Subscription Price of Bulletin

A copy of the Federal Reserve Bulletin is sent to each member bank without charge. The subscription price in the United States and its possessions, Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Republic of Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, El Salvador, Uruguay, and Venezuela is \$6.00 per annum or 60 cents per copy; elsewhere, \$7.00 per annum or 70 cents per copy. Group subscriptions in the United States for 10 or more copies to one address, 50 cents per copy per month, or \$5.00 for 12 months.

World Payments Stresses in 1956-57

INTERNATIONAL TRANSACTIONS in the year ending June 1957 resulted in net transfers of gold and dollars from foreign countries to the United States. In the four preceding years transactions of the United States with the rest of the world had produced net transfers—of \$1.5 to \$2 billion a year—into gold and dollar holdings of foreign countries and international institutions. In 1956-57 net transfers in the reverse direction were \$500 million.

Throughout the year 1956-57 total payments from the United States were much greater than in earlier periods. The shift in net transfers resulted from foreign developments, two of which had major importance.

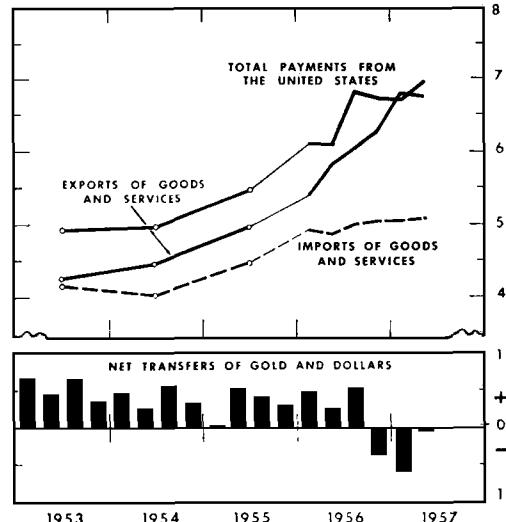

One major development was the emergence of large foreign trade deficits in a number of countries where resistance to inflationary tendencies had not been sufficiently effective. These deficits were of a global character, not merely in trade with the United States. The other development was the emergence of large speculative movements adversely affecting the international reserves of some of these countries, and also of the United Kingdom.

Early in 1957 world industrial production was at a new high, after three years of advance during which investment expenditures were exceptionally large. Most industrial countries found, especially in 1956-57, that scarcity and unevenness of resources were limiting the rate of expansion that could be maintained without loss of internal financial stability and external balance.

Despite continuing inflationary pressures,

U. S. BALANCE OF PAYMENTS

Billions of dollars, quarterly

NOTE.—*Upper section:* Total payments and exports of goods and services correspond to main heads in table on p. 1129. Imports of goods and services include military expenditures abroad and exclude remittances, pensions, and other transfers. For 1953-55, annual figures at quarterly rates. For 1956 and 1957, quarterly, adjusted for seasonal variation by the Department of Commerce. *Lower section:* Increases in total foreign gold and dollar holdings through transactions with the United States, corresponding to data in table. Unadjusted for seasonal variation.

many countries did preserve a considerable degree of financial balance. But in some countries—and most strikingly in France, Japan, and India—unsustainably rapid expansion of internal demand led in 1956-57 to heavy imports and large drains on foreign exchange reserves.

The Suez crisis, which necessitated European purchases of dollar oil and led to disturbance of confidence in the stability of the pound sterling, also produced overbuying in the expectation of rising prices, and this effect was greatest in countries where credit expansion was unchecked. Excess

demand in these countries, together with the Suez crisis, had wide repercussions in international trade and payments, including the transactions of the United States.

One result was great diversity in the movements of international reserves. Large drains on reserves occurred in countries importing heavily and in countries adversely affected by exchange speculation, while many other countries gained reserves.

INDUSTRIAL PRODUCTION AND TRADE

Expansion of world industrial production was somewhat slower in 1956 and the first half of 1957 than in the preceding 18 months. In the United States, after a new rise in the summer and autumn of 1956, production remained nearly level.

In Western Europe, on the other hand, production leveled out in the second half of 1956 but rose again in the early part of 1957. This new rise reflected resumption of growth in British internal demand and an earlier build-up of new orders on the Continent when it seemed likely that the closing of the Suez Canal might bring more price

inflation. Rapid credit expansion continued in France. Western Europe also felt repercussions of inflated demand in non-European countries such as Japan and India.

Nevertheless, the rise in Western European construction activity and output of machinery and metal products was smaller from mid-1956 to mid-1957 than it had been a year earlier. In contrast to this slowing down of growth in capital goods production after mid-1956, textile output rose sharply, as consumption and buying for inventory increased.

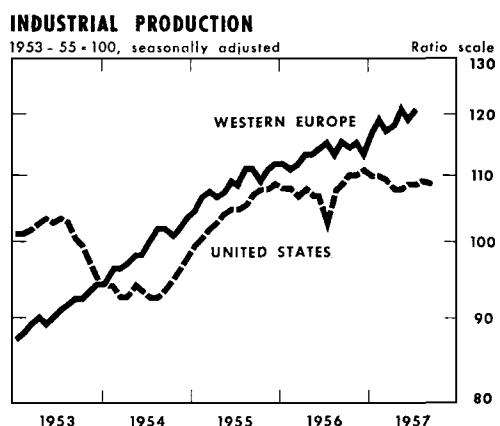

In Canada, output of durable goods declined after mid-1956. Total industrial production advanced up to February 1957, but this summer was one per cent under the year-earlier level.

In Japan, where industrial production had increased 40 per cent in two years up to the end of 1956, expansion continued unchecked until May 1957. Japanese wholesale prices rose 6 per cent from April 1956 to April 1957. Investments in inventories and work in process were large.

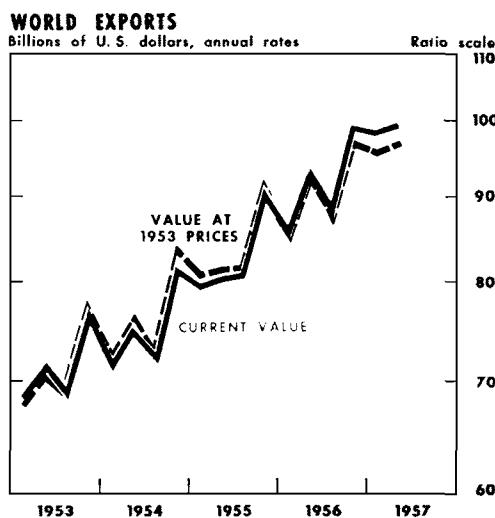

In India, expenditures under a second five-year development plan were heavy.

World trade, pulled up by high and rising demand, rose through 1956 and remained extremely high in the first quarter of 1957, when usual seasonal forces would have tended to produce a decline.

In the second quarter, imports of many European countries leveled off. Some easing of conditions in European metal and fuel markets, as well as a tapering off of restocking demand for raw cotton, contributed to this result. United States and Canadian imports, seasonally adjusted, had leveled out even before the end of 1956. On the other hand, imports by some countries, including Japan and India, were at their highest in the second quarter of 1957.

NOTE.—Organization for European Economic Cooperation (OECC) index for Western Europe; latest figure shown is for July (partly estimated by Federal Reserve). Federal Reserve index for United States; latest figure shown is for September (preliminary).

NOTE.—Unadjusted for seasonal variation. Current value from International Monetary Fund *International Financial Statistics*, excluding U. S. military shipments under aid programs and exports of Soviet Area countries and China Mainland. Value at 1953 prices derived by using United Nations world export unit-value index. Data for second quarter 1957 partly estimated.

DIVERSITY IN PAYMENTS BALANCES

In many countries import expansion in 1956 and the early months of 1957 was not matched by export growth. Exports were far from keeping pace with rising imports in Japan, France, India, the Netherlands, and a number of other countries where internal demand was very strong. Deterioration in the trade balances of Japan, France, and India was large in dollar amount and exceptionally large, as the chart indicates, in relation to the size of their trade. For the three countries combined, the net change from the year 1955-56 to the year 1956-57 was \$2.2 billion, their imports having increased by \$2.8 billion and their exports by less than \$700 million.

