 416, 162, 99 3, 712, 788, 34 3, 385, 310, 32 3, 579, 174, 39 8, 516, 423, 82 3, 497, 972, 90
Total	, , ,	 2, 300	51, 687, 470, 66

There were 24 requisitions suspended for delinquency, the officers in whose favor they were drawn, or the War Department, to which the accounts were sent, having failed to forward the accounts within the time prescribed by law. Of these, 22 were delinquencies on the part of disbursing officers, and 2 on the part of the War Department, all of which have been officially waived, the former by the Secretary of the Treasury and the latter by the President.

In addition to the above, it is the duty of this division to receive, record, and file all official bonds of officers of the United States Army who disburse moneys, to record and file all contracts made under the supervision of the War Department pertaining to the medical, hospital, and ordnance business of said Department; to answer calls made by the pay and bounty division of this office or by the officer concerned or his representatives, to issue certificates of indebtedness or nonindebtedness for clothing, camp and garrison equipage for regular and volunteer officers who served in the United States Army since March 3, 1817.

The following tabular statement shows a summary of the work performed in this division during the last fiscal year:

REPORT OF THE WORK FOR FISCAL YEAR 1895-96.

ARCHIVES DIVISION.

This division has charge of the files of all accounts of army paymasters which have ever been settled by the accounting officers of the Treasury; also book records of payments to regiments, batteries, and other independent organizations, detachments, hospitals, paroled prisoners of war, recruiting parties, and all other separate commands: also book records of payments to officers of the volunteer service and to volunteer enlisted men who were discharged before the expiration of their terms of service, and the card indexes of payments to enlisted men absent from their regular commands.

The principal duties assigned to this division are to withdraw from the files such vouchers as are required by other divisions and return them to their proper places when no longer required; to furnish the pay and bounty division with abstracts from the book records of payments to volunteer officers and with transcripts of the paymasters' accounts for use in the settlement of claims for arrears of pay and bounty; to furnish information from the card indexes relative to payments made to enlisted men who were not paid on the regular pay rolls of their commands, and to copy or repair worn and defaced muster and pay rolls.

The following is a record of work performed during the fiscal year:

Paymasters' settlements received and filed	356 58, 078
Vouchers returned to the files.	
Vouchers sent to Record and Pension Office, War Department	1, 196
Vouchers received from Record and Pension Office, War Department	1, 298

Letters registered	1,242
Final statements copied	7
Pages of register copied	704

PAYMASTERS AND CLAIMS DIVISIONS.

The duties of this division are to audit and adjust the accounts of Army paymasters; to state accounts in favor of the Soldiers' Home for the monthly contributions of 12½ cents by enlisted men of the Army, court martial fines, forfeitures by desertion, etc.; to keep a record of deposits by and repayments to enlisted men; to determine the longevity status of officers of the Army; to raise charges against officers for overpayments, erroneous musters, etc., and to make such settlements of a miscellaneous character as are incidental to the general work of the division. The book records of payments to officers of the Regular Army are kept in this division, and transcripts from said rec-

ords are furnished when required by other divisions.

In the claims section of this division the following classes of claims are audited: Claims growing out of contracts made by the officers of the Quartermaster's, Commissary, and Engineer Departments; claims for vessels lost in the military service under act of March 3, 1849, and not barred by subsequent legislation; claims for the value of horses under the act of March 3, 1849, not barred, and for the value of horses taken from soldiers or turned over under orders; claims growing out of the Oregon and Washington Indian wars of 1855 and 1856; State war claims; claims for transporting troops and supplies for the Army and supplies for homes of disabled volunteers on the lines of the bondaided railroads and for services on other railroads where the evidence is not sufficient to warrant payment by disbursing officers of the Army; claims which can not be paid by disbursing officers for want of funds; claims for occupation of real estate by the Army; claims of officers and men of the Army for destruction of private property under the act of March 3, 1885; claims for commutation of rations to soldiers on furlough and while prisoners of war, for pay for extra-duty service, commutation of fuel and quarters, and for travel pay while under orders.

ACCOUNTS.

Number on hand July 1, 1895	17 303
Number to be accounted for	
Number on hand June 30, 1896	27
Amount dishursed in accounts examined, \$13,530,879,19	

Amount dispursed in accounts examined, \$13,550,879.19.

On the 30th of June, 1896, the accounts of Army paymasters were rendered to this office to include May, 1895. Said accounts have been settled to include March, 1896, and the balances certified to the Secretary of the Treasury. All of the April accounts have been examined.

DEPOSITS AND REPAYMENTS.

The record of deposits by enlisted men under act of May 15, 1872, shows that 7,358 deposits were made since last report, amounting to \$397,452.43, and that 5,888 deposits have been withdrawn, amounting to \$341,309.90, upon which the depositors received interest amounting to \$39,863.12.

ADVANCE BOUNTY.

Number of calls on hand July 1, 1895	96 3, 814
Number of calls to be accounted for	3, 910 3, 894
Number of calls on hand June 30, 1896	
CLAIMS.

Number to be accounted for Number disposed of during the year	8, 324 2, 761
Number on hand June 30, 1896	5, 563
Amount claimed in cases disposed of, \$934,731.42. Amount allowed in cases disposed of, \$480,347.04.	

SOLDIERS' HOME.

During the year ending June 30, 1896, the sum of \$129,375.22 was placed to the credit of the permanent fund of the Home, being the amount retained from enlisted men of the United States Army on account of 12½ cent fund and amount found due deserters and dishonorably discharged men.

There was withdrawn from said fund during the year, for current expenses, the sum of \$88,600, and the amount paid the treasurer of the Home on account of interest on said fund, under section 8 of the act

approved March 3, 1883, was \$80,604.66.

DESERTERS' SETTLEMENTS.

Number on hand July 1, 1895	$209 \\ 2, 157$

Number on hand June 30, 1896	136
Longevity.	
Number of cases in which dates have been revised and established, showing the time from which increase is due officers of the Army for length of service.	210
MISCELLANEOUS.	
Number of vouchers repaired. Number of vouchers returned to files Number of miscellaneous settlements reported. Number of miscellaneous papers filed. Number of requisitions passed Number of boxes stenciled. Number of transcripts prepared	6, 976 63, 038 102, 017 754 3, 668 1, 697 3, 908 451 729 242
Number of deceased soldiers' cases settled	198

Number of accounts examined in connection with inquiries received...... 10, 345 MILITARY DIVISION.

The duties of this division are to examine and adjust all accounts of army engineers, army quartermasters, and officers of subsistence.

Engineer officers' accounts embrace all expenditures for sites and materials for fortifications and for seacoast defenses, together with their maintenance and repair, all river and harbor improvements, and surveys of streams and lakes throughout the United States.

Quartermasters' accounts cover payments on account of barracks, hospitals, storehouses, clothing for troops, transportation of troops, and for all supplies that may be necessary for the Army in camp or in the

neld.

Subsistence accounts represent expenditures for supplying the Army

with provisions.

In addition to the accounts above enumerated, the division settles the accounts of the Signal Service, accounts of the Military Academy at West Point, accounts for the maintenance and repair of military telegraphs and the military prison at Fort Leavenworth, Kans., the accounts for improvement of buildings and grounds in the District of Columbia, and those of the Yellowstone Park.

These settlements aggregate \$41,563,914.60. Six thousand four hundred and sixty-eight accounts were settled and 717,143 vouchers were examined in connection therewith.

REVIEW DIVISION.

This division was created on October 1, 1894. Its organization was made necessary on account of the changes in the methods of accounting in the Treasury by the act of July 31, 1894. By that act the office of the Second Comptroller, which had previously revised all work of this office, was abolished, the second examination of disbursing officers' accounts which receive administrative action being considered unnecessary. But to guard against the possibility of collusion or carelessness

in the settlement of claims which have not had a previous examination and approval by an administrative department, section 14 provided that "the Auditor shall cause them to be examined by two of his sub-

ordinates, independently of each other."

In House Report No. 637, Fifty-third Congress, second session, page 14, in this connection it was recommended that, in the case of claims not passed upon by an administrative officer, the Auditor, for the Government's protection, should have such claims passed through two divisions of his office, making the joint action of both divisions necessary to complete the audit. The greater portion of the work of this office consists in the examination and settlement of these original claims, filed here in the first instance by the claimants, and the review division was established for the purpose of making the second audit required by law in these cases.

The same amount of clerical labor and scrutiny is given to these original claims which do not receive administrative action that they received under the former system, and the Government has as much protection, while the work is facilitated by reason of being under the jurisdiction of one office, where the records are more readily accessible for reference, and for the further reason that a great deal of official correspondence

that was necessary under the old regime is now unnecessary.

A record is also kept of the data contained in the annual report of the Auditor, annual and other estimates, and such reports or information as this office may be required to furnish to Congress or any of the Departments.

The following is a record of the work performed by this division

during the fiscal year:

	For allow-	For dis-
Character of claims audited and passed.	For allow- anco.	allowance.
Soldiers' back pay and bounty	6, 394 674	.5, 166 231
Total	7, 068	:5, 397

Reference is made to the report of work in the pay and bounty division, the paymasters and claims division, and the mail and miscellancous division, who audited these claims in the first instance, for fuller information as to the character of the claims, amounts involved, etc.

It gives me great pleasure to state that the officers, clerks, and employees of this Bureau have discharged their duties faithfully and efficiently, and that the business of the office is being satisfactorily conducted under the new system of accounting, and, from the decided gain made in bringing up the back work, that the work of the office will soon be brought up to date.

Very respectfully,

T. STOBO FARROW, Auditor for the War Department.

The SECRETARY OF THE TREASURY.

REPORT OF THE AUDITOR FOR THE INTERIOR DEPARTMENT.

TREASURY DEPARTMENT, OFFICE OF THE AUDITOR FOR THE INTERIOR DEPARTMENT, September 17, 1896.

SIR: I have the honor to submit herewith the annual report of this Bureau for the fiscal year ending June 30, 1896.

On the 27th day of May, 1893, the present incumbent took the oath of office as Third Auditor for the Treasury. Four days from that time the following report was made showing the number of accounts and claims remaining unsettled in said office:

	Number of accounts.	Amount involved.
Military division Pension division Claims division	1, 793 150 a 7, 546	\$10, 321, 079. 72 111, 210, 170. 20 1, 994, 571. 38
Total	9, 489	123, 525, 821. 30

a Claims.

Under the act known as the Dockery law, the nomenclature of the Auditors changed and the Third Auditor became Auditor of the Treasury for the Interior Department. This bill transferred the Military and Claims divisions, whose accounts the Third Auditor had heretofore settled, to the Auditor for the War Department, and transferred to the Auditor for the Interior Department two divisions, namely, the Indian division and the Land, Files, and Miscellaneous division.

When the work of the Indian division was transferred to the Auditor for the Interior Department there were many accounts that had been in the files for two years, due, undoubtedly, to a great extent, to the constant annual increase in the Indian service during the last five years without any increase in the clerical force of the division.

The settlement of Navy pension accounts, with all matters relating thereto, were, under the Dockery Act, transferred from the office of the Fourth Auditor to this office and became part of the duties of the pension division, which added largely to its work and responsibilities, representing in amount about \$3,500,000 per annum.

On the 30th day of June, 1896, three years and one month from the date which showed \$123,525,821.30 unsettled claims and accounts on hand, I am glad to be able to show only \$34,269,713.43 unsettled, which is less than one-third of the amount unsettled when I took charge of the office.

The unsettled claims and accounts are made up as follows:

Pension division	\$33,057,556.26
Indian division	
Land, Files, and Miscellaneous division	10, 701. 27

You will see by the following report, as shown by divisions, that the amount remaining on hand represents absolutely current work, and that

all the work is up to date, which is very gratifying.

The following statement shows, in tabular form, the number of accounts and claims, and amounts involved, on hand July 1, 1895, received and settled during the fiscal year, and remaining unsettled June 30, 1896. The total number of accounts and claims settled during the year was 21,974, involving \$181,394,072.48.

	On har	nd July 1, 1895.	Receive	ed during fiscal year.

INDIAN DIVISION.

The general duties of the division are to examine and state the cash accounts of Indian agents and other disbursing officers of the Indian service, and to keep records of contracts for supplies, so that any article can be traced from its place of purchase to its destination and the fulfillment of the contract can be ascertained. It also audits the claims of contractors for supplies and claims of contractors for the transportation of the same, claims of employees of the Indian service, and others for services rendered and supplies furnished by open-market purchase.

Such information and documentary evidence as is found in the files bearing upon suits against the United States is furnished to the Attorney General and the proper courts by this division, and transcripts of the accounts of the disbursing officers are also furnished in cases where it is necessary to bring suit for the recovery of balances found due to the Government.