In Brazil, Mexico, and Pakistan, imports were larger and exports smaller than in the preceding period; these declines in exports were due to a variety of causes, including lower coffee sales, short supplies of raw

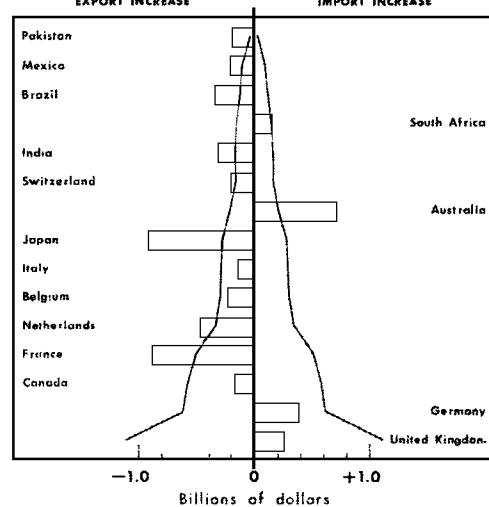

cotton, and strong internal demand. A few other countries were affected by lower prices for copper and rubber, and loss of petroleum trade during the Suez crisis.

On the other side of the scale, there were several countries where increases in exports greatly exceeded increases in imports. The trade balance of the United States expanded by \$3 billion. In relation to the size of trade, the change for Australia was even greater. Australia's exports were much larger in 1956-57 than in 1955-56, while her imports were cut down by direct controls and tighter financial policy. Germany's export surplus increased considerably, despite a large rise in imports.

These changes in trade, together with shifts in capital movements, changed the

CHANGES IN ANNUAL TRADE BALANCES

Comparison of years ending June 1956 and June 1957
IMPORT INCREASE IN EXCESS OF EXPORT INCREASE EXPORT INCREASE IN EXCESS OF IMPORT INCREASE

NOTE.—The irregular lines on either side of the zero line provide a measurement of relative change in a country's trade balance, based on the size of its imports in 1955-56. The distance from the zero line to either of the irregular lines represents 10 per cent of 1955-56 imports. Bars extending beyond these lines indicate relatively large changes in trade balances.

Foreign countries included are those with changes greater than \$150 million. Changes shown for Pakistan, Mexico, and Brazil reflect import increases plus export decreases; for Australia, export increase plus import decrease. International Monetary Fund data; exports f.o.b., imports c.i.f.

pattern of gains and losses of reserves. Large drains on reserves occurred in a greater number of countries than before. Some gains in 1956-57 were exceptionally big, but in general large gains were less common.

Exceptionally large increases in official gold and foreign exchange reserves occurred in Germany (\$1.3 billion), Venezuela (\$700 million), and Australia (\$500 million). In a few other countries with over-all payments surpluses at least 15 per cent the size of their mid-1956 reserves, additions to official reserves and reductions of debt to the European Payments Union totaled \$150 million. Though Canada's official reserves changed relatively little, its total dollar holdings, including those privately owned, increased \$300 million.

Large declines in official reserves occurred in France, Japan, and India, and in addition two of these countries drew on the International Monetary Fund during this period, and one increased its debt to the European Payments Union. Measured by these changes in reserve assets and liabilities, the aggregate deficit of the three exceeded \$2 billion. A dozen other countries with imports in excess of exports, and with over-all payments deficits at least 15 per cent the size of their June 1956 reserves, used \$700 million of reserves and Fund drawings. Some of these reserve drains were partly due to speculative outflows of funds.

Reserves utilized by deficit countries included sterling holdings as well as dollars. Regardless of the currency used, the drains reflected over-all deficits in the external accounts of the countries concerned, not merely trade deficits with the United States.

In the United Kingdom's accounts, the drawing down of sterling holdings by India, Japan, and several other countries was in

large part offset by the increase in Australia's sterling reserves; over-all, the reduction in sterling holdings was \$190 million.

This reduction in British liabilities was more than offset, however, by Britain's drawing of \$560 million from the International Monetary Fund. The decline in the United Kingdom's net reserves—since changes in gross reserves and in debt to the European Payments Union were negligible—was thus \$370 million.

The United Kingdom, unlike other countries losing reserves, had a surplus on current account. These net earnings of \$590 million were more than offset by a long-term capital outflow of \$850 million and short-term (and unidentified) movements of \$110 million. These capital movements included large speculative elements. Speculative movements of funds were thus the major cause of Britain's net reserve loss in the year 1956-57. Such movements were very large after the closing of the Suez Canal.

During the summer of 1957, France made adjustments in the franc exchange rate, and speculation arose as to an upward revaluation of the German mark. In these circumstances, a new speculative drain on British reserves started. This movement ceased late in September, when Germany denied any intention of revaluing the mark, and when the British Government announced its determination not to change the exchange rate for the pound and demonstrated its willingness to take such measures of fiscal and monetary policy as might be required to enforce that determination.

FOREIGN DEVELOPMENTS AND THE U. S. BALANCE OF PAYMENTS

Demand for more United States exports in the year 1956-57 came from all parts of the world, but the increases varied greatly from country to country, as the table shows.

There were exceptionally large percentage increases in exports to France, Germany, and Italy, countries in which industrial production again rose considerably. Increases for other European countries were also large, averaging about one-fifth. Major factors were emergency oil movements, expansion of coal and metal purchases, and raw cotton restocking.

Outside Europe, there were big increases in United States exports to Japan and India, and to Argentina, Brazil, and Venezuela. Other increases averaged only about 10 per cent, apart from countries where aid programs or agricultural surplus disposal credits were especially large in the year 1956-57.

Several of the countries with the largest increases in purchases from the United States fell into one or the other of two clearly definable groups. Germany, Italy, and Venezuela, despite their heavy purchases from the United States and others, had over-all surpluses as measured by changes in gold and foreign exchange reserves. On the other hand, Japan, France, and India were heavy losers of reserves, and this primarily because of big increases in their over-all purchases.

The aggregate increase in United States exports to these three deficit countries alone was \$900 million; expansion of demand in deficit countries was a major factor in the \$2 billion shift in the United States balance of payments from net outward transfers of gold and dollars in 1955-56 to net inward transfers in 1956-57.

In the aggregate, United States exports of goods and services were nearly \$26 billion in the year 1956-57, or one-fifth more than in the preceding 12 months. Despite this sharp rise, they were still not as large as total payments from the United States. These payments, on current and capital ac-

count combined, rose 15 per cent to an unprecedented amount of over \$27 billion.

For individual foreign countries, differences between payments received from the United States and dollars or gold spent for purchases here showed wide variations. These surpluses and deficits, in turn, were in some cases augmented, in other cases offset, by gold and dollar payments in settlement of transactions between the foreign countries themselves; they also obtained some gold from new production. Some of their dollar receipts went into assets in this country not classed as dollar holdings.

The resulting pattern of gains and losses in holdings of gold and dollars—like the pattern of changes in official reserves of gold and all foreign exchange—was one of

great diversity. In 15 foreign countries where holdings rose by 10 per cent or more, additions to holdings totaled more than \$2.5 billion in the year 1956-57. During the same period gold and dollar deficits for 15 others also exceeded \$2.5 billion; these were financed in part by more than \$1 billion of drawings from the International Monetary Fund, reducing that institution's holdings.

In the aggregate, the net addition to gold and dollar holdings for all foreign countries and international institutions was only \$100 million. They acquired \$600 million from new gold production and hoards. But they made net transfers of \$500 million in settlement of transactions with the United States.

Speculative movements in the year 1956-57 involved flows of payments to the United States, as well as to foreign countries such as Germany and Canada. In contrast to the \$500 million net transfers out of foreign and international gold and dollar holdings, the recorded transactions of foreigners with the United States would have left them a surplus of \$700 million, after paying for the goods and services exported to them by the United States and after adding to their reported assets in this country other than those classed as dollar holdings. The discrepancy is accounted for in the United States balance of payments by \$1.2 billion of unidentified transactions, a much larger amount than in preceding years.

Experience at other times of reduced confidence in foreign currencies suggests that the large unidentified transactions of 1956-57 were mainly capital movements. In part these may have consisted of a speculative build-up, through leads and lags in commercial payments, of accounts payable in the United States to foreigners. Only to a limited extent are such accounts normally covered by the capital flow statistics.

U. S. PAYMENTS

Total payments from the United States to foreigners, continuing to exceed foreign purchases of United States exports, reached a record \$27.2 billion in the year 1956-57. There were exceptionally large outflows of United States private capital, and Government credits and expenditures abroad were larger than the year before. Imports of goods and services rose about in line with United States production and income.

U. S. private capital. The net outflow of private capital totaled \$3.9 billion in the year 1956-57, more than double the large amount in 1955-56. This expansion of private investment and loans abroad accounted for three-fifths of the increase in total payments from the United States.

Direct investments of United States companies continued to make up a major part of the capital outflow, and were particularly large in Canada and Venezuela. There was also a marked rise in purchases of foreign securities and in extension of bank loans and acceptance credits.

While expansion of Canada's import surplus slowed down, capital flowed into Canada from the United States and other countries on a greatly increased scale. The consequent strength of the Canadian dollar in foreign exchange markets was accompanied, and limited, by a rise in private Canadian holdings of United States dollars. The heavy capital flow into Venezuela from the United States, much of which took the form of cash purchases of petroleum exploration rights, helped to double Venezuela's gold and dollar holdings.

The outflow of private capital, including bank credits, to areas outside the Western Hemisphere increased to \$1.5 billion from \$700 million the year before. The increased outflow to these areas played a significant

role in financing their increased payments for United States goods and services.

U. S. Government transactions. Government grants and loans and military expenditures abroad totaled \$5.5 billion in the 12 months ending June 1957, nearly \$450 million more than in the previous year. Most of this increase resulted from a further expansion of the net outflow of Government capital. Credits extended through local currency sales of agricultural commodities were considerably larger than the year be-

fore, and financed one-fourth of agricultural exports in the year 1956-57.

Imports. United States imports of goods and services, other than military expenditures abroad, totaled \$17.9 billion in the year ending June 1957. The increase of \$1 billion, half for goods and half for services, was much less than the change a year earlier when merchandise imports were growing rapidly.

The leveling out in total merchandise imports broadly paralleled the course of

production and income in this country. Imports of manufactures, however, continued to increase despite a leveling off in imports of manufactured textiles; the volume of automobile imports more than doubled. Imports of petroleum also continued to rise, and in the first half of 1957 were twice as large in value as they had been four years earlier.

Imports from Europe, Canada, and Venezuela increased. Imports from the rest of Latin America and from Asia, Africa, and Australia were 3 per cent lower than in 1955-56, and this summer were 5 per cent below their level at mid-1956.

U. S. EXPORTS IN THE SUMMER OF 1957

Total merchandise exports this summer were no longer rising. They were 13 per cent above their rate a year earlier, and several per cent below the first-quarter peak annual rate of over \$20 billion.

Measures taken by countries losing reserves played some part in checking the rise in United States exports, but much more important were general changes in world trade and changes in demand for particular commodities. Exports of machinery, metals, and coal, which increased heavily up to the first quarter of 1957, leveled out in the spring and early summer. Exports of cot-

ton, petroleum, and wheat this summer were well below earlier peaks.

Between the years 1955-56 and 1956-57, a tripling of raw cotton exports had accounted for more than one-fifth of the \$3.5 billion total increase in exports. Wheat shipments, increased partly in consequence of a poor harvest in Europe, accounted for a tenth, and petroleum for over a tenth. By June, petroleum exports were back to a more usual level. In August both cotton and wheat shipments were about one-fifth below the rates of August 1956.

In Japan, measures taken this spring and summer to tighten restraints on credit expansion took effect rapidly in slowing domestic expenditure, lowering prices, and reducing imports. In France, India, and some other countries, direct restrictions on imports were intensified and efforts were made to increase the effectiveness of general monetary and credit policy.

United States exports to Japan were declining rapidly during the summer. Downward adjustment in exports to France began with the passing of the European oil shortage and continued this summer. There were also reductions in United States exports to a number of other countries whose total international purchases had been large in relation to their sales during the year 1956-57.

Law Department

Administrative interpretations, new regulations, and similar material

Bank Holding Company Receiving Stock by Dividends, Stock Splits, or Exercise of Rights

The Board of Governors has been asked whether a bank holding company may receive bank stock dividends or participate in bank stock splits without the Board's prior approval, and whether such a company may exercise, without the Board's prior approval, rights to subscribe to new stock issued by banks in which the holding company already owns stock.

Neither a stock dividend nor a stock split results in any change in a stockholder's proportional interest in the issuing company or any increase in the assets of that company. Such a transaction would have no effect upon the extent of a holding company's control of the bank involved; and none of the five factors required by the Bank Holding Company Act to be considered by the Board in approving a stock acquisition would seem to have any application. In view of the objectives and purposes of the Act, the word "acquire" would

not seem reasonably to include transactions of this kind.

On the other hand, the exercise by a bank holding company of the right to subscribe to an issue of additional stock of a bank could result in an increase in the holding company's proportional interest in the bank. The holding company would voluntarily pay additional funds for the extra shares and would "acquire" the additional stock even under a narrow meaning of that term. Moreover, the exercise of such rights would cause the assets of the issuing company to be increased and in a sense, therefore, the "size or extent" of the bank holding company system would be expanded.

In the circumstances, it is the Board's opinion that receipt of bank stock by means of a stock dividend or stock split, assuming no change in the class of stock, does not require the Board's prior approval under the Act, but that purchase of bank stock by a bank holding company through the exercise of rights does require the Board's prior approval, unless one of the exceptions set forth in section 3(a) is applicable.

Current Events and Announcements

FEDERAL RESERVE MEETINGS

Meetings of the Federal Open Market Committee were held in Washington on October 1 and October 22, 1957.

A meeting of the Presidents of the Federal Reserve Banks was held in Washington on September 30, and on October 1 the Presidents met with the Board of Governors.

APPOINTMENTS OF BRANCH DIRECTORS

On September 12, 1957, the Federal Reserve Bank of St. Louis appointed Mr. John E. Brown a director of its Memphis Branch for the unexpired portion of a term ending December 31, 1957. Mr. Brown is President of the Union Planters National Bank, Memphis, Tennessee. As Branch director he succeeds Mr. William B. Pollard, who died recently.

On October 3, 1957, the Board of Governors announced the appointment of Mr. Frank Lee Wesson, of Victoria, Arkansas, as a director of the Memphis Branch of the Federal Reserve Bank of St. Louis for the remainder of a term expiring December 31, 1958. Mr. Wesson is President of Wesson Farms, Inc., and succeeds Mr. Henry Banks, farmer, of Clarendale, Arkansas, who died recently.

RESIGNATION OF BRANCH DIRECTOR

Effective September 30, 1957, the Board of Governors accepted the resignation of Mr. Ernest J.

Moench, President, Tennessee Tufting Company, Nashville, Tennessee, as a director of the Nashville Branch of the Federal Reserve Bank of Atlanta. Mr. Moench had served the Branch as a director since January 1, 1953.

FLOW-OF-FUNDS TABLES

Annual flow-of-funds data for 1956, together with revised data for 1954 and 1955, are presented in tables on pp. 1190-1194 of this issue of the Federal Reserve BULLETIN. These tables are consistent in form and content with those published in the April 1957 BULLETIN.

National Summary of Business Conditions

Released for publication October 15

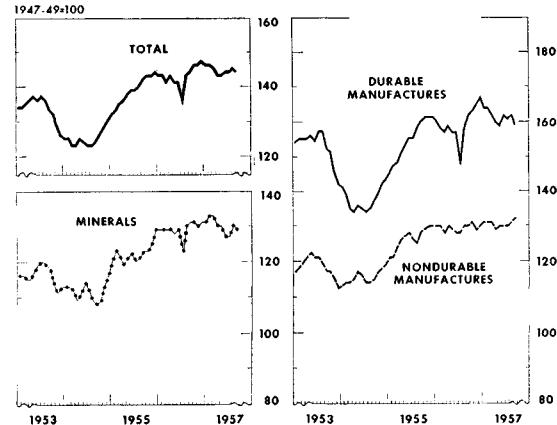

Industrial and construction activity continued to show little change in September. Manufacturing employment declined slightly further, but employment in nonmanufacturing industries remained at record levels. Retail sales declined moderately from record levels. From mid-September to mid-October, average wholesale prices of industrial commodities changed little, while farm and food products declined. Common stock prices declined sharply further.

INDUSTRIAL PRODUCTION

Industrial production in September, as measured by the Board's seasonally adjusted index, was 144 per cent of the 1947-49 average. At this level, the index was one point below the August figure, which was revised upward, and the same as in September a year ago. Output of durable goods and minerals declined in September, while activity in the nondurable goods industries reached a new high.