The total number of disbursing officers in the Indian service whose

accounts were examined and settled in this division in the last fiscal year is as follows:

Agents	114
Agents, special	7
Inspectors	10
General superintendents of schools	2
Superintendents of schools	57
Supervisor of Indian schools	5
Allotting agents	13
Disbursing officers, special commissions.	13
Land examiners.	2
Governor, Alaska	1
Examiner of surveys.	4
Secretary of Board of Indian Commissioners.	1
Superintendent of Indian warehouses	2
Superintendent of Indian Affairs	1
Receiving and shipping clerks	3
Others of a miscellaneous nature	17
Surveyors-general and special disbursing agent	2
Receiving clerk, Indian Office	1
Total	252

The following tables exhibit the volume of work done from July 1, 1895, to June 30, 1896, compared with the same period of the previous year:

Accor				ints.		
	Cash.		Claims.			
	1895.	1896.	1895.	1896.		
On hand at commencement of the fiscal year	646 1,534	290 1, 639	180 5, 963	32 7 8, 619		
Total	2, 180 1, 890	1, 929 1, 711	6, 143 5, 816	8, 946 8, 455		
Remaining on hand June 30. 1896	290	218	327	491		
	18	95.	18	96.		
Disbursements allowed in agents' accounts	\$8, 565, 584, 37 4, 838, 890, 65 \$5, 360,		2, 057. 33 0, 253. 87			
Total	13, 404	, 475. 02	13, 45	2, 311. 20		

The number of cash accounts received was $6\frac{3}{4}$ per cent more than last year. The number of claims received increased 44 per cent, while said settlements increased 45 per cent. The total disbursements in both accounts and claims settled increased \$47,836.18 over the last fiscal year.

Under the head of "Accounts" are included both the regular quarterly returns of officers and the "Explanations" filed by them to remove suspensions, so that the actual status June 30, 1896, may be exhibited thus:

•	Cash.		
	Original accounts.	Explana- tions.	Total.
In process of examination. Waiting examination	73	81 64	154 64
Total:	73	145	218

The following is a detailed statement of the 491 claims and 218 accounts on hand June 30, 1896, showing the amount of disbursements involved in each class:

186	current claims	373,475.25
101	Delaware claims (annuity)	
35	Nez Perce claims	
		··
491	claims, amounting to	468, 022, 86
218	claims, amounting to	733, 433. 08
	Total	1, 201, 455. 94

Of the 491 claims on hand June 30, 1896, all were under examination except the 101 Eastern Cherokee claims for the payment of which there is no appropriation available, and of the 218 accounts on hand on the same date 154 were under examination, leaving but 64 accounts (explanations to prior accounts) to be examined in connection with the succeeding accounts of agents, the work being up to date.

On July 1, 1895, there were in this division 103 property accounts and explanations, and during the year there were 45 sets of explanations received. There were settled during the year 138 accounts and explanations, leaving on hand July 1, 1896, 10 sets of explanations, all of which

are under examination.

Six hundred and thirty-one advance requisitions were approved during the whole year, amounting to \$7,129,883.01, against 497, amounting to \$4,008,055.78, during the last nine months of the year 1895. Other work accomplished by this division is shown as follows:

COMPARATIVE STATEMENT BY FISCAL YEARS.

	1895.	1898.
Number of letters written July 1 to June 30. Number of pages copied July 1 to June 30. Number of certificates copied July 1 to June 30. Number of certificates of deposit, appropriations designated on. Number of transcripts furnished. Number of bond circulars mailed.	6, 062 3, 636 31 6	6, 028 9, 669 4, 892 49 1 8, 000

The average number of clerks employed July 1,1895, to June 30, 1896, was $30\frac{1}{4}$ against $31\frac{11}{12}$ for the same period of previous year.

LAND, FILES, AND MISCELLANEOUS DIVISION.

Briefly stated, upon this division is devolved the performance of the work involved in the settlement of the accounts of receivers of public moneys arising from the sales of public and Indian lands and of their accounts as disbursing agents; the accounts of registers, United States surveyors general and deputy surveyors general, and all other accounts for receipts and expenditures in the public lands service; the accounts of the disbursing elerk of the Interior Department, and of the disbursing officers of the Geological Survey, Patent Office, Census Office, Howard University, Government Hospital for the Insane, Columbia Institution for the Deaf and Dumb, and of all special receiving and disbursing officers of the Interior Department, exclusive of pension agents and officers of the Indian Bureau; and the accounts of the Architect of the Capitol. The claims of railroad and telegraph companies for

services rendered the various bureaus above indicated are examined, reexamined, and settled in this division.

The division is also charged with the handling and custody of the files of the Bureau, in which work there is an average of two clerks and five employees of Class A engaged. Much of the work done by the employees in the files section of the division in the arrangement and care of the immense number and variety of records in their custody can not be satisfactorily described or classified in a report of this character. The employees in this section are most seriously embarrassed in the performance of their duties in consequence of the overcrowded condition of the files rooms. In view of the fact that all of the shelving space in the main files rooms has been entirely exhausted and that the very limited area between the tiers of shelving is now being used for the distribution of important documents, and that this space is insufficient for the accommodation of papers likely to be received within the next quarter, the necessity for some early provision for the proper care of the files is manifest.

The work of the division is up to date.

There are but 28 accounts, involving \$10,701.27, remaining unsettled, a condition, as I am advised, without precedent in the settlement of such accounts.

PUBLIC LANDS.

Public lands accounts and claims—	01

PUBLIC BENEFICIARIES.

THE GOVERNMENT HOSPITAL FOR THE INSANE.

This institution was established by act of Congress of March 3, 1855 (10 Stat. L., p. 682; Rev. Stat., secs. 4833 to 4858, inclusive). Some idea of the magnitude to which this institution has grown may be gathered from the following data:

The appropriations made therefor for the fiscal year ending June 30, 1896, aggregated \$407,000. There were \$23,695.13 received from private patients and sales of public property, making the total amount of funds available for the said fiscal year \$430,695.13.

HOWARD UNIVERSITY.

This institution was established by act of Congress approved March 3, 1867 (14 Stat. L., p. 438), being an act of incorporation. Unlike the other beneficiaries, it renders no equivalent to the United States or District of Columbia for the moneys appropriated for its use. annual appropriations therefor are pure gratuities.

The first appropriation made in aid of the university was by act of Congress approved March 3, 1879 (20 Stat. L., p. 404), \$10,000, onehalf of which was to be charged to the District of Columbia. sequent appropriations were contained in sundry civil appropriations

for the general expenses of the Government.

The appropriations for the fiscal year ending June 30, 1896, were as follows:

For maintenance of the Howard University, to be used in payment of part of the salaries of the officers, professors, teachers, and other regular employees of the university, the balance of which will be paid from donations and other sources, twentyeight thousand five hundred dollars;

For tools, materials, wages of instructors, and other necessary expenses of the industrial department, three thousand dollars;

For books for library, bookcases, shelving, and fixtures, three hundred dollars; For books for the library of the law department, one thousand dollars;

For material and apparatus for chemical, physical, and natural history and laboratory, two hundred dollars;

For improvement of grounds, five hundred dollars; For repairs of buildings, one thousand dollars;

In all, twenty-nine thousand five hundred dollars.

(Correct amount, by items, thirty-four thousand five hundred dollars.)

Since the rendition of report for the fiscal year ending June 30, 1895. Congress added the following proviso to the annual appropriation for the present fiscal year:

Provided, That no part of this appropriation shall be used, directly or indirectly, for the support of the theological department of said university, nor for the support of any sectarian, denominational, or religious instruction therein: And provided further, That no part thereof shall be paid to said university until it shall accord to the Secretary of the Interior, or to his designated agent or agents, authority to visit and inspect such university and to control and supervise the expenditure therein of all moneys paid under this appropriation.

MARYLAND INSTITUTION FOR THE INSTRUCTION OF THE BLIND.

The Secretary of the Interior, by virtue of the authority vested in him by section No. 4869 of the United States Revised Statutes, caused certain indigent blind persons to be instructed in the above-named institution at an expense to the Government of

\$6,675

COLLEGES OF AGRICULTURE AND THE MECHANIC ARTS.

Pursuant to the provisions of the act of August 30, 1890 (26 Stat. L., p. 417), making permanent appropriation from the proceeds of the sales of public lands "for the more complete endowment and support of the colleges for the benefit of agriculture and the mechanic arts established under the provisions of an act of Congress approved July 2, 1862," there were paid to each of the States and Territories of the United States \$22,000, making an aggregate of

81, 056, 000

THE COLUMBIA INSTITUTION FOR THE DEAF AND DUMB.

This institution is not wholly supported by the Government, but is an independent corporation, chartered by Congress under act approved February 16, 1857 (11 Stat. L., p. 161), and aided by annual appropriations made by Congress.

Sections 4859 to 4869, inclusive, of the United States Revised Statutes relate to the establishment and general government of this institution. There was \$64,000 appropriated by Congress in aid of its

maintenance for the fiscal year ending June 30, 1896.

CLASSIFICATION OF THE EMPLOYEES OF THE COLUMBIA INSTITUTION FOR THE DEAF AND DUMB FOR THE FISCAL YEAR ENDING JUNE 30, 1896.

THE PATENT OFFICE.

The expenditures on account of the Patent Office, as exhibited by the accounts of the disbursing clerk of the Interior Department, specifically therefor, for the same period, are as follows:

Salaries	\$685, 828, 25
Official Gazette	77, 812, 62
Photolithographing	46, 881. 90
Scientific library	1,761.52
Rent of rooms for models	13, 000. 00

Total expenditures 825, 284.29

 From this amount should be deducted the amounts expended for the office from the appropriations for contingent expenses, and stationery, Department of the Interior, 1896, and public printing and binding, 1896, the amount of which can not be determined from the accounts rendered to this office, as they are made out for the entire Department. The accounts for public printing and binding are rendered by the Public Printer to the Auditor for the State and other Departments.

HOT SPRINGS RESERVATION.

RECEIPTS AND DISBURSEMENTS.

The act of March 3, 1891, authorizes the Secretary of the Interior "to execute leases to the bath houses and bath house sites on the permanent reservation at Hot Springs, Arkansas, for periods not exceeding twenty years, and at an annual rental of not less than thirty dollars per tub for each tub used in any bath house," and "to execute a lease of the Arlington Hotel site at Hot Springs Arkansas, to the present lessees for a period of twenty years, and at an annual ground rent of two thousand five hundred dollars for the first five years thereof, and at the end of said period of five years, and of each period of five years thereafter, he shall readjust and fix the compensation to be paid during the ensuing five years, but not less than that hereinbefore provided for."

Under the provisions of the act the bath tubs and hotel site are now leased, payments therefor being made in advance. The amount collected for ground and water rents is more than adequate to pay the running expenses of the reservation, including its care and protection and the maintenance of the free bath houses. The amount collected during the fiscal year ending June 30, 1896, was \$17,250.88, and the amount expended by the superintendent for the purposes above specified, for the same period, was \$14,798.62.

PENSION DIVISION.

The condition of the work in this division is entirely satisfactory, as shown by the following tabular statements. There is nothing in arrears, and the entire force is engaged on current work. During the last quarter of the fiscal year, for the first time in the history of the division, the accounts of several of the pension agents for one quarter or one month have been entirely examined, and in some cases fully settled, before the receipt of the accounts for the next succeeding quarter or month. The majority of these accounts contain from 40,000 to 100,000 vouchers each.

This state of affairs is creditable alike to the system adopted (made possible by the act of July 31, 1894), to the careful supervision of those in charge of the different branches of the work, and to the faithfulness and efficiency of the clerical force.

At the close of the year there were 47 accounts unsettled, containing 929,019 vouchers, representing disbursements of \$33,057,556.24. Their condition was as follows: Of the agencies where the quarterly payments were made in March there were 282,339 vouchers on hand, of

which all but 4,933 had been examined. Of those where quarterly payments were made in April there were 291,312 vouchers on hand, of which all but 154,712 had been examined. Of those where quarterly payments were made in May there were 355,361 vouchers on hand, all received since June 15—156,626 having reached this office on the last day of the fiscal year, June 30. The examining clerks at the close of June were nearly half through the accounts for April, which accounts were received at this office during the latter half of May, all within six weeks of the close of the year.

ACCOUNTS OF PENSION AGENTS, INCLUDING SUPPLEMENTAL SETTLEMENTS; ALSO, SPECIAL SETTLEMENTS, ACCOUNTS FOR LOST CHECKS, RECLAIMED CHECKS, EXAMINING SURGEONS' FEES, ATTORNEYS' FEES, ETC., ON HAND JULY 1, 1895, RECEIVED AND SETTLED DURING THE FISCAL YEAR, AND REMAINING ON HAND JUNE 30, 1896.