Activity in metal and metal fabricating industries did not show the usual seasonal expansion in September. Auto assemblies were curtailed sharply owing to model-changeovers and work stoppages. After allowance for seasonal variation, output of television sets was reduced, and there were further decreases in activity in producers' equipment in-

INDUSTRIAL PRODUCTION

Federal Reserve indexes, seasonally adjusted. Monthly figures, latest shown are for September.

dustries. Steel mill operations, which usually rise in September, remained at the August rate of 82 per cent of capacity, and continued at this rate in early October. Production of construction materials declined from the August level, reflecting a moderate decrease in lumber output.

Production of rubber, leather, and petroleum products increased somewhat in September and activity in the chemical industry remained at advanced levels. Minerals production declined as extraction of coal and metals was reduced.

CONSTRUCTION

Private housing starts in September were maintained at a seasonally adjusted annual rate of close to one million units. Outlays for new construction rose further, to a record seasonally adjusted annual rate of \$48.2 billion, and were 4 per cent above a year earlier. Public construction generally increased, and private residential activity continued to expand from the reduced level reached in the second quarter.

EMPLOYMENT

Nonagricultural employment declined somewhat in September, to a seasonally adjusted level of 52.7 million. Employment in nonmanufacturing industries continued at peak levels, but there were decreases in industries manufacturing durable goods. Weekly earnings of factory workers averaged somewhat higher as hourly earnings increased one cent to \$2.08. Unemployment was unchanged from August, but was moderately higher than a year ago.

DISTRIBUTION

Seasonally adjusted retail sales declined moderately in September from the record July-August level, and were 5 per cent above a year ago. The September decline reflected mainly decreases in sales at apparel stores and at department and other general merchandise stores. Dealer sales of new autos were considerably above the reduced year-earlier rate. With auto output curtailed for model-changeovers, dealer stocks, while still high, fell substantially.

COMMODITY PRICES

The general level of wholesale commodity prices declined somewhat from mid-September to mid-October, reflecting mainly seasonal decreases in farm products and foods. Prices of livestock and meats declined about 10 per cent from relatively advanced levels. Among industrial commodities, basic materials declined further. Steel scrap was down sharply, and there were decreases in lead, hides, wool, and some cotton textiles. Meanwhile, prices of some finished products were advanced.

The consumer price index increased somewhat further in August. Retail prices of most foods and services advanced.

BANK CREDIT AND RESERVES

Total credit at city banks increased \$1.6 billion in the four weeks ending October 2, reflecting bank acquisitions of new Treasury securities and growth in loans. Loans to business rose substantially in mid-September, due in part to borrowing for income tax payments, but subsequently declined. Loans to brokers and dealers for purchasing or carrying securities also increased.

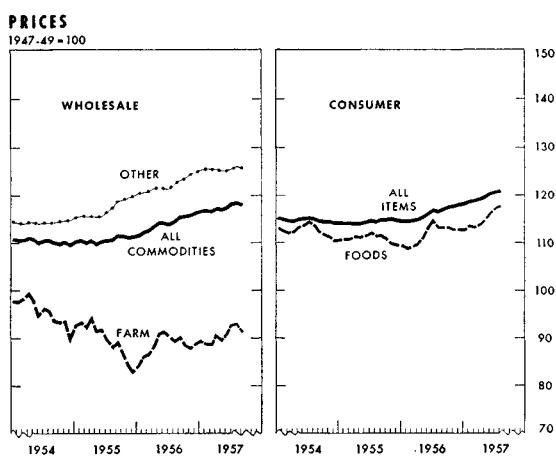

Average member bank borrowings from the

Federal Reserve were about \$440 million greater than excess reserves in the four weeks ending October 9, about the same amount as in the preceding four weeks. Between early September and early October reserves supplied largely through Federal Reserve purchases of U. S. Government securities under repurchase contracts and through currency inflows were about absorbed by increases in required reserves.

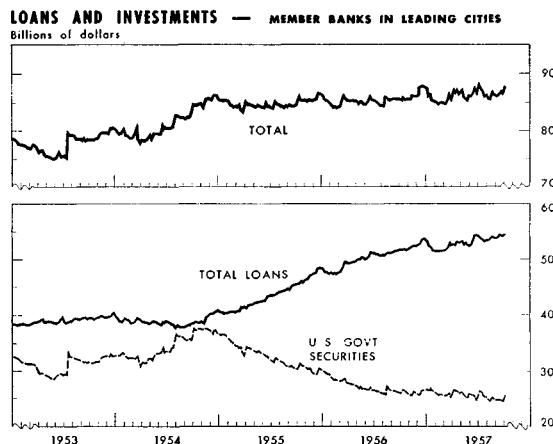

SECURITY MARKETS

Yields on most U. S. Government notes and bonds rose moderately in the latter half of September, but turned down in early October. Market yields on Treasury bills moved inversely with most other yields, declining in late September to a level below the discount rate and rising again in early October.

Yields on corporate bonds continued to advance through September and then declined in early October, while yields on State and local government bonds declined throughout this period. Common stock prices declined sharply further, reaching the lowest point in more than two years.

Bureau of Labor Statistics indexes. "Other" wholesale prices exclude processed foods, included in total but not shown separately. Monthly figures, latest shown: August for consumer prices, and September for wholesale prices.

Federal Reserve data. Loans to banks are excluded. Securities other than U. S. Government are included in the total but not shown separately. Weekly figures, latest shown are for Oct. 2.

Tables on the following pages include the principal statistics of current significance relating to financial and business developments in the United States. The data relating to Federal Reserve Banks, member banks of the Federal Reserve System, and department store trade, and the consumer credit estimates are derived from regular reports made to the Board; production indexes are compiled by the Board on the basis

of material collected by other agencies; figures for gold stock, currency in circulation, Federal finance, and Federal credit agencies are obtained from Treasury statements; the remaining data are obtained largely from other sources. Back figures for 1941 and prior years for banking and monetary tables, together with descriptive text, may be obtained from the Board's publication, *Banking and Monetary Statistics*.

² Preliminary.¹ Averages of daily closing figures for reserves and borrowings and of daily opening figures for other items, inasmuch as reserves required are based on deposits at opening of business.² Weekly figures of required, excess, and free reserves of all member

banks and of country banks are estimates.

³ Demand deposits subject to reserve requirements, i. e., gross demand deposits minus cash items reported as in process of collection and demand balances due from domestic banks.⁴ Free reserves are excess reserves less borrowings.

FEDERAL RESERVE BANK DISCOUNT RATES

[Per cent per annum]

Federal Reserve Bank	Discounts for and advances to member banks						Advances to individuals, partnerships, or corporations other than member banks secured by direct obligations of the U. S. (last par. Sec. 13)		
	Advances secured by Government obligations and discounts of and advances secured by eligible paper (Secs. 13 and 13a) ¹			Other secured advances [Sec. 10(b)]

¹ Rates shown also apply to advances secured by obligations of Federal intermediate credit banks maturing within 6 months.

NOTE.—*Maximum maturities.* Discounts for and advances to member banks: 90 days for discounts and advances under Sections 13 and 13a of the Federal Reserve Act except that discounts of certain bankers' acceptances and of agricultural paper may have maturities not exceeding 6

months and 9 months, respectively, and advances secured by obligations of Federal intermediate credit banks maturing within 6 months are limited to maximum maturities of 15 days; 4 months for advances under Section 10(b). Advances to individuals, partnerships, or corporations under the last paragraph of Section 13: 90 days.

1937—Aug. 27.....	1	In effect Oct. 1, 1957.....	3½

¹ Under Secs. 13 and 13a, as described in table above.

² Preferential rate for advances secured by Govt. securities maturing or callable in 1 year or less in effect during the period Oct. 30, 1942–Apr. 24, 1946. The rate of 1 per cent was continued for discounts of and advances secured by eligible paper.

NOTE. *Repurchase rate on U. S. Govt. securities.* In 1955, 1956, and 1957 this rate was the same as the discount rate except in the following periods (rates in percentages): 1955—May 4–6, 1.65; Aug. 4, 1.85; Sept. 1–2, 2.10; Sept. 8, 2.15; Nov. 10, 2.375; and 1956—Aug. 24–29, 2.75; 1957—Aug. 22, 3.50.

MARGIN REQUIREMENTS¹

[Per cent of market value]

Prescribed in accordance with Securities Exchange Act of 1934	Feb. 20, 1953–Jan. 4, 1955	Jan. 4, 1955–Apr. 22, 1955	Effective Apr. 23, 1955
Regulation T:			
For extensions of credit by brokers and dealers on listed securities.....	50	60	70
For short sales.....	50	60	70
Regulation U:			
For loans by banks on stocks.....	50	60	70

¹ Regulations T and U limit the amount of credit that may be extended on a security by prescribing a maximum loan value, which is a specified percentage of its market value at the time of extension; margin requirements are the difference between the market value (100%) and the maximum loan value. Changes on Feb. 20, 1953, and Jan. 4, 1955, were effective after the close of business on those dates.

¹ Includes applications approved conditionally by the Federal Reserve Banks and under consideration by applicant.² Includes industrial loans past due 3 months or more, which are not included in industrial loans outstanding in weekly statement of condition of Federal Reserve Banks.³ Not covered by Federal Reserve Bank commitment to purchase or discount.

NOTE.—The difference between amount of applications approved and the sum of the following four columns represents repayments of advances, and applications for loans and commitments withdrawn or expired.

¹ Revised.¹ Loans made by private financing institutions and guaranteed by Government procurement agencies, pursuant to the Defense Production Act of 1950. Federal Reserve Banks act as fiscal agents of the guaranteeing agencies in these transactions, and the procedure is governed by Regulation V of the Board of Governors.

Note.—The difference between guaranteed loans authorized and sum of loans outstanding and additional amounts available to borrowers under guarantee agreements outstanding represents amounts repaid, guarantees authorized but not completed, and authorizations expired or withdrawn.

FEDERAL RESERVE BANK RATES ON INDUSTRIAL LOANS¹

[In effect Sept. 30. Per cent per annum]

Federal Reserve Bank	To industrial or commercial businesses		To financing institutions	
	On loans ²	On commitments	On discounts or purchases	
			Portion for which institution is obligated	Remaining portion
Boston.....	4-6	1½-1½	(3)	(4)
New York.....	4½-6	1½-1½	(3)	(4)
Philadelphia.....	3½-6	1½-1½	(5)	(4)
Cleveland.....	4-6	1½-1½	(3)	(4)
Richmond.....	4-6	1½-1½	(3)	(4)
Atlanta.....	3¾-6	1-1½	(3)	(4)

¹ Outside Treasury and Federal Reserve Banks. Prior to December 1955 the totals shown as in circulation were less than totals of coin and

paper currency shown by denomination by amounts of unassorted currency (not shown separately.)

² Paper currency only; \$1 silver coins reported under coin.

¹ Outside Treasury and Federal Reserve Banks. Includes any paper currency held outside the continental limits of the United States. Totals for other end-of-month dates are shown in table above; totals for Wednesday dates, in table on p. 1138.² Includes \$156,039,431 held as reserve against United States notes and Treasury notes of 1890.³ To avoid duplication, amount of silver dollars and bullion held as security against silver certificates and Treasury notes of 1890 outstanding is not included in total Treasury currency outstanding.⁴ Less than \$500,000.⁵ Because some of the types of currency shown are held as collateral or reserves against other types, a grand total of all types has no special significance and is not shown. See note for explanation of duplications.

NOTE.—There are maintained in the Treasury—(1) as a reserve for United States notes and Treasury notes of 1890—\$156,039,431 in gold bullion; (2) as security for Treasury notes of 1890—an equal dollar amount in standard silver dollars (these notes are being canceled and retired on

receipt); (3) as security for outstanding silver certificates—silver in bullion and standard silver dollars of a monetary value equal to the face amount of such silver certificates; and (4) as security for gold certificates—gold bullion of a value at the legal standard equal to the face amount of such gold certificates. Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve Bank. Federal Reserve notes are secured by the deposit with Federal Reserve agents of a like amount of gold certificates or of gold certificates and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act, or of direct obligations of the United States. Each Federal Reserve Bank must maintain a reserve in gold certificates of at least 25 per cent against its Federal Reserve notes in actual circulation. Gold certificates deposited with Federal Reserve agents as collateral, and those deposited with the Treasurer of the United States as a redemption fund, are counted as reserve. Gold certificates, as herein used, includes credits with the Treasurer of the United States payable in gold certificates. Federal Reserve Bank notes and national bank notes are in process of retirement.

^p Preliminary.¹ Represents all commercial and savings banks, Federal Reserve Banks, Postal Savings System, and Treasury currency funds (the gold account, Treasury currency account, and Exchange Stabilization Fund).² Excludes interbank time deposits; U. S. Treasurer's time deposits, open account; and deposits of Postal Savings System in banks.³ Prior to June 30, 1947, includes a small amount of demand deposits.⁴ Demand deposits other than interbank and U. S. Govt., less cash items reported as in process of collection.⁵ Seasonally adjusted series begin in 1947 and are available only for last Wednesday of the month. For back figures, see BULLETIN for July 1957, pp. 828-829.

NOTE.—For description of statement and back figures, see BULLETIN for January 1948, pp. 24-32. The composition of a few items differs slightly from the description in the BULLETIN article; stock of Federal Reserve Banks held by member banks is included in other securities and in capital and miscellaneous accounts, net, and balances of the Postal Savings System and the Exchange Stabilization Fund with the U. S. Treasury are netted against capital and miscellaneous accounts, net, instead of against U. S. Govt. deposits and Treasury cash. Total deposits and currency shown in the monthly Chart Book excludes foreign bank deposits, net, and Treasury cash. Except on call dates, figures are rounded to nearest \$100 million and may not add to the totals.

¹ All commercial banks in the United States. These figures exclude data for banks in U. S. possessions except for one bank in Alaska and one in the Virgin Islands that became members on Apr. 15, 1954, and May 31, 1957, respectively. During 1941 three mutual savings banks became members of the Federal Reserve System; these banks are included in member banks but are not included in all insured commercial banks or all commercial banks. Comparability of figures for classes of

banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by merg

³ Breakdowns of loan, investment, and deposit classifications are not available prior to 1947; summary figures for earlier dates appear in the preceding table.

Dec. 31, 1942, aggregated \$513 million at all member banks and \$525 million at all insured commercial banks.

⁴ Demand deposits other than interbank and U. S. Govt., less cash items reported as in process of collection.

For other notes see opposite page.

⁵ Beginning June 30, 1942, excludes reciprocal bank balances, which on

¹ Exclusive of loans to banks and after deduction of valuation reserves; individual loan items are shown gross.² Includes guaranteed obligations.³ Beginning Aug. 21, 1957, banks were requested to report holdings of securities acquired under resale agreements as loans, rather than as

securities owned as heretofore. Published figures for prior dates have not been revised, but the effect of the new reporting on prior dates would be to decrease holdings of securities and to increase loans to banks and loans to brokers and dealers.

See also NOTE on opposite page.

¹ Data for a sample of about 210 banks reporting changes in their larger loans; these banks hold over 90 per cent of total commercial and industrial loans of all weekly reporting member banks and nearly 70 per cent of those of all commercial banks.

² Figures for periods other than weekly are based on weekly changes.

³ Includes machinery and transportation equipment.

⁴ Prior to week ending Jan. 11, 1956, included changes in agricultural loans.

⁵ Includes increase of \$318 million resulting from errors disclosed incident to survey of credit extended to real estate mortgage lenders.

¹ Monthly and weekly yields are averages of daily figures for U. S. Govt. and corporate bonds. Yields of State and local govt. general obligations are based on Thursday figures; and of preferred stocks, on Wednesday figures. Figures for common stocks are as of the end of the period, except for annual averages.

² Consists of fully taxable, marketable 2½ per cent bonds due or first callable after 12 years, through Sept. 30, 1955, and those due or callable in 10-20 years, beginning Oct. 1, 1955.

³ Consists of the 3½ per cent bond of 1978-83 and, beginning Feb. 1, 1955, the 3 per cent bond of February 1995.

⁴ Moody's Investors Service. State and local govt. bonds include general obligations only.

⁵ Standard & Poor's Corporation. Preferred stock ratio is based on 8 median yields in a sample of noncallable issues—2 industrial and 2 public utility. For common stocks, the earnings/price ratio is now computed for the 500 stocks in the price index, but figures prior to June 1957 are based on the 90 stocks formerly included in the daily price index. The dividend/price ratio has not yet been converted to the broader base.

⁶ Includes bonds rated Aa and A, data for which are not shown separately. Because of a limited number of suitable issues, the number of corporate bonds in some groups has varied somewhat.

¹ Monthly and weekly data for (1) U. S. Govt. bond prices, Standard and Poor's common stock indexes, and volume of trading are averages of daily figures; for (2) municipal and corporate bond prices are based on Wednesday closing prices; and for (3) the Securities and Exchange Commission series on common stock prices are based on weekly closing prices.