Claims on hand June 30, 1896.	1,039
Letters received Letters written Names indexed Reimbursement vouchers examined Blanks mailed to applicants Transcripts sent out Auditor's certificates copied	13, 899 31, 877 50, 927 4, 178 10, 431 5, 044
Auditor's certificates compared	9,478

Eighteen claims were referred to the secret service division of this Department for investigation, which have all been returned with reports, the amount involved in the settlement of the same being \$12,051.75, and the amount allowed \$4,000.49, resulting in a saving of \$8,051.26, at a total cost of investigation of \$1,511.26.

The above will show an increase in claims received during 1896 over

those received in 1895 of 990.

In amount involved an increase of	
In claims reported and paid an increase of	4, 158
In letters received an increase of	2,550
In letters written an increase of	
In names indexed an increase of	10, 836
In youchers examined an increase of	38, 5 96
In transcripts sent out an increase of	3, 072
Decrease in blanks mailed	5, 999

The act of March 2, 1895, provided for the payment of accrued pension to date of death of all pensioners, while heretofore, viz, from September 28, 1892, in accordance with ruling of Secretary of the Interior, it had only been paid in cases of male pensioners, refusing such payment in cases of widows, minors, dependent mothers and fathers. The said act of March 2, 1895, was retroactive, dating back to September 28, 1892, thus adding about 2,500 claims, previously suspended, to the large number of current claims for reimbursement now allowed by said

act in cases of pensioners of all classes.

The work on claims for reimbursement on account of the last sickness and burial was increased very materially by the act of March 2, 1895, as the following facts in relation to it will show: Prior to the act of March 2, 1895, claims for reimbursement were allowed in the cases of invalid pensioners of the late war of the rebellion and in no other cases. Prior to the passage of said act, and from September 28, 1892, the number of claims received in the case of invalid pensioners of the late war would average about 40 per month. The average receipt of claims is now about 330 per month. Reimbursement in all classes of pensions is now allowed. Prior to March 2, 1895, they were allowed, as before stated, in the cases of but one class of pensioners. Now there are 14 others—namely, widows, dependent relatives, and minors, under the general law; invalids, widows, minors, dependent relatives, and helpless children, under the act of June 27, 1890; survivors war 1812; widows war 1812; survivors Mexican war; widows Mexican war; survivors Indian wars; widows Indian wars, and army nurses.

STATEMENT OF AMOUNTS PAID TO EACH CLASS OF ARMY PENSIONERS, ETC., AS SHOWN BY ACCOUNTS-CURRENT OF PENSION AGENTS DURING FISCAL YEAR ENDING JUNE 30, 1896.

a This agency also paid on account of "fees of examining surgeons, navy pensions, 1895," \$7,273.50.

LAW CLERK.

The duties of the law clerk consist in the examination of such legal questions as are referred to him, and giving his opinion upon them for use in the office, and the performance of such other duties as are required of him from time to time by the Auditor. He has written opinions in 51 cases referred to him during the fiscal year of 1896. He has examined a great many other cases and given oral opinions on the same during the year.

He also has the custody of all the opinions of the Comptroller of the Treasury furnished to this office under the provisions of the act of July 31, 1894, and keeps them indexed and recorded so that they can

be readily referred to.

He has made examination of many other miscellaneous questions

referred to him in connection with the work of the office.

He has prepared a great many letters in answer to correspondence in relation to legal questions that arose in the settlement of accounts by the office.

THE FILES.

Attention is respectfully invited to the urgent necessity for some early relief for the overcrowded and congested condition of the several files rooms. Every available inch of shelving space in the large files rooms has been exhausted. The important records pertaining to the settlement of pension accounts are now being of necessity distributed along the floors between the closely constructed tiers of shelving. The utilization of this space for such purpose is, for many reasons, most undesirable, and there is not enough of such space for the accommodation of the claims and accounts likely to be received within the next quarter.

It is estimated that not less than 140 linear feet of shelving is necessary each month for the proper care and preservation of the important records of this Bureau. This office receives about 1,000,000 pension vouchers every quarter, aside from the great number of papers representing settlements of other claims and accounts. I can not now see how this office can, without additional files rooms, preserve the records

as the law requires.

The exhibit of the year's work is very gratifying, and I am glad to testify that I have had the hearty cooperation of the deputy auditor, the very efficient help of the law clerk, and chiefs of divisions, and the faithful services of the clerks in the discharge of the duties of the office.

After another year's test of the new accounting system (known as the Dockery Law) I desire to say I am more thoroughly convinced than ever that it is practical and greatly superior to the old system.

Respectfully,

SAMUEL BLACKWELL, Auditor.

The Secretary of the Treasury.

(No. 11.)

REPORT OF THE AUDITOR FOR THE NAVY DEPARTMENT.

TREASURY DEPARTMENT,
OFFICE OF AUDITOR FOR THE NAVY DEPARTMENT,
September 30, 1896.

SIR: I have the honor to submit the annual report of this Bureau for the fiscal year ended June 30, 1896.

The balances, liabilities, and payments under "Pay" and other appropriations are shown by the following statements:

STATEMENT OF APPROPRIATIONS, PAY OF NAVY AND PAY OF MARINE CORPS, 1896.

Pay of the Navy, 1896.

Balance in hands of disbursing officers June 30, 1896 Balance in Treasury, as shown by ledger, June 30, 1896		\$86, 228.56 1, 096, 575.55
Total balance		1, 182, 804. 11
The ascertained liabilities, June 30, 1896, were as follows	:	
Due and unpaid officers and men. Due naval hospital fund. Due clothing and small stores fund. Due provisions, Navy Due on account of unpaid allotments. Due general account of advances.	\$730, 415. 26 27, 695. 32 78, 351. 86 2, 351. 01 24, 342. 50 471, 384. 79	
Total liabilities		1,334,540.74
Apparent deficiency		151, 736. 63
Pay of the Marine Corps, 1896.		
Pay of the Marine Corps, 1896. Balance in hands of disbursing officers June 30, 1896 Balance in Treasury, as shown by ledger, June 30, 1896		\$12, 680. 74 30, 220. 16
Balance in hands of disbursing officers June 30, 1896		\$12, 680. 74 30, 220. 16 42, 900. 90
Balance in hands of disbursing officers June 30, 1896 Balance in Treasury, as shown by ledger, June 30, 1896		30, 220. 16
Balance in hands of disbursing officers June 30, 1896 Balance in Treasury, as shown by ledger, June 30, 1896 Total balance The ascertained liabilities June 30, 1896, were as follows Due and unpaid officers and men Due naval hospital fund Due clothing and small stores fund		30, 220. 16 42, 900. 90
Balance in hands of disbursing officers June 30, 1896 Balance in Treasury, as shown by ledger, June 30, 1896 Total balance The ascertained liabilities June 30, 1896, were as follows Due and unpaid officers and men Due naval hospital fund	: \$44, 903, 15 2, 199, 84 1, 816, 89 23, 848, 86	30, 220. 16 42, 900. 90

The following table (p. 4) exhibits in detail the appropriations and

730

expenditures for the year.

Title of appropriation.	Year.	Appropria- tions and balances.	Net amount drawn out by warrant.	Balance in hand June 30, 1896.	Amount carried to the surplus fund.

EXCHANGE.

Bills of exchange were sold by the pay officers of the Navy Department during the year to the amount of \$2,006,366.87. Of this sum \$1,723,975.02 was drawn on the navy agents, London, and \$282,391.85 on the Secretary of the Navy.

on the Secretary of the Navy.

These bills were negotiated at varying rates of exchange, the gross loss being \$32,607.48; gross gain, \$2,016.97, making the total net loss

\$30,590.51.

The following tables show these transactions in detail:

Drafts Drawn on the Navy Agents, London, England, for the Fiscal Year ended June 30, 1896.

SPECIAL FISCAL AGENTS AT LONDON.

The contract with Messrs. August Belmont & Co., fiscal agents at London, provides as follows:

A commission of one-half of 1 per cent to be paid on disbursements

made by them on account of the Navy Department.

On daily balances in their hands, they paid to the United States the rate of interest paid by the London joint-stock banks, and on advances

they received the rate charged by the Bank of England.

They have received the amount of \$9,018.30 as commission under the above contract, and \$129.78 as interest on advances. They have paid to the United States \$471 as interest on daily credit balances. There has been a loss of \$9,732.89 in the transfer of funds from New York to London during the year.

WORK OF THE OFFICE.

The following tables show a summary of the work performed in the different divisions of the office for the fiscal year:

June 30, 1895.

The settlements of disbursing officers' accounts are well up to date. WM. H. PUGH, Auditor.

The SECRETARY OF THE TREASURY.

REPORT OF THE AUDITOR FOR THE STATE AND OTHER DEPART-MENTS.

TREASURY DEPARTMENT, OFFICE OF THE AUDITOR FOR THE STATE AND OTHER DEPARTMENTS,

October 22, 1896.

SIR: In compliance with instructions contained in the letter of Hon. C. S. Hamlin, Acting Secretary, under date of the 3d instant, I have the honor to submit a report of the transactions of this office during the fiscal year 1896, and of the condition of the public business committed to my charge, with such suggestions concerning it as seem to me to be in the public interest.

Tabular statements are given in the Appendix, as follows:

A.—Of salaries and expenses and of passport fees of the diplomatic service of the United States for the fiscal year ended June 30, 1896.

-Of consular fees, salaries, and expenses for the fiscal year ended June 30, 1896.

Schedules B and C, salaried officers.

C.—Of consular fees, compensation, expenses, and loss by exchange for the fiscal year ended June 30, 1896. Unsalaried officers.
D.—Of salaries, expenses, and loss by exchange of consular clerks for the fiscal year ended June 30, 1896.

E.-Of sundry expenses at consulates in China, Japan, Turkey, and Zanzibar for the fiscal year ended June 30, 1896.

F.—Of relief afforded seamen, with extra wages and arrears collected for the fiscal year ended June 30, 1896. G.-Of the number of seamen sent to the United States and the amount paid at the

Treasury for passage for the fiscal year ended June 30, 1896. H.—Of the character and amount of the official fees collected at each consulate (including agencies) during the fiscal year ended June 30, 1896.

I.—Of expenditures and disbursements for expenses, United States courts, fiscal year ended June 30, 1896.

WORK OF THE OFFICE.

The work of the office is in a satisfactory condition, and may be said to be up to date. There are always some accounts which are necessarily held for explanations or for the production of vouchers, but, with the exception of these, all accounts received up to recent dates have been settled or are in the course of settlement.

NEW ACCOUNTING SYSTEM.

The new accounting system, known as the Dockery law, has had another year of trial, and it has been demonstrated to be highly satisfactory in its operation. It provides all necessary safeguards, and at the same time simplifies and facilitates the settlement of accounts.

CLERICAL FORCE.

The clerical force of the office continues to be thoroughly efficient and, I am pleased to say, worthy of the highest commendation.

DISBURSING OFFICERS.

I beg leave to renew the suggestions made in my report for 1895 as to increasing the bonds of certain departmental and Congressional disbursing officers, reimbursing them the expense of securing sureties and prohibiting any advance in excess of the penalty of the bond. I believe that a disbursing officer should either be required to furnish bonds to cover all advances or be relieved of giving any security at all. In the latter case he would be placed on his honor, which might be the better plan, but in the former the requirement of a security in dollars and cents would make it a purely business transaction, and this should be kept in view to the extent of requiring a security for the full sum of the dollars involved. It seems incongruous to hold the officer on his bond for a certain part of advances and on his honor for the balance.

The system of accounting in practice as to disbursements has sufficient checks to secure correct settlements, but many disbursing officers are also receivers of the public moneys from sales of old material, fees for certain services, sales of publications, and from various other sources. For the funds so received it is difficult to have furnished in the accounts sufficient evidence to enable the accounting officer to make a satisfactory settlement. It is possible for a disbursing officer to retain in his hands large sums of the public moneys received from the sources referred to without the knowledge of the accounting officers. The only correction that seems possible for this condition would be the examination of the books and papers of the disbursing officer. It would therefore be right and for the protection of the public interests that the Auditors should be authorized by law to examine the office, books, and papers of disbursing officers, either at stated times or whenever the Auditor should deem it necessary. This suggestion is not intended as a reflection upon any disbursing officer, but is suggested as a safeguard which is right and proper from a business standpoint, and would tend to prevent the repetition of losses which have occurred to the Government in the past in the way mentioned.

The Secretary of State has accorded the privilege of examination of the office of the disbursing officer of that Department, and the heads of other Departments may do so upon request of the accounting officers, but it would seem proper that authority should be given by law so that it might apply alike to all Departments and all boards, commissions, and establishments of the Government not within the jurisdiction of an Executive Department, particularly in view of the fact that in many of the boards, commissions, and establishments the head

is himself the disbursing officer.

UNITED STATES DISTRICT ATTORNEYS' AND MARSHALS' COMPENSATION.

The law establishing salaries in lieu of fees for compensation of United States district attorneys and marshals, which went into effect on July 1 last, has not yet been in force a sufficient time to admit of observation of its effect, but there is every reason to believe that it will be recognized as an improvement over the old system. The extension of the same system to the payment of deputy marshals would doubtless result in improvement of the service and large curtailment of expenses.

70, 420, 40

CONSULAR FEES.

Consular fees increased during the year, but not enough to equal the expenses. The expenses exceeded the receipts \$70,420.40, as against \$100,567.92 by last report, and \$297,006.62 during the fiscal year 1894.

The following is a summary of the monthly work reports of the office

for the fiscal;	year ended	June 30.	1896:
-----------------	------------	----------	-------

Settlements made and certified	17, 422
Amount involved in said settlements

In addition to the foregoing, direct settlements are made on accounts with individuals and corporations for sums due from the United States which are not advanced to disbursing officers or agents and paid by These include payments made to various railroad and other companies for transportation of Government agents and property over land-grant or bond-aided lines; payments to the various States and Territories in aid of the agricultural experiment stations established under the terms of the act of March 2, 1887; payments of amounts appropriated by Congress for expenses of contested election cases, and for extra compensation to Congressional officers and employees, etc. The amounts paid on these settlements during the period covered by this report are as follows:

Transportation	\$13, 822.09
Agricultural experiment stations	719, 813, 48
Agricultural experiment stations	179, 767. 57

I have the honor to be, very respectfully,

THOMAS HOLCOMB, Auditor.

Hon. JOHN G. CARLISLE, Secretary of the Treasury.

APPENDIX.

	<u> </u>		1		<u> </u>	<u> </u>	<u> </u>	1	<u> </u>

Notes.—1. The amounts stated in the several districts under some of the appropriations given include expenditures estimated for the last quarter of the fiscal year 1896. The exact figures were not attainable, the accounts not having been finally adjusted in this office. There have been, subsequent to July 1, 1896, additional advances made to marshals to pay expenses of the courts incurred during the fiscal year 1896. The amounts of these expenditures are not included in this statement, it not being possible to even make a satisfactory estimate of the amount thereof.

2. Under "Fees of district attorneys," southern district of New York, is stated the amount of money that was paid to the district attorney for the expenses of his office. This amount includes not enty the fees earned in the office, which amount to very little, but also amounts paid to said district attorney from the appropriation "Miscellaneous expenses United States courts."

3. Under the appropriation "Pay of regular assistant attorneys," the amounts apportioned by the Attorney-General to the several districts are stated.

4. Under the appropriation "Fees of clerks," the salary of the clerk for the Territory of Alaska (\$2,500) and \$1,500 salary for half year of clerk of district court for the northern district of Illinois are given. It will be also noted that in three instances, to wit, District of Columbia, southern district of New York, and eastern district of Pennsylvania, no amounts are given under this heading. This is because of the fact that no payments have been made out of the appropriation for "Fees of clerks, United States courts," the clerks in these cases earning their maximum compensation from fees earned from individuals and corporations.

5. Under the headings of "Salaries," the amount of salary appropriated for the different officers is given, from whatever appropriation they may have been paid. In the District of Columbia salaries paid to the judges of the supreme court only are given.

6. Under "Miscellaneous items" will be fou

expenses, United States courts, Indian Territory; and certain expenses of Territorial courts of Comp. prior to January 4, 1896.

There is nothing included in this statement for the expenses of the Supremo Court of the United States, the salary of the judges and other officers of the circuit courts of appeals, the court of appeals for the District of Columbia, the Court of Private Land Claims, the pay of special compensation district attorneys, or for the pay of special assistant United States attorneys. The expenditures for these items do not belong to any particular district, therefore they are not included in the statement. The amount of the expenditures, however, is usually about as appropriated.

REPORT OF THE AUDITOR FOR THE POST-OFFICE DEPARTMENT.

TREASURY DEPARTMENT,
OFFICE OF THE
AUDITOF FOR THE POST-OFFICE DEPARTMENT,
Washington, D. C., October 12, 1896.

SIR: The following reports present an account of the transactions of this office, and of the financial operations of the Post-Office Department, during the fiscal year ended June 30, 1896:

ACCOUNTS AUDITED.

The postal and money-order accounts of all postmasters, and contractors and bidders for the transportation of the mails have been audited to June 30, 1896.

TOTAL OUTSTANDING INDEBTEDNESS DUE THE POST-OFFICE DEPART-MENT TO JUNE 30, 1895.

The total amount due the United States on account of the Post-Office Department by late postmasters, and the actual damages due from failing bidders and failing contractors for the transportation of the mails amounted on June 30, 1895, to the sum of \$868,070.78. This sum covers the entire amount due and uncollected upon the books of this office to the date above given.

Of the indebtedness due June 30, 1895, suits have been instituted for \$662,940.12. There is otherwise in process of collection \$52,351.51.

During the past fiscal year there has been collected of the indebtedness above given \$152,779.15.

OUTSTANDING INDEBTEDNESS FOR FISCAL YEAR ENDED JUNE 30, 1896.

Within the past fiscal year 11,794 postmasters have been retired from office by death, resignation, or removal. The accounts of these

postmasters, money order and postal, have been audited.

The uncollected amount now due from them to the Government, including \$8,292.43 due from five failing bidders, which is the total amount due on account of failing contractors and failing bidders for transportation of the mails during the past fiscal year, is \$56,015.98. Of this amount suit has been instituted for \$24,290.93. The remainder, \$31,725.05, is otherwise in process of collection. A great part of this sum will be collected without suit before the expiration of the present calendar year, as many of the 11,794 late postmasters have retired from office during the last two quarters of the fiscal year, and the opportunity is just afforded to collect their balances.

AMOUNT DUE FROM POSTMASTERS ON POSTAL ACCOUNT OF ABOVE SPECIFIED INDEBTEDNESS.

On June 30, 1895, late postmasters were indebted on their postal accounts to the amount of \$213,514.47, of which there has been collected \$65,628.72. Suit has been instituted for \$139,944.81; otherwise in

process of collection, \$7,940.94. The total amount due the United States on the postal accounts of 11,794 postmasters who retired from office during the fiscal year is \$30,367.75. Suit has been instituted for \$20,876.72 of this amount.

AMOUNT DUE FROM POSTMASTERS ON MONEY-ORDER ACCOUNT OF ABOVE SPECIFIED INDEBTEDNESS.

The total amount due the United States from late postmasters on money order account June 30, 1895, was \$176,279.20. Of this sum there has been collected \$61,702.67; suit has been instituted for \$109,757.12; otherwise in process of collection, \$4,819.41.

The total amount due the United States on the money-order accounts of 2,178 postmasters who retired from office during the fiscal year 1896 is \$17,355.80. Of this amount suit has been instituted for \$3,414.21.

AMOUNT DUE FROM FAILING BIDDERS AND FAILING CONTRACTORS OF ABOVE SPECIFIED INDEBTEDNESS.

Heretofore this office has given in its annual reports the total amounts of the bonds of failing bidders and failing contractors. The amount thus represented was, in most cases, inflated to the extent of the difference between the bands and the extent depresent the bands and the extent depresent.

ence between the bonds and the actual damages.

There was due the United States for actual damages by failing bidders and failing contractors June 30, 1895, the sum of \$478,277.11, of which amount \$25,447.76 has been collected during the fiscal year ended June 30, 1896. Of the balance, \$452,829.35, there is in for suit \$413,238.19, and in preparation for suit \$6,032.19, a total of \$419,270.38; and otherwise in process of collection, \$33,558.97.

There has, however, accrued to the credit of failing contractors on routes operated by them where no failures have been reported the sum of \$44,352.48. This amount is withheld under the act of Congress approved May 4, 1882, and will be applied to the payment, in part, of judgments for the amount of the actual damage when obtained.

There are five cases of failing bidders reported within the fiscal year ended June 30, 1896, in process of settlement without suit, in which the

damage to the United States amounts to \$8,292.43.

CLASSIFICATION OF POSTMASTERS WITH REGARD TO COMPENSATION.

The frequent requests for a statement as to the classification of postmasters of the fourth class, as regards their compensation, has led to the preparation in this office of the following table. It includes "Presidential" postmasters, or those of the first, second, and third classes; in fact, all postmasters at offices whose accounts appeared upon the books of this office on June 30, 1896.

Their compensation on that date was as follows:

\$50 or less Between \$50 and \$100 Between \$100 and \$200 Between \$200 and \$500 Between \$500 and \$1,000 Between \$1,000 and \$2,000 Between \$2,000 and \$3,000 Between \$3,000 and \$6,000	15, 363 13, 022 11, 692 4, 651 2, 776 701
Between \$3,000 and \$6,000	157

COLLECTIONS BY POST-OFFICE INSPECTORS.

The valuable aid rendered by the inspectors' corps of the Post-Office Department in making collections from delinquent and defaulting post-masters has been very successfully continued during the past fiscal year.

Their collections for the year 1896 were the largest yet made, and exhibit an annual increase greater than in any previous year, as shown in the following table taken from the last annual report of this office, to

which is added the collections for the past fiscal year:

1891	\$88,094.93	1894	\$165, 169. 04
1892	134, 771. 19	1895	180, 043, 76
1893	148, 267. 39	1896	229, 769. 42

PROMPT COLLECTIONS.

This office has been aided by the efficient cooperation of the Post-Office Department in making prompt and close collections of postal and money-order funds during the past fiscal year. The Postal Laws and Regulations have been strictly observed in this office in relation to the deposits by postmasters of their surplus revenue. Experience demonstrated the necessity of exacting more frequent deposits from the larger post-offices, as the accumulation and retention in such offices of large amounts of money, even for a short time, constituted a constant temptation and opportunity for embezzlement and burglary. The Postmaster-General issued an order under date of March 20, 1896, amending section 139, Postal Laws and Regulations of 1893, so as to require postmasters at all offices of the first and second classes to deposit their surplus postal revenue at least once every two weeks.

The act of Congress of August 8, 1888 (25 Stat. L., 387), requires

tnat—

Whenever any deficiency shall be discovered in the accounts of any official of the United States or of any officer disbursing or chargeable with public money, it shall be the duty of the accounting officers making such discovery to at once notify the head of the Department having control over the affairs of said officer of the nature and amount of said deficiency, and it shall be the immediate duty of said head of Department to at once notify all obligors upon the bond or bonds of such official of the nature of such deficiency and the amount thereof.

For some reason the provisions of this law as applied to postmasters had not been complied with until February, 1895. Since that time the Postmaster General has required this notification in all cases of delinquency to be sent to the sureties of postmasters. He also, upon the request of this office, has notified the sureties of all postmasters who fail promptly to render their quarterly postal accounts or their regular money-order statements.

The beneficial results of his action have been very evident in the prompt rendition of accounts and deposit of postal revenue. Persistent failure to render accounts or make deposits has caused him to remove

the delinquent postmasters.

BAD DEBTS.

"Bad debts" is the designation of an account, on the books of this office, the items of which consist of uncollectible balances in its accounts. This office has made strenuous endeavor to collect the outstanding indebtedness from late postmasters and failing bidders and failing contractors which has been permitted to accumulate during a series of years. Suit has been brought on a very large number of accounts—in fact, in all old cases except those in which investigation developed that

the principal and all the sureties were hopelessly insolvent. This has led, in the adjustment of the balances due the Post-Office Department, to charging to "Bad debts" a larger sum than has heretofore appeared under that head.

A larger amount might with propriety have been charged to this account from outstanding judgments and from old accounts of failing bidders and failing contractors upon which suit has not been entered. This office has, however, determined not to weed out a number of old cases which should properly be charged to "Bad debts" until the subject-matter was laid before the Postmaster-General for his consideration, and that he might consider this matter in connection with the subject of securing some mode of relief, if he deems it advisable, for the sureties of defaulting contractors on bonds executed fifteen or twenty years ago.

The merely nominal indebtedness of defaulting bidders and defaulting contractors for the last fiscal year, as shown in this report, is the result of a change of practice, made two years ago, in dealing with this

class of debtors.

It was formerly the practice of this office not to force a settlement of this class of accounts, particularly where the defaulting contractor had other service in operation on which credits were accruing, until the expiration of a contract term extending over a period of four years.

During that time many of the principals and sureties would "unload" whatever property they may have had at the time of default, thereby

rendering themselves "judgment proof."