² Series composed of fully taxable, marketable 2½ per cent bonds due or first callable after 12 years through Sept. 30, 1955, and, beginning

Oct. 1, 1955, those due or callable in 10-20 years.

³ The 3¼ per cent bond of 1978-83 and, beginning Feb. 1, 1955, the 3 per cent bond of February 1995.

⁴ Prices derived from average yields, as computed by Standard and Poor's Corporation, on basis of a 4 per cent, 20-year bond.

⁵ Average daily volume of trading in stocks on the New York Stock Exchange for a 5½-hour trading day.

^c Corrected.

¹ Ledger balances of member firms of the New York Stock Exchange carrying margin accounts, as reported to the Exchange. Customers' debit and free credit balances exclude balances maintained with the reporting firm by other member firms of national securities exchanges and balances of the reporting firm and of general partners of the reporting firm. Balances are net for each customer—i. e., all accounts of one customer are consolidated. Money borrowed includes borrowings from banks and from other lenders except member firms of national securities exchanges. Data are as of the end of the month, except money borrowed, which is as of the last Wednesday of the month beginning June 1955.

² Figures are for last Wednesday of month for weekly reporting member banks, which account for about 70 per cent of all loans for this purpose. Column 5 includes some loans for purchasing or carrying U. S. Govt. securities (such loans are reported separately only by New York and Chicago banks). On June 30, 1956, reporting banks outside New York and Chicago held \$51 million of such loans. On the same date insured commercial banks not reporting weekly held loans of \$28 million for purchasing and carrying U. S. Govt. securities and of \$384 million for other securities. Noninsured banks had \$33 million of such loans, probably mostly for purchasing or carrying other securities.

¹ Figures are for all savings and loan associations in the United States. Data beginning 1950 are based on monthly reports of insured associations and annual reports of noninsured associations. Data prior to 1950 are based entirely on annual reports.² Includes gross mortgages with no deduction for mortgage pledged shares.³ Net of mortgage pledged shares.⁴ Includes other loans, stock in the Federal home loan banks and other investments, real estate owned and sold on contract, and office building and fixtures.

Note.—Revised figures for 1956 and 1957 will be in the BULLETIN for November.

SELECTED ASSETS AND LIABILITIES OF FEDERAL BUSINESS-TYPE ACTIVITIES

NOTE.—Statistics beginning Mar. 31, 1956, reflect the expanded coverage and the new classification of agencies now reported in the *Treasury Bulletin*. The revised statement includes a larger number of agencies, and their activities are classified according to the type of fund they represent. Funds are combined in the table above, but are shown separately in the table on the following page. Classifications by supervisory authorities are those in existence currently. Where current Treasury compilations do not provide a detailed breakdown of loans, these items have been classified by Federal Reserve on basis of information about the type of lending activity involved.

A few major activities and several minor ones, first reported for June 30, 1956, are not included for later dates, because they are not reporting on a quarterly basis.

*Adjusted totals; these reflect exclusion of data for agencies reporting other than quarterly, the latest data for which are shown at the bottom of the table on the opposite page.

¹ Figures for trust revolving funds include interagency items. For all types of funds combined, loans by purpose and agency are shown on a gross basis; total loans and all other assets, on a net basis, i. e., after reserve for losses.

² Coverage changed from preceding period (see also Note).

³ Adjusted figures; for amounts reported for this date but excluded from this figure, see *BULLETIN* for May 1957, p. 550, note 3.

⁴ Effective Jan. 1, 1957, the production credit corporations were merged in the Federal intermediate credit banks, pursuant to the Farm Credit Act of 1956, approved July 26, 1956 (70 Stat. 659). Thereafter operations of the banks (including the corporations) are classified as trust revolving transactions.

⁵ Less than \$500,000.

⁶ Figures represent largely the Treasury loan to the United Kingdom, and through 1952 are based in part on information not shown in Treasury compilation.

⁷ Figure derived by Federal Reserve.

⁸ Includes investment of the Agricultural marketing revolving fund in the banks for cooperatives; Treasury compilations prior to 1956 classified this item as an interagency asset.

⁹ Figures prior to 1951 are for the Panama Railroad Company. The Panama Canal Company, established in 1951, combined the Panama Railroad Company with the business activities of the Panama Canal (not reported prior to that time).

PRINCIPAL ASSETS AND LIABILITIES OF FEDERAL BUSINESS-TYPE ACTIVITIES

(Based on compilation by Treasury Department. In millions of dollars)

² Preliminary.¹ Consist primarily of interest payments by Treasury to trust accounts and to Treasury by Govt. agencies, transfers to trust accounts representing Budget expenditures, and payroll deductions for Federal employees retirement funds.² Small adjustments to arrive at this total are not shown separately.³ Consists primarily of (1) intra-Governmental transactions as described in note 1, (2) net accruals over payments of interest on savings bonds

and Treasury bills, (3) Budget expenditures involving issuance of Federal securities, (4) cash transactions between International Monetary Fund and the Treasury, (5) reconciliation items to Treasury cash, and (6) net operating transactions of Govt. sponsored enterprises.

⁴ Primarily adjustments 2, 3, and 4, described in note 3.⁵ Excludes net transactions of Govt. sponsored enterprises, which are included in the corresponding columns above.

¹ Revised.² Estimates of new issues sold for cash in the United States.³ Gross proceeds are derived by multiplying principal amounts or number of units by offering price.⁴ Includes guaranteed issues.⁵ Issues not guaranteed.⁶ Represents foreign governments, International Bank for Reconstruction and Development, and domestic eleemosynary and other nonprofit organizations.⁶ Estimated net proceeds are equal to estimated gross proceeds less cost of flotation, i.e., compensation to underwriters, agents, etc., and expenses.⁷ Represents proceeds for plant and equipment and working capital.⁸ Represents proceeds for the retirement of mortgages and bank debt with original maturities of more than one year. Proceeds for retirement of short-term bank debt are included under the uses for which the bank debt was incurred.⁹ Less than \$500,000.¹⁰ Represents all issues other than those for retirement of securities.

¹ Includes 26 companies in groups not shown separately, as follows: textile mill products (10); paper and allied products (15); miscellaneous (1).

² Includes 25 companies in groups not shown separately, as follows: building materials (12); transportation equipment other than automobile (6); and miscellaneous (7).

NOTE.—*Manufacturing corporations.* Sales data are obtained from the Securities and Exchange Commission; other data from published company reports.

Railroads. Figures are for Class I line-haul railroads (which account for 95 per cent of all railroad operations) and are obtained from reports of the Interstate Commerce Commission.

Electric power. Figures are for Class A and B electric utilities (which account for about 95 per cent of all electric power operations) and are obtained from reports of the Federal Power Commission, except that

quarterly figures on operating revenue and profits before taxes are partly estimated by the Federal Reserve to include affiliated nonelectric operations.

Telephone. Revenues and profits are for telephone operations of the Bell System Consolidated (including the 20 operating subsidiaries and the Long Lines and General departments of American Telephone and Telegraph Company) and for two affiliated telephone companies, which together represent about 85 per cent of all telephone operations. Dividends are for the 20 operating subsidiaries and the two affiliates. Data are obtained from the Federal Communications Commission.

All series. Profits before taxes refer to income after all charges and before Federal income taxes and dividends. For detailed description of series, see pp. 662-666 of the BULLETIN for June 1949 (manufacturing); pp. 215-217 of the BULLETIN for March 1942 (public utilities); and p. 908 of the BULLETIN for September 1944 (electric power).

¹ Reflects cash transactions only. As contrasted with data shown on p. 1164, new issues exclude foreign and include offerings of open-end investment companies, sales of securities held by affiliated companies or RFC, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Retirements include the same types of issues, and also securities retired with internal funds or with proceeds of issues for that purpose shown on p. 1164.

^p Preliminary.¹ Derived figures, which include negligible amount of farm loans held by savings and loan associations.² Derived figures, which include debt held by Federal land banks and Farmers Home Administration.

NOTE.—Figures for first three quarters of each year are Federal Reserve estimates. Financial institutions represent commercial banks (including nondeposit trust companies but not trust departments), mutual savings banks, life insurance companies, and savings and loan associations.

Federal agencies represent HOLC, FNMA, and VA (the bulk of the amounts through 1948 held by HOLC, since then by FNMA). Other Federal agencies (amounts small and separate data not readily available currently) are included with individuals and others.