The vigorous policy of bringing suits on the bonds immediately after default has reduced to a minimum the number of failures, and almost

entirely removed this cause of indebtedness.

Within the past two years many suits have been instituted and judgments obtained on bonds executed more than fifteen years ago, and although these judgments may lawfully be enforced as to the sureties as well as the principals, it seems a great hardship to take from these men, who are now old, the only means of support for themselves and families and render them homeless to satisfy judgments which should have been secured and collected many years ago.

COLLECTIONS BY SUIT.

During the past fiscal year the following accounts have been submitted to the Department of Justice for the collection of the balances remaining due the Government:

Accounts.	No.	Amount.
Postal Money order Mail service	81 62 14	\$51, 866 42 38, 819. 08 7, 266. 17
Total	157	\$97, 951. 67

A comparison with the work of the fiscal year ended June 30, 1895, shows that there is an increase in the number and amount of postal and money-order accounts and a decrease in the number and amount of mail-service accounts transmitted for suit. This decrease is caused by the fact that suits have been instituted on most of the old accounts of failing bidders and failing contractors, so that the work has been brought up to date.

The collections by suit during the fiscal year 1896, including costs and interest, amounted to \$33,366.12, which exceeds the amount col-

lected during the year 1895.

The table appended to this report, page 12, exhibits the accounts of late postmasters, failing contractors, failing bidders, and late contractors, with the balances remaining due thereon, upon which legal proceedings were pending June 30, 1896. The figures given do not include the interest at 6 per cent directed to be charged by section 964 of the Revised Statutes, or the costs of suit.

MONEY ORDER BUSINESS.

There is continued improvement in this branch of the office. The great mass of files is arranged as the vouchers are received and audited, so that it is entirely practicable to procure any money order desired, at any time after it reaches this office, or any one of the many millions which have been received in the past ten years. The return of many paid money orders is requested during the year, by private individuals, to determine questions arising in the settlement of personal financial transactions, and for introduction as evidence in the trial of law suits. Such requests are now complied with promptly through postmasters.

ACCURACY IN AUDITING MONEY-ORDER ACCOUNTS.

Attention has been especially directed to securing accuracy in auditing paid money orders.

The sum represented by the issue and payment of domestic money

orders during the year amounted to \$343,576,125.37.

Each of more than 24,000,000 of vouchers representing this immense sum is handled in this office, and if any error or irregularity exists in the voucher or in the entry of its debit or credit in the accounts of the issuing and paying postmasters it must be discovered in this office.

The coupon system facilitates this examination, and renders almost certain the speedy discovery of errors. Every order is carefully compared with the credit claimed for its payment by the postmaster in his account, and if they disagree or if there is a discrepancy between the written amount on the face and in the margin of the order, the coupon which was detached from the order is compared with it, after the coupon itself has been checked against the debit in the account of the issuing postmaster.

In every case of error or discrepancy in the coupon or order, the coupon is compared with the order from which it was detached and

the proper correction made.

INVALID MONEY ORDERS.

Surplus money-order funds are eventually deposited with the assistant treasurers at New York and Chicago to the credit of the Postmaster-General. These deposits include the revenue derived from the money-order system, the amount accumulated from unpaid money orders and from the issue of international orders; also from transfers made by postmasters from the postal to money-order account.

Until the present administration no part of this fund held by the assistant treasurers had been paid into the Treasury on account of

unpaid money orders more than one year old.

On the 6th day of October, 1893, upon the recommendation of this office, and in pursuance of the provisions of the act of March 3, 1883,

the sum of \$1,250,000 was deposited in the Treasury on account of

unpaid money orders.

The act of January 27, 1894, provided that the Auditor should report to the Postmaster-General, as soon as practicable, the actual amount of domestic money orders and postal notes which remained unpaid for a period of one year or more. As this included all outstanding money orders and postal notes more than one year old from the organization of the money-order system which remained unpaid, it was found impracticable to make an exact report. In lieu, however, of a report stating exactly the amount of unpaid invalid money orders and postal notes, upon the recommendation of this office, the following deposits have been paid into the Treasury from the fund held by the assistant treasurer at New York, viz:

December 2, 1895, on account unpaid— Postal notes. Money orders.	
Total.	519, 244. 57
Add to this the amount paid October 6, 1893 (on account of unpaid money orders and postal notes)	1, 250, 000. 00
There has been added to the postal revenues from this source the	

For the past two fiscal years the reports are as follows:

For the fiscal year ended June 30—	
1895	\$25, 178, 21
1896	
,	10,000.01
·	

Anticipating these reports, upon the recommendation of this office a deposit was made in the Treasury July 2, 1894, of \$50,000. This deposit was made before the reports of postmasters were received for the fiscal year 1895, for the reason that it was thought necessary under the terms of the act of January 27, 1894, to have a sum deposited against which warrants might be drawn for the payment of invalid money orders.

APPLICATION FOR WARRANTS.

During the fiscal year 4,262 applications for warrants to pay invalid money orders were referred by the Post-Office Department to this office, amounting to the sum of \$27,894.67. Of this number, 4,076, amounting to \$27,116.43, were certified to the Post-Office Department for payment. Of the number referred, 186, amounting to \$778.24, were rejected and returned for cancellation, for the reason that an inspection of the files of this office developed the fact that the original orders had been paid.

DOUBLE PAYMENT OF MONEY ORDERS.

During the past fiscal year 1,553 of the duplicate money orders issued by the Money-Order Office of the Post-Office Department which were transmitted by postmasters to this office as paid vouchers were found upon investigation under the present system to be double payments, the original paid order in each case having been found in the files of this office. The amount represented by these duplicate payments is \$8,441.40. In each of these cases the amount has already been refunded to the Government by the postmaster in error, or is in process of collection.

MISCELLANEOUS EXPENSES OF THE MONEY ORDER OFFICE OF THE POST-OFFICE DEPARTMENT.

From the establishment of the money-order system in 1864 to the present time there has been no annual appropriation by Congress for the miscellaneous or incidental expenses of the Money-Order Office of the Post-Office Department. These expenses consist at the present time of the pay of twenty post-office inspectors, of stationery purchased at certain money-order offices for money-order purposes, together with blanks, blank books, and money-order forms which are used in the transaction of the money-order business. The amount of such expenses for the past fiscal year was \$179,579.77.

Early in the past fiscal year this office called the attention of the Postmaster-General to the fact that the accounts representing these expenditures had never been properly audited in this office, and suggesting, until such legislation as he might deem advisable be enacted, that the system applied to all other miscellaneous accounts of the Post-Office Department be adopted in regard to those of the Money-Order Office, so far as practicable. This has been done, and this office has been further advised that an estimate for these expenses would be prepared with a view of a corresponding appropriation by Congress for the coming fiscal year. Heretofore such expenses have been paid from the receipts of the money order system, and only the net revenue of that system paid into the Treasury. The services of twenty post-office inspectors paid from this fund are doubtless of great value to the postal service, for among them are some of the best of the efficient corps of inspectors. They should be paid in the same manner as other inspectors, as it is questionable whether their salaries and per diem can rightfully be paid from the proceeds of money-order business under the provisions of section 4020, Revised Statutes, as they are not employed in the money-order service.

Total	633. 94	17, 272. 33	845, 239. 47	863, 145. 74	

The following class of accounts appears in the report of this office for the first time, having been transferred from the First Auditor's Office by the recent reorganization of the Treasury Department. Included in these items, certified during the fiscal year 1896, are those reported up to September 30, 1896.

Accounts certified for payment.

Deficiency in the postal revenues	259, 22
The Southern Pacific Company. George H. Lott	1, 118, 728. 63
E. R. Shipley John Lampman	460.00
A. P. Brown	888. 98
Total	, ,
Amount of accounts certified to the credit of Pacific railroads for transportation of the mails	1, 558, 898. 69

Number of employees.

Fiscal year.	Official and clerical force.	Number of mes- sengers, laborers, and char- women.	Amount of appropriation.	Number of post- offices.	Number of money- order offices.
1891 1892 1893 1894 1895	427	50 50 50 50 50 50 50	\$558, 550 558, 550 558, 590 558, 590 567, 640 567, 640	64, 329 67, 119 68, 403 69, 805 70, 064 70, 360	10, 070 12, 069 18, 434 19, 264 19, 691 19, 877

The above is a compilation for the past six fiscal years of the annual number of employees in this office, the amount appropriated each year for their salaries, together with the number of post-offices and money-order offices in existence each year.

There was also an appropriation of \$8,000 for the employment of temporary clerks April 1, 1895, to aid in bringing up the work in this office more than two years in arrears. This appropriation was exhausted

January 31, 1896.

During the six years above given the annual appropriation has increased 1.6 per cent, and the number of employees has been increased 2.6 per cent. During the same period the number of post-offices has increased $9\frac{3}{8}$ per cent, and the number of money-order offices, 97.4 per cent.

The receipts of the Post-Office Department for the fiscal year 1891 amounted to \$65,931,785.72. The disbursements for that year, \$71,662,463.39. The receipts for the year 1896 were \$82,499,208.40. The disbursements for the same period were \$90,626,296.84.

Very respectfully,

Geo. W. Howard.

Auditor.

REPORT OF THE SUPERVISING SPECIAL AGENT.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., November 4, 1896.

SIR: The work of the special agents during the fiscal year ended June 30, 1896, and the results accomplished by them as shown in the following statement, which I have the honor to submit, are evidences of the capability and earnestness with which their duties have been performed and of the usefulness of this branch of the service:

Number of seizures. Arrests for violation of customs laws. Suits commenced Amount involved in suits Reduction in expenses recommended. Districts examined	58 63 \$97, 213. 03 \$45, 365. 75
Moneys recovered on account of— Seizures Fines, penalties, and forfeitures Suits Undervaluations and erroneous classifications discovered Salaries and expenses of special agents	\$10, 807. 60 \$34, 868. 58 \$24, 808. 84 \$660, 050. 28

Nearly 14,000 letters and reports were written by the agents during the year, embracing a variety of subjects, such as undervaluations, smuggling, misconduct of customs officers, seizures, suits, and miscellaneous matters.

Attached to this report will be found a comparative statement of the aggregate receipts from customs revenue and expenses of collecting the same for the fiscal years 1885 to 1896, inclusive. It will be seen that the receipts for the last fiscal year exceeded those of the preceding year by \$8,058,188.57, while the cost of collection was not increased appreciably.

The reports of the annual examinations made by special agents of the accounts of collectors of customs and the inspection of their methods of transacting business, as a rule, show marked improvement as to efficiency and economy of administration and the observance of customs

regulations.

UNDERVALUATIONS.

The active cooperation of the special agents with appraising officers in the detection and prevention of frauds upon the revenue by means of undervaluation has been rewarded in many instances with success, although the work in connection therewith has been laborious and

attended with numerous difficulties. Much valuable and efficient assistance has been rendered the special agents by honest importers, whose generally reliable information was essential in the preparation of cases for presentation to the proper appraising officers. The large amount of additional duties collected is not an indication that undervaluations have increased over previous years, but is rather evidence of greater diligence and efficiency on the part of all the officers charged with the ascertainment of correct market values.

SPECIAL AGENTS ABROAD.

Three special agents and two special employees stationed in Europe have been actively employed during the last year in obtaining information for use of appraising officers. Their work has embraced the collection of information concerning foreign market values, commissions, discounts, and many other details which are necessary for the determination of the correctness of invoices covering imported goods. In many instances reports of these officers have been accompanied by samples of the goods referred to therein, and these samples not infrequently have proved of great value to customs officers. The special agents abroad have advised the Department of the prompt and effective aid given to them in the performance of their official duties by consular officers generally, and the gratifying results hereinbefore referred to are attributable in no small degree to the cheerful cooperation of the consular service.

DRAWBACKS.

The work of investigating applications for the establishment of draw-back rates on the exportation of articles manufactured in the United States, wholly or in part from imported materials on which duties have been paid, as provided in section 22, act of August 28, 1894, has devolved largely upon the special agents.

These investigations frequently involve work of a difficult character, requiring personal observation at the factories of the modes and processes of manufacture in order to a correct understanding of claims

and the framing of suitable regulations pertaining thereto.

This is particularly true when two or more products and different forms of valuable waste are the result of the manufacturing process. In such cases the established rule of the Department to apportion the duties paid on the imported materials used to the several manufactured and waste products on the basis of their relative values has been recognized and maintained.

OPIUM SMUGGLING.