Sources.—Federal Deposit Insurance Corporation, Federal Home Loan Bank Board, Institute of Life Insurance, Departments of Agriculture and Commerce, Federal National Mortgage Association, Veterans Administration, Comptroller of the Currency, and Federal Reserve.

^p Preliminary.¹ Represents all banks in the United States and possessions.² Includes loans held by nondeposit trust companies but excludes holdings of trust departments of commercial banks. March and September figures are Federal Reserve estimates based on data from Member Bank Call Report and from weekly reporting member banks.³ Figures for 1941 and 1945, except for the grand total, are estimates

based on Federal Reserve preliminary tabulation of a revised series of banking statistics. March and September figures are Federal Reserve estimates based in part on data from National Association of Mutual Savings Banks.

Sources.—All-bank series prepared by Federal Deposit Insurance Corporation from data supplied by Federal and State bank supervisory agencies, Comptroller of the Currency, and Federal Reserve.

NOTE.—For loans acquired, the monthly figures may not add to annual totals, and for loans outstanding, the end-of-December figures may differ from end-of-year figures, because monthly figures represent book value of ledger assets whereas year-end figures represent annual statement asset

values, and because data for year-end adjustments are more complete.

Source.—Institute of Life Insurance; end-of-year figures are from *Life Insurance Fact Book*, and end-of-month figures from the *Tally of Life Insurance Statistics* and *Life Insurance News Data*.

¹ Monthly figures do not reflect mortgage amendments included in annual totals.

² These loans are not ordinarily secured by mortgages.

³ Includes a small amount of alteration and repair loans, not shown separately; only such loans in amounts of more than \$1,000 need be secured.

NOTE.—FHA-insured loans represent gross amount of insurance written; VA-guaranteed loans, gross amount of loans closed. Figures do not take account of principal repayments on previously insured or guaranteed loans. For VA-guaranteed loans, amounts by type are derived from data on number and average amount of loans closed.

Sources.—Federal Housing Administration and Veterans Administration.

¹ Represents all consumer instalment credit extended for the purpose of purchasing automobiles and other consumer goods, whether held by retail outlets or financial institutions. Includes credit on purchases by individuals of automobiles or other consumer goods that may be used in part for business.

² Represents repair and modernization loans held by financial institutions; holdings of retail outlets are included in other consumer goods paper.

NOTE.—Monthly figures for the period December 1939 through 1947 and a general description of the series are shown on pp. 336-354 of the BULLETIN for April 1953. Revised monthly figures for the period January 1948-August 1956, together with a description of the revision, are shown on pp. 1031-1042 of the BULLETIN for October 1956. A detailed description of the methods used to derive the estimates may be obtained from Division of Research and Statistics.

¹ Obtained by subtracting instalment credit repaid from instalment credit extended.

Note.—Monthly figures for the period January 1940–August 1956 are shown on pp. 1043–1054 of the BULLETIN for October 1956.

A discussion of the composition and characteristics of the data and a description of the methods used to derive the estimates are shown in the BULLETIN for January 1954, pp. 9–17. Estimates of instalment

credit extended and repaid are based on information from accounting records of retail outlets and financial institutions and often include charges incurred under the instalment contract. Renewals and refinancing of loans, repurchases and resales of instalment paper, and certain other transactions may increase the amount of both credit extended and credit repaid without adding to the amount of credit outstanding.

¹ Data on extensions and repayments for retail outlets and commercial banks have been adjusted to avoid duplications resulting from large transfers of other consumer goods paper. As a result, the differences between extensions and repayments for these institutions do not equal the changes in outstanding credit.

² Obtained by subtracting instalment credit repaid from instalment credit extended, except as indicated in note 1.

NOTE.—Monthly figures for the period January 1940–August 1956 are shown on pp. 1043–1054 of the BULLETIN for October 1956.

A discussion of the composition and characteristics of the data and a description of the methods used to derive the estimates are shown in the BULLETIN for January 1954, pp. 9–17. Estimates of instalment credit extended and repaid are based on information from accounting records of retail outlets and financial institutions and often include charges incurred under the instalment contract. Renewals and refinancing of loans, repurchases and resales of instalment paper, and certain other transactions may increase the amount of both credit extended and credit repaid without adding to the amount of credit outstanding.

SELECTED BUSINESS INDEXES

^a Estimated.^b Preliminary.^r Revised.² The indexes of employment and payrolls, wholesale commodity prices, and consumer prices are compiled by the Bureau of Labor Statistics.

Nonagricultural employment covers employees only and excludes personnel in the armed forces. The consumer price index is the revised series, reflecting, beginning January 1953, the inclusion of some new series and revised weights; prior to January 1953, indexes are based on the "interim adjusted" and "old" indexes converted to the base 1947-49=100.

* Average per working day.

† Three-month moving average, based on F. W. Dodge Corporation data. A description of the index may be obtained from the Division of Research and Statistics.

NOTE.—A number of groups and subgroups include individual series not published separately, and metal fabricating contains the ordnance group in addition to the groups shown. Certain types of combat materiel

are included in major group totals but not in individual indexes for autos, farm machinery, and some other products, as discussed in the BULLETIN for December 1953, pp. 1269–1271.

For description and back figures, see BULLETIN for December 1953 pp. 1247–1293 and pp. 1298–1328, respectively.

^p Preliminary.

n.a. Not available.

¹ Represents units started under commitments of FHA or VA to insure or guarantee the mortgage. VA figures after June 1950 and all FHA

figures are based on field office reports of first compliance inspections; earlier VA figures are estimates based on loans-closed information.

¹ Includes self-employed, unpaid family, and domestic service workers.² Beginning 1957 persons waiting to start new wage and salary jobs and those on temporary layoff, previously considered as employed (with a job but not at work), are classified as unemployed, and a small group in school and waiting to start new jobs (previously included as employed) are classified as *not* in the labor force. September 1957 data comparable to September 1956 shown above are: Labor force, 71,056; employment—total, 65,921; nonagricultural, 59,402; agricultural, 6,519; and unemployment, 2,317.

NOTE.—Information relating to persons 14 years of age and over is obtained through interviews of households on a sample basis. Monthly data relate to the calendar week that contains the 12th day; annual data are averages of monthly figures.

² Preliminary.¹ Revised.

¹ These figures are *not* estimates for all department stores in the United States. They are the actual dollar amounts reported by a group of department stores located in various cities throughout the country. In 1956, sales by these stores accounted for about 50 per cent of estimated total department store sales.

² Derived from the reported figures on sales and stocks.³ Derived from receipts and reported figures on outstanding orders.

⁴ The first three ratios are of stocks and/or orders at the end of the month to sales during the month. The final ratio is based on totals of sales and receipts for the month.

NOTE.—For description and monthly figures for back years, see BULLETIN for October 1952, pp. 1098-1102.

¹ Preliminary.² Monthly data are seasonally adjusted totals at annual rates.³ Represents compensation for injuries, employer contributions to private pension and welfare funds, and other payments.⁴ Represents business and professional income, farm income, and rental income of unincorporated enterprise; also a noncorporate inventory valuation adjustment.⁵ Represents government social insurance benefits, direct relief, mustering-out pay, veterans' readjustment allowances and other payments, as

well as consumer bad debts and other business transfers.

⁶ Prior to 1952 includes employee contributions only; beginning January 1952, includes also contributions to the old-age and survivors' insurance program of the self-employed to whom coverage was extended under the Social Security Act Amendments of 1950. Personal contributions are not included in personal income.⁶ Represents personal income exclusive of net income of unincorporated farm enterprise, farm wages, agricultural net interest, and net dividends paid by agricultural corporations.

Financial Statistics

★ International ★

International capital transactions of the United States..	1196
Gold production	1200
Net gold purchases and gold stock of the United States.	1201
Reported gold reserves of central banks and governments.	1202
Estimated foreign gold reserves and dollar holdings.	1203
International Bank and Monetary Fund.	1204
Central banks	1204
Money rates in foreign countries.	1209
Foreign exchange rates.	1210
Index to statistical tables.	1221

Tables on the following pages include the principal available statistics of current significance relating to international capital transactions of the United States, foreign gold reserves and dollar holdings, and foreign central banks. Figures on international capital transactions of the United States are collected by the Federal Reserve Banks from banks, bankers, brokers, and

dealers in the United States in accordance with the Treasury Regulation of November 12, 1934. Other data are compiled largely from regularly published sources such as central bank statements and official statistical bulletins. Back figures for 1941 and prior years, together with descriptive text, may be obtained from the Board's publication, *Banking and Monetary Statistics*.