Opium smuggling has decreased largely during the past year as a result principally of the reduction of the rate of duty from \$12 to \$6 per pound on the prepared article. At the same time a marked decrease, as compared with the importations for 1895, has been noted in the amount of Chinese opium imported through the custom house at San Francisco, at which port is landed practically all the Chinese opium regularly imported for smoking purposes. During the fiscal year ended June 30, 1895, there were imported 138,950 pounds of smoking opium, upon which was paid a duty of \$913,404. During the fiscal year just elapsed the importations from China of opium at San Francisco amounted to 98,126 pounds, from which was derived a revenue of

\$588,756. This, however, does not include a consignment of 18,000 pounds which, although shipped to arrive during the latter part of June, was delayed in transportation until July. The real difference of some 22,000 pounds, it is believed, has not been supplied by smuggled opium, but represents an actual decrease in the consumption of the drug, due in large part to a migration of the Chinese element from the Pacific Coast and in no inconsiderable degree to the fact that the prevailing "hard times" curtails the use of this expensive luxury, which,

to some, takes rank among the necessaries of life.

When a duty of \$12 a pound was laid upon opium containing less than 9 per cent of morphia, numerous factories were in operation in British Columbia preparing smoking opium, which was said to be smuggled into this country for consumption. As practically the whole output of these factories found its way to the United States, some idea can be obtained of the magnitude of opium smuggling operations from points in Canada. During the year, however, the amount of crude opium entered at custom-houses in British Columbia—49,414 pounds—shows such a marked decrease compared with the amount imported during preceding years as to indicate that the reduction of the duty has effected also a great decrease in the amount of opium manufactured for illegal introduction into this country. The number of these opium factories now in operation in British Columbia is five, as compared with

fifteen or twenty when the high rate of duty prevailed.

Even while the output of these factories has been reduced so greatly. I have good ground for the belief that no inconsiderable portion of this finds its way to other countries. A short while ago a schooner was captured outside the harbor of Honolulu on which was found 1,400 pounds of prepared British Columbia smoking opium. With the opium were captured two men well known to the United States customs officers on the British Columbian border as old smugglers, both having been sentenced to imprisonment upon conviction for opium smuggling. As the importation of opium to the Hawaiian Islands is prohibited absolutely, this circumstance would indicate that the attention of the onium smuggler, heretofore directed toward this country, has been diverted to other fields of operation, where the profits arising from his nefarious trade more amply repay the risk. But, with all this, petty smuggling to some extent still continues. The man with a few pounds of opium to smuggle is hard to detect and as hard to convict, and, knowing this, this class of smugglers continues to evade the laws. ence teaches that this smuggling will be stopped when smoking opium can be brought through the custom-house as cheaply as it can be smuggled. Reducing the duty to \$4 per pound, as I have recommended in previous reports, I am convinced, will accomplish this result and eliminate from the category of offenses against the law one which has been most fruitful in corruption and loss to the revenue.

DIAMOND SMUGGLING.

There has been a noticeable increase in the smuggling of diamonds since the duty on precious stones was advanced by the tariff act of 1894. Importers complain that legitimate importations of this class of merchandise have been seriously interfered with. Officers of this division have been active in their efforts to detect frauds upon the revenue in this connection, and their labor, in instances, has been successful. The facility with which large quantities of these valuable goods may be secreted upon the person of the smuggler makes detection very difficult.

The further fact that there is no duty on diamonds in Canada has made it on several occasions a distributing point whence the stones are smuggled into this country, and the long line of frontier unprotected at many points is made available by the smugglers for the carrying on of their illegitimate traffic. A return to the rate of duty provided by the act of 1890, in my opinion, would be in the interest of the revenue and of the legitimate trade.

CHINESE EXCLUSION.

During the past year 5,446 Chinese persons applied for admission to this country. Of this number 1,521 were in transit to other countries, 415 were rejected, and 3,510 were admitted. The number of Chinese arrested for violation of the exclusion laws was 198, and the number deported 120. Under the treaty between the United States and China providing for the departure from and return to this country of Chinese laborers, 936 laborers left the United States, and 106 returned during the past year. There are 37 inspectors employed in the enforcement of the exclusion laws. They are stationed on the northern, northwestern, northeastern, and southwestern frontiers, at or near places where Chinese enter this country from the Dominion of Canada and from Mexico. Inspectors are stationed also at ports on the Pacific Coast and at each of the ports of New Orleans, Baltimore, Philadelphia, New York, and Boston.

The expenditures in the enforcement of the laws relating to Chinese during the past fiscal year amounted to \$86,856.60, which includes the amounts required to defray the deportation to China of persons of the Chinese race found to be unlawfully in this country. Many arrests of Chinese have been made, but for various reasons the prisoners have been discharged by commissioners before whom the cases were heard. During the last session of Congress attention was called to an instance where a person arrested for perjury in the preparation of fraudulent papers was discharged by a United States commissioner, notwithstanding the fact that sufficient evidence to establish the charges was submitted. The commissioner held that, inasmuch as there was no law under which affidavits in such instances could be taken before notaries public, the charge of perjury in the case could not be sustained.

In my opinion, existing laws should be amended in such manner as to require the testimony of other than Chinese persons or persons of Chinese descent in all cases where proceedings are taken affecting the right of Chinese to enter or to remain in the United States, or where persons of Chinese descent claim the right to reenter the United States. In instances where affidavits are taken before notaries public or justices of the peace in matters pertaining to the admission of Chinese to this country, or to their identification, and it is found that such affidavits are made falsely, or are not sustained by the facts, the persons making the same should be made amenable to existing laws prescribing punishment for perjury.

I deem it my duty to invite your attention to the fact that our laws and treaty with the Chinese Government require Chinese persons of the exempt class to present to collectors of customs, as a condition precedent to admission to this country, certificates, in a prescribed form, from the Chinese Government or the Government of which the Chinese person named in the certificate may be a subject or resident. The Treasury Department has been advised that authority has been given to Chinese consuls to issue certificates of the character of those referred to, and many Chinese claim admission on certificates issued by the

Chinese consul at Havana. Our officers have reported instances where persons known to be laborers have obtained merchants' certificates from the consul referred to, presumably from false representations made to him. In one case the Chinese holder of the certificate was discharged by the judge before whom he was tried on the ground that the certificate was prima facie evidence of his right to land, notwithstanding the fact that the holder of the certificate was known to have arrived at San Francisco as a laborer en route to Havana. There have been instances where young men apply for admission to this country claiming to have been born here. In such instances it is alleged usually that the applicant left this country at a tender age and accompanied his mother to China, where he has resided since. In support of the claim to nativity as an American citizen Chinese testimony is invariably submitted. It is suggested that provisions similar to that contained in the act approved November 3, 1893, relating to the registration of Chinese, excluding the testimony of Chinese persons, would be effective in such instances as those referred to above.

Notwithstanding the difficulties which they encounter, the Chinese inspectors are alert, and there is reason to believe that fewer attempts were made during the past year to evade the exclusion laws than in

previous years.

Two persons employed as Chinese interpreters were suspended during the past year on charges that they were implicated in the irregular introduction of Chinese into this country. One of said persons has been convicted since and sentenced to a term of imprisonment and the payment of a fine. The disclosures following the trial of the officer showed that efforts are made frequently to corrupt officials charged with the enforcement of the exclusion laws by the lavish use of money, and instructions have been given our officers to make careful investigation of the past records of persons whose services are offered in the capacity of Chinese interpreters, with a view to the employment only of such as are competent and above suspicion.

MERCHANDISE IN TRANSIT TO MEXICO.

The joint resolution of Congress approved March 1, 1895, prohibiting the transportation through the United States of merchandise destined for places in the Free Zone in Mexico has been nullified by the practice which now obtains of shipping goods to the Zona Libre via Mexican seaports, and the only apparent result accomplished by the legislation referred to has been loss of business to American railway companies. It is suggested for your consideration that the removal of the restrictions imposed, at least to the extent of allowing the transportation of goods consigned to places in Mexico from the seaboard to the Mexican frontier under the usual transportation entries, would involve no danger of loss to the revenues of our Government.

GOODS IN TRANSIT THROUGH CANADA.

Careful attention has been given during the year to shipment of Canadian goods in transit through the United States to points in Canada, and to the transportation of free and dutiable merchandise in bond between ports in the United States through Canada. New lines of travel have been opened which require constant care and surveillance. Your attention is invited to the table appended to this report showing the number of cars and weight of contents passing between ports in the United States through Canadian territory during the past three years.

BONDED COMMON CARRIERS.

Not the least important of the duties assigned to the Division of Special Agents is the examination of the applications made by common carriers for the transportation of merchandise in bond under the provisions of sections 3000 and 3001, Revised Statutes of the United States, and 21 Statutes at Large, page 173, and 24 Statutes at Large, pages 411, 414, and the preparation of the necessary papers in connection therewith. Appended hereto will be found a list of 151 carriers bonded for the transportation of appraised merchandise in bond, and of 61 carriers for the transportation of unappraised merchandise in bond. Several of the latter are obliged to file more than one bond, as the law requires a separate bond to be given for the carriage of unappraised merchandise from each port of first arrival.

REORGANIZATION OF CUSTOMS DISTRICTS.

The construction of new lines of railway and the establishment of growing settlements at places on or in the vicinity of the frontier emphasizes the recommendation which I have heretofore made for such legislation as may be necessary to effect a reorganization of the customs districts. With the present fixed appropriation for the expense of collecting the revenue from customs it is impracticable to station customs officers at all the places where their services would be of benefit to the Government and to commercial interests. In my opinion a large amount of money is expended without benefit to the Government or the public through the maintenance of customs establishments at places now designated by law as ports, where there is little or no business transacted.

GOVERNMENT SAMPLING WORKS.

Referring to the authorization by Congress (deficiency act, June 8, 1896) for the erection and equipment of suitable buildings for sampling works at places where lead-bearing ores are imported, I have to suggest that certain requirements of the Act relative to the sampling of ores involve an expenditure of money which will increase largely the deficiency in the appropriation for the expense of collecting the revenue from customs, which appropriation is even now inadequate to meet all the demands made upon it. Ores containing lead are imported at El Paso, Eagle Pass, and Corpus Christi, Tex.; Nogales, Ariz., and Deming, N. Mex., on the Mexican frontier; Portal, N. Dak.; Jennings, Mont.; Northport and Sumas, Wash., on the northwestern frontier; Tacoma, Wash., and San Francisco, Cal. No ores were imported at Bonners Ferry, Idaho, during the last fiscal year, owing, it is said, to lack of transportation facilities on the Kootenai River, though it is claimed that measures are being taken to obviate this difficulty, and that large quantities of ores from the British Columbia mines will be brought into this country by that route during the coming season.

Preparations are being made also for extensive importations from Mexico by way of a point near Boaquillas, Tex., on the Rio Grande River, whence they will be brought by wagon route to the nearest railway station at Marathon, Tex. The appropriation of \$45,000 for the erection and equipment of sampling works at the points indicated in the act referred to will, perhaps, be sufficient to provide the necessary buildings and plants; but when it is taken into consideration that the act also requires at least one-fifth of each importation, when arriving at

a place where there is no Government sampling works, to be conveyed to the nearest Government sampler for sampling, and the attendant expenses of handling, transfer, and transportation of the ores to be paid by the Government, it will be seen that the outlay will be very great. The cost, also, for the running and maintenance of the sampling works

will add largely to the expense of same.

If paragraph 165 of the tariff act of 1894 was amended so as to allow importations of lead-bearing ores to go forward from the port of entry under warehouse and transportation bond to properly equipped smelting establishments, provision could be made by the Government for the assignment to the smelting works of competent officers whose duty it would be to supervise personally the sampling of the ores according to commercial methods, after which a regularly appointed Government assayer could ascertain the dutiable quantity of lead contained therein. The same results, equitable alike to the Government and to the importer, in my opinion would be obtained by this procedure and with far less expense to the Government than in the erection, equipment, and running of independent sampling works. Plans for suitable buildings at El Paso, Tex., Bonners Ferry, Idaho, and Northport, Wash., the three places mentioned in the act referred to, have been prepared, and estimates of the cost of machinery for same secured, so that no further or unnecessary delay will intervene should it be deemed advisable to proceed with the construction of the works at those or any other points designated.

Repectfully, yours,

J. J. CROWLEY,
Supervising Special Agent.

The SECRETARY OF THE TREASURY.

APPENDIX.

Note.-The accounts of receipts and expenditures published by the Register will vary in some cases from the figures above given, for the reason that his statement is made up from warrants issued during the fiscal year, regardless of balances in the hands of officers at the beginning and end of the year. If the accounts of each collector were closed and balances settled at the end of the fiscal year the two statements would agree.

(No. 15.)

REPORT OF THE CHIEF OF THE SECRET SERVICE DIVISION.

TREASURY DEPARTMENT, SECRET SERVICE DIVISION, Washington, D. C., November 2, 1896.

SIR: I have the honor to submit herewith the thirty-first annual report, containing a summary of results of the work accomplished by the Secret Service Division of the United States Treasury Department during the fiscal year ended June 30, 1896.

The arrests by agents of this division and other duly qualified officers (the latter receiving gratuities of money from the funds of the divi-

sion for meritorious service) number 780.
The offenses alleged were as follows:

Manufacturing, having in possession, passing, and dealing in counterfeit paper	
money	98
Altering obligations of the United States.	15
Having in possession and passing altered obligations of the United States	$\frac{33}{2}$
Passing State bank notes as United States notes	1
Passing State warrant altered to represent a \$10 United States note	1
Passing Confederate States notes as United States notes	4
Passing \$5 merchandise scrip notes as United States notes.	ĩ
Manufacturing, having in possession, and uttering counterfeit United States	
2-cent postage stamps.	3
Passing raised pension checks	2
Attempting to pass flash notes as United States notes	1
Having in possession plate in imitation of the plate for \$100 United States	
notes	2
Having in possession plate in imitation of \$2 United States silver certificate. Manufacturing, having in possession, dealing in, and passing counterfeit coins.	1 568
Passing 5-cent coins (plated) for \$5 gold coins	000 1
Having in possession and attempting to pass plugged and mutilated coins	3
Having in possession dies for manufacturing counterfeit coin	5
Having in possession molds for manufacturing counterfeit coin	15
Having in possession an imitation stack of \$20 gold coins	1
Personating Government officers	5

Forty-four cases of back pay and bounty were investigated by this service for the Auditor for the War Department. For the Auditor for the Interior Department eighteen claims, aggregating \$12,051.75, made by various persons, for reimbursement of expenses incurred in the last sickness and burial of deceased pensioners were investigated. The amount of these claims allowed by the Auditor was \$4,000.49, being a gross saving to the Government of \$8,051.26. Three cases were also investigated for the Auditor for the Navy Department.

In addition to the foregoing, miscellaneous work has been performed

by this service for other Departments of the Government.

The chief clerk reports the number of communications received during the year as 2,423, and the number of letters sent as 3,955.

Fifteen new counterfeit notes were placed in circulation during the

year, to wit:

In July, 1895, a new counterfeit woodcut \$5 United States silver certificate; series of 1891; check letter, D; J. Fount Tillman, Register; D. N. Morgan, Treasurer; portrait of Grant, was placed in circulation.

Only one of these notes has been heard of.

In August, 1895, two counterfeit photographic notes were discovered: \$10, "First National Bank of Detroit, Mich.," note, series of 1882; check letter, C; B. K. Bruce, Register; Jas. Gilfillan, Treasurer; charter number, 2707; bank number, 5612; \$5, "First National Bank of Flint, Mich.," note, series of 1882; check letter, C; W. S. Bosecrans, Register; J. N. Hust n, Treasurer; charter number, 3361; bank number, 11464. But few of these notes have appeared.

In August, 1895, also appeared a photographic counterfeit \$5 national-bank note of the "Hill County National Bank of Hillsboro, Tex.;" series of 1882; check letter, D; B. K. Bruce, Register; A. U. Wyman, Treasurer; charter number, 3046; bank number, 2135. Only

one of these notes has been reported as in circulation.

In October, 1895, a new counterfeit \$10 United States silver certificate, series of 1891; check letter, D; plate number, 3; J. Fount Tillman, Register; D. N. Morgan, Treasurer; portrait of Hendricks, was discovered. This is the only counterfeit of this kind ever reported to this office.

In December, 1895, a counterfeit \$2 United States silver certificate, series of 1891; check letter, C; plate number 41; J. Fount Tillman, Register; D. N. Morgan, Trasurer; portrait of Windom, was discovered. Three parties were engaged in the manufacture and utterance of these notes. They were arrested, convicted, and are now serving terms of imprisonment. The leader of this gang was previously arrested, convicted, and served a term of imprisonment in the Elmira (N. Y.) Reformatory, for counterfeiting. The plates, presses, photographic outfit, chemicals, and all the apparatus necessary to the production of these notes were captured.

In December, 1895, a photographic counterfeit \$5 "Fort Dearborn National Bank of Chicago, Ill.," note, series of 1882, check letter, C; W. S. Rosecrans, Register; C. N. Jordan, Treasurer; charter number, 3698; bank number, 6197, made its appearance. But two of these

notes have been seen at this office.

In December, 1895, also appeared a counterfeit \$20 United States note, series of 1880, check letter, D; plate number, 3; W.S. Rosecrans, Register; E. H. Nebeker, Treasurer; portrait of Hamilton. The party responsible for the circulation of these notes was arrested at Toledo, Ohio, by the police officers and about \$500 of the notes were found in his possession, his accomplice escaping at the time.

In December, 1895, a counterfeit \$5 United States silver certificate (woodcut production), series of 1891, check letter, B; J. Fount Tillman. Register; D. N. Morgan, Treasurer; portrait of Grant, made its appear-

In December, 1895, also appeared a photographic counterfeit \$5 legal-tender note, series of 1880, check letter, B; J. Fount Tillman, Register; D. N. Morgan, Treasurer; portrait of Jackson. Subsequent to the appearance of this note the parties responsible for its circulation were arrested on a train in Texas, convicted, and are now serving terms of imprisonment. To these same persons can be traced a number of other photographic counterfeit notes which made their appearance at different times.

In May, 1896, appeared a counterfeit \$5 "First National Bank of Suffield, Conn.," note, series of 1882, check letter, C; charter number,

497; bank number, 8675; portrait of Garfield.

In May, 1896, the following photographic counterfeit notes were also discovered: \$5 United States silver certificate, series of 1891, check letter, A; J. Fount Tillman, Register; D. N. Morgan, Treasurer; portrait of Grant; \$10 Treasury note, series of 1891; check letter, C; J. Fount Tillman, Register; D. N. Morgan, Treasurer; portrait of Sheridan; \$10 United States legal-tender note, series of 1880, check letter, B; J. Fount Tillman, Register; D. N. Morgan, Treasurer; portrait of Webster.

The four last mentioned are to be classed among those for whose

appearance and circulation the parties arrested in Texas, above referred

to, were held responsible.

In June, 1896, a new issue of the \$20 United States note, which appeared in December, 1895, was discovered, some of its defects having been remedied, making it more presentable. From information at hand the persons responsible for the manufacture of these notes, together

with the plates for printing same, will soon be in custody.

The counterfeiting of paper money materially decreased during the past year, as evidenced by a comparison of the foregoing list of new counterfeits with that of former years. This can, in part, be accounted for by the large increase in "raised" or "altered" notes found in circulation, some of which are most skillfully executed. The reasons for this are to me apparent, in that the latter industry is more lucrative to the criminal and more difficult of detection by the public, the constant changing of the designs for the currency making it almost impossible to become thoroughly familiar therewith. It is also made plain that the distinctive paper in use is an aid to the criminal rather than a protection to the public, because of the fact that a note printed upon paper containing silk threads (as a number of the best counterfeits and all of the raised notes are) is accepted in a majority of instances without hesitation, owing to the erroneous impression that the paper used by the Government is manufactured by a secret process and can not be counterfeited.

I have also become convinced that the introduction of silk into the paper tends to lessen its wearing quality and is therefore responsible,

to a degree, for its short life.

The counterfeiting of gold and silver coins has been on the increase in all parts of the country. Some counterfeits of silver coins have appeared on the Pacific Coast that are quite as good as the genuine, both in weight and fineness, and made from dies of excellent workman-

The persistent effort of coin counterfeiters, a number of whom are now serving their fifth term of imprisonment (one especially, in New YorkBill Spike—having received sentences aggregating twenty-five years since 1867), and the extremely light punishment administered by some of our United States judges calls for some such act of Congress as that entitled "A habitual criminal act," to be found in nearly all of our State statutes, in order to lessen the great amount of this spurious coin making. The loss from this industry almost always falls on the poor and ignorant classes, and an act such as above referred to is worthy of earnest consideration.

The work of the division during the past fiscal year almost if not quite equaled that of the year previous in results attained, and either of these two years stands far and above any since 1889, as will be seen by the accompanying comparative statement:

Year.	Num- ber of arrests.	Amount of counter- feit and altered notes captured.	Imitations and facsim- iles of notes.	Amount of counter-feit coins.	Imitations and facsimiles of coins, toy money, etc.	Num- ber of plates.	Number of dies.	Num- ber of molds.
1890 1891 1892 1893	687	\$26, 405. 17 2, 155, 095. 35 29, 411. 40 22, 108. 15 13, 942. 50	\$516, 731, 34 2, 101, 396, 50 2, 087, 608, 87 3, 836, 013, 24 7, 358, 30	\$5, 619. 37 5, 336. 01 7, 676. 15 8, 591. 29 10, 756. 46	\$2,046,643.45 103.10 406.09 437,300.00	154 272 693 491 134	7 { 12 sets { 13 single { 201 sets { 44 single { 9 sets } 9 single { 14 sets } 19 single }	81 84½ 243 153½ 156½

Among the most notable gangs suppressed during the year was what was known as the "Horse Market gang" of New York City. Year after year this service has been busily engaged, more or less successfully, in prosecuting members of this gang. Finally, July, 1895, complete success crowned our efforts by the arrest of nine of its members, and no more complaints have been heard from that locality. Several of this gang, notably Albert Brown, alias "Bill the Brute," who attempted to kill one of the agents of this division, and Frank Carr, who jumped out of a second-story window, fracturing both legs in attempting to escape arrest, were considered the most desperate counterfeiters and thieves around Bull's Head Inn.

On August 4, 1895, the service accomplished the arrest of William E. Spencer, alias William E. Brockway, Dr. O. E. Bradford, Sidney Smith, William Wagner, and Mrs. Abby Smith, and later John Nixon and James Courtney, alias Dr. Burdell, in New Jersey, New York City, and Rockaway Beach, Long Island. All of these people have been convicted, with the exception of Nixon, who was acquitted, and Sidney Smith, who is still awaiting trial. Ever since the organization of the Secret Service Division some thirty years ago, the man known as Brockway, alias "Old Bill," has been sought after. According to his own story, under oath, at the trial in Trenton, N. J., he pleaded guilty to forgery and counterfeiting in 1848. Ever since that he has pursued a criminal life. Time and time again he has been shadowed, and large amounts of money have been expended by my predecessors, but their efforts proved fruitless in obtaining evidence against Brockway.

He has been arrested before by the service, but was always successful in escaping punishment by making terms with the officers of the Government, in furnishing evidence against others and turning over plates. The police of New York City convicted Brockway in 1882.

Following your instructions to "not allow any counterfeiter to escape," I set about to get convicting evidence against him, and was A special United States attorney (Hon. A. J. Rose) was employed, and Brockway, along with two others, was convicted after a most bitterly contested trial lasting five days. (Courtney, being wanted in Detroit, Mich., was taken there by order of Judge Green, and convicted on an indictment 28 years old.) The defense in this case would not concede anything, and even went so far as to compel the Government to subpæna you as a witness in order to prove that these people had no authority to have the imitation of the distinctive paper in their The counterfeiting paraphernalia was very complete. The amount captured represents \$717,500, besides 4,000 sheets of prepared The work on the notes was fair. It has always been distinctive paper. my opinion that this gang had other work being done on the premises in Hoboken, N. J., which the service failed to secure when the raid was made. Judge E. T. Green made one of the most impartial charges ever heard, and the jury was not long in finding a verdict. Brockway was given a sentence of ten years, being the first time he has suffered actual imprisonment for crimes committed against the United States Government.

At last Old Bill Brockway, whom the world knows as the "King of Counterfeiters," has been incarcerated in prison. The phrase "once too often" will fit Brockway's case, for when arrested he carried on his person the evidence which was partly the means of his own conviction. This last combination of persons was formed in Sing Sing prison, where Nixon was employed as a keeper. Brockway was there for a New York State offense, Dr. Bradford for malpractice, and James Courtney for forgery and perjury.

His methods of making plates, although not an engraver, is a secret of his own. His coworker, Charles H. Smith, who engraved the plates for the finest counterfeit United States bonds and notes that were ever

seen, has lost his mind.

In October, 1895, information came to this office from the United States attorney at Philadelphia, Pa., concerning a number of Roumanians who were endeavoring to buy a steam engine and steam drop presses to enter into a scheme for counterfeiting minor coins. Two of them turned Government informers, and the result was that five of these men were arrested, tried, and convicted, receiving sentences of five years' imprisonment and \$1,000 fine each. A complete hand-power outfit which they used was captured.