² Preliminary. ³ n.a. Not available.¹ Short-term liabilities reported in these statistics represent principally deposits and U. S. Govt. obligations maturing in not more than one year from their date of issue, held by banking institutions in the United States; small amounts of bankers' acceptances and commercial paper and of liabilities payable in foreign currencies are also included.² Includes International Bank for Reconstruction and Development, International Monetary Fund, and United Nations and other international organizations. Excludes Bank for International Settlements, reported under Other Europe.³ Represents funds held with banks and bankers in the United States (and in accounts with the U. S. Treasury) by foreign central banks and by foreign central governments and their agencies (including official purchasing missions, trade and shipping missions, diplomatic and consular establishments, etc.).⁴ Beginning Aug. 31, 1956, and Apr. 30, 1957, respectively, data include certain accounts previously classified as "private."⁵ These data are based on reports by banks in the Second (New York) Federal Reserve District and include funds held in an account with the U. S. Treasury. They represent a partial breakdown of the amounts shown in the "other" categories in tables 1a-1c.⁶ Based on reports by banks in all Federal Reserve districts.

NOTE.—Statistics on international capital transactions of the United States are based on reports by banks, bankers, brokers, and dealers. Beginning with the BULLETIN for June 1954 (as explained on p. 591 of that issue), tables reflect changes in reporting forms and instructions made as of Mar. 31, 1954, as well as changes in content, selection, and arrangement of material published. For discontinued tables and data reported under previous instructions, see BULLETIN for May 1954, pp. 540-545.

^p Preliminary.

1 Short-term claims reported in these statistics represent principally the following items payable on demand or with a contractual maturity of not more than one year: loans made to and acceptances made for foreigners; drafts drawn against foreigners that are being collected by banking institutions on behalf of their customers in the United States; and foreign currency balances held abroad by banking institutions and their customers in the United States. Claims on foreigners with a contractual maturity of more than one year reported by U. S. banking institutions

(excluded from these statistics) amounted to \$1,004 million on July 31, 1957. The term foreigner is used to designate foreign governments, central banks, and other official institutions as well as banks, organizations, and individuals domiciled outside the United States, including U. S. citizens domiciled abroad and the foreign subsidiaries and offices of U. S. banks and commercial firms.

² Less than \$500,000.³ Includes transactions of international institutions.

¹ Gold exports, representing about 90 per cent of total production.

Sources.—World production: estimates of U. S. Bureau of Mines. Production reported monthly: reports from individual countries except

Ghana and Belgian Congo, data for which are from American Bureau of Metal Statistics. For the United States, annual figures through 1955 are from the U. S. Bureau of the Mint and figures for 1956 and 1957 are from American Bureau of Metal Statistics.

² Preliminary.

¹ Represents reported gold holdings of central banks and governments and international institutions, unpublished holdings of various central banks and governments, estimated holdings of British Exchange Equalization Account based on figures shown below under United Kingdom, and estimated official holdings of countries from which no reports are received.

² Includes gold in Exchange Stabilization Fund. Gold in active portion of this Fund is not included in regular statistics on gold stock (Treasury gold) used in the Federal Reserve statement "Member Bank Reserves,"

Reserve Bank Credit, and Related Items" or in the Treasury statement

"United States Money, Outstanding and in Circulation, by Kinds."

³ Represents holdings of Bank of France (holdings of French Exchange Stabilization Fund are not included).

⁴ Exchange Equalization Account holdings of gold and of United States and Canadian dollars, as reported by British Government. (Gold reserves of Bank of England have remained unchanged at \$1 million since 1939, when Bank's holdings were transferred to Exchange Equalization Account.)

ESTIMATED GOLD RESERVES AND DOLLAR HOLDINGS OF FOREIGN COUNTRIES AND INTERNATIONAL INSTITUTIONS

^p Preliminary.

¹ Excludes gold holdings of French Exchange Stabilization Fund.

² Does not include \$286 million of gold loaned by Bank of France to the French Exchange Stabilization Fund on June 26, 1957.

³ Less than \$500,000.

⁴ Includes latest available figures for gold reserves, as follows: Italy (May 31); Australia (Mar. 31); Colombia (Feb. 28); and Mexico (May 31).

⁵ Includes Yugoslavia, Bank for International Settlements (both for its own and European Payments Union account), gold to be distributed by the Tripartite Commission for Restitution of Monetary Gold, and unpublished gold reserves of certain Western European countries.

⁶ Excludes gold reserves of the U. S. S. R.

⁷ Represents International Bank for Reconstruction and Development, International Monetary Fund, and United Nations and other international organizations.

Note.—Gold and short-term dollars include reported and estimated official gold reserves, and total dollar holdings as shown in Short-term Liabilities to Foreigners Reported by Banks in the United States, by Countries (tables I and Ia-Ic of the preceding section). U. S. Govt. bonds and notes represent estimated holdings of such securities with original maturities of more than one year; these estimates are based on a survey of selected U. S. banks and on monthly reports of security transactions. For back figures see BULLETIN for March 1956, pp. 304-305.

Notes to central bank table on this and opposite page:

1 Notes issued, less amounts held in banking department.

2 Gold was transferred on May 1, 1940, to Foreign Exchange Control Board in return for short-term Govt. securities (see BULLETIN for July 1940, pp. 677-678).

3 Other assets include 100.0 billion francs of gold loaned to Stabilization Fund.

4 Beginning 1950, includes Economic Cooperation Administration.

5 Less than 50 million francs.

NOTE.—All figures, including gold and foreign exchange, are compiled from official reports of individual banks and are as of the last report date of the month. For details relating to individual items, see BULLETIN for April 1955, p. 443. For last available report from the Reichsbank (February 1945), see BULLETIN for December 1946, p. 1424.

⁴ On Aug. 1, 1957, the Land Central Banks and the Berlin Central Bank were merged with the Bank of German States (Bank deutscher Länder) and the latter became the German Federal Bank (Deutsche Bundesbank).

⁵ In October 1956, gold held by bank was revalued from 8.47512 to 2.88 grains of fine gold per rupee.

⁶ Includes (1) gold and foreign exchange in banking department and

(2) in May 1957, the profit resulting from revaluation of gold from .0275557 to .0117316 grams of fine gold per rial.

⁷ Holdings in each month were 448 million yen.

⁸ Includes gold, silver, and foreign exchange forming required reserve (25 per cent) against notes and other demand liabilities.

For other notes see opposite page.

¹ Rates shown represent mainly those at which the Central bank either discounts or makes advances against eligible commercial paper and/or government securities for commercial banks or brokers. For countries with more than one rate applicable to such discounts or advances, the rate shown is the one at which the largest proportion of central bank credit operations is understood to be transacted. In certain cases other rates for these countries are given in the following note.

² Discounts or advances at other rates include: Japan—various rates depending on type of paper or transaction and extent of borrowing from central bank, including 8.40 per cent for discount of paper related to domestic commercial transactions (rate shown is for advances on commercial paper and miscellaneous collateral); Chile—rates in excess of 6 per cent

are applied to rediscounts in excess of 50 per cent of the rediscounting bank's capital and reserves; El Salvador—3 per cent for agricultural and industrial paper; Indonesia—various rates depending on type of paper, collateral, commodity involved, etc.; Costa Rica—5 per cent for paper related to commercial transactions (rate shown is for agricultural and industrial paper); and Peru—4 per cent for industrial paper and mining paper, and 3 per cent for most agricultural paper.

³ Since Nov. 1, the discount rate is set each week at $\frac{1}{4}$ per cent above the latest average tender rate for Treasury bills.

⁴ Since May 16, this rate applies to advances against commercial paper as well as against government securities and other eligible paper.

¹ Annual averages based on quotations through Oct. 27, 1955.² Official rate. The basic and preferential rates were discontinued and the new official rate of 18 pesos per U. S. dollar became effective Oct. 28, 1955.³ New free market rate became effective Oct. 28, 1955.⁴ Effective Sept. 16, 1957, the Finnish markka was devalued from 230 to 320 markkaa per U. S. dollar.⁵ On Aug. 12, 1957, the French authorities established an effective rate of 420 francs per U. S. dollar applicable to most foreign exchange transactions. The rate of 350 francs per U. S. dollar will remain in effect for all other transactions.⁶ Based on quotations beginning Nov. 26, 1956.