In December, 1895, members of what was known as the "Miller Dice" gang were gathered in by the agents of the Secret Service at different places. It consisted of nine men, and the amount of counterfeit paper money captured was \$12,000. Five have since been convicted and three are awaiting trial, the other being discharged, This gang had been flooding the Indian Territory and Texas with counterfeit \$10 silver certificates, and part of them were at the Atlanta Exposition with some

\$8,000 of this money when arrested.

In October, 1895, the New York agents of this service arrested six of the "Carlisi" gang, all of whom were convicted for having in possession and passing what is known as the "Italian" \$2 and \$5 silver certificates. Later, in January, 1896, fifteen more counterfeiters, known as the "Tarranto-Bettini" gang, were arrested for having in possession and passing these same counterfeits. Nearly \$8,000 of counterfeit paper money was captured at the house of Bettini. Eleven of this last gang were convicted, and this result has caused the disappearance

from circulation, up to the present time, of the counterfeit \$2 and \$5

silver certificates which these two gangs handled.

On March 30, 1896, an arrest was made by the police of New York City, which proved to be one Emanuel Ninger, alias Joseph Gilbert, who, since 1882, has been executing the most remarkable pieces of pen work in similitude of \$100, \$50, and \$20 United States notes, known to the service as the "pen-made notes." Ninger afterwards pleaded guilty and was given a six-year sentence. He is also under indictment in New Jersey for a similar offense.

This man came to this country from Prussia in 1882, and, according to his own statement, he has been making these remarkable counterfeit notes ever since. He did all the work himself, besides passing every note he made. To prove that he thrived by this criminal work, he owned a house and farm as well as United States bonds and money in amount more than \$7,000. He led a plain life and worked only a few hours each day, doing this work without the aid of glasses of any kind, which demonstrates that his great gift, if properly applied, might have brought him fame and fortune.

him fame and fortune.

By your direction, this service rendered assistance to the United States attorney for Nevada in the matter of the Carson City mint shortage in obtaining evidence against the assayer and several others, who were subsequently found guilty of robbing the mint of some

\$78,000 worth of gold bullion.

Since my last report we have been successful in securing the conviction of Mrs. Tinsa McMillan, alias Mary T. Mack, for making and having in possession counterfeit 2-cent United States postage stamps. This is the person whom the Secret Service extradited on the President's warrant, and procured, without assistance from any other Department, all the evidence, and assisted the United States attorney's office for the northern district of New York at her final trial. She received an eighteen-months' sentence. Since then agents of this service have found zinc-etched plates for counterfeiting \$10 silver certificates, which were among her effects in Chicago. The records of this service show that she also attempted to counterfeit United States coin during the World's Fair. Taking her career altogether, she is a very remarkable woman.

Before the gathering of the national political conventions, various rumors were circulated as to the large amount of counterfeit money that was going to be floated. Corps of men were sent, and in connection with the police department made vigorous efforts to discover

counterfeit money, but no reports of any were received.

I ask for your recommendation to Congress of an act that will restore to this service its former purview, which extended to all frauds upon the Government. This is not intended to in any way interfere with the special duty of other agents of the Government, but that we may have authority to take up cases for the investigation of which no special provision in law is made, and which are usually of much importance, requiring prompt action.

The field force has faithfully attended to its duties. The several promotions at your hands have caused redoubled efforts. The President's order, upon your recommendation, placing the division under civil service rules, will have a tendency to bring about the best results, both in the field and office, by causing a feeling of security among the

employees, which will greatly add to their efficiency.

The cutting down of estimates of appropriations by Congress causes a restraint on our field operations, and necessitates the asking for a

deficiency appropriation, which is also pruned by the Committee on

Appropriations.

While the population of the country is ever increasing, the amount appropriated for the sustenance of the division remains at a standstill, and as this branch of the Government service comes directly in contact with the great body of the people, the necessity for a full force and ample means to sustain it becomes daily more apparent to this office. As it is, a number of judicial districts receive no assistance from this service—a matter of constant complaint.

I therefore most respectfully urge your recommendation in the sum of \$100,000, which I have estimated for "Suppressing of counterfeiting

and other crimes," for the fiscal year ending June 30, 1898.

I desire to thank you for your kind consideration and advice to this office.

All of which is respectfully submitted.

WM. P. HAZEN, Chief.

The SECRETARY OF THE TREASURY.

REPORT OF THE BOARD OF UNITED STATES GENERAL APPRAISERS.

NEW YORK, November 25, 1896.

SIR: We have the honor to submit the following report of the work of the Board for the twelve months ended October 1, 1896:

REAPPRAISEMENTS.

The following tabulated statement shows the number of reappraisements received, decided, and pending from October 1, 1895, to September 30, 1896:

Reappraisements from October 1, 1895, to September 30, 1896.

	Sugar.	Other.	Total.
By general appraisers:)	
Appeals pending last report. Appeals received from port of New York. Appeals received from other ports.	95 872 338	423 2,863 642	518 3, 735 980
Total	1,305	3, 928	5, 233
Disposed of as follows: Appraiser wholly sustained Appraiser partly sustained Advanced over appraiser Entries sustained Appeals returned Appeals pending action	79 44 92	1, 127 1, 487 451 643 12 208	1, 461 2, 243 530 687 12 300
Total	1, 305	3,928	5, 233
By boards of general appraisers: Appeals pending last report. Appeals received from port of New York. Appeals received from other ports.	38 201 94	119 1, 114 181	157 1, 315 275
Total	333	1, 414	1,747
Disposed of as follows: General appraiser wholly sustained. General appraiser partly sustained Advanced over general appraiser Entries sustained Returned Appeals pending action	45 8 7	900 332 50 78 1 58	1, 138 377 58 85
Total	. 328	1, 419	1,747
Total number of reappraisements by general appraisers			1,660
Grand total		·····	6, 980

The grand total for the year ended October 31, 1894, was 1,879. The almost fourfold increase of reappraisements under the present tariff is in some measure attributable to the better diligence and efficiency of appraising officers, but is chiefly due to the enlargement of the scope of ad valorem rates of duty. The cases, however, have been disposed of with reasonable dispatch, the number reported pending being 387, as against 518 last year.

CLASSIFICATION.

The number of protests covering classification for the period intervening between August 1, 1890, and October 1, 1896, reaches 189,955. Of these, 20,848 for the current year, and 146,612 in all, have been decided by the boards organized by the Secretary of the Treasury. Four thousand three hundred and ninety-eight protests are now on the fall docket, which is undergoing consideration at the present time and will be concluded on December 18, next; 4,298, covered by decisions already made, are in the hands of the boards awaiting disposition, and 34,724 have been placed on the suspended files, the issues having been decided by the Board, and, on appeal, awaiting determination by the courts.

There has been but little change in the number of suspended cases from year to year, new questions arising almost as fast as old issues are determined. It is proper to say, however, that there appear to have been no serious delays in the decision of protests. The boards are always ready to expedite cases by giving special hearings when there is any good reason for such action.

APPEALS TO COURT FROM THE BOARD'S DECISIONS.

In the southern district of New York the whole number of appeals taken from decisions of the boards since October 1,1895, is 219, as against 153 appeals for the period covered by the report of last year. Many of these appeals are upon like claims and contentions, having been thus taken to save the rights of appellants.

The number of cases tried in the circuit court during the same time

is 74.

The number of cases in which the decisions of the Board of General Appraisers have been affirmed after trial, or in which the appeals from the decisions of the Board have been dismissed, is 174, as against 144 for the period covered by the report of last year.

The number of cases in which the decisions of the Board have been reversed is 42. Of these, 19 were reversed without argument or by consent, some being so reversed in accordance with decisions rendered

in other cases by the circuit court of appeals.

The number of cases in which the decisions of the Board have been affirmed in part and reversed in part is 10, of which 5 were without trial.

The number of cases in which appeals have been taken from decisions of the circuit court to the circuit court of appeals during the same time is 21, only 1 of which has been decided, and in this the Board was affirmed, the appeal being dismissed without argument.

The number of cases heard and decided by the circuit court of appeals during the same time is 28, all of these being cases appealed prior to last report. Of these 28 cases, the circuit court of appeals sustained the decisions of the Board in 15, reversed the decisions of the Board in 11, and in 2 cases the decision of the Board was sustained

in part and reversed in part. Besides these 28 cases, the Board has been sustained in 2 cases by the reversal of the circuit court on stipulation and without argument, and 3 cases have been certified to the Supreme Court on questions of law and are still pending.

The number of cases in which orders for further evidence have been

obtained since last report is 227.

The number of cases in which further evidence has been taken since

last report is 61.

The number of returns made by the Board to the circuit court since last report is 133, as against 120 for the period covered by the last report.

The number of days given by the circuit court to the consideration

of Board cases since the last report is 38.

We have not this year collated similar statistics from the districts other than the southern district of New York. We are aware that such statistics would be very meager, as the great bulk of customs appeals is made and heard in New York, and in many districts there is none. In a few districts, other than New York, the United States attorneys have lately made efforts to bring their cases to trial, and the pending or approaching terms of the courts may be expected to produce results not now in a condition to be reported.

In regard to the work of supervising appraisements and classifications at the several ports, with a view to securing uniformity, we have to state that the reports and samples received from the several ports have been as a rule satisfactory. Some important results of our work in this direction were reported to you in the Board's letter of April 13, 1896 (R.& S. 2780). We do not desire at this time to make any new or special recommendations, but would respectfully refer you to the

views expressed in the Board's previous annual report.

The appended tables are respectfully submitted for your information.

Yours, respectfully,

THAD. S. SHARRETTS,
GEORGE H. SHARPE,
GEO. C. TICHENOR,
J. B. WILKINSON, Jr.,
CHAS. H. HAM,
JAMES A. JEWELL,
F. N. SHURTLEFF,
WILBUR F. LUNT,
HENDERSON M. SOMERVILLE,
General Appraisers.

The SECRETARY OF THE TREASURY, Washington, D. C.

APPENDIX.

The following tabulated statement shows the number of protests received annually from August 1, 1890, to October 1, 1896:

	Received.				Remaining
	From New York.	From other ports.	Total.	Decided.	undecided Oct. 31, each year.
August 1 to October 31, 1890 Year ending— October 31, 1891 October 31, 1892 October 31, 1893	40, 495 22, 618	571 8, 589 7, 120 3, 786	1,700 50,146 47,615 26,404	704 6, 006 59, 592 26, 394	996 45, 136 31, 539 33, 169
October 31, 1894 Eleven months ending September 30, 1895 Twelve months ending September 30, 1896	20, 339	3, 320 3, 811 3, 118	19, 862 24, 150 20, 078	18, 403 14, 661 20, 848	34, 628 44, 117 43, 420
Total	159, 640	30, 315	189, 955	146, 608	

The following table shows the number of cases suspended and pending each year since 1890:

	Suspended.	Pending action.	Tőtal.
October 31, 1890. October 31, 1891. October 31, 1892. October 31, 1893. October 31, 1894. Eleven months ending September 30, 1895. Twelve months ending September 30, 1896.	38, 757 25, 483 25, 428 28, 916 35, 597	996 6, 379 6, 056 7, 741 5, 712 8, 157 8, 696	996 45, 136 31, 539 33, 169 34, 628 44, 117 43, 420

SUSPENDED SUBJECTS.

Acetanilid. Agate articles. Alizarin colors or dves. Anchovies in tins. Angora goat skins. Animals for breeding. Antitoxin. Artificial leaves. Articles of glass and other material, made. Articles of steel wire. Asphalt, dried. Asphalt, épuré. Atomizers (articles of glass and other materials). Bags made of parchment paper. Bags returned on which drawback had been allowed. Base bullion. Beaded trimmings. Beaded silks. Beadings of cotton. Beads, strung. Bicycle wheels. Bone meal. Bone casings. Boiler plates of steel and iron. Bottles, contents ad valorem. Bottles, contents specific. Bottles, empty. Bottle glassware. Bovril wine. Bronze mountings for china vases, etc. Bronze statuary. Bronze statuary for sale.

Burlaps of flax. Cachous. Calf-kip boots. Calfskins for morocco. Camphor oil. Canvas padding. Capes, used in combing the hair. Carbonate of potash. Cattle from Mexico. Champagne bottles. Chantilly lace. Cherries in marischine. Chlorodyne. Chinese shoes. Chiffon veiling. China ribbons. Cigar labels. Circus horse (tool of trade). Citron. Clerical error. Cloaks, fur lined. Cocoa butterine. Cocaine, muriate of. Commissions on worsteds. Coquille lenses. Cords of cotton and india rubber. Corn plasters. Cotton tubing. Cotton borders, tamboured. Cotton bed sets, tamboured and lace. Cotton lace insertings. Cotton net hat strips. Coverings on chocolate confectionery. "Cravenetted" goods.

Suspended Subjects-Continued.

Lace curtains.
